ITTIHĀD, 'becoming one'. Muslim scholastics distinguish two kinds of *ittiḥād*, 1) 'real' (*ḥaqīqī*); 2) 'metaphorical' (*maǧāzī*). The former class has two subdivisions, according as the term is applied a) to two things which become one, e.g., 'Amr becomes Zaid, or Zaid becomes 'Amr; b) to one thing which becomes another thing that was not existent before, e.g., Zaid becomes some individual who did not previously exist. *Ittiḥād* in this 'real' sense is necessarily impossible; hence the saying, *al-ithnān lā yattahidān*. The 'metaphorical' class has three subdivisions, according as the term denotes a) one thing's becoming another thing by instantaneous or gradual transformation, e.g., water becomes air (in which case the real nature of water is destroyed by the removal of its specific form from its substance, and to this substance the specific form of air is added), or black becomes white (in which case one attribute of an object disappears and is replaced by another attribute); b) one thing's becoming another thing by means of composition, so that a third thing results, e.g., earth becomes clay by the addition of water; c) the appearance of one person in the form of another, e.g., of an angel in the form of a human being. All these three species of 'metaphorical' *ittiḥād* actually occur. In the technical language of the Sūfis, the name *ittiḥād* is given to the mystical union by which the creature is made one with the Creator, or to the theory that such a union is possible. This conception of the unitive state, like the parallel doctrine of *ḥulūl*, i.e. the doctrine that the Creator becomes incarnate in the creature, is generally regarded by the Sūfis as heretical, on the ground that it involves homogeneity and is therefore inconsistent with the true notion of divine unity (*tawḥīd*), which admits no real existence except that of God. *Ittiḥād*, thus understood, presupposes the existence of two beings which are made one, whereas, according to the more orthodox mystics, human individuality is only a phenomenon that passes away in the One Eternal Reality (*fanā fi 'l-Ḥaqq*). Sometimes the term *ittiḥād* is employed like the Sūfistic *waḥdat* or *tawḥīd*, in reference to the doctrine that all things are non-existent in themselves, but derive their existence from God and, in this respect, are one with God ('Abd al-Razzāk al-Kāshī, *al-Istīlāḥāt al-Sūfiyya*, ed. by Sprenger, p. 5). According to 'Alī b. Wafā' (quoted by Sha'rānī in *al-Yawāqūt wa 'l-Djawāhir*, Būlak, 1277 A. H., p. 80, l. 18 sqq.), the meaning of *ittiḥād* in the terminology of the Sūfis is "the passing away of that which is willed by the creature in that which is willed by God".

Bibliography: Dictionary of the Technical Terms used in the Sciences of the Mussalmans, ed. by Sprenger, p. 1468; Djurdjāni, *Ta'rifāt*, ed. by Fluegel, p. 6; Hudjwiri, *Kashf al-Mahjūb*, translated by Nicholson, p. 254; Maḥmūd Shabistari, *Gulshan-i Rāz*, ed. by Whinfield, ll. 452—455; Tholuck, *Sufismus*, p. 141 sqq.; Macdonald, *The religious Attitude and Life in Islam*, p. 258. (NICHOLSON.)

IWAD (A.) means in Muslim law all that must be given or done as a guarantee of the fulfilment of what the other party is pledged to, in a contract or sale or other agreement.

(TH. W. JUVENBOLL.)

IYĀD, a great Arab tribe belonging to the

Ma'addī (Ismā'īlī) group. Their genealogy is Iyād b. Nizār b. Ma'add b. 'Adnān. The Rabi'a, Anmār and Muḍar were consanguineous tribes of the Iyād. A section of the Iyād professed Christianity. The poet Abū Dū'ād, famous for his descriptions of the horse, and the celebrated Ḳuss b. Sā'ida were members of the Iyād.

At first they dwelt in Tihāma up to the borders of Naǧrān [q. v.]. In the first half of the iiird century they emigrated in large bodies to Eastern 'Irāk and thence to Mesopotamia. Among their settlements were: Anbār (they are said to have the first to introduce the Arabic characters there), 'Ain Ubāgh (behind Anbār), Sindād, Takrit, Baṭn Iyād (lying towards Kūfa), Bā'idja, Dǧā'iz, al-Djabal (in the 'Irāk), Dǧaww Zuraif, al-Haffa, Khidād, Mawthib (Mawthab), al-Mustarād, al-Salawṭah, Shibāk, al-Shakīka (in the 'Irāk), Suwwa 'l-Adǧdād, al-Tha'labiya (between Mekka and Medina), al-'Udna. Among the waters of the Iyād were Laṣāf and al-Lifāz.

A section of the Iyād, probably before these large emigrations to the 'Irāk, joined the Ḳuḍā'a when the latter migrated from Tihāma to Bahrain; another remained in Wādī Bisha [q. v.]. We also find scattered settlements of the Iyād in Syria, e.g. in Antioch, Ḥimṣ (Emessa), Ḥalab, and in Greek territory at Ancyra (Angora in Asia Minor), Bagras (Πάγραι), etc.

History: Towards the beginning of the iiird century of our era a quarrel arose between the Iyād and Muḍar regarding the possession of the Ka'ba, which also involved dominion over Mecca, after the two tribes in alliance had driven the Dǧurhum from Mecca. The Iyād were defeated and emigrated to the 'Irāk, where they established themselves mainly in 'Ain Ubāgh and in scattered settlements south of al-Hira. During the first period of their sojourn in the 'Irāk the Iyād were exposed to the invasions of Dǧadhima b. Mālik of the Azd, whose rule extended over all the Arabs in the 'Irāk. Dǧadhima demanded from them the surrender of their relative, 'Adī b. Rabi'a; after long hesitation the Iyād submitted and delivered 'Adī up, who then married Rikāsh, sister of Dǧadhima.

In the 'Irāk the Iyād seem to have acknowledged the suzerainty of the Lakhmid princes of al-Hira. During the wars of Mundhir b. Mā 'al-Samā' against the Kinda chief al-Ḥarith b. 'Amr b. Ḥudjr we find them in Mundhir's train. At the beginning of the viith century, the Iyād made inroads into Persian territory. They crossed the Euphrates. A detachment of Persian cavalry sent against them was completely destroyed by them near Kūfa [see DAIR AL-DJAMĀDJIM]. To defend himself against their inroads and to take vengeance on them, Khusrāw (Kisrā) Anūshirwān sent an army against them under Mālik b. Ḥāritha, which is said to have included a detachment of the Bakr b. Wā'il [q. v.]. In spite of the warning given them by their fellow tribesman, the poet Lakīf, the Iyād were surprised and put to flight. The Persians followed them and, according to a tradition, inflicted a considerable defeat on them at the village of al-Ḥuradǧiya. In consequence of their defeat, they are said to have retired into Syria. One section of them reached Byzantine territory at Ancyra, where they found others of their tribe already settled. An isolated tradition mentions a punitive expedition by the Persian king Sapōr (Sabūr) Dhu 'l-Aktāf in the ivth century against the Iyād, but there is probably confu-

sion here between Sabūr and Kisrā. In the battle of Dhū Kār [see BAKR B. WĀ'IL] they fought alongside the Kuḏāfī tribes of Mesopotamia under Khālid b. Yazīd al-Bahrānī on the side of the Persians. A section of the Iyād had made secret arrangements with the Bakr and took to flight during the battle, thereby throwing the Persian lines into disorder. After the battle of Dhū Kār they, like the other Christian Arab tribes of Mesopotamia, remained a few more years under Persian suzerainty. In the battle of 'Ain Tamr (near Anbār) we find them on the side of the Persians along with the Mesopotamian tribes under Mihrān b. Bahrām Djubīn. In the reign of Abū Bakr, in the year 12 (634), a large number of the Iyād, like many of the Tamīm and the Christian Arab tribes of Mesopotamia, joined the false prophetess Sadjāh [q. v.]. In the same year Khālid b. al-Walīd [q. v.] inflicted a serious defeat on them and the Persians, on whose side they fought, at Firād (on the East bank of the Euphrates). In the caliphate of 'Omar, in the spring of the year 17 (638), the Byzantine Emperor Heraclius made the last effort to regain the province of Syria, which had been lost to the Muslims. For this purpose he sent a large army which included Iyād along with the tribes on the Euphrates and Tigris to Hīmṣ, the siege of which was begun. In the meanwhile the Muslims invaded Mesopotamia and conquered Takrīt, secretly supported by the Christian Arab soldiers in the city, among whom were Iyād, who then adopted Islām. When the Mesopotamian tribes besieging Hīmṣ heard of a raid into Mesopotamia and the approach of an army, they abandoned the Byzantine army in order to defend their threatened homes. The Arabs in Kinnasrīn, Ḥalab, and other Syrian cities, who had previously joined the Byzantine army, negotiated secretly with Khālid b. al-Walīd and attacked the Byzantines, who were beaten and had to take to flight. The remnants of the Byzantine troops including Iyād retired to Cilicia, whither they were followed by the Muslims and almost entirely wiped out. When in the following year 18 = 639, Iyād b. Ghanm succeeded Abū 'Ubaida [q. v.] as governor of Hīmṣ, Northern Syria and Mesopotamia, all the Mesopotamian tribes submitted and adopted Islām with the exception of the Iyād, who fled to Cappadocia in Asia Minor. Here, however, they only enjoyed their security for a brief space, for the Caliph 'Omar demanded their extradition from the Emperor Heraclius under a threat of reprisals against the Christians in his provinces, and Heraclius was forced to agree. Four thousand of the Iyād then went to Syria and Mesopotamia and submitted to the Caliph. In later times we hear almost nothing of them.

IYĀD B. MUSA, ABU 'L-FADL IYĀD B. MUSA B. IYĀD AL-YAḤṢUBI AL-SABTĪ AL-MĀLIKĪ, known as AL-KĀDĪ IYĀD, a Mālikī jurist, traditionalist, historian, man of letters and poet, born at Ceuta on Sha'bān 15, 476 (Dec. 29, 1083) and died at Marrākūsh, 7 Djumādā II (13 Oct.) or Ramaḍān 11 Dec. 544 (1149).

After studying in his native town he went in 507 (1114) to Cordova where he devoted himself particularly to Ḥadīth and attended the lectures of Abū Muḥammed 'Abd Allāh b. 'Attāb and Abū 'l-Walīd Ibn Rushd. His teachers numbered a hundred. He returned to his native town and held the office of Kāḏī where his administration was much appreciated. In 531 (1136-7) he became Kāḏī of Cordova but after a time again became Kāḏī of Ceuta. He was one of the first to welcome the arrival of the Almohads and went to Salā to pay homage to their chiefs, but when he saw in 543 (1148-9) that the Almohad dynasty was weakened by discords he fled from his native town and took refuge in Marrākūsh, where he died and was buried near the Bāb Ailān.

Of the twenty works attributed to him we only know the following: 1^o. *Kitāb al-Shifā bi-Ta'rif Huḥuk al-Muṣṭafā*, apologetic history of the Prophet, publ. at Constantinople, n. d. and in 1329, Cairo, 1276, 1312 and 1327 (voc. ed.); 2^o. *Mashārik al-Anwār fī Iktifā' Ṣaḥīḥ* (var. *'alā Ṣaḥīḥ*) *al-Aḥkār*, dictionary of rare terms found in the *Muwatta'* of Mālik, *Ṣaḥīḥ d'al-Bukhārī* and *Ṣaḥīḥ* of Muslim, Alger, Fagnan, *Cat.*, n^o. 540; Khed. Libr., *Fihrr.*, i. 420; 3^o. *Kit. Ṭarīb al-Madārik wa-Takrīb al-Masālik li-Ma'rifat A'lām Madhhab Mālik*, biographical dictionary of Mālikī scholars, Zaouyah d'al-Hamel, *Giorn. della Soc. asiat. ital.*, x. 56-7; Madrid, Real Academia, Cordera, *Misión hist.*, p. 175, n^o. 35; Part i., stopping at the end of 200, in my possession; extracts with transl. in *Centenario della nascita di Michele Amari*, Palermo 1910, i. 251—276 and 365—384, ii. 133; 4^o. *Kitāb al-Ilmā ilā Ma'rifat Uṣūl al-Riwāya wa-Takrīb al-Samā'*, theory of the transmission of ḥadīth, Aya-Sofya, n^o. 433^{bis}; Casiri, *Bibl. Arab.-Hisp.*, i. n^o. 1567; 5^o. *Ikmāl al-Mu'lim fī Sharḥ Ṣaḥīḥ Muslim*, Constantinople, Nūrī 'Othmāniya, n^o. 1035 and Rāghib Pasha, n^o. 310; Casiri, i. n^o. 1003—6; 6^o. *al-Tanbihāt al-mustanbata 'ala 'l-Kutub al-mudawwana*, Casiri, i. n^o. 987, cf. n^o. 986; 7^o. *Bughyat al-Rīd ilā mā tadammā nahu Ḥadīth Umm Zar' min al-Fawā'id*, commentary on the story of Umm Zar' related by the Prophet, Berlin, n^o. 1585-6; 8^o. *Kit. al-Ilām bi-Hudūd Kawā'id al-Islām*, exposition the five bases (*kawā'id*) of Islām, probably Casiri, o. c., i. n^o. 1555, i.; with the comment. of al-Kabbāb, Alger, Fagnan, *Cat.*, n^o. 570; 9^o. *Qaṣida* on the five last words of Qur'ān lxx. 7, Berlin, n^o. 7691, i.; 10^o. *Aḳida*, credo, Khed. Libr., *Fihrr.*, vii. 295 (with anonymous commentary).

Araber*, Göttingen 1882, p. 89, n^o 246; Pons Boigues, *Ensayo bio-bibliografico*, Madrid 1898, p. 218, n^o 174, and p. 505; Brockelmann, *Gesch. d. arab. Litt.*, i. 369 sq., ii. 700; Huart, *Litt. arabe*, p. 232; Moh. Ben Cheneb, *Et. sur les pers. ment. dans l'Idjāza du cheikh Abd el-Qādir al-Fāsī*, n^o 90; T. Andrae, *Die Person Mohammeds*, Upsala 1917, p. 60. 112, 118 q., 147 sqq. (MOH. BEN CHENEb.)

IYAS b. MU'AWIYA was appointed kādi of Baṣra by 'Omar b. 'Abd al-'Aziz and died at the age of 76 in 121 or 122 (739-740). He has become proverbial in Arabic literature on account of the many examples of ready wit and intuition (*askanu min Iyās*, Freytag, *Prov. Arab.*, i. 593) related of him, which were collected by so early a writer as al-Madā'īnī in a work (*Zakan Iyās*). In this way he has become a familiar figure in literature (cf. R. Basset, *Revue des Traditions populaires*, vi. 67).

Bibliography: Ibn Khallikān, *Wafayāt*, ed. Cairo 1299, i. 143 sqq.; Ibn Nubāta, *Sharḥ al-Uyūn 'ala Risālat Ibn Zaidūn*, Alexandria 1290, p. 73 sqq. (on the margin of al-Ṣafādī, *Sharḥ Lāmīyat al-Adjam*, i. 142 sqq.); al-Shārīshī, *Comm. on al-Ḥarīrī, Maḳāmāt* (vii.).

IZMİD (older forms: IZNUKUMİD; IZNIKİMİD; in Ibn Khordādhbeh and Idrīsī: NIKUMİDİYA; in modern times officially written IZMİR), the ancient Nicomedia, capital of the independent *Līvā* (*mutesarrıflık*) of the same name (cf. KÖRJA-İLİ). The town was taken by the Saldjūks on their invasion of Asia Minor at the end of the xith century and belonged to the lands of Sulaimān b. Kutlumush (470—479 = 1078—1085) who had chosen Nicaea as his capital; shortly after his death it was recaptured by Alexius I Comnenus (Anna Comnena, ed. Reifferscheidt, i. 212, cf. 247, ii. 72) and, apart from the brief period when the Latin Emperors of Constantinople held the town (1204—1207), remained in possession of the Byzantines till it was taken from them by the Ottomans under Örkhan, according to the Turkish sources, in 727 (1325-26) or 726 (1326-7) or 731 (1230-31), according to Byzantine sources, in 1338, cf. v. Hammer, *Gesch. des Osm. Reiches*, i. 85 and 580; for the legends associated with the Turkish conquest see Leunclavius, *Hist.*, p. 186-190; Sa'd al-Dīn, i. 34—37; Christo Papadopoulos, p. 65 sq.). In 1399 Marshal Boucicaud had to turn back from the strong walls of the city (J. Dela-ville Le Roulx, *La France en Orient au XIV^e Siècle*, p. 371); in 1402 it was sacked by a body of Timūr's troops (Ducas, Bonn ed., p. 72). Under Turkish rule Izmid acquired special importance as an arsenal for the navy and as a yard for building small merchant vessels from the wood supplied by the rich forests of the neighbourhood. The arsenal, said to have been founded by the Köprülü's, abandoned since the middle of last century, was to have been restarted again by English engineers. The population of the town may be put at 25 000, of whom the majority are Muslims, and the non-Muhammadian element is represented by a strong Armenian community (which immigrated from Persia at the beginning of the xvith

century), several hundred Greeks, and a small Jewish community. Since 1873 Izmid has been connected by rail with Constantinople (terminal station Haidar Pasha; distance 70 miles) and since 1892 with Angora. — Only insignificant ruins exist of the ancient and mediaeval buildings; the Byzantine fortifications on the hill are better preserved, which Busbecq and Belon still saw in their original form in the xvth century. Of the Turkish buildings we may mention the madrasa founded by Sultān Örkhan in the upper city (originally a church; restored by 'Abd al-Madīd); the mosques of Pertew Pasha, Muḥammad Bey and 'Abd al-Salām Bey, built by the architect Sinān, the baths of Rustam Pasha and the Khān of Pertew Pasha. The pleasure palace with park (*sarāi baghçesi*) built by Murād IV has disappeared; another was built by Maḥmūd II and restored by 'Abd al-'Aziz. Among the Greek churches the oldest is that of St. Panteleimon, said to be also the tomb of this patron of the city; destroyed in the reign of Murād IV, it was rebuilt in 1700 and again restored in 1861. In the neighbourhood of Izmid lay the Champ des Fleurs (*Çiçek Meidāni*), where Emerich Thököly, prince of Transylvania, spent his last years, till his death on Sept. 13, 1705 in a voluntary exile (De la Motraye, *Voyages*, i. 309; Paul Lucas, *Voy. dans la Grèce, l'Asie Min.*, etc. Amsterdam 1714, i. 49); his remains buried in the Armenian cemetery were brought to Hungary in 1906 with his tombstone (cf. von Hammer, *Umblick*, p. 192).

(J. H. MORDTMANN.)

IZMİR (SMYRNA), the most important commercial town in Asiatic Turkey and the residence of the Wālī of the province of Aidin. The form Izmir (in Ibn Battūta: Yazmir) corresponds to the form used by Westerners in the middle ages, *Smire*, *Zmirra*, etc. (Tomaschek, p. 28; *Esmira* in Ram Muntaner, c. 202; *Ismira* in Schiltberger). On the incursion of the Saldjūks into Asia Minor at the end of the xith century the Turk Tzachas (TÇAZĀS, only in Anna Comnena), the father-in-law of Kılıdj Arslān I, who lived in Nicaea, established himself in Smyrna and undertook from there his campaigns of conquest against the islands of the Archipelago and the Hellespont; it was only after the Saldjūks were driven from Nicaea (June 1097) that Smyrna was restored to Byzantine rule. John Vatatzes Dukas, emperor of Nicaea (1222—1255), laid out the great system of defences on the Pagus hill (*Corp. Inscr. Graec.*, N^o 8749), which commands the town. After the dissolution of the Saldjūk king-

dom of Kōnya, Aidin, Amīr of Ephesus, seized the town about 1320, and it once more, as in the days of Tzachas, became the base for piratical raids against the islands of the Archipelago and the merchant ships of the Franks. To put an end to this the naval powers concerned combined under the aegis of the Pope and stormed Smyrna on Oct. 28th 1344 (Heyd, *Histoire du Commerce du Levant*, i. 538). The Knights of Rhodes, to whom the defence of the town was entrusted, built at the harbour the fort of St. Peter, near the later customs-house, which survived up till about fifty years ago. The citadel, on the other hand, remained in the hands of the Aidin-oghlu; Bayazid I, who dispossessed them, installed a *sūbāshī* (city governor) there. It was not till January 1403 that Tīmūrlenk stormed the Frankish fort and drove the knights out of Smyrna (Sharaf al-Dīn, *Zafarnāma*, ii. 464—477; Dukas, p. 72 sqq.; Chalkokondylas, p. 161, cf. von Hammer, *Gesch. d. osm. Reiches*, i. 332 sq. and 626 sq. After the withdrawal of Tīmūrlenk from Asia Minor the adventurer Djunaid [q. v., i. 1063^b sq.] seized the town; on his overthrow, about 1425, the town passed definitely under Ottoman rule.

The further history of the town is of little general interest. On Sept. 13, 1472, Smyrna was attacked by the Venetian fleet under Pietro Mocenigo, plundered and set on fire (Hopf, *Chroniques Gréco-Romanes*, p. 207; Cippico, *Delle Guerre de' Veneziani nell' Asia*, p. xxvi sqq.; Zinkeisen, *Gesch. d. Osm. Reiches*, ii. 405). In the later wars of the Turks with the European sea-powers, the latter, in view of the numerous European inhabitants have repeatedly refrained from attacking the town, for example the Venetians in the autumn of 1694, when after the fall of Chios the Turkish fleet had retreated before them into the Gulf of Smyrna (Kantemir, *Gesch. des Osman. Reiches*, p. 649; Zinkeisen, *op. cit.*, v. 175) and the Russians in 1770 after they had destroyed the Turkish fleet near Çeşme (Ypsilanti, *Tà μετὰ τὴν ἄλωσην*, p. 466 sq.; cf. v. Hammer, *Gesch. d. Osman. Reiches*, viii. 358). As a defence against such attacks from the sea, the Porte after the battle in the Dardanelles (June 26, 1656) in the war with Venice built defences at the narrowest part of the Gulf on Cape Sandjak Burnu, called Sandjak Kal'esi (saluting fort) or Yenikal'e, which was completely destroyed by the earthquake of July 10, 1688 and then imperfectly rebuilt. In modern times the batteries were remounted and mine barriers laid during the recent wars.

From the land Smyrna has been repeatedly ravaged by the turbulent Djalālī and Ra'yā, who were a plague to Anatolia from the beginning of the xviiith century, e.g. in 1600 by the hordes of Kälenderoghlu and Kara Sa'īd (Sandys, *Travailes*, 6th ed., London 1658, p. 12; cf. v. Hammer, *op. cit.*, iv. 398), in 1625 by Djennet-oghlu of Karamani (Roe, *Negotiations*, p. 410; Zinkeisen, *op. cit.*, iv. 55 sq.), and in 1736 by Şaribey-oghlu of Khōnās (Pococke, ii. 2 p. 38; Ipsilanti, *op. cit.*, p. 334). Equally dreaded were the regular visits of the Barbary corsairs, who till the conquest of Algeria by the French had the permission of the Porte to recruit their crews from Smyrna and the neighbourhood (Dumont, *Voyages*, 1699, iv. 106 sqq.; Tournefort, ii. 198; Djewdet, *Ta'rikh*, iv. 23, vii. 183, x. 233). The Jewish community of Smyrna produced in the xviiith century the Messianic he-

retic Sabbatai Sebi, the founder of the Dönme [q. v.] sect (crypto-Jewish Muslims), which is still represented by a small body (cf. the contemporary narrative of Rycaut, the English consul at Smyrna, in the continuation of Knolles, *History of the Turks*, ii. 174 sqq.).

The town was twice visited by earthquakes and almost destroyed. In the first, that took place in July 10, 1688 (Ramadān 12, 1099), the Sandjak Kal'esi was overwhelmed by the waves, most of the buildings collapsed, and thousands of people — at the lowest estimate 5000 — perished among the ruins (Rāshid, *Ta'rikh*, i. 147^a; Rycaut, *Turkish History*, p. 301 sq.; Carayon, *Relations inédites des Missions de la Compagnie de Jésus*, p. 291 sqq.; Pacificus Smit, *Vier jaren in Turkije*, p. 178 sqq., 246 sq.; De la Motraye, *Voyages*, i. 182 sq.; Slaars, p. 76, 128). The second took place on July 3 and 5, 1778 and did equal damage, chiefly through the conflagration which broke out among the falling buildings (Björnsthål, *Briefe*, iv. 131—147; Slaars, p. 132 sq.). Almost equally dangerous was the rioting which broke out on March 14, 1797 as a result of a quarrel between Cephalonians and Croats, and spread fire and death through the town (Djewdet, *op. cit.*, vi. 220 sq.; Zinkeisen, *op. cit.*, vii. 13 sq.). During the war of the Porte with Egypt, on Febr. 19, 1833, emissaries of Ibrāhīm Pasha, after he had defeated the Turks at Kōnya (21 Dec. 1832) and advanced to Kiutāhya, occupied Smyrna for Muḥammad 'Alī but retired again after a few weeks (Rosen, *Gesch. der Türkei*, i. 171).

Smyrna is singularly poor in historical monuments. Nothing worth mentioning is left of the remains of antiquity. The amphitheatre and the circus, in which St. Polycarp, the patron saint of Smyrna, suffered martyrdom, were destroyed in the xviiith century and the materials used to build the Bezestīn and the Wazīrkhan (v. infra). The alleged tomb of Polycarp near the circus was changed into the grave (*türbe*) of a Muslim saint at the beginning of the xviiith century. The Byzantine castle on Mt. Pagus has for years been abandoned and left to decay; the old mosque and the great cistern (*kırk direk*), both presumably of Byzantine origin, are in ruins, and the historical foundation inscription of John Vatatzes, as well as the ancient colossal head of the so-called Amazon, which was formerly built into the wall over the entrance gate of the castle and formed the badge of the town, have in recent times been ruthlessly destroyed. The Turks considered this head to be that of Kaidafā, queen of Saba and therefore called the castle Kaidafā Kal'esi, which in the popular language has been corrupted into Kādifa Kal'esi (Velvet Castle). Among the numerous mosques (ca. 20 large, *djāmi'*, and 46 small, *masjid*) the following are specially mentioned: Hışār Djāmi' (said to be the old Frankish cathedral), Shadrewān Djāmi', Kestāneparāri Djāmi' (traditionally said to have been at one time a Greek church), Kemer-altı Djāmi', Hādjdī Husain Djāmi'; the large Wazīrkhan and the Bezestīn were built in the years 1675—1677 by the Grand Vizier Aḥmad Köprülü. Other old *khan*'s (warehouses) are the Derwishoghlu Khān, Madama Khān, and the Kara 'Oṭmān-zāde Khān. A peculiarity of Smyrna are the numerous arcades of the Frankish quarter, the so called *Ferikhāne*'s (corrupted from *Frenkkhāne*). In the year 1108

(1696—7) a mint was instituted in Smyrna to strike ducats (*ashrafî*) and silver piastres (*ghurush*); it closed after a few years however (Rāshid, *Tārīkh*, i. 226a; cf. Ismā'il Ghālib, *Taḳwīm-i Meski'ūkāt-i 'Othmāniye*, n^o. 597—600). Its great importance as a place of export for the products of the soil and industries of the interior (gums, figs, cotton, poppy seeds, opium, valonia, licorice, carpets, etc.) was attained by Smyrna in the xviith century. The goods of more distant lands, e. g. Persian silk and the camelots of Angora in those days and down to modern times found their way to the west via Smyrna. Numerous English and Dutch merchants settled there and the English colony has played a distinguished part in the development of the country, economic and cultural. Trade with Persia and Angora resulted in a considerable immigration of Armenians. The Jews (Sefardim) had the exclusive right to serve as brokers. The Europeans lived in the Frank quarter and conducted themselves there with the same freedom as in their own land. They were later joined by a strong community of trading Greeks, while the Muḥammadan element was gradually driven into the back ground. Gīaur Izmiri ("infidel Smyrna") therefore became a name of the town; the quarter of the town inhabited by the Rhodians was already so called by Timūr's time in contrast to the upper town, which remained in the hands of Muslims (*Izmīr-i Gabrān* in Sharaf al-Dīn). — The present population is estimated at about 300 000, of whom 90 000 are Muslims, 110 000 Greeks, 30 000 Jews, 15 000 Armenians, 55 000 foreigners, including 30 000 Hellenes.

IZNİK, the ancient and Byzantine Nicaea (*Nikiya* in Ibn Khordādhbih and al-Idrīsī), was besieged in vain by the Arabs in their first campaigns against Byzantium in 717 and 725 (Theophanes, ed. de Boor, i. 397 and 405 sqq.) and fell at the beginning of 1081 into the hands of the Saldjūk Sulaimān, son of Kutlumush, who made his residence there. The first Crusaders under Walther Habenichts were severely defeated before Nicaea in 1096 by Alp Arslān, son and successor of Sulaimān; next year, however, the town could not withstand the onslaught of the Crusaders, led by Godfrey de Bouillon, and surrendered on June 19/20, 1097 to the Byzantines in alliance with the Crusaders, in whose possession it remained till the Ottoman invasion. Sultān 'Othmān I is said to have attacked Nicaea, but it was not till the time of Orkhān that it was taken after a prolonged siege in 731 (1331); he moved his capital thither for a time ('Ashīk-pashazāde and Leunclavius, *Hist.*, p. 195; cf. Nicephorus Gregoras, iii. 508 sq.). In 1402 the town was taken and devastated by a raiding body of Timūr's troops (Ducas, p. 72; Sheref al-Dīn, *Zafarnāma*, ii. 454), but it soon recovered from this blow, and it is described as flourishing and prosperous at the time of the rebellion of Prince Muṣṭafā (Leunclavius, *Hist.*, p. 525, l. 46); Bāyazīd II is said to have intended after the death of his father, Muḥammad II, to renounce the throne and retire to Nicaea.

The decline of the town began about the middle of the xviith century; the population then estimated at 10,000 (Grelot) has since sunk to 1500. The once flourishing manufacture of faience tiles (*čini*), which Otter (*Voyage en Turquie*, i. 44) still found working in 1736, has now ceased. Only a slight memory of it, no longer understood, remains in the name Činīzlik (for Činī Iznīk, "faience Iznīk"), which the town popularly bears. The present village occupies a small part of the area surrounded by the town walls and forms with its district a community (*māhiya*) of the Kaḍā of Yenışehir, in the wilāyet of Khudawendīgiar (Brussa), while Iznīk was formerly the capital of a kaḍā of the *eyālet* of Kōdja-eli. The general decay has also affected the ancient buildings. The best preserved are the Roman and Byzantine walls consisting of a double rampart (best described by Prokesch and Texier; cf. thereon Körte, *Mitt. des Deutsch. Arch. Instituts*, Athens, xxiv. 398—409) with their monumental gateways and 238 towers (Texier). The Byzantine part of these defences dates from the time of Leo III the Isaurian, who had them built here after the Arab invasion of 726 (*Corp. Inscr. Graec.*, n^o. 8864); Michael III in 858, and later Theodore Lascaris (*Corp. Inscr. Graec.*, n^o. 8745—8747) completed and improved them. Of the foundations of Sultān Orkhān only a madrasa is still in use; the mosque (restored in the xvth century by Sinān for Sulaimān I) has with its 'Imāret been dilapidated for centuries; of the buildings of the family of Djandarālī Khair al-Dīn Pasha, the Yeshil Djāmi' (built in 780—794 A. H.) and the mosque of Mukrime Khātūn, dedicated to Eshref-zāde Rūmī (flourished in the reign of Muḥammad II; cf. *Mitt. d. Seminars f. Or. Sprachen zu Berlin*, v. 2,

p. 164), are tolerably well preserved; the tomb of Eshrefzāde is still a much visited place of pilgrimage. Of the three churches which the Greeks still had at the end of the xvth century (Crusius, *Turcograecia*, p. 204), those of St. Theodori and of St. George have disappeared; the third, that of the Κοίμησις τῆς Παναγίας, restored in 1807, is a Byzantine building of the ixth century with additions of the xth and of interest on account of its old mosaic decorations.

(J. H. MORDTMANN.)

'IZRĀ'IL (in European literature one also finds 'Azrā'il), the name of the angel of death, one of the four archangels (next to Djibril, Mikhā'il, Isrāfil). The name is perhaps a corruption of עֲסֵרָאֵל, which is given by Eisenmenger, *Entdecktes Judenthum*, ii. 333, as the name of the prince of Hell. Like Isrāfil, whose office of trumpet-blower at the last judgment is sometimes given to him, he is of cosmic magnitude; if the water of all the seas and rivers were poured on his head, not a drop would reach the earth. He has a seat (*sarīr*) of light in the fourth or seventh heaven, on which one of his feet rests; the other stands on the bridge between paradise and hell. He is however also said to have 70 000 feet.

The description of his appearance agrees almost exactly with that in Jewish literature: he has 4000 wings and his whole body consists of eyes and tongues, the number of which corresponds with that of the living. He however, is also said to have four faces.

At first he was an angel like others. When Allāh wanted to create man, he ordered Djibril to snatch from the earth for this purpose a handful of its main constituents. The earth, however, stirred up by Iblis, offered resistance, so that neither Djibril, nor Mikhā'il nor Isrāfil could carry out the commission. But 'Izrā'il managed to do it. On account of his hard-heartedness (*qillat al-raḥma*) Allāh then appointed him angel of death.

On account of his strength he is also master of death. When Allāh had created Death, he

summoned the angels to look at him. When they saw his astonishing strength, they fell down unconscious and remained lying for thousand years. Then they awakened and said: "Death is the most powerful of creatures". But Allāh said: "I have appointed 'Izrā'il to be lord over him".

Several angels of death are mentioned, as in Jewish literature; and it is said that 'Izrā'il deals with the souls of the prophets while the souls of ordinary men are under his *khālifa*. Special stress is laid on the beginning of Sūra lxxix. as authority for a number of angels of death: "By those who tear forth and by those who draw forth" etc. The former are said to be those angels who drag the souls of the unbelievers by force from their bodies, while by the latter are meant those who have to separate the souls of the believers from their bodies. The explanation of the verse however is not certain. In Sūra xxxii. 11 mention is made of the angel of death (in the singular).

'Izrā'il keeps a roll of mankind. But he does not know the date of death of the individuals. Whether one belongs to the blessed or the damned, he sees from the fact that the names in the first category are surrounded by a bright and those in the second by a dark circle.

When the day of a man's death approaches, Allāh causes to fall from the tree below his throne the leaf on which the man's name is written. 'Izrā'il reads the name and has to separate the person's soul from his body after 40 days.

But there are some people who strive against the separation, and object that the angel of death is acting arbitrarily. The latter then goes back to Allāh and tells him his experience. Allāh then gives him as a credential an apple from Paradise on which the *basmala* [q. v.] is written; when the man sees this, he yields.

Man also has other means of making it difficult for the angel of death to carry out his task. If the latter wants to creep into his throat to fetch out his spirit, the dying man recites a *dhikr* [q. v.] and thus closes the entrance. The angel then returns to Allāh, who advises him to try it with the dying man's hand. If the latter however is just making a *ṣadaqa* [q. v.] the angel's entrance is again impossible. Finally however 'Izrā'il writes the name of God on the man's hand. Then the bitter feeling of separation disappears and the angel can enter to fetch the spirit. — On the other hand, it is also said that he pierces men with a poisoned lance. Another account is as follows: When a believer is on his deathbed, the angel of death stands at his head and draws his soul out as gently as water runs out of a skin. He hands it to his assistants who carry it through the seven heavens up to the highest and then place it with the body in the grave (the soul's journey to heaven; cf. Bousset in *Archiv f. d. Religionswissenschaft*, iv.).

But if an unbeliever die, the angel of death tears the soul out of his body in the roughest fashion. The gate of heaven closes before the soul, as it is carried up, and it is thrown down to earth again.

Characters like Idris, Ilyās, 'Isā and al-Khaḍir [q. v.], as is well known, were not subject to death. As regards Moses the same thing could not be asserted; but the Bible throws a veil over his death. Muslim tradition accordingly says that Moses defended himself against the angel of death, who came with the fatal message to him, and bruised his eye. Allāh said to the angel when he came back:

"If he places his hand on a cow, as many years are to be granted him as his hand covers hairs". "And then?" asked Moses. "Death", said Allāh. — It is also related that the angel of death came to Moses with an apple from Paradise; when he had smelled this, he died.

On an experience of Solomon's with the angel of death, see al-Baidāwī on Sūra xxxi. 34; on his visit to Idris, see that article.

'IZZ AL-DAWLA, honorific name frequently assumed by Muḥammadan princes, e.g. Bakhtiyār [q.v.].

'IZZ AL-DĪN, honorific name, for princes often combined with the preceding (*'Izz al-Dawla wal-Dīn*). However, not only princes bear this name, but scholars also.

'IZZET MOLLA, KEČEDJİ-ZADE MEHMET, *'Izzet Efendi*, an important Ottoman statesman and poet in the reign of Maḥmūd II. Born in 1200 (1785-6) in Constantinople, the son of the kādī-asker Ṣāliḥ Efendi, he devoted himself to a theological and legal career, following in his father's footsteps. When he had reached the position of Mollā of Galata, he was subsequently involved in the fall of his patron Ḥālet Efendi, as he had written satirical verses on his behalf. He was therefore banished to Keshān near Rodosto. Pardoned a year later he regained Sultān Maḥmūd's favour, who chose him as a companion. 'Izzet received the highest religious offices. In 1245 (1829) he acted as a representative at the peace negotiation with Russia. His openly displayed bias in favour of peace at any price brought upon him the enmity of the war party, whose intrigues succeeded in getting him banished to Siwās. There he died soon after his arrival in 1245 (1829-30), of poison, it is said. One of his sons is the statesman Fu'ād Pasha.

In addition to numerous chronograms he composed two diwāns, *Behār-i Efkār* (Springtime of Thoughts), concluded about 1240 (1824-5), and *Khazān-i Āthār* (Autumn of Actions), only put together after his death. Neither transcends medio-

crity. 'Izzet however won great renown through his two romantic Mathnawī: *Gülshen-i 'Ashk* (Rose-garden of Love), completed 1227 (1812), lithogr. Constantinople 1265, is a short romance on the old Persian model with a strain of Mewlewī mysticism. The subject matter shows a pretty and original imagination. But still more attractive is his thoroughly characteristic Mathnawī composed during his exile in Keshān with the ambiguous title *Mihnet-Keshān* ("The Sufferer" or "Suffering in the place of exile at Keshān"). This is the poetical diary of an exile, in which ghazals, ḳaṣidas and chronograms are scattered through the Mathnawī verses, and it gives an interesting insight into the world of ideas of a highly educated dignitary of the time and at the same time truthfully reflects provincial life in European Turkey at the period of the beginning of Maḥmūd's reforms. The work, the language of which is already remarkably national Turkish and is interspersed with Turkish every-day idioms, secures 'Izzet Mollā a distinguished place among the reformers of the language and the modernists. It was lithographed in 1269 at Constantinople. Ziyā Pasha also published it in his *Kharābāt: Türk Mathnawiyāt* (1292).

'IZZĪ (WAḲ'A-NÜWĪS SULAIMĀN 'IZZĪ EFENDİ); Turkish historiographer-royal and poet. He was the son of Khalil Agha, commander of the Baltadji Guard, and of Khadidja, daughter of Aḥmad III, and entered the Imperial Diwān as secretary. In 1156 (1743) he was appointed the seventh holder of the office of historiographer-royal (*waḳ'a-nūwis*) in succession to Ṣubḥī. In 1160 he became master of ceremonies (*teshrifātī*). He died in Djumādā II 1160 (March/April 1755) and was buried beside Shaikh Murād-zāde, who had initiated him into the Nakshbandī order. 'Izzī left a *Diwān* and a chronicle covering the years 1157—1165 (1744—1752). It was printed in 1199 (1784) as a continuation of Ṣubḥī's history. 'Izzī's prose is more praised than his poetry. But his style is the most exuberant and to us the most unpleasing of all Ottoman historians. His fondness for chronograms is notorious. He enjoyed a considerable reputation as a calligrapher.

J.

JACOB. [See ISRĀ'IL.]

JAEN, situated at the foot on the north east of the Iabalcuz (= Djabal Kūz), west of the Guadalbullón, is the capital (1700 feet above sea

level; 30,000 inhabitants) of the Spanish province of the same name (300,000 inhabitants), the area in which the Guadalquivir-Baetis takes its rise in Upper Andalusia; Andalusia in

the narrower use of the word (el Andalucía) comprises the whole basin of the Baetis and its tributaries and from west to east includes the five modern provinces of Huelva, Cádiz, Sevilla, Córdoba and Jaén, while Andalusia in the wider sense includes also the ancient kingdom of Granada, finally reconquered in 1492 by the Reyes Católicos, Ferdinand and Isabel, with the mountainous three modern provinces on the Mediterranean, Málaga, Granada and Almería, so that greater Andalusia corresponded to the ancient classical (Provincia Hispania) Baetica.

The name Jaén is derived from the Arabic *Djajyān* (in Spain pronounced *Djajyēn* with *imāla* [q. v.]), the origin of which is unknown (old Spanish usually *Gien*), as Dozy's derivation from U'-cien-se (Edrisi, *Descr. de l'Afrique et de l'Espagne*, transl., p. 248 sq.) seems impossible to us, especially as the ancient Ucia is rather to be sought on the Baetis itself near Andújar. Jaén is rather the ancient Aurgi or Flavium Aurgitanum, which still survives in Awraba (Yāḡūt, ed. Wüstenfeld. i. 400, ii. 186), if we read Awriya instead of Awraba. Awriya-Jaén is said by Yāḡūt to be the capital of the Kūrat Djajyān, also called simply al-Ḥāḡira, the capital. At the Arab conquest, the province of Jaén was colonized by immigrants from the Syrian Djund [q. v.] of Kinnasrin. The most celebrated among its numerous scholars is the grammarian Ibn Mālik [q. v.].

The history of Jaén is naturally closely bound up with that of the adjacent capital of the western amirate and caliphate of Córdoba, after the fall of which it formed for a time a small kingdom of slight importance until in 1248 it was conquered by the Ferdinand III the Saint, of Castille. In D. Miguel Lafuente Alcántara's *Historia de Granada*, based quite uncritically on Conde, the history of Jaén as well as that of Málaga and Almería is superficially discussed.

JANINA (Ἰωάννινα, Ἰάνινα, turkish *Yāniya*), a town in lower Albania, on the west bank of the lake of the same name, at the foot of Mount Mitzikélis, 1900 feet above the sea-level. It was formerly the capital of the vilāyet of the same name. The palace of the Pasha and two of its mosques are situated on a peninsula which runs out to the middle of the lake. It was defended by several forts. It replaced the ancient Dodona which had become the see of a bishopric, and the ruins of which are still to be seen 12 miles away; after the invasion of the Goths under Totila in 551, it took the name Joannina, derived from that of St. John (δ Ἰωάνης Ἰωάννης) who had become the patron saint of the town. In the reign of Sultān Murād II, after the capture of Salonika, the deputies of the town offered to surrender Janina to him, if he allowed the inhabitants to enjoy their privileges and liberties. The Sultān accepted their conditions, received the keys of the

town and handed over to the deputies a *ḡanḡ-i-sharīf*, signed with his own hand (1st Šafār 835 = 9 Oct. 1431); it is said that the ceremony took place at a place near Salonika called Klidi (key). Eighteen officers under the charge of Sinān Beg were ordered to take possession of the town and to build outside the walls, in accordance with the treaty, the houses they were to live in; in spite of the pledge, the commissioners had the church of St. Michael in the middle of the town demolished and the fortifications dismantled; taking advantage of a festival celebrated in the church of the Pantokrator, they attacked the crowd and carried off the daughters of the best families. Janina had no particular history till the time when 'Alī Pasha of Tepe-Dilen [see 'ALĪ TEPEDILENLI], desiring to escape from the yoke of the Sublime Porte, made it his capital. He brought prosperity and life to the town, protecting agriculture and commerce. The siege of 1236 (1820) ruined the town. Of the 16 churches which formerly existed only six are left. The mosque of Arslān Agha was built in 1712 on the site of the ancient basilika of St. John; many ancient columns are still found there. Other noteworthy buildings are the Bairaḡly Djāmi' (the "mosque of the standard"), built by Bāyazīd II, and that of Muḡtafī Efendi. Besieged by the Greeks at the end of 1912 it capitulated on March 6, 1913, and was definitely ceded to Greece by the Turkish Empire (Treaty of Athens, Nov. 14, 1913).

Local industries include the manufacture of blankets called *valensa*, fine carpets, a serge called *shayaḡ*, slippers called *yāniya ḡaryḡy*, mirrors, gold and silver thread, and garments embroidered with gold for the use of the Albanians. The population was given as 16,230 in 1874 by L. Moreau, French vice-consul in *Ann. de la Société Soc. de Géogr.*, 6th Ser., xii. (1876), 543 sqq., cf. *Péterm. Mitt.*, suppl. Vol. xxii. 42 sq. and *supra* i. 451a).

The former province of Janina comprised the *sandjaḡ* of Yāniya, of Ergeri (Argyrokastro), of Preveza and of Berat, and also, before the cession of Thessaly to Greece, that of Triḡāla (Trikkala).

(CL. HUART.)

JANISSARIES (Turkish *yāni-ḡarī* [ḡ], "new troops"), the name given to the regular infantry created by the Ottoman Turks in the xvth century, which became their principal force and rendered possible the vast conquests made in this and the following centuries. Their organisation goes back to Sultān Orḡhān (726 = 1326), son and successor of 'Oḡmān, his brother and prime minister 'Alā' al-Dīn, and Kara Khalīl Čendereli [see ČENDERELI], brother-in-law of Shaikh Edebalī. Before this time the chief Ottoman troops were, as in the Persian armies, bodies of horsemen called *aḡyndji* (light cavalry); they were supported by infantry called in Persian *pāwāz* and in Turkish *yaya* (foot-soldiers) who, although organised in companies of ten, a hundred, and a thousand men were in reality mere levies without any

great cohesion. It is Kara-Çendereli's merit that he created regular regiments of infantry at an age when mediaeval Europe was still at the stage of armed bands, before the organisation of the companies of archers in England, and a century before the first standing armies in France under Charles VII. It was very probably the contact with the legions of the Byzantines, although far sunk from their former glory, that gave the Turks the idea of supporting the Turkoman cavalry with well-trained infantry. But recruiting for the latter was carried out on entirely different lines, of which, moreover, the Janissaries are the only example in history.

In the article DEWŞHİRME [q. v.], it has been explained how the Ottoman government used to levy from Christian peoples conquered by them a tribute of children, who were converted to Islām and educated in special schools and continued to be regarded as slaves of the sovereign (*kul*); the children of Janissaries married to native women in the Barbary regencies and their descendants are called *kul oğlu* "sons of slaves" [cf. i. 260b, 271a]. An institution of this kind was contrary to Muslim law which does not allow a sovereign to force the *dhimmi* [v. DHIMMA] to give their children into slavery; the Turks who were in the service of the 'Abbāsīd Caliphs came from captures made on enemy territory (*dār ḥarb*) and not from conquered territory (*dār islām*); it was only possible to form the Janissaries by an act of the ruler (*urf*), in disregard of canon law (*shari'at*).

From the first the new troops were under the patronage of the dervish Hādjdjī Bektāsh and regarded as affiliated to the religious order which he had founded. (cf. BEKTĀSH and HURŪFİS); as headgear they were given a bonnet of white felt, to which there was attached behind a piece of cloth in memory of the benediction, during which the saint had left his sleeve hanging on the back of his flock. This bonnet had a wooden spoon as a badge. The names of the officers were taken from various departments of the kitchen: *çorbacı-başı* (chief soup-maker), *aşçı-başı* (chief cook), as we shall see later. The most sacred object in the regiment was the great cauldron of bronze (*kazan*) around which they assembled not only at meals but also to take counsel. Upsetting the cauldron was a sign of revolt, which became more frequent in course of time when, from the reign of Sultān Muḥammad IV (1051—99 = 1641—87), the ancient practice of *dewşirme* fell into disuse.

The corps of Janissaries was called *odjak*, "hearth"; it was divided into several tactical units called *orta*, "regiment", fixed in number and of varying strength (according to the period, 100, 500 and up to 3000 men); these *orta* were lodged in barracks called *oda* "rooms" (East Turk. *otak*). In the field the regiments encamped under huge round tents on which were embroidered their distinctive emblems. Numbering 165 at first, the *orta* were increased in number to 196, not including 59 *orta* formed by the 'Adjemi-oghlan [q. v.] and divided into three classes: *djemā'at*, "reunion, assembly" comprising 101 *orta*; 2. *bölük*, "division", comprising 61 *orta*; 3. *segbān*, "huntsmen, hound-keepers", popularly called *seimen*, to the number of 34 *orta*.

This corps was commanded by a general with the title *yeni-çeri-aghasy*, "*agha* [q. v.] of the Janissaries", who had a special residence in the

capital and offices where the business of the corps was conducted. The Sultān was not obliged to choose him from among the officers of the *odjak*. He was also in control of the police and of the maintenance of order in the capital; he was always followed by aides-de-camp carrying the *fa-laka* (see FELEKE). In war this general was preceded by a white standard surmounted by a horse-tail (*tugh*) and followed by footmen (*shāfir*) having the tails of their robes tucked up and fastened in their girdles. — The *segbān-başı* was originally, as his name indicates, the chief of the *segbān*; but as, in time, the *orta* of the *segbān* were placed under the direct command of the *agha*, this post lost some of its importance; however when the *agha* set out for war at the head of the *odjak*, the *segbān-başı* acted as his deputy in the capital with the title of *kāim-makām*. The *kul-kıya*, "superintendent of the slaves", commanding the *bölük*, was also adjutant to the *agha*; in war he was chief of staff of the corps; he enjoyed great influence, being chosen for the post by the Janissaries themselves and having the right, after reporting the matter to the *agha*, to appoint subalterns of a rank lower than that of the *çorbacı*. The other general officers of the corps were in order of precedence, the *zagharcı-başı*, "chief of the bloodhound-keepers", commanding the 64th *orta*; the *muhgir-agha*, "chief of the ushers", who represented the interests of the corps with the Grand Vizier; the senior and junior *khaşşekî*, "charged with special duties", who were sent into the provinces to settle questions concerning the *odjak* there; the *baş-çausk*, chief of the sergeants", commanding the 5th *orta*, the crier of the council, who carried out its decisions and enrolled the recruits; the *kıyayeri*, "the lieutenant of the intendant", representing the *kul-kıya* with the *agha*, who transmitted the latter's orders to the provinces; the *kıatib*, "secretary", who had to keep the registers called *kütük*, "tree-trunk".

The officers of each *orta* were 1. the *çorbacı*, colonel of the regiment, an expression which has survived in vulgar Turkish with the meaning "notable of a village". 2. the *oda-başı*, "chief of the barrack-room", adjutant to the preceding, who kept order on parade and saw that the rules were obeyed; 3. the *wakil-kharāj*, "controller of expenditure", who looked after the rations; 4. the *bairakdār*, "standard-bearer"; 5. the *baş-eski*, "chief of the veterans", the oldest soldier in the *orta*, who enjoyed great consideration on account of this title; as he was in command of the *kara-kol*, "guards", he was also called *baş-kara-kollukçı*; 6. the *aşçı-başı*, "chief cook", the quarter-master of the regiment, having under his command the *yamak*, "assistants", who was also head of the guard-room and of the prison of the regiment: his sign of office was a large knife; 7. the *sakke-başı*, "chief water-carrier".

The offensive and defensive weapons of the Janissaries varied at different epochs; we shall give here a few indications of their nature taken from Djewād, from a stock-taking made in the depot for old arms (Museum of St. Irene) in Constantinople; sling, bow and arrows (employed alongside of fire-arms until 955 (1548), according to Şolak-zade, *Ta'rikh*, p. 396, 429, 510, but kept as a sport down to our own times in the clubs of the archers called *kémān-keş*; at the old exercise ground at the Oğ-Meidān marble pillars mark the

distance of the Sultān Maḥmūd II's shot); claw-footed and screw-jack and winding arbalests (*tatār-oky*), javelin (*djerid*), matchlock, flint-lock, blunderbuss (cf. Montecuculli, *Mémoires*, Bk. II), pistol, bayonet (introduced in 1151 = 1738, then dropped and taken up again in 1168 = 1755), maces (*gürz*, *sheshpēr*, *topūz*), whips, flails, axes, scythes, halberds, bills, straight swords, for one or two hands, sabres (*kylyç*, *pāla*, *yataghan*), daggers (*kama*), lances, bucklers, coats-of-mail covered in places with metal plates, helmets of copper or steel (the peak in imitation of the shape of a fez, terminating in a sharp point).

Each *orta* had an emblem which was placed upon its flags as well as upon the doors of the barracks; the Janissaries also had a habit of tattooing it on their arms and legs. Promotions in rank were always made by seniority. The Janissaries were only punished by their own officers; the punishments were imprisonment, the bastinado and death; in the last case the execution took place secretly at night at Rümili-ḥişār and the body was thrown into the Bosphorus with a cannon ball at its feet; a cannon shot however announced the execution of the sentence. Soldiers who became old and infirm or disabled, were retired with a pension; they were called *oturak*.

The admission of foreign elements, outside of the recruits from the ranks of the *ʿadjemî-oghlan* [q. v.], gradually caused the corps of Janissaries to lose its value; the origin of these abuses dates back to the Sultān Murād III, who in 990 (1582) forced the *odjak*, in spite of the regulations and in spite of the resignation of the agha Ferhād, to receive into their ranks acrobats and wrestlers who had amused the people at the festivals on the circumcision of the prince who was later to become Sultān Muḥammad III. Since then individuals of every kind, to gain the privileges of the corps succeeded in gaining admission to it by patronage or purchase. In 1153 (1740) the authority to deal in salaried offices (*ʿulūfe*) which anyone could buy or sell, completed the ruin of the Janissaries as a military force. Those who were really soldiers no longer drew their pay but lived by exactions; soon hardly a dozen were found in every body of police to keep order in the streets and take their pay from the passers by.

Mutinies were frequent under the pretext of claiming an accession gift (*bakhshish*) which the Sultān used to distribute to the troops on his enthronement, since the abortive attempt, energetically suppressed, which the Janissaries made against Sultān Muḥammad II, on the occasion of his second reign (885 = 1451). From the time of the assassination of Sultān ʿOthmān II (1031 = 1622) the Janissaries played a part in politics, terrorised sovereigns, made and unmade grand viziers. They served as the tools of the factious, who remained in the background, escaping responsibility. The only exception was the glorious reign of Murād IV (1032—49 = 1623—40) who restored their discipline. The unfortunate wars against Russia at the end of the xviiith century persuaded the authorities that they ought to replace this obsolete and degenerate institution, incapable of reforming itself and ready to impede all progress, by new military formations. Sultān Selim III, acting on the decisions of a grand council, decided to form a regular army on the estate of Lévend-Çiftlik, lying on the heights of Orta-kîoi and Arnaut-kîoi

(Bosphorus, on the European side) under the name of *niḡam-i-djedid* (new organisation). This attempt at reform, unpopular and opposed by the Janissaries, who did not wish to submit to military drill, led to the rebellion of Kaḇaḳçî and the imprisonment of Selim III in the Serāi, where he was not long in being assassinated. Bairakdār Paşa in vain gave the name *seḡbān* to the new militia, he had resolved to form, for it did not survive its creator.

Sultān Maḥmūd II finding himself pressed by the Russians, Egyptians and revolted Greeks, resolved to take up his brother's plans again; he created a body of regular soldiers who were called *eshkendjî* "active soldiers", reviving an old designation given to the Janissaries when on active service; but the announcement of the beginning of regular drill provoked a mutiny (9th Dhu 'l-Ḳa'da, 1241 = 10th June 1826) on the Et-Maidān (the meat-square) in the centre of the barracks. The Sultān at once went in a caïque to the Serāi, consulted the ʿulemā, brought out the standard of the Prophet and summoned the Muslim population, victims of the exactions of the Janissaries, to come and fight them. The gunners and marines of the navy, formed one column, the bombardiers and sappers formed a second and marched on the Et-Maidān. The great gate was barricaded but soon fell before the canon; the barracks were set on fire and the rebels overwhelmed. A great assembly, whose decision was ratified by an imperial firman, pronounced the complete suppression of the Janissaries. Since then the Ottoman empire has been able to create a regular army modelled on those of Europe.

JAPHET. [See YAFITH.]

JAVA, the most important island in the Malay Archipelago, 2390 geographical square miles in area, in 5° south. Lat. is oblong in form, as it lies with Sumatra and the Little Sunda Islands on the southern Sunda fold mountains [see INDIES (DUTCH)]. In contrast to the western (Sumatra) and the eastern (Timor) end, the oldest rocks on the island of Java are entirely covered by tertiary and later volcanic products and coral limestones. The latter show that the island was at one time for the most part sunk below the sea-level and was afterwards raised at least 4000 feet; the former come from the 109 volcanoes of the island of which 13 are still ac-

tive, and cause by their weathering the great fertility of the plains and of the slopes of the volcanoes. The two groups of rock are fairly equally distributed in the mountains of the island. Flat country is found almost only along the north coast as the swell and the depth of the Indian Ocean prevents its formation in the south. The rivers are very numerous, almost all flow north and are of no great length. They are therefore of no importance for navigation except the largest, such as the Solo or Bëngawan and the Brantas in Eastern Java. But they give the water to irrigate the ricefields and are therefore of economic importance.

The oblong shape, the fertility and the excellent climate of the island have all contributed much to its great economic development. As early as the beginning of the xixth century a road was made along the north coast for military purposes by Governor-General Daendels. Since then there has developed the system of roads between the chief towns of the interior, which has been supplemented in the last quarter of last century by railways. At the end of 1917, the state railways in the west amounted in length to 1240 kilometres, in the east to 989, and in Central Java there is a privately owned line 262 kilometres long. The tram-lines of the whole island measure 2135 km. (1 km. to each 28.4 sq. km. and to 7350 inhabitants). On the north coast there are harbours at Tandjong Priok near Batavia and at Surabaya and in the south at Tjilatjap. Other trading centres like Tjirebon and Sëmarang in the north and Patjitan in the south have only natural roadsteads.

The island of Java enjoys a very favourable tropical climate without excessive heat or drought. The average temperature of the coast towns is 26°—27° C., the daily and annual variation does not exceed 5° C. The monsoon climate of the Dutch Indies [q. v.] prevails here only in a modified form; as it becomes narrower towards the west, Western Java enjoys a more regular rainfall than Eastern Java, where during our summer months little rain falls in the plains. The annual rainfall amounts in low-lying districts like Batavia to at least 80 inches and rises to 178 inches at a height of 875 feet at Buitenzorg, while in isolated estates in the northern mountains of Central Java up to 360 inches is recorded. Its climate and fertility give Java a luxuriant vegetation which in the west displays the character of the tropical rain forests and towards the east with trees like *Tectona grandis* (teak) and, in the cool zone, with pines like *Casuarina*, approximates to the monsoon forests. In consequence of the dense population and the European settlements these forests have been almost entirely uprooted except in the southwest and east, and therefore great floods occur in the rainy season. The high slopes of the mountains are well fitted for intensive agriculture, of which the tropical zone (in West Java up to 2100 feet and 27°—23° C. temp.) bears plants like rice, sugar-cane, tobacco, coffee, indigo, rubber, sweet potatoes, palms, screw-pines and mangrove forests, the subtropical (up to 5000 feet and 23°—18° C.) plants like tea, coffee and cinchona, European potatoes and vegetables, the cool (up to 8200 feet and 18°—13° C.) coffee, oaks and other trees of temperate climates. Above 8200 feet, mosses and lichens are found. The fauna of Java belongs to the Asiatic zone of India [v. INDIES]. Among

the larger kinds are apes, tigers, panthers, rhinoceros, wild cattle, deer and wild boar.

The earliest mention of the name Java is found in a passage in the *Rāmāyaṇa* which Kern dates about 150. There Yavadvīpa appears as the island of gold. About the same time Ptolemy (vii. 2, 29) mentions the island of Iabadiu as very fertile and yielding much gold. He interprets the name as barley-island, which is literally correct, but as barley does not grow on Java, the equally possible interpretation millet island may be more appropriate. How far these names agree with the modern geographical denotation is not clear. Java and Sumatra or a part of it are apparently regarded as a whole. (Cf. H. Kern, *Java en het Goudeiland volgens de oudste berichten*, and *De naamsoorsprong van Java*, in *Verspreide Geschriften*, v. [The Hague 1916], 303—21.) In the old Javanese inscriptions of King Er-Laṅga of the 1031 the name is Yawa and in the Kavi poem *Nagarakrītāgama* (1365) Java alternates with Yawa as the name of the island.

The oldest Arabic source in which we find the name Djāwa seems to be Vākūt's (d. 676 = 1228) *Muḍjam*. But here as in some other sources it is not quite clear, what is to be understood by it, as the mention of an article of export like camphor points to Sumatra. From the time of Ibn Saʿīd (viiith—xiiith century) Djāwa is usual as a name for Sumatra (Rashīd al-Dīn, Abu 'l-Fida', Ibn Baṭṭūṭa), but in 'Alī Ra'īs (1554) we find Djāwa for Java. But so early a writer as Ibn Khordādhbih (272 = 885/6) gives Djāba as the name for the island of Java (ed. de Goeje, trans. p. 46) and it is found in several later works (Ibn Waṣīf Shāh, al-Idrīsī, al-Kazwīnī, Ibn al-Wardī, Ibn Khaldūn). The name Java is also concealed in the name Zabaḍj, which most probably arose out of Djāwaga (Jāvaga) and means Javanese (Malay) (see H. Kern *Verspr. Geschriften*, iii. [The Hague 1915], 283 sq., and *Iabadiu* in *Bijdragen tot de Taal-, Land- en Volkenkunde van Nederl. Indië*, 7th Ser. iv [1905], 365 sq., cf. thereon C. Snouck Hurgronje, *Een miskende Arabische palataal*, in *Tijdschr. voor Ind. Taal-, Land- en Volkenkunde*, xlviii [1906], 85 sqq.). Al-Zabādj however refers sometimes to Central and South Sumatra and sometimes to Java and occasionally comprises the whole archipelago. Cf. on the above: *Relations de Voyages et Textes géogr. arabes, persans et turcs relatifs à l'Extrême-Orient du VIII^e au XVIII^e siècles*, trans. by G. Ferrand, i, ii, Paris 1913—14; G. P. Rouffaer, Article *Tochten* (*Oudste Ontdekkings-*) in *Encycl. van Nederl.-Indië*, 1st ed., iv. 363 sqq.). See also the article DJĀWA.

The trading journeys made by the Hindus along the coast, in dependence on the monsoon, to the Malay archipelago on the way to the Spice Islands, touched at this island also, which soon came to bear their most important colonies, presumably because of its fertility and the shelter offered by its north coast. The great accessibility of the interior enabled the Hindu peoples to settle here also, and thus their power and culture expanded quite early over this Malay island. A Chinese source mentions the presence of Hindus on the island of Java in the year 132 A. D. (cf. G. Ferrand, *Le K'ouen-Louen* etc., *Journ. Asiatique*, 11th Ser., xiii. 155 sq.). At a later period the Chinese Buddhist Monk Fa Hian says that in 414 A. D. he found many Hindus but few Buddhists on

this island, which he calls Ya-va-di. This Hindu period comes down to Portuguese times but offers great difficulty to the historian as literary and oral traditions have been distorted almost to unintelligibility by fantastic additions. The best data are afforded by the numerous ruins of temples, statues, copper plates (often charters of endowment) and bronze objects with inscriptions and dates, which are found principally in central and eastern Java. They are even sufficient to enable us to sketch the changing political conditions in this Hindu period. Only a few engraved stones are older than 760 A. D., and some copper-plates from Central and Eastern Java, of which the oldest are one of the year 732 from Central Java and another of 760 from Eastern Java.

Numerous inscriptions dated later than 760 exist and are evidence of a flourishing state of Hindu civilisation in Central Java which lasted to the year 860. Eastern Java then came into prominence. It has been established that the celebrated kings Sindok, Airlangga and Djāyā-Bāyā ruled here in the xth, xith and xiith centuries. In 1222 the kingdom of Singasari in Pasuruan gained the ascendancy over that of Daha in Kêdiri. In 1294 arose the kingdom of Mâdjâpahit in Surabaya, which afterwards became a great power in the Archipelago. The latter existed down to the beginning of the xvth century.

The temple ruins by their situation and architecture considerably increase the importance of these facts. They may be divided into two groups, an older in Central Java and a younger in East Java. Both are rich in marvellous buildings, which however are executed in different styles. In Central Java they are built of tufa and are closely related to Hindu architecture in British India; in Eastern Java, on the other hand, they are mainly of bricks, and here a more independent Javanese style has developed, which shows Chinese influence. Of the latter we only know that the Emperor Khubilai of China in 1293 sent a military expedition to Eastern Java, which was only partially successful. We have only a few small antiquities from Western Java.

In Central Java are the ruins of the Buddhist temples of Bârâ Budur, Tjandi Mëndut, Tjandi Kalasan, Tjandi Sari, Tjandi Sewu and the Siwaite Tjandi Prambanan. In Eastern Java the most important are Tjandi Panataran, Tjandi Singasari and Tjandi Tumpang or Djâgâ.

Ruins like those of Bârâ Budur are among the most beautiful Buddhist ones. From the mixed character of their very numerous statues of gods and religious and profane reliefs it is clear that, as still the case on the island of Bali [q. v.], Brahmanism and Buddhism on Java were closely connected and existed side by side. The Buddhism of the Javanese at that time was of the Mahâyâna school.

In addition to these remains in stone, numerous objects in bronze, gold and silver, such as statues of deities, temple bells, plates etc., are found buried in the ground. Only few remains of secular buildings, even of royal palaces, have been discovered; probably these were of wood and other perishable material. (Cf. on archaeology and epigraphy, the works of Cohen Stuart, H. Kern, J. Brandes and N. J. Krom).

The above remarks show us how highly developed must have been the civilization and how flourishing the prosperity of the island to enable so

many costly works to be erected. In view of the lengthy period of their existence in Java it is not surprising that these Hindu kingdoms exercised a transforming influence on the Javanese culture. We shall probably not be wrong if we assume that the Javanese at the beginning of the Hindu period were probably in about the same stage of culture as the modern Dayaks or Toradja. It seems however certain that even then they knew how to grow rice on irrigated fields, as the technical terms used in this connection are not of Sanskrit but of Indonesian origin. But it must have been considerably advanced by the Hindus.

The formation of despotic Hindu kingdoms among Indonesian tribes organized on a patriarchal system was also of economic importance, as on the one hand it abolished the great insecurity and seclusion of these tribes and secondly brought the masses of the people under the rule of their kings and nobles. The latter brought about the development of native arts and crafts whose ornamental motifs are still Hinduistic. That architecture and sculpture were greatly stimulated is shown by their products, temples and statues, and their disappearance after the introduction of Islâm. Foreign trade arose through connections with the outer world in the West, and Java became the centre of the wholesale trade in spices, precious stones, timbers, resins, etc. The Javanese still use an Indian alphabet and the vocabulary of their language contains a large number of Hindu words and expressions. The introduction of writing was of the greatest importance for the advancement of civilization and on it is based the literary development of the modern Javanese.

When the Brahman sects finally attained preponderance in the island of Java, they gradually introduced the caste system in the form in which it is still found on the island of Bali. With the introduction of Islâm this distinction of the classes disappeared. The gulf that exists between the common people and the nobility and official classes with the princes at their head and the submissiveness of the former must be regarded as consequences of the caste system. They are foreign to the aboriginal Indonesians.

Islâm spread to Java from Malacca, into which it had been introduced by merchants from India (such as Persians and Gujaratis), and was predominant in the beginning of the xvth century. Besides the Indians, after the rise of Malacca, Malay traders also by their residence in Java created an opening for Islâm. Around the families founded by such merchants at the ports, communities of native believers gradually grew up, which finally developed into small states. Influential traders no doubt succeeded in entering into close relations with princes of the seaports through marriage, whereby Islâm could gain influence in the upper circles. The relations of the Mâdjâpahit kingdom to its vassal states also gave occasions for the advance of Islâm: it is often reported that princes of Mâdjâpahit married Muslim princesses of conquered or allied states. At the same time commerce between Java and the states dependent on the island (Pasei) and an important commercial town like Malacca contributed in no small degree to the spread of Islâm. In the last named place there was about 1500 large settlements of Javanese who were for the most part Muslims, according to Portuguese accounts. The latter no

doubt influenced their mother country in religious matters. Influences like the above were of all the more effect in a period when there was no strong central authority in the kingdom of Mādġāpahit.

Following the trade route Islām first gained a footing on the coast of Eastern Java. There, in the xvth century, Tuban was the most important harbour of Mādġāpahit and in the following century the most important commercial town next to Grēsik. The oldest relic of the Muslim settlement in Java is the tomb of a certain Fāṭima bint Maimūn, d. 475 or 495 (1082/3 or 1101/2), in Leran. The tomb of Mālik Ibrāhīm in Grēsik dates from 822 (1419); according to native tradition, he was a merchant. According to a statement of a Chinese Muslim, there were in 1416 not yet any native Muhammadans, but a settlement of Muslims who had come from the West and a group of Chinese, some of whom were converts to Islām. In view of the position of Islām in the Moluccas about 1450, it is very probable that about the same time the Muslims "were beginning to assert their influence in Java also in the coast region from Djapara(?) to Surabaya, Tuban and Grēsik particularly". In the course of the next fifty years the communities of native Muslims with the support of immigrant Muhammadans developed into small states on the coast, which soon endeavoured to assume authority over Eastern Java. (On the above cf. B. J. O. Schrieke, *Het Boek van Bonang*, Leiden dissertation, Utrecht 1916, p. 1—39 and the literature there quoted; H. Kraemer, *Een Javaansche Primon uit de Zestiende Eeuw*, Leiden diss. 1921).

Legend ascribes the conversion of Java to Islām to the joint activity of eight or nine *wālis*. The names of these saints who are called by the honorific title *sunan* (*susuhunan*) and are usually named after their place of burial or activity, are as follows: (1) The already mentioned Mālik Ibrāhīm (also called Mawlānā Maghrabī) who died in 1419. (2) Sunan Ngampel (Raden Rahmat) who about 1450 married a princess of the family ruling at Tuban and died about 1470. His tomb is in Ngampel (Surabaya). (3) Sunan Bonang, son of Sunan Ngampel's marriage with the Tuban princess and born probably about 1465. His activity in Tuban, probably as head of the Muslim community there, must fall between 1475 and 1500. He perhaps lived to about 1525. His tomb is shown in two different places (cf. Schrieke, *op. cit.*, p. 39 ff.). (4) Sunan Giri (Raden Paku), who is considered the ancestor of the so-called priest-kings of Giri and whose tomb is on the hill of Giri near Grēsik. (5) Sunan Gunung Djati, who left his native place Pasei in 1521 and after his studies in Mecca came to Djapara and probably also to Dēmak; he had great success with his religious teaching and he married a sister of the king of Dēmak. He then went to Bantēn, where with the help of his brother-in-law he succeeded in gaining power. In 1527 he took Sunda Kalapa from the king of Padjadjaran, at whose expense he gradually extended his power. He finally settled in Tjirēbon where he died about 1570; his tomb is to be seen near by on the hill called Gunung Djati. (See Hoesain Djajadiningrat, *Critische Beschouwing van de Sadjarah Banten*, Leiden Diss. 1913, Haarlem 1913, Index s. v. Goenoeng Djati). 6. Sunan Kudus, buried in Kudus (Res. Sēmarang). 7. Sunan Muria, called after his

tomb in the Muria Hills (Djapara). 8. Sunan Dradjat, a second son of Sunan Ngampel; his tomb is in the desa Dradjat on the road from Tuban to Sedayu. 9. Sunan Kali Djaga, whose tomb is in Kadilangu (Sēmarang) (on him cf. Hoesain Djajadiningrat, *op. cit.*, Index). — These nine, it should be noted, are also given with partly varying names (cf. the article *Heiligen* in *Encyclop. van Nederlandsch-Indië*², ii., and the literature quoted there).

About 1520 a coalition of Muslim kings of the coast states under the leadership of the king of Dēmak, Raden Patah, destroyed the Hindu Javanese kingdom of Mādġāpahit. An attempt made about 1546 to conquer Pasuruan did not succeed. It appears certain also that the kingdom of Dēmak was overthrown by that of Padjang (c. 1568) and the latter again by that of Mataram (c. 1586), out of which the present "Vorstenlanden" of Central Java have arisen.

For the development of political and religious conditions among the Javanese of the xvth and xviih centuries Mataram has undoubtedly been the most important sultanate. It was brought to its greatest prosperity by Tjākrā Kusumā (1618—1646), also called Sultan Agung after 1641, and extended its rule over almost the whole of Java. During his reign there existed in the West the independent sultanate (since 1631) of Bantēn and the sultanate of Tjirēbon dependent on him. The kings of Giri-Grēsik at this time had great religious prestige.

By Agung's conquest of the Northern ports of Lasēm (1616), Tuban (1618), Grēsik (1622), Surabaya (1625), and Madura (1627), and by their destruction, the foreign commerce and the shipping of Java received a severe blow, which was not repaired by the foundation of the state harbour of Djapara.

The European competition of the Dutch, English, Danes etc. was thereby much encouraged. By the foundation of the town of Batavia in 1619 on the site of the former Sunda Kalapa or Djakatra the former obtained a commercial and political centre in the sphere of the despot of Mataram, who had as little success in driving them out by a siege in 1628/1629, as had the Bantēnese of the West.

The histories of the Javanese kingdoms of Mataram, Tjirēbon and Bantēn since that date show us classical examples of the destructive influence of the unbridled passions of their rulers and the latter's officials. Agung's kingdom suffered already from his many costly conquests, his successors and their relations only reigned to increase their revenues and gratify their lusts. Domestic conflicts in the royal house itself and several wars with enemies outside, incited thereby, weakened the kingdom more and more.

These circumstances had consequences which were of interest to the "Nederlandsche Generale Geotroyeerde Oost-Indische Compagnie", founded for trading purposes only and managed from Holland, and were important for the development of modern Java. These and the endeavour to maintain a monopoly drove it to a policy of conquest, which became one of the main causes of its decline at the end of the sixth century. As early as Sultān Agung's death in 1646, the Company made a treaty of mutual support with his successor Amangkura I. The latter in 1677 found himself forced

to call for the Company's help when pressed by the Madurese and Macassarrese. He died a fugitive and his son Amangkurat II was only able to ascend the throne with the help of the Dutch Company. The kingdom was next shaken by two wars of succession (1704—1706 and 1746—1755). When the three claimants to the throne were all maintaining their position in the field during the latter of these wars, the Company found itself forced to divide the kingdom of Mataram between two of them in 1755. Thus arose the kingdom of the Susuhunans of Surakarta and of the Sultāns of Djokyakarta. In 1758 the third pretender had to be pacified, by granting him the semi-independent position of a prince Mangku Negārā. At that time the Dutch East India Company already possessed the North coast of the Mataram kingdom and the central part of the West down to the South coast. Up to the end of the xviiith century the influence of this trading company on native culture remained relatively small, as their officials only dealt with the natives as far as was necessary for the compulsory deliveries of agricultural products by the kings and the monopoly of imports of clothes, opium, etc.

In the course of the xixth century, when the kingdom of the Netherlands had assumed the suzerainty in the Indian Empire of the East Indian Company, the conditions of life among the Javanese population have altered very much. During English rule (1811—1816), the sultanates of Bantēn and Tjirēbon in the West were completely incorporated in the territory of the Indian government and considerable stretches in Central and East Java. The foundation of the independent kingdom of Paku Alam (1813) also broke the resistance of the Sultān of Djokya. When, after the rising of 1825—1830, the present residencies of Banyumas, Bagēlèn, Madiun and Kēdiri were incorporated by the Dutch in their territories as a war indemnity, only 7% of the surface of the island remained to native princes. As they have since then been still further restricted in their powers, the situation of the masses of the people has been much improved. Before this can be judged, we must deal with the population. It consists of 33,000,000 natives, 318,700 Chinese, 72,700 Europeans, 20,370 Arabs and 3000 other foreigners; with a population of 254 to the square kilometre it is therefore one of the most thickly populated parts of the earth's surface. If we consider that in the first and second decade of the xixth century, the Governor-Generals Daendels and Raffles estimated the native population at four and five millions and that this enormous increase has taken place without immigration, its explanation certainly appears desirable.

The foreign inhabitants of Java, if we except those only temporarily settled there, are for the most part half-breeds, sprung from intermarriages with native women. The Japanese are included with the Europeans. The Chinese, whose families in many cases have been living for centuries in Java, come from the South Chinese province of Kwan-Tung, the Arabs from South Arabia (Ḥaḍramawt) and the other foreigners from British India. With a very few exceptions, these all came with the object of earning a living by commerce or industry, and they often succeed very well.

The natives with few exceptions (Baduy in the West, the majority of the Tēnggērrese in the

East and the Christian Javanese) are all Muslims. Their languages, customs and physique divide them into three groups: in the West the Sundanese, in the Centre the Javanese, in the East the Madurese. The differences are to be ascribed more to the influences of foreigners (Hindus) and surroundings, than to race. They all belong to the Malays of the Archipelago, but those in the West were less exposed to these influences than those in the East and Centre. The Sundanese therefore remained truer to the original type and more accessible to Islām. The Madurese on their relatively less fertile island have devoted themselves less to agriculture than to cattle-rearing and fishing and formerly to piracy, and thus became more energetic, vigorous and ruder than the Hinduised Javanese. In Western Java the latter only spread along the North and East coasts, while the Madurese are found in East Java in the residencies of Besuki, North Pasuruan and East Surabaya also. The native populations of the large towns like Batavia and Surabaya deserve special mention; in these commercial and administrative centres of the Dutch the native population arose out of traders, slaves, soldiers, political interneers of the most varied origins in the course of the last three centuries. As the language formed here has become the *lingua franca* (Malay) of Europeans and natives for the whole archipelago, these conditions are of special importance.

The natives are an intelligent, circumspect, easily contented, agricultural people who cling firmly to their traditions. They are fond of festivals, games and the use of opium, which sometimes are lead to abuses. The long period of despotic rule has divided the people into two classes, the princes with the nobility and officials on one side and the bulk of the people on the other, and has caused a very complicated system of ceremonial to grow up, which has laid a firm hold on all their customs and also finds expression in their language. The subservience of the masses to their superiors is a further result of these political conditions. In keeping with their geographical situation the Javanese are more submissive than the Madurese and Sundanese. The awakening of Eastern Asia is now being felt even in Java.

The despot was possessor of the soil, granted it to the peasants in return for half the produce in kind and in addition levied taxes in labour and produce on his people regularly and irregularly. His relations and officials were granted lands, and in the "Vorstenlanden", where this system still prevails, these have since the beginning of the xixth century been let more and more to European planters. Outside these principalities, the possession of land is private among the Madurese and Sundanese and partly communal among the Javanese. The most popular crop is rice, grown on inundated fields; other food-stuffs are sweet potatoes, beans, spices and fruits; for export tobacco, coco-nuts (copra), cotton and capok are grown. Of all these a number of varieties are known. The rearing of cattle and buffaloes is only subsidiary to agriculture. The horse is used for riding and as a beast of burden but is also eaten like the sheep and the goat. All these domestic animals except cattle were imported from Asia. Hunting as a means of livelihood is of very subordinate importance. The same applies to fishing in the rivers and in the sea. Many fish are reared in artificial ponds of fresh

water or on the seashore. The wholesale traffic of the island is in the hands of Europeans and Chinese, the retail is mainly carried on by Chinese and a few natives, and the huckstering in the markets is mainly in the hands of native women.

Javanese industries consist of handicrafts almost exclusively concerned with supplying local needs. Weaving and iron-smelting have decreased very much owing to the large imports of clothes, raw iron, and articles of iron. A few genuine Javanese arts like the making of *krises* (daggers), the manufacture of copper musical instruments and ornamental articles of copper, wood carving and batikting of cotton clothes are still practised. Only a few of their products such as brass gongs and batik clothes are exported. They bear witness to the abilities of the Javanese in these fields.

The language of the Javanese has developed out of the Old Javanese (Kawi) of the pre-Mādjāpahit period and the Middle Javanese current down to the new Kingdom of Mataram. At the courts of the Hinduistic princes the vernacular was frequently used for the adaptation of Indian and indigenous legends; when poets and men of letters of the Muhammadan kingdom of Mataram continued in this way, the contents of those literary products became modified, but the language remained Indonesian under these Hinduistic and Muhammadan influences. Both in vocabulary and subject matter, the very rich Javanese literature has adopted much from Hindus and Muhammadans. Javanese literature contains the modern Javanese recensions of the products of three periods. From the first came Kawi poems like the *Arjunawiwaha*, *Nāgarakṛtāgama*, *Bhāratayuddha* (an adaptation of the *Mahābhārata*) and *Rāmāyaṇa* in addition to mythological poems like the *Manik-Maya* on creation and mythology, and *Bandung* and *Aji Saka* which contain the mythical history of old Java. The versions of the *Mahābhārata* are prose works from this period. From the second period comes the *Pandji* cycle which celebrates the chivalrous, sentimental love of the Javanese prince Pandji for the princess Angreni and his adventures. To the third period belongs the *Menak Hamzah* of Muhammadan Malay origin, which deals with a Muslim hero endowed with supernatural powers who only achieves his wonderful deeds through his belief in Allāh. The Javanese chronicles or *Babad's* are in rhyme but are of no poetical value, and they are only of historical value when their writers are describing their own experiences. *Anbiya* contains the Javanese recension of the Muslim legends of prophets. The history of Moses is given in a prose work *Radja Pirangon*. In addition to the epic the Javanese have also didactic poetry (*Wulang Reh*; also the beast fable with the dwarf deer, *kantjil*, as the main character). Poetry is principally cultivated at the Javanese courts, but a good deal is composed elsewhere also. The lack of Javanese prose works is striking. (Cf. also under INDIES (DUTCH), p. 493 sqq. and MALAY).

In the West of the island the language is Sunda and in the East Madura, both languages closely connected with Javanese and having a similar literature, which however in keeping with the less refined civilisation of the Madurese and Sundanese shows a simpler character as regards form and matter. On account of its general interest the language

of the town of Batavia and the surrounding district deserves special mention.

The Islām of the native population possesses the same character as has already been described under INDIES (DUTCH) and indicated in its most important features for the island of Java. It is so important in the lives of the natives up to the highest classes of society that the prevailing political and economic conditions can only be understood if full account is taken of it. This Muhammadanism is grafted upon animism which often appears under Hinduistic forms.

From the economic point of view, agriculture, by far the most important industry, shows most significantly how powerfully the animistic mental attitude makes itself felt. As a result of lack of knowledge of the real conditions of growth, it causes and maintains the neglect of good tillage, of careful choice of plants, of care during growth and precautions at harvest time. Agriculture also labours under the burden of the many animistic sacrificial festivals and ceremonies, which are given a Muslim significance for the people, because a religious person prays for Allāh's blessing at them. The yield of all native crops is therefore much smaller than it would be under European management. It is the religious significance of agricultural customs to the natives that forms a great obstacle to their improvement under European guidance. The government has seriously attacked the question of the study and advance of it. It is similar with cattle-rearing; with the help of the ruling and other native chiefs, very satisfactory results have been obtained in Central Java in improving the breed of cattle and their care.

Politically Islām is only of importance so far as its teaching regarding infidel rulers makes it appear a subsidiary factor in all troubles which arise out of economic or political grounds. Further, the belief in the personal help of the Almighty and his saints, in amulets, in invulnerability etc. leads in local disturbances to the phenomenon so inexplicable to Europeans, that sometimes a very small number of people, often lead by a *guru*, vigorously resist the authorities.

The rule of the Dutch is to the advantage of the natives of the Archipelago in several respects, as has already been mentioned at the end of the article INDIES (DUTCH), and on p. 578^a. As regards the island of Java, in the last fifty years, economic conditions have largely contributed to this result. The very dense population of the island could not possibly support itself on the yield of their fields and other sources. But in addition there have arisen the constantly increasing sources of revenue which the natives owe to the plantations of tropical products of the Europeans. What huge sums are involved may be gathered from the amounts paid out in wages and rent to the natives by the sugar industry, which moreover is the most highly developed one.

If we consider all these facts together with what has already been said under INDIES (DUTCH), the astounding increase of the population of Java in the last century will be understood. It could only have been attained however by the fact that marriages are general and early among the natives.

As regards administration, the islands of Java and Madura differ from the other islands (*Buitenbezittingen*); the civil officials are accordingly divided into two classes. There are 17 residencies in Java and

Madura and in districts under European residents and assistant-residents who have controllers under them. Alongside of these, the native officials with the regents at their head form the link with the people. The often peculiar organisation of the 32,000 native villages has been left untouched as far as possible.

The native princes occupy a special position. The four kingdoms arose out of that of Mataram, as was briefly outlined above. The residency of Solo or Surakarta contains the kingdom of the Susuhunan of Surakarta and in the South that of the Pangeran Adipati Arya Mangku Negara; the residency of Djokyakarta contains the kingdoms of Djokya or Djokyakarta and of Pangeran Arya Paku Alam in the South-West.

Justice is administered with slight exceptions, in the native states as well as in Java and Madura, by jurists trained in Holland.

Public instruction in the present century is being continually extended by the government, missions and private persons. In the larger places, Dutch is often the language of instruction (at the end of 1917 in 5 secondary boys' schools and two secondary girls' schools and in 198 elementary schools with European teachers). The education of the natives was conducted in 130 schools in seven year courses with Dutch, and in 991 schools in four year courses. There were 4815 village schools with three year courses, 183 schools for Chinese and 30 for Arabs.

JEREMIAH, the prophet. His name is vocalised in Arabic IRMIYĀ, ARMIYĀ or ŪRMIYĀ (see *Tādī al-ʿArūs*, x. 157) and these forms are occasionally given with *madd* also (*Irmīyā*).

Wabḥ b. Munabbih gives an account of him which turns upon the main points of the Old Testament story of Jeremiah: his call to be a prophet, his mission to the king of Judah, his mission to the people and his reluctance, the announcement of a foreign tyrant who is to rule over Judah. Jeremiah then rends his garments and curses the day on which he was born; he would rather die than live to see this. God then gives him the promise that Jerusalem shall not be destroyed except at Jeremiah's own request.

Bukht Naṣṣar then attacks the city on account of the increasing sinfulness of the people. God sent an angel in the form of an ordinary Israelite to Jeremiah to find out his opinion on the fall of Jerusalem. He twice sent the angel away to enquire how the people were behaving. The latter returned with the worst reports and communicated them to Jeremiah who was sitting on the wall; the prophet called out: O 'Lord, if they are on the right path, let them live, but if they are on the path of evil, destroy them! Hardly had he spoken these words than God sent a thunderbolt (*ṣā'ika*) from heaven which laid the altar and part of the city in ruins. In despair Jeremiah rent his garments, but God said: 'You yourself gave the word'. He then realised that his companion was an angel in disguise. He fled into the desert (Ṭabarī, i. 658 sqq.). — The second episode in the Muslim legend of Jeremiah refers to his meeting with Bukht Naṣṣar. The king found the prophet in prison in Jerusalem, where he had been interned on account of his prophesies of ill fortune. Bukht Naṣṣar at once released him and showed him honour. He thereafter remained in Jerusalem with the miserable remnants of the population. When the latter besought Jeremiah to implore God to accept their repentance, God said to the Prophet. 'Tell them only that they are to remain here'. They refused to do this and took Jeremiah with them into Egypt (Ṭabarī, i. 646 sq.). According to Ya'qūbī, Jeremiah had hidden the ark in a cave before Nebuchadnezzar's entry into the city. — The third episode runs as follows. When Jerusalem was destroyed and the army had retired, Jeremiah came back riding on an ass. In his hand he carried a bowl of grape-juice and a basket of figs. When he stopped at the ruins of ʿIlyā (Aelia), he became irresolute and said: "How can God call all this to life again?" God thereupon deprived him and his ass of life. After a hundred years had passed, God awakened him and said: "How long hast thou slept?" He replied: "A day". God then told him what had happened and brought his ass to life again before his eyes; the grape-juice and the figs had remained fresh. God then granted him long life; he appeared to men in the city and in the desert (Ṭabarī, i. 666).

Of the first two episodes one can say that they are a development of Biblical statements. The third however is based on an misunderstanding connected with Sūra ii. 261: ... "like him who passed by a city which had been laid in ruins; then he said: How could God revive this after its death? Then God caused him to die for a hundred years; He

then wakened him and said: "How long wast thou dead?" He said: "A day or so". He replied, "Nay, a hundred years; look on thy food and thy drink; they are not corrupted; and look on thine ass: we will make thee a sign unto men: And look on the bones, how we will join them together, then clothe them with flesh".

The commentaries on the *Qur'an* identify this doubting man with various Old Testament figures, including Jeremiah. But we know that the story in Oriental legend was associated with 'Ebed Melek, who appears in the story of Jeremiah (Jeremiah, xxxix. 16 sqq.; cf. *The Paraleipomena of Jeremiah the Prophet*, ed. Rendel Harris). The confusion of Jeremiah with 'Ebed Melek has apparently given rise to another one. 'Ebed Melek, according to the Jewish view, is one of the immortals who never saw death. In Muslim legend al-Khaḍir is one of the immortals. This is probably why Wabḥ b. Munabbih explains al-Khaḍir, "the green", as an epithet of the prophet Jeremiah. This also explains the emphasis laid on his retirement

to the desert where, as in the towns, he sometimes meets men; for this is a statement which elsewhere refers to al-Khaḍir in contrast to Ilyās [q. v.] who is the patron saint on the sea.

K.

KA'ĀNĪ, ḤABĪB ALLĀH, a modern Persian poet, son of the versifier Mīrzā Muḥammad 'Alī Gulshan, born at Shirāz, was court poet to Muḥammad Shāh, successor to Faṭḥ 'Alī Shāh (1250—64 = 1834—48) and to Nāṣir al-Dīn Shāh. He was very precocious and attracted attention from the age of eight. His father died when he was eleven (*Perishān*, Bombay, 1277, p. 19) and he had to go to Khorāsān to complete his studies. Prince Shudjā' al-Saltāna Ḥasan 'Alī Mīrzā, governor of Maṣḥad, took him under his protection. This was the beginning of his good fortune. In addition to the three classical Muslim languages, he learned French. He was addicted to opium but was not guilty of debauchery. He died at Ṭeherān in 1270 (1854). He left a collection of anecdotes in prose and verse entitled *Kitāb-i Perishān*, "Book of Scattered Leaves", a parody of the *Gulistān* of Sa'di (lithographed at the top of an edition of the *Diwān*, Bombay 1277, and separately at Ṭeherān in 1302), and a *Diwān* containing his collected poems (lithographed at Bombay 1277, 1298, 1306 and at Ṭeherān in 1277).

He is incontestably the greatest of the modern poets of Persia, and is perhaps the most witty of all Persian poets. His irony is deep and biting, unfortunately it is often coarse.

(CL. HUART.)

KAARTA, the region of the French Sudan between the upper waters of the Senegal and the Sahara. The boundaries of Kaarta are

in the north the land of the Dowaish Moors and the Hōdh [q. v.], in the east Bakhunu, in the south Beledugu and Fuladugu, and in the west the Senegal from the western branch of the Kulu pool to the confluence with the Baulé. It is a vast schistose plateau inclining towards the S. E. so that the majority of its rivers run towards the Senegal. The climate is that of the Sahelian zone: a very short rainy season followed by long periods of drought; the showers are not abundant. Surface water is rare, hence the settlements have clustered round wells which serve to irrigate gardens, planted with millet and vegetables. Although the country is steppelike in character, it is not yet unsuited to agriculture. Stretches of soil on the banks of the rivers and areas uncovered when the streams are low are especially fertile and yield two crops a year. The principal products are rice, maize, millet, earthnuts, cotton and indigo. Cattle and horse-rearing are fairly well developed. The population is not a dense one. Before the conquest of the country by the Tukulor, Faïdherbe estimated the population at 300 000 and the area at 20 700 square miles. To-day it does not seem to exceed 5 to 6 inhabitants to the square mile. This very mixed population comprises Khassonké, Peuhl and Moors in addition to the Bambara [s. d.] and Soninké, who form the most important element. Islām is observed by the Moors and Peuhl, while the Bambara refuse to have anything to do with it. The principal subdivisions of Kaarta are: — Diafunu (Tambaraka) and Diomboko (Koniakari) on the right bank of the Senegal, the Giudiumé (Niogomera) to the north of Diafunu, Tomora (Diala) in the centre; Baghé and Kaarta-Biné to the north of Fuladugu; Dianghirté in the east; Kingui (Nioro) on the Moorish borders. Adjoining the French possessions in Senegal, Kaarta was traversed at the end of the xviiith century by Houghton and Mungo Park (1795) and visited in the xixth by Duranton (1828), Raffanel (1846),

Mage and Quintin (1863), and Lenz (1880).

History. Kaarta after being included in the empire of Ghāna [s. d.] and in the Mandingo empire broke up into several small kingdoms on the dissolution of the empire of Malli, which at the end of the xviith century were conquered by the Bambara Massassi who came from Segou under a chief named Sunsa. The latter conquered Fula-dugu, Kaarta, and Bambuk and took up his residence in a place called Sontanian. His successors had to wage continual war against the Bambara of Segou. Conquered at first, they regained the advantage under the direction of Sié Banmana (1709—1760) who collected the remnants of the Massassi and reconstituted their empire with Guemu as capital. He annexed Dianghirté, Diara, Diomboko and Bambuk. Towards the end of the xviiith century, the Massassi were again overwhelmed by the people of Segou, but their chief Dassé reconstituted his army by means of slaves taken from the merchants. His successor Musa Kurabo recaptured the lost territories and added Koniakari to them. The rulers who reigned after him, suppressed the rebellions which broke out in various provinces. The last of them, Kandia (1844—54), took Nioro as his capital and after seven years of war conquered the Diawara and forced them to migrate to the Sahara. Kaarta was then a powerful state measuring 190 miles from E. to W. and 110 from N. to S. (Raffenel). Power was exercised by a chief belonging to the family of Kulubari. He bore the title of *fama* and his dignity was hereditary in the collateral line. His authority was absolute but in matters of importance he summoned a council formed of the Kulubari, representatives of certain tribes, and the „chiefs of the captives”.

The Kaarta kingdom fell before the blows of the Tuculor. Kandia having put to death an envoy from al-Ḥādī ‘Omar, Kaarta was invaded by the bands of this marabout. The *fama*’s army which took the field against the enemy was routed and the *fama* himself obliged to submit. The town of Nioro was occupied by the Tuculor and the members of the royal family massacred. Kandia, spared at first, was not long in suffering the same fate. Kaarta henceforth formed a province in the Tuculor kingdom and was administered by a vice-roy until 1894. At this date the Sultān of Segou, Aḥmadu, disturbed by the power of his brother Montaga to whom he had confided the government of Kaarta, decided to dispossess him of it. Montaga besieged in Nioro blew himself up rather than capitulate. Aḥmadu then installed himself at Nioro and lived there till the French undertook the conquest of the Tuculor empire. In 1890, the troops of Colonel Galliéni entered Kaarta and seized Koniakari. On Jan. 1, 1891, they took Nioro and completed the subjection of the country. Aḥmadu had to take refuge in Macina. Kaarta was incorporated in the French possessions and divided into the administrative districts of Nioro, Kitā and Kayes.

(G. YVER.)

KA'B AL-AḤBĀR, ABŪ IṢḤĀK KA'B B. MATĪC B. HAIṢO⁶, the oldest authority for the Jewish-Muslim traditions among the Arabs, a Jew of Yemen who became a convert to Islām in the Caliphate of Abū Bakr or ‘Omar and was called KA'B AL-AḤBĀR or KA'B AL-ḤABR, “the rabbi Ka'b”, on account of his wealth of theological, particularly Biblical, knowledge. Lidzbarski (*De prophetis, quae dicuntur, legendis arabicis*, Berlin diss., Leipzig 1893, p. 34 sq.) supposes that his name was originally Hebrew, ‘Aḳibā or Ya'qōb, and was afterwards changed into the Arabic name Ka'b. *Ḥabr* or *hibr* (plur. *aḥbār*) is taken from the Hebrew *ḥābēr*, a title of scholarship among the Babylonian Jews, lower than that of *rabbī*. Al-Khwarizmi also describes it as a Jewish title equivalent to the Arabic *‘ālim* (*Maḡāṭiḥ al-‘Ulūm*, ed. van Vloten, p. 35). We have very little information regarding Ka'b's life and work. According to al-Ṭabarī, he was on intimate terms with the Caliph ‘Omar; he was in his retinue when ‘Omar entered Jerusalem in 15 (636) (*Annales*, i. 2408), became a Muslim in 17 (638) (*ibid.*, p. 2514) and is said to have prophesied the death of ‘Omar to him in 23 (644) three days before it happened (*ibid.* p. 2792). According to al-Nawawī (*Taḥdhīb*, ed. Wüstenfeld, p. 523), he was alive in the time of the Prophet, but never saw him. The Anṣārī Abu ‘l-Dardā³ [q. v.] said of him that he possessed great knowledge and that there was only one opinion regarding the vastness of his learning and his reliability (al-Nawawī, *ibid.*). From Yemen he moved to Medina in the reign of ‘Omar and then from there to Ḥimṣ in Syria. The Omayyad Mu‘āwiya, then governor of the province of Syria, is said to have taken Ka'b as teacher and councillor to his court. In the conflict between ‘Othmān and his opponents Ka'b vigorously championed the Caliph, which on one occasion brought upon him corporal chastisement by the pious Abū Dharr [q. v.] (Ṭab., i. 2946 sq.). He died under ‘Othmān in the year 32 or 34 (652 or 654; Ṭab., iii. 2474 sq.) at Ḥimṣ and was buried there or, as others say (Ibn Baṭṭūta, ed. Defrémery et Sanguinetti, i. 222; Yāqūt, *Mu‘djam*, ii. 595), in Damascus. His most important pupils were ‘Abd Allāh b. ‘Abbās [q. v.], one of the earliest expositors of the Qur‘ān, and Abū Huraira [q. v.].

Ka'b's teaching was given orally only; that he ever wrote a book, is, at least, nowhere stated. Many sayings seem to be credited to him; in many, notably those given by al-Ṭabarī, an older origin can be proved from rabbinical or church-patriarchal traditions (for examples see Lidzbarski, *op. cit.*, p. 38 sq.). Reliable historians like Ibn Ḳutaiba and al-Nawawī do not quote him at all or, like al-Ṭabarī, only rarely; on the other hand, he is all the more frequently quoted as an authority by story-tellers like al-Tha‘labī and al-Kisā‘ī. In almost uninterrupted succession however he appears as narrator in the aljamiadic *Leyenda de José* (edited in Spanish transcription by F. Guillén Robles, *Leyendas de José hijo de Jacob y de*

Alejandro Magno, Zaragoza 1888) so that it almost seems as if this *Leyenda* was in its whole substance a tradition descending from Ka'b. The editor translates Ka'b al-Aḥbār (in Spanish transcription *Cab Alajbar*, p. 4 note 2) by *Caab el historiador*, as he — like formerly von Hammer (cf. Lidzbarski, *op. cit.*, p. 26 note 4) — confuses Aḥbār with Aḥbār and calls him *el narrador* or *el cronista*. This Moresco legend is however for the most part, especially the first chapter, a literal translation of al-Tha'labī's Yūsuf legend, and also where al-Tha'labī mentions other traditionists or none at all, refers to Ka'b, who is mentioned as an authority only five times in al-Tha'labī's story, the first time in his introductory description of the creation and beauty of Joseph (*Kiṣaṣ al-Anbiyā'*, Cairo 1324, p. 61, l. 4 *infra*). This passage is lacking in the *Leyenda*, as the first page of the MS is lost. The agreement with al-Tha'labī begins in the former at the very beginning, p. 3 l. 4 *infra*: *Y despues fizo Allah nacer etc.*, in al-Tha'labī, *op. cit.*, p. 62, l. 23: *ann Allāha ta'ālā anbatā etc.*, where it is related that God made a tree grow up for Jacob in the courtyard of his house and whenever a son was born to him, made a branch sprout from the tree. As the boy grew, so did the branch and when the boy attained manhood, Jacob cut off the branch and gave it to his son. While al-Tha'labī here gives a quite general reference to the statements of people "who know the legends of the prophets and the history of past ages", the *Leyenda* as early as p. 4 and on almost every other page gives Ka'b as the narrator. This frequent reference to Ka'b is however, as a further comparison with al-Tha'labī's story shows, quite arbitrary in the *Leyenda*. Al-Kisā'ī in his legend of Yūsuf (*Kiṣaṣ al-Anbiyā'*, Cod. Bonn So 7, p. 315—382) quotes Ka'b once as an authority viz. at the beginning, where it is related that God gave Abraham five precious gifts, which afterwards all passed into Joseph's possession and that this aroused the envy of his brothers; then follows the story of Joseph and Jacob's dream (cf. Weil, *Biblische Legenden der Muselmänner*, p. 101). We find Ka'b as narrator in one passage in Firdawsī's *Yūsuf u Zalikhā* (ed. Ethé, in *Anecdota Oxoniensia*, Aryan Ser., Part vi., Vol. i., Oxford 1908, p. 258, l. 2599) where he says: Ka'b-i Aḥbār was the first to say this, from Ka'b I have the following true tradition"; here follows the description of the ruler of Egypt (here called Khaṭrūs or Khaṭrūsh with the kunya Abu 'l-Ḥasan) and of his vizier Raiyān b. al-Walid (the Potiphar of the Bible) and his wife Zalikhā and of the preparation for the sale of Joseph by public auction. The fact that al-Ṭabarī in his story of Joseph (i. 371—413) does not mention Ka'b at all, and al-Tha'labī, al-Kisā'ī and Firdawsī, on the other hand, in the same story quote Ka'b as authority in different, never in parallel passages, strengthens the hypothesis that this name is a late invention not only in the Moresco legend but also in the three authors last named.

KA'B B. AL-ASHRAF, a Medina opponent of Muḥammad, according to one statement a Naǧīrī, according to another, a member of the Taiyī'ī family of Nalbān but the son of a Naǧīrī woman. In any case, he was an ardent champion of Judaism (cf. the expression *saiyid al-aḥbār*, Ibn Hishām, p. 659, 12). Aroused by the result of the battle of Badr, he went to Mecca where he used his considerable poetic gifts (in the *Kitāb al-Aghānī* he is called *jaḥl faṣīḥ*) to incite the Kuraish to fight against the victor. He then returned to Medina, where he is said to have compromised the wives of the Muslims by love-songs. After the prophet had uttered his fateful "Who will rid me of this man?", Muḥammad b. Maslama offered to do so and he with several others including Ka'b's foster-brother succeeded by a despicable intrigue in enticing him out of the house on a bright moonlight night and killing him in spite of his valiant resistance: cf. the confirmatory allusions in Ka'b b. Mālik's poem, Ibn Hishām, p. 658 sq., while Ḥassān b. Ṭhābit (ed. Hirschfeld, n^o. 97) gives an account of this murder and its counterpart, the assassination of Ibn al-Ḥuḳaik, with startling frankness. According to al-Wāḳidī, the murder took place on the night of the 14 Rabī' I of the year 3 A. H., but this date, which is in contradiction to his own dating of the raid against Dhū Amarr, is probably due to the events being all compressed within the same period in the source he followed (cf. Ibn Hishām), which might make it appear that Ka'b was murdered soon after his return from Mecca. It is however clear from the poem (Ibn Hishām, p. 658, 18, 659, 12), as well as from a tradition in al-Ḥalabī according to which the Naǧīrī's were in deep mourning for Ka'b's death, when Muḥammad began to attack them, that his murder did not take place till the year 4 as a kind of prelude to the attack on his kinsmen. It is also natural that punishment only overtook him after the battle of Uhud to which he had contributed by his instigations.

Wüstenfeld, p. 548—51, 657—9; al-Wāḳidī, transl. by Wellhausen, p. 95—9; al-Ṭabarī, ed. de Goeje, i. 1368—72; al-Ḥalabī, *Insān al-'Uyūn* (Cairo 1308), iii. 176—9; al-Mas'ūdī, *al-Tanbih*, ed. de Goeje, p. 243; *al-Aghānī*¹, xix. 106 sq.; Caetani, *Annali dell' Islām*, i. 534—7; Margoliouth, *Mohammed*, 3rd ed., p. 286 sqq.; Wensinck, *Mohammed en de Joden te Medina* (Leiden 1908), p. 152—5; R. Leszynsky, *Die Juden in Arabien zur Zeit Muhammads*, Berlin 1910, p. 66—9. (FR. BUHL.)

KA'B B. MĀLIK, ABU 'ABD ALLĀH, a native of Medina of the Khazraǧī tribe of Salima. After taking an active part in the sanguinary tribal

battles in Medina, he was won over to Islām even before the Hidjra and took part in the momentous second meeting at the 'Aḳaba [q. v.]. He was a poet and along with Ḥassān b. Thābit [q. v.] and 'Abd Allāh b. Rawāḥa [q. v.] was employed by Muḥammad to glorify his military exploits and answer the polemical poems of the enemies. He did not fight at Badr [q. v.] but was in most of the other battles. At Uhud, wounded himself, he found the wounded Prophet, who was thought to be slain. On the other hand, he was one of the few followers of Muḥammad who, in spite of their devotion to him, could not bring themselves to take part in the difficult campaign against Tabūk. But he later regretted it and after severe penance received the forgiveness of the Prophet (cf. Sūra, ix. 103, 107, 118 sq.). It is noteworthy that he who is fond of emphasising the connection of his tribe with the Ghassānids [q. v.], was at that time summoned by a Ghassānī chief to abandon Medīna and Muḥammad. In the caliphate of 'Othmān we again hear of him when he with Ḥassān and Zaid b. Thābit vigorously championed the Caliph, when he was assailed; after 'Othmān's death he wrote an elegy on him and declined to pay homage to 'Alī. He died blind in 53 (673); according to others, as early as 50 A. H. His poems have a somewhat nobler tone than those of Ḥassān and show a real enthusiasm for the religion of Muḥammad besides a strong local patriotism.

KA'BA B. ZUHAIR, son of the celebrated poet and author of a *Mu'allaka*, Zuhair b. Abī Salmā, and of Kabsha bint 'Ammār. Poetic talent seems to have been one of the privileges of the family, for, not to speak of Ka'b and his father, we have verses by eleven of its members, including the famous Tumādhir (al-Ḳhansā). We do not know the date of his birth; he was the eldest of three brothers, the other two being Budjair and Sālim. Traditions, more than suspicious, report that he early gave proof of his poetic talents, in spite of the opposition of his father who ended in being convinced after a decisive test. He was involved in the wars of his tribe against the Taiyī, the Ḳuraish and the Ḳhazraj, as we see from various poems in his *Diwān*. At the time of Muḥammad's mission, Budjair was converted shortly before the year 7, but Ka'b refused vigorously to imitate him and launched satirical verses against the Prophet. The latter solemnly authorised his assassination. Henceforth "the earth became too narrow for Ka'b" and he resolved to submit. He appeared unexpectedly in the year 9 in a mosque of Medina where Muḥammad was and recited to him his famous poem known as *Bānat Su'ād* (Su'ād has gone). The Prophet was overcome with admiration on hearing this eulogy of himself and the Ḳuraish and threw on his shoulders his own striped Yemen cloak, the *burda*, whence the name often given to this *Ḳaṣida*. The date of Ka'b's

death is unknown, but he seems to have reached an advanced age. The *Bānat Su'ād* has nothing of a religious poem; it is inspired with the sentiments of pagan poetry and begins with such a commonplace that Ḥammād al-Rāwīya [q. v.] claimed to know 700 poems with the same opening. It was frequently reproduced in the form of *tashṭir* and *takhmīs*. Its commentators are numerous. The best known are: Thā'lab, Ibn Duraid, al-Tibrizī (published by Krenkow, *Zeitschr. d. Deutsch. Morgenl. Ges.*, lxx. 241—279), Ibn Hishām (of which the best edition is that of Guidi, Leipzig 1871), Ibn Hūdjdja, al-Suyūṭī, al-Bādjūrī. It was first published by Lette (Leiden 1740); of later editions we may mention those of Freytag with a Latin translation (1823), Nöldeke, *Delectus Veterum Carminum Arabicorum*, Berlin 1840, p. 110—114). I have given an edition with a French translation and two unpublished commentaries (Algiers 1910): *The Diwān* is not yet published.

Bibliography: R. Basset: *La Bānat So'ād*; Introduction, p. 14—82, and the authors quoted, p. 9—13; Ibn Sallām al-Djumaḥī, *Ṭabaḳāt al-Shu'arā'*, ed. Hell (Leiden 1916), p. 20—26 (R. BASSET.)

KA'BA, the palladium of Islām, situated almost in the centre of the great mosque in Mecca.

I. The Ka'ba and its immediate neighbourhood.

The name, not originally a proper name, is connected with the cube-like appearance of the building. It is however only like a cube at the first impression; in reality the plan is that of an irregular rectangle. The wall facing northeast, in which the door is (the front of the Ka'ba) and the opposite wall (back) are 40 feet long; the two other are about 35 feet long. The height is 50 feet.

The Ka'ba is built of layers of the grey stone produced by the hills surrounding Mecca. It stands on a marble base 10 inches high, projecting about a foot (*shādhawān*). Four lines drawn from the centre through the four corners (*rukn* pl. *arkān*) would roughly indicate the four points of the compass. Four perpendiculars from the centres of the four walls would run north-east, north-west, south-west and south-east. The north corner is called *al-rukn al-'irāqī*, the western *al-rukn al-shā'ami*, the southern *al-rukn al-yamānī*, and the eastern *al-rukn al-aswad* (after the Black Stone).

The four walls of the Ka'ba are covered with a black curtain (*kiswa*) which reaches to the ground and is fastened there with copper rings, which are fastened in the *shādhawān*. Gaps are left in only for the water-spout and the door. The *kiswa* is prepared in Egypt every year and brought to Mecca by the pilgrim caravan. The old covering is taken down on the 25th (or according to al-Batānūnī, the 28th) Dhū 'l-Ḳāda, and the Ka'ba temporarily covered with a white covering which hangs down to within 6 feet of the ground; the Ka'ba is then said to have put on the *iḥrām* [q. v.]. At the end of the Ḥajj it is covered with the new cloth. The door is covered by a separate covering also of Egyptian manufacture, which in Egypt is called *al-burḳū'* (the veil).

The *kiswa* consists of black brocade, into which the *shahāda* is woven (see Snouck Hurgronje, *Bilderatlas zu Mekka*, n^o. xvii). At two-thirds of its height a gold embroidered band (*ḥisām*) runs round, which is covered with verses from the Ḳur'ān

in fine calligraphy. Every inch of the garment, which is taken down each year, is of course regarded as a relic and small pieces are sold by the Banū Shaiba, the door-keepers of the Ka'ba, as amulets.

In the north-east wall, about 7 feet from the ground, is the door, parts of which have mountings of silver-gilt. In Burckhardt's and Ali Bey's times the threshold was lit up every night by a row of candles. When the Ka'ba is opened, a wooden staircase (*daradjī*, *madradjī*) running on wheels is pushed up to the door; when not in use, it is kept between the Zamzam building and the Gate of the Banū Shaiba (see Snouck Hurgronje, *Bilder-atlas zu Mekka*, n^o. ii.). For a picture of the staircase, see Ali Bey, *Travels*, ii. 80.

In the interior of the Ka'ba are three wooden pillars, which support the roof, to which a ladder leads up. The only furnishing is the numerous golden and silver lamps suspended. On the inner walls there are many building inscriptions. The floor is covered with slabs of marble.

In the eastern corner, about 5 feet above ground, not far from the door, the Black Stone (*al-haḍjar al-aswad*) is built into the wall; it now consists of three large pieces and several small fragments stuck together and surrounded by a ring of stone, which in turn is held together by a silver band. The stone is sometimes described as lava and sometimes as basalt; its real nature is difficult to determine, because its visible surface is worn smooth by hand touching and kissing. Ali Bey (ii. 76) gives a profile sketch of it which clearly shows the surface hollowed out in undulations. Its diameter is estimated by al-Batanūnī (p. 105) at 12 inches. The colour is reddish black with red and yellow particles.

The part of the wall between the Black Stone and the door is called *al-multazam*, because the visitors press their breasts against it while praying fervently.

In the east corner too, about five feet above the ground, another stone (*al-haḍjar al-as'ad*), the "lucky", is built into wall. It is only touched and not kissed during the perambulation.

Outside the building there is still to be mentioned the gilt water-spout (*mizāb*), which juts out below the top of the north-west wall, and has an appendage which is called the "beard of the *mizāb*". The spout is called *mizāb al-rahma*, "spout of mercy" (on it cf. Ben Chérif, *Aux Villes Saintes de l'Islam*, p. 75); the part between it and the west corner is the exact *qibla* [q. v.]. The rain water falls through the spout on the pavement below which here is inlaid with designs in mosaic. The ground all round the Ka'ba is covered with marble slabs.

Opposite the north-west wall, but not connected with it, is a semi-circular wall (*al-ḥaṭīm*) of white marble. It is three feet high and about five feet thick; its ends are almost six feet from the north and west corners of the Ka'ba. The semi-circular space between the *ḥaṭīm* and the Ka'ba enjoys an especial consideration, because for a time it belonged to the Ka'ba [see ii.]; in the perambulation therefore it is not entered; the *ṭawāf* goes as close as possible along the outer side of the *ḥaṭīm*. The space bears the name *al-ḥidjir* or *ḥidjir Ismā'il*. Here are said to be the graves of the patriarch and his mother Hagar. The pavement on which the *ṭawāf* is performed is called *maṭāf*; a depression in it just opposite the door has still to be mentioned; it is called *al-nu'djān* "the trough"; according to

legend, Ibrāhīm and Ismā'il [q. v.] here mixed the mortar used in building the Ka'ba.

Around the *maṭāf*, and a little higher than it, runs a paved border, a few paces broad, on which stand 31 or 32 slender pillars. Between every two pillars hang seven lamps, which are lit every evening — to make the darkness visible, as Burton says. The row of columns is closed by the Bāb Banī Shaiba, an arch which stands opposite the north-west wall of the Ka'ba and affords an entrance to the *maṭāf*. Between this archway and the Ka'ba is a little building, a kind of pagoda, with a small dome, the *makām Ibrāhīm*. In it is kept a stone, on which Ibrāhīm is said to have stood at the building of the Ka'ba. Admission is granted to visitors on payment. Europeans have however not been able to see the stone. Burton says that the five dollars asked was too high for his finances. According to Oriental travellers and historians, it is a soft stone on which the footprints of Ibrāhīm can still be seen. During al-Mahdi's caliphate it was provided with a gilt band holding it together. Beside the *makām Ibrāhīm*, also opposite the north-east wall of the Ka'ba and within the row of pillars, but farther north of the *makām*, is the pulpit (*minbar*) of white marble. It consists of the usual staircase, shut at the foot by a door, and above the staircase are four short pillars supporting a spire like that of a Gothic church tower.

The pavement on which the row of pillars stands is somewhat lower than that which runs round them, to which eight paved paths from the colonnades round the mosque give access. On this outer paved part are four small buildings. Close beside the Bāb Banī Shaiba, on the left of the entrance and just opposite the Black Stone, stands the *kubba* built over the Zamzam well. In the room on the ground floor is the well, which is walled in; its water is drawn up in buckets, fastened to a pulley. On one part of the flat roof is a small chapel partly open, which has a roof with a small dome.

In d'Osson's as well as in Ali Bey's plan of the sacred mosque we find two further buildings north-east of the Zamzam building, at the edge of the outer paving, which are called *al-Kubbatayn*, "the two Kubba's", by him, Burckhardt and Burton. They are not marked in Snouck Hurgronje's pictures because they were demolished in the eighties and removed entirely. One held various objects, such as chronometers, jars for Zamzam water; the other, books.

The three other small buildings on the outer pavement are the so-called *makām*'s, the standing-places of the imāms of the various ritual schools during the *ṣalāt*. The *makām* or *Muṣalla 'l-Hanbalī* stands south of the Zamzam building, opposite the south-east wall of the Ka'ba. It consists of a roof tapering to a point and supported by slender marble columns. The *makām al-Mālikī* is of the same form and is opposite the south-west wall of the Ka'ba. The *makām al-Hanafī* looks out on the *ḥaṭīm* and the north-west wall of the Ka'ba; it has two roofs, one above the other. — The *Shāfi'* has no *makām* of their own; during the *ṣalāt* they stand under the *kubba* on the roof of the Zamzam well or at the *makām Ibrāhīm*.

Finally we may mention receptacles placed here and there beside the pavements, in which various articles are kept (see Snouck Hurgronje *Bilder-atlas*, n^o. i., ii.; *Bilder aus Mekka*, n^o. i., iii.).

II. History.

The Arabs possess no historical or semi-historical records of the origin of the Ka'ba, and we as little. According to Snouck Hurgronje's supposition, the Zamzam spring in a waterless valley may have been the cause of the rise of a sacred place. It is to be noted that Ptolemy (*Geography*, vi. 7) in place of Mecca mentions Macoraba, which is probably to be interpreted, as does Glaser, (*Skizze der Gesch. u. Geogr. Arabiens*, Berlin 1890, ii. 235) as the South Arabian or Ethiopic *mikrāb*, "temple". From this one may conclude that the Ka'ba already existed in the second century A. D. The accounts of Abrahā's campaign, which has been elaborated with legendary features, also suggest the existence and worship of the Ka'ba in the sixth century but tell us nothing of its appearance or equipment. The Tabba' As'ad Abū Karib al-Himyari, who came to Mecca, is said to have for the first time provided the building with a *šisna* and with a door with a lock. The information available regarding the distribution of the offices [see below iii.] among the sons of Kušayy shows that the worship of the sanctuary had developed into a carefully regulated cult several generations before Muḥammad.

As to the history of the building of the Ka'ba the legends referring to the pre-Muḥammadan period are dealt with below [iv.]. Whether Kušayy demolished and restored the building, as the historians say, is a question that cannot be definitely settled.

The historical references only begin with Muḥammad. When Muḥammad had reached man's estate, the fire of a woman incensing the Ka'ba is said to have caught the building and laid it waste. It happened that a Byzantine ship was thrown ashore at Džidda [q. v.] and the Meccans brought its wood hither and used it for the new building. In connection with this the name of a man Biskūn (it is given in various forms) is always mentioned, sometimes as the captain of the ship, sometimes as the carpenter whose advice was taken; he is said to have been a Coptic Christian.

The old Ka'ba is said to have only been of the height of a man and to have had no roof. The threshold is said to have been on the level of the ground so that the water had an easy entrance in the frequent floods (*sail*). The Ka'ba was then built of alternate layers of stone and wood, its height was doubled and a roof covered it. The door was placed above the level of the ground so that whoever wished to enter had to use a ladder. Unwelcome visitors were tumbled down from the high threshold. When the Black Stone was to be put in its place, the Meccans quarrelled among themselves as to who should have the honour. They had just decided that the first comer should be given the task when Muḥammad (who had been engaged in helping to carry the stones) came past. With superior wisdom he is said to have placed the precious object in a cloth — or in his cloak — and to have ordered the heads of tribes each to take an end. He himself then took out the stone and placed it in position. Legend and history are probably hopelessly confused in this story.

At the conquest of Mecca in 8 A. H. [see iii. below], Muḥammad left the Ka'ba as a building unaltered. But according to tradition, he later said that only the very recent conversion of the Mec-

cans prevented him from instituting all kinds of innovations. These real or alleged intentions of Muḥammad were brought to realization in 64 (683) by 'Abd Allāh b. al-Zubair [q. v.]. As anti-Caliph he was besieged by al-Ḥusain b. Numair [q. v.] in Mecca. Campfires were erected on the hills round Mecca, which hurled a hail of stones on the town and sanctuary and so damaged the house of Allāh that it finally looked "like the torn bosoms of mourning women". 'Abd Allāh and his helpers pitched their tents beside the sanctuary (he henceforth called himself *al-ʿAṭṭah bi ʿl-Ḥabāt*, "he who took refuge at the temple") and again a conflagration did its best to complete the destruction. In the fire the Black Stone was split in three pieces.

When the Omayyad army was withdrawn, 'Abd Allāh discussed with the Meccan authorities the demolition and rebuilding of the Ka'ba. When he had made his decision and the ruins had to be cleared away, no one dared to begin the work. The bulk of the populace, with Ibn 'Abbās at their head, had left the town because they feared a punishment from heaven. But 'Abd Allāh climbed up himself, axe in hand, and began the grim task. When his people saw that he remained unharmed, they took courage and assisted.

During the building a covered scaffolding was left on the spot to mark the *hilla* and the *maqāf* at least. The masons are said to have worked behind the covering. 'Abd Allāh guarded the Black Stone, wrapped in a piece of brocade, in the council hall (*ḥūr al-Nadma*). When put back into its place it, or rather the three pieces, into which it was broken, was bound with a band of silver.

The Ka'ba was then built entirely out of Meccan stone and Yemen mortar and built to a height of 27 ells. According to the tradition of the Prophet, the *ḥajr* was included in the building and two doors were made on the level of the ground, the eastern as an entrance and the western as an exit. In the *ḥawāf* the four corners were kissed.

These alterations lasted only a short period. In 74 (693) al-Ḥadiḍī b. Yūsuf [q. v.] conquered Mecca and killed 'Abd Allāh b. al-Zubair. In agreement with the Caliph 'Abd al-Malik he again separated the *ḥajr* from the Ka'ba and walled up the west door. The building, in keeping with the wish of the Omayyads, thus practically received its pre-Islamic form again and this form has survived to the present day. The piety of the populace has always resisted any considerable innovations. Only to an unimportant degree have the authorities now and then made improvements. As was the case in the heathen period, floods have continued to be a danger to the building. When in 1611 it threatened to collapse, a girdle of copper was used to avert the disaster. But a new *sail* made this support also insufficient, so that in 1630 renovations were decided upon. But the old stones were used as much as possible for the rebuilding.

The Ka'ba successfully withstood the Karmatian invasion of 317 (929); only the Black Stone was carried off. After an absence of some twenty years it was sent back to Mecca (cf. de Goeje, *Mém. sur les Carmatites*, etc. 2, p. 104—111, 145—5).

The custom of covering the Ka'ba is said to have been introduced by the Tabba'. The annual re-covering of the Ka'ba only became an established custom in modern times; for the oldest Muslim period, the 'Ashūrā day is mentioned as

the day of covering, but in Radjab also and in other months the building has changed its covering. The *kiswa* consisted sometimes of Yemen and sometimes of Egyptian or other cloth; during 'Omar's Caliphate the building threatened to collapse on account of the many coverings hung on it. All sorts of colours are mentioned also. The Wahhābīs even covered the Ka'ba with a red *kiswa*.

The *maḳām's* around the Ka'ba are mentioned as early as the 'Abbāsīd period; sometimes under the name *ḡulla* ("a shade"). The present buildings are said to date from 1074 (1663). A dome over the Zamzam well is mentioned at an equally early period, the present one was built in 1072.

The Ka'ba had offerings dedicated to it in the heathen as well as the Muslim period. Al-Azrakī devotes a detailed chapter to this subject (p. 155 *sqq.*). Many a worldly ruler has used these treasures for political purposes. Tradition reports that 'Omar said: "I will leave neither gold nor silver in the Ka'ba but distribute its treasures". To this, however, 'Alī is said to have raised vigorous objections so that 'Omar desisted from his plan.

III. The Ka'ba and Islām.

We do not know the personal feelings of the youthful Muḥammad towards the Ka'ba and the Meccan cult, but they were presumably of a conventional nature. What the biography of the Prophet tells us about his Meccan period in this respect can lay no claim to historical value. The Meccan revelations tell us nothing about these relations during this important period in the life of the Prophet. In any case he felt no enthusiasm for the Meccan sanctuary.

During the first period after the Hidjra Muḥammad was busy with very different problems. But when the expected good relations with Judaism and the Jews did not come about, a change set in. Henceforth — about a year and a half after the Hidjra — the Ka'ba and the Ḥaḍḍj are mentioned in the revelations.

The change of attitude was first shown in the *ḡibla* edict: the faithful were no longer to turn towards Jerusalem in the *ṣalāt* but to the Ka'ba. "We see thee turning thy face towards every part of heaven, but we will have thee turn towards a *ḡibla* that will please thee. Turn then thy face towards the sacred mosque and wherever ye be turn your faces towards that part. They verily to whom the Book hath been given know this to be the truth of their Lord: and God is not regardless of what ye do" (Sūra ii. 139). From the dogmatic point of view this volte-face was justified by an appeal to the "religion of Abraham", which was specially invented for the occasion (Sūra ii. 129, iii. 89 etc.), as Snouck Hurgronje has shown in his *Mekkaansche Feest*. This religion of Abraham, the prototype of Judaism and Islām, is said to have been obscured by the Jews and to have been brought to light again by Muḥammad. The Meccan cult was now drawn into it. Ibrāhīm and Ismā'īl laid the foundations of the Ka'ba (Sūra ii. 121). The Maḳām Ibrāhīm is described as a place suitable for the *ṣalāt* (ii. 119). Ibrāhīm prescribed the pilgrimage to mankind at Allāh's behest (xxii. 28); and the Ka'ba is said to be the first sanctuary that was founded on earth (iii. 90); it is now called the Holy House (v. 98), or the Ancient House (xxii. 30, 34).

In this way there was created for the reception

of the old heathen cult into Islām a basis in religious history, which was at the same time a political programme; henceforth the eyes of the faithful were turned towards Mecca.

In the year 6 A. H. a prospect of taking part in the Mecca cult was held out to the Muslims by the pact of al-Ḥudaibiya [q. v.]; in connection with it, the '*Umrat al-Ḳaḍā'*' took place in the year 7. Muḥammad's political endeavours culminated in the conquest of Mecca in the year 8.

All the accumulation of heathendom, which had gathered round the Ka'ba, was now thrust aside. 360 idols are said to have stood around the building. When touched with the Prophet's rod they all fell to the ground. The statue of Hubal which 'Amr b. Luḡaiy is said to have erected over the pit inside the Ka'ba was removed as well as the representations of the prophets. When they began to wash the latter with Zamzam water, Muḥammad is said to have placed his hands on the pictures of Jesus and Mary and said: "Wash out all except what is below my hands". He then withdrew his hands. A wooden dove also which was in the Ka'ba is said to have been shattered by Muḥammad's orders. The two horns of Abraham's ram did not crumble to dust until the rebuilding of the Ka'ba by 'Abd Allāh b. al-Zubair.

At the capture of Mecca, Muḥammad made arrangements regarding the religious and secular offices which had been filled in Mecca from ancient times. The historians say that in the old heathen period Ḳuṣaiy after a fierce struggle with the tribe of Ḳhuzā'a became master of the Ka'ba and held all the important offices, religious and secular: the administration of the *Dār al-Nadwa* and the tying of the standard, the provision of the pilgrims with food (*riḡāda*) and with drink (*siḡāya*) as well as the supervision of the Ka'ba (*sidāna* and *ḡidjāba*). His descendants

'Abd Manāf

'Abd al-Dār

Ḥāshim

'Uḡmān

'Abd al-Muṭṭalib

'Abd al-'Uzzā

'Abbās Abū Ṭālib Abū Ṭalḡa 'Abd Allāh
administered the offices after his death, 'Abd Manāf and his descendants getting the *riḡāda* and *siḡāya* etc., while 'Abd al-Dār and his descendants saw to the *sidāna* and *ḡidjāba* etc.

When Muḥammad conquered Mecca his uncle 'Abbās [q. v., i. 9^b *sq.*] or, according to another tradition, 'Alī asked for the administration of these offices. But Muḥammad said that they must all be crushed beneath his feet except the *siḡāya* and the guardianship of the Ka'ba. The former remained in the hands of 'Abbās; the latter he gave to 'Uḡmān b. Ṭalḡa who allowed his cousin Shaiba b. Abī Ṭalḡa to act as his deputy. The Banū Shaiba are the doorkeepers at the Ka'ba to this day. The *riḡāda*, which was in the hands of Abū Ṭālib, was taken over by Abū Bakr in the year 9; after his death the Caliphs looked after the feeding of the pilgrims.

Muḥammad's control over Mecca and the Meccan cult was first clearly marked at the *Ḥaḍḡi* of the year 9. As plenipotentiary of the Prophet, who did not participate in the pilgrimage, Abū Bakr announced to the assembled pilgrims the latest arrangements, which were put in the form of a revelation. They are contained in Sūra ix., which

from them is often called the Sūra of Immunity (*bar'ā'a*) (v. 1—12, 28, 36 sq.).

According to it, idolators are henceforth forbidden to participate in the Meccan festival as they are impure (*naḍjas*). Moreover, they are declared outlaws. A period of four months is given them during which they can go freely about the country; but after that "kill them wherever ye find them". Excepted are those with whom an alliance has been made in so far as they have punctiliously observed its terms and helped no one against the Muslims.

In the year 10 A. H. Muḥammad himself led the pilgrimage, at which therefore according to tradition not a single idolator was present: the Ka'ba had become an exclusively Muslim sanctuary, and Mecca was and is for Islām what Rome is to the Roman Catholic and Jerusalem to the Jew. At every *ṣalāt* the Muslims throughout the world turn towards Mecca and at the ceremonies of the pilgrimage the Ka'ba forms the beginning and the end of the holy rites.

Two special ceremonies concerning the Ka'ba may here be mentioned, the opening and the washing of the building. The opening takes place on definite days and men are first admitted, then the women. On this occasion the above mentioned staircase is pushed up to the building. The days in question change at the will of the Meccan authorities — but some usually fall in the month of the pilgrimage and one on the 10th Muḥarram ('Ashūrā day, q. v.). It is considered particularly meritorious to perform the *ṣalāt* in the Ka'ba.

After the Ḥajj is completed, at the end of the month *Dhu 'l-Hiǧǧja*, the Ka'ba is washed, a ceremony in which the Grand Sharif, the governor and other authorities as well as a number of pilgrims take part (or took part). The first to enter is the Sharif, who after a *ṣalāt* of two *rak'a's*, himself washes the ground with Zamzam water which flows away through a hole in the threshold. The walls are washed with a kind of broom made of palm leaves. The Sharif then sprinkles every-thing again with rose water and finally the building is fumigated with all manner of perfumes (cf. *al-Kibla*, n^o. 409, p. 1). The Sharif throws the broom away among the crowd of pilgrims who fight among themselves for possession of it. Al-Batanūni says (p. 109) that the Zamzamis and the Muṭawwifs sell the pilgrims similar brooms for a minimum of half a real.

As is evident from this example, the veneration for the sacred building extends to all that comes in contact with it: — to the Black Stone, the water-spout, the *multazam*, and above all to the Zamzam water. It is however said — and probably with truth — that 'Omar thus expressed himself on the Black Stone: "I know that thou art a stone, that neither helps nor hurts, and if the messenger of Allāh had not kissed thee, I would not kiss thee". But then he kissed the stone. And hardly a single pilgrim will think of 'Omar's words during the *ṭawāf*. The *ṣalāt* under the water-pipe is described as particularly efficacious: "Anyone who performs the *ṣalāt* under the *maṭṭa'* becomes as pure as on the day when his mother bore him" (al-Azraḳi, p. 224). The Zamzam water, which the pilgrim has poured over him again and again, is useful for every purpose for which it is drunk (*mā' Zamzam li-nā sharība lahu*, Ḳuṭb al-Dīn, p. 34).

There is abundant testimony in Muslim as well as European literature to the intensification of devotional feeling which the sight of the Ka'ba produces in the pilgrims. We may here quote al-Batanūni's description of the *ṣalāt* at the Ka'ba as particularly characteristic (p. 26). "The whole assembly stood there in the greatest reverence before this highest majesty and most powerful inspirer of awe before which the greatest souls become so little as to be almost nothing. And if we had not been witness of the movements of the body during the *ṣalāt* and the raising of the hands during the prayers, and the murmuring of the expressions of humility and if we had not heard the beating of the hearts before this immeasurable grandeur we would have thought ourselves transferred to another life. And truly we were at that hour in another world: we were in the house of God and in God's immediate presence, and with us were only the lowered head and the humble tongue and the voices raised in prayer and weeping eyes and the fearful heart and pure thoughts of intercession" (cf. also Macdonald, *The Religious Attitude and Life in Islam*, Chicago, 1909, p. 216 sqq.; Ben Chérif, *Aux Villes Saintes de l'Islam*, p. ii. sq., 45 sq., 68).

Even the Shī'is and the Wahhābīs have left the Ka'ba its place in Islām. For the Ḳarmatians alone has an exception to be made, as can be well understood.

Although moderns like al-Batanūni (p. 24) put the question: Why is God particularly worshipped in Mecca, when the whole world is His sphere, they themselves give the answer: "But Mecca is His citadel and the place of revelation of His dominion and power. And the Ka'ba is His temple and the place of His grandeur and grace. And is there in any of the four quarters of the earth a place not quite seven square miles in extent where half a million people assemble on a pilgrimage, all of whom call to God with one heart and one tongue? And although they differ in race and language, they all turn towards one *kibla* and at the *ṣalāt* move with one motion, without any hope other than the grace of the one God, who has not begotten and is not born and is without equal".

As to the mystics, their attitude to the Ka'ba depends on their position regarding the law. For the, so to speak, nomistic mystics like al-Ghazālī, the Ka'ba is, it is true, the sacred building which one has to go round in the *ṭawāf*. The *ṭawāf* and its object however only receive their value for men when they give them an inducement to rise to a higher spiritual level. Ibn al-'Arabī goes a step further when he says that the true Ka'ba is nothing other than our own being (*al-Futūḥāt al-Makkiya*, i. 733); the Ka'ba however also plays a part in his mystic experiences. Ḥudjwiri however quotes some sayings of mystics, who no longer require the Ka'ba as an inducement to rise, and even despise it. Muḥammad b. al-Faḍl says: "I wonder at those who seek His temple in this world: why do they not seek contemplation of Him in their hearts? The temple they sometimes attain and sometimes miss, but contemplation they might enjoy always. If they are bound to visit a stone, which is looked at only once a year, surely they are more bound to visit the temple of the heart, where He may be seen three hundred and sixty times in a day and night. But the mystic's every step is a symbol of the journey to Mecca, and when he reaches

the sanctuary he wins a robe of honour for every step". Abū Yazid (al-Bisṭāmī) says: "If anyone's recompense for worshipping God is deferred until to-morrow he has not worshipped God aright to-day", for the recompense of every moment of worship and mortification is immediate. And Abū Yazid also says: "On my first pilgrimage I saw only the temple; the second time, I saw both the temple and the Lord of the temple; and the third time I saw the Lord alone". In short, where mortification is, there is no sanctuary: the sanctuary is where contemplation is. Unless the whole universe is a man's trysting-place where he comes nigh unto God and a retired chamber where he enjoys intimacy with God, he is still a stranger to Divine love; but when he has vision the whole universe is his sanctuary. "The darkest thing in the world is the Beloved's house without the Beloved".

Accordingly, what is truly valuable is not the Ka'ba, but contemplation and annihilation in the abode of friendship, of which things the sight of the Ka'ba is indirectly a cause. (Hudjwiri, transl. Nicholson, p. 327).

IV. The Ka'ba in Legend and Superstition.

The alleged religion of Abraham gave a basis for the esteem in which the Muslims held the Ka'ba. Legend attached itself to the Qur'anic statements and spun them out. As Snouck Hurgronje has proved in his *Mekkaansche Feest* against Dozy's hypotheses (see his *Israelieten in Mekka*), there can be no question of a local Meccan tradition in this connection. There was, it is true, a local tradition, but it consists of semi-historical reminiscences of the last few centuries before Islām. But all that tradition relates regarding the origin of the Ka'ba and its connections with Biblical personages, belongs to Islāmic legend.

The latter first of all attached itself to the statement that Ibrāhīm and Ismā'il raised (*rafa'a*) the foundations of the Ka'ba (ii. 121). God's command to Ibrāhīm to build the Ka'ba is by some placed before the episode of Hagar and by others after it. The patriarch came to Arabia led by the *Sakīna*, which had the shape of a stormy wind with two heads; it is also described as having a snake's head. When it reached the site of the Ka'ba it wound itself round its foundation [see below] and said "Build on me". According to others, Ibrāhīm built on its shadow. He was helped by Ismā'il in this; the stones were taken from five (or seven) hills: Hīrā', Thabīr, Lebanon, Mount of Olives and the Djabal al-Aḥmar near Mecca (other names are also given). When the building had risen to some height, he stood at his work on the stone, which still shows the impress of his feet, the *Maḳām Ibrāhīm*. The Black Stone, which was still white in those days and only received its present colour as a result of contact with the impurity and sin of the pagan period, was brought to him by Gabriel after having been kept in Abū Kubais [q. v.] since the Deluge. Within the building (which was not high and had no roof) Ibrāhīm dug the hole, which afterwards served as a treasury. When the work of building was completed, he took his stand on the *maḳām*, which now rose high above the mountains, and proclaimed the pilgrimage to all men. From all sides they answered: *Labbaika, Allāhumma! Labbaika!*

On the other hand Muslim legend has developed the passage, Sūra iii. 90: "Truly, the first temple that was founded for men is that in Bakka; a blessed house and a guidance for (all) creatures". The ambiguous expression according to which Ibrāhīm and Ismā'il "raised" the foundations of the Ka'ba left room for the view that the foundations already existed on which he erected the building. Al-Ṭabarī in his commentary on Sūra ii. 121 (i. 408 sq.) however recognises that there are two views: according to the one, Adam, according to the other, Ibrāhīm laid the foundations. Legend relates the following regarding the foundation by Adam. When after the fall Adam was hurled out of Paradise on the earth, he came to Mecca. Gabriel with his wing uncovered a foundation, which had been laid in the seventh earth, and the angels threw blocks on it from Lebanon, the Mount of Olives, Djabal Djudī [see DJUDĪ] and Hīrā' until the hole was filled level with the earth. God then sent from Paradise a tent of red jacinth in which Adam lived; what was afterwards the black stone, then a white jacinth from Paradise, served as a seat. When God made his covenant with men, the latter acknowledged God's suzerainty; the document on which their acknowledgment was written was given by God to be swallowed by the Black Stone. At the Last Day it will be given a tongue, to bear witness against men; according to others, because it was originally an angel.

There was a particular reason for sending down the prototype of the latter Ka'ba. Originally Adam's stature was so great that he could hear the song of the heavenly hosts around God's throne. As a result of the Fall, however, his stature was shortened; he then lamented to God that the higher spheres were now closed to him. God then sent down the tent around which Adam now performed the *ṭawāf*, following the example of the angels. But Mecca was without inhabitants and the sanctuary without worshippers. When he gave vent to his regrets on this point, he was promised by God that in time this place would be the site of a cult; that the sanctuary would enjoy a particular *karāma*; that it would be a *ḥaram* [q. v.] whose *ḥurma* would extend above, below and around, and to which men would make pilgrimage with dishevelled hair and covered with dust, breaking out of every cleft with weeping and *takbīr* [q. v.] and *talbiya* [q. v.].

After Adam's death his descendants (Shith is specially mentioned) built the Ka'ba. But the deluge washed the building away while the sacred stone was concealed by the angels in Abū Kubais. According to others, however, the flood did not touch the Ka'ba and Noah performed the *ṭawāf* round the holy house. According to the first tradition, only a red mound was left of the Ka'ba, which Abraham afterwards found.

But the legends also extend to the period after Abraham. The hole in the Ka'ba, which is called *al-Akhsaf* or *al-Akshaf*, is said to have been several times plundered under the Džurhum [q. v.]. Therefore at God's command a snake took up its abode there and guarded the treasures. When the Quraiṣhīs wanted to pull down the Ka'ba, the monster opposed this plan, until God sent a bird which carried it off to one of the surrounding hills. — Every renovation of the Ka'ba is said to have been carried out amid ter-

rible portents, such as lightning-flashes. It is also said that on such occasions the foundation of the Ka'ba was brought to light and it looked like the necks of camels intertwined.

For the legend connected with the origin of the Zamzam well, see the article *ISMĀ'IL*. The following may however be added here. Once when 'Abd al-Muṭṭalib was sleeping in the *ḥidīr*, one appeared to him and in mysterious words ordered him to dig out the Zamzam, which was "at the battle-ground of the *Kuraishis*", at the "Ravenhole", and at the "Ants' nest". Now when the *Kuraish* contested his right to it (or the claim to the well already dug) both parties went to the *Kāhina* of the Banū Sa'd b. Hudhail. On the way their water gave out. But the water which sprang from the impression of the hoof of 'Abd al-Muṭṭalib's mount was an indication from heaven that the latter was right. They therefore turned back to Mecca; and when 'Abd al-Muṭṭalib had begun to dig, he found there two golden gazelles which the *Djrhum* had concealed there, as well as swords and armour. All this was deposited at the Ka'ba or used to decorate the buildings.

This legendary story of the origin of the Ka'ba was easily brought into conformity with the cosmological views current among Christians and Jews in the East, the central point of which was the sanctuary itself. Muslim tradition at first adopted this cosmology completely, as is evident from the statements which are still wholly under the influence of the predominance of Jerusalem. They were however not content with this and transferred a considerable part of these sayings to Mecca. These traditions are grouped round the navel theory, the main ideas of which are as follows. The earth has a navel, whose functions are parallel to those of the human navel. It forms the part of the earth which was created before the rest of it and around which the rest stretches. It is also the highest point, the place which provides the whole world with its nourishment; and it forms the place of communication with the upper and under world.

This navel was at first Jerusalem and later Mecca. But not all the properties of the navel are attached in equal degree to Mecca. They may be briefly summed up as follows. About 40, according to others, 2000 years before the creation of the world, the sanctuary was an agglomeration (*ghuthā*) in the world ocean. The beginning of the creation consisted in the stretching out of the earth around this point as centre, in the following order: after the substance of the earth (which coincides with the navel) heaven was formed and lastly the earth itself. In agreement with this theory is the fact that in the *Kur'ān* Mecca is called the mother of cities (*Umm al-Ḳurā*) (vi. 92, xlii. 5) and in popular literature the navel of the earth (*Yākūt Mu'djam*, iv. 278; *al-Khamis*, i. 37; *al-Ḥalabī*, i. 195, etc.).

That the sanctuary is the highest point in the world cannot be scientifically maintained. The popular traditions however like to move in this direction. Thus, in the story of the creation, it is said that the earth is extended below the sanctuary. The semi-scientific cosmography says that the position of the Ka'ba corresponds to the Pole Star; as the latter is the highest point in the heavens, so the Ka'ba is the highest point on earth (*al-Kisā'i*, *Adḡāib al-Malakūt*, ms. Leiden,

f. 156). This view is probably connected with the conception of heaven and earth as domes or tents put one upon the other, which can be shown to exist in Muslim literature.

The view that the sanctuary connects on the one side with heaven and on the other with the lower world is not so clearly stated with regard to Mecca as to Jerusalem. But it is said that no place on earth is nearer heaven than Mecca; and in the pagan period men are said to have gone up on to Abū Ḳubais to offer particularly urgent prayers. Whether the pit in the Ka'ba was really regarded as the entrance to the underworld, like the corresponding arrangements in Jerusalem and Hierapolis is uncertain.

One typical characteristic of the lower world is certainly possessed by Mecca. It is described as a tomb. Not only *Isma'il*, but a whole series of prophets, numbering hundreds, is said to have been buried round the Ka'ba. Every prophet belongs to Mecca. This is his essential starting point and termination of his career. Muḥammad therefore also belongs to Mecca and Mecca is his real grave as theoreticians say (*al-Ḥalabī*, i. 197) in opposition to the fact that he is buried in Medina.

Traditions which emphasise Mecca's importance for the nourishment of the world are hardly represented at all.

These theories had to be brought into consonance with the later cosmology of *Islām*, which regards the universe as a series of stories of seven heavens and seven earths. The Ka'ba is now not only placed in the centre of the earth (according to the navel theory) but it forms the central point of the whole universe. Its foundations as well as those of Abū Ḳubais lie in the seventh earth and form a kind of axis which runs through all these worlds.

The so-called stories are exactly like one another in plan. Every one has a sanctuary in the centre so that if the top one fell down, it would fall exactly on the lowest in the seventh world. The highest of the sanctuaries is the throne of God. Of those which lie between the throne and the Ka'ba two are mentioned by name, the *Bait ma'nūr*, the name of which is taken from the *Kur'ān* (lii. 4) and *al-Ḳurāḥ*. Jewish literature was already acquainted with a heavenly sanctuary in which the angels act as priests. In *Islām* these priestly functions are usually replaced by the *ṭawāf*.

V. Comparative History of the Cult.

From the fact that Ptolemy calls Mecca Macoraba (i. e. *Mikrāb*, temple) we may conclude that in his time the Ka'ba was regarded as the dwelling of one or more deities. According to a statement of Epiphanius (*Haereses*, V, following the text in *Philologus*, 1860, p. 355), *Dhu 'l-Sharā* had his *νααβου* in Petra, in which word Ka'ba is also probably concealed. It is however not clear from Epiphanius, whether the temple in Petra was meant or the quadrangular black stone, which represented *Dhu 'l-Sharā*. *Al-Bakrī* (*Mu'djam*, ed. Wüstenfeld, p. 46) relates that the tribe of Bakr Wā'il [q. v.] as well as the main body of the tribe of *Iyād* had their centre of worship in *Sindād* in the region of Kufa and that their holy tent (or temple, *bait*) here was called *Dhāt al-Ka'abāt* (cf. however *al-Hamdānī*, *Sifa Djasirat al-'Arab*, p. 171, 14, 17, 230, 12). According to Wellhausen,

the Ka'ba owed its sanctity to the Black Stone; this may be right, for the religion of the ancient Arabs was essentially stone-worship.

The form of the building may be compared with the apse of the Jerusalem temple, which was twenty ells in each direction.

It is not related that the Black Stone was connected with any special god. In the Ka'ba was the statue of the god Hubal who might be called the god of Mecca and of the Ka'ba. Caetani gives great prominence to the connection between the Ka'ba and Hubal. Besides him, however, al-Lāt, al-'Uzzā, and al-Manāt were worshipped and are mentioned in the *Qur'ān*; Hubal is never mentioned there. What position Allāh held beside these is not exactly known. The Islāmic tradition has certainly elevated him at the expense of other deities.

It may be considered certain that the Black Stone was not the only idol in or at the Ka'ba. The Maḳām Ibrāhīm was of course a sacred stone from very early times. Its name has not been handed down. Beside it several idols are mentioned, among them the 360 statues.

The Ka'ba possessed in a high degree the usual qualities of a Semitic sanctuary. First of all it made the whole surrounding area into consecrated ground. Around the town lies the sacred zone (*ḥaram*) marked by stones, which imposes certain restrictions on each one who enters it [see *IHRĀM*]. Moreover, the sanctity of the area is seen in the following points. In the *ḥaram* the truce of God reigns. When the Arab tribes made a pilgrimage to the Ka'ba, all feuds were dormant. It was forbidden to carry arms. Next, the *ḥaram* — and the Ka'ba especially — is a place of refuge. Here the unintentional manslayer was safe just as in the Jewish cities of refuge. On the Ka'ba there was a kind of handle to which the fugitives clung (Al-Azraqī, p. III), an arrangement which recalls the purport of the horns on the Jewish altar.

Blood was not allowed to flow in the *ḥaram*. It is therefore reported that those condemned to death were led outside the *ḥaram* to execution. The idea of peace extended even to the flora and fauna. Animals — except a few injurious or dangerous sorts, — are not to be scared away; hence the many tame doves in the mosque. Trees and bushes were not cut down except the *Idh-khīr* shrub, which was used for building houses and in goldsmiths' work. These regulations were confirmed by Islām and are in force to this day.

As to the rites, it is said that in the heathen period victims were slain at the Ka'ba. Among the ancient Arabs the idol of stone replaced the altar; on it they smeared the blood of the sacrificial animals. In Islām the killing takes place in Minā.

It is a question, whether and how far the Ka'ba was connected with the *ḥadjj* in the pre-Islamic period. Wellhausen (*Reste Arab. Heidentums*, 2nd ed., p. 79) defends the view that originally only the *'umra* [q. v.] was concerned with the Ka'ba while the scene of the *ḥadjj* was 'Arafāt, Muzdalifa and Minā. The connecting of pilgrimage and *'umra* is regarded by him as a rather clumsy correction made by Islām. It must be conceded that Wellhausen with justice points to the fact that the *'umra* far down into Islām was closely connected with the month of Radjab. Moreover, the *ḥadjj* is called simply *ḥadjj*

'*Arafāt* and, according to the Shāfi'ī school, the *wuḳūf* in 'Arafāt is the main ceremony of the *ḥadjj*. On the other hand, it should be remarked that in the *Kur'ān* (iii. 91) pilgrimage is connected with the Ka'ba (*ḥadjj al-Bai'*) and that tradition nowhere gives us the slightest hint of this being an innovation. The facts emphasised by Wellhausen may however be interpreted otherwise. He himself has pointed out that the ancient Arabs were fond of connecting sacred places situated close to one another by ceremonial rites. It is therefore more probable that the rather clumsy alteration had taken place by the pre-Islām period and is to be regarded as the result of a connection of the cult of 'Arafāt with that of Mecca.

As was said above, the Tubba' is regarded as the first who covered the Ka'ba. Whether this tradition is historically correct is beyond our knowledge. It is noteworthy that the coloured cloths are mentioned which were placed over the building, a rite which one has to consider in connection with similar rites used in other cases. The Jewish tabernacle, the high places of Canaan (Ezekiel xvi. 16), the throne of Solomon, the throne of the bishops, the *maḥmal*, and sacred tents in ancient Arabia as well as the *Sidrat al-Muntahā* in Paradise are all covered with coloured cloths. It is misleading to give a general explanation of all such things. But the idea of a connection with the sun shining in the heavens seems obvious here; particularly for the *Sidra* this notion can be traced further. The question might even be asked whether and how far the Ka'ba was regarded as an astral symbol. For the affirmative there is the fact that the Ka'ba is the object of the *ṭawāf* and that *ṭawāf* and Kab'a are represented by Muslim tradition itself as connected with the host of spirits round the throne of God. The throne of God is, as is well known, a cosmic magnitude, and the Ka'ba and the Black Stone are described as the throne of God's *ḫalīfa* on earth, Adam. The dance of the heavenly spirits can easily be interpreted as a dance of the planets. Moreover, golden suns and moons are repeatedly mentioned among the votive gifts (al-Azraqī, p. 155 sqq.). According to al-Mas'ūdī (*Murūdī*, iv. 47), certain people have regarded the Ka'ba as a temple devoted to the sun, the moon and the five planets. The 360 idols placed round the Ka'ba also point in this direction. It can therefore hardly be denied that traces exist of an astral symbolism. At the same time one can safely say that there can be no question of any general conception on these lines. The cult at the Ka'ba was in the heathen period syncretic as is usual in heathenism. How far also North Semitic cults were represented in Mecca cannot be exactly ascertained. It is not excluded that Allāh was of Aramic origin. The dove of aloe wood which Muḥammad found existing in the Ka'ba may have been devoted to the Semitic Venus.

(A. J. WENSINCK.)

ḲABAḲBĀZĪ, or *Ḳabakandāzī*, the gourd-game, the oriental form of the Popinjay. It was a sort of tilting at the ring, but the weapon was an arrow, and the archers were on horseback. A ring was shot through, but the mark was a pigeon or other bird set on a high mast. In Bābur's time the mark was a duck (v. *Bābur-nāma*, Gibb Mem. i. and Mrs. Beveridge's transl. i. 34, and P. de Courteille, i. 39). The game was much practised in Egypt (v. Quatremère, *Hist. des Mamlouks*, i. 243, note 118; also Dozy's *Supplément*). It was also practised in India and Persia, (v. *Akbarnāma*, i., transl. p. 440; Vüller's *Lex.*, ii. 710). The game is alluded to in the *Gulistān*, iii. Story 28.

(H. BEVERIDGE.)

KABATASH. [See CONSTANTINOPE, i. 875b].

KABP (A.) means the legitimate taking possession of a thing, for example by inheritance or as the result of a contract. *Ḳabp* is usually discussed in the Muslim law-books in close connection with delivery by a contract of sale, for example in al-Bādjūrī's *Ḥaṣhiya* on Ibn Ḳāsim's *Fath al-Ḳarīb*, at the beginning of the chapter on *Bai'* (Bulāq edition 1307, i. 358); cf. E. Sachau, *Muhammed. Recht nach Schafitischer Lehre*, p. 283 sq.; Th. W. Juynboll, *Handb. des islām. Gesetzes*, p. 263.

(Th. W. JUYNBOLL.)

KABP (A.) "contraction, oppression", in Ṣūfī terminology means a state (*ḥāl*) which is the opposite of *baṣṭ*, "expansion, gladdening". (In the phrase *Allāhu yaḫbiḍu wa-yaḫṣuḥu*, quoted by Ṣūfī authors from Qur'an ii. 246, however, the words have a more general meaning). Both happen to the 'ārif (gnostic) only, while in the novice the cor-

responding emotions are fear and hope, but with the distinction that the latter refer to the future, while *Ḳabp* and *baṣṭ* express a present feeling of spiritual dullness or joy. In the language of Western mysticism, they might be said to correspond approximately to the expressions *consolatio* (consolation) and *desolatio* (spiritual dryness).

(H. BAUER.)

ḲABD, a term in prosody. It is the suppression of the fifth quiescent letter in the primitive feet *fa'ūlun* and *mafā'ūlun* and is therefore found in *ṭawīl*, *ḥazajī*, *muǧarī* and *mutaḳarīb*.

In *fa'ūlun*, *Ḳabp* is recommended (according to some, it is obligatory) when this foot is the penultimate of the second hemistich of the third *ḍarb* of a *ṭawīl*; everywhere else it is optional. In *mafā'ūlun*, *Ḳabp* is obligatory in the last foot of the first hemistich of a *ṭawīl*. In all other cases it is only permitted if the foot is not liable to *kaff* or suppression of the seventh quiescent letter (*n*); nevertheless, it is very rarely found in *ṭawīl*, *ḥazajī* and *muǧarī*.

(MOH. BEN CHENER.)

AL-ḲĀBID one of the names of God, see the article ALLĀH, i. 303b.

ḲĀBID (**ḲĀBIZ**) a Turkish Sunnī theologian, founder of the sect of Khubmasiḥīs (popularly called Chupmessiḥīs). By order of Sulimān he was tried before an extraordinary court, sentenced to death on 8th Ṣafar 934 (3 Nov. 1527) and executed on the following day as a *ṣandīḳ* [q. v.]. He maintained the (moral) superiority of Jesus over Muḥammad (*afḍaliyat 'Isā 'alā Muḥammad*). On the occasion of this trial Ibn Kamālpaṣhazāde wrote his treatise on Zindikiṣm.

ḲĀBĪL, i. e. Cain. [See ḤĀBĪL.]

AL-KABĪR, one of the names of Allāh, see the article ALLĀH, i. 303a.

KABĪR, an Indian mystic, of the xvth century, who was claimed both by the Hindus and Musalmāns as belonging to their faith. A large collection of Hindi verses is attributed to him, but their authenticity is doubtful, and a like uncertainty attaches to his biography, which is obscured by legends. He is said to have been the son, or adopted son, of a Muhammadan weaver, and to have become the disciple of Rāmānanda, the Vaishnav reformer, at whose feet he sat in

Benares, joining in the theological and philosophical arguments that his master held with Brahmans and Šūfis. He appears to have earned his living as a weaver, and to have been a married man, the father of a family, and to have been as contemptuous of the professional asceticism of the Yōgī as he was disregardful of the doctrines and ordinances of orthodoxy, whether Hindu or Muslim. The boldness with which he sang his mystical doctrine of the divine unity exposed him to persecution, and he is said to have been driven from Benares in 1495, when he was about 60 years of age, and to have died at Maghar, in the district of Bastī, in 1518. Legend says that his Hindu and Muslim disciples disputed as to the disposal of his body, which the former wished to burn and the latter to bury; when they lifted the cloth that covered the body, they found in place of the corpse only a heap of flowers; of these, the Hindus burnt half in Benares, while the Muslims buried the rest at Maghar, where the shrine is still in the charge of Muhammadan Kabīr-Panthīs. Modern scholars, like Kabīr's contemporaries, claim him for one or other of the rival creeds: H. H. Wilson (*op. cit.*, pp. 69, 74) and R. G. Bhandarkar (*op. cit.*, p. 69) maintain that he was a Hindu; G. H. Westcott that he was a Muslim (*op. cit.*, p. 29 *sqq.*); G. A. Grierson's theory (*Journ. Roy. As. Soc.* 1907, pp. 325, 492) that he derived his opinions from Christian sources, may be dismissed as a pious fiction. A study of his poems makes it clear that he had no desire to attach himself to any organised religion: "Let me make self-reflection my saddle, And put my foot in the stirrup of divine love.... Saith Kabīr, they are good riders Who keep themselves aloof from the Vedas and the Qur'ān"; nor did he attempt to formulate any religious or philosophical system of his own, but he popularised the current Vaishnav teaching of his age, without however connecting it with any particular incarnation, and he spoke of God indifferently as Rām, Hari, 'Alī or Allāh. He rejected the outward signs of Hinduism, e. g. the sacred thread, the distinctions of caste, the ritual observances of temple worship, etc., and his references to Muslim authorities and institutions (e. g. the Qur'ān, circumcision, pilgrimage, the Mullā, the Kāḍī etc.) are accompanied with a denial of their validity. He represented God as the omnipresent reality, but maintained the separate individuality of the human soul, which could attain union with God through love, not by knowledge or by ceremonial observances. Through his homely illustrations and his close contact with daily life, he presented his doctrines in a form readily acceptable to unlettered persons, who appear to form the majority of his followers.

Farquhar, *An Outline of the Religious Literature of India*, pp. 331—5 (Oxford 1920). No critical edition of the works attributed to Kabir has yet appeared; for a list of these see Westcott, *op. cit.*, pp. 73-4, 169—172.

(T. W. ARNOLD.)

KABĪRPANTHĪS (Hindī *panth*, a path, sect). Despite the non-sectarian character of Kabīr's teaching, his followers now form a distinct sect, the majority of whom are Hindus. The best account of their organisation is given by Westcott, *op. cit.*, chaps v. and vi. According to the Census of 1911, there were 597,199 in the Central Provinces, and 49,605 in the United Provinces; in the other provinces they either are not found at all, or their number is too inconsiderable to call for separate enumeration.

(T. W. ARNOLD.)

AL-KABĪŞĪ, whose full name was 'ABD AL-'AZĪZ (also 'ABD AL-RAHMĀN) B. 'OTHMĀN B. 'ALĪ, ABU 'L-ŞAKR, an important astrologer probably of Persian descent. He was known to the Christian world of the middle ages as ALCABITIUS (also ALCHABITIUS). He lived for a considerable period at the court of Sulţān Saif al-Dawla b. Ḥamdān (d. 356 = 969) and dedicated his principal astrological work to him: *al-Madhkal ilā Şinā'at Ahkām al-Nuǧūm* (Introduction to the art of Astrology) of which copies still exist in Oxford, Gotha and Cairo. It was translated into Latin by Joh. Hispalensis. This translation was printed in Venice in 1481, 1485, 1491 and 1521. The edition of 1485 is entitled *Libellus ysagogicus Abdilazi, id est servi gloriosi Dei, qui dicitur Alchabitiis, ad magisterium iudiciorum astrorum. Interpretatus a Ioanne Hispalensi*, Venetiis 1485. The edition of 1521 is called *Praeclarum Alchabitii opus ad scrutanda stellarum magisteria ysagogicum*. A commentary on it was compiled by Joh. de Saxonia in 1331 and printed at Bologna in 1473, and again in 1485 and 1521 at Venice at the end of the editions of Alcabitius. Al-Kabīşī also wrote several smaller astrological treatises. The dates of his birth and death are unknown.

Bibliography: A special article on this astrologer is given by al-Baihaqī (c. 1150) alone among the Arab biographers, in his *Ta'rikh Ḥukamā' al-Islām* (Ms. Leiden, 133d, Gol.), cf. E. Wiedemann, *Beitr. z. Gesch. der Naturwissenschaften*, xx. 68; scattered notices are found in *Fihrist*, p. 265 (Art. *Euklides*); in Ibn Khallikān (Cairo 1310), i. 365, transl. by de Slane, ii. 335; Yaḳūt, *Muǧam*, ed. Wüstenfeld, iv. 35. Cf. also H.

Suter in *Abhandl. z. Gesch. d. mathem. Wissenschaften*, x. 60, xvi. 165. (H. SUTER.)

AL-ḲABḲ. DJABAL (DJĀBAL) AL-ḲABḲ or AL-ḲABDĪ, as al-Ṭabarī, i. 2660, 15, 2664, 4, 2666, 16 and Yāqūt iv. 31, 23 have it, and as should be read everywhere in al-Mas'ūdī (ed. Paris) for al-Ḳabkh, is a name for the Caucasus, common in Muslim authors. Hubschmann, *Armen. Gramm.* (Leipzig 1867), i. 45 derives ḲabḲ from Armenian *Kapkhō*, Pehl. *Kāfkōh*.

An older geographical conception regards this chain as belonging to the Kāf [q. v.] range which encloses the world (cf. B. Munkácsi, *Der Kaukasus u. Ural als "Gürtel der Erde"*, in *Keleti Szemle*, i. 236 sqq.). The name Alburz is no doubt connected with this idea, which Mustawfī, and apparently following him Kīātib Celebī, give to the Caucasus, while the name ḲabḲ (*Djihānummā*, *Ḳ-y-t-k*) is limited to its eastern (transl. p. 182 wrongly "western") side. Here the range appears to be considered the continuation of the North Persian mountain chain of the same name, with which also are associated notions of its being the boundary range of the world. (Cf. the article ALBURZ; F. Justi *Beitr. zur alten Geographie Persiens*, i. 4 sqq., ii. 4 sq.; Melgunof, *Das südliche Ufer des Kaspischen Meeres*, p. 27). To similar considerations is probably to be ascribed the fact that the Caucasus is connected with mountains which, beginning with Djabal al-'Ardj between al-Madīna and Mecca (Ibn Khordādhbeh, p. 172 *infra* sq.; Ibn al-Fākih, p. 25, 7 sqq., 295, 6 sqq.) or in Yemen (al-Hamdānī, *Djazīrat al-'Arab*, p. 126, 25 sq.) run northwards through Arabia and Syria. The connecting of these mountains with Kāf led to the localisation in the Caucasus region of the rock, sea and village (Ḳur'ān xviii. 59 sqq.) known from the legend of Moses (Alexander) (Ibn Khordādhbeh, p. 124, 3 sqq.; Ibn al-Fākih, p. 287, 14 sq.; al-Muḳaddasī, p. 46, 16 sq.; Yāqūt, i. 220, 21 sq., 454, 5 sq., iii. 282, 9 sqq.).

The Caucasus has further been regarded as the range beyond which dwelt Yādjūd and Mādjūd [q. v.]. The *al-Saddain* of Ḳur'ān xviii. 89, explained as "the two mountains", between which Dhū 'l-Karnain caused a barrier to be built to check the inroads of Yādjūd and Mādjūd is identified with Armenia and Ādharbaidjān (al-Ṭabarī, *Tafsīr*, xvi. 121 sqq.; al-Baidāwī on Ḳur'ān xviii. 89). But when geographical knowledge was extended, Yādjūd and Mādjūd were placed farther north.

The Sasanians in particular had closed the Caucasus passes with fortifications to prevent the inroads of the northern nomadic peoples. The most famous of these passes (cf. Ibn Khordādhbeh p. 123, 13 sqq.; Yāqūt, i. 439, 2 sqq.) are Bāb al-Abwāb or Bāb Šul or Derbend [q. v.] and Bāb Allān, the gate of the Alans, or the Darial pass.

The multiplicity of ethnic groups and languages in the Caucasus is mentioned by most Muslim geographers. According to an oft recurring statement, 70 (72) different languages are found there (Ibn al-Fākih, p. 25; al-Mas'ūdī, ii. 2); according to al-Muhallabī's *Kitāb al-'Aẓīz* (in Abu 'l-Fidā), as many as 300. Wherefore the mountain ranges are also called Djabal al-'Alsun "Mount of Languages" (Abu 'l-Fidā, *Taḳwīm al-Buldān*, ed. Reinaud and de Slane, p. 71, 15 sqq., 393, s. v. Tarābazūn, 405, s. v. Sarīr Allān).

For groups of peoples, states, and towns in the

Caucasus the reader is referred to the separate articles and the literature given below. See the articles ABKHĀZ, ALLĀN, ARMENIA, ARRĀN, BĀKŪ BARDHĀ'A, DAGHESTAN, DERBEND, GANDJA.

KĀBUL. I. A river of Afghānistān which rises near the Unai Pass in Lat. 34° 21' N., Long. 68° 20' E. and flows past the city of Kābul, near which it receives the Loghar River on the south and the Pandjshēr on the north. From the plateau of Kābul it flows by rocky passes to the lower valley of Djalālabād in which it receives the Surkhāb on the south and the Kunar on the north. It then passes through a gorge in the Mohmand hills into the Peshāwar District of British India near Mičānī. Here it divides into two branches, the northern one of which receives the Swāt R. Afterwards the branches re-unite. After a course of 316 miles the Kābul falls into the Indus near Aṭāk.

It is the Skr. Kubhā, and is called Kōphēn and Kōphēs by Arrian and Strabo, Kōa by Ptolemy. The Kubhā was undoubtedly one of the Seven Rivers of the *Rigveda*. The Arab geogra-

phers call this river by various names. Al-Bērūnī speaks of the River *Qhorwand* which falls into the Indus below Waihand, the capital of al-*Qandahār* (i. e. *Gandhāra*). This name is taken from the *Qhorband* Pass near which the *Pandjshēr* River rises. Al-Mas'ūdī says "the fourth river of the *Pandjāb* comes from the country of *Kābul* and its mountains which form the frontier of al-Sind". The modern name of the river in Pashto is *Sind*, (also a general term for "river"). Bābur speaks of the *Sind* river as rising in a mountain to the west of *Kābul*, and no doubt alludes to the *Kābul R.*, though elsewhere he applies the name *Sind* to the Indus. The name *Kāma* given by Elphinstone (Appendix on Rivers) appears to be a misnomer, as *Kāma* is the name of a tributary only.

The town and district of *Kābul* seem to have taken their name from the river.

2. An important city, now the capital of *Afghānistān*, situated in 34° 30' N. 69° 13' E. 5780 ft. above sea-level, in a fertile and well watered plateau. Population about 150,000.

Although the *Kābul* River under various names [q. v.] is known from the earliest times, there is no mention of any town which can be identified with *Kābul*. Ptolemy's *Karoura* has been supposed by some to be *Kaboura*, and the people he names *Bōlitai* are conjectured to be properly *Kabolitai* or people of *Kābul*, but these guesses rest on no evidence. *Kōphēnē* is probably the name of the whole valley derived from the river *Kōphēn*.

This territory was reoccupied by the Bactrian King *Demetrios* and formed a Greek kingdom until about the commencement of the Christian Era. The Parthian *Gondophares* seems to have held it for a time and the *Kushan* invaders were in possession of it during the 1st century. A vase bearing an inscription of King *Huvishka* has been found at *Wardak* near *Kābul*. Buddhism was the religion at this period. The *Kushans* were supplanted by the *Ephthalites* for a period, but some branches of the race seem to have recovered power afterwards, and held it when *Hsien T'sang* passed through in 657 A. D. *Kao-fu* is the name given to *Kābul* by the Chinese at this period. Buddhism was gradually replaced by Brahmanism, and this was the religion of the later *Kushan* kings, known by the title of *Shāhi*, who, as we learn from al-Bērūnī, were superseded by their *Brahman* wazirs, probably about the time of the first *Muhammadian* invasions. It is probable that after the first invasions the *Hindū* kingdom of *Gandhāra* was ruled from its capital *Udabbanda* (or *Waihand*) on the Indus, and extended to the foot of the mountains west of *Djalālābād*, but did not include *Kābul* proper, which continued as a separate principality under its own *Shāh*, sometimes under *Muhammadian* influence and sometimes independent, till *Sabuktigin's* time. By the earliest Arab chroniclers the country as a whole is termed *Qandahār* i. e. *Gandhāra*, which has often been mistaken for the town of *Qandahār*. Thus *Ṭabari* tells us that under 'Omar in the year 23 'Āsim b. Amr and 'Abd Allāh b. 'Omair pressed on through *Sistān* as far as the Indian frontier and *Qandahār*. The town of *Kābul* is not distinctly mentioned, the *Kābul* Valley and the adjacent *Kōhistān* up to the *Hindūkush* passes being described as the country of the *Kābul-Shāh* and the capital as an inaccessible mountain fort of an uncertain name (read *Djurwas* by Le Strange). *Yā'qūbī* says that it was conquered under 'Othmān

by 'Abd al-Rahmān b. Samura, but when he wrote it was known only by the export of the *Chebulic* (or *Kābuli*) myrobalans. Another expedition followed in Mu'awiya's time, and again in 176 (793) under *Hārūn al-Rashid* an army from *Balkh* invaded the valley from the north via the *Bāmīyān* Pass. There was another invasion in the time of al-Ma'mūn, which led to the submission of the *Kābul-Shāh* and his acceptance of *Islām*. These expeditions seem to have led to a nominal submission and acceptance of *Islām* but there seems to have been no actual occupation before that of the *Shāffāris* in 257 (871). *Pandjhir* with its silver mines was no doubt a powerful attraction and coins were struck there by *Yā'qūb b. Laith*. But it cannot be said that the name of *Kābul* applied to any particular town until later, and in any case it was not an important centre. It may be noted that the attack made by *Yā'qūb b. Laith* was from the north by way of the *Hindūkush* passes, and not by the more obvious route from *Sidjistān*, by way of the *Arghandāb* Valley and *Ghazna*. The ruler of *Kābul* at this period is described as a Turk by race and a Buddhist by religion, and it is probable that he was a successor of the later *Kushan* [cf. *AFGHANISTĀN*, i. 161].

It was never a mint town before the time of the *Mughal* Emperors. Coins were first struck there by *Bābur* [see art. *BABER*]. Throughout the rule of the *Ghaznavids* [q. v.] and *Ghōrids* [q. v.] *Ghazna* was the capital. Al-Idrisi mentions *Kābul* as a large Indian city on the border of *Tukhāristān*, and adds that no ruler could take the title of *Shāhi* till he had been inaugurated at *Kābul*. His information was probably derived from authorities much earlier than his own period, when the kingdom of the *Shāhis* had long ceased to exist.

It seems probable that the frequent destruction of *Ghazna* led to the rise of *Kābul* and after *Timūr's* time it became the centre of a principality under some members of his family. After the death of *Abū Sa'īd* [q. v.], his son *Ulugh Beg* obtained possession of *Kābul* and held it till his death. His son was expelled by *Muḳim*, a son of *Dhu 'l-Nūn Beg Arghūn*, who in his turn was driven out by *Bābur* in 910 (1504). This formed the foundation of *Bābur's* Indian empire, and even when his son *Humāyūn* was driven out of *India*, *Kābul* was not lost by the family, but was held first by *Kāmrān* and afterwards by *Humāyūn* himself till *India* was recovered. *Bābur* was fond of *Kābul*, and gives an enthusiastic description of its climate, its streams, its fruits and flowers. After his death at *Agra* his body was brought to *Kābul* and his tomb still exists in a garden laid out by himself near the town. From this time the history of *Kābul* is bound up with that of the *Mughal* Empire of *India*. It became a mint for gold, silver and copper, and coins of most of the emperors are found up till the time of *Muhammad Shāh*. In 1738 it fell into the hands of *Nādir Shāh*, and although a rupee of the emperor 'Alam-gir II was struck there after *Nādir Shāh's* death, it never again belonged to the empire, but was very soon taken by *Aḥmad Shāh Durrānī* [q. v.]. It soon superseded *Qandahār* as capital of the *Durrānī* dominions, and has continued to hold that position under *Sadozais* and *Barakzais* till the present day. [For history see under art. *AFGHANISTĀN*, i. 169^b sqq.]. The town grew in prosperity as the capital of an important kingdom, although it suff-

ered much during the various wars, especially those between 1839—1842 between the Sadozais and Barakzais, in which the British army of occupation took part, and in the civil war between Shēr 'Alī and his brothers. Under 'Abd al-Rahmān Khān [q. v.] and Habib Allāh the town has been improved and good roads and bazaars constructed. The Balā Hīṣār or old palace citadel on a rocky hill has been dismantled, the upper part has become an arsenal. A new fortified palace known as the 'Ark was built by 'Abd al-Rahmān outside the town between Shērpūr and 'Ālamgandj.

In addition to the tomb of Bābur mentioned above, the tomb of Timūr Shāh Durrāni is also near Kābul.

3. Kābul is also the name of the province in which the capital is situated. It is bounded on the north by Afghān Turkistān, on the west by Herāt, on the south by Kāndahār and on the east by Djalālābād. It includes the Paghmān Mts. to the north-west and the Hazārādjāt in the south-west. Ghazni is comprised in its limits, and the boundary between Kābul and Djalālābād is at Djagdalak.

KĀBŪL (A.). Acceptance of the offer (in contracts); see IDJĀB.

KĀBŪS B. WASHMGĪR, SHAMS AL-MA'ĀLĪ, ABU 'L-HASAN, nephew of Merdāwīdj b. Ziyār and fourth ruler of the Ziyārīd dynasty (his genealogy is given by his grandson, Kābūs Unšur al-Ma'ālī in his preface to the *Kābūs-nāmah*). Called to the throne by a military conspiracy, in 366 (976) he succeeded his brother Zahir al-Dīn Bahistūn as ruler of Djurdjān and Ṭabaristān. When the Būyid Fakhr al-Dawla [q. v.] had quarrelled with his brother 'Aḡud al-Dawla [q. v.] and the latter deprived him of his whole kingdom in 369 (979/80) Fakhr al-Dawla took refuge with his father-in-law Kābūs. As the latter declined to hand him over to the victor, 'Aḡud al-Dawla sent a force against Kābūs who after a defeat at Astarābād in 371 (981/2) fled with his protégé to Nīshāpūr to Ḥusām al-Dawla, governor of Khorāsān under the Sāmānid Nuḥ b. Manšūr. The latter sought to conquer Ṭabaristān for himself, but Ḥusām was defeated. On the death of the Vizier, Abu 'l-Ḥusain al-'Utbi, Ḥusām was summoned to Bukhārā to succeed him and took Fakhr al-Dawla and Kābūs with him. Soon after the death of 'Aḡud al-Dawla at Baghdād (373 = 983) Fakhr al-Dawla gradually reconquered Djurdjān and Ṭabaristān and wished to restore them to Kābūs but was persuaded by his vizier Ibn Abbād al-Šāhib [q. v.] to keep them for himself. After the

death of Fakhr al-Dawla however Kābūs regained his inheritance after seventeen years' exile in 388 (998) and held it till in 403 (1012) his tyranny and the many executions ordered by him produced a rising of the troops, who deposed him and put on the throne his son Minočihr, who was summoned from Ṭabaristān. Soon afterwards he was put to death by the rebels in the fortress of Djenāshk between Djurdjān and Astarābād by being deprived of his clothes, while engaged in his religious ablutions, and then allowed to perish of cold. He was learned in several branches of knowledge, particularly astrology, and left several short treatises (*rasā'il*) as well as Persian and Arabic poems. He was also a distinguished calligrapher. The poets Abū Bakr Muḥammad b. 'Alī of Sarakhs and Ziyād b. Muḥammad of Djurdjān sang his praises (Muḥammad 'Awfi, *Lubāb al-Albāb*, ii. 18, 19).

(CL. HUART.)

KABYLIA, a mountainous country in the Algerian Tell. The name Kabylia or land of the Kabyls (Arab. *Bilād al-Kabā'il*) is of comparatively modern origin; it is not found in the Arab historians or geographers, nor is it usual among the natives. It seems only to have been introduced as a geographical name by European scholars since the sixteenth century. The name Kabyls is taken from the Arabic *kaḥḥā'il*, plur. of *kaḥila*, "tribe", which some Arab writers use as a synonym for Berbers; this is found as early as the author of the *K'irfūs*, who several times (e. g. p. 217 and 238 of the Arabic text), in detailing the contingents of troops in the Marinid armies, carefully distinguishes the Kabā'il from the Arabs.

The European geographers sometimes give the name Kabylia to the whole mountain system of the Algerian coast from the mouth of the Isser to the Tunisian frontier. These elevations show in fact several common characteristics: predominance of the older strata with a few less extensive chalk zones intervening, an irregular outline, a striking development of forest flora, a population consisting of settled tribes who for the most part have retained their Berber dialects. According to the different mountain ranges, Kabylia is divided into the following fairly well defined areas: Great Kabylia or Kabylia of the Djurdjura, Little Kabylia or Kabylia of the Babor mountains between the Summam in the west and the Wād al-Kabir in the east, Kabylia of Collo, Kabylia of the Djebel Edugh and Kabylia of Bōna. The first named of these areas is the most extensive and has the most marked character; it is therefore called Kabylia by preference and we shall deal with it alone in the following.

Great Kabylia is bounded on the north by the Mediterranean from the mouth of the Wād Būduāu to Bougie, i. e. for a length of 100 miles. In the east it is bounded by the valley of the Wād Sāhel (called Summam in its low course) and by the upper course of the Isser, in the west.

by the valley of the Wād Budaū and the Mitidja plain. The area thus included measures about 41 miles from N. to S. between Dellys and Bwira (Bouira) and covers some 2307 square miles. Access is rather difficult except from the west. Here the gateway of Ménerville (pass of the Beni 'Ā'isha 450 feet high), the valley of the lower Isser, the depression of the Wād Shander and the pass of Haussouvillers (600 feet) afford an easy access to the Sebau plain, i. e. the heart of Kabylia.

Kabylia falls into three separate areas very different from each other: the Kabylia mountains in the narrower sense, the Djurdjura chain and the coast range. The Kabylia mountains "consist in the centre chiefly of gneiss and micaceous schists with larger or smaller intrusions of granulitic rocks and, on the flanks, of archaic schists and primary argillaceous schists, the layers of which form the outer spurs with their gentler slopes. In the west of these mountains and separated from the main group by tertiary deposits rise several isolated rocky peaks: Bū 'Arūs, the massif of the Khashna (2050 feet), the Djebel Bellūwa (2310 feet) north of Tizi Uzū". The Kabylia massif is connected as it were by an isthmus with the central part of the Djurdjura and cut off on the other sides by a continuous depression, in the north by the valley of the Sebau, as much as 11 miles broad, in the west by the valley of Dra' al-Mizān and in the south by the depression of Bughnī. The whole system, sloping from west to east (from 4225 to 1950 feet) is divided by deep and narrow valleys into mountainous blocks (hills of the Ma'atka, the Flissa and of the Zwāwa, etc.).

The Djurdjura forms in the south the edge of the Kabylia massif for about 40 miles from Tizi (Berber = pass) Djabūt (3850 feet) to Tizi-n'Shria (4010 feet). It consists of lias limestone, split up into a series of sharp combs or steep rocky walls, and maintains an elevation of a little over 6500 feet. The highest summits, which run in two rows, are the Haizer (6935 feet) and the Akukur (7490 feet) in the north and in the south the Lalla Khadidja (7500 feet). This altitude and the scarcity of the passes, which are impassable in the winter (the most important is the Tirurda Pass (8655 feet), make traffic between the two slopes very difficult. In the east of the Djurdjura proper, in the Djebel Arbalu, there reappear scattered layers of limestone, running down to the sea where they end in the Gūraya of Bougie.

At a lower elevation (2600—3900 feet) the coast range stretches along the sea-coast from the mouth of the Sebau to the Djebel Akfadū and covers the greater part of eastern Kabylia with its sandstone formations.

From this variation in elevation and geological structure result marked differences in climatic conditions. In the valleys, notably in the basin of the Sebau, cut off from the sea by the coast range, the summer is very hot (mean July temperature in Tizi Uzū 35° C.). In the Kabylia mountain country on the other hand there is a long cold winter, during which the ground is often continually covered with snow, which lies on the summits of the Djurdjura from December to June. The rainfall is unevenly distributed — being particularly heavy in the east of the district where it averages 40 inches p. a., while the lowlands, notably that of the Wād Sāhel-Summam, which is shel-

tered from the moist winds by the wall of the Djurdjura, are relatively dry. Nevertheless Kabylia is one of the best watered areas in Algiers. Four river-systems are distinguished: — the Isser, the Wād Sāhel Summam, the coast rivers, and the Sebau. The latter collects the water from the north slope of the Djurdjura, supplied by tributaries, flowing at the bottom of narrow valleys cut through the Kabylia mountains. None of all these water-courses is navigable; they are all mountain torrents and are liable to considerable variations in their amount of water. The winter-rains and the melting of the snow produce a considerable, often devastating, increase in their volume.

Lying within the so-called Numidian zone which is marked by luxurious forests, Kabylia does not have the treeless appearance of most Algerian landscapes. The flint and sandstone formations of the eastern part support great wooded mountains (Yakūren, Tizi ūfella, Akfadū etc.) which are covered with different kinds of oaks such as the cork, the zān (*chênes zéens*, *quercus Mirbeckii*), the *afares* (*quercus castaneofolia*) and *ballūt* or hazelnut oak. Several cedar plantations, which however are on the verge of extinction, cover the slopes of the Djurdjura up to a height of 3900 feet. Trees are especially cultivated in the Kabylia mountains where they afford the inhabitants the greater part of their resources. The leaves of the ash-trees are used to feed the cattle, while its wood is used for agricultural and domestic implements and vines sometimes cluster round their stems. The fig and olive trees, the first of which is grown up to 3250 feet and the latter to 1950 feet, play an important part in the life of the Kabyls. Dried figs and oil form the basis of the food of the population; the superfluity is sold abroad. These fruit trees are therefore cultivated with the greatest care and in increasing numbers, so that we find fig and olive trees even on almost inaccessible slopes, where the soil has to be supported by mortarless stone walls. Vegetable fields and orchards surround the houses and villages and their produce serves to supply the daily wants of the inhabitants. Wheat is grown only on the low-lying ground and as a rule only in the districts settled by Europeans. As the scarcity of meadows hardly allows cattle to be reared, the native stock consists of a few cattle and sheep and a large number of goats. The mule is the only suitable beast of burden for this mountainous region.

Kabylia is the most populous part of Algeria as it has about 660,000 inhabitants or 250 to the square mile. The population however is very unevenly distributed. Scattered in Djurdjura, comparatively thin in the forest region, it is however very dense in the Kabylia mountains where the soil of the nature and abundant springs afford more favourable conditions for human settlements. The mixed community of Fort National and that of Djurdjura number, the former 61,726 to 145 miles, the latter 66,353 to 125 miles that is about 418 and 530 to the square mile or about the density of population in Holland. The natives live in groups in villages, sometimes up to several thousand in one village. These settlements lie on the hill-tops or on the mountain ridges which separate the valleys from one another. The choice of site was settled by consideration for the most profitable use of the arable part of the slopes and also for the necessity for securing a defenc-

against neighbouring tribes. Surrounded by a belt of gardens protected by cactus hedges and encircling walls of stone without mortar, accessible only by steep paths, these villages were really fortresses, sometimes impregnable to an opponent unless provided with artillery. Since however the French occupation guarantees the peace of the land, the natives show a certain tendency to leave the summits and move their dwellings nearer to the valley. In spite of the picturesque appearance which the closely huddled together white houses with their brown tiles make, these villages are in reality only piles of wretched dirty hovels. Most of the houses consist of one storey only and have neither windows nor chimney. As a rule they are divided into two by a wall breast high, of which one part is for men and the other for cattle. The very scanty furnishing consists chiefly of mats, which take the place of bedding, and stone vessels, which hold the family provisions. The groups of houses are separated from one another by narrow passages, which are just broad enough to allow a loaded mule through and are encumbered with dung and rubbish. The only public building is the mosque which, only recognisable by its minaret, is in almost as miserable a condition as the private dwelling houses. As there are no shops in the village where the natives could make their necessary purchases, they have to go to a market (*sūq*) which is held weekly at a definite place, usually in the neighbourhood of a river or spring. This market has a great attraction for the Kabyls as they come to it not only to purchase food and other necessities but also to meet the inhabitants of other villages and learn what is going on. The market usages have therefore been very strictly regulated. The market formed a neutral area, visitors to it enjoyed a special protection called "*anāya* of the market".

The Kabyl population is increasing steadily and rapidly, but the soil, which is of only average fertility, in spite of the aptitude of its inhabitants cannot support them all. The once flourishing native industries such as weaving, making carpets, ornaments, and arms (especially among the Flissa and the Banī Yenni) are disappearing more and more before European competition. The natives thus find themselves forced to leave their native land and seek work outside it, as moreover they used to do in earlier times also. Under Turkish rule hill dwellers used to come in considerable numbers to Algiers to gain a livelihood as servants, porters or gardeners. Others, notably the Banū Yahyā, the Banū Iliten and the Banū 'Aṭṭāf went about among the Arab tribes as pedlars (*ṣāffaren*) and combined money-lending with commerce, as their descendants still do. The French conquest and the expansion of colonisation have opened new outlets for the industry of the natives. While they work in the coast towns as bricklayers, hodmen, and dock labourers, the Kabyls at the same time supply the farmers of the Tell of Algiers and Constantine with the labour so necessary for the harvest and vintage. They also readily labour on public works as well as in the mines of Algeria and Tunisia and for some years past in those of France also. Others again enlist in the native regiments, especially the *tirailleurs*. But the Kabyl's emigration is only temporary; — as soon as the pedlar, the agricultural labourer or the miner has saved a little capital, he returns to his

village to buy a strip of land or at least a few trees at the earliest opportunity. The impulse to acquire property is very strong in them and the land is thus broken up into very small shares.

The Kabyls form the most important and at the same time the most compact Berber group in all Algeria. Yet they cannot be regarded as absolutely pure descendants of the old African race which inhabited North Africa before the foreign conquests and the immigrations of the historical period. The very formation of the country made it a place of refuge for the inhabitants of the plateaus and valleys, who were pushed back by the continual inroads of foreign peoples into North Africa. In addition, as Hanoteau points out, Kabylia was at all times an asylum for outlaws and evil doers. The present Kabyl type is therefore the result of numerous crossings and far from being homogeneous. Many individuals can hardly be distinguished from Arabs, others and indeed the greater number, with their large bones, their square heads and their coarse features resemble the peasants of Central France. As to the colour of their hair, two types can be distinguished, the brown and the much rarer blonde. Yet in spite of these differences, the natives of Kabylia have all the linguistic, social and religious peculiarities common to all the tribes described as Berber. They talk different Berber dialects, of which the Zwāwa spoken in Djurdjura and in the Kabyl mountains is the commonest. "The Zwāwa, especially the Beni Raten, are those who, owing to their isolation, are considered to have preserved the purest Berber dialect; this gradually changes by almost imperceptible degrees as one goes westward into the dialect of the Ait Khalfūn and eastward into the dialect of the Wād Sāḥel (Wādī Sāḥil) and that of Bougie". (R. Basset, *Etude sur les dialectes Berbères*, Paris, 1894, *Introd.*, p. viii.). The linguistic frontier even crosses the geographical boundaries of Great Kabylia and follows the watershed between the basin of the Wād Bū-Sellam and that of the Wād al-Kabir. The persistence of these dialects is all the more remarkable as the French occupation, the extension of Muslim as well as European education and finally the continual development of emigration seemed likely to bring about a rapid decline in the use of Berber. Although many natives have a more or less superficial knowledge of Arabic and French, Kabyl is nevertheless still the language of the home, and the only language used by the women and children in the villages. In many districts a decline in Arabic has been noted. In the arrondissement Tizi Uzū, for example, several Arabic speaking groups comprising some 18,400 persons have become completely berberised in the last few years (E. Doutté and E. F. Gautier, *Enquête sur la dispersion de la langue berbère en Algérie*, Algiers 1913).

The Kabyls possess no written literature but have a fairly varied and copious popular literature (songs, often inspired by current events, fairy tales, riddles, etc.). These productions, composed by illiterate people, often women, have been handed down by oral tradition and transmitted from village to village by wandering singers whose profession is often hereditary. Some of these singers (*meddāh*, *fakīh*) who sang the praises of the Deity, the feuds of the tribes and the heroic deeds of the warriors, were held in high esteem by their

countrymen; others again who sang songs of love or humour to the accompaniment of the tambourine or the oboe were as despised as the butchers, measurers of corn and other individuals, who followed a trade regarded as degrading.

As Muslims, the Kabyls, like the other Berber tribes, adopted the creed without recognising the Qur'anic system of law (see BERBERS, i. 702). Their customs are in many points contrary to orthodoxy. Lending money at interest, condemned in the Qur'ān, is generally allowed. "The acceptance of the principle that money is to be considered as goods", writes Hanoteau, "is a characteristic feature of Kabyl society which in order to remain true to its traditions has not shrunk from showing its contempt for the punishment of exclusion from the Muslim community, threatened as a punishment for usury". (Hanoteau and Letourneux, *La Kabylie et les coutumes kabyles*¹, ii. 497). The social and material position of women is far behind that assured her by Muslim law. Woman has no civil rights, being continually in tutelage; excluded from participation in the paternal inheritance, she herself is one of the family chattels. Marriage is merely an act of purchase. The man who divorces his wife still remains her owner and he fixes the price which must be paid him before she can marry again. Polygamy is legal but little practised and only a few marabouts are rich enough to afford it. The position of woman thus appears a very miserable one; she is, according to Hanoteau, "a human chattel" (*Poésies populaires de la Kabylie du Furjura*, p. 287). In practice, however, it appears that her position is easier than one would expect from the rigour of customary law. She holds an important place in the family and even in the villages, and, according to some authors (Rinn, Masqueray, Boulifa), she exercises a by no means negligible influence in domestic life and even in political life.

In spite of the liberties they take with orthodoxy, the Kabyls are not, as is sometimes alleged, lukewarm Muslims. They have always been and still are to-day very susceptible to the influence of fanatics. Perhaps they, at one time, like many other Berber groups, embraced Khāridjī doctrines but they were regained for orthodox Islām at the beginning of the modern era and have since then remained steadfast in their faith. Their ignorance, it is true, leaves them defenceless against the incitements of marabouts. The latter held and still hold a special position in Kabyl society. Enjoying numerous privileges (exemption from taxation, entertainment allowances etc.) they were not expected to bear arms except in the holy war and, thus placed outside tribal wars and quarrels of the *soff*, they kept for themselves the fruitful roles of intermediaries and peacemakers. The only representatives of education in the midst of an illiterate population, they gave the rudiments of instruction in the village schools and in the schools attached to the *zāwiya*, a word which among the Kabyls means a village exclusively inhabited by marabouts. Education in these schools (Kabyl *thimamert*, Arab. *ma'mera*) is confined to the elements of Arabic language and grammar, theology and law. The marabouts live either scattered among the people or grouped in families or tribes. Some claim for themselves an Arab or even Shārifan origin. These *Shorfa* form a privileged caste

and only marry among themselves. At all periods the part played by marabouts — male and female — has been considerable. It was they who stirred up the native resistance to the foreigners, Turk or French, who tried to conquer them. They were supported by the religious orders, of which the largest is that of the Rahmāniya, which originated in Kabylia itself. Its founder was the marabout Sidi Muḥammad 'Abd al-Rahmān Bū Kōbrain, sprung from the tribe of the Ait Smā'il, who lived from 1126—1208 (1715—1798). Recruited at first from the Gueshūlā, a confederacy of which the Ait Smā'il were part, the order gradually extended throughout Kabylia. Its chiefs were the fiercest opponents of the French in 1857 and in 1871; although its influence has declined, the brotherhood of the Rahmāniya, of which the parent lodge is at Akbū, is still that which numbers most adepts (9000 members and 43 *zāwiya* in 1897, according to Depont and Coppolani, *Les Confréries religieuses du Maghreb*).

History. Practically nothing is known of the history of Kabylia before the xvth century A. D. There are no native chronicles and the notices supplied by Arab, Latin or European writers are few and fragmentary. The characteristic fact of Kabyl history during this long period seems to have been the resistance of the Kabyls to foreign penetration. In ancient times even the Romans did not succeed in establishing themselves in the massif. Their principal settlements Saldae (Bougie) Rucazus (Tigzirt), Rusucurru (Dellys) were situated on the coast. Military posts kept a watch on the valley of Wād Sāḥel and of the Isser, but the Djurdjura (Mons Ferratus) remained practically independent under the rule of native chiefs, vassals of Rome. The inhabitants of the mountainous region formed the confederation of the Five Nations or Quinque Gentes: — the Massissenses (perhaps the Msisna of the Wād Sāḥel), Isafilenses (Ifliissen?), Jubabeni (Beni Jubar), Tendenses and Jesabenses. These natives rose in revolt several times, notably in the first century A. D., during the rebellion of Tacfarinas, then again in the time of Diocletian. From 288—297, they ravaged eastern Mauretania and western Numidia. To subdue them, Maximian had to deport them *en masse*. In the following century they adopted Donatist doctrines and again took up arms under their national leaders, Firmus (372—375 A. D.) and later Gildon.

We do not know at what period and under what conditions, Islām was introduced into Kabylia, taking the place of Christianity and paganism. We may, however, conjecture that this land must have for some time escaped the Arab conquest and served as a place of refuge for the last remnants of Roman and Byzantine population as well as for the Berber tribes fleeing before the invaders. In the ixth century however, the conversion to Islām was an accomplished fact, since Ibn Khaldūn (*Hist. des Berbères*, transl. de Slane, i. 256) mentions the Zwāwa at the same time as the Ketāma among the partisans of 'Obaid Allāh and the founders of the Fāṭimid empire. Well treated by the Šanhādjī Zirids, the Kabyls then passed under the rule of the Hammādids, who reduced to obedience the mountain peoples of the Bougie region, and then under the sway of the Ḥafṣids. But Ibn Khaldūn himself says that the authority of the sovereigns of Bougie over the Kabyl tribes was quite nominal [cf. IRĀTEN, ZWĀWA].

At the beginning of the xvth century, the people of Kabylia were divided into three political groupings called by western writers, the kingdom of Kūko, the kingdom of Labbès, and the principality of the Beni Jubar. The kingdom of Kūko stretched from Djurdjura to the sea, and through the port of Azzeffūn was in touch with European countries. The kingdom of Labbès comprised several tribes of little Kabylia of which the most important was that of the Benī 'Abbās in the east of the Wād Sāhel [cf. the article *ḲAL'AT BANĪ 'ABBĀS*]. The principality of the Beni Jubar comprised the population of the coast east of Bougie. The Turks who appeared in Algeria at the same period and there founded a powerful state, relied on these different groups in turn. 'Arūdī contracted a close alliance with the Sulṭān of Kūko, Aḥmad b. al-Ḳāḍī, who gave him auxiliaries and took part in the expeditions against Algiers and Tlemcen [see 'ARŪDĪ], but he thereby alienated the Sulṭān of the Benī 'Abbās, who took the side of the Spaniards. After the death of 'Arūdī, Ibn al-Ḳāḍī quarrelled with his successor Ḳhair al-Dīn [q. v.]; he inflicted a bloody defeat on him on the land of the Flissat Umellil and remained for several years master of Algeria and of Mitīdja. An alliance with the Benī 'Abbās enabled the Turks to regain the advantage. Pursued right into their mountains, the Kabyls were forced to submit and to pay tribute. During the period of the Beylerbeys, the inhabitants of great Kabylia lived on good terms with the Turks. Ḳhair al-Dīn and his successors recruited from among the Zwāwas soldiers whose fidelity they appreciated and on whom they could rely if necessary against the undisciplined soldiery of the Janissaries. The alliance with the Sulṭān of Kūko enabled Ḥassan b. Ḳhair al-Dīn to triumph over the Sulṭān of Labbès who became in his turn a tributary of the Turks (1559). As to the 'Abd al-Djabbār, they had shown themselves friendly to the Spaniards and after the reoccupation of Bougie by the Turks never ceased to wage war on its garrison.

The rulers of Algiers did not however succeed in definitely imposing their supremacy on the Kabyls. The latter during the closing years of the xvth century and during the whole of the next century, were in a state of almost permanent insurrection against the Turks. The expeditions undertaken by the Pašhas to chastise the rebels yielded no permanent result. The conquered tribes agreed to pay tribute but cast off the obligation as soon as the Turkish columns had quitted the country. In the course of these struggles, important changes modified the political organisation of Kabylia. The kingdom of Kūko disappeared and was replaced by the confederation of the Zwāwa. A new confederation that of the Guesh-ṭūla (Igūshdal) was founded in the middle of the xvith century by a *shaikh* named Gassem and united together the population of the western part of the Djurdjura. In the xviiith century, the Turks made some progress. They succeeded in taking the mountainous region between the Wād Bugdura and the Wād 'Aysi (1745—46) but could not subdue the Banī Rāten. Their military ports at Bughni, Bwira, Burdj Sebau were destroyed on several occasions. The first years of the xixth century were still more unfortunate. The Flissa invaded Mitīdja several times; in 1816 the Guesh-

ṭūla seized the *burdj* of Bughni and only spared the garrison at the intervention of the marabouts.

Turkish authority in Kabylia was therefore up to the end very precarious. The tribes which recognised it were distributed over two *ḳā'idats*: the *ḳā'idat* of Bughni, which included the confederations of the Guesh-ṭūla, the Banū Sa'adka and a part of the Ma'atka, and the *ḳā'idat* of the Sebau, including, besides the town of Dellys, the Banū Ḳhalṭūn, the Banū Waguennūn, the Flissat al-Baḥar, the peoples of the upper Sebau and those of the Wād al-Ḥammām. In the north-east, finally, the Turks occupied Bougie. To maintain order and collect taxes, the *ḳā'id*s had at their disposal a few hundred janissaries installed in fortified posts (*burdj*), and *amala's*, of which several were composed of negroes (*abid*). They levied taxes — which were however quite light — on the produce of the plain, collected dues in kind (sheep, grain, figs & oil) for the use of the garrisons, claimed the right of investiture of *shaikhs* and granted for a fee passports to natives, etc. In return the Turks interfered very little in local affairs and only did so when they thought they could make profit out of it. The most efficacious means employed by them to bring recalcitrant tribes to order was the blockade. As the country did not produce enough grain to feed its inhabitants they were not long in submitting. The Turks, moreover, observed local divisions with the greatest care and showed themselves full of consideration for influential marabouts, to whom they gave exceptional privileges. They heaped gifts on their *zāwiya's* and built *kubba's* on the tombs of the most venerated saints. Turkish rule therefore has left no feeling of hatred among the Kabyls. "The Turk", says Hanoteau (*Poésies populaires de la Kabylie du Furjura*, p. 63—64 note), "is the type of bravery and dignity in the popular songs; when the poet wants to praise one of his compatriots, he compares him to a Turk".

Whether nominally subject to the Turks or completely independent, the Kabyl tribes preserved intact their political and administrative institutions. Kabylia, far from forming a state, was simply an aggregation of little municipal republics, grouped in confederations of small size. The political and administrative unity was the village (*thad-darth*), whether a single village or a union of several hamlets (*trifk*) and subdivided again into divisions called by different names in different districts (*adrūm*, *tharift*, *takherrūbt*, *Ḳharūba*). Several villages bound together by mutual obligations formed a tribe (*'arsh*). At the time of the French conquest there were 1400 villages divided among 120 tribes. A confederacy of several tribes was called a *thakebilt* (Arab. *ḳabila*). The chief of these confederations were those of the Guesh-ṭūla, the Ait Ṣedka, the Zwāwa, the Eastern Zwāwa, the Ait Irāten, the Ait 'Aysi, the Ma'atka, the Flissat Umellil and the Flissat al-Baḥar (Ifissen), the Ait Waguennūn, the Ait Djennād, the Ait Ḡhobrī, etc.). In certain cases several confederations could unite for some common defensive or aggressive purpose, but such leagues had never more than a temporary character. All tribes however were not grouped into confederacies and some were content merely to contract, when in case of need, temporary alliances with their neighbours.

The village, the fundamental element in the

Kabyl organisation, was a kind of municipal republic subject to the authority of the assembly of its citizens (*thadjemait*, Arab. *djemā'a*), which had most extensive powers. It appointed a president (*amokrane*, *amrar*, *amin*), who was charged with carrying out its decisions, and *temman* (plural of *tamen*), a kind of assistants, who had to support the *amin* in the exercise of his duties. The *djemā'a* fixed the quota and the apportionment of taxes, declared war, made peace, administered public charity and, lastly, modified, if necessary, local customs. All male inhabitants old enough to observe the fast of Ramaḍān took part in the assembly and were bound to be present, but in practice decisions were made by a minority of rich and influential persons, so that the government of the village was only democratic in theory. The authority of the *djemā'a* was, besides, limited by the obligation under which it found itself, to respect the rights of individuals or families, individual or collective guarantees sanctified by long custom, market-laws, etc. The tribe and the confederacy were organised on the model of the village, with deliberative assemblies and *amin*'s, but the bonds which united such groupings became more and more slack as the groups increased in size. There were frequently serious dissensions within these groups. The existence in the smallest village of *ṣeff*, that is to say, parties supporting the interests of influential personages, the exercise of the right of private vengeance (*rekba*) or of the right of reprisals (*usiga*), the care taken to make respected the *anāya* of individuals or of the community, provoked continual conflicts, which the intervention of the marabouts settled with great difficulty. The relations of the tribes and confederations were hardly more satisfactory than those of the villages with one another. Kabylia was, in a word, handed over to anarchy and there was a permanent state of war there.

The capture of Algiers by the French in 1830 put an end to Turkish rule. On hearing of this event, the garrisons retired to the Titteri, leaving the country to itself. The Kabyls, however, proved themselves no more able to unite than they had in the past. Various chiefs, Ben Salem of the Banū Djād, Ben Zamun of the Flissa, Si Djūdi of the Zwāwa, Belkāsīm or Kasi of the Amrāwa disputed for the supremacy with one another, but did not succeed in imposing themselves on all the tribes. 'Abd al-Kādir himself was no more fortunate [see 'ABD AL-KĀDIR, i. 43 sq.]. He appointed a *khalīfa* of the Sebau, but could not get himself recognised as Sultān by the tribes of the Djurdjura, who refused to pay him taxes as they had refused to pay them to the Turks. He was even nearly massacred by the people of Wād Saḥel in 1839. The French, for their part, had been in occupation of Bougie since 1833, while the Kabyls of the east made frequent incursions into the Mitidja. To dispose of such dangerous neighbours the government therefore decided to conquer Kabylia at a time when 'Abd al-Kādir seemed definitely reduced to impotence. A first expedition conducted by Bugeaud in the valley of the Sebau resulted in the submission of the Flissat al-Baḥr and the occupation of Dellys (1844). Interrupted by the Franco-Moroccan War, then by the struggle with 'Abd al-Kādir, who in 1849 again tried to raise the Kabyl tribes, operations were resumed in 1847 and brought the tribes of Wād Saḥel to re-

cognise French authority. But the Kabyl massif and the Djurdjura served as an asylum for all malcontents and continued to be a smouldering fire of rebellion, which was continually blazing out again. In 1849, the Zwāwa, the Gueshtūla, and the Banū Mellikesh attacked the tribes who had already submitted; in 1851, the Sherif Bū Baghla, with several thousands of mountaineers threatened Bougie, then, repulsed by French troops, sought refuge in the Djurdjura. Pelissier in 1851, Bosquet in 1852 had to take the field against him. To facilitate penetration of the country, roads were built from Algiers to Bougie, from Dellys to Aumale and finally from Sétif to Bougie across Little Kabylia, only recently pacified. The natives, however, were not yet subdued; they took advantage of the reduction of effective troops during the Crimea war to take up arms again. The rising of the tribes of the upper Sebau necessitated the despatch of a column which crossed the country between Bougie and Dellys and penetrated as far as the Benī Yahyā in the very heart of the Kabyl massif (June—July 1854). New disturbances provoked by the Raḥmāniya brotherhood in 1855 and 1856 forced the French once more to fight the tribes of the Sebau and the Gueshtūla. The results obtained however would have remained insecure so long as the Banū Rāten, the most turbulent of tribes of the massif, were not reduced to impotence. A new expedition was therefore organised in 1857 by Marshal Randon, then governor-general, supported by Generals Macmahon, Renault and Yūsuf. While reconnoitring troops surveyed the southern slope of the Djurdjura, three divisions left Tizi Uzu and scaled the slopes of the massif. The Banū Rāten were the first to be attacked and defended themselves energetically for two days. The capture of their villages and the defeat inflicted on them on the plateau of Sūḵ al-Arb'a forced them to sue for peace (25 May). The Ait Menguellet, their allies, continued the struggle and were crushed at Isheriden (24 June). The Ait Yenni had to submit in their turn in the beginning of July. The defeat of the Ait Iliten, who had been stirred up by the female marabout Lalla Fāṭma, terminated the campaign. The tribes delivered hostages and paid a war indemnity, but retained their municipal autonomy and their *kānun*. The building of Fort Napoléon (now Fort National) on the plateau of Sūḵ al-Arb'a enabled the French troops to control the whole massif. The country was opened up by roads, put under military rule and divided into four administrative districts.

The most complete tranquillity reigned until 1871, when the Kabyls rose again at the incitation of the grand-master of the Raḥmāniya, Shaikh al-Haddād and especially of his son al-'Azīz, who made an alliance with Mokrāni, the rebel bashagha of the Medjāna. A holy war was proclaimed on April 8 at the market of Seddūk and soon the rebels numbered 180 000 fighting men. Bougie, Delly, Tizi Uzu, Fort National, and Dra' al-Mizān were blockaded by the natives, the village of Palestro was taken and sacked by the rebels in spite of the resistance of the Europeans. The rebels even threatened Mitidja but were held up on the Alma by Colonel Fouchault's flying column. Troops sent from Algiers delivered the towns and garrisons besieged by the insurgents, who were routed at Isheriden on June 24. Shaikh al-Haddād

surrendered to the French on July 13 and at the end of the same month, the valley of Wād Sāḥel was cleared of rebels. Kabylia lost its municipal autonomy and a war indemnity of 36 582 000 francs was levied on it. Besides, 446 000 hectares of land were sequestered and appropriated for European colonisation, for which centres were created in the valley of the Isser and in the valley of Wād Sāḥel. Since that date peace has not been disturbed and civil government has been organised in Kabylia as in the rest of the Tell (cf. the article ALGERIA). Primary schools with technical instruction have been established in the principal villages and education is compulsory for the natives. The latter seem to have adapted themselves to the new situation; their resources have increased to such a pitch that in some districts European colonisation has receded and considerable areas of land have been bought back by the natives. The isolation in which the Kabyls lived so long is tending to disappear and, if it is chimerical to hope even in the remote future for an assimilation of the Berber and European elements, perhaps it may be permitted to foresee for them sufficient community of interest to prevent new conflicts.

KAČĤH (sometimes written KAČ; al-Balādhuri

Wüstenfeld, iv. 126, 1: al-Ḳaṣṣa, but i. 505, 22, iv. 94, 10: al-Ḳass; in Anglicised spelling CUTCH), an Indian State attached to the Pālanpur Agency of the Bombay Presidency, lying between 22° 47' and 24° N. and 68° 25' and 71° 11' E. Its area is 7616 sq. m. and the population in 1911 was 513, 429 (Musalmans 126, 133). It is separated from the mainland of Sindh and Kaṭhiāwāḍ by the great salt-swamp known as the Rann of Kačĥ (Great and Little) which makes it a quasi-island. The Rann is included in its boundaries, but not in the area given above. The country is hilly in some parts, but is flat for the most part. There are signs of former volcanic action. Earthquakes have frequently occurred; that of 1819 wrought great destruction, including the capital Bhūḍj.

The Rann was undoubtedly at one time an arm of the sea and may with probability be identified with the great lake described by Arrian as visited by Alexander near the mouths of the Indus. It has been identified by S. Julien, V. de St. Martin, Watters and V. Smith with the Ki-ch'a of Hwen Tsang, which he describes as under the suzerainty of the Vallabhī kings, but this is open to doubt as the province described by Hwen Tsang does not seem to have been near the sea.

Al-Balādhuri mentions a king of Ḳaṣṣa called Rāsak (Rāsik) in the time of the Caliph al-Walid I (86—96 = 705—715). The town of Surasta (Sorasht) situated in the Bay of Kačĥ still existed in the ixth century. It was inhabited by the Maid (Mēd), who were reputed as pirates. According to al-Balādhuri, the people of Kačĥ were Muslims in the time of Hishām 105—125 (724—743). When the power of the Muslims in the region of the Indus declined in this period, they endeavoured to maintain themselves in Ḳaṣṣa (al-Ya'ḳūbi). Al-Bērūnī describes the eastern branch of the Mīhrān of Sindh (the Indus) as flowing into the ocean at a place called Sindhu-sāgara (the Sea of Sindh) in Kačĥ, and this is clearly the Rann of Kačĥ. The Rann was therefore an arm of the sea as lately as 1000 A. D., and a branch of the Indus still flowed into it. Kačĥ is described by al-Bērūnī also as the home of pirates (*bawāriḍ*). The Samma Rāḍjpūt rulers of Sindh conquered the country probably in the xivth century; the majority of them became Musalmans, but the Djhāḍedjā clan, whose power was established by Mōda about 1270 to 1298, adopted a modified form of Hinduism. They have continued to rule the country under the suzerainty first of the Kings of Gūḍjarāt, then of the Mughal Emperors and lastly of the British Government. The Kalhōras of Sindh invaded Kačĥ in the xviiith century (1762—5). The early reputation of Kačĥ for piracy was revived in more recent times and led to the British occupation in 1815—1818. The Rāo was however soon restored.

The Djhāḍedjā rulers bear the title of Rāo. Their capital is at Bhūḍj and coins are struck there in the name of the *Mahārāo* joined first with those of the later Emperors of Dihli and more recently with those of Queen Victoria and her successors. The port of Mandvi is a considerable town with a large coasting trade.

The Kačĥī language is peculiar to the province. It belongs to the Western Indian group of languages and is commonly classed as a dialect of Gūḍjarātī, although, according to Grierson,

and al-Ya'ḳūbi: قَصَّة; al-Bērūnī: كَج; Yāḳūt, ed.

it may perhaps be more correctly considered a dialect of Sindhi. In accordance with its geographical position it forms a link between the two languages.

(M. LONGWORTH DAMES.)

KAČĀHĪ OR **KAČĀH GANDĀWA**. A province in Balōčistān extending from 27° 53' to 29° 35' N. and from 67° 11' to 68° 28' E. with an area of 6,415 sq. m. It forms a level plain enclosed on the N. and E. by the southern Sulaimān Mts. and on the W. by the Kirthār Ranges. To the S. it is open being bounded by the plain of N. Sindh. Politically it forms part of the Khānate of Kalāt [q. v.] with the exception of the small area of Sibi in the north which was nominally part of Afghānistān and was transferred to the British Government under the treaty of Gandamak in 1879. This district is part of British Balōčistān. The tribes in the eastern half of KačĀhī, the Dōmbkī, Umarānī and Kahīrī are only nominally subject to the Khān. These tribes lie to the east of the railway from Jacobabad to Quetta, which traverses the province from south to north. The territory west of this line is also mainly occupied by Balōč tribes with the exception of the area near Dhādhār in the north, where nomadic Brahōis are found. Everywhere there is a large settled population of Djaṭts. There are no large towns; Gandāwa, Shorān, Dhādhār, Sibi and Lahri are the principal places. Cultivation is carried on by irrigation from the small streams and hill-torrents which issue from the mountains; the Nārī and Bōlān on the north, the Mūla and Suklējī on the west, and the Lahri and Chāttār on the east. Without irrigation, cultivation is impossible as the climate is intensely hot and the rainfall very scanty. The valleys of the Mūla, Bōlān and Nārī form passes by which communication with the uplands has been carried on from time immemorial. The two first-named are now traversed by railways which lead to Quetta and Peshin by the Bōlān and Harnai countries. The strip of territory called Naṣirābād is politically part of the Sibi district. It lies adjacent to the British District of Jacobabad in Sindh, and receives its irrigation from the Sindh Canals fed by the Indus.

The population is scattered but denser than in most parts of Balōčistān. Including the Sibi and Naṣirābād taḥsils, and the Dōmbkī-Kahīrī country, all of which are geographically part of the KačĀhī plain, the total is 175,860 (census of 1911). The history of this tract is dealt with under arts. BALŌČISTĀN and KANDĀBĪL.

(M. LONGWORTH DAMES.)

KADĀ' means literally "deciding" (*ḥukm, faṣl, kaṭ', tartīb*, cf. Ibn Ḥazm, *Milal*, iii. 51) but the root is developed in many diverging senses already in the Qur'ān, "commanding", "judging", "making so as to be fixed", "informing", "substituting", "discharging (obligation)" etc.; cf. al-Iṣfahānī, *Mufradāt*, p. 416, and *Lisān*, xx. 47 sqq. Technically it indicates a) the office and functioning of a judge (*qāḍī*); b) the discharging of a previously neglected religious obligation, e. g. of the daily worship or of fasting in Ramaḍān; thus opposed to *ādā'*, the performance of the duty at the appointed time (Juynboll, *Handb. des islām. Gesetzes*, p. 68, note); Lane, *Lexicon*, p. 38b); c) the eternal, universal decision of Allāh as to all existent things as they are continuously, very nearly the "eternal decree" of Calvinism. The point in doubt in the last use is the relation of the term to *qadar* (*qadr*), "measuring or estimating an amount", "assigning something by measure"; to *ināya*, "providence"; and to the will (*irāda*) and knowledge (*ilm*) of Allāh; further whether *kaḍā'* is one of the "essential qualities" (*al-ṣifāt al-dhātīya*) of Allāh or of His "qualities of action" (*aṣ-ṣifāt al-f'liya*); is eternal (*qadīm*) or originated (*ḥādīth*). For orthodox Ash'arites *kaḍā'* is the will of Allāh (al-Baidāwī on Qur. ii. 111) and its eternal connection (*ta'alluq*), while *qadar* is His bringing things into existence in accordance with His will. Or it is His eternal knowledge and its connection with the thing known, while *qadar* is His bringing the thing into existence in accordance with His knowledge. *Kaḍā'*, therefore, is eternal as one of the eternal qualities and *qadar* is originated because one of the "connections" of Allāh's quality of power. But others taught that *kaḍā'* is the bringing forth (*ibrāz*) of transitory things (*al-kā'ināt*) in accordance with the knowledge of Allāh, while *qadar* is the eternal defining of each thing with what of good and bad, advantage and disadvantage, it is to have when it exists. *Kaḍā'*, then, is originated and *qadar* is eternal. Further, *kaḍā'*, if it equals Allāh's will or knowledge, is one of the essential qualities, but if it is this "bringing forth" it is only one of the connections of Allāh's power, and these, according to the Ash'arites, are originated. But the Māturidites called these "active qualities" and held that they were eternal because they were names for the Māturidite quality *takwīn* (making to become) which the Ash'arites did not admit as a quality (al-Faḍālī with comment, of al-Baidjūrī, Cairo 1315, pp. 55, 61; al-Nasafī's *'Akā'id* with comm. of al-Taftāzānī etc., Cairo, 1321, p. 95). But the overwhelmingly accepted position makes *kaḍā'* the universal, general and eternal decree and *qadar* the individual development or application of that in time. A phrase quoted in the *Ṣiḥāḥ* under QDR is significant, *Mā yuḥaddiruhu 'Ilāh min al-kaḍā'*, "That which Allāh measures out of *kaḍā'*". Al-Rāzi on Qur. xxxiii. 37, 38 (*Mafātiḥ*, Cairo 1308, vi. 527) even applies the distinction to the problem of evil and of human responsibility. That which is by *qadar* comes in incidentally, almost accidentally, and the disadvantages (*qarar*) of the world are through it, while the good (*khair*) is by *kaḍā'*. Man was created by Allāh subject to lust and anger in order that, striving against these under the guidance of reason and religion, he might be rewarded. That leads in some to sin, but Allāh did

not produce this consequential sin in them by intention, although it was by His *ḥadar*. Again, that which is by *kaḍā'* being universal is always perfectly intelligible — we see it happening all the time; but some of weak understanding may ask the reason for a thing which is by *ḥadar*. Yet it must not be thought that these latter things are necessary consequences following of themselves according to the Mu'tazilite doctrine of *tawlid* or the philosophical teaching that there is a fateure in things (*ṭab'*). Everything is by the choice (*ikhtiyār*) of Allāh and He admits only a certain custom (*'āda*) in things. Among philosophers the tendency is to equate *kaḍā'* with Allāh's knowledge or with His eternal providence (*'ināya*) or even to say that it is an expression for the existence of all existent things, taken as a whole, in the world of reason, while *ḥadar* is their external existence, separated, one after another (*Dict. of Techn. Terms*, p. 1234 sq.).

Bibliography: has been given in the article.

(D. B. MACDONALD.)

KAḌĀ' (A.). In the terminology of Turkish administration *kaḍā'* (*kaḍā*) denotes a district governed by a *ka'immaḥkām* [q. v.].

KAḌAM SHARĪF (KAḌAM RASŪL ALLĀH). Among the miracles (*mu'jizāt*) popularly attributed to Muḥammad was the fact that when he trod on a rock, his foot sank into the stone and left its impress there. (This miracle is usually referred to along with others e. g. that he cast no shadow, that if one of his hairs fell in the fire, it was not burnt, that flies did not settle on his clothes etc. (v. al-Ḥalabī, *al-Sira al-Ḥalabiya*, Būlāk, 1292, III, 407), or that his sandals left no imprint on the sand (v. Ibn Ḥajjar al-Haitamī, commentary on al-Buṣīrī's *al-Kaṣida al-Hamziya*, I. 176. (Ind. Off. MS., Loth, n^o 826, fol. 94). No early authority refers to such a miracle, nor can any *ḥadīth* be quoted in corroboration of it, as Djalāl al-Dīn al-Suyūṭī himself pointed out (v. al-Ḥalabī, *op. cit.*, i. 497). But sufficient evidence of this miracle is considered to be provided by the numerous impressions of one or both of the feet of the Prophet, which are venerated in different parts of the Muslim world. The most famous of these footprints is that in the Masjid al-Aḳṣā, at Jerusalem, on the rock from which Muḥammad mounted Burāk for his journey to heaven (Shams al-Dīn al-Suyūṭī, *Ithāf al-Akhiṣṣā fī Faḍā'il al-Masjid al-aḳṣā*, *Journ. Roy. As. Soc.*, xix., NS. (1887), p. 258-9). In a mosque near the southern gate of Damascus, on the road to Hawrān, is shown the imprint of the foot of the Prophet, when he half-alighted from his camel, but was warned by the angel Gabriel that God had given him the choice between the Paradise of this world and that of the next; whereupon he relinquished his intention of entering the city (W. G. Palgrave, *Journey through Central and Eastern Arabia*, London, 1865, ii. 19). In Cairo there are two footprints, one in a mosque called *Āthār al-nabī* (*Rev. des Trad. Pop.*, ix. 689), the other at the tomb of Kā'it Bey [q. v.] (Baedeker's *Egypt*, 1914, p. 113), who, according to Aḥmad Dahlān [q. v.], purchased it for the sum of 20,000 dinars; in Tanṭa, there are impressions of both the feet of the Prophet, in the shrine of Saiyid Aḥmad al-Badawī (*Rev. des Trad. Pop.*, xxii. 410); as, also, at Constantinople, in the mosque where Sultān 'Abd al-Ḥamid I is buried

(*ibid.*, ix. 473); cf. also CONSTANTINOPLE, i. 871b.

But it is in India that this veneration for the footprints of the Prophet appears to have attained its fullest extension, and such slabs of stone are found all over the country, — sometimes venerated in buildings specially erected for their reception, as the Kaḍam Rasūl Mosque at Gawr, or kept with other relics, as in the Djamī' Masjid, Dihli, or left disregarded in a corner of a cemetery, as in that of Shāh Djamāl, near 'Aligarh, or preserved in the house of some private person. Usually, there is the imprint of one foot only, but in the Kaḍam Rasūl building at Balasor (in Orissa), the stone bears the marks of both feet, as well as those of 'Alī. (Abdus Salam, *The Kaḍam Rasul Building at Balasore* in *Journ. As. Soc. Beng.*, iv. [1908], 31-2.) One of the most highly venerated of these footprints is that placed over the tomb of Faṭh Khān, the son of Firūz Shāh Tughlāk [q. v.]; this monarch had associated his son with him in the government as early as 760 H., and the death of Faṭh Khān in 776 H. was a cause of great grief to his father, who erected a stately tomb over his grave, with a mosque and a madrasa attached. The footprint is said to have been brought from Madīna by the great saint of the Cishṭī order, Saiyid Djalāl al-Dīn Bukhārī, known as Makhdūm-i-Djahāniyān; it is kept immersed in water, which is believed to possess healing power; a religious fair is held here every year, on the 12th of Rabī' al-awwal, the anniversary of the death of the Prophet (Saiyid Aḥmad Khān, *Description des Monuments de Delhi*, *Journ. As.*, 1860, p. 411-2). At Uḥh, which has a rich collection of relics of the Prophet, there is a footprint in the shrine of Bandagī Muḥammad Ghawṭh (ob. 923 H.), a descendant of 'Abd al-Kādir Dīlī (*Gazetteer of the Bahawalpur State*, Lahore, 1908, p. 166).

The slab of stone with the footprint of the Prophet, preserved in the Kaḍam Rasūl Mosque at Gawr [q. v.] is said to have been brought from Madīna by 'Alā' al-Dīn Ḥusain Shāh, king of Bengal 1494-1521; the fine mosque in which it rests was built by his son and successor, Nuṣrat Shāh, in 1530 (J. H. Ravenshaw, *Gaur*, London, 1878, p. 20). About fifty years later, Mīr Abū Turāb, who had been appointed by Akbar leader of the pilgrims' caravan, brought back from Mecca, in 1579, a stone bearing the imprint of the right foot of the Prophet; that brought by Makhdūm-i-Djahāniyān to Sultān Firūz Shāh is said to have represented the left foot. Akbar himself went out several miles from Agra to receive the holy relic, and carried it on his shoulder for about a hundred paces, his example being afterwards followed by his nobles and courtiers, who escorted the stone with great pomp and ceremony to the city. In the following year, when Mīr Abū Turāb was returning to his home in Guḍjarāt he received permission from Akbar to take the footprint with him; he erected a building in Asāwal, near Aḥmadābād, as a shrine for this slab and for some hairs of the Prophet, which he had also brought from Mecca with him; after his death the footprint was placed over his tomb, which is still standing to the south of the city of Aḥmadābād, but the footprint is no longer there, having been removed (it is said) to Khambāy (Mīr Abū Turāb Valī, *History of Gujarat*, Calcutta, 1909, pp. 97-9). The footprint on the

grave of Saiyid Muḥammad Maḳbūl 'Ālam, who is buried in the precincts of the shrine of his ancestor, Saiyid Muḥammad Shāh 'Ālam, at Baḡuwa, to the south of Aḥmadābād, is said to be a copy made from the stone in the Djamī Masḡid at Dihli (J. Burgess, *The Muhammadan Architecture of Ahmadabad*, London, 1905, ii. 20, 50). Similar copies on stone or on paper are sometimes found in the houses of private persons (G. A. Herklots, *Qanoon-e-Islam*, Madras, 1863, p. 153).

Closely connected with the veneration of the footprints of Muḥammad, is that paid to representations of his sandals. Copies of these are hung up in the houses of the pious, as a protection against the assaults of Satan, the evil eye, the depredations of robbers, etc.; they are also said to relieve the pangs of childbirth (al-Ḳaṣṭalānī, *al-Mawāhib al-laduniya*, Cairo, 1281 H., i. 337). Such representations are common in Algeria, Egypt, India and Syria.

Literaturzeit.*, 1913, p. 115—8.

(T. W. ARNOLD.)

ḲADAR. The contradictory statements of the Ḳur'ān on free will and predestination show that Muḥammad was an opportunist preacher and politician and not a systematic theologian. It has been demonstrated (Grimme, *Einleitung in den Koran*, vol. ii.) that his predestinarian position steadily hardened towards the close of his life, and the earliest conscious Muslim attitude on the subject seems to have been of an uncompromising fatalism. *ḲDR* was the root used most generally to express it (see, too, ḲADĀ' and appears to mean primarily "to measure, estimate" and then "to assign specifically by measure" as though Allāh "measured out" his decrees. On the early opposition to this, which showed itself apparently before A. D. 700 and under Christian influences, see ḲADARĪYA. In the course of the conflict two extreme views and two mediating views developed, the mediating views becoming those possible in orthodox Islām. All could appeal to Ḳur'ānic texts and to traditions. The traditions are, of course, in great part shadows thrown back from the later controversies. They may be found in al-Bukhārī, *Kitāb al-Ḳadar* and also in part of the *Kitāb al-Ṭibb*; see, too, al-Ash'arī, *Kitāb al-Ībāna*, Haidarābād, p. 84 sqq. (*Bāb al-Riwāyāt fi l-Ḳadar*). The Djabriya [q. v.] were absolute predestinarians; man had no part at all in the actions which apparently proceeded from him. This became an heretical position in Islām. The other extreme, that man produced his own actions, was that of the Ḳadarites who eventually merged in the Mu'tazilites. At first they did not venture to

use the word "create" (*khalk*) — Allāh alone was *khāliq* — of this producing, but employed supposedly safer terms, such as *idjād*, *ikhtirā'*, but eventually they came to speak of man "creating" his actions. The intermediate, orthodox, parties were the Ash'arites and the Māturidites. Of these the Ash'arites had thought out their position most logically, while the Māturidites stated simply the evident facts in the case. The basis of the upholders of free will seems to have been ethical; the justice (*adl*) of Allāh requires man's freedom. But orthodox Islām in general cared little for that, although some, as al-Taftāzānī and al-Rāzī, spend dialectic on the point. It maintained the Pauline parallel of the potter and the vessels; Allāh could do what he pleased with his own. The orthodox difficulty was rather man's consciousness of freedom. This the Māturidites met by admitting that man did possess "free choice actions" (*af'al ikhtiyārīya*) for which he is rewarded or punished" (al-Nasafi, *Aḳā'id*, ed. with comment. of al-Taftāzānī, Cairo 1321, p. 97). Man knows the difference between a voluntary grasping and an involuntary trembling, but the contradiction of this with the absoluteness of Allāh's creative power is left unsolved. Al-Ash'arī introduced the idea of *ikhtisāb* [see KASB] "accepting for one's self": man accepts for himself the action of Allāh and this accepting is man's consciousness of free will. Apparently al-Ash'arī meant that this consciousness was only another part of Allāh's creative action. Man is still an automaton although part of his machinery is that he believes himself free. Between the two wide scope was left even in orthodox Islām for discussion. The ultimate, scholastic, Ash'arite statement, denying that man possesses any action at all — which must not, however, be taken for the only possible one in Islām — will be conveniently found in al-Faḡālī's, *Kifāyat al-'Awāmm* with al-Baidjūrī's commentary, and in Luciani, *Prolégomènes théologiques de Senoussi*. This attitude struck so deep that even al-Ḡhazālī, and that even at the end of the wonderful psychological analysis of the book of the *Iḥyā'* on "the marvels of the heart", could quote with approval the tradition: "These to Heaven and I care not, and these to Hell and I care not" (ed. with comm. of al-Sayyid al-Murtaḍā, vii. 308); (cf. Macdonald, *Religious Attitude in Islam*, p. 301). For *ḡadar* among mystics see art. 'ABD AL-RAZZĀḲ above.

ḲADARĪYA is given regularly as a descriptive or surname (*laḡab*) of the Mu'tazila, but it points back to a pre-Mu'tazilite time when the Muslims were beginning to ask theological questions and

disinclination to fill the office of judge. Traditions were put into currency in which the Prophet was made to utter grave warnings against accepting the position of kādī. Pious fakīh's e. g. Abū Ḥanīfa [q. v.] declined to fill the office of judge.

For many centuries past no Muslim judge has any longer come up to the original theoretical requirements of the law; therefore any existing kādī is regarded by Muslim scholars only as *kādī 'l-ḡarūra*, i. e. as an emergency kādī, to whom one must go, in default of a better.

On the history of the office of kādī and of the kādī's see: R. J. H. Gottheil, *The Cadi, the History of this Institution in Revue des Études ethnographiques et sociologiques*, i. (1908), p. 385—393; *The History of the Egyptian Cadi as compiled by Abu Omar Muhammed al-Kindi*, ed. by R. J. H. Gottheil, New York 1908 (with an introduction); cf. *The Governors and Judges of Egypt of al-Kindi*, ed. by R. Guest (Gibb Mem. xix.), 1912; and also the important remarks on the office of kādī in Cordova by Ribera in the introduction to his edition of al-Khushanī, *Kitāb al-Kuḍāt bi-Kurtuba* (*Hist. de los Jueces de Córdoba por Aljoxani*, Madrid 1914; cf. Hādījī Khalifa, ii. 141, n^o. 2279).

The Prophet and the early Caliphs often decided disputes in person as judges, as did their governors and prefects in the various provinces. Justice was always administered in Muslim lands to a great extent by local authorities, notably the police officials. This was sometimes called *Naẓar fi 'l-Maẓālim* (al-Māwardī, ed. Enger, p. 128 sqq.; H. F. Amedroz, *The Maẓālim Jurisdiction in the Ahkam Sultaniyya of Mawardi*, *Journ. Roy. As. Soc.*, 1911, p. 635 sqq.; de Sacy, *Chrest. Arabe*², i. 132 sqq.).

Moreover 'Umar and 'Uthmān and their successors had appointed special officers as judges (*kādī*). These kādī's, who always belonged to the *fakīh* class, never obtained an independent position in Islām. They were often dismissed — soon after their appointment — and always remained subject to the caprice of the ruler. Cf. for example *Autobiographie d'Ibn Khaldoun*, transl. M. de Slane, Paris 1844, p. 103—110 (*Journ. Asiat.*, 4th Ser., iii. 328 sqq.).

The kādī's had not only to decide cases but they had also to administer pious foundations (*wakf*'s) and the estates of orphans, imbeciles and other persons. They had often to draw up contracts of marriage for women without male relations, etc. The chief kādī in the capital was one of the high officials (al-Makrīzī, *al-Khiṭat*, Bulāk 1270, i. 403). In eastern countries he was called *kādī 'l-kuḍāt*, in the western *kādī 'l-djamā'a* (Dozy, *Suppl. aux Dict. Arab.*, ii. 363b). In later times the *kādī 'l-askar* was also a high official (cf. al-Kalkashandī, *Subḥ al-A'shā*, iv. 36; *Autobiogr. d'Ibn Khaldoun*, p. 102, *Journ. As.*, 4th Ser., iii. 327; J. v. Hammer, *Des Osmanischen Reichs Staatsverfassung*, ii. 378 sqq.). Some kādī's were military leaders.

In the large cities, where numerous adherents of the different *fiqh* schools lived together, a kādī was appointed, if necessary, for each *madhhab*. For example, there were in later times four kādīs in Cairo. (Quatremère, *Hist. d. sultans mamlouks*, i. 1, p. 98, Note; *Autobiogr. d'Ibn Khaldoun*, loc. cit.).

(Th. W. JUYNBOLL.)

AL-KĀDĪ AL-FĀDIL, ABŪ 'ALĪ 'ABD AL-RAḤĪM B. 'ALĪ B. MUḤAMMED B. AL-ḤASAN AL-LAKHMĪ AL-BAISĀNĪ AL-'ASKALĀNĪ, MUḤYĪ (MUḌJIR) AL-DĪN, Saladin's celebrated vizier, was born on 15 Djumādā ii. 529 (3 April 1135) at Asḳalān [q. v.] where his father, a native of Baisān, called al-Kāḍī al-Ashraf, filled the office of judge. In 543/4 (1148—9) his father placed him in the *Diwān al-Inshā'* in Cairo as a learner. By 548 (1153) he had entered the service of Ibn Hādīd, kādī of Alexandria, as secretary. As his elegant reports from there attracted attention to him in Cairo, he was summoned thither as superintendent of the *Diwān al-Djaish* by al-'Ādil Ruzzīk b. al-Ṣāliḥ Ṭalā'ī, the last representative of the vizier-family of the Banū Ruzzīk. When the latter soon afterwards was overthrown by Shāwar, prefect of Kūs, al-Kāḍī al-Fāḍil became secretary to Shāwar's son Kāmil and after Shāwar's murder to Shirkūh, his successor in the office of vizier. In 563 (1167—8) he became deputy for Ibn al-Khallāl, chief of the *Diwān al-Inshā'*, under whom he had begun his official career and on the latter's death on 23 Djumādā ii. 566 (March 4, 1171) was appointed his successor, Saladin having in the meanwhile taken over the vizierate. When in the next year, on the death of the last Fāṭimid, Saladin himself assumed the rule in Egypt, al-Kāḍī al-Fāḍil became his right hand man in carrying through the reforms necessary in the army and taxation. He then accompanied the Sultān on his campaigns in Syria. He was in Egypt from 585 to 586 (1189—90) to control the financial administration and re-equip the army and navy. He then returned to Syria and remained with Saladin till the latter's death on 27 Ṣafar 589 (March 1193). When al-

Malik al-Afdal, who had taken over the government in Damascus, very soon jeopardised his authority by stupid measures, al-Ķāḍī al-Fāḍil went to Egypt to al-Malik al-ʿAzīz. War soon afterwards broke out between the two brothers, but in 591 (1195) peace was made through the mediation of al-Ķāḍī al-Fāḍil. He thereupon retired into private life. He died suddenly on 6 or 7 Rabiʿ ii 596 (26 or 27 Jan. 1200). Of the numerous state documents which al-Ķāḍī al-Fāḍil composed during his activity in the *Diwān al-Inṣhāʾ*, many examples are preserved in MSS. and in Abū Shāma. Helbig gives a complete list (p. 67—75). In addition there is his correspondence with Usāma b. Muḩkiḩ concerning the latter's *Kitāb al-ʿAṣā* from the *Khariḍa* of ʿImād al-Dīn in H. Derenbourg, *Nouv. Mcl. Orient.*, p. 147—52; *Vie d'Ousāma*, French transl., p. 383—392. During his official career he also edited an official journal, *Mutaḍjaddidāt*, of which al-Maḩrizī gives many specimens in the *Khitaṭ*. These are not only notes on official letters and the answers to them but reports also on important happenings in the kingdom or on gifts of honour granted by the Sultān.

AL-ĶĀḌĪ AL-HARAWĪ. [See AL-ʿABBĀDĪ.]

ĶĀḌĪ KHĀN FAKHR AL-DĪN, AL-ḩASAN B. MAṢṢŪR AL-UḌḩANDĪ AL-FARḩĀNĪ, was a ḩana fī Muṭī and scholar who composed a large number of esteemed juristic works and commentaries on ḩana fī works. In particular his collection of legal decisions (*Fatāwī Ḷāḍī Khān*, in 4 vols. lith. Calcutta 1835; with the subsidiary title *al-Fatāwī al-Sirāḩiyya*, lith. Lucknow 1293—5; pr. Cairo 1282) has become widely known on account of its convenience. He died in Ramaḩān 592 (1196).

ĶADĪM. [See QĪDAM.]

AL-ĶĀDIR, the Mighty, one of the most beautiful names of Allāḩ; cf. Aḩmad b. al-ḩusain al-Baiḩaḩī, *al-Asmāʾ wal-Ṣifāt*, Allāḩahāḩ 1313, S. 15; Redhouse, *The Most Comely Names*, *Journ. Roy. As. Soc.*, 1880, S. 49.

AL-ĶĀDIR BIʿLLĀH, ABU ʿL-ʿABBĀS AḩMAD B. IṢḩĀḶ, ʿAbbāsīd Caliph. After the deposition of al-Ṭāʿī, his cousin Abu ʿL-ʿAbbās Aḩmad was proclaimed Caliph in Ramaḩān 381 (Nov. 991) with the name al-Ķādir. The latter was a grandson of al-Muḩtadir; his mother was a slave. During his long reign he was entirely under the influence of the amīrs ruling in Bagḩdād and only once did

he give evidence of having a mind of his own. This was when the Būyīd Bahāʾ al-Dawla [q. v.] wished to replace the Sunnī chief ḩāḩī by a Shīʿī but his plan was frustrated by the opposition of al-Ķādir, whereupon the Shīʿīs were given a superior of their own under the title *naḩīb* “intendant”. For the rest, all heretics, notably the Muʿtazilites, were treated with the greatest severity. In this period arose the dynasties of the Marwānīds, the ʿUḩailīds and the Mirdāsīds, and the Ghaznawīd kingdom attained its greatest prosperity, while the internal disruption under the Būyīds increased, and the ḩamdānīds and Sāmānīds, which latter had long been a bulwark against the Turks, collapsed. Al-Ķādir died in ḩhu ʿl-ḩiḩḩiḩa 422 (Nov.-Dec. 1031) at the age of over 80. He is also mentioned as the author of some theological treatises.

Derenbourg), p. 391 sq.; Ibn Ḷhaldūn, *al-ʿIbar*, iii. 436 sqq.; ḩamdullāḩ Mustawfī-ī Ḷazwīnī, *Tarīḩḩi Ḷuzīda* (ed. Browne), i. 351—353; Weil, *Gesch. d. Chalifen*, iii. 44—73; v. Krenmer, *Gesch. d. herrschenden Ideen des Islams*, S. 127 sq.; Goldziher, *Muh. Stud.*, ii. 65 sq. (K. V. ZETTERSTĒN.)

ĶĀDIRIYA, Order (*ṭarīḩa*) of dervishes called after ʿAbd al-Ķādir al-Dīlānī [q. v.].

1. Origin. ʿAbd al-Ķādir (ob. 561 = 1166) was the principal of a school (*madrasa*) of ḩanbalite Law and a *ribāṭ* in Bagḩdād. His sermons (collected in *al-Faṭḩ al-Rabbānī*) were delivered sometimes in the one, sometimes in the other; both were notable institutions in the time of Ibn al-Aṭḩir, and Yāḩūt (*Irṣḩād al-Arib*, v. 274) records a bequest of books made to the former by a man who died in 572 (1176—7). Both appear to have come to an end at the sack of Bagḩdād in 656 (1258), till when it is probable that their headship remained in the family of ʿAbd al-Ķādir, which was numerous and distinguished. In the *Bahḩjat al-Asrār*, where an accurate account of his descendants is given (pp. 113—117), it is stated that ʿAbd al-Ķādir was succeeded in the *madrasa* by his son ʿAbd al-Waḩḩāb (552—593 = 1157—1196), who was followed by his son ʿAbd al-Salām (ob. 611 = 1214). Another son, ʿAbd al-RazzāḶ (528—603 = 1134—1206—7), was a notable ascetic. Several members of the family perished during the sack of Bagḩdād, when it would appear that both these institutions came to an end.

A *ribāṭ* was at this time distinguished from a *ṣāwīya*, the former being a *coenobium*, the latter a place where an ascetic lived in solitude (al-Suḩrawardī, *ʿAwārif al-Māʿarif*, margin of the *Iḩyāʾ*, Cairo 1306, i. 217). In the time of Ibn Baṭṭūṭa *ṣāwīya* had come to be used in the former sense also, and his description of the religious exercises practised at the *ṣāwīya* (i. 71) would probably suit what went on at ʿAbd al-Ķādir's *ribāṭ*. The body of rules and doctrines which had his authority was sufficient to constitute a system (*madḩḩab*; *Bahḩja*, p. 101), and by accepting the *ḩīrḩa* from the *ṣaīḩḩ* the *murīd* signified that he subordinated his will to that of the former (al-Suḩrawardī, i. 192). A long list is given in the *Bahḩja* of men who attained various degrees of distinction who had received the *ḩīrḩa* from ʿAbd al-Ķādir, two of them at the age of seven and one at the age of one. These persons were said to “ascribe themselves” (*intasaba* or *intamā* or even *tasammā*) to

‘Abd al-Ḳādir, and could bestow the *khirka* on others as from him; in doing so they would stipulate that the *murīd* was to regard ‘Abd al-Ḳādir as his *shāikh* and director after the Prophet. In a tradition which is likely to be apocryphal (*Bahdja*, p. 101), dated 592 (1196), ‘Abd al-Ḳādir declared that assumption of his *khirka* was not absolutely necessary for entry into his Order; personal attachment to himself was sufficient. It would appear that during his lifetime several persons carried on propaganda in favour of his system; one ‘Alī b. al-Ḥaddād obtained proselytes in Yemen, and one Muḥammad al-Baṭā’ihī, resident in Baalbek, did likewise in Syria; one Taḳī al-Dīn Muḥammad al-Yūnīnī, also of Baalbek, was another propagandist, and one Muḥammad b. ‘Abd al-Ṣamad in Egypt “ascribed himself to ‘Abd al-Ḳādir and in treading the Path relied on him after God and His Apostle” (*Bahdja*, pp. 109, 110). Since all who ascribed themselves to him were promised Paradise, the Order is likely to have been popular; and even in recent times missionaries in Africa appear to have little difficulty in obtaining fresh adherents to it (cf. O. Lenz, *Timbuktu*, ii. 33).

That ‘Abd al-Ḳādir’s sons had some share in spreading it is likely, though Ibn Taimiya (ob. 728 = 1328) mentions that he had associated with one of his descendants who was an ordinary Muslim and not a member of it, and so did not agree with those who held fanatical views about him (*Bughyat al-Murtād*, p. 124). The *Bahdja* however does not bear out Le Chatelier’s assertion (*Confréries Musulmanes du Hedjaz*, p. 35) that in ‘Abd al-Ḳādir’s life-time some of his sons had been preaching his doctrine in Morocco, Egypt, Arabia, Turkestan and India. It says much of ‘Abd al-Razzāk, but nothing of the “mosque now in ruins, whose seven gilded domes have often served as the subject of description by Arabic historians”, which this son is supposed to have built. Indeed this mosque appears to be later than Ḥamd Allāh Mustawfī (740 = 1339-40), the first author later than the *Bahdja*, who mentions ‘Abd al-Ḳādir’s tomb (*Nuṣṣat al-Kulūb*, transl. Le Strange, p. 42). Nor does it confirm the statement that this ‘Abd al-Razzāk introduced the use of music in the ritual, and indeed the employment of this was earlier than ‘Abd al-Ḳādir’s time, and is discussed by al-Suhrawardī (ii. 116) without allusion to ‘Abd al-Razzāk. E. Mercier (*Histoire de l’Afrique Septentrionale*, iii. 14) asserts that the Order of Ḳādiriya existed in Berbery in the xiith century A.D., and was closely connected with the Fāṭimides (whose rule terminated 567 = 1171), but he gives no authority for these statements.

Al-Suhrawardī holds that the exercises of each *murīd* should be determined by his *shāikh* in accordance with his individual needs, whence it is unlikely that ‘Abd al-Ḳādir instituted any rigid system of *dhiḳr*, *wird* and *ḥisb*, and indeed those in use among different Ḳādiri communities differ (Rinn, *Marabouts et Khouan*, p. 183 *sqq.*). The initiation ceremonies given on Turkish authority by J. P. Brown (*The Dervishes*, p. 98) are quite different from those furnished by Rinn on North African authority. In one of these latter there is a tendency to set ‘Alī above Muḥammad and to insist on the importance of Ḥasan and Ḥusain, which cannot well represent the views of the Hanbalite ‘Abd al-Ḳādir. The *wird* of ‘Abd al-Ḳādir in *al-Fuyūḍāt al-Rabbāniya* is given on the

authority of one ‘Abd Allāh b. Muḥammad al-‘Adjāmī, who lived 185 years (536—731), and may be regarded as mythical.

2. Development. Ḳādirism seems from an early period to have developed on different lines according as ‘Abd al-Ḳādir was regarded as the founder of a system involving rites and practices, or as a worker of miracles. In the latter direction it meant the deification of ‘Abd al-Ḳādir, the extremists holding that he was Lord of Creation after God, absolutely, whereas the more moderate supposed that he was so only in his own age (*Bughyat al-Murtād*, l. c.). The latter was the view of Ibn ‘Arabī, who takes him as an example of a *khalīfa* who showed himself and practised sovereignty (*taṣarruf*; *al-Fuṭūḥāt al-Makkiya*, ii. 407); such a *khalīfa* in his system is independent of the revelation to Muḥammad (*Fuṣūṣ al-Ḥikam*, § 16). But there was also a theory that ‘Abd al-Ḳādir practised in his grave all the activities (*taṣarruf*) of the living (Ibn al-Wardī [ob. 749], *Ta’rikh*, ii. 70); and Ibn Taimiya (*al-Djawāb al-Ṣāḥih*, i. 323) mentions him among saints who in his time still appeared to people, being in reality impersonated by demons. In the initiation ceremonies recorded by J. P. Brown, l. c., the candidate for admission to the Order sees ‘Abd al-Ḳādir in dreams; in one case so often and so clearly that without having seen ‘Abd al-Ḳādir’s portrait he could recognize him among a thousand. The form of Ḳādirism which means the worship of ‘Abd al-Ḳādir seems to prevail in North Africa, where it is called *Djilālism* (for *Djilānism*), and whole communities are called *Djilāla*. Their system has been described as the application of Sūfī mysticism to beliefs that are certainly pre-Islamic, and the materialization of that mysticism under the form of a cult of hidden subterranean powers (E. Michaux-Bellaire in *Archives Marocaines*, xx. 235). Here the word *khalwa* is used for a heap of stones where women attach rags to reeds planted between the stones and where they burn benzoin and styrax in postsherds (*ibid.*, xvii. 60). Such *khalwa*’s are to be found in all the Arab villages. Similarly “in the province of Oran on all the roads and on the summits of the chief mountains *qubbah* are to be found in the name of ‘Abd al-Ḳādir Jilālī” (E. de Neveu, *Ordres Religieux chez les Musulmans d’Algérie*, p. 30). The society of the Genawah or Negroes of Guinea has placed itself entirely under the protection of Mawlay ‘Abd al-Ḳādir with all his array of male and female demons; wherein M. Michaux-Bellaire finds traces of the powers which, according to the Qur’ān (and even earlier authorities) belonged to Solomon. The cult of ‘Abd al-Ḳādir is most ardently practised by the women in the *Khloṭ* and *Tlik*, who come to the *khalwa* for every sort of object, and to satisfy their loves and hates in all the acts of their existence. The men on the other hand chiefly go to the *khalwa* when they are ill (*Arch. Maroc.*, vi. 329).

That this development is inconsistent with Islamic orthodoxy is evident, and it is attacked by such authorities as Ibn Taimiya and Ibrāhīm al-Shāṭibī (*I’tisām*, i. 348 *sqq.*). The system to which the name Ḳādiriya is more ordinarily applied differs from other orders mainly in ritual, although, through circumstances connected with its origin, “it has not that homogeneity of statutes which is to be found in other congregations, which seem to form small exclusive churches outside which

there is no salvation" (Rinn, p. 186). Though the founder was a Hanbalite, membership is by no means confined to that school, and the Order is theoretically both tolerant and charitable.

3. Geographical Distribution. Since historical and geographical works rarely distinguish between the different *ṭuruḥ* in their accounts of religious buildings, little can be said with certainty of the date at which the first Kādiri *zāwiya* or *khānqāh* was established in any country save 'Irāk. The Order is said to have been introduced into Fez by the posterity of two of 'Abd al-Kādir's sons, Ibrāhīm (ob. 592 = 1196 in Wāsit) and 'Abd al-'Aziz (who died in Djiyāl, a village of Sindjar); they had migrated to Spain and shortly before the fall of Granada (897 = 1492) their descendants fled to Morocco. The full genealogy of the Shurafa' Djlāla of Fez is given in *Arch. Maroc.*, iii. 106—114, on the authority of *al-Durr al-Sanī* of Ibn al-Tayyib al-Kādiri (1090 = 1679), who claims to have used a series of authentic documents. The *khālwa* of 'Abd al-Kādir in Fez is mentioned as early as 1104 = 1692/3 (*ibid.*, xi. 319). The order was introduced into Asia Minor and Constantinople by Ismā'il Rūmī, founder of the *khānqāh* known as the Kādirīkhānah at the Top-khānah. This personage (ob. 1041 = 1631), who is called *Pir khānī*, "Second Shaikh", is said to have founded some 40 *tekiye's* in these regions (*Qāmūs al-A'lām*). A Kādiri *ribā'ī* in Meccah is mentioned by Šāliḥ b. Mahdī in *al-'Alam al-Shāmikh*, p. 381, about 1180 (1669/70), but the assertion that a branch was established there during the lifetime of 'Abd al-Kādir (Le Chatelier, *o. c.*, p. 44) is not improbable, since Meccah has a natural attraction for the Šūfis. In the *A'in-i Akbari* (about 1600; transl. Jarrett, iii. 357) the Kādiriya Order is mentioned as one that is highly respected but is not included among those recognized in India; nor does there appear to be any allusion to it in the list of Indian Šūfis in the *Ma'āthir-i Kirām* (1752), though some other Orders are noticed, and 'Abd al-Kādir himself is mentioned. Yet see Khāfi Khān, *Muntakhab al-Lubāb*, ii. 604 and art. INDIA, p. 489.

Some statistics (to be received with caution) of the Kādiris and their *zāwiya's* are given by Depont et Coppolani (*Confréries Religieuses Musulmanes*, pp. 301—318). Much of its development is admittedly recent, and may be due to the fame won by the namesake of 'Abd al-Kādir who for so many years resisted the French occupation of North Africa [see i. 43 sq.]. It is doubtless represented in all Islamic countries, though it would appear that certain derived *ṭuruḥ* enjoy greater popularity in many places. Thus the Kādirism of Touba in Guinea, which has become a distinct sign whereby the Diakanke tribe can be recognized, is derived through the Sidia from the Kādirism of the Kounta of Timbuctu (P. Marty in *Revue du Monde Musulman*, xxxvi. 183). These Kounta however form a *filiale* of the Kādiriya, and some of them prefer to call themselves *Shādhiliya* (*ibid.*, xxxi. 414).

4. Organization. The Kādiri community acknowledges nominal allegiance to the keeper of 'Abd al-Kādir's tomb in Baghdad, and the deeds of investiture published by Rinn, p. 179, and in the *Revue du Monde Musulman*, ii. 513 and ix. 290, are from this source. It would seem however that the actual authority of this per-

sonage is chiefly recognized in Mesopotamia and India. The latter periodically send gifts which form the main source of the revenues of his establishment; the members of this family find it worth while to learn Urdu. The Meccan *zāwiya's* are subject to the *Shaikh al-Ṭuruḥ*, who has the right to nominate their *muḥaddam*. The Egyptian branch is under the control of the Sayyid al-Bakrī, who is also *Shaikh al-Ṭuruḥ*; 'Alī Pasha Mubārak (iii. 129; see also P. Kahle in *Der Islam*, vi. 154) reckons the order as one of the four which go back to a *ḥutb*, but asserts that it has neither *furū'* nor *buyūt*. In Africa, according to Rinn, each *muḥaddam* names his successor; in the event of one dying without having nominated, an election is made by the *ikhwān* at a *ḥaḍra*. The approval of the head of the order in Baghdad is then solicited, and has never been refused. The organization of the Order in North Africa is described somewhat fully by Rinn, Depont et Coppolani, in the works cited. The system appears to be in general congregational, i. e. the *zāwiya's* are independent, and the relation between them and the central institution in Baghdad is very loose. The principle whereby the headship of a *zāwiya* is hereditary is generally recognized.

5. Symbols and Rites. The sign of the Turkish Kādiris is said to be a rose which is green, having been adopted by Ismā'il Rūmī. The candidate for admission to the Order after a year brings an *'araḳiya* or small felt cap, to which if the candidate be accepted the *Shaikh* attaches a rose of 18 sections, with Solomon's Seal in the centre. This cap is called by them *tadji*. The symbolism of this is explained by J. P. Brown, *The Dervishes*, p. 98 sqq. (copied by Wilberforce Clarke, transl. of *Awārif al-Ma'ārif*, p. 159; the Urdu translation *Kashf Asrūr al-Mashāyikh* adds nothing to Brown's information). According to him, they prefer the colour green, though they allow others; in Lane's time the turbans and banners of the Kādiris in Egypt were white; most members of the Order were fishermen, and they in religious processions carried upon poles nets of various colours (*Modern Egyptians*, 1871, i. 306). In India there are festivities in honour of 'Abd al-Kādir on 11 Rabi' II, and pilgrimages are made in many places in Algeria and Morocco to the *zāwiya's* and shrines of the saint (Rinn, p. 177). The *Mawsim* of the Djlāla at Salé is described at length by L. Mercier in *Arch. Maroc.*, viii. 137—139; it commences the seventh day of the *Mulud* (*Mawlid*), i. e. the Feast of the Prophet's Birthday, and lasts four days 17—20 Rabi' I. Sheep and oxen are presented to the descendants of 'Abd al-Kādir. M. Michaux-Bellaire distinguishes in Morocco between the ceremonies of the Kādiriya, who recite the *ḥizb*, and the Djlāla, who recite the *dhiḳr* to the accompaniment of instruments; and again between the Djlāla of the country, whose instruments are the *bender* (a sort of big tambourine without bells) and *'awāda*, and those of the town, whose instruments are the *ṭebila*, *ṭabal* and *ghaiṭa* (*Arch. Maroc.*, vi. 330 and xvii. 60). A description of the *ḥaḍrat al-mallūk*, a performance executed with these last instruments, which leads to ecstasy, is given by him in the first passage cited. He further records some special ceremonies connected with the Awlād Khalifa in the Gharb (*ibid.*, xx. 287). All the Hilālī of the Gharb are Djlāla, and in all the *ḥaḍra's* (services) of the

Djilāla the presence of at least one *Khalīfī* is necessary for the direction of ceremonies, and when no actual *Khalīfī* is present, some one there takes the name in order to perform the priestly duty. The origin of the name *Awlād Khalīfa* is obscure (p. 284); it may be noticed that the *Bahdja* mentions one *Khalīfa* b. *Mūsā* al-Nahrimaliki as having played a leading part in the propagation of 'Abd al-Qādir's system. "The *ḥadra* of the *Djilāla* of the country contains neither the *ḥizb* nor the *dhikr* instituted by the *Shaikh*, but a plain *dhikr* of improvised words in the ceremonial rhythm of the *banādīr* (plur. of *bender*). These improvisations always terminate with the words "Thus spake Mawlay 'Abd al-Qādir" or "O Mawlay 'Abd al-Qādir!" (Michaux-Bellaire, p. 288).

Various collections of rituals supposed to have been recommended by 'Abd al-Qādir have been published in Egypt, Turkey and India. In *al-Fuṣṣat al-Rabbāniya* he who is about to enter upon *khalwa* (retreat) is advised to fast in the day and keep vigil at night. The *khalwa* lasts forty days. "If a figure reveal itself to him saying "I am God", he should say "nay rather thou art in God", and if it be for probation, it will vanish; but if it remain, then it will be a genuine revelation (*tadajjalī*)" (Dihli 1330, p. 60). Reduction of food during the 40 days should be gradual till for the last three fasting is complete. At the end he returns by degrees to his former diet.

Some practices peculiar to the *Djilāla* of Tangier are recorded by G. Salmon (*Arch. Maroc*, ii. 108). Those who make vows to 'Abd al-Qādir are in the habit of depositing in the *sāwiya* white cocks, which are called *muḥarrar* (Sūra iii. 31); they do not kill them, but leave them free to rove about the *sāwiya*, where however they do not long survive; the *Sharīf* who lives hard by takes them for his food. The four daughters of a deceased *Sharīf* continued to live on the revenues of the *sāwiya* and carry away the *muḥarrar* fowls. The *muḥaddam* at this *sāwiya* was the *Sharīf*, who conducted the ceremonies at which the *Qur'ān* is repeated without the *ḥizb* of 'Abd al-Qādir being pronounced, and where dances similar to those of the *Ṣawīs* [q. v.] are performed. Circumcisions are performed at the *sāwiya* on the first day of the *mawlid*. A nightly meeting called *laila* is held on the eve of this day, at which the *ḥizb* of 'Abd al-Qādir is recited. At El-Qsar, where there are also some local practices, all the potters belong to the *Djilāla*, among whom the richer members of the community are to be found (*ibid.*, ii. 163).

The first time that the *Qādirīs* appear to have played a political part was during the French conquest of Algeria, when the chief of the *Qādiriya* Muḥyi 'l-Dīn, having been offered the leadership in the war against the infidel, permitted his son 'Abd al-Qādir to accept it. This person was able to utilize the religious organization of his order in order to establish the sovereignty which the French had accorded him, and when his sovereignty was threatened could fall back on his rank as *muḥaddam* of his order to win fresh recruits (H. Garrot, *Histoire générale de l'Algérie*, Algiers 1910, p. 800, 863 etc.). Since the fall and exile of this personage it would appear that the *Qādirīs* in Africa have lent their support to the French government. "In 1879 when there was a local insurrection in Aurès the *shaikh* of the *Qādiriya* of Menā'a, Si Muḥammad b. 'Abbās, displayed unim-

peachable loyalty [s. art. AWRAS, i. 532a]; and the same order helped the French government to extend their influence in the Sahara at Wargla and El-Wad. Their *Nā'ib*, Si Muḥammad b. Tayyib, fell on the French side at the battle of Charouin, March 2, 1901." (Israel Hamet, *Les Muselmans Français du Nord de l'Afrique*, Paris 1906, p. 276). — In the Ottoman revolution of 1908 it is said that their sympathies were with the revolutionists, but that for fear of being outdone in religious zeal by the rival *Rifā'i* order they joined in Baghdad in the "pogrom" against the Jews (L. Massignon in *Revue du Monde Musulman*, vi. 461).

AL-QĀDISIYA, the name of several places in the 'Irāk and in Mesopotamia:

1. A town in the 'Irāk, on the Eastern bank of the Tigris, 8 miles S. E. of Samarrā. With the latter it seems to have been closely connected in its period of prosperity. We do not know what special part al-Qādisiya played at that time. Perhaps, as Herzfeld, (*op. cit.*, p. 107) suggests, it is really identical with the town of al-Qātūl which Hārūn al-Rashīd or the Caliph al-Mu'tasim began to build before the foundation of Samarrā. Yāqūt and other Arab geographers mention the glassworks of al-Qādisiya. In the middle ages the important Dujail canal left the Tigris opposite the town. The ruins of al-Qādisiya lie in Lat. 34° 5' N., between the two still existing out of the former three Tigris canals, called al-Qātūl; they are a short quarter of an hour distant from the bank of the Tigris. The old name has survived and is now popularly pronounced *Djādisiya* (occasionally corrupted to *Djāsiya* and *Djālisiya*). We owe full accounts of these ruins particularly to Ross and Jones; E. Herzfeld also has recently investigated the ruins. Jones gives a plan of the ruins of the town, which Herzfeld says is entirely correct.

The enclosing walls which measure about 6000 paces form a regular octagon. They are flanked by towers at the corners and defended by 16 bastions at intervals. They were built of bricks which in technique, plan and preservation resemble the castra of Samarrā. According to all criteria, these ruins belong — in Herzfeld's opinion — to the 'Abbāsīd period, not to an older one. Ten minutes from al-Qādisiya, just on the river bank, are also mounds of ruins, called al-Ṣanam. They mark the site of a mediaeval or ancient town, half of which has already been washed by the Tigris. On a remarkable find of statues made here, see Cl. Rich, *Narrative of a Residence in Koordistan*, 1836, ii. 152. Al-Ṣanam perhaps was within the area of al-Qādisiya and is to be regarded as its port.

2. A town in the 'Irāk, SSW. from Kūfa, a station on the pilgrim road from Baghdād to Mecca. According to the itineraries of the Arab geographers, it was 15 Arab (= Roman) miles from Kūfa. Al-Ḳādisiya was situated in the western part of the Ṭaff, that steppe region rising above the Babylonian cultivated country (*al-Rif*) and characterised by springs (e.g. that of al-'Udhaib), which forms the transition to the high plateau of the Arabian desert. This Ṭaff in the Sāsānian period was protected by a series of watch-houses (*maslaḥa's*) and a great wall and ditch (*khandaḳ*) from the raids of Arab tribes. The last village of the Ṭaff, just before entering the desert, was al-'Udhaib, also a station on the Baghdād-Mecca road already mentioned. The distance between it and al-Ḳādisiya, with which it was connected by two walls was 6 (according to another source, 4) Arab miles. On the geographical conception of the Ṭaff cf. Yāqūt, *op. cit.*, iii. 539 and Seybold in the *Orient. Lit. Zeitung*, vi. (1903), col. 241—4. The breadth of the 'Irāk is usually measured by the Arab geographers by a line which runs from Hulwān in the northeast to al-Ḳādisiya (or al-'Udhaib) in the southwest; cf. Streck, *op. cit.*, i. 2, 5.

The exact location of al-Ḳādisiya was unknown until quite recently. An attempt had been made to identify it with the early Muḥammadan ruins of al-Ukhaidir (25 miles S.S.W. of Kūfa) — for example by Ritter, *op. cit.*, xi. 956, Loftus, *Travels in Chaldaea and Susiana* (London 1857), p. 64 note, and Justi in the *Grundriss der Iran. Phil.*, ii. 546. This identification, however, is to be definitely rejected as erroneous. Besides, Ritter, *op. cit.*, x. 186 places al-Ḳādisiya much too far north, while the locations of al-Ḳādisiya and al-'Udhaib given by Wagner (*Nachr. d. Gött. Gesellsch. d. Wiss.*, 1902, p. 257—9) are fairly correct. A. Musil, on his journey of exploration in 1912, was the first to rediscover the real site of al-Ḳādisiya, cf. his report in the *Anzeiger der phil.-hist. Kl. der Wien. Akad. der Wiss.*, 1913, i. 11 (12 of the reprint). Musil there remarks that the spring al-'Odeyb rises in the valley of of Mseyzīz; "on the left bank of that valley, on the edge of a swampy *hōr* we were shown the ruins of al-Ḳādisiyye or Dār al-Ḳāzī (= Ḳādisiya)". According to the map which Musil appends to his essay in the *Wiener Zeitschr. für die Kunde des Morgenl.*, xxix. (1916), p. 461, the ruins mentioned are situated in 31° 45' N. Lat. and 44° 8' E. Long. (Greenwich) directly south of Nadjaf and 19 miles from Kūfa.

The locality of Ḳāides which Beauchamp in his excursion to the ruins of Babylon in 1760 heard of as the find-spot of a statue some considerable distance away (see the reprint of his account of his journey in the *Revue d'Assyriologie*, x. 190) is perhaps also identical with the remains of al-Ḳādisiya discovered by Musil. Ḳāides is probably = Ḳādis, the shorter form of the name, which is occasionally found alongside of Ḳādisiya, as for example in an old Arab poet (see al-Bakrī, ed. *Wüstenfeld*, p. 226), in al-Ṭabarī, etc. Firdawsī

writes Ḳādisī and Ḳādisiya. In the neighbourhood of al-Ḳādisiya there was a village called al-Ḳudais, "little Ḳādis". The poets give the whole district round al-Ḳādisiya the collective name al-Ḳawādis.

The Arab geographers of the ivth (xth) century (al-Iṣṭakhri, Ibn Ḥawkal, al-Muḳaddasī) describe al-Ḳādisiya as a small town with two gates and a mud fortress, in the midst of cultivated fields and groves of date-palms, watered by a canal led from the Euphrates, the last running water in the 'Irāk. In ancient times the inner arm of the Persian Gulf seems to have stretched up to the region of al-Ḳādisiya. The main arm of the Euphrates once flowed, as al-Mas'ūdī notes (*Murūāj al-Dhahab*, ed. Paris, i. 215), towards al-Hīra, where its ancient bed was still visible and was called al-'Atīḳ "the old (river)". It took its course between al-Ḳādisiya in the north-east and al-'Udhaib in the southwest; at al-Ḳādisiya there was a bridge across it called Dījir al-'Atīḳ or Dījir al-Ḳādisiya.

In the Sāsānian period al-Ḳādisiya played a prominent part as an important frontier town of the Persian empire. It was not till the Muḥammadan period that the town became very famous on account of the decisive battle fought in its vicinity, with which the Arab opened their second campaign against the lands of the Euphrates and Tigris in the most successful fashion. The Muslim army was under the command of Sa'd b. Abī Waḳḳās, while the Persian troops were led by the imperial commander-in-chief Rustam. Statements differ very considerably regarding the numbers on each side; the number given for the Arabs varies from 6 000 to 38 000 and that for the Persians 30 000 to 120 000 men. The latter were undoubtedly superior to the Muslims in strength. The estimate of an almost contemporary Armenian historian may be fairly near the truth when it puts the Persians at 80 000 men and the Arabs at 9—10 000, besides the Syrian reinforcements of 6 000 men who arrived in the last stage of the fight.

It was only after the two sides had stood watching each other for weeks that they joined battle. The battle lasted three (or four) days. These days in the specifically 'Irāk tradition have special names, which are probably to be explained as place-names. In spite of all the heroic courage of the Arabs, the balance would finally have turned in favour of the Persians, if at the critical moment of the decision the troops hurried from Syria had not arrived in time. Their rapid and vigorous intervention decided the victory of the Arab arms. It was, however, not a cheap victory for the Muslims, as about a third of their whole force perished. About the doubtless very heavy Persian losses the accounts are contradictory. The Persian commander in chief Rustam was captured and killed in the heat of battle. Very considerable booty was taken by the victors. The most important trophy was the Persian imperial standard said to date from the early Iranian period (on it see Sarre in *Klio*, iii. 358 sq.), Dirafsh-i Kāwīyan, which was cut in pieces and distributed. In the fighting with the retreating Persians the Arabs also captured the celebrated treasure of Nakhardjān (properly Nakhwergān) which consisted of valuable ornaments for women; cf. on it Nöldeke in the *Zeitschr. d. Deutsch. Morgenl. Ges.*, xxxiii. 523—4.

The glorious day of al-Ḳādisiya, which made the Arabs masters of the 'Irāk west of the Tigris, is

one of the most celebrated events in the great period of the Muslim conquests. It laid the foundations for the supremacy of the religion of Muhammad in the nearer east. Of course tradition has woven many legends round the victory; it is frequently mentioned in the older Arab poetry.

The date of the battle is very uncertain. The statements in the different sources vary from the years 14 to 16 (635—637). One thing is certain that the battle was fought in the spring and that Basra was founded after it. Wellhausen (*op. cit.*, vi. 72) decides for 15 (636), while Caetani prefers 16 (637) (*op. cit.*, p. 629—633); see also Justi, *Grundr. der Iran. Phil.*, ii. 546.

The Armenian historians call the battle after Hira (Armen. Herthican); see the account by Sebeos in Hübschmann, *Zur Geschichte Armeniens und der ersten Kriege der Araber* (Leipzig 1875), p. 14 and Caetani, *op. cit.*, p. 685).

(Leiden 1900), p. 2, 5, 11; Caetani, *Annali dell' Islām*, iii. 629—713.

In addition to the two towns mentioned above, Yāḳūt knows three other places called Ḳādisiya, namely two villages in the district of al-Mawṣil, on the Nahr al-Ḳhāzīr between al-Mawṣil and Irbil, and a third near Dījazira b. 'Omar in Mesopotamia; see Yāḳūt, *al-Mushtarik*, ed. Wüstenfeld, p. 337. Ibn al-Aṭhīr also mentions an al-Ḳādisiya near Baghdād (*op. cit.*, xii. 91). We also find the shorter form al-Ḳādis beside al-Ḳādisiya, e. g. for the battlefield (cf. above), for a village near Herāt (see *al-Mushtarik*, p. 337; al-Balādhuri, p. 409, 2) and near Marw al-Rūdh (Yāḳūt, iv. 7, 7). Probably in all these place-names, as Nöldeke suggests (*Zeitschr. der Deutsch. Morgenl. Ges.*, xxxiii. 1623), we have to deal with traces of a lost people of unknown nationality, namely the Ḳādisīaeans, who appear in Syriac literature of the vth and vith centuries as a wild warlike people in the region of Sindjār. The places called al-Ḳādisiya and al-Ḳādis in Mesopotamia, Babylonia and on Persian territory are perhaps to be explained as settlements of branches

of this stock, made by the Sāsānīan kings. Of the celebrated al-Ḳādisiya near Kūfa, it is at least definitely stated that its name comes from Ḳādis near Herāt, from which the garrison of the fort belonging to the military cordon on the frontier had come. Cf. Nöldeke, *op. cit.*, p. 157 sq., 162; J. Marquart, *Ērānšahr nach der Geographie des Pseudo-Moses Xorēnaḡi* (*Abhandlungen der Gött. Ges. der Wiss.*, 1901), p. 77, 78. (M. STRECK.)

ĶĀDJĀR (*ḡajar* "marching quickly"; cf. Sulaimān Efendi, *Lughat-i Ćaghatai*, Stambul 1298, p. 214), the name of the present ruling dynasty of Persia. It takes its origin from the Turkoman tribe of the same name settled in the district of Astarābād [q. v.], but which had not always been there. Persian historians assert that it is a branch of the great tribe of Djalāir [q. v.] and that it takes its name from Ḳādjār Noyān, son of Sertāk Noyān, who had been the tutor of Ghāzān Khān [q. v.]; this Sertāk is without doubt the same as he who was put to death by Baidū [q. v.], because he was a partisan of Gaikhatū [q. v.] in 694 (1295) (Waṣṣāf, Bombay 1269, iii. 282; d'Ohsoun, *Hist. des Mongols*, iv. 115). This tribe had, it is said, settled on the frontiers of Syria after the reign of Abū Sa'īd [q. v.], in 736 (1335); Timūr is said to have brought it back to Persia and into Turkestan, its native country, in 803 (1200). It was one of the seven Turkoman tribes which placed the Ṣafawī dynasty on the throne of Persia. To it belonged Shāh Ḳulī *Kurē* (body-guard), who was twice appointed ambassador to treat for peace with the Turks in 962 (1555) and in 975 (1567) (Pečewi, i. 327, 334; v. Hammer, *Hist. de l'Empire Ottoman*, Fr. transl., vi. 69, 320; Riḡā Ḳulī Khān, ix. 2 is wrong in giving the date 969). In 995 (1587), Shāh 'Abbās I finding them too numerous divided the tribe into three groups: 1. at Merw against the Uzbegs; 2. at Gandja and Eriwān; 3. at Astarābād in the fortress of Mubārakābād which he had just built; those who established themselves in the high part were given the name *Yokharbāsh*; those who lived in the lower part adopted the name *Ashak bāsh*. The object of settling them in this region was to protect it from the inroads of the Turkomans from beyond the frontier.

A member of the Astarābād branch was Faṭḥ 'Alī Khān, the son of Shāh Ḳulī b. Mahdī Khān b. Wali Khān b. Muḥammad Ḳulī. To avenge the death of his two brothers he seized Astarābād. In 1135 (1723) he went to the defence of Isfahān against the Afghans at the head of 1000 horsemen; but being denounced to Shāh Ḥusain as dangerously ambitious he returned to his province, abandoning the Ṣafawī king to his unfortunate destiny. Called to their help by the people of Ray, he fought without success against the Afghans at Ibrāhīmābād in Warāwin, and returned to Māzandarān to offer his services to Shāh Tahmasp. During the advance on Meshhed he was executed by order of Tahmasp's general Nādir (the later Nādir Shāh) on 14th Safar 1139 (12th 1139 Oct. 1726) (Mahdī Khān, *Tārīkh-i Nādiri*, Tibriz 1266, p. 21).

His son Muḥammad Ḥasan Khān, pursued by Nādir Shāh, took refuge with the Turkomans, collected supporters there and recaptured Astarābād, which he lost a little later again; it was then that the two obelisks of decapitated heads were built (*Kellemanār*) which Hanway saw (illustration in *Historical Account of British trade*, London 1753,

vol. 1., reproduced in Sykes, *History of Persia*, 2nd ed., ii. 270). Muhammad Ḥasan went to the tribe of Dāz, who expelled him under threats from Nādir. He then lived in the desert, where he heard by chance of the assassination of Nādir Shāh. He thereupon retook Astarābād (1166 = 1747). He was next attacked by Karīm Khān Zand, who besieged him for 40 days, then raised the siege and abandoned his camp (1165 = 1752). In 1168 (1755), Aḥmad Shāh Durrānī [q. v.] seized Meshhed and sent Pesend Khān at the head of 15 000 horsemen to attack Muḥammad Ḥasan's possessions, but this army was defeated at Sabzawār. Muḥammad Ḥasan followed up this success by conquering Kāzwin and Gilān. He marched on Isfahān. Karīm Khān lost the battle of Gulūnābād, fought four parasangs from this town, and fled to Shirāz. In 1169 (1756) he seized Ādharbaidjān, where the Afghān Azād Khān was in command; he annexed this province in 1170 (1757) and appointed as its governor his son Agha Muḥammad Shāh, then aged 18. Next year he marched on Shirāz but his army melted away owing to scarcity of provisions. He then had to suppress several local revolts. His troops, exhausted by their continual marches, abandoned him; he returned to Astarābād with a body of *Ashaqbash* and his own private servants. Defeated in a fight with Shaikh 'Alī Khān in the desert of Karāk, the feet of his horse sank in the mire and in this position he was killed by the Kurd Sabz 'Alī, one of his servants who had gone over to the enemy (1171 = 1758).

Husain Kulī Khān, second son of the preceding, surnamed Djahān-Sūz on account of his courage and fearlessness, entered the service of Karīm Khān who also attached to his court Agha Muḥammad Khān then aged 30. The latter went to Shirāz; his family settled in Kāzwin. Appointed governor of Dāmghān, but carried away by his ambition, Husain Kulī attacked Astarābād and there gave himself up to plunder and massacre. He seized Māzandarān and surprised at Bārfurūsh, the capital of Māzandarān, the governor appointed by Karīm Khān, Mahdī Khān. He was shot in his tent by rebel Yomūt Turkomans at the age of 27. He was the father of Faṭḥ 'Alī Shāh [q. v.].

Kādjār Dynasty.

Faṭḥ 'Alī Khān, born 1097 (1685) or 1104 (1693); accession 1133 (1721); died 1139 (1726—27); buried at Khwādja Rabi', near Meshhed.

Muḥammad Ḥasan Khān, born 1127 (1715); accession 1164 (1751); died 1172 (1758—59); buried at Shāh 'Abd al-'Azīm.

Husain Kulī Khān, surnamed Djahān-sūz, born 1164 (1751); accession 1184 (1770); died 1191 (1777); buried at Astarābād.

1. Agha Muḥammad Shāh, born 1155 (1742); accession 1193 (1779); died 1211 (1796—97); buried at Nadjaf (Meshhed 'Alī).

2. Faṭḥ 'Alī Shāh, born 1185 (1771); accession at Teherān 1212 (1797—98); died 1250 (1834) at Kumm. — 'Abbās Mirzā, *nā'ib al-saltāna*, born 1203 (1788—89); died in Khorāsān before his father (1249 = 1833—34); buried at Meshhed.

3. Muḥammad Shāh, born 1222 (1807); accession 1250 (1834); died 1264 (1848); buried at Kumm.

4. Nāṣir al-Dīn Shāh, born 1247 (1831—

32); accession 1264 (1848); assassinated in 1866.

5. Muẓaffar al-Dīn, born 1269 (1853); accession June 8, 1896; died 14 January 1907.

6. Muḥammad 'Alī, born 1289 (1872); accession January 19, 1907; abdicated July 16, 1909.

7. Aḥmad Shāh, born 1314 (1898); attained his majority in 1914.

Horn, in *Grundr. der iranischen Philologie*, ii. 592 sqq. (CL. HUART.)

KĀDR (A.) another pronunciation of KĀDAR [q. v.].

KĀDRĪ, a Persian poet who commemorated the capture of the island of Kishm and of the town of Hormūz by 'Abbās I in two short epic poems, *Djāngnāma-i Kishm* and *Djārūnnāma*. The former is edited by L. Bonelli in the *Rendiconti della R. Acad. dei Lincei*, vi., Semester 1, fasc. 8. Cf. Ethé in the *Grundriss der iran. Phil.*, ii. 237.

KĀF, the 22nd letter of the usual Arabic alphabet (numerical value 20; cf. the article ABDJAD). The pronunciation of *kāf* as an unvoiced palatal explosive, found as early as Sibawaihi, has survived in modern academic speech. In the present day popular speech we find some variants (in addition to *k*) notably the affricate *č* (< *c* < *k*). Cf. the article ARABIA, ARABIC DIALECTS, i. 396b; and Schaade, *Sibawaihi's Lautlehre*, Index.

(A. SCHAADÉ.)

KĀF, the 21st letter of the usual Arabic alphabet (numerical value 100; cf. the article ABDJAD). The form of the character goes back to the Nabataean *kāf* and later in Arabic was assimilated in form to *fā*, so that it had to be distinguished from the latter by pointing (cf. the article ARABIA, ARABIC WRITING, i. 383b and plate I). In Sibawaihi's time *kāf* was pronounced as a velar *g*. This pronunciation is still frequently found among Beduins and peasants; in the ordinary popular language, however, *kāf* is usually pronounced as *hamza*; for other modern popular pronunciations of *kāf* see the article ARABIA, ARABIC DIALECTS, i. 396b. The modern academic pronunciation is *k* (i. e. velar *k*). Cf. Schaade, *Sibawaihi's Lautlehre*, Index. — Kāf is also the title of Sūra I. of the Qur'an. (A. SCHAADÉ.)

KĀF in the cosmology of Islām is the name of the mountain range surrounding the earth. On the shape of the earth there were different opinions among the later Muslims:

cf. al-Kāzwinī, i. 143 sq.; al-Dimashkī, *Nukhbāt al-Dahr* (ed. Mehren), p. 9; Ibn al-Wardī, *op. cit.*, p. 9 and thereon Zenker in Lane, *op. cit.*, ii. 229, 231 sq.; Reinaud, *op. cit.*, i. p. clxxx sq. and Radloff-Hochheim in the *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, xlvii. 220. Like the Hebrews and the Greeks in the period of Homer, Hesiod and the Ionian physicists, the ancient Arabs usually regarded the earth as a quite flat, circular disc. Muḥammad, to judge by passages in the Kurʾān, entirely agreed with this view. The view held in the sacred revelation as well as in Tradition is still shared in Muslim countries by great masses of believers. The mountain Kāf is separated from the disk of the earth by a region impassable to men. This, according to a statement of the Prophet (see the Persian version of al-Ṭabarī, *op. cit.*), is a dark stretch which it would take four months to cross. Another view connected with Greek and Iranian ideas regards the earth as immediately surrounded by a stinking, unnavigable body of water called *al-Baḥr al-Muḥīt* or *Uḫyānūs* (Okeanos), which in whole or part is veiled in deep darkness and whose shores no one knows (cf. Abu 'l-Fidā', *op. cit.*, p. 19; al-Kāzwinī, i. 104, 10; Ibn al-Wardī, p. 73; Zenker in Lane, *op. cit.*, p. 232, 234; Reinaud, *op. cit.*, ii. 1., p. 23 sq.). The whole, earth and sea, is then held together by the mountain wall Kāf as by a ring.

From the descriptions given notably by Yāḳūt, al-Kāzwinī and Ibn al-Wardī, Kāf is a formation of green emerald, the reflection of which causes the green (to us: blue) of the heavens. Slightly diverging from this, another version says that only the rock (*al-ṣakḥra*) on which the mountain Kāf proper rests is of a kind of emerald. This rock is also called *al-watad*, the peg, because God created it as a support for the earth. The earth cannot support itself by its own strength — so some think —, it therefore requires a prop like this. If Kāf did not exist, the earth would — as the Persian version of al-Ṭabarī says — be constantly trembling and no creature could live on it.

There were, however, more complicated views regarding the "bearers" of the earth. As the earth — so relates a tradition in al-Kāzwinī, i. 145, 16 sqq.: — at first swayed to and fro unsteadily, God created an angel who took it on his shoulders and held it with his hands (a reminiscence of the heaven-supporting Atlas). This angel stands on a quadrangular block of green jacinth which in its turn is borne by a gigantic bull, which rests on a fish swimming in the water. Ibn al-Wardī (p. 12, 15 sq.) gives a similar account, emphasising that Kāf arises out of the above mentioned block of jacinth. Another variant in Ibn al-Wardī (p. 13, 17 sq.) gives a still larger number of earth-bearers (but leaving out the angel) partly in a different order, for example, the rock supports the bull. For further variants see Wensinck, *The Ocean* etc., p. 18 (and the quotation in note 2), also J. Meyer, *Die Hölle im Islam* (Basel 1901), p. 46. The Muslim Persians describe the animal supporting the earth sometimes as a bull (cf. Ḍjāmī, *Yūsuf u-Zalīkhā*, ed. Rosenzweig, Vienna 1824, p. 13, 5 sq., and thereon Rosenzweig, *op. cit.*, p. 190b; Vullers, *Lex. Pers.-Lat.*, ii. 946a), sometimes as a monster, half bull and half fish (*gāwī māhī*; Firdawsī, *Shāhnāma*, ed. Vullers, p. 38, l. 59; 444, l. 190, and cf. Vullers, *Lex.*, ii. 947a). Baghdād folklore also

knows the bull and fish as bearers of the earth; cf. H. Petermann, *Reisen im Orient*, ii. (Leipzig 1861), p. 301. Among the inhabitants of the Red Sea coast, the belief prevails, that the earth rests on the backs of colossal bulls, see E. Rüppel, *Reise in Abyssinien*, i. (Frankfurt a. M. 1838), p. 256. Al-Kāzwinī gives for the bull and fish the names of the Biblical monsters, Leviathan and Behemoth, and thus shows definitely that the Muslim idea is connected with the old Biblical views, which again can in the last resort be traced to the Babylonian Chaos-tradition. The basic idea of the bull supporting the earth is, as Reinaud (*op. cit.*) has emphasized, also to be found in India. The rock already mentioned as supporting the earth and as the starting point of the mountain Kāf may well be associated with the stone *Shetiyya*, which Jewish legend regards as the navel-stone of the earth sunk by God in the depths of chaos or primeval ocean, and as the support of the world. For the Jewish legend cf. Feuchtwang in the *Monatschrift für Gesch. u. Wissensch. des Judentums*, liv. (1910), p. 724 sq.; W. H. Roscher, *Neue Omphalos-Studien* (*Abhandl. d. sächs. Gesellsch. d. Wiss.*), xxxi. (1915), p. 73 sq. It may be added that a tradition in al-Kāzwinī (i. 144, 23) also gives the view that God made the world stand without any band or support.

According to a very popular idea, Kāf is the origin of all the mountains of the world. They are connected with it by subterranean branches and veins; if God wants to destroy any region, he simply orders one of these branches to be set in motion, which causes an earthquake. According to a different popular view, an earthquake is caused because the bull supporting the earth sometimes trembles under its burden.

Kāf which is inaccessible to man is regarded as the end of the world; its name is therefore used as a symbol for this; cf. e. g. a verse in Ḍjāmī's *Yūsuf u-Zalīkhā* (ed. Rosenzweig), p. 1, 14. This mythical mountain forms the boundary between the visible and the invisible world. No one knows what lies behind; God alone knows the creatures that live there. Many say (cf. Ibn al-Wardī, p. 188) that the area behind Kāf belongs to the next world, is a land white like silver, 40 days' journey long and is the abode of angels. According to an alleged saying of Muḥammad (see Zenker in Lane, *op. cit.*, p. 236), there are still other lands beyond Kāf: one of gold, 70 of silver, 7 of musk, each 10 000 days' journey long and broad and all inhabited by angels. It is also said that Kāf as well as the region behind it is the abode of the *Djinn*. Kāf itself is especially known as the abode of the fabulous bird *Simurgh*, a kind of vulture, which is essentially the same as the *'anḳā'* [q. v.] of the Arabs. Existing since the beginning of the world, this marvellous bird retired in monastic solitude to Kāf and lives there contented and satisfied, a wise councillor consulted by the kings and heroes of the past. Kāf, his residence, is therefore simply called "Mount of Wisdom" in poetry, symbolically also "Mount of Contentment". In his celebrated work, *Mantiḳ al-Ṭair* ("The Dialogues of the Birds"), the Persian poet Farīd al-Dīn 'Aṭṭār [see 'Aṭṭār] describes the wandering of the Ṣūfī through the seven stages which the soul has to pass through till its complete merging into God, in the allegory of a very difficult, adventurous flight by a bird through

the seven valleys up to Mount Kāf, the throne of its all wise king Simurgh.

Kāf plays a part also in Arab fairy tales; in the *1001 Nights* it is several times mentioned. Oddly enough a number of Qurʾān expositors explain the title of Sūra 1., the letter Kāf, as the name of the mountain Kāf.

In a narrower sense and localised on the earth, Kāf means that part of the Asiatic highlands which bounds the Muslim world in the North, especially the Caucasus and its spurs in Northern Persia. For this reason Demāwēnd, the scene, celebrated in the *Shāhnāma*, of the wonderful exploits of old Persian rulers and heroes is represented as the home of the Simurgh [see i. 937^b].

There can hardly be a doubt that the Muslim idea of the mountain Kāf in the wider (mythic) and narrower sense is borrowed in its main features from the Persians. With them Alburz (Alburj), old-Persian Hara-berezaiti ("the high mountain"), is originally the mythical mountain at the end of the earth which, like the Hellenic Olympus, also contains the palaces of the Gods. From the Avestan account one must regard the Hara-berezaiti as the backbone of the mountain system of the earth; for all other mountains of the world have grown out of it by subterranean connections. The Hara-berezaiti was imagined to be a range of mountains enclosing not only the whole earth but also a lake, named Wurukasha, which is likewise at the end of the earth, but according to the *Bundehesh*, does not surround it. In the geography of this Pehlewi work moreover the name of Mount Kāf is actually found; cf. Windischmann, *Zoroastriische Studien* (Berlin 1863), p. 7, 73, 75 Note 1. Alburz was next located on the earth itself and identified with the mountain-wall which encloses the world of Iranian civilization in the north. The name Alburz (Elburs) is thus found in several places to-day as the name of a mountain or range on the borders of the Iranian linguistic area, notably as the name for the chain which culminates in Damāwand. (cf. ALBURZ, i. 251). It should be emphasised that Yāqūt (*op. cit.*) expressly says that Kāf in ancient times was called Alburz; see also Mustawfi, *Nushat al-Kulūb* (Gibb Mem., xxiii, i.), p. 191 sq.). Geiger (*op. cit.*, p. 51) thinks that Lake Wurukasha originally meant a definite locality (Lake Aral or the Caspian Sea), but as early as the *Avesta* it often appears removed into the region of myth. On Haraberezaiti-Alburz and Wurukasha (Vārukasha) cf. Ritter, *Erdkunde*, viii. 42 sq.; Fr. Spiegel in *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, vi. 85, and in *Erānische Altertumskunde*, i. 191 sq. (Leipzig 1871); W. Geiger, *Ostiran. Kultur im Altertum* (Erlangen 1882), p. 42 sq.; F. v. Andrian, *Der Höhenkultus asiatischer u. europäischer Völker* (Vienna 1891), p. 287 sq.

An idea nearly related to that of the Iranian cosmology is found among the Hindus also. In their literature, especially in the *Purāṇas* mention is made of the fabulous mountain girdle Lokāloka, which separates the visible world from the invisible world and beyond which nothing but darkness reigns. On Lokāloka cf. Spiegel in *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, vi. 86, and J. Dowson, *Classical Dictionary of Hindu Mythology* (London 1879), p. 180. According to the teaching of the Jains, the ring-shaped moun-

tain Mānuṣottara, that lies in the centre of the continent Puṣkaravara, is the limit of mankind; cf. Jacobi in *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, lx. 312.

That the Muslim idea of Mount Kāf possesses its prototypes in the analogous Indian and Iranian ideas of the mountains bounding the world, Lokāloka and Haraberezaiti-Alburz, was previously pointed out by Gesenius (*op. cit.*, p. 317) and Rosenzweig (*op. cit.*, p. 185).

Closely connected with the Muslim view is that of the Mandaeans. According to them (cf. H. Petermann, *Reisen im Orient*, ii. (Leipzig 1861), p. 452), the disk of the earth is surrounded by the ocean except on the north where a great mountain of rock of the purest turquoise cuts off the sea. Immediately adjoining this turquoise mountain, the reflection of which causes the blue of the sky, lies the pure world stretching to the north. Very probably the Mandaeans got their idea from Muslim sources. The contrary view of de Goeje (Ṭabari, *Annales*, Introd., p. cdxvii) that the Arabs got the idea of Kāf from Mandaean mythology, seems less plausible.

The idea of a frontier range to be located in the north, as found in the narrower interpretation of the ideas of Haraberezaiti-Alburz and Kāf (cf. especially the Mandaean legend) was widespread in Asia, notably among the peoples of the ancient East. It probably owed its origin to Babylonian cosmology, which locates its cosmic mount of the gods in the north; on the Babylonian-Assyrian view cf. Fr. Delitzsch, *Wo lag das Paradies?* (Leipzig 1881), p. 29, 117 sq.; Fr. Hommel, *Aufsätze u. Abhandl.*, ii. (Munich 1900), p. 345 sq., and Zimmermann in *Die Keilinschriften und das Alte Testament* (3rd ed., Berlin 1903), p. 353, 355, 620. The traces of the existence of a similar view among the ancient Hebrews can still be seen in the Biblical books (cf. especially Isaiah xiv. 13); cf. thereon W. Gesenius, *Commentar über den Jesaja*, ii. (Leipzig 1821), p. 316 sq., where the analogous non-Biblical views are fully discussed; Dillmann-Kittel, *Der Prophet Jesaja* (7th ed., Leipzig 1898), p. 134. Among the Hindus Meru which, according to the usual Buddhist view, is the centre and navel of the earth (cf. W. Foy in *Festschrift E. Windisch*, Leipzig 1914, p. 213 sq.; E. W. Hopkins, *Epic Mythology*, Strassburg 1915, p. 253, Index, and Roscher, *Neue Omphalosstudien*, Leipzig 1915, p. 72), is sometimes also interpreted as the Himalaya mountains bounding India on the north. For the Greeks, the mount of the gods, Olympus in Thessaly, marked the north frontier of their home.

(M. STRECK.)

KAFA or **KAFFA**, also written **AL-KAFA**, a mediaeval town on the south shore of the Crimean peninsula, called in ancient times and again at the present day Theodosia (originally a Milesian colony). The name *Kāfa*, *Kafá* or *Kafā*, is first found in Konstantinos Porphyrogenetos (*De administr. imperio*, Ch. 53). Sauromates V, king of Bosphorus, is said to have been killed there in the fourth century in single combat with Pharnaces of Chersonesus. The view has been put forward (F. Köppen, *Krimskiy Sbornik*, St. Petersburg 1837, p. 107) that the name may be identical with the *κᾶπον* mentioned in Strabo, Ch. 312. With these exceptions, Kafa is never mentioned till the xiiith century. As a harbour on the south coast of the Crimea, for trading-vessels as well as for war-ships, we always find *Sughdāk* (even as late as the reference in *Recueil de Textes rel. à l'Hist. des Seldjoucides*, ed. Houtsma, iii., iv. see, Index), the modern *Sudak*.

Kafa only rose to prominence in the second half of the xiiith century, when the Genoese established themselves in the Crimea after the republic of Genoa had purchased this place from a Tatar chief. This chief is usually believed to have been the Ūrān Timūr, mentioned by Abu 'l-Qhāzī (ed. Desmaisons, p. 173), son of Tūkai Timūr, and grandson of Djūti, to whom the Khān Mōngke Timūr (1266—1280) had granted Kafa and the Crimea; the name is written by Abu 'l-Qhāzī (p. 178), Ūz-Timūr, by Rashid al-Din (ed. Blochet, p. 126), Ūrang Timūr; but a consul of Kafa is mentioned as early as about 1263. It was not till the xivth century that "Gazaria" or "Gazzaria", the colony founded by the Genoese on the Black Sea with Kafa as its capital, became of considerable importance. It was controlled by the "officium Gazariae" in Genoa and its statutes (1316); the administration remained in the hands of the metropolites with a limited participation by the local population. The statutes of 1290 and 1316 expressly forbid the minting of a local currency but in the xvth century this was, in practice at least, allowed; the coins (with Latin and Tatar inscriptions) bear the badge of Genoa (after 1453, when the administration of the colony was placed in the hands of the Bank of St. George, the representation of this saint) as well as the seal (*tamgha*) of the Golden Horde (afterwards the *tamgha* of the Girāy; cf. ii. 171^b). After 1318 Kafa appears as the see of a Catholic Archbishop, whose diocese comprised the whole area from Varna to Sarāi on the Volga and from the Black Sea to the Russian dukedoms. Ibn Baṭṭūṭa (about

1330) describes Kafa as "one of the famous ports of the world" (ed. Defrémery and Sanguinetti, ii. 358: *min marāsi 'l-dunya 'l-shahira*) of his time. In the harbour there were about 200 naval and mercantile ships. The Muhammadans there had their mosque and *kādi*. By the treaty of 1380 however, the Tartars could only live in the suburbs beyond the city walls; this limitation seems to have again been removed later. In the statutes of 1449 it is only laid down that Tartars living in Kafa are not to be subject to the *Titanus seu vicarius* i. e. the *Tudun* of the Khān of the Crimea. The fortifications still in existence belong in part to the period 1341—48 (successful wars against the Khān of the Golden Horde, Djānibeg), in part to the period 1383—86 (building of the city-walls as a protection, not only for the city proper (*burgus*), but for the suburbs (*antiburgi*) also. About 1470 the population is said to have been 80,000. As early as a letter from the Bank of St. George to the Pope Calixtus VI (1455—58), of Nov. 1, 1455, in which attention is drawn to the danger threatening the Black Sea colonies from the Turks, Kafa is described as *non ambitu quidem moenium sed populorum multitudine Constantinopoli facile praeferenda*.

The Turkish conquest, inevitable after the fall of Constantinople (1453) and Trebizond (1461), could not be long averted by the Christians of the Latin East either with their own forces or the oft summoned help of the Girāy (to whom Kafa was in some degree dependent from 1434, when a Genoese army was defeated by Ḥadjīdī Girāy). In 1475 the whole peninsula had to submit to the Turks; the south shore with Kafa was directly incorporated in the Sultān's empire and divided into three *kādilīk* (Kafa, Mankūb and *Sudāk*) with a Pasha in Kafa. Under Bayazīd II (1481—1512), at the time of the first Russian embassy (1498), this office was filled by a son of the Sultān, Muḥammad (this information does not seem to be found in Turkish sources, as it is only given by von Hammer, *Gesch. der Osmanischen Reiches*, 2nd ed., Pest 1834—36, i. 646, from Karamzin, *Ist. Gos. Ross.*, 2nd ed. St. Petersburg, 1818—29, vi. 169 sq. = *Gesch. des Russ. Reiches*, transl. from the 2nd edition, Riga 1824, vi. 215). For a short period the revenues of Kafa were occasionally surrendered to the Girāy; Kafa appears as a mint of the Girāy under Mengli Girāy from 899—906 (1493—1501) and again not till the reign of Shāhin Girāy, regnal years 5 and 6 i. e. 1195, 1196 (1781—82).

Under Turkish rule Kafa (Turkish pronunciation *Kefe*) gradually assumed the appearance of a Muhammadan town, although many Christian churches remained in existence. The most detailed description is by Dortelli d'Ascoli 1634 (Russ. transl. in *Zapiski Odesskago Obshch.*, etc., xxiv.; text publ. by Dashkewich in *Čteniya w. istor. obshch. Nestora lietopisca*, Book 5), who had spent over ten years in the Crimea at the beginning of the xviith century. There were then in Kafa 70 mosques, 2 synagogues (one for Rabbaites and the other for Karaites), 15 Greek, 28 Armenian (according to Beauplan [1660], 12 Greek and 32 Armenian) churches and only one Catholic. The principal mosque (*büyük džami*), later described by Pallas in 1794 (*Bemerkungen auf einer Reise in die südliche Statthalterschaften des russ. Reiches* i. d. J. 1793 u. 1794, Leipzig 1801, ii. 262), stood

in the centre of the town; the dome of the main building, over 65 feet in diameter, was surrounded on three sides by eleven smaller cupolas; the two minarets were 115 feet high. A decline in the prosperity of the town under Turkish rule was noticed by Broniewski as early as 1578; as the world's trade had taken other routes, the shores of the Black Sea no longer had their former importance; yet to the end of Turkish rule Kafa remained the most important harbour on the north side of the Black Sea. Chardin (*Voyages*, Amsterdam 1735, i. 46 sq.) says that in his 40 days' stay there (Aug.—Sept. 1672) he saw nearly 400 ships arriving and departing. In the town there were then about 4,000 houses of which 3,200 were Muslim and 800 Christian; there were no stone buildings with the exception of 8 churches in ruins (apparently dating from the Genoese period). Even in the xviiith century Kafa was still compared with Constantinople by the Turks and called Little Stambul (*Küçük İstambul*).

In 1771 Kafa was taken for the first time by the Russians, but not finally incorporated in the empire till 1783. According to the oldest Russian plan of the city, there were then 29 mosques, 13 Greek and 22 Armenian churches, and 813 houses of which 694 were Turkish. In the description of the journey of the Empress Catherine in 1787 we already find the old Greek name (Russ. Feodosia) reappearing; the town is later called Kafa again and only definitely renamed in 1804. In the very early years after the conquest began the forced migration of the Turks and the voluntary of the Tatars; about 1794 (Pallas) Kafa had already "from a once celebrated and populous town become almost a mound of stones". About 1802 it is said to have had only 200 inhabitants. The Russian harbour of Feodosia, whose prosperity only began in the last decade of the xixth century (railway connections, building of commercial docks, Sebastopol being the naval port), must thus be regarded as a new foundation on the site of the Turkish Kafa. The number of the inhabitants, according to the census of 1899, was 27,238 (in 1894, only 17,000), of whom only 3,200 were Tatars. The Museum (founded in 1811) contains many inscriptions and other antiquities, particularly from the Genoese period.

Bibliography: cf. BAGHČE-SARĀI [i. 563a]; the works, mentioned there, by Broniewski, Pallas, etc., as well as the *Zapiski Odesskago Obščestwa Istorii i Drevnostei* are indispensable for the study of the history of Kafa. In the *Zapiski* (from Vol. ii. to xxiv) the material from the archives of Genoa published in Italy (*Atti della Società Ligure di storia patria*) is utilised. On the coins: O. Retowski, *Genuesko-tatarskija moneti goroda Kaffi* (Simferopol 1897 and 1898). Cf. also F. Brun, *Černomorje*, i. (Odessa 1879), chap. 11 (*O poselenijakh italjanskikh w Gazarii*); J. Kulakowskiy, *Proshloye Tawridi*, 2nd ed. (Kiew 1914). An attempt at a connected survey is W. K. Minogradov, *Feodesiya (Istoricheskiy Očerok)*, 2nd ed. (Jekaterinodar 1902). Cf. also M. G. Canale, *Della Crimea* (Genoa 1855) and Heyd, *Hist. du Commerce du Levant* (Leipzig 1885/6), Ind. s. v. *Caffa*. (W. BARTHOLD.)

KAFĀLA (A.), the pledge given by any one (the *kafil*) to a creditor (the *makfūl lahu*) to secure that the debtor (the *makfūl bihi*) will be present at a definite place e. g. to pay his debt

or fine or, in case of retaliation, to undergo punishment.

If the *makfūl bihi* is not there at the time arranged, the guarantor can be kept prisoner till the debtor comes or until it is proved that he cannot come (e. g. because he is dead).

As to the question whether the guarantor is bound to pay for the *makfūl bihi* or to suffer his punishment, the opinions of the different *madhhab's* vary. According to the *Shāfi'i* school, he is not bound to do so, not even if he has expressly bound himself to do so.

Bibliography: al-Bādjūrī, *Hāshiya 'atā Sharḥ Ibn Kāsim al-Ghazzī* (Bulāq 1307), i. 395 sq.; E. Sachau, *Muhammedan. Recht nach schafiiischer Lehre*, p. 405 sqq.; al-Dimashki, *Rahmat al-Umma fi 'khitāf al-'A'imma* (Bulāq 1300), p. 81; A. Querry, *Droit musulman*, i. 483—486. (TH. W. JUYNBOLL.)

KAFF (A.), a technical term in Arabic prosody. It means the dropping of the seventh, vowelless consonant of a foot, which ends with *sabab khafif* (see the article 'ARŪP, i. 463b). The following feet are liable to *kaff*: 1. *maf'ā'ilun*, provided that the *i* remains (> *maf'ā'ilu*); 2. *fā'ilātun* and *mustaf'ilun* (the latter in the *khafif*), provided that the next foot beginning with a *sabab khafif* does not suffer *khafn* (> *fā'ilātu*, *mustaf'ilu*). [In the last mentioned case four short syllables would follow in succession! Editor]. *Kaff* is therefore found in the metres *ṭawil*, *madid*, *ramal*, *khafif*, *hazaj* *muḡarī* and *muḡdithth*.

Bibliography: See the article 'ARŪP.

(MOH. BEN CHENEB.)

KAFFĀRA (A.), atonement, expiation, literally, what "covers" the sin. The *kaffāra* has usually to consist in releasing a Muslim slave or — for those who are not sufficiently well off — in a three days' (and in some cases even two months') fast or as a substitute — for those who are not able to fast — in bestowing food or clothes on a definite number of poor people (from 10 to 60).

In some cases the *Qur'ān* has already prescribed a definite *kaffāra* for the sinner, e. g. *Qur'ān* iv. 94, after killing by accident or by design, *Qur'ān* v. 91, to avert the evil consequence of breaking an oath, *Qur'ān* lviii. 4 sq., if a man by pronouncing the old Arab *ghīr* formula has sworn to refrain from all sexual intercourse with his wife.

These and many other cases (e. g. the breaking of the fast prescribed in the month of Ramaḡān by fornication or marital intercourse during the day) were afterwards more precisely defined by the *fakih's* and fully described in the *fiqh* books of the different *madhhab's*.

KAFĪL. [See KAFĀLA.]

KĀFIR (A.), originally "obliterating, covering", then, "concealing benefits received" = "ungrateful"; this meaning is found even in the old Arab poetry and in the *Qur'ān*, *Sūra* xxvi. 18. In the *Qur'ān* the word is used with reference to God: "concealing God's blessings" = "ungrateful to God", see *Sūra* xvi. 57 and xxx. 33: "That they are ungrateful for our gifts"; cf. also *Sūra*, xvi. 85. The next development — probably under

the influence of the Syriac and Aramaic where the corresponding development took place earlier — is the more general meaning of "infidel" which is first found in Sūra lxxiv. 10 and is henceforth very common; plural *kāfirūn* or *kuffār*, once (Sūra lxxx. 42) *kafara*. The term is first applied to the unbelieving Meccans, who endeavour to refute and revile the Prophet: Sūra l. 2 and elsewhere. The subject of incredulity is sometimes more nearly defined with added *bi-*, e. g. Sūra xxxiv. 33: "We do not believe in your mission"; Sūra vi. 89. In the early Meccan period a waiting attitude towards the unbelievers is still recommended (Sūra lxxxvi. 17; lxxiii. 10 *sq.*; see also Sūra cix. entitled *al-Kāfirūn*), but later the Muslims are ordered to keep apart from them (Sūra iii. 114, also 27), to defend themselves from their attacks and even to take the offensive against them (Sūra ii. 186 and elsewhere). In most passages the reference is to unbelievers in general, who are threatened with God's punishment and Hell (cf. the article DJAHANNAM).

In the literature of Tradition also the *ḥadīths* — with minute elaboration in details — deal partly with the fate of the *kāfir* on the day of judgement and his punishment in hell, and partly with the believer's attitude towards him. For the rest they reflect the great controversy in early Islām on the question whether a Muslim should be considered a *kāfir* for committing a "major sin" (cf. al-Bukhārī, *Kit. al-Īmān*, Bāb 22). Thus we find *ḥadīths* such as: "If a Muslim charges a fellow Muslim with *kufr*, he is himself a *kāfir*, if the accusation should prove untrue"; or "The reproach of *kufr* is equivalent to murder" etc. Nevertheless, *kāfir* in theological polemics is a fairly frequent term for the Muslim protagonist of the opposite view.

Eternal damnation for the *kāfir*, has remained an established dogma in Islām. In the dogmatic controversies of the early centuries the reasons were discussed for which a Muslim could be identical with a *kāfir* and have to suffer eternal punishment. The most tolerant is the view of the Murdji'a that all the Ahl al-Kibla, even if they commit a mortal sin (*kabīra*) are to be considered believers and their ultimate fate is to be left to God. The most striking contrast to this is the strict view of Khāridjīs (and Ibādis) that every Muslim, who dies with a mortal sin — and this means with them every sin which has not been repented of — on his conscience, is to be considered just a *kāfir*. Intermediate is the opinion of the Mu'tazila, who for this special case assume an intermediate between believer and unbeliever, the so-called "rejected" *fāsik* (cf. the article ĪMĀN. — According to Nallino, in the *Riv. degli Studi orientali*, vii. 436 *sqq.*, the names Mu'tazila, Murdji'a, etc. [q. v.] are probably closely connected with their attitude on this point).

According to the *Lisān al-ʿArab*, vi. 459 *sq.*, the following kinds of unbelief are distinguished 1) *kufr al-inkār* = neither recognising nor acknowledging God; 2) *kufr al-djūhūd* = recognising God, but not acknowledging Him with words, that is remaining an unbeliever in spite of one's better knowledge; 3) *kufr al-mu'ānada* = recognising God and acknowledging Him with words but remaining an unbeliever (obdurate) out of envy or hatred; 4) *kufr al-nifāk* = outwardly acknowledging, but at heart not recognising God

and thus remaining an unbeliever, that is being an hypocrite [cf. MUNĀFIK].

In the systematic Fikḥ books the *kuffār* are discussed in the following passages: 1) in the *Kitāb al-Ṭahāra*. For the opinion deduced from Sūra ix. 28 that the unbeliever is unclean, we find all views represented, from the strictest to the most tolerant; just as on all questions of purity, the strictest is the Shī'a which reckons the unbeliever among its *dah nadjāsāt*; but on this point al-Nawawī, for example, was particularly lenient; he considers the believer and unbeliever equal as regards purity. The Ahl al-Kitāb [q. v.] are usually regarded more leniently than other *Kuffār*; for their benefit for example the questions of the *ḥabā'ih* and of *munākaha* with Muslims are discussed. — 2) In the *Kitāb al-Djihād* (*wa 'l-Siyar*). The *djihād* [q. v.] against the unbeliever inhabitants of the *Dār al-Ḥarb* [q. v.] is a *farḍ 'ala 'l-kifāya*. The Ahl al-Kitāb again occupy a special position as by paying *djizya* and *ḥharādj* [q. v.] they become *dhimmī's* [see DHIMMA] and can receive *amān*. [q. v.]. These categories of unbelievers in the *Dār al-Islām* called *dhimmī* and *musta'min* have a legal claim to protection. Another class also distinguished from the mass of the *kāfirūn* are the renegades [see MURTADD] for whom the law prescribes death, with the opportunity first of obeying a demand to return to Islām. The others, the unbelievers proper, who in this sense are also called *kāfirūn aṣliyyūn* (or *mushrikūn*, in the narrower sense) have only to expect death or slavery [see 'ABD] if they fall as prisoners of war into the hands of Muslims; if they are fortunate, they may be exchanged or released. (In many cases, e. g. in the gradual advance of Islām into Africa, the distinction between renegades and pagans was difficult to ascertain and there are writings extant which deal specially with this question, cf. Ibn Ḥadjar al-Haitamī, *al-I'lām bi Ḳawā'ir al-Islām*, lith. 1293). — 3) In several further points the law discriminates between *kuffār* and believers; the very strict interpretation of the law is however in practice only held by a small minority.

To understand the historical development in the attitude of Islām to the unbeliever, it should be observed that it was settled in the early centuries not so much by religious as by political and social conditions. Even down to the time of the Crusades there prevailed in Islām a tolerance towards the unbeliever, especially the Ahl al-Kitāb, such as is impossible to imagine in contemporary Christendom. We find for example Christians in the highest official positions. In this early period there is no question of any religious fanaticism towards unbelievers. It was only aroused and nourished by the repeated wars with unbelievers (Crusades, wars with the Turks). War-psychology, on the other hand, at the time of the wars between Persia and Turkey could even bring it about that the Persians were called *kuffār* in Turkish *fetwās* etc. (see Pečewī, i. 311, 319), a name which the Turks themselves had applied to them in the proclamations of the Mahdī of the Sūdān.

Since at the present day the trend of affairs has apparently been quite in the opposite direction, and Muslims have been more and more impeded in carrying out measures against the *kuffār* by the political decline of Islām and the rise of unbelieving nations (pressure of the Powers, capitulations, etc.), the very feeling of impotence in face

of these facts may have contributed not a little to the strengthening of hatred and to periodical manifestations of it (in massacres etc.). This also explains the grotesque caricature of the *kāfir*, which one sometimes finds in the popular imagination at the present day (see Snouck Hurgronje, *Mekka*, ii. 48 sq.) and which is connected with the ideas of the Arch-Kāfir, Dajdjal [q. v.] who bears *k-f-r* on his forehead (cf. Goldziher, in *Der Islām*, xi. 178).

It may also be due to the hatred of the Franks (and to dogmatic squabbles) that *kāfir* had developed into a term of abuse, so frequent in the Turkish form *gıawur* (the Persian *geber* [q. v.] is said to be the same), although in theory it is (*Zeitschr. d. Deutsch. Morg. Gesellsch.*, lviii. 562) affirmed that the Muslim commits a punishable offence if he says to the Christian or Jew: "Thou unbeliever". From the Turkish the word *kāfir* has entered into most Slavonic languages. The Spanish *cafie* and the French *cafard* also go back to *kāfir* or *kuffār*. In two cases *kāfir* has actually become a proper name, the name of a people, the Kafirs, and of a country, Kāfiristān [q. v.].

Kāfir and *kufir* underwent a special development of meaning in the terminology of mysticism. Compare, for example, the well-known verse of Abū Sa'īd [q. v.]: "So long as belief and unbelief are not perfectly equal, no man can be a true Muslim", with the various explanations given in Muḥammad A'lā, *Dict. of Technical Terms* (ed. Sprenger, etc.), s. v., according to one of which *kufir* is just the equivalent of *imān-i ḥakīkī*.

(W. BJÖRCKMAN.)

KĀFİRISTĀN. The name of a mountainous tract in the Hindū-Kush situated between 35° and 36° N. and 70° and 71° 50' E., with an area of about 5000 sq. m. Till recently independent, but since 1896 a territory of Afghānistān. The northern boundary is roughly the watershed between the drainage of the Oxus and that of the Indus, the valleys to the north being occupied by Ghālča [q. v.] tribes. To the west the spur of the Hindu-Kush which runs southward from the neighbourhood of the Khāwak Pass may be considered the boundary separating it from the Pandjshīr and Nidjraō valleys. To the east and south the range between the Kunar and Bashgal valleys and those to the north of the Kunar and Kābul valleys define its limits. The country consists of numerous valleys much isolated from each other by lofty ranges, the principal rivers draining which fall either into the Kābul or Kunar rivers, and so belong to the Indus basin. The principal are the Alingār or Kāo with its tributary the Alishang, the Pēč (Kāmāh or Prēsun) and the Bashgal. The inhabitants, from their persistent paganism, have long been known as Kāfirs, and from them the name of the country Kāfiristān is derived. The name Siyāh-pōsh or "Black-clad" which properly belongs to one section only, (the others being classed together as Safed-pōsh or "White-clad") has also been in use from an early period.

This tract was undoubtedly part of the Kushān kingdom in the early part of the Christian era, and has been identified with the mountain country of Kāpiśa. The name Katōr applied to the country and its ruling tribe by Timūr (Timūr) is identical with the title of the rulers of the neighbouring country of Čitrāl, and is no doubt the same as Katīr, the name of the principal tribe at the present day. It is most probably derived from the title Kidāra used by the later Kushāns. It has been thought by Wood and Yule that the wine-drinking tribes whom Marco Polo met near Casem (i. e. Kishm in the Kōkča valley) are identical with the Kāfirs, who may have at that time extended into the northern valleys of the Hindu-kush, but the first definite mention of them is in the Emperor Timūr's memoirs. On his way to invade India in 800 (1398) he turned aside into their country from the Khāwak Pass to punish them for their raids on Andarāb. He calls them Katōr and Siyāh-pōsh. In spite of his claims to victory it is clear that a great part of his forces was destroyed in an ambuscade, and he returned to Khāwak without any permanent success. Bābur in his autobiography gives a very accurate account of the country and people, many of the rivers and districts being described by names they still bear.

In more recent times Elphinstone from his observations in 1809, Masson (in 1826) and Biddulph (in 1880) collected all the information available without entering the country, and the account given by the first-named is especially valuable. The first European to penetrate Kāfiristān was Lockhart in 1885, followed by Robertson in 1889 and 1890. The last named in his work on the Kāfirs of the Hindu-Kush has given the best account available of the country and people, their customs, beliefs and organization.

In the treaty of 1893 between the Indian Government and Afghānistān, Kāfiristān was definitely left outside the British border, and the Amir 'Abd al-Rahmān proceeded in 1896 to conquer the whole and to convert its population forcibly to Islām. The Rāmgali tribe, a branch of the Katir, was the last to submit. Robertson classifies the population under two heads, viz. the Siyāh-pōsh tribes all closely related to each other (the principal tribe being the Katir), and the miscellaneous tribes, without any special bond of union, included under the name of Safēd-pōsh. The chief of these are the Waigalis (with the Ashkun who are related to them), and the Prēsungalis or Vērōn. All seem to belong to an ancient branch of the Aryan stock, and their languages are of the Pisāča family, which, according to Kuhn and Grierson, have the characteristics of a tongue spoken after the Indian family had branched off, but before the Iranian had been differentiated. The purest dialects are the Bashgali, Wai-alā and Vērōn, spoken in the central parts of the country. The Gawar-bati, Kalāshā and Pashai form an outer group; the Pashai in fact being spoken in the Djalālabād valley outside the limits of Kāfiristān proper. There is also another member of the group Ashkund, as to which nothing is as yet known.

The form of paganism followed till lately was much mixed with animism, but there were certain principal gods generally recognized, the chief of which were Imrā, the creator, whose principal shrine was at Prēsungal, Monī, the prophet, Gish the war-god and the goddess Dizanē. In the borderlands however many districts had already accepted Islām before the Afghān conquest. These converts were known as Shaikhḥs. Sacrifices of goats and ceremonial dances were very prevalent.

The social system is entirely tribal, each tribe consisting of several clans. The tribal government is carried on by a council composed mainly of the headmen or *djast* who represent the various clans. A number of *urir* or magistrates are elected annually to carry on the actual tribal government. The houses are well built and grouped into strong villages. The Kāfirs generally are acute and clever, but untruthful, intriguing and vain, yet they are hospitable and not generally cruel. They are brave and fond of freedom, and in their own country show a great sense of dignity; very quarrelsome, but always ready to put a stop to fights among others. Theft and assassination are not in any way condemned. Slavery is prevalent, the slaves being partly hereditary and partly obtained by capture in intertribal war or by purchase.

Cordier (London 1903), i. 155, 165; Elphinstone, *Caulbul*, 2nd ed. London, 1839—1842; Biddulph, *Tribes of the Hindoo Koosh*, Calcutta 1880; Masson, *Travels in Afghanistan*, London 1844; G. S. Robertson, *The Kāfirs of the Hindu-Kush*, 2nd ed., London 1900. (M. LONGWORTH DAMES.)

KĀFIYA (A.), a term in prosody meaning rhyme generally. The word seems (according to Goldziher, *Abhandl. zur Arab. Philologie*, i. 83 sqq.) to have originally meant a poetic utterance or a lampoon, then a poem and finally a rhyme. The theory of the *kāfiya* is considered a special science, distinct from *'arūd* (prosody proper). It teaches how verses should end as regards consonants, vowels, etc.

In the narrower sense, *kāfiya*, according to al-Khalil b. Aḥmad [q. v.], is the group of consonants, which begins with the vowelled consonant immediately preceding the last two quiescent consonants of a verse. In the Arab view, of course, a verse ends always with a quiescent letter, whether written or not (the latter is the case with *wāw* and *yā'* of prolongation when they are written defectively): *yaf'al*, *yaf'ali*, *yaf'ali*, *yaf'ala*.

The *kāfiya* may include up to six consonants: 1. the principal one (in the Arab view), the *rawī* or rhyme-letter, the letter which the poet always retains at the end of the line, till he has ended his poem and after which the latter is called: *lām* in the *mu'allaka* of Imru' al-Kais, *dāl* in that of Tarafa, etc. It is to be noted that Arabic poems are all mono-rhymed with the exception of the *radjaz muzdawij*, in which the two hemistichs in a line rhyme. According to some prosodists, it is the rule to allow the two first hemistichs of a poem to rhyme; 2. as an annex to the *rawī*, the *waṣl* or *ṣila*, i. e. a letter of prolongation or a *hā'* (vowelled or not) coming after the vowelled *rawī*; of the letters of prolongation, *alif* is the only one usually written in this capacity; 3. as a possible further complement, the *khurūdj*, the letter of prolongation behind a vowelled *hā'* serving as a *waṣl*; as a preliminary either 4. the *ridf*, the weak letter or letter of prolongation immediately before the *rawī*; *wāw* and *yā'* may interchange with each other in one and the same poem; or 5. *ta'sis*, an *alif*, placed before the *rawī* and separated from it by a consonant (*dakhīl*) which may be changed at will but must always have the same vowel; 6. the *dakhīl* just mentioned.

The *kāfiya* may likewise include up to six vowels: 1. *madjra* or *muḍjra*, the vowel of the *rawī*; 2. *nafādh*, the vowel of the *hā'* if it serves as *waṣl*; 3. *tawdjih*, the vowel before the quiescent *rawī*; 4. *hadhw*, the vowel immediately before the *ridf*; 5. *ishbā'*, the vowel of the *dakhīl*; 6. *rass*, the vowel immediately before the *alif* of the *ta'sis* (always a *o* of course).

In respect of lengths, five kinds of rhyme are distinguished, viz.: — 1. *mutakāwis*, in which the two last quiescent consonants (which, as explained above, mark the beginning and end of the *kāfiya*) are separated by four vowelled consonants: *faw-[ka ḥadamih]*; 2. *mutarākib*, in which three vowelled consonants stand between the two quiescent: *'alā [djabali]y*; 3. *mutadārik*, in which two vowelled consonants separate the two unwowelled: *ḥad [fa'al]*; 4. *mutawātir*, in which there is one vowelled consonant between the two quiescent: *bā[li]y*; 5. *mutarādif*, in which the two quiescent consonants come in immediate succession: *[āl]*.

Finally we have still to note the faults in the

kāfiya: 1. *ikwā*, the substitution of a *ḍamma* for a *kasra* as *maḍjirā*; 2. *isrāf* or *isrāf*, the substitution of a *fatḥa* serving as *maḍjirā* for a *kasra* or *ḍamma*; 3. *ikfā*, the use of similar sounding consonants as *rawī* (*mim* and *nūn*, *ḥā* and *khā*, etc.); 4. *idjāsa* which consists in using consonants of essentially different sound as *rawī* (*bā* and *rā*, *kāf* and *lām*, etc.); 5. *taḥrīd*, the changing of the *darb* (the last foot in the second hemistich) in one and the same poem; 6. *īḥā*, the repetition of one and the same word in the same meaning as a rhyme-word in the same poem; 7. *sinād*, a mistake which occurs before the *rawī*, namely a) *sinād al-ḥadḥw*, changing of the vowel, which precedes the *ridf*; b) *sinād al-ishḥā*, changing of the vowel between *rawī* and *dakhil*; c) *sinād al-tawdīh*, changing of the vowel immediately before the quiescent *rawī*; d) *sinād al-ridf*, the use of *ridf* in one line but not in the other lines; e) *sinād al-tāsis*, the use of *tāsis* in one line but not in the others; 8. *taḍmīn* or the running of one line into another, in such a way that the end of one line only gives complete sense when we know the beginning of the next verse.

In conclusion it should be noted that it was considered the rule in reciting a poem to lengthen the vowel of the vowelled *rawī*; but this custom was not generally observed. The Banū Tamīm added a quiescent *nūn* to the *maḍjirā* in place of the *waṣl*. Among the Banū Asad the *maḍjirā* was suppressed. Otherwise it was permitted, when a strong quiescent consonant preceded the *rawī*, to transfer to it the vowel of the *rawī* which itself then became quiescent: *fa'lū* > *fa'ul*. Finally, it often happened that, if the *rawī* was quiescent, it was given a *kasra* which was followed by a quiescent *nūn*: *fa'al* > *fa'alīn*.

(MOH. BEN CHENEB.)

KAFĪZ, an Arab measure of capacity (dry measure) containing from 25—50 litres (5—10 gallons). In the pre-Islāmic period the use of measures of capacity with dry and liquid wares was in general use, as is shown by the usually Arabic names for these measures in contrast to the measures of weight and their names borrowed from the Greeks and Romans. It has still long been the custom to measure these wares by their weight and not by their volume. East and west in this respect have undergone opposite developments. This transition from measures to weights was furthered, on the one hand, by the easier supervision of market business done by weight and, on the other, by the experience early obtained that it is not a matter of indifference whether very large or very small measures are used to measure dry wares. As the weight of the upper layers appreciably compresses the lower, the result is that, other things being equal, larger quantities weigh more per unit of capacity than small quantities. The table of measures of capacity commonly used in the early period is given below. The ratios show that it is not homogeneous. The greatest variations prevail in the theoretical lists of measures; the figures quoted below which — presupposing distilled water at normal temperature etc. — mean so many kilogrammes in weight, are based on an original measure of one *mudd* of the year 571 (1175/6) in the Cairo Museum, which,

according to its inscription, held 337 *dirham kail* of pure water. The measures usual in the early centuries of the Hidjra seem however to have been smaller ranging down to the half of the figures here given.

Measures of capacity or dry measure:

<i>mudd</i> (modius)	1	1.15 litres
<i>ṣā'</i>	4	1.6 "
<i>makkūk</i>	6. 1½	6.87 "
<i>ḥafiz</i>	48. 12. 8. 1	55.0 "

Two avoirdupois weights were tacked on to this system:

<i>waṣḥ</i>	240. 60. 40. 5. 1	275.0 kg.
<i>kurr</i>	1440. 360. 240. 30. 6. 1	1650.0 "

That these measures of capacity are not entirely forgotten is probably due to the fact that they have been retained in the legal literature. They have disappeared from the market-place, at least in the East. In the lands round the Western Mediterranean the *ḥafiz* has however survived down to the present day, e. g. in Tunis, in Sicily (*cafiso* and *cafisone*, a measure of weight for oil, 11—20 kg.) and in Spain (*cahiz*, plur. *cahices*, a measure for grain of about 6.6 hectolitre) etc.

KAFTĀN (Turkish form of the Persian *khafṭān*, which is found in the *Shāhnāma* — cf. 'Abd al-Kādir Baghdādī, *Lughat-i Shāhnāma*, ed. by Salemann under the title 'Abdulqādir Baghdādensis *Lexicon Shāhnāmianum*, p. 79 — and Asadī's *Lughat-i Furs*, ed. P. Horn, p. 99; also Arabic *khafṭān*), was an upper garment worn in peace time, a kind of long tunic with sleeves, which in time of war was worn over the mail-shirt (tabard). This word as well as the article of dress came quite early among the Arabs under the influence of Persian fashions. Cf. al-Ṭabarī ed. de Goeje, iii. 236, 14 sqq.; 'Arib, p. 177; al-Mas'ūdī (Paris ed.), viii. 52. — Travellers describe the *khafṭān* as a long robe, reaching below the knee, sometimes to the calves and sometimes down to the ankles, open in front and having sleeves, which were slit at the wrists or up to the middle of the arms. This garment was introduced into the Barbary States by the Turkish conquest and spread by fashion as far as Morocco (Höst, *Nachrichten von Marokko und Fes*, Copenhagen 1781, p. 115) where it is sometimes found, especially among women, without sleeves (Lempriere, *A Tour to Morocco*, London 1791, p. 385). The amirs and *shāikhs* of the Syrian Bedouins in d'Arvieux's time wore the *kaftān* as a winter garment (d'Arvieux, *Voyage dans la Palestine*, Paris 1717, p. 206). — Among the Ottoman Turks in earlier days *kaftān* was also the name for a robe of honour, which, — less important than the sable-skin —, was granted on the occasion of appointment to an office. The distribution of such robes of honour took place after the two Bairam [q. v.] festivals in the presence of the Grand Vizier under

the direction of the *kaftāndī bashī*, an official whose duty it was to take charge of and keep in condition the fur-robcs of honour. At the present day this garment seems to be very little worn. Hamdibey and Marie de Launay, *Les Costumes populaires de la Turquie en 1873* (Constantinople 1873) only mention it (p. 238) when describing a Kurdish woman from Kharput: A kaftān of fine dark green cloth, open in front and widely cut out in the form of an escutcheon on the breast, leaves the upper part of the shirt quite exposed and does not entirely cover the lower half. . . . The very long sleeves of the kaftān ending in a quadrangular piece are taken in above the wrists so as not to conceal the silver armlets. The sleeves are edged with galloon and notched gold lace.

KĀFÜR (also KĀFÜR and KĀFFÜR, cf. *Liṣān al-ʿArab*, s. v. *Kfr* and *Kfr*; in Sanskrit *Karpūra*, in Prakrit **Kappūra*, **kāpūra*, Malay *kapur*), camphor, the resin of *Laurus camphora* and *Dryobalanops aromatica*, was an object of commerce with India from the days of the ancient Persians; on the capture of al-Mada'in, the Arabs found rich stores of this drug, the use of which they did not know; they took it for salt (al-Balādhuri, ed. de Goeje, p. 264; Ibn al-Athīr, ed. Tornberg, ii. 401). Ibn al-Baitār mentions different sorts of camphor, of which *fanṣūrī* and *riyāḥī* were considered the best; all these kinds were purified before being used. Marco Polo (ed. Soc. de Géogr., Paris 1865, i. 447; transl. Yule, revised by H. Cordier, London, 1903, ii. 299 and note 3, p. 302—4) says the camphor of Fansur was the best and most expensive; it was said to be weighed against gold. Fanṣūr — most probably an old name for Barus (cf. *Tijdschr. van het Kon. Nederl. Aardrijkskundig Genootschap*, Series 2, xvii., 1904, p. 18—22, 27—29; *Encycl. van Nederl.-Indië*², i. 172 sq.) on the west coast of Sumatra (Residency of Tapanuli) from which the *kapur Barus* came — is frequently mentioned by Arab writers; from the first half of the third (ninth) century we find the name in different historico-geographical reports as the place of origin of an exceptional quality of camphor.

The name of this resin is also found in the *Kurʾān* (lxvi. 5): "The righteous shall drink there (in Paradise) out of a goblet, the contents of which are mixed with *kāfur*"; according to the Muslim commentators, either to indicate the pleasant flavour of the beverage or perhaps as the name of a spring in Paradise (al-Ṭabarī, *Tafsīr*, Cairo 1321, xxix. 111 sq.). The latter explanation is based on the fact that at the beginning of verse 6 the word 'ain (spring) is found.

(CL. HUART.)

KĀFÜR, ABU ʿL-MISK AL-IKḤSHĪDĪ, also AL-LATHĪ or AL-SURĪ, called AL-LĀBĪ in a poem by al-Mutanabbī after a place in Nubia, ruler of Egypt and Syria in the fourth century of the Hidjra. Kāfur was born in Nubia or Abyssinia between the years 291 (904) and 308 (320) (so greatly do the statements of the chronicles vary). The fact that he began life as a horribly ugly slave and rose to be ruler of Egypt and Syria and the celebrated patron of scholars and friend of al-Mutanabbī [q. v.], the greatest poet of his time, has aroused a great interest in him among the Arab historians and given him a greater fame than his importance really deserves. As the Maecenas of poets and scholars, he found kindly biographers who have praised him as a model of fidelity for his devotion — not always maintained — to the Ikḥshidids [q. v.]. His biography is adorned with numerous anecdotes about his humble origin and his rise and about his friendship with al-Mutanabbī. He is only of importance in history because he resisted the advance of the Fātimids [q. v.] in the west and of the Arab dynasties in North Syria and maintained by his ability for two decades the kingdom founded by the Ikḥshidids in 323 (935). After his death it soon broke up. As a young slave he is said to have expressed the ambitious wish to become one day ruler of Egypt, to a companion who had said his ideal was to become cook in a cookshop so that he might always eat his fill. As a slave he had the good fortune to be sold to the governor Muḥammad al-Ikḥshid (323—334 = 935—946); that he was almost immediately given away by him on account of a skin disease and again taken back, may well be an embellishment, to contrast his degradation with his all the more marvellous rise. Another narrator says that he was sent with money by his former master to the governor al-Ikḥshid but the latter sent the money back and retained Kāfur in his service instead. It is also related that he was the only one to remain by his master when his comrades had negligently left the governor's room to see a passing elephant. Both these stories only show that the governor had on some occasion had his attention specially attracted to him. He must certainly have early recognised his merit and put trust in him, for he made this ugly, despised slave the tutor of his children and a general. In the latter capacity he distinguished himself in 329 (940) in a battle near Aleppo which he captured for his master. When al-Ikḥshid felt his end was near at the close of 334 (July 946), he appointed him guardian of his younger son Awnudjūr (the name is very diversely written) whom the Caliph had previously appointed joint-ruler with his father. The real power remained in Kāfur's hands even after Awnudjūr became of age, although he provided for the preservation of the Ikḥshidid dynasty by getting Awnudjūr's brother ʿAlī recognised as joint-ruler and successor in 338 (949). Later in 343 (854) Awnudjūr, at the instigation of his friends, tried to shake of the tutelage of Kāfur, as he felt himself restricted in his freedom of action and expenditure — he only received 400,000 dinārs out of Kāfur's rich revenues. He therefore

went to Ramla in Palestine in order to be able from there to exert real authority over Syria and then on Egypt. But the plan did not come to fulfilment, as his mother and Kāfūr, warned in time, were able to appease him. The relationship remained unchanged till Awnudjur died in Dhu 'l-Ka'da 349 (Dec. 960). After the death of Awnudjur, Kāfūr had his brother 'Alī confirmed in office as governor by the Caliph towards the end of the year. Kāfūr remained his guardian, although 'Alī was 24, and only allowed him an income of 400,000 dinārs. The power of Egypt was again extended over Syria, so that 'Alī was mentioned next to the Caliph in the Friday service in Aleppo and northwards as far as Tarsūs. When 'Aḥ died six years later in 355 (966), Kāfūr himself assumed the government and was confirmed in office by the Caliph, as 'Alī's son Aḥmad was only 9 years old. He did not enjoy his independence long, for he died in 357 (968). His successor was the Aḥmad whom he had superseded.

Kāfūr was able to maintain order in Syria and Egypt. Shortly after the death of al-Ikḥshid, he recaptured from Saif al-Dawla, ruler of Aleppo, Damascus which the latter had taken. Kāfūr was able skilfully to maintain his position between the Baghdad Caliph and the Fāṭimid ruler of North Africa. His riches were celebrated; his estate consisted of art-treasures of all kinds rather than of gold. He was a man who loved pomp; like Saif al-Dawla, exceedingly liberal to scholars and poets, so that his court was a popular one and his favour sought. When al-Mutanabbī became estranged from Saif al-Dawla, he came on Kāfūr's invitation to Cairo, where he lived for some years. In the first period of his stay there he composed famous panegyrics on Kāfūr; but the intimacy did not last long, as Kāfūr did not give him a position in the administration which he is alleged to have promised him. He excused himself by saying that he could not trust an office to a man who had posed as a prophet. Kāfūr also devoted much time to scholarly studies and is said to have written poetry. Many scholars were in his service, of whom the best known is al-Kindī who composed a history of Egypt for him.

(M. SOBERNHEIM.)

KĀGHAD, **KĀGHID** (from the Persian *kāghadh*, perhaps of Chinese origin), paper. In the early period of development of Muslim culture the east was only acquainted with papyrus (*kīrḫās*) as writing-material. It was Chinese prisoners of war brought to Samarkand after the battle of Aṭlakh near Tālās, that first introduced in 134 (751) the industry of paper-making from linen, flax or hemp rags after the method used in China. The various kinds of

paper then made are the following: *fīr'awnī* (Pharoah's paper), a kind which was destined to compete with papyrus even in the land of its origin (the oldest paper with Arabic writing on it found in Egypt dates from 180—200 = 796—815); *sulaimānī*, from Sulaimān b. Rāshid, the treasurer of Khorāsān under Hārūn al-Rashid; *djā'fari*, called after Dja'far al-Barmakī; *ṭalḥī*, from Ṭalḥa b. Ṭāhir, the second ruler of the Ṭāhirid dynasty; *ṭāhirī*, from Ṭāhir ii., of the same dynasty; *nūḥī*, in allusion to the Sāmānid Nūḥ I.

Paper mills were erected elsewhere on the plan of those in Samarkand: al-Faḍl, brother of Dja'far al-Barmakī, who had been governor of Khorāsān in 178 (794) probably founded the paper-mill in the Dār al-Ḳazz quarter in Baghdad. Soon afterwards others arose in Tihāma, Yemen and Egypt, where paper ultimately drove out papyrus, also in Damascus, Tripoli, Ḥamā, Manbidj, Tiberias, the Maghrib, Spain (at Xativa), Persia and India. *Kāghadh-kunān*, the "paper-makers", was the name taken by the people of the village of Khūnadj or Khūnā in Adharbaidjān, two days' journey from Zandjān, on account of the excellent paper made there. The place was destroyed by the Mongols, who however founded a colony, Mughuliya, there. (Barbier de Meynard, *Dict. de la Perse*, p. 219; Hādjdjī Khalifa, *Djihānnūmā*, Constantinople 1145, p. 298; transl. by Norberg, i. 365).

On the preparation of paper and the different methods of colouring it, interesting details are given by J. v. Karabacek, *Neue Quellen z. Papiergeschichte in Mitt. aus der Samml. der Papyrus Erzhr. Rainer*, iv. 75 sqq.

According to a statement of al-Makrizī (*al-Khiṭaṭ*, ed. Wiet, ii. 34), Dja'far al-Barmakī had parchment replaced by paper in the government offices.

The paper used in the east is now almost entirely of European manufacture. In Persia we still find a Chinese paper, called *Khān Balīk* (Turkish name of Pekin), a scarce paper, sought after for its durability. The Cairo printers prefer a strong yellow-coloured paper called *nabātī* (Pers. *nabāt*, sugar-candy).

A paper-mill long ago destroyed (*Kāghad-Khāna*, popularly *K'at-Hāne*) has given its name to the Imperial Kiosk and the public promenade of the "Sweet Waters of Europe" in Constantinople.

KAHF, Title of Sūra xviii. of the *Qur'ān*. — See also **ASHĀB AL-KAHF**.

AL-KĀHHĀR, one of the names Allāh, cf. **ALLĀH**, i. 303a.

KĀHIN (A., plur. *kūhān* or *kahana*; fem. *kāhina*, plur. *kawāhin*, abstract of profession *kīhāna*) is the name of the seer or soothsayer (μαντις, vates) among the pagan Arabs. It corresponds to the Hebrew *kōhen*, Aramaic, *kāhen*, *kāhnā* (priest); it is not an arabicised form of this however, but belongs to the original stock of the old Arabic

language (otherwise Nöldeke, *Neue Beiträge zur semitischen Sprachwissenschaft*, p. 36, note 6), for the Jewish kōhen, kāhen is entirely different in character from the Arab kāhin: the former, although in all probability at one time also a soothsayer, later appears only as a dealer in oracles and particularly as sacrificer and teacher of the Tora, while it cannot be shown that the latter, who is never a priest (which is contradictory to von Kremer — see below in the *Bibliography* — p. 74 sqq., and also to Wellhausen, p. 134 and elsewhere), ever held these functions, neither was he permanently connected at all with worship and places of worship, but seems to have been quite unrestricted in the exercise of his activities.

The kāhins of course have their origin in the shamans, medicine-men, and fetish-priests, but in the form in which we first meet them in the old Arabic tales, in the Ḥadīth and, much more rarely, in the pre-Islāmic poetry, they have already passed beyond the ruder forms of shamanism. Their mantic knowledge is based on ecstatic inspiration. They have also, it is true, visions by night which reveal to them future and other events and things hidden from the ordinary mortal (al-Mas'ūdī, iii. 379, 394 sq.; Sprenger, i. 176 sq. etc.), but they are not really visionaries. Their inspiration is of demoniacal origin: a *ḡinnī* or *shaitān* "demon" (δαίμωνιον) who is called their *tābī'* "companion", *sāhib* "comrade", *mawla* or *walī*, "friend" ("familiar spirit"), not infrequently also their *ra'i* or *ri'i* (probably "seer"), speaks out of them. This personification of their ecstasy, which at once stamps them as connected with the old fashioned *shā'ir* "bard" (literally "knower"), also endowed by ḡjinns with supernatural, magic knowledge (cf. *vates* = *poeta*), is conceived as being so substantial that the *dæmonion* regularly appears as the I — his *alter ego*, the kāhin, on the other hand, appears as the "thou" of the prophetic utterance, that the latter clearly notices the approach of the spirit, feels himself struck by his foot, hears his voice from a distance etc. (Sprenger, *loc. cit.*; Hölscher, p. 85), indeed, these familiars even have their own names (like the familiar spirits of the poets, see Yāqūt, *Mu'djam*, ed. Wüstenfeld, iv. 914, 14 sq. and al-Djāhiz, vi. 69 = van Vloten, viii. 65). The kāhins give their utterances in the form of the *sadq'*, short sentences in rhythmic prose, with single or more rarely alternating rhyme, such as had been usual in Arabia from early times for all utterance in the higher and lower branches of divination and magic, etc. (Only very rarely is regular verse also used, e. g. *Aghānī*¹, xi. 161, 13). Besides the *sadq'*, the *zamsama* is characteristic of the kāhin's utterances, the mysterious "humming" with which it was delivered (Ibn Hishām, *Sira*, i. 171, 7 and thereon ii. 58). The word *sadq'* may in this sense have originally meant nothing more than the "purring" or "chirping" or such like of an alleged demon's voice; the verb *sadja'a* is also used in other connections of "purring" or "chirping" of the ḡjinns, regularly of course, of the "cooing" of pigeons and also of the "groaning" of camels; cf. in the O. T. e. g. *Isaiah*, xxix. 4). The kāhins, the majority of whom are to be considered frauds, of course often express themselves in very obscure and ambiguous language. They give greater emphasis to their utterance by striking oaths, swearing by the earth and sky, sun, moon and stars, light and darkness, evening and morning, plants and animals of all kinds etc.

(For kāhins' utterances, see e. g. Hölscher, p. 87 sq., 95 sqq.; al-Mas'ūdī, iii. 387 sqq.; al-Ibshihī, Ch. 60; *Aghānī*, xi. 161, 10 sqq.).

Kāhins play an extremely important part in public as well as private life. They are interrogated in all important tribal and state occasions — especially before warlike enterprises, *razzias*, etc. in which they take part themselves as a rule, indeed, they sometimes lead them in person (cf. Deborah in the O. T.). Kings and queens therefore keep their prophet or prophetess (D. H. Müller, *Die Burgen und Schlösser Südarabiens nach dem Ikhl des Hamdānī*, i. 74, and al-Ṭabarī, ed. de Goeje, i. 762, 5), and the tribes have a kāhin or kāhina as well as a *shā'ir* "poet" and *khaṭīb* "orator". In private the kāhins especially act as judges in disputes and points of law of all kinds, so that the conception of *kāhin* is closely connected with that of *hakam* "judge" (al-Ḥuṭai'a, No. xvii. 7; al-Ibshihī, Cairo 1321, ii. 73, 1). Their decision is considered as a kind of divine judgment against which there is no appeal. At the same time they interpret dreams, find lost camels, establish adulteries, clear up other crimes and misdemeanours, particularly thefts and murders, etc. In these proceedings they descend to a somewhat lower scale of divination, viz. to that of the *'arrāf* or *mu'arrif* (see above i. 460b and cf. Ibn al-Athīr, *al-Nihāya*, iv. 40, al-Djāhiz, vi. 62, 5 *infra*, and al-Mas'ūdī, iii. 352). For such work they received an honorarium — forbidden in the Ḥadīth — (*ḥulwān*; al-Bukhārī, ed. Krehl-Juynboll, ii. 43, 55 *et passim*). Of course, people liked to test their mantic abilities before paying them.

The influence of these men and women was naturally great and often stretched far beyond the bounds of their tribes. They were not by any means recruited solely from the lower strata of society, but sometimes belonged to most distinguished families, occasionally even the *saiyid* or chief of a tribe was also its *kāhin* (Lammens, p. 204, 257; al-Djāhiz, vi. 62 = van Vloten, vii. 184; also Wellhausen, p. 134 who, however, says wrongly that such aristocratic kāhins had inherited their office). They were in any case among the leaders or the intellectual aristocracy of their tribe (cf. the chapter *Asmā' al-kuhhān wa 'l-hukhām wa 'l-khuṭabā' wa 'l-ʿulamā' min Kaḥṭān* "The names of the seers, judges, orators and learned men of Kaḥṭān" in al-Djāhiz, *al-Bayān*, i. 136 *infra*, cf. also 113, 15 sqq., ed. Cairo 1333, i. 192, cf. 159).

Among famous soothsayers of both sexes were Saṭīḥ al-Dhi'bī in Syria and Shikḥ b. Ṣa'b of the Badjila, (who often appear together but are both quite mythical), the probably equally unhistorical Yemen princess Ṭuraifa, a kind of Cassandra, al-Ma'mūr al-Ḥārithī of the Madhḥidj, 'Amr b. Dju'aid al-Afkal, the chief of the Rabī'a, Sawda' bint Zuhra among the Kuraish, Zarkā bint Zuhair among the Qudā'a, etc. (Wellhausen, p. 136; al-Mas'ūdī, iii. 352, 364 *et passim*; van Vloten, vii. 172, 174, 180 etc., etc.). The South Arabian soothsayers enjoyed a particularly high reputation (*Aghānī*, viii. 51, 4).

Practically synonymous with *kāhin* is the word *ḥāzī* (plur. *ḥāzāt*, also *ḥāza* and *ḥāzūn*, fem. *ḥāziya*, plur. *ḥawāzī*), which is not uncommonly found. It corresponds of course to the Hebrew *ḥōzē*, but is undoubtedly also a genuine Arabic word. On the other hand, we must sharply distinguish from the

kāhin, who, as above explained, owes his supernatural knowledge to internal inspiration, these practitioners of the lower forms of divination and magic, who employ external, technical means that is, who follow a mere routine that may be acquired by any one, namely the *ʿāṣif* or *zāḡir* who watches the flight of birds, the *ḡāṣif*, *ḡāzīr* and *ḡazzār*, who reads footprints, the *ʿarrāf* or *muʿarrif* (see also above on these terms), the water-diviner, the *munadjjim*, the astrologer, *al-nāḡir fī asrār al-kaff* or hand-reader, the *khāṭṭ* who tells fortunes from lines on the ground, *al-dārib* or *al-fārik bi ʿl-ḡāṣa*, who works by casting stones, the enchanter, *sāḡir* or *rāḡi*. These too are sometimes called *kāhin*, but only by an erroneous use of the word, which probably only came into vogue when Islām had put an end to the higher art of the soothsayer, *kihāna*, while external divination and magic survived. I should like here, again to insist (against Wellhausen, p. 134 and elsewhere) that the *kāhin* was not, like the Jewish *kōhen*, also supplier of oracles. It is especially noteworthy that we never find him in connection with divination by arrow (*istiḡṣām*).

The prophet Muḡammad disclaimed being a *kāhin* (Sūra lii. 29, lxix. 42; also passages like lxxi. 22 sqq.). But his earliest appearance as a prophet reminds us strongly of the manner of these soothsayers. He was an ecstatic and had "true dreams" like them; his *daimonion* (*ṡāḡib*) was the (holy) spirit, whose place was later taken by the angel Gabriel. His revelations are, like the utterance of the *kāhin*, comprised in *saḡṡ* and sometimes begin with the usual abstruse oaths; even the forms which he was still using for administering justice and settling disputes in Medīna during the early years of his stay there correspond in their main features to those of the pagan *kāhin* and *ḡakam*.

It is therefore not surprising that his Meccan countrymen regarded him as a *kāhin* and that his protestations that he was nothing of the kind, but a "prophet", a "messenger of God" made little impression on them. The anti-prophets also, Musalima, ʿṡalaiḡa, and particularly al-Aswad al-Anṡī, no less than Saḡḡāḡ, a lady member of the faculty, played their parts in the guise of *kāhins*.

Islām with its monotheism, its doctrine of the cessation of all revelation with Muḡammad and its regulation of all social customs through the *fiḡh* wiped out the old soothsayers, only gradually, it is true, for we still hear in 132 A. H. of a *kāhin* (al-ṡabari, iii. 21, 9; on *kahana* in modern Arabia, see Landberg, *La langue arabe et ses dialectes*, p. 70; on woman seers in Muslim N. W. Africa, see Doutté, p. 32 sqq.). Muḡammad himself probably never doubted the supernatural nature of the *kāhin*'s utterance. But when he declared the knowledge possessed by the demons, whom he at the same time degraded to devils, to have been stolen from heaven and to be falsified and confused (Sūra lxxii. 8 sqq., xxxiv. 13, vi. 112; Ibn Hishām, *Sīra*, i. 131 sq.), he brought their prophecies into great disrepute, and thus those traditions arose, which warned believers against utilising the services of a *kāhin* (al-Suyūṡī, *al-Djāmiʿ aṡ-ṡaḡḡir*, sub *man atā kāhinan*; al-Bukḡārī, ii. 43, 55, et *passim*; cf. also the remark of Ibn ʿAbbās *iyāḡum wa ʿl-kihāna* etc. in al-Zamakhshari's *Kashshāf*, on Sūra xxxi. 34).

AL-KĀHINA, the prophetess, the seer. Even her name (Damyā, Dihya) — for Kāhina is simply an epithet — is doubtful. According to Ibn Khaldūn, she belonged to the *Djarwa*, a Jewish(?) tribe in the Awrās [q. v.], which gave chiefs to the Berbers descended from al-Abtar. When ḡassān b. al-Nuʿmān [q. v.], had conquered the Byzantines, he advanced against the Awrās where the Kāhina reigned. The latter inflicted a heavy defeat on him at Miskiyāna (between ʿAin Baiḡā and Tebessa in the modern department of Constantine) or according to other authorities, in the Gabes territory or at the Oasis of Nini, and drove him back beyond the frontier of Ifriḡiya. The difficulties in which his wars in the east had involved the caliph ʿAbd al-Malik, delayed the despatch of reinforcements. During this period the Kāhina is said to have extended her sway over the whole country, and to prevent the Arabs from making new inroads, she destroyed the towns, cut down the forests and laid the country waste. At the same time she is said to have adopted as a son a prisoner named Khālīd b. Yazīd al-Kaisī with whom she claimed foster-kinship, which, however, did not prevent her adopted son from afterwards betraying her. Her devastations estranged the people from her and when five years later ḡassān b. al-Nuʿmān returned with reinforcements, the Kāhina was defeated in a fierce battle at ṡabarḡa (82 or 84 = 701 or 703) and killed in the Awrās at the place called Bir al-Kāhina. By her advice two of her sons had gone over to the Arabs before the battle and even received commands in the Muslim army, which continued the war against the Berbers. In reality we do not even know for certain whether the Kāhina was a queen or simply an inspired woman like Lalla Fāṡima, who was the soul of the resistance of the Kabyls against the French in 1857. Almost all that is told of her is legendary, the voluntary devastation of North Africa, her defence in the castle of el-Djem (the amphitheatre of Thysdrus) and the circumstances of her death. A

Berber genealogist, Hānī³ b. Bakūr, even says that she ruled for 65 years and was 137 years old.

(RENÉ BASSET.)

AL-KĀHIR BI 'LLĀH, ABŪ MANṢŪR MUḤAMMAD B. AL-MU'TADID, 'Abbāsīd Caliph. While his brother al-Muḥtadīr was still reigning he was proclaimed Caliph under the name al-Kāhir, but was deposed again in a few days. After the death of al-Muḥtadīr the Amīr al-Umarā' Mu'nis proposed al-Muḥtadīr's son Aḥmad, afterwards the Caliph al-Rāḍī as successor; instead of him, however, al-Kāhir at the age of 35 was proclaimed Commander of the Faithful (end of Shawwāl 320 = Nov. 1, 932). Although he wished to be regarded as devout and just, his treacherous and despotic nature was soon revealed. Through torture the mother of al-Muḥtadīr was forced to give up her whole fortune, and al-Kāhir also extorted considerable sums from the sons and officials of the late Caliph. On the advice of the vizier Ibn Muḥla [q. v.] Mu'nis had the Caliph carefully watched, which naturally did not please the latter, and when he was intending to dismiss Ibn Muḥla, the latter conspired with several others to overthrow al-Kāhir and put Abū Aḥmad, son of al-Muḥtadīr, in his place. But the plot was betrayed. While Ibn Muḥla escaped by flight, Mu'nis was dismissed and when he went to the Caliph, the latter had him arrested and some time afterwards executed. Abū Aḥmad was built into a wall, alive. Ibn Muḥla, however, did not cease in his efforts to incite the populace against al-Kāhir and in Djumādā i. 322 (April 934) an armed crowd broke into the palace. The half-intoxicated Caliph had to surrender; but when he refused to abdicate, he was blinded and thrown into prison. Eleven years later al-Mustakfi restored him to liberty and he lived as a beggar till his death in Djumādā i. 339 (Oct. 950).

AL-KĀHIRA. [See CAIRO.]

QAHRAMĀN-NĀMA (or DĀSTĀN-I QAHRAMĀN), a Persian epic in prose, which, like the *Dārāb-Nāma*, *Qirān-i Ḥabashī*, *Hūshang-Nāma*, *Faghfur-Nāma*, *Ṭahmūrāth-Nāma* etc. belongs as regards subject matter to the prose epics which form a cycle round Firdawsī's *Shāh-Nāma*; like the two first named it is ascribed to Abū Ṭāhir Ṭarṭūsī [Ṭarsūsī, q. v.].

The epic which takes us back to the days of the Old Iranian ruler Hūshang and describes the exploits of the hero Qāhramān called Qātil, the "slayer", has attained some importance in the popular literature of the Turks. Among them the very diffuse Persian version occupying eight books is compressed into one volume. The historical background is an effectively developed picture of the struggle between Islām and the Indian fire-worshippers. The legendary and fictitious however occupies a considerable space. In parts the Turkish version with its mixture of prose and poetry shows the favourite technique of the popular chivalrous romances and ballads. In it we also find many burlesque features which remind us very much of the *meddāh* tales and their humorous situations. In many passages the secondary figure of the cunning, sly and covetous paladin, Gerdēn-Keshān entirely overshadows the main hero Qāhramān. His foolish pugnacity is proverbial; cf. Bākī's *Divān* (lith. Constantinople 1256), p. 37 (*kaṣīda* 1).

The substance of the epic is briefly as follows. Qāhramān, son of the Persian king Ṭahmāsp, is carried off when three years old by a *diw* and educated as one of their own children by other *diws* on the mountain Kāf [q. v.]. His cousin and next successor to the throne, Qahtarasp, voluntarily renounces his claim to the throne of Irān after Ṭahmāsp had died prematurely from grief at the loss of his only son, and becomes a paladin in the service of Hūshang, who is chosen Shāh. Through the whole epic runs the idea, freely proclaimed, that heroism is better than a kingdom, for the king's throne is supported by the sword of the hero.

When Hūshang sets out to conquer India, he meets Qāhramān, who has now grown up into a hero of terrible valour, has escaped from the *diw*, and well armed, is going around as a free lance on the search for home and adventure. In his arrogance and boldness he becomes involved in a series of severe duels with Hūshang's heroes, in all of which he is victorious, until finally his identity is established by Qahtarān. He thereupon readily pays homage to Hūshang and goes to India with him as one of his paladins. There they succeed, after much fighting and many vicissitudes, in taking the capital by a cunning coup, in which the king of the Indians is killed.

Qāhramān to whom the principal exploits fall, mounted on a six-footed, four-eyed, unicorn sea-monster that he has tamed, wins by his heroism as a bride the daughter of the Indian ruler, who has taken part in the fighting, unconquered and

invincible (Amazon episodes are found also elsewhere in the epic). But Kaḥramān has to set out soon again to save the mother of Bahrām, another of Hūshang's heroes, from the power of a *diw* in the inaccessible crystal mountain. He succeeds in gaining the talisman of king Kārūn, in liberating his bride, who in the meanwhile had been carried off, and in freeing Bahrām's mother. Returning to Persia, he marries the Indian princess and remains in the service of Hūshang's successor, Shāh Tahmūrāth.

KAHRUBĀ or **KAHRABĀ** is our amber; the Persian word means attracter or robber of straw. Usually, as in al-Kaẓwīnī, its peculiar quality is attributed to it without further note; Ibn al-Kabir, however, observes that it attracts straw quickly and strongly, when it is slightly rubbed. This attraction is used poetically as a metaphor for the attraction of lovers to each other.

Amber was brought partly from the Baltic lands of Bulghār in the region of Kasan and was considered to be the resin of the Greek nut, and partly from Spain. Al-Ghāfiḳī, who mentions both kinds, notes that it encloses flies, straw, etc.

Ornaments of amber from the earlier period have not survived in the east; al-Washshā', however, mentions specimens of yellow amber worn as ornaments by women, and the alchemist al-Djildakī signs engraved in amber as talismans. In modern times beads of rosaries and cigar-holders are made of it. It has always been in frequent use as a medicine. Just as we derive the word electricity from *electron* so the Orientals do *kahrabā'īya* from *kahrabā*. Amber is frequently confused with *sandarūs*, which, according to al-Anṭākī, attracts rubbed straw. On the other hand, we find the difference between them emphasized.

(E. WIEDEMANN.)

KAḤṬABA B. **SHABĪB** AL-ṬĀ'Ī, an Arab general. We find Kaḥṭaba, whose real name was Ziyād, mentioned as early as the year 100 (718/719) among the twelve chiefs of the 'Abbāsīd faction in Khorāsān, who are said to have been chosen by the Kufan emissary Abū 'Ikrima al-Sarrādj to further

the 'Abbāsīd cause. When the long prepared revolution broke out in the summer of 129 (747), Kaḥṭaba was in Mecca to which he had gone in order during the pilgrimage to meet in person the leader of the 'Abbāsīds, Ibrāhīm b. Muḥammad [q. v.]. He did not return to Khorāsān till 130 (747/748) after Ibrāhīm had appointed him his general. Abū Muslim [q. v.] gave him the supreme command in the war against the Umayyads and he defeated Tamīm b. Naṣr, son of the Umayyad governor of Khorāsān, Naṣr b. Saiyār, at Ṭūs. Tamīm fell in the battle and Naṣr had to evacuate Nisābūr and flee to Djurdjān. When the governor of the 'Irāk, Yazid b. 'Omar b. Hubaira, sent an army under Nubāta b. Ḥanzala al-Kilābī to Djurdjān, Kaḥṭaba took the field against him; on Dhū l-Hiǧdja 1, 130 (Aug. 1, 748) Nubāta was defeated and slain, and Naṣr again took to flight with the object of making his way to Hamadhān, but died on the way in Rabi' i, 131 (Nov. 748). Kaḥṭaba then turned his attention to the west. While his son Ḥasan was besieging Nihāwand, where the remnants of Naṣr's army from Khorāsān had united with the governor of Hamadhān's Syrian troops who had fled from there, Kaḥṭaba gave battle on Raǧab 23, 131 (March 18, 749) at Djabalk near Iṣfahān to 'Amir b. Duḅāra al-Murri who was coming with a large Syrian army. The latter fell in the conflict. After Kaḥṭaba had joined his son, the siege of Nihāwand was continued with vigour, and after several months the Syrian garrison capitulated, while their comrades from Khorāsān, who did not know of the capitulation, were all cut to pieces. Thereupon Kaḥṭaba marched against Kūfa via Ḥulwān and Khāniḳīn, sending his son in advance by the direct route. Ibn Hubaira advanced to meet him with a strong army, but Kaḥṭaba succeeded in evading him and in passing the Tigris unscathed, and then camped near Anḅār. When Ibn Hubaira followed him and pitched his camp at Fām Furāt Bādāqlā on the east bank of the Euphrates, Kaḥṭaba crossed the river and marched along the west bank to a place opposite the enemy camp. In the night of Muḥarram 8, 132 (Aug. 27, 749) he crossed the river again with a small body of men and surprised Ibn Hubaira who had to seek safety in flight. In the confusion of the fighting, Kaḥṭaba disappeared completely; whether he was drowned or killed in the fight must be left undecided.

Bibliography: al-Yaḳūbī, ed. Houtsma, ii. 392, 398 sq., 410—412; al-Ṭabarī, ed. de Goeje, ii. 1358, 1727, 1769, 1916, 1951, 1953, 1962, 1964, 1988, 2000—2006, 2016, iii. 1—9, 12—19; Ibn al-Aṭhīr, ed. (K. V. ZETTERSTÉEN.)

KAḤṬĀN is regarded by the Arabs of the Muhammadan epoch as the "father of (all) Yemen" (Ibn Hishām, *Sira*, i. 4; al-Mas'ūdī, *Murūǧ al-Dhahab*, Paris 1861—77, i. 79; *Die auf Südarabien bezüglichen Angaben Naṣwān's im Sams al-'Ulūm*, ed. by 'Azimuddīn Aḥmad, p. 83 *et passim*) i. e. as the ancestor of all South Arabians, who therefore are usually described comprehensively as "Banū Kaḥṭān", "Kaḅā'il Kaḥṭān" or briefly "Kaḥṭān", when not called simply "Yemenis". Kaḥṭān is thus contrasted with 'Adnān, the symbol of ethnological unity of all the

North Arabians. In this we find agreement not only among the Arab scholars, genealogists, historians, geographers, etc. (cf. e. g. Wüstenfeld, *Genealog. Tabellen der arab. Stämme u. Familien*, and the *Register* and Reiske, *Primae lineae historiae regnorum arabicorum*, ed. Wüstenfeld, p. 132 sqq.) but also in the ideas of the people, as they are still to be found in Arabia (see Doughty, *Travels in Arabia Deserta*, i. 282) and as found at an earlier period notably in the poetry (see Abū Ḥanīfa al-Dīnawarī, *al-Aḫbār al-tīwāl*, p. 348; al-Ṭabarī, ed. de Goeje, i. 1087, also ii. 1672, 1985; al-Mas'ūdī, *op. cit.*, ii. 142; do., *al-Tanbih wa 'l-Ishrāf* = *Bibl. Geogr. Arab.*, viii. 109, etc. etc.; in the statements, that reflect popular opinions, we indeed find as the counterpart of Kaḥṭān usually not 'Adnān but his fictitious son Ma'add, e. g. Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 281; al-Ṭabarī, *op. cit.*, ii. 1056, 1084; and al-Mas'ūdī, *al-Tanbih*, p. 88, or his imaginary grandson Nizār, e. g. al-Mas'ūdī, *Murūdj*, v. 223, vi. 42 sq., 46, 143, 150, and Ibn al-Aṭhīr, *al-Kāmil*, ed. Tornberg, iv. 273, or even his imaginary great-grandsons Muḍar and Rabī'a, e. g. al-Ṭabarī, *op. cit.*, ii. 1969 *infra*, 1985 sq. Arabic sources usually give Kaḥṭān the following ancestry 'Ābar (not 'Ābir, see e. g. *Ḳāmūs*, s. v.) — Shālakh (or Shālāḥ) — Arfakhshadh (or Arfakhshad) — Sām — Nūḥ; they also give him a brother, Fālagh. (The line Kaḥṭān b. Fālagh b. 'Ābar b. Shālakh etc. in al-Ṭabarī, *op. cit.*, iii. 2400, and al-Dīmashqī, *Nukhbāt al-Dahr*, ed. Mehren, p. 249, 252 is obviously due merely to a slip). These names are of course simply arabicised forms of the Old Testament names 'Ēṣār (Eber) — Shālāḥ (Shelah) — Arpaxshad (Arphaxad) — Shēm (Shem) — Nōah (Noah) and Pālāy (Peleg) *Genesis* x. and i. *Chron.* i. Kaḥṭān is therefore identical with the O. T. Yoḳṭān (Ἰεκταν), son of Eber and brother of Peleg and ancestor of various South Arabian peoples (*Genesis* x. 25 sqq., and i. *Chron.* i. 19 sqq.); Yoḳṭān, probably to be taken as meaning the "smaller", the "younger", i. e. as compared with his brother Peleg, might be a mere ethnological invention with the object of connecting the Arabs with the Hebrews). The Arab genealogists, etc. are quite positive on their identity; they constantly assert: "Yaḳṭān (more rarely Yaḳṭān) is Kaḥṭān" (e. g. al-Mas'ūdī, *al-Tanbih*, p. 31; do. *Murūdj*, iii. 143; Ibn al-Aṭhīr, *op. cit.*, i. 57, *Tādī al-Arūs*, sub *ḳḥṭ*; see also Doughty, *op. cit.*, i. 229; Yaḳṭān, it is true, appears occasionally through confusion as the brother or son of Kaḥṭān, so Ibn Kuṭaiba, *al-Ma'ārīf*, ed. Wüstenfeld, p. 14; al-Mas'ūdī, *Murūdj*, i. 79 sq.; *Tādī al-Arūs*, *loc. cit.*, and al-Ṭabarī, *op. cit.*, i. 217). Indeed, several Arab scholars even assert — and on this they agree with von Kremer, *Altarabische Gedichte über die Volkssage von Jemen*, p. 7 sq. — that Kaḥṭān is only an arabicised form of Yoḳṭān (al-Mas'ūdī, *Murūdj*, iii. 143 and *Tādī al-Arūs*, *loc. cit.*). But Yoḳṭān could not possibly become Kaḥṭān by any phonological laws. The equation Yoḳṭān = Kaḥṭān has in all probability rather come to be made because some old Arab — probably a Yemenī — genealogist quite arbitrarily, simply from a certain similarity of the names, identified the Biblical Yoḳṭān with an actually existing South Arabian tribe Kaḥṭān, so that by this artifice, the Yemenīs might be linked up to the Biblical genealogical system, which reaches back to Adam, in the same way as had been

done with the North Arabians under the influence of the Qur'ān and the Bible by tracing 'Adnān back to Ishmael, the son of Abraham (see e. g. Ibn Hishām, *op. cit.*, p. 3 sq.; al-Ṭabarī, *op. cit.*, i. 1113 sq.; etc., etc.). Such a tribe of Kaḥṭān, which would surely have been of a certain degree of importance, cannot actually be proved with certainty to have existed in pre-Muhammadian Arabia. But it seems to me to be at least not impossible that the *Karavīrai* of Ptolemy (*Geogr.*, vi. 7, 20, 23) are to be explained as "Kaḥṭānites" (as Knobel has already done, *Die Völkertafel der Genesis*, p. 185, and more recently Moritz in Pauly's *Real-encycl. der klass. Altertumswiss.*, new edition, s. v. *Katanitai*) and not as Katanites" (as von Kremer, *op. cit.*, p. 8, Sprenger, *Die alte Geographie Arabiens*, p. 207 and Glaser, *Skizze der Gesch. u. Geographie Arabiens*, ii. 283, 423). The fact, that of the two or more tribes of Kaṭān in question none could have been important enough to be known outside of Arabia, seems to me to be against the latter interpretation. The town of Kaḥṭān (between Zabīd and Ṣan'ā') mentioned by al-Muḳaddasī, *Aḥsan al-Taḳāsim*, 2nd ed. = *Bibl. Geogr. Arab.*, iii. 87, 94 seems also to point to an old South Arabian tribe of Kaḥṭān (cf. also the Āl Kaḥṭān mentioned there p. 104 and described as the "oldest princes of Yemen"). Finally, it is not at all improbable that the beginnings of the modern clan Kaḥṭān (see below) reach back to the pre-Muhammadian period.

The great tribal confederation of the Kaḥṭān fell — in the Muhammadian period at least — into two groups, the smaller of the Ḥimyar and the larger of the Kahlān, whom the official genealogy put together as brothers and traced their descent from Kaḥṭān by the following line: Ya'rub — Yaḥdjub — Saba' — Ḥimyar + Kahlān (Wüstenfeld, *Tabellen*, i; al-Mas'ūdī, *al-Tanbih*, p. 80, 6 etc.; other lists, the first of them in connection with *Genesis*, x. 26 sqq., are given in Ibn 'Abd Rabbihi, *al-Iḳd al-farīd*, Cairo 1305, ii. 57). In the genealogical table in *Genesis*, Saba' (Sheṣā') appears as a son of Yoḳṭān. Why the Arab genealogists have inserted Ya'rub and Yaḥdjub between Kaḥṭān and Saba' (and the two are also found, but in the reverse order, in the genealogy of 'Adnān, as grandson and great-grandson or as great-grandson and great-great-grandson of Ismā'il; see Ibn Hishām, *op. cit.*, p. 3 and al-Mas'ūdī, *al-Tanbih*, p. 80), is a question that can hardly be answered with certainty. The Ḥimyar [q. v.], the epigones of the Minaean, Sabaeen and Ḥimyarite kingdom, were presumably for the most part settled, while the Kahlān may have for the most part been nomads or half-nomads; cf. the expressions: "the Ḥimyar and the Arabs among the Yemenīs", "the Ḥimyar and the clans (*ḥabā'il*) of Yemen" and similar expressions in Landberg, *Arabica*, v. 116 sqq. The numerous South Arabian tribes which we find in Muḥammad's time in most different parts of Northern Arabia and even in Syria and the 'Irāk belong principally to the Kahlān.

The Kaḥṭān and the Ma'add were apparently separated even in the pre-Muhammadian period by a racial hatred, perhaps originally mainly based on the opposition between the desert and the sown. This enmity was intensified by the repeated raids of the Yemenīs into the lands of the Ishmaelites [see above, i. 373] as well as later by the anta-

gonism between the Anṣār (Medinites) and the Quraysh, which came to a head after the death of the Prophet and influenced the history of the first two centuries of Islam in the most baneful fashion. It was perhaps this feud that first linked the Yemeni tribes on the one side and the Ishmaelite on the other into closer ethnological unities. One of its more innocuous results was the *muṣāḥara*, the struggle for rank and glory, which continually prevailed between the two antipodes (cf. e. g. al-Mas'ūdī, *Murūj*, vi. 136, ii. 142 etc.). The Kahtān, in view of the splendour of the ancient South Arabian kingdoms, had the more right at first to feel the more distinguished. But Islam with the mission of Muḥammad and the primacy of the Quraysh brought the Ma'add a tremendous superiority. The Yemenis endeavoured to counterbalance this in the most different ways. First of all they created an entirely romantic South Arabian saga, which pictured their past greatness in the most splendid colours (see below in the *Bibliography*). They then made Kahtān son of the Prophet Hūd [q. v.], known from the Qur'ān, whom they next partly identified with 'Ādār (Nashwān, *al-Ḥaṣida al-Hijriyya*, ed. von Kremer, p. 4; *Die auf Südarabien bezüglichen Angaben Nabataen's*, p. 83; al-Ya'qūbī, *Tarīkh*, ed. Houtsma, i. 220; Ibn 'Abd Rabbihi, *op. cit.*, ii. 57; al-Mas'ūdī, *al-Tamīh*, p. 81; Doughty, *op. cit.*, ii. 37, etc.). They then tried to connect themselves with the 'Adnān genealogy: perhaps by partly making the ancient Djuhim [q. v.], the brothers-in-law of Ismā'īl, to be direct descendants of Kahtān (Ibn Hishām, *op. cit.*, p. 4; Abu Ḥanīfa al-Dinawarī, *op. cit.*, p. 9; Ibn 'Abd Rabbihi, *op. cit.*, ii. 57; al-Mas'ūdī, *al-Tamīh*, p. 185; Abu 'l-Fida', *Mukhtasar Tarīkh al-Sulṭān*, partly edited by Fleischer as *Historia Anteislamica*, p. 130, etc.), but especially by the fact that some of their genealogists gave Kahtān a genealogy direct from Ismā'īl, who thus became "father of all the Arabs" (Ibn Hishām, *op. cit.*, p. 5; al-Ṭabarī, *op. cit.*, iii. 2400; al-Mas'ūdī, *Murūj*, iii. 142; do., *al-Tamīh*, p. 81; al-Dinashīrī, *op. cit.*, p. 246, 252; al-Sam'ānī, *al-Ansīb*, f. 443b, etc.). They may be also responsible for the theory that the Kahtān, together with the 'Ād [q. v.], Ṭhamūd, Ṭasm, Imlik (Amalek, see *Amalik*), Hjadis [q. v.], etc., the so-called "lost Arabs" (*al-'Arab al-ḥāḍira*) represent the genuine (primary) Arabs (*al-'Arab al-ʿarība* or *al-'arīb* etc.), while the Ma'add on the other hand are "arabicised (secondary) Arabs" (*al-'Arab al-muṣawwiba*; cf. on this theory, as well as on the other, according to which only the 'Ād, Ṭhamūd, etc., are 'Arab 'arība, the Kahtān on the contrary 'Arab muṣawwiba and the Ma'add 'Arab muṣawwiba, Lane, *Lexicon*, sub *al-'Arab*; Knobel, *op. cit.*, p. 179 sq.; al-Ṭabarī, *op. cit.*, i. 215; al-Mas'ūdī, *al-Tamīh*, p. 188; also above i. 372b sq.). Finally, we may here mention the eschatological ḥadīth of South Arabian origin, which prophesies the rule in time to come of a noble, pious Kahtānid; see Muṭahhar b. Ṭahir al-Maḍīnī, *al-Bad' wa 'l-Tarīkh*, ed. Huart, ii. 183 sq., and Snouck Hurgonje, *Der Mahdi*, p. 12 (= *Verspreide Geschriften*, i. 156).

The native lexicons (*Lisān al-'Arab*, *Qāmūs*, and *Taḥḍīr al-'Arūs*, sub *ḥḥ*) give two nisbas from Kahtān, both "good Arabic": *Ḥaḥḥānī* and the remarkable form *Aḥḥānī*. A tribe Kahtān (more accurately Ghaṭān, sing. Ghaṭānī, plur. Ghaṭānī)

still exists, as was briefly mentioned above. It is exclusively Beduin and pitches its tents in the desert on the eastern borders of the northern Yemen and of the southern Hijaḥ (roughly between 18° and 23° N. Lat.); but little bodies of them penetrate in the summer far into the Nejd, as far as Washm, and even to the province of Kaṣīm. It is very numerous, rich in cattle and powerful, and also very proud as the "noblest blood of the South Arabians". Its nobility seems, however, to find expression primarily in a fanatical savagery and villainous cruelty, unparalleled elsewhere even among the sons of Arabia's deserts.

A clan, Kahtān, has also survived down to the present day (see i. 373b).

(A. Fischer)

QAHWA, an Arabic word of uncertain etymology, which is the basis of the usual words for coffee in various languages. Originally a name for wine, found already in the old poetry (see

Landberg, *Etudes*, ii. 1057 and *al-Aghānī*, 1st ed., vi. 110, 7; viii. 79, 16, xx. 180, 3), this word was transferred towards the end of the viith (xvth) century in the Yemen to the beverage made from the berry of the coffee tree. The assumption of such a transference of meaning is, it is true, not accepted by some who consider *kahwa* — at least in the sense of coffee — as a word of African origin and seek to connect it with the alleged home of the coffee tree, Kaffa, although they also assume contamination with *kahwa* "wine" (see Ritter, *Erkunde*, xiii. 566; Vollers in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.* i. 657; *Hobson-Jobson*; Landberg, *op. cit.*, ii. 1057—66). On the other hand, it should be noted that the holders of this view do not prove that coffee was exported from Kaffa as early as 1400, and do not quote a similar word in the languages of Abyssinia and adjoining lands, while the usual word for coffee there (*būn* for tree, berry and beverage; see Ambruster, *Initia Amharica*, ii. Cambridge 1910, p. 58; Coulbeaux and Schreiber, *Dict. de la langue tigrāi*, Vienna 1915, p. 408; L. Reinisch, *Die Kafa-Sprache* etc., ii. in *Sitzungsber. der Kais. Akad. der Wiss. zu Wien*, phil.-hist. Cl., 1888, cxvi. 273; see also Landberg, *op. cit.*, ii. 1055 sq.) has passed in the form *bunn* (in rhyme also *bīn*) as a name of the tree and berry into Arabic. But as it is probable that the drinking of coffee spread in the Yemen out of Ṣūfī circles and a special significance was given to wine in the poetical language of the mystics, a transference of the poetic name for wine to the new beverage would not be at all impossible.

The coffee tree was not indigenous to South Arabia and was probably introduced from the highlands of Abyssinia, where it is found in profusion growing wild, notably in Kaffa. But there is no trace of authority for the assertion (Desfers and *Handbook of Arabia*) that the coffee tree was already introduced into Yemen in the period of the Abyssinian conquest and of the fall of the Ḥimyar kingdom, about a century before the Hijra. In this case the older literature would hardly have left it unnoticed.

The earliest mention of coffee so far found is in writings of the xth (xvth) century. According to (Aḥmad) Ibn 'Abd al-Ghaffār, quoted by 'Abd al-Kādir al-Djazīrī in his essay (see below, *Bibliography*), the popularity of *kahwa* as a beverage in the Yemen was first known in Cairo in the beginning of the xth (xvth) century. It was there taken especially in Ṣūfī circles, as it produced the necessary wakefulness for the nightly devotional exercises. According to this authority, it had been brought to 'Aden by the jurist Muḥammad b. Sa'īd al-Dhahbānī (died 875 = 1470/1) who had become acquainted with it during an involuntary stay on the African coast and on his return devoted himself to mysticism; and it soon became popular.

Another reference in al-Djazīrī, however, ascribes the introduction of the beverage to 'Alī b. 'Omar al-Shādhilī. Abu 'l-Ḥasan 'Alī b. 'Omar of the family of Da'sain died in 821 (1418) according to al-Shardjī. He also might have become acquainted with coffee in Abyssinia, for after entering the Shādhiliya order, he lived for a period in the entourage of the king Sa'īd al-Dīn (i. e. between 788 = 1386 and 805 or 807 = 1401/2 or 1404/5, cf. al-Makrizī, *al-Itmām bi-Akhbār man*

bi-Ard al-Ḥabash min Mulūk al-Islām, ed. Rineck, Leiden 1790, p. 24; Paulitschke, *Harar*, Leipzig 1888, p. 504 *infra*), who gave him his sister to wife. Even after he had founded his *zāwiya* in al-Makhā (to follow al-Shardjī) gifts continued to reach him from admirers in Abyssinia.

In the treatise by 'Abd al-Kādir (Ibn) al-'Aidārūs (see below, *Bibliography*) 'Alī b. 'Omar, the saint of al-Makhā, is alone mentioned as the introducer of the beverage *kahwa* (*muḥdith al-kahwa*, f. 341^b; *wāḍiḥā*, f. 347^b, in a verse by Shaikh b. 'Abd Allāh al-'Aidārūs, died 990 = 1582). His claim to fame is, it is true, qualified by the note "that, before he prepared the beverage, only the kernel of the husk i. e. the *bunn* was used and the husks were thrown on the dung-heaps (f. 342^a). In a verse attributed to him, however, he praises the *kahwat al-bunn* as a dispeller of sleep and aid to devotional exercises (f. 342^b). While al-Shardjī says not a word of his connection with coffee, 'Abd al-Kādir al-'Aidārūs numbers the introduction of the beverage among his miracles (*karāmāt*, f. 342^a).

The legend as given by Ḥādījī Khalifa seems to have made two individuals out of 'Alī b. 'Omar, of whom 'Alī represents the founder of the Shādhiliya order, Abu 'l-Ḥasan 'Alī b. 'Abd Allāh (d. 656 = 1258; see al-Shā'rānī, *Lawāḥiḥ al-Anwār*, Cairo 1299, ii. 5) and his disciple 'Omar the saint of al-Makhā (Mukhā). The latter was ordered to settle, by command of his teacher who had appeared to him at his own funeral, at the place where a wooden ball which he gave him should come to rest. This is how he came to Mukhā. On the charge of having miscondacted himself with the daughter of the king who was staying with him for a cure, he was banished into the mountains of Uṣāb (Wuṣāb, N. E. of Zabīd). He and his disciples, who followed him into exile, are said to have sustained themselves with *kahwa* (here the berry) and finally to have made a decoction from it. His visitors were cured of an itch, epidemic in Mukhā, by taking coffee and this procured the saint an honourable return.

The third person who is given credit for the introduction of coffee is Abū Bakr b. 'Abd Allāh al-'Aidārūs. The recent essay by 'Alawī al-Sakḥāf (see below, *Bibliography*) contains a statement from the *Tārīkh* of al-Nadīm al-Ghazzī (i. e. apparently *al-Kawākib al-sā'ira bi-Manāḥib 'Ulamā' al-Mī'a al-'āshira* by Nadīm al-Dīn al-Ghazzī, Brockelmann, *Gesch. der Arab. Litt.*, ii. 291 sq.), according to which this Ṣūfī, who is called here a Shādhilī, once came upon a coffee tree in his wanderings and ate the berries. As he noticed their stimulating effect he took them as a food and recommended them to his disciples so that they became known in different countries. The reference here is probably to the Ṣūfī of this name who died in 'Aden in 914 (1508—9) (Abū Makhrāma, Leiden MS. 1956, f. 188; al-Nabḥānī, *Djāmi' Karāmāt al-Awliyā'*, Cairo 1329, i. 263), whose grave is still honoured there. 'Abd al-Kādir (Ibn) al-'Aidārūs only mentions his fondness of coffee and quotes his *ḥaṣida* in praise of it. On the other hand, Abu 'l-Ḥasan Muḥammad al-Bakrī in his tractate *Iṣṭifā' al-Ṣafwa li-Tasfiyat al-Kahwa*, f. 2^b mentions Abū Bakr al-'Aidārūs as the introducer (*munshi'*) of the *kahwa*.

According to Glaser (*Mitt. der Geogr. Gesellsch. in Wien*, xxx. 25), it is stated in a Turkish source (which he does not give) that in the

xvth century the wālī Üzdemir (cf. Ahmed Rāshid, *Tārīkh*, i. 83 sqq.) transplanted coffee from Africa to Yemen.

This fact, that the merit of introducing coffee as a beverage is given to different individuals suggests that we have to deal with various local traditions. The tradition of Mukhā is the most firmly established and most widely known; therefore 'Alī b. 'Omar al-Shādhili — who is frequently confused with the founder of the Shādhiliya order (d'Ohsson, von Hammer, Rinn) — has become the patron saint of coffee-growers, coffee-house keepers and coffee-drinkers (cf. Goldziher, *Abhandl. zur arab. Philologie*, ii. p. lxxxviii). In Algeria coffee is also known as *shādiliye* after him (Beaussier, *Dict. pratique arabe-français*, Algiers 1871). He is popularly regarded as the founder of Mukhā, which is, however, already mentioned by al-Hamdānī (*Ṣifat Djaṣirat al-'Arab*, ed. D. H. Müller, p. 74, 16, 87, 5, 119, 18), although it owed its rise to coffee. A well, a gate and the mosque over his grave preserve the memory of al-Shādhili in Mukhā (Niebuhr, *Reisebeschreibung nach Arabien*, I, Kopenhagen 1774, 438—440; cf. also the legend in Ḥādjdī Khalifa, and 'Abd al-Karīm Kashmiri, *Bayān-i Wāḳi'*, French transl. by Langlès entitled *Voyage de l'Inde à la Mekke par Abdoul Kérym*, Paris 1797, p. 202 sq.).

Al-Shādhili and al-'Aidarūs (probably not Haidar, as de Sacy, *Chrest. Arabe*², i. 461 thinks) have become Christian monks named Sciadli and Aidrus in the legend given by Naironi. The motif of the camels or goats in which the enlivening effects of coffee were first noticed has so far not been found in Oriental sources. — According to a popular legend, the coffee tree shot up from goat's dung sown by the saint (Snouck Hurgronje, *The Atchinese*, Leiden 1906, i. 260).

The legends are probably correct in saying that the taking of coffee in Arabia first began among Yemeni Ṣūfis. They were particularly fond of the beverage because its effects facilitated the performance of their religious ceremonies. They therefore considered this as its original destination (*maḥḍū' aṣlī*) and found that it incited to good and hastened on the mystical raptures (*fath*) (*Ṣafwat al-Ṣafwa* f. 342b). The pious intention, with which it was taken, made the drinking of coffee a good work (*ḥaṣa*). It received a ceremonial character, being accompanied by the recitation of a so-called *rātīb*. This *rātīb* consisted in the repetition 116 times of the invocation *yā kawī*. This usage is based — apart from the similarity in sound between *kahwa* and *kawī* — on the fact that the numerical value of *kawī*, i. e. 116, is the same as that of *kawī*, i. e. *kawī*, "strong", one of the most beautiful names of Allāh [cf. above i. 303a]. According to Shaikh b. 'Abd Allāh al-'Aidarūs, the recitation of the *fātiha* [q. v.] should precede it. Shaikh b. Ismā'il Bā 'Alawī al-Shihr, however, prescribed the fourfold repetition of the Sūra *Yā-Sin* (Sūra XXXVI) with a hundred-fold *taṣliya* on the Prophet as *rātīb* (*Ṣafwat al-Ṣafwa*, f. 344b *infra* sq., 345b, 347a). Thus when taken with a righteous intention and devotion and genuine religious conviction, coffee-drinking leads to the enjoyment of the *kahwa ma'nawīya*, the "ideal *kahwa*", also called *kahwat al-ṣūfiya*, which is explained as "the enjoyment which the people of God (*Ahl Allāh*) feel in beholding the hidden mysteries and attain-

ing the wonderful disclosures (*mukāshafāt*) and the great revelations (*futūḥāt*)" (*op. cit.*, f. 341b, 345a *supra*, 345b *infra* sq.). — 'Alī b. 'Omar al-Shādhili is reported to have said that coffee, like the water of Zamzam, serves the purpose for which it is drunk (*op. cit.*, f. 348a, cf. above ii. 588a *infra*), and the saying has been handed down of Ahmad b. 'Alawī Bā Djaḥdab (d. 973 = 1565/66; cf. al-Nabbānī, *op. cit.*, i. 330) who in his last years is said to have lived on nothing but coffee: — "He who dies with some *kahwa* in his body enters not into hell-fire" (*Ṣafwat al-Ṣafwa*, f. 344b).

Coffee was probably not known as a beverage in South Arabia much earlier than the turn of the viiith (xivth) century. Whether the tree was introduced long before this is doubtful. Ibn Ḥadjar al-Haitamī [q. v.] speaks in his *Ṭ'ab* (commentary on *al-'Ubbā*, probably by 'Alī b. 'Omar al-Saifi; cf. Brockelmann, *op. cit.*, ii. 403 sq.) of a beverage which appeared (viz. in Mecca) shortly before the xth century A. H. (i. e. about the end of the xvth century) and was prepared from the husk of the *bunn*, a tree introduced from the region of Zaila', and called *kahwa* (quotation in 'Alawī al-Sakḥāf, p. 9). Among the jurists who gave an opinion in favour of coffee, the oldest is Djamāl al-Din Muḥammad b. Sa'īd b. 'Alī b. Muḥammad Kabbīn al-'Adanī (died in 'Aden 842 = 1438, cf. Abu Makhrama, f. 159b sq.; according to al-Nabbānī, *op. cit.*, i. 155 sq.: 829 = 1425/26).

An *ur-dūza* of Sharaf al-Din al-'Amriṭi gives the year 817 (1414/5) as the date at which coffee became domesticated in Mecca (Pertsch, *Die Arab. Handschr. zu Gotha*, iv. N^o. 2107). According to the 'Umdat al-Ṣafwa, however, the drinking of a decoction of coffee husks first appeared towards the end of the ixth (xvth) century, while previously only the eating of the fruit as a delicacy (*naḥl*) was known. The drinking of coffee dropped out of use again for a time, indeed, but it finally established itself and soon people drank coffee even in the sacred mosque and regarded it as a welcome tonic at *dhihr* and *maḥḍid*. Coffee-houses (*buyūt al-kahwa*) were soon opened, where men and women met to music or where they played chess or a similar game for a stake. This and the custom of handing round the coffee on the manner of wine naturally aroused the indignation of the "unco guid" of whom many had from the first set their faces against the beverage as an objectionable innovation. They found a champion in Khā'ir Bey, who was appointed chief of the police in Mecca in 917 (1511) by Kānṣūh [q. v.]. He carried through the proclamation of coffee as forbidden (*ḥarām*) in the same year, in an assembly of jurists of the different schools in which the unfavourable judgment of two well-known physicians and the evidence of a number of coffee-drinkers regarding its intoxicating and dangerous effects ultimately decided the issue. The *ḥādīs* signed the protocol of the assembly. Only the then mufti of Mecca dared to decline his co-operation and became therefore the object of coarse suspicions. By putting the questions in a clever way they were at the same time able to get an opinion condemning coffee from the faḳīhs of Cairo. The rescript which Kānṣūh issued in reply to the protocol sent to Cairo did not completely fulfil the hopes of the opponents of coffee as it contained no absolute interdiction but only allowed measures to be taken

against any concomitant features contrary to religion. Ibn Ḥadjar al-Haitamī, as late as about 950 (1543), had a vigorous discussion, at a wedding feast (*walimat ʿurs*) where coffee was offered to the guests, on the new beverage with a prominent mufti, who declared it intoxicating and forbidden. Ibn Ḥadjar refers to the assembly above mentioned and cannot find words strong enough to condemn its decision and the manner in which it was reached (*Safwat al-Ṣafwa*, f. 352^b — 356^a, quotation from the *Muʿdjam Mashāʾikhihi*).

In accordance with this verdict, Khāʾir Bey forbade the taking and sale of coffee and had a number of vendors punished and their stocks burned, so that coffee husks (*kishr*) disappeared from the market. But Kānshūh's rescript again gave the coffee-drinkers courage and when in the next year one of the leading opponents of coffee was subjected to disciplinary punishment by a high official from Egypt and Khāʾir Bey was replaced by a successor who was not averse to coffee, they were again able to enjoy with impunity the beverage, to which these measures had only attracted the attention of wider circles. Only occasionally do we still read of action being taken against disgraceful proceedings in coffee-houses. An edict forbidding coffee issued by the Sultan of Turkey during the Ḥadjdī in 950 (1544) was hardly respected at all.

In Cairo coffee was first made known in the first decade of the xth (xvth) century in the Azhar quarter by Ṣūfis from Yemen, who held their *dhiḳr*'s in the mosque with their companions in opinion from Mekka and Madīna while partaking of coffee. After it had been publicly sold and drunk there for a time, the faḳīh Aḥmad b. ʿAbd al-Ḥaḳḳ al-Sunbāṭī, famous as a preacher, declared it forbidden in 939 (1532/3). Two years later in a meeting for exhortation in the Azhar mosque he so incited his hearers against the beverage that they fell upon the coffee-houses, made short work of their contents and maltreated the occupiers. The difference of opinion thus emphasised caused the ḳāḍī Muḥammad b. Ilyās al-Ḥanafī to take the opinions of prominent scholars; as a result of personal observation of the effects of coffee he confirmed the opinion of those who considered the beverage a permitted one. Although in the years following coffee was from time to time for brief periods forbidden in Cairo, the number of its devotees, even among the religious authorities, steadily increased.

Several notable theologians had given *fatwā*'s in favour of coffee, for example, Zakariyā al-Anṣārī (died 926 = 1520), Aḥmad b. ʿOmar al-Saifi (d. 930 = 1523/24), Abu ʿl-Ḥasan Muḥammad al-Bakrī al-Ṣiddīqī (died between 950 and 960 = 1543—1553), who in verses in praise of the coffee also gives the advice that the opinion of Ibn ʿAbd al-Ḥaḳḳ should be set aside and the *fatwā* of Abu ʿl-Ḥasan followed (*Safwat al-Ṣafwa*, f. 349^{a, b}; cf. also al-Ṣiddīqī's verses in Bahāʾ al-Dīn al-ʿĀmilī's *al-Kashkūl*, Bulāḳ 1288, i. 19), ʿAbd al-Raḥmān b. Ziyād al-Zabidī (d. 975 = 1567/68) and others (*Safwat al-Ṣafwa*, f. 348^b sq.). — Gradually the view came to prevail that coffee was in general permitted (*mubāḥ*), but that under certain circumstances the other legal categories could be applied to it also.

Intercourse with the holy cities and with Egypt brought coffee to Syria, Persia and Turkey.

Rauwolf in 1573 found the beverage widely known in Syria (Ḥalab). In Constantinople and Rūmilī coffee first appeared in the reign of Sulaimān I (926—974 = 1520—1566). In 962 (1554) a man from Ḥalab and another from Damascus opened the first coffee-houses (*kahwe-khāne*) in Constantinople. These soon attracted gentlemen of leisure, wits and literary men seeking distraction and amusement, who spent the time over their coffee reading or playing chess or backgammon, while poets submitted their latest poems for the verdict of their acquaintances. This new institution was by way of joke called also *mekteb-i ʿirfān* (school of knowledge). The coffee-house met with such approval that it soon attracted civil servants, ḳāḍis and professors also. Poets like Māmiyā al-Rūmī (cf. Bahāʾ al-Dīn al-ʿĀmilī, *op. cit.*, p. 147) and later Belighī sang the praises of coffee, and the opinion expressed in 928 by Sulaimān's court physician, Badr al-Dīn al-Kūṣūnī (Leiden MS. 945, f. 58) was not unfavourable. The coffee-houses increased rapidly in number. Among the servants of the upper classes were *kahwedjī*, whose special task was the preparation of coffee, and at the court they were subordinate to a *kahwedjibashī*. In religious circles, however, it was found that the coffee-house was prejudicial to the mosque, and the ʿulamā thought the coffee-house even worse than the wine-room. The preachers were specially eager for the prohibition of coffee and the way was paved for them by the muftis (according to d'Ohsson: Abu ʿl-Suʿūd) with an opinion that (roasted) coffee was to be considered coal and therefore forbidden (the same argument is found in the treatise by Muḥammad (ʿAlī?) Dedeh, Leiden MS. 682, i. f. 4^b). The fact that current politics were discussed in the coffee-houses, the government's acts criticised and intrigues woven, was the principal cause for the intervention of the authorities. Edicts issued in the reigns of Murād III (982—1003 = 1574—95) and Aḥmad I (1012—16 = 1613—17) were not strictly enforced and still less obeyed. The religious authorities met public opinion by declaring coffee legal, if it had not reached the degree of being like coal. The grand viziers also benefited as they levied one or two gold pieces a day on the coffee-houses, and were therefore anxious to increase their number.

Murād IV (1032—49 = 1623—40) issued a strict prohibition of coffee (and tobacco). He had all the coffee-houses torn down and many forfeited their lives for the sake of coffee. Under Mehmed IV (1058—99 = 1648—87), while the sale of coffee in the streets was allowed, the prohibition of coffee-houses was at first renewed by the grand vizier Köprülü for political reasons. This prohibition could not possibly be kept in force permanently, and later we even read of measures taken by the government to lower the high price of coffee. From Sulaimān's time a tax was levied on coffee which was at a rate of 8 aspers per *okḳa* for Muslim buyers and 10 for Christian; in 1109 (1697) there was added a super-tax of 5 paras the *okḳa*, which was called *bidʿat-i kahwe*, for both.

According to von Hammer, *Geschichte* etc., v. 713, the question of the correct spelling of *kahwa* with *h* or *k* has been disputed in Turkey. *Kahwa* is actually found in several manuscripts e. g. in the opinion of al-Kūṣūnī above mentioned.

The coffee tree flourishes in south-western Ara-

bia and does best on the western side of the Serāt at a height of 3400—6800 feet, where it finds in the depths of the valleys and on the slopes a fertile, moist soil and the uniform warm temperature necessary for it. The plantations on the slopes arranged in terraces (see the picture in *Handbook of Arabia*, Pl. xiv.), however, need regular watering; in addition, the mist ('*umā*'), *su-khaimāni*) that rises in thick clouds out of Tihāma brings them moisture. To protect the trees from the heat of the sun and from locusts they are surrounded by shady trees like carob trees, tamarinds, etc. The tree which is raised from seed (or propagated from layers) reaches a height of 6 to 16 feet with a diameter of 2—2½ inches and yields berries in the fourth year. It is an evergreen and throughout the year bears both blossom and berries in various stages of ripeness so that there is really no fixed harvest-time. The main harvest, however, varying with kind and locality, usually falls in the months from March to June. After the berries have been carefully gathered and allowed to dry they are shelled in a mill. The beans and the husks are then dried in the sun a second time.

The coffee tree is found as far north as 'Asir [q. v.] where it is said to flourish exceedingly on mount Sh-dh-y (Shadhā) in the land of the Zuhārān (north of the Wādī Dawka, Doka on Stieler's map). (Sharaf 'Abd al-Muhsin al-Barakātī, *al-Rihla al-Yamāniyya*, Cairo 1330, p. 16; cf. J. L. Burckhardt, *Travels in Arabia*, London 1829, ii. 377; for other places in 'Asir see *Handbook of Arabia*, p. 136, 137). The most southern areas of coffee cultivation are Bilād al-Hudjriya, Wādī Warazān and Wādī Banā. To the east we find coffee grown in the land of the Yāfi' and in the Djawf. But it is the Ḥarāz mountains, the valley of al-Farsh belonging to the land of the Banū Maṭar, the Djabal Raima and the district round 'Udain that are particularly celebrated for their excellent coffee. (For further information see Grohmann's book [s. *Bibliography*] where, too, the varieties are detailed).

The cultivation of coffee was and still is of great economic importance for Yemen. In the time of Ḥādījī Khalifa, i. e. about the middle of the xviii century, the annual export was 80,000 bales. Ṣan'ā' and Bait al-Faḥih [q. v.] were centres of coffee trade. Mukhā, which the coffee trade brought to great prosperity, declined completely in the xixth century and has now lost all importance. Coffee is now exported through al-Hudaida, where already in Niebuhr's time an important traffic was found, and especially 'Aden (for details see von Neimans, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xii. 397—403, W. Schmidt, and in the *Handbook of Arabia*).

It has always been the custom in Yemen to drink preferably a decoction of the husks, which like the latter is called *kishr*, and is to be obtained in numerous coffee-houses (*miḥḥāya*). To *kishr* as well as to the coffee made from beans, flavourings such as cardamom, ginger, cloves, etc., are often added. In the social life of the Arab no ceremony or festival is complete without coffee, and coffee is the first thing offered to a visitor. An invitation to coffee in Mecca means an invitation to a meal. The Arabs drink coffee without sugar; only in South Arabia milk is occasionally taken; sugar has become the vogue among the Turks.

The fresh ripe fruit is pleasing to the taste and nourishing. The eating of the *bunn* — it is not

stated whether fresh or dried — is particularly recommended in a *qaṣida* by Ḥamza b. 'Abd Allāh al-Nāshiri (*Ṣafwat al-Ṣafwa*, f. 358^b sq.) on account of its various health-giving virtues. We have no information available as to whether the custom usual among the Galla and in Kaffa of eating ground coffee mixed with butter is also usual in South Arabia. In Persia the eating of dry ground coffee is not unusual.

For Arabic and Persian works on coffee in addition to those quoted above and in the *Bibliography*, see Ahlwardt, *Verzeichn. der arab. Handschr. ... zu Berlin*, N^o. 5476—5480; Pertsch, *Die arab. Handschr. ... zu Gotha*, N^o. 94(9), 2105—2109, 2777; *Cat. Cod. Orient. Bibl. Acad. Lugduno-Batavae*, iii. N^o. 1401; Brockelmann, *Gesch. d. arab. Litter.*, iii. 317 and 333, N^o. 16.

Kahwa is also the name of the room in which coffee is served and thus comes to mean receptionroom and "coffee-house". The word is also used in the sense of "tip" and "present". — On coffeehouses in the East, see the works mentioned below by Olearius, Chardin, Russell, von Hammer, Snouck Hurgronje. — On coffee-vessels see Lane, Snouck Hurgronje, von Oppenheim, Socin, Euting, Landberg.

AL-KĀ'ID (A.), "the leader". From the root-meaning of the word the term may be applied to any one who leads, a horse, for example; indeed, a leading-camel may be called *kā'id*. More prominent is its application to a military leader. In the general significance of "officer", "army commander" the word has been in use from ancient times to the present day wherever the Arabic language is spoken, and in the Maghrib it has further been applied to certain offices. That the east has not kept pace with this development in meaning is probably, in part at least, due to the way in which, as a result of its political history, the military language had been filled with Turkish and Persian titles. In the west *kā'id* means firstly the commander of a tribe liable to service or of a province, wielding both military and civil powers, who usually — in Morocco down to the present day — has a residence in the district jail (*ka'l'a*, *kašba*). Corresponding conditions among the Arabs in Spain are revealed in the Spanish *alcaide*, commander of a fortress or bailiff (Dozy-Engelmann, *Gloss. des mots espagnols et portugais dérivés de l'Arabe*², Leiden 1869, p. 79). A purely civil governor (in cities for example) is not *kā'id* but *āmil*; on the other hand, in Morocco the headman of a village, who has another title in his civil capacity, becomes *ipso facto* a *kā'id* when he takes his place at the head of a body of militia. Further titles in the Moroccan army are *kā'id er-rhā* (*rhā* "mill" = the circle of an encampment) = colonel, *kā'id el-mi'a* = captain, etc. If, then, the word *kā'id* is also used from Morocco to Tunisia with a genitive to describe a number of court, government or public offices, as a rule plainly endowed with authority (harbour-captain, chief of the roadways, etc., cf. Dozy, *Suppl. aux Dictionnaires arabes* and Beaussier, *Dict. arabe-français*), it is either a case of an originally military function or of a coined word like our "commander", "major", etc.

It is probably a case of borrowing from the military language when certain prominent stars, e. g. the last star in the Great Bear, or mountains (landmarks) are called *kā'id* (cf. Lane, *Lexicon*, s. v.). (G. KAMPEFFMEYER)

KĀ'IDA, (A.) (lit. "sitting"), basis, foundation, later also rule, principle, etc. Cf. the dictionaries.

KĀ'IF. [See KĪYĀFA.]

KAI-KĀ'ŪS, a mythical king of Persia of the Kayānid dynasty. Called Kava Uça in the *Avesta*, he is regarded by Firdawsī as the son of Kai-Kōbād and by other sources as his grandson. He was, it is related, a warrior king who undertook a campaign into Māzandarān, which was inhabited by demons and protected by the white *diw* (*diw-i safid*) who caused it to rain stones upon the invading army during the night; Rustam, son of Zāl, set out to deliver the king from his imprisonment and on his way met with seven adventures which have become celebrated in poetry [see RUSTAM]. The white *diw* was overcome in his sleep and the blood from his heart restored their sight to the king and his army. Another war led the king into Hāmāvarān, a land lying to the south of Persia, which might be the Yemen (Himyar), for he set sail for it by sea from Makrān. His adventurous spirit took him as far as the mountain of Kāf [q. v.] which was believed to surround the earth. He married Sūdāba, daughter of the king of Hāmāwarān (al-Tha'ālibī: Sūdāna, ar. Su'dā, daughter of Dhu 'l-Adh'ar) and in the course of a visit to his father-in-law was treacherously thrown into prison in a castle on the shore of the sea. It was Rustam who came to deliver him.

Being master of the demons, Kai-Kā'ūs used their forces to make them build castles in Alburdj (al-Tha'ālibī, p. 165: the Tower of Babel; do., Ḥamza al-Iṣfahānī, ed. Gottwaldt, p. 35; *Mudjmal al-Tawārikh*, *Journ. Asiat.*, Ser. iii., xi. (1841), p. 325). To revenge themselves for this forced labour one of them suggested to the king the possibility of rising up to heaven. For this purpose the king trained young eagles and attaching four to his throne had himself carried off towards the stars. When the eagles felt tired, they came down again and threw the king on the ground in the neighbourhood of Āmul [q. v.], in the middle of the forest, where he was found by the nobles who had set out to look for him. A son of the king, Siyāwakḥsh (Siyāwash, Ğyāvarshāna), was accused by his step-mother Sūdāba, whose overtures he had resisted, of having attempted her virtue; he cleared himself by the ordeal by fire, by walking unharmed through a narrow space between two blazing piles of wood. The young prince then asked leave to fight the Tūrānians, whom he encountered near Balkh [q. v.]. The death of Siyāwakḥsh, now the son-in-law of Afrāsiyāb [q. v.] and victim of the intrigues of Sūdāba, decided Rustam to invade Persia; the hero put the queen to death before the king's eyes and then hurled himself on Tūrān to avenge his country.

Kai-Kā'ūs reigned one hundred and fifty years the latter of which he passed in retirement; he left the throne to his grandson Kai-Kḥusraw [q. v.], son of Siyāwakḥsh.

KAIKĀ'ŪS, the name of two Seldjūq rulers in Asia Minor.

KAIKĀ'ŪS I, AL-SULTĀN AL-GHĀLIB 'IZZ AL-DUNYĀ WA 'L-DĪN K. B. KAIKHUSRAW, BURHĀN AMĪRĪ 'L-MU'MININ, reigned from 606–616 (1210–1219). He at once made peace with Theodore Lascaris (see below Kaiḥusraw I) because he had to defend his rights against his uncle Toghrilshāh of Erzerūm and his brother Kaiḥobād, who were contesting his succession. The Armenians under Lifun (Leon), who seized the opportunity to capture Heraclea and Larenda and to plunder Kaiṣariya, were temporarily induced to retire on payment of a considerable sum. Toghrilshāh also soon retired to Erzerūm, but Kaiḥobād, who had seized the fortress of Anguria, held out for a considerable time and was only forced to surrender after several years' siege. He was thereupon provisionally imprisoned in the fortress of Minshar (*Μινσάρ*, now Mizere, S. E. of Malatya; cf. Defrémery, *Hist. des Croisades, Documents Arméniens*, i. 143, note 3). By a lucky coup Kaika'ūs succeeded in capturing the king of Trebizond, Kīr Aleks, who had to purchase his freedom by ceding the important harbour of Sinope and paying a yearly tribute (611 = 1214). The town of Antālia, which had been taken by Kaiḥusraw shortly before, but had expelled the Turkish garrison with the help of Christian knights, was again reconquered. In 613 (1216) Kaika'ūs made an inroad into the land of the Armenians and besieged the fortress of Gaban (Ibn Bibī in place of this mentions two citadels, Ġinċin and Gānċin). The army sent to raise the siege included the Constable Constantine and several Barons of the Empire; it was completely routed by the Turks and the Constable with many Barons and knights were taken prisoner. Kaika'ūs then returned to Kaiṣariya, without having taken the fortress, after plundering the land and laying it completely waste. There was nothing left for the Armenians but to beg for peace and the release of prisoners. Both appeals were granted but their king had to pledge himself to pay tribute and to cede the important frontier fortresses of Lu'lu'a and Lawzad, which commanded the Cilician passes. When in 613 (1216) Kaika'ūs's ally, the Aiyūbid of Ḥalab, al-Malik al-Zāhir, died, Kaika'ūs arranged with the Aiyūbid lord of Sūmaisūt, al-Malik al-Afḍal, that the latter should receive Ḥalab with the Sultān as his overlord. This plan seemed at first to be successful; the Turkish troops occupied Marzbān without difficulty (Kamāl al-Dīn, transl. Blochet, p. 158, mentions Burdj al-Raṣāṣ, as does Yāḳūt, ed. Wüstenfeld, ii. 604, and adds Tell Khālīd also), Ra'bān, Tell Bāshir and Manbidj, but in place of handing the places over to al-Afḍal, as had been agreed, Kaika'ūs put Turkish commanders over them. Friction thus arose and the Ḥalabīs gained time to appeal for help to al-Malik al-Ashraf (cf. i. 222^b) whose troops defeated the

advance-guard of the Turks at Tell Kabbāsīn (Yāqūt, i. 869). Kaikā'ūs then retired on Ablastin, while al-Ashraf drove the Turkish garrisons out of the fortresses they had taken. Furious at this failure, which he attributed to the treachery of his own emirs, Kaikā'ūs had several of them hanged and others imprisoned in a building called Rabaḍ Tartūsh by Yāqūt, which was then set on fire so that they were all burned to death. Soon afterwards he himself fell ill of consumption and died in 616 (1219). His body was buried in a hospital built by him in Siwās, where the inscription on his tomb, incised in 617, can still be read. Cf. v. Berchem, *Matériaux pour un Corpus Inscriptionum Arabicarum*, Part 3, p. 5 sqq.

KAİKĀ'ŪS II, 'IZZ AL-DUNYĀ WA 'L-DĪN B. KAİKHUSRAW II. When Kaikhusrav II [q. v.] died in 643 (1245), according to the arrangements he had made, his son 'Alā' al-Dīn Kaikobād, whose mother was the Georgian princess Tamar, was to become Sultān, but he was barely 7 years old and had two older brothers — also still quite young — 'Izz al-Dīn and Rukn al-Dīn Kīlīdj Arslān. 'Izz al-Dīn was the eldest. His mother was the daughter of a Greek priest (Frater Simon in Vincent de Beauvais, Book xxxi., Ch. 26, who has, however, confused 'Izz al-Dīn and Rukn al-Dīn). The all-powerful vizier of the late Sultān, Shams al-Dīn Isfahānī, declared for him but did not yet dare to set aside the two other brothers, for the decision ultimately lay with the Mongol Khāns. The vizier therefore could not prevent Rukn al-Dīn, accompanied by several Turkish emirs, from travelling to the *urdu* of the Great Khān and being present at the great *kuriltai* at which Kuyuk was proclaimed Great Khān (1246). But in the meanwhile the Vizier (whom Frater Simon refers to as Losyr) was busy getting all power into his own hands and married 'Izz al-Dīn's mother to the great chagrin of the Turkish emirs. To attain his desires, he had several of them put to death, including, according to Vincent, a certain Salefadīnus, i. e. Sharaf al-Dīn Maḥmūd, the governor of Arzandjān, a man well-disposed to the Christians, who understood French and German (*ibid.*, chap.

27). The result, however, was that the discontent emirs laid a complaint against him before Kuyuk, who gave them a *yarlık* appointing Rukn al-Dīn Sultān. In addition, the Khān ordered that the vizier should be handed over to the relatives of the slaughtered emirs. He also laid down definitely the conditions of peace; the Seldjūks were to pay a yearly tribute of 1,200,000 hyperpres (bezants), 500 silk robes with gold brocade, 500 horses, 500 camels and 5,000 head of smaller animals and also presents which doubled the value of the whole. This is Vincent's story (Ch. 28). Cf. thereon Barthold in *Zapiski Wost. Otd. Imp. Arkh. Obshch.*, xviii. 0128; d'Ohsson, *Hist. des Mongols*, iii. 83.

When Rukn al-Dīn then returned to Asia Minor, he was recognized as Sultān, and the vizier, in accordance with the orders of the Great Khān, handed over to his enemies and put to death in 646 (1249); we have therefore coins with the name of Rukn al-Dīn as early as the year 646 (1249). In the meanwhile, however, news arrived of the death of the Great Khān and it was not till 1251 that his successor Möngke assumed full authority. The Turkish emirs therefore worried little about the *yarlık* and agreed with one another that Kaikhusrav's three sons should reign jointly. From 647 to 655 all three names appear on the coins, with the single exception that in 652 (1254) Rukn al-Dīn struck coins with his name in Kaşariya, because he had been proclaimed sole Sultān there by the *subashī* of the town, Şamsām al-Dīn. Long negotiations followed between Rukn al-Dīn and 'Izz al-Dīn, which led to nothing, however, till finally the sword brought a decision and Rukn al-Dīn was taken prisoner and sent to Amasia and later to Burghlu. In the meanwhile Möngke had demanded that 'Izz al-Dīn should come to him, but the latter had little desire to undertake the dangerous journey and therefore sent his brother 'Alā' al-Dīn Kaikobād with rich presents. On the way, however, the prince was murdered and an enquiry instituted by the Great Khān to find who had a hand in it led to no result. An encounter between 'Izz al-Dīn's troops and those of the Mongol *Noyon* Baidju at Akşara in 654 (1256), in which the former were routed, forced 'Izz al-Dīn at once to seek refuge with Theodore Las-caris. The imprisoned Rukn al-Dīn was thereon liberated and recognized as Sultān (coins of 655). But scarcely had Baidju retired with his Mongols than 'Izz al-Dīn returned to Konya, while Rukn al-Dīn was in Kaşariya. After long negotiations and occasional skirmishes between the troops of the two brothers, a division of the kingdom was decided upon. Rukn al-Dīn was to reign eastwards from the Kızıl İrmağ and 'Izz al-Dīn westwards. Both brothers were then to go to Hülāgū, who was then in the neighbourhood of Tibriz, to have the agreement confirmed. This was done, but soon afterwards the Mongols learned that 'Izz al-Dīn had entered into negotiations with their arch-enemies, the Mamlūks of Egypt, and put an end to his rule. 'Izz al-Dīn was still able to escape to Anṭālia and sailed from there with his relatives and a few faithful emirs to Constantinople, which after the fall of the Latin Empire, was again in the hands of the Greeks. There he was sure of a good reception on account of his having a Christian mother. But the presence of these Turks soon became embarrassing to the Emperor. They are

said to have begun a conspiracy to murder him and make 'Izz al-Dīn Emperor. When the Sultān's Christian uncles betrayed this plan, the Greeks lost no time in banishing the Sultān to Ainos, while his servants were incorporated as Turcopols in the Imperial armies, or imprisoned and put to death (662 = 1264). Six years later (668 = winter 1268/1269) 'Izz al-Dīn was liberated by troops sent to Constantinople by Mengü Timur and brought to the Crimea. There he married a daughter of Bereke Khān and died in 678 (1279/1280). On his son Mas'ūd see the separate article.

Bibliography: See that of the preceding article. Specially important here is Vincentius Bellovacensis, *Speculum historiale*, Books xxx. and xxxi., chap. 26, 27. Cf. also the Mongol and Byzantine historians (Nicephorus Gregoras and Georgius Acropolita); W. v. Tiesenhausen, *Recueil de matériaux relatifs à l'histoire de la Horde d'or*, i. 482.

KAI-KHUSRAW, a mythical king of Persia, of the Kayānid dynasty. Son of Siyā-wakhsh, who had left his father Kai-Kā'ūs and taken refuge in Tūrān where he had married the daughter of king Afrāsiyāb [q. v.], he was born after his father's death and brought up in this country among the shepherds of the mountains of Kalu (a valley near Bāmiyān), in ignorance of his illustrious origin; but this was soon revealed. At seven years old he was making bows and at ten he feared neither lions nor tigres. Then Pirān, the vizier of Afrāsiyāb, took him into his house. In a dream Gudarz, an Iranian noble, descendant of the smith Kāwa, learned that the heir to the throne existed in enemy territory and sent his son Gēw to look for him; the latter found him quite by chance and recognized that Kai-Khusraw had on his arm the black mark that distinguished Kayānids; he therefore took him, along with his mother Farīgīs back to Persia.

There he found a rival in his uncle Fārtīborz. To settle the question, Kai-Kā'ūs decided that the throne should belong to the one who captured the fortress of Bahmandiz, near Ardabil [q. v.], where Ahriman reigned. It was of course Kai-Khusraw who won, with the aid of celestial forces, and there he built a temple in honour of the sacred fire Ādhargushnasp. A journey through his empire showed him the devastations caused by the Tūrānians and he swore to undertake a war of vengeance against them. Aided by all the nobles, he sent out expeditions of which the first were unfortunate; but fortune soon changed and Kai-Khusraw took over the direction of the campaign. Afrāsiyāb, in spite of the help of the Emperor of China, was finally forced to fly and Kai-Khusraw sought him in vain beyond the seas. He was hidden in a cave in the mountains of Ādharbaidjān [q. v.] and his place of concealment could only be discovered by supernatural means. He was finally taken prisoner and beheaded. Thus was accomplished the vengeance due for the murder of Siyāwakhsh.

Having succeeded his grandfather Kai-Kā'ūs, for whom he wept for 40 days, Kai-Khusraw reigned peacefully without any incident more remarkable than the killing of a dragon which had taken up its abode on the mountain of Kūshid, between Fārs and Iṣfahān (Ḥamza al-Iṣfahānī, ed. Gottwaldt, p. 36). At the end of his life, he asked God to

receive him into heaven and, after naming Luhrāsp as his successor, he undertook a mountain journey in the course of which he disappeared, after having washed in the water of a spring (the spring of eternal life). Those who had accompanied him perished in a snowstorm. It is clear that the figure of Kai-Khusraw corresponds to that of the Avestan hero Haosravanh, who belongs to Indo-Iranian mythology.

KAIKHUSRAW, the name of three Seldjūk rulers in Asia Minor.

KAIKHUSRAW I, GHIVĀTH AL-DIN, b. KILĀDJ ARSLĀN. When the aged and enfeebled KILĀDJ ARSLĀN II died in 588 (1192), he was staying with his youngest son Kaikhūsrāw, who governed Burghlū (i. e. Uluburlu) in his father's lifetime. Kaikhūsrāw concealed his father's death and only made it known, when he had arrived with the body in Konya, in order to have homage paid to himself as Sultān there. His brothers, each of whom ruled over a part of the Seldjūk kingdom, troubled about him just as little as they had done about their father in his later years. It was some time, however, — according to some not till 592 (1196), according to others 595 — before one of them was strong enough to take Konya from him. Finally Rukn al-Din Sulaimān [q. v.] succeeded in doing this, so that Kaikhūsrāw had to take to flight and after several unsuccessful attempts to gain his throne with the help of Leon of Armenia and of the neighbouring princes of Malatya, Ḥalab and Āmid, wandered hither and thither (cf. the poem composed by him in Ibn Bībī, p. 29 sqq.), till he at length found a welcome with Alexius III in Constantinople. At this time he married a daughter of a distinguished Greek named Maurozomes, and the death soon afterwards of his brother in 600 (1204) opened up a good prospect of returning to Konya, because several emirs were dissatisfied with the rule of the latter's son KILĀDJ ARSLĀN III, who was a minor. The main part in the plot was played by several members of the dynasty of the Dāniṣhmandiyya [q. v.], which had been deposed by KILĀDJ ARSLĀN II. He actually succeeded in being proclaimed Sultān in Konya in spite of a *fetwā* of the kāḍī al-Tirmidhī, who declared him unworthy of the throne because of his Christian mother and his intercourse with the unbelievers, a *fetwā* which cost the issuer's life. According to Ibn al-Athīr, *al-Kāmil*, ed. Tornberg, xii. 160, Kaikhūsrāw besieged Trebizond in 602 (1206), apparently without much success. In 603 (1207) he took the important seaport of Antālia from Aldobrandini. From this capture date the first relations of the Seldjūks with the Venetians, to whom he granted a licence to trade (cf. Heyd, *Gesch. des Levantehandels*, i. 334). In 605

(1208), in alliance with al-Malik al-Zāhir of Ḥalab, he undertook a campaign against the Armenians and took the fortress of Pertus. In the beginning of 607 (1210) he fell in the battle at *Khonās*, perhaps in single combat with Theodore Lascaris. Cf. Nicephoros Gregoras, ed. Bonn, i. 17—21, and Georg. Acropolita, ed. Bonn, p. 16 and thereon Houtsma, in *Verslagen en Mededeelingen der Kon. Akad. van Wetensch.*, Afd. Letterk., Ser. 3, ix. (1893), p. 138 sqq.

KAIKHUSRAW II, *GHIYĀTH AL-DUNYĀ WA 'L-DĪN* B. KAIḲOBĀD, ascended the throne after the assassination of his father in 634 (1237), although KaiḲobād had not designated him as his successor but the son 'Izz al-Dīn by the Aiyūbid princess [cf. KAIḲOBĀD I], apparently because KaiḲhusraw, as Vincent says, was the son of a concubine (she was called Māh-peri *Khātūn*, as the inscription on her tomb at *Ḳaṣariya* tells us) and, besides, was quite an insignificant man. But he had been appointed governor of Arzandjān by his father after the dismissal of Dā'ūd Shāh [see KAIḲOBĀD I] and was the candidate for the throne favoured by the Christian mercenaries.

The latter, with the Emīr Sa'd al-Dīn Gōbāk, carried through his proclamation as sultān, while the unfortunate 'Izz al-Dīn with his mother and a younger brother was put out of the way. Only the *Khwarizmis* [see KAIḲOBĀD I] were discontented with this, refused to obey orders and marched out of the Seldjūk kingdom in order to ravage the adjoining Aiyūbid lands. KaiḲhusraw on his side made peace with the Aiyūbids and endeavoured to cement it by a double marriage, at which the famous historian Kamāl al-Dīn officiated as plenipotentiary for the lord of Ḥalab. But as he did not trouble about the business of government, the Emīr Sa'd al-Dīn took all the power into his own hands and began a regular reign of terror. He even declared himself an illegitimate son of KaiḲhusraw I, and finally went so far that the Sultān had him treacherously put to death. The Sultān then celebrated his marriage with the beautiful Georgian princess Tamar [see KAIḲOBĀD I], whose portrait he even wished to put on the coins; when he had to give up this idea he chose the emblem of the lion and rising sun, as is still usual in Persia to-day. The internal weakness of the kingdom soon showed itself (638 = 1241) when a Turkoman rising broke out, caused by the appearance of a certain saint Bābā Ishāk, whose messengers traversed the whole country and in their sermons denounced the luxurious life of the Sultān and nobles. Soon armed bands from the district of Sumaisāt and Malatya advanced in the direction of Siwās, Tokāt and Amasia and put to flight the Turkish generals sent against them. The execution of the pious Bābā only increased the number of his followers because he was revered as a messenger of God. Only the summoning of troops stationed on the frontiers in Erzerūm, among whom were the Christian mercenaries, finally put a bloody finish to the rebels' activities. Cf. the report in Vincent de Beauvais, Book xxx. chap. 139, 140. Here the prophet is called Baba Roissole (= Rasūl Allāh), in al-Makrizī, *Histoire d'Égypte de Makrizi*, transl. Blochet, Paris 1908, p. 474. Il-Bābā (II is probably a wrong reading for the Arabic article or is for Ilyās, as the name Ilyās Bābā is also found). Cf. Kiöprülüẓāde Mehmed Fu'ād; *Ilk Mutaşavvirler*, p. 232. Scarcely was

this danger passed when in 639 (1241) Baidju Noyon appeared with his Mongols before Erzerūm and took and plundered the city after heavy fighting with the frontier troops. The vizier Muhaddhib al-Dīn and his Nā'ib Shams al-Dīn Isfahānī hastened to gather a large army, to hire Armenian and Aiyūbid mercenaries and to advance against the Mongols with them; but the incapacity and cowardice of the Turkish troops lost the battle at Kōzādagh (Muḥarram 6, 641 = June 26, 1243). Baidju thereupon marched on Siwās, which surrendered and was therefore spared, but *Ḳaṣariya* was taken by force of arms, plundered and its inhabitants massacred. He then went into winter-quarters and the vizier succeeded in concluding a temporary peace, which, however, had still to be confirmed by the Great Khān. But as Ügedei died just then and the next *kuriltai* was not held till 1246 (see above, i. 682a), the Turks had a few years' peace and the able Shams al-Dīn used the opportunity to seek the intervention of Batū Khān, on a ceremonious embassy with several other prominent Turks. He was entirely successful so that on his return he received the office of vizier rendered vacant by the death of Muhaddhib al-Dīn. The good for nothing Sultān, who after the battle of Kōzādagh, had been about to fly to the Greeks, again gathered some courage and in 1245 began a campaign against the Armenians, against whom he had a grievance because they had handed over to the Mongols his mother, who had taken refuge with their king, with her treasures. The objective of the campaign was Tarsūs on this occasion, but soon it had to be abandoned, because the rainy season began, after the land had been ravaged in fearful fashion. The Armenians by the treaty of peace bound themselves to pay tribute and to cede Bragana. When the leaders again appeared at the Sultān's court, the latter had died suddenly a week before.

Bibliography: See above under KAIKĀ'ŪS; of particular importance are here Vincent de Beauvais and the historians of the Mongols.

KAIKHUSRAW III, *GHIYĀTH AL-DĪN*, B. RUKN AL-DĪN KĪLDJ ARSLĀN was proclaimed Sultān, immediately on the murder of his father, by the all-powerful Perwāna Mu'īn al-Dīn Sulaimān [q. v.], although he was still a minor. The events in Asia Minor during his reign will be better discussed in the article SULAIMĀN. After the execution of the Perwāna (676 = 1277) KaiḲhusraw's reign was soon at an end, as his youth rendered him a mere tool in the hands of the Mongol rulers. His nephew Mas'ūd [q. v.], when he returned to Asia Minor after his father's death, was so successful in gaining the favour of the Great Khān Abāḳā [q. v.] that we have coins of his name as early as 681. The unfortunate KaiḲhusraw, who was entirely in the power of the Mongol prince and claimant Ḳun-ḳuraṭai, became involved in the latter's fall and was put to death in 682 (1283) in Arzandjān by order of the Ilkhān Aḥmad.

KAI-ḲOBĀD, a mythical king of Persia, of the Kayānid dynasty. The *Avesta* knows his name in the form Kavi Kavāta, but nothing more of him; tradition only preserves of him the fact that he was grateful to the Yazatas for having made his empire glorious and for having re-established the legitimate line of kings of Irān. The only source to consult is the *Shāh-nāma* of Firdawsī. To defend Irānian soil against the inva-

sions of the Tūrānian Afrāsiyāb, the Sace Zāl, father of Rustam, after ripe reflection and consultation with the *mōbedh* decided on Kai-Ḳobād, who was living in the mountains of Alburdj (Hare-berezaity) and sent his son to look for him. The latter found him in the midst of a banquet surrounded by boon comrades; he greeted him, but already the new king had seen in a dream two white falcons place a golden tiara on his head and was thus informed of the coming of the embassy; the care which he had taken to make himself remote had not prevented destiny from putting the messenger on his track. Becoming commander of the Irānian army, Rustam completely defeated Afrāsiyāb, who would have been made prisoner if the girdle by which he was being carried off had not broken. As a result of this victory, a peace was concluded which gave Persia its former frontier of the Oxus. Kai-Ḳobād spent his time in organizing the empire and traversing it, in founding cities and in lavishing riches on the heroes who had rebuilt the empire: Rustam, Ḳārin and others. He died at the end of a reign of a hundred years.

The *Mudjmal al-Tawārikh* (*Journ. Asiat.*, Ser. iii., xi. (1841), p. 320) which says that Kai-Ḳobād came from the mountains of Hamadhān, Alwand, and not from Alburdj, and Ḥamza al-Iṣfahānī (ed. Gottwaldt, p. 35) only mention his building cities, notably Ḳobādiyān on the Oxus, and the expansion of Iṣfahān. The *Bundihish* only gives fifteen years to the reign of this king instead of a hundred.

(CL. HUART.)

KAİḲOBĀD, the name of three Seldjūḳ Sultāns in Asia Minor.

KAİḲOBĀD I, 'ALĀ' AL-DUNYĀ WA 'L-DİN ABŪ 'L-FATH K. B. KAİḲHUSRAW. How he had been taken prisoner in the reign of his brother has already been told under KAİKĀ'ŪS I. The death of this brother in 616 (1219) opened to him not only the gates of the fortress of Guḏharpet, where he was then interned, but also placed him on the Seldjūḳ throne. All the Turkish emirs do not seem to have been quite agreed about this, as they declared for another brother, Kaiferidūn, but KaiḲobād succeeded in gaining possession of Ḳonya, the capital, and in soon afterwards rendering the malcontent emirs harmless. He probably received valuable help from the Christian auxiliary troops, as Ibn Bibī relates that the Emir Comnenus played an important part in these events. We know from the account in Vincent de Beauvais (Book xxx. ch. 144), which, however, refers to the reign of his successor, that the Greek emperors of Trebizond and Nicaea as well as the prince of Lampron had pledged themselves to place a number of troops—settled in a treaty—at the disposal of the Seldjūḳ. It is certain that this agreement was already in force in the reigns

of KaiḲhusraw I and KaiḲā'ūs I, perhaps with the single limitation that it was not till the reign of the last named that this pledge held good for the Armenians also, and was renewed under KaiḲobād. At the beginning of his reign the Armenian king Leon II died (1219) and his daughter Isabella married the son of the Catholic prince of Antioch, which aroused a great dispute among the Armenians, the result of which was that the discontented barons under the leadership of Constantine, prince of Lampron, captured the prince, poisoned him and married his widow to Haithum, the son of Constantine. A war with the prince of Antioch was thereby rendered inevitable; the Templars and Knights of St. John received orders from Rome not to take part in it so that Bohemund could not do much against the Armenians and, according to Ibn al-Aṭhīr, had even to appeal for help to KaiḲobād. In any case, the latter took advantage of the dissensions among the Christians by seizing several Armenian forts on the Mediterranean coast and elsewhere, including the castle of Galonoros (καλὸν ὄρος), Candelor or Scandalor, which he chose for his winter residence and made a considerable seaport by his buildings there, so that the place became called Alaya ('Alā'iya) after him. In these circumstances there was nothing left for the prince of Lampron on his side, but to acknowledge the suzerainty of KaiḲobād and to support him with auxiliaries in his wars.

An attempt by Mas'ūd, the Ortuḳid of Āmid and Hiṣn Kaifa, who succeeded his father as lord of these towns in 619 (1222), to leave KaiḲobād's name out of the *khutba* and to make an alliance with the neighbouring Aiyūbid princes, cost him the fortresses of Kiakhta and Čemishkezek. The troops sent to his assistance by al-Ashraf (see i., 222^b) were scattered by the besieging army, but KaiḲobād hastened to heap tokens of honour on the captured commander and to release him, because much depended for him on the friendship of the Aiyūbids. Indeed he even sought the hand of an Aiyūbid princess. His request was granted and the marriage took place a little later. In 622 (1225), the prince of Arzandjān, Bahramshāh, died after a sixty years' reign, as also did the Seldjūḳ of Erzerūm, Tuḡhrilshāh. KaiḲobād thought this a good opportunity to seize where possible the lands of these rulers. Dā'ūdshāh, Bahramshāh's successor, did his best to avert the danger by entering into alliances with Djalāl al-Dīn Khwārizmshāh, with 'Alā' al-Dīn, Grand Master of the Assassins and with al-Ashraf, but in vain. KaiḲobād forced him to cede his territory and he was equally successful with another member of the Menguček family, Muzaḡfar al-Dīn Muḡammad, who ruled over Coghonia (Shabīn Ḳarahīṣar). But before he could take Erzerūm too, he had to wage a difficult war with Djalāl al-Dīn, who was an ally of the prince of Erzerūm. After embassies had gone several times to and fro between the two rulers, KaiḲobād made an alliance with al-Ashraf, who then fought with Djalāl al-Dīn for the possession of the town of Khilāt. As soon as the Khwārizmshāh heard of this, he endeavoured by a hurried march to anticipate the union of the two enemy forces, but in the battle of Arzandjān on Ramaḡān 28, 627 (Aug. 10, 1230, cf. *Actes du 10^e Congrès internat. des Orientalistes*, iii. 19) he suffered a terrible defeat. The fate of the prince of Erze-

rūm was thus decided at the same time; his territory was annexed by Kaikōbād. A war with the Georgians in 629 (1232) was speedily concluded by a treaty of peace, in which the queen Russudān agreed to the marriage of her daughter with Kaikōbād's son Kaikhusrāw. In the meanwhile the Mongols had again appeared in these regions; Djalāl al-Dīn had met his death and large bands of Khwārizmis were raiding up and down for their own hand. Kaikōbād then decided to occupy the district of Khilāt, which al-Ashraf had received after the defeat of Djalāl al-Dīn but did not defend, and to take the roving bands of Khwārizmis into his service as mercenaries. This brought about a coalition of all the Aiyūbid princes under the leadership of al-Kāmil of Egypt against Kaikōbād. Soon their troops were on the Asia Minor frontier but they did not succeed in forcing the passes to enter the land; in addition the Aiyūbid leaders soon began to quarrel among themselves. In the end they had to be content with defending the town of Khartbart against the advancing Turks. But the latter could not be kept back. Al-Muzaffar, the Aiyūbid of Hamā, on whom the conduct of the defence fell, was captured along with the Ortuqid ruling in Khartbart. The town henceforth (from 631 = 1234) belonged to the Seldjūks. Kaikōbād next besieged and captured Harrān, Edessa and Raḡḡa (632 = 1235) which, however, were soon lost again to the Aiyūbids. Āmid also was unsuccessfully besieged by him and when in 634 (1237) he was about to undertake a new campaign, he was poisoned in Ẓaisariya, by order of his son Kaikhusrāw, it is said, because Kaikōbād had appointed as his successor not him, but a younger son, borne to him by the Aiyūbid princess.

During Kaikōbād's vigorous reign the Seldjūk kingdom attained its greatest extent and highest prosperity, for Kaikōbād was not only an indefatigable soldier but also undertook great building operations, the remains of which in Ẓonya, Siwās, 'Alaya and elsewhere keep alive the memory of the great Sultān to this day. He busied himself in opening up his lands to commerce and in developing the natural wealth of the country; with this object he even undertook an expedition to the Crimea, no doubt at the wish of the Italians. As a result his kingdom was at that time considered the richest in the world.

Bibliography: See above under KAİKĀ'ŪS. Cf. also for the war with Djalāl al-Dīn: al-Nasawī, *Sirat al-Sultān Djalāl al-Dīn Mankobirti* (Publ. de l'École des Langues Or. Viv., Ser. iii., Vol. ix. x.), Arabic text and French transl. by Houdas; for the Banū Menguček: v. Berchem, *Matériaux pour un Corpus Inscript. Arab.*, iii. 55 sqq.; Houtsma in *Keleti Szemle*, 1904, p. 277 sqq.

KAİKÖBÂD II, 'ALĀ' AL-DĪN B. KAİKHUSRAW, reigned together with his two brothers, Kaikā'ūs and Kīlīdj Arslān, as was briefly described in the article KAİKĀ'ŪS II. Here we shall only refer to a coin described by Ghālib Edhem, *Taḡwīm-i Maskūkāt-i Seldjūkiya*, No. 113, which bears the date 663 and the name Kaikōbād alone, although Kaikōbād had died 8 years before.

KAİKÖBÂD III, 'ALĀ' AL-DĪN K. B. FARĀMARZ B. KAİKĀ'ŪS was installed as Sultān by Ghazān Khān in 697 (1298). Of his history practically nothing is known with certainty. His name still

appears on a coin of 701, so that the statement in Munadjjim Bashī that he was again deposed in 700, seems to be wrong. Cf. v. Berchem, *Matériaux*, iii. 92 note. But as there is also a coin of Mas'ūd with the date 700, both princes seem to have borne the title Sultān in this year. That on the other hand Kaikōbād was Sultān as early as 683, as has been deduced from the diploma alleged to have been given by him to 'Othmān Ghāzī (Feridūnbeg, *Munsha'āt*, i. 48—55) is certainly wrong, as is the calculation in Djannābī, which gives him a reign of 20 years, 3 months and 13 days.

KAİKÖBÂD, MU'IZZ AL-DĪN, king of Dihlī, was the son of Nāṣir al-Dīn Bughrā, king of Bengal and second son of Ghiyāth al-Dīn Balbān [v. BALBĀN] of Dihlī. On the death of his eldest son, Muḥammad Khān, who was slain by the Mughuls, Balbān made his second son, Bughrā Khān, who was governor of Bengal, his heir, but the prince could not endure the restraint of his father's court, and was absent in Bengal when, in 1287, the throne became vacant, and the amīrs made his son, Kaikōbād, king. Kaikōbād, who was barely eighteen years of age at the time of his accession, had been most strictly educated by his grandfather, and signalized his sudden emancipation by unbridled licentiousness. He put to death his cousin, Kaikhusrāw, son of Muḥammad Khān, and disgraced the minister, Khaṭir al-Dīn, after whose degradation Nizām al-Dīn, nephew and son-in-law of the *kotwāl* of Dihlī, became supreme in the state. Early in the reign a horde of Mughuls, which had invaded India, was defeated; the prisoners taken were treated with great cruelty, and a large number of Mughuls who had accepted Islām and settled in India were massacred.

In 1288 the king's father, Bughrā Khān, marched from Bengal with the object of asserting his superior claim to the throne of Dihlī, but was met by Kaikōbād on the banks of the Ghāgra and changed his attitude. The meeting was affectionate on both sides and the father privately warned his son against his evil courses and against the ambition of Nizām al-Dīn, and although these counsels effected no improvement in the young king's morals, they induced him to remove his minister by poison. Late in 1288 Kaikōbād was struck down with paralysis, the result of his debauchery, and the kingdom was thrown into confusion. Malik Djalāl al-Dīn Firūz Khaldjī, recently appointed governor of Baran, attempted to maintain order in the capital, but was suspected, with good reason, by the Turkish amīrs, who proclaimed Shams al-Dīn Kayūmarth, the infant son of Kaikōbād. The strife of the two factions continued while the king lay helpless, but Firūz Khaldjī at length overcame his opponents and ascended the throne. The wretched Kaikōbād was murdered in June, 1290, and his body was thrown into the Djamna.

KAIL (A.), the most general term for measure. The word next has the special meaning of measure for dry goods such as grain and cereals of all kinds and finally (like *kaila*) means

contents (or weight of the contents) of a definite measure of capacity. Another series of meanings is: measure, correct measure, tested, adjusted or official measure (or weight). In this meaning it is found on the Egyptian glass weights (e. g. *dirham kail*) and in the papyri as *kail al-dimūs* (μέτρον διμύσιον) -- a well known official measure for corn in general use for the levying of taxes, to be distinguished from *kanḳal*, which apparently means the varying, local measure.

Kaila is usual as meaning a definite measure, but we also find *kail* used, without any obvious differentiation, as a definite measure of capacity. The *kaila* is not part of the traditional system of capacity-measures of the Arabs (cf. *ḳafiz*) but like many other metrological terms in other languages has entered official language from the marketplace. We therefore nowhere find the *kaila* definitely coordinated with the system of measures. In the reign of the Mongol Il-Khān of Persia, Chāzān Khān (694—703 = 1295—1304) we already find the attempt being made to make the *kaila* the standard measure of the corn trade. Rashīd al-Dīn tells us that this ruler proclaimed the *kaila* of Tabriz as the official unit of capacity and fixed its weight at 2600 dirhams (8.87 kg. = 19 lbs.). The further regulation that special measures, whose contents were to correspond to the above mentioned weight for the kind of grain in question, were to be prepared for every kind of cereal (oats, wheat, rice, peas, beans, sesame, millet etc.) shows that then as now business was done by weight and not by measure. In the Turkish empire also the *kaila* was the official unit in the corn trade and the *kaila* of Stamboul (*lingua franca* = kilo of Constantinople) of about 35 l. (7½ gallons) was ordered to be the standard measure. But every centre of trade had (and frequently still has) a local *kaila* which often differs considerably from the normal. The same is true of the *kailadja*, dealt with below. (E. VON ZAMBAUR)

KAILADJA, a measure of capacity in local use and varying very much, whose size varies between ½ and 2 l. (or kg. = ¾ to 3½ pints). The term existed as early as the 3rd century A. H.

Bibliography (for the preceding article also): Sauvaire, *Matériaux*, in *Journ. As.*, Series 8, viii. (1886), 126 sq.; S. Lane Poole, *Arabic Glass Weights in the British Museum*, No. 47, 51; Becker, *Papyri Schott-Reinhardt*, i. 31 and 72; al-Ṭabarī (ed. de Goeje), *Glossarium*, p. CDXXXIV and CDLXII; Behnauer, *Institutions de Police chez les Arabes in the Journ. As.*, Series 5, xvi. (1860), 131; al-Kh̲wārizmī, *Mafātīḥ al-ʿUlūm*, ed. van Vloten, p. 15. (E. V. ZAMBAUR)

KĀ'IM (A.), "standing upright", "perpendicular". Hence *ḳā'im-maḳām* "standing in place (of another)", "deputy"; *Ḳā'im al-Zamān* [q. v.]; *ṣāwiya ḳā'ima* "right angle". Also: "existing" for example in *ḳā'im bi-naḟsihi* (or *bi-dhātihī*) "self-existent" (said of God). *Ḳā'im bi-* also means "executing anything"; hence *al-ḳā'im bi-amrī'lāh* "He who executes God's command".

KĀ'IM-MAḲĀM (A.), "deputy"; pronounced and written *ḳaimaḳam* in Turkish, the name of a rank and office in Turkey. In the period before the *tanẓīmāt* reforms the word meant the officer (*riḳiābī humāyūn* or *āsītāne ḳaimaḳamī*), temporarily commissioned to act as deputy at the court or in the capital in the absence of the Grand

Vizier, the so-called *ḳaimaḳam paṣha*. The case is an isolated one in which the Grand Vizier appointed an *ordu ḳaimaḳamī* to represent him in the camp (Luṭfi, *Tārīḳh*, iv. 19); we also find *ḳaimaḳams* for the Seraskers and the Kapudan Paṣha (*Djazīr Ḳaimaḳamī* for the *eyālet* of the Archipelago, which was under the Grand Admiral); for the regular representatives of the lower categories of officials the now obsolete term *yer* (e. g. *ḳiāyā yeri*) was used, for the judicial officials *nā'ib*.

In the reorganization of the army and the provincial administration on the European model under Maḥmūd II and ʿAbd al-Majīd *ḳaimaḳam* became in the army the equivalent of Lieutenant-Colonel and in the civil service the name of the official entrusted with the administration of a district (*ḳazā*).

KĀ'IM AL-ZAMĀN (A.) i. e. "Lord of the Age", a Shīʿa term. The phrase includes the two theological meanings of "representative of God on earth" and "Deputy" of the Prophet. Among the earlier Shīʿis for example the Imām is called "the *ḳā'im*", "our *ḳā'im*" or "the *ḳā'im* of his age", synonymous with *ḥudjdja* or *ḳhalīfa*. The political application of the word brought in the meaning of "rebellious", current among all the seceding sects, e. g. also among the Khāridjīs. Through chiliasm the name is given to the Mahdi as "resurrected" from (apparent) death who is active in the "age" through the *naḳīb* and *dāʿī* until as *ḳā'im al-ḳiyāma* he brings about his kingdom and the judgment. Among the Imāmīs the twelfth Imām, and among the Ismāʿīlīs the seventh is therefore *ḳā'im al-zamān*. But the more the Imām becomes like to God in the subdivisions of the latter, the more he falls into the background and is only occasionally referred to as "the *ḳā'im*" simply, with reference to Sura iii. 16, xiii. 33, while the name and powers are transferred to heads of sects, who are mostly not ʿAlids. Gnostic speculation equates the *ḳā'im al-zamān* to the first emanation, e. g. among the Druses to the *intelligentia prima*, *ʿaql*, i. e. Ḥamza. The term is mystically amplified by the interpretations of the mysteries of the initial letter *ḳāf*, the symbol of the girdle of the world.

(R. STROTHMANN)

AL-ḲĀ'IM BI-AMRI 'LLĀH, ABŪ DJĀ'FAR 'ABD-ALLĀH, 'Abbāsīd Caliph. He is said to have been born in Dhu 'l-Hijjdja 391 (Nov. 1001); his father was the Caliph al-Ḳādir [q. v.], who had homage paid to him as his successor shortly before his death; his mother was an Armenian or Greek slave. When he ascended the throne (Dhu 'l-Hijjdja 422 = Nov.—Dec. 1031), the Caliphate had almost entirely lost its secular power and anarchy reigned practically supreme in the capital. To make himself obeyed, he ordered in 426 (1034/35) that all judicial offices should temporarily suspend their activities, which was, however, entirely without success. In his reign ended the Buyid dynasty and their place was taken by the Seldjūks. On Ramaḍān 22, 447 (Dec. 15, 1055) the Seldjūk chief Toghrul Beg was officially prayed for and on the 25th the latter entered Baghdād in state, nominally as vassal but in reality as master of the Caliph (see KHUSRAW FIRŪZ), who soon afterwards in 449 (1058) granted him the Sultanate and the title of honour of "King of the East and of the West". In Dhu 'l-Ḳāda of the following year (Dec. 1058) the Turkish general al-Basāsiri [q. v.] took possession of the capital, while the Caliph took refuge with the 'Uḳailid Ḳuraish b. Badrān [q. v.], and on the 13th (Jan. 1, 1059) prayer was offered in Baghdād for the Fāṭimid al-Mustanṣir. Al-Ḳā'im, however, was soon again recognized as Caliph (end of 451 = 1059/1060) and although he was only a tool in the hands of the Seldjūks, he was treated with respect both by Toghrul Beg and his successors. He died in Sha'bān 467 (April 1075).

(K. V. ZETTERSTEEN)

AL-ḲĀ'IM BI-AMR ALLĀH, ABU 'L-ḲĀSIM 'ABD AL-RAḤMĀN, the second ruler of the Fāṭimid [q. v.] dynasty, born in 280 (893), succeeded his father 'Ubaid Allāh al-Mahdi in 322 (934) on the throne, assumed the praenomen Muḥammad and at his proclamation took the name of al-Ḳā'im bi-Amr Allāh. His father had designated him his successor as early as 298 (911), when after the death of al-Shī'ī [q. v.] he thought his own rule sufficiently secure, and had had his (viz. the prince's) name mentioned in the Friday prayer; the prince commanded the army and conducted most of the campaigns while 'Ubaid Allāh was still on the throne; for his father had never placed himself at the head of his troops nor ever even taken a personal part in any of the numerous wars, but used to entrust his emirs with their con-

duct and after failures, or on particularly difficult expeditions, he used to appoint his eldest son to the supreme command.

Of al-Ḳā'im's campaigns, while heir-apparent, may be mentioned the conquest of Constantine and Tripolis as well as his efforts to conquer Egypt. He gained great successes especially in the second expedition against Egypt in 307—309 = 919—921. He had conquered Alexandria and Djiza (Giza) and occupied the Faiyūm and Ushmunain. But disease, deficiencies in the supply of reinforcements and a strengthening of the 'Abbāsīd governors' troops on the other side and the defeat of his fleet at Rosetta forced him finally to withdraw. He had, however, consolidated Fāṭimid sway as far as Barḳa. In 316 (928) he developed the town of Masila as his capital and called it al-Muḥammadiya.

When in 322 (934) he succeeded his father, he had at once to turn his attention to an imposter, who gave himself out to be the son of al-Mahdi. After defeating him without difficulty, he turned his attention westwards to secure his authority there. He then devoted himself to various expeditions, sent his fleet to the coast of France, where the crews plundered and took prisoners, to Genoa, which was captured for a short time, and to Calabria. In 323 (935) he sent an army of 10,000 to Egypt, which conquered Alexandria, but was soon afterwards defeated by Muḥammad b. Tughdj al-Ikhshid, brother of the 'Abbāsīd governor. At home al-Ḳā'im had to wage a continual struggle with rebellious tribes, his most redoubtable opponent being the rebel Abū Yazid [q. v.]. After heavy fighting and many misfortunes, he succeeded in driving his opponent out of al-Mahdiya but soon afterwards in 334 (946) he was hard pressed at Sūsa with his army and finally surrounded. During the siege, he fell ill and died in a few weeks.

Al-Ḳā'im was a fanatical champion of fāṭimid doctrines. His reign was a period of ceaseless wars, which were waged in the fiercest and most barbarous fashion. Courage, ability and tenacity cannot be denied him. He laid sound foundations for the greatness of his successors. In this period of war-mania, it was impossible for him to attend to the works of peace. The *Bibliography* is found in Wüstenfeld, *Gesch. d. Fatimid. Chaliphen* (*Abh. der Kön. Ges. der Wiss. zu Göttingen*, xxvi., xxvii., 1881) and above ii. p. 92a, at the end of the article FĀṬIMIDS and i. p. 114a, article ABŪ YAZID. (SOBERNHEIM)

KAIMAK. [See KIMĀK]

ḲĀ'IME (T. originally A.; cf. ḲĀ'IM), the name for paper-money in Turkey, an abbreviation for *Sehim ḳā'imesi* ("revenue bonds"); the word was originally used of drawings and documents which were written on large, long leaves in such a way that the lines ran parallel to the narrower side, as was the case with the first issues of Turkish paper-money; later the term *ewrāḳī naḳ-dīya* took its place.

The first *ḳā'ime* appeared in 1840 and were manuscript. They bore interest at the rate or 12%, were to be accepted as money at the public banks and to be current throughout the kingdom. They were replaced in 1842 by printed notes of a primitive style; the smaller notes bore no interest; the rate of interest for the others was reduced to 6% and at the same time the

circulation of paper-money was limited to the capital and its vicinity. The total of this first issue was not to exceed 60,000,000 piastres; but in a very few years, as a result of the wretched condition of Turkish finances, it was swollen enormously and in 1862 calculated at approximately a milliard piastres. In this year, with the help of a foreign loan, the paper money was redeemed for 40% cash and 60% Turkish Consols (so-called *consolidés*) and made no longer legal tender.

In 1876 and 1877 the Porte found itself forced by the bankruptcy of the state and the outbreak of war with Russia to take refuge in paper-money for a second time. *Kā'ime* were issued for 1600 million piastres, which, however, depreciated in a very short time and at the beginning of the 80's of last century were called in along with the depreciated copper-money.

A third issue of a paper currency of a total value of 16,702,106,360 piastres dates from the world-war; it is still (1923) in circulation.

The history of the *kā'ime* has still to be written. (J. H. MORDTMANN)

KAIN. [See HĀBIL]

AL-KĀIN (B. DJASK), usually BANU 'L-KĀIN or, with ellipsis of the syllable *nu*, BAḲKĀIN, nisba *Kāinī*, an Arab tribe. The official Arabic genealogy gives as its true name al-No'mān b. Djasr (see Wüstenfeld, *Geneal. Tabellen*, Tab. 2, 20; Ibn Duraid, *al-Ishāḡ*, ed. Wüstenfeld, p. 317; *Tādī al-ʿArūs*, s. v. *ḡyn*; Ibn Ḳhallikān, *Wafayāt al-Aʿyān*, ed. de Slane, Article *Wathīma b. Mūsā*, about the middle; etc.); it therefore interpreted as originally a nickname — and probably rightly — al-Kāin, which means, as a name, "smith", "metal worker", "swordmaker" etc. (cf. Aram. *ḡenāyā*, *ḡaināyā*, "smith") and is in a wider application applied to artisans generally (for the meaning "slave", which the native lexicons also give and which Baethgen, *Beiträge zur Semit. Religionsgesch.*, p. 152 uses for his deductions, I have no really certain reference). This might be derived from the Banu 'l-Kāin having been at one time actually metalworkers, perhaps miners. Thus the Farān b. Balī, who worked the celebrated Sulaim or Farān mine were also called *Banu 'l-Kāin*, "sons of the smiths" or *al-Ḳuyūn* "the smiths"; see Yāḡūt, *Muḏjam* (ed. Wüstenfeld), iii. 865 sq.; al-Bakrī, *Muḏjam* (ed. Wüstenfeld), p. 20 = Wüstenfeld, *Die Wohnsitze u. Wanderungen der Arab. Stämme*, in *Abh. d. Gesellsch. d. Wiss. zu Göttingen*, xiv. 28 (Nöldeke wrongly refers this passage, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xl. 181, note 6 to our Banu 'l-Kāin); Sprenger, *Die alte Geographie Arabiens*, § 419 and 28, 1 and Wüstenfeld, *Register zu den Geneal. Tabellen*, p. 162. Our tribe, however, appears in the old poems and historical references to it to be in every respect a genuine Beduin tribe. The period of

industrial activity of the Banu 'l-Kāin would therefore have to be looked for in the very remote past (cf. Sprenger, *op. cit.*, § 420). Another explanation of the name Banu 'l-Kāin seems to me to be not quite impossible. The names *al-Kāin* and *Banu 'l-Kāin* are used by the Beduin Arabs, who scorn every kind of manual labourer, as terms of contempt; cf. the glossary to the *Naḡā'id al-Dīār* wa 'l-Farazdaq, under *Kāin*, where Bevan gives about 60 references, all from the *Naḡā'id*; al-Farazdaq himself appears here 18 times as "Ibn al-Kāin" or "Ibn al-Ḳuyūn", and his family three times as "Banu 'l-Kāin", cf. also Kais b. al-Ḳhaṭim, *Diwān* (ed. Kowalski), Nr. 10, 11; Ḥassān b. Thābit, *Diwān* (ed. Hirschfeld), Nr. cxxix, 4; Ḥamāsa of al-Buḡhurī (ed. Cheikho), Nr. 1333, 1 and Ṭirimmāh, *Diwān* (ed. Krenkow, still going through the press), N^o. 19, 5. It is therefore imaginable at least that in our case also, we have an original term of abuse, which has remained attached to the tribe.

The Banu 'l-Kāin formed a branch of the great system of tribes of the Ḳuḏā'a, who, in origin probably South Arabian, were settled in the historical period in the upper north, in Syria, in Mesopotamia and in the Irāk and to all appearance had gone over entirely or at least for the most part to Christianity there (see Wüstenfeld, *Tabellen*, *loc. cit.*; Ibn Duraid, *op. cit.*; Ibn Ḳutaiba, *Kit. al-Ma'ārif*, ed. Wüstenfeld, p. 51; Ibn 'Abd Rabbihi, *al-Iḡd al-farīd*, Cairo 1305, ii. 58, etc.). That the *Ṣiḡāḡ* and following it the *Lisān al-ʿArab* and the *Tādī al-ʿArūs* under *ḡyn* and the scholion to al-Hariri, *Maḡāmāt*², p. 90 include them in the Banū Asad, is probably due simply to carelessness, to a confusion of Asad, who in the Arab genealogical scheme appears as the great-grandfather of our al-Kāin (cf. again Wüstenfeld, *Tabellen*, Tab. 2) with the eponymous hero of the great Muḏarī tribe of the Banū Asad. As foolish as it is isolated is the statement that they had belonged to the Tamim (*Tādī al-ʿArūs*, *loc. cit.*). Their tribal area — corresponding roughly to Arabia Petraea — extended from the Sinai Peninsula along the Syrian frontiers far into the land east of Jordan (cf. Wüstenfeld, *Register zu den Geneal. Tabellen*, p. 371, where all is not quite correct; Sprenger, *op. cit.*, § 420 sq.; Causin de Perceval, *Essai sur l'histoire des Arabes*, ii. 232, iii. 345, 352; Nöldeke, *Über die Amalekiter u. einige andere Nachbarvölker der Israeliten*, in Benfey's *Orient u. Occident*, ii. 635; al-Hamdānī, *Dīḡāṭ al-ʿArab*, ed. Müller, i. 131 sq. = Sprenger, *op. cit.*, § 32; 'Urwa b. al-Ward, ed. Nöldeke, p. 32 = Ḥamāsa of Abū Tammām, ed. Freytag, i. 228, Schol.; *Aḡḡānī*¹, xiv. 124; al-Yaḡḡubī, *Kit. al-Buldān*, in *Bibl. Geogr. Arab.*, ed. de Goeje, vii. 326; Yāḡūt, *op. cit.*, iii. 459, iv. 413; al-Wāḡidī, *al-Maḡḡāzī*, abbrev. transl. by Wellhausen, p. 315; Sprenger, *Das Leben u. die Lehre des Propheten Moḡammad*, iii. 295; Ibn al-Aṡṡir, *al-Kāmil fī 'l-Ta'riḡḡ* (ed. Tornberg), vi. 87 sq., and the maps in Blau, *Arabien im sechsten Jahrhundert*, in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxiii. 559, and in Caetani, *Annali dell' Islām*, ii. 2, at the end of the volume. They can hardly be considered a pure stock (in Ibn Ishāḡ they are often called "Musta'riba") along with all sorts of neighbouring tribes, see al-Ṭabārī, *Ta'riḡḡ*, ed. de Goeje, i. 1611 and 2347).

History. In the poetry and tales of the

"battles of the Arabs" and of other events in olden times the Banu 'l-Ḳain appear in typical Beduin feuds with the tribes of Kalb (*Ḥamāsa*, loc. cit., p. 77; Yāqūt, loc. cit., iii. 241; Ibn al-Aṭhīr, loc. cit., i. 370; Ibn Sa'd, *Ṭabaḳāt*, ed. Sachau, III/I. 27 sq. = Ibn al-Aṭhīr, *Uṣd al-Ḡhāba*, ii. 224 = Ibn Ḥadjār, *al-Iṣāba*, ii. 45 = Sprenger, *Das Leben u. die Lehre des Propheten Moḥammad*, i. 401, also Yāqūt, op. cit., iv. 49), Bahra' (al-Balādhuri, *Futūḥ al-Buldān*, ed. de Goeje, p. 283 = Ibn al-Faḳīh, *al-Buldān*, in *Bibl. Geogr. Arab.*, v. 182 sq.), Ḡhassān (Ḥamza al-Iṣbahānī, *Ta'riḫh*, ed. Gottwaldt, p. 121, where *bōny 'l-ḳyn bn* should be read for *yōny 'l-ḳbryn*), Ḡhaṭafān (*Aḡḥānī*, ii. 194), etc. At Mu'ta, on the Yarmūk (Hieromax) and perhaps also at Fihl, they fought in alliance with other Ḳuḏā'a tribes and the Lakhm and Djudhām under the banner of the Byzantines, whose authority was recognised more or less by all the Arab tribes camped along the frontiers of Syria (Ibn Hishām, *Sira*, ed. Wüstenfeld, p. 792; al-Tabarī, op. cit., i. 1611, 2347; (Pseudo-) Abū Ismā'il al-Baṣrī, *Futūḥ al-Shām*, ed. Lees, i. 97, 114; Caussin de Perceval, op. cit., iii. 212; Sprenger, *Das Leben u. die Lehre*, iii. 292, note 2; Caetani, op. cit., II/I. 83, III/I. 206 etc.). In al-Tabarī, op. cit., i. 1872 Saif b. 'Omar says that the wave of apostasy which swept over almost all Arabia on the death of the Prophet, also affected the Banu 'l-Ḳain (cf. Caussin de Perceval, op. cit., iii. 345, 352 and Caetani, op. cit., II/I. 583, 585). From this statement it might be deduced that our tribe had become subject to the state of Medina while the Prophet was still alive; but it does not appear to me to be quite credible. In the civil war between Marwān I and 'Abd Allāh b. al-Zubair we naturally find the Banu 'l-Ḳain as South Arabians on the side of the former (al-Tabarī, op. cit., ii. 478; al-Mas'ūdī, *al-Tanbih wa 'l-Ishraf*, in *Bibl. Geogr. Arab.*, viii. 308, etc.) and on the occasion of the rising of Bahlūl b. Bishr Kuthāra in 119 = 737 we again find them in the pay of the Umayyads (al-Tabarī, op. cit., ii. 1623 sq., and Ibn al-Aṭhīr, *al-Kāmil fī 'l-Ta'riḫh*, v. 156). They again played a very important part in the Damascus troubles of 176 (792) in the reign of Harūn al-Rashīd, in which they and Ḳaisīs (Nizārīs) fought against the other Yemenīs (Ibn al-Aṭhīr, op. cit., vi. 87 sq.). They then disappear from our knowledge.

According to Nashwān's *Shams al-Uṭūm* Luḳmān was a slave of al-Ḳain b. Djasr al-Kuḏā'i (see *Die auf Südarabien bezüglichen Angaben Nashwān's im Šams al-Uṭūm*, ed. by 'Azīmuddīn Aḥmad, p. 95).

The best known member of the tribe is the poet Abu 'l-Tamahān al-Ḳainī, who flourished about 600 A. D. (see Guidi, *Tables alphab. du Kitāb al-Aḡanī*, p. 417; Ibn Ḳuṭaiba, *Kitāb al-Shi'r wa 'l-Shu'arā'*, ed. de Goeje, p. 229 sq.; Ibn Duraid, op. cit., p. 317; Ibn Khallikān, *Wafayāt al-A'yān*, Bulāḳ 1299, i. 18 and *Ḥamāsa*, loc. cit., p. 558; — wrongly in Wüstenfeld, *Genealog. Tabellen*, Tab. 2, 24 and *Register*, p. 441, who has misunderstood the passage in the *Ḥamāsa*).

H. Ewald (*Gesch. d. Volkes Israel*, i. 337) has with all reserve connected the Old Testament Ḳayin (= Ḳain) or Ḳēnites (*Κεναῖοι*, *K[ε]ινῶν*) with our Ḳain. Nöldeke has followed him, at first only as a possible hypothesis but later with more confidence (*Über die Amalekiter*, op. cit., p. 634 sq.,

Zeitschr. d. Deutsch. Morgenl. Gesellsch. xl. 181 and in Cheyne and Black's *Encycl. Biblica*, i. 130. The Ḳēnites were settled in the south of Palestine in the ancient Negeb, the later Idumaea; this would actually be the region where we find the Balkain. Besides, the Ḳēnites were obviously nomads like the Balkain (Stade, *Zeitschr. für d. Alttest. Wiss.*, xiv. 287 and Sayce, *Early Israel and the Surrounding Nations*, p. 91 sq., and do. in Hastings' *Dict. of the Bible*, s. v. *Kenites* recognise in them from the name — see above — a tribe of smiths; but they fail to give their readers any proof that they were such in historical times. Stade's identification, following Wellhausen, *Die Composition des Hexateuchs*, p. 305, of the Ḳēnites with Cain, the brother of Abel, op. cit., p. 285 sqq., which Ed. Meyer, *Die Israeliten und ihre Nachbarstämme*, p. 395 sqq., Procksch, *Die Völker Alt-palästinas*, Vol. i. part 2 of *Das Land der Bibel*, p. 37 etc. have adopted, I consider, with Nöldeke, *Encycl. Bibl.*, loc. cit., very problematic). But the two coincidences mentioned do not seem sufficient yet to justify us in identifying the Ḳēnites with the Balkain. The Ḳēnites disappear from literature with the Exile (with the exception of the Rēkhābites, whose inclusion in the Ḳayin is, however, not absolutely certain). They may nevertheless have continued to exist. But that so small a clan, which never appears as completely autonomous in the Old Testament should have continued to exist for a millenium after the Exile and at the end of this period still possess considerable strength and prosperity, — even as the result of incorporating other tribes — I consider a very daring assumption. The name Ḳain besides was obviously not at all a rare one (see Wüstenfeld, *Register zu den Geneal. Tabellen*, p. 371, Lidzbarski, *Handbuch der nordsemītischen Epigraphik*, p. 362, also Likmann, *Zur Entzifferung d. thamud. Inschriften*, p. 45). Cf. thereon Ed. Meyer, op. cit., p. 399.

Bibliography (besides the works already mentioned): al-Tabarī, *Ta'riḫh* (ed. de Goeje), *Aḡḥānī* and Yāqūt, *Muḏjam* (ed. Wüstenfeld), see the indices thereon; Ed. Meyer, *Die Entstehung des Judentums*, p. 115 sq., and Guthe, *Kurzes Bibelwörterbuch*, s. v. *Kain*.

(A. FISCHER)

ḲAINUḲĀ^c (BANŪ), one of the three Jewish tribes of Yaṭhrib. The name differs from the usual forms of Arabic proper names but at the same time has nothing Hebrew about its type. Nothing certain is known regarding their immigration into Yaṭhrib. They possessed no land there but lived by trading. That their personal names known to us are for the most part Arabic says as little regarding their origin as the occurrence of Biblical names among them. But there seem to be no valid reasons for doubting their Jewish origin.

In Yaṭhrib they lived in the south-west part of the town, near the *Muṣallā* and close to the bridge over the Wādī Buṭhān, where they occupied two of the castles (*āṭām*), characteristic of Yaṭhrib. They practised the goldsmith's art among other trades; al-Bukhārī (*Farḍ al-Khums*, Bāb i.) incidentally mentions a goldsmith of the Ḳainuḳā'. On their expulsion they left behind them arms and tools, which were divided among the Muslims after Muḥammad had received his fifth share. The number of their fully equipped fighting men varies in the references to it between 400 and 750.

After the dominating power in the old Yathrib had passed from the Jews to the Banu Kaila the Kainukāc were in alliance with the Khazraj [q. v.]. In Muḥammad's settlement of the relations of believers and other sections of the community they are not mentioned by the name of their tribe any more than the Naḍir [q. v.] and Kuraiza [q. v.] but are described as "Jews of the Naḍjdār, Hārith, Sā'ida and Djuḥam" (articles 26—29) i. e. as allies of different subdivisions of the Khazraj.

After the battle of Badr (Ramaḍān 2 H. = March 624) Muḥammad's relations with the Jews of Medina became troubled. The Jews as a body had adopted an unfriendly attitude to the Prophet. From the religious point of view therefore they became inconvenient; and from the political side, as a powerful foreign body within the just converted town, they were a great danger. When Muḥammad felt his position strengthened by the battle of Badr, the idea of expelling his enemies must soon have entered his head. The Kainukāc, as they lived in the city itself, were those he wished to be rid of first. With this description of the situation, his attack on the Kainukāc (in all probability as early as Shawwāl 2 H. = April 624) is sufficiently explained. What the Muslim writers give as special reasons for the attack has hardly more than anecdotal value. Sometimes it is said to have been a jest that a Muslim made to a Jewish woman, sometimes the Kainukāc are said to have behaved with particular arrogance. Sūra iii. 10 sqq. and viii. 60 sqq. are said to refer to these incidents. Sūra iii. 11 refers to the victory at Badr as an example and warning, and viii. 60 speaks of vengeance against people, from whom treachery is feared.

After a fourteen days' siege, the Kainukāc surrendered without striking a blow; the men were bound and seemed to have to fear the worst. The energetic intervention of 'Abd Allāh b. Ubayy, chief of the Khazraj and leader of the Munāfiqūn, however, effected an amelioration of their lot. They departed first to the Jewish colonies in the Wādī 'l-Kurā, north of Medina, and from there they went to Adhri'āt in Syria.

(A. J. WENSINCK)

AL-KAIRAWĀN (French Kairouan) a town in Tunisia, 112 miles south of Tunis and 40 west of Susa to which it is joined by a railway; it lies in 35° 40' N. Lat. and 10° 2' E. Long. (Greenwich). The population in 1910 was 22,000 including 800 foreigners of whom 300 were French.

Kairwan lies 250 feet above sea-level in the middle of a great plain traversed by the Wādī Zerūd and the Wādī Merguelli, which ultimately disappear in sebkhas or salt lakes. These rivers are subject to sudden floods, which sometimes

transform the environs of the town into a lake extending up to the foot of the walls. When the rains have been sufficiently abundant, the soil yields a rich harvest; al-Bakrī mentions that in the western part called "Faḥṣ al-Darrāra", the grain sown is sometimes returned a hundredfold. But usually the ground, lacking trees or herbaceous vegetation, and covered with salt efflorescence, gives the country a desert appearance. The temperature shows considerable variations (24.8° in winter and 120.2° in summer). The rainfall is not heavy (14.5 inches per annum) and therefore running waters and springs are scarce, so that the inhabitants have to use cisterns to collect their drinking-water.

Kairwan really consists of two towns, the city proper surrounded by a battlemented wall of brick, flanked with buttresses and round towers as well as a ḡaṣba, 3350 yards round, and secondly a vast faubourg stretching to N. and N.W., the faubourg of the Zlas (Djās) so called from the popular name of the tribe occupying the neighbouring country. To the south finally there has grown up a little European quarter. The interior of the town is a network of narrow and tortuous streets. Commerce and industry are fairly busy, although Kairwan has lost much of its economic importance. The principal industries, which, it may be added, are of the nature of home-industries, are the manufacture of carpets, which occupies a thousand looms and that of woollen blankets. The working of leather (saddle-making, shoe-making) for which the artisans of Kairwan were at one time very famous, and that of copper, are still followed by several hundred workers. The importance of Kairwan in the past is particularly shown by the number of religious edifices to be seen in it. The principal is the great mosque of Sidi 'Oḡba, one of the largest buildings in North Africa, the foundation of which dates back to that of the city itself. Among the others may be mentioned the Mosque of Sidi Ṣāhib (vulgo Ṣāḥab, Mosque of the Barber) dating from the first century A. H., but rebuilt and extended in the xvth century A. D., the mosque of the Three Gates (Djāmi' Tlāta Bībān), contemporary with the preceding, the Madrasa Sidi 'Abid al-Ḡharyānī (xvth cent. A. D.) and the Mosque of the Sabres (Djāmi' 'Amar 'Abbāda), finished in 1871. The oldest mosques, for the building of which were used materials from Hadrumetun (Susa) and even from Carthage, show an interesting mixture of Byzantine and Oriental influences. The latter are clearly seen in the decorative motifs (faiences, woodwork) analogous to those of 'Irāḡ and Baghdād. The more recent buildings show examples, sometimes remarkable, of wooden ceilings in compartments, arabesques cut in plaster showing Hispano-Moorish inspiration. We may add that the buildings of the xvth and xviii centuries often reveal the intervention of European architects and workmen, especially Italians.

History. The foundation of Kairwan dates from the Arab conquest. The town was in fact built by 'Oḡba b. Nāfi' in 50 (670) to give his troops a base of operations and depot for supplies and also to keep in awe the Berber tribes. "I intend", the historian al-Nuwairi makes him say, "to build a town which can serve as a depot of arms (Kairawān) for Islām to the end of time" (al-Nuwairi in Ibn Khaldūn, *Hist. des Berbères*, transl.

de Slane, i. 327). Kairwan was built on — or very near — the site of a small Roman town called *Kamūdah* or *Kamūnia*, the materials of which were used by the Arabs. The site of the new town, two days' journey from the shore, had been chosen to put the Muslims out of danger from an attack by the Byzantines, who still held the towns on the coast. 'Oḳba first of all built a mosque, the palace of the government, then houses for his soldiers as well as a wall 2750 yards long. Legend was not long in embellishing this foundation with marvellous tales. The site of Kairwan was, it was related, covered with impenetrable thickets inhabited by deer and reptiles which disappeared at 'Oḳba's command. A vision revealed to the conqueror the exact position of the *qibla* and of the *mihrāb* of the mosque, and the existence of a spring indispensable for the inhabitants, etc. The buildings were hardly completed when 'Oḳba was disgraced and called back to the East (55 = 675). His successor Dīnār Abu 'l-Muhādīr hastened to destroy Kairwan and built a new town called Takrouan or Takrūn two miles to the North. Restored to the favour of the Caliph and sent back to Africa, 'Oḳba rebuilt Kairwan on the original site.

Kairwan was henceforth the capital of Muslim Africa and the residence of the Arab governors, but during the century which followed the death of 'Oḳba it had to submit to numerous vicissitudes. After the rising of Kusaila it was occupied by the Berbers and remained for four years in their power (64–68 = 684–688). During the *Khāridjī* rising it was taken and pillaged by the *Wafardjuma* (139 = 756–757), who committed such excesses there that the population scattered over the surrounding country. At the end of fourteen months, the *Abādī* Abu 'l-Khattāb [q. v.], chief of the *Huwāra* [q. v.], drove out the *Wafardjuma* and re-entrusted the government of the town to 'Abd al-Rahmān b. Rustam [q. v.] (141 = 758/9). In 145 = 762/3 Ibn Ash'ath was victorious over the *Khāridjīs* and re-established the seat of the government at Kairwan. He endeavoured to repair the damage done by the Berbers, and to protect the town from a new attack he surrounded it with a wall of brick, 12 cubits thick. These precautions did not, however, prevent the *Abādī* tribes under the command of Abū Ḥātim [q. v.] from laying siege to Kairwan (154 = 771) in which the governor 'Omar b. Ḥafṣ, who had escaped from Tōbna, was shut up. After the death of 'Omar, who had been killed during the siege, his successor *Djamil* (or *Hamid*) b. Ṣaḡr capitulated and opened the gates to the enemy. There were, however, no massacres. The inhabitants were allowed to go freely and the victor was content to demolish the fortifications. The *Khāridjī* occupation was of short duration. By 155 = 772, Yazīd b. Ḥātim, victorious over the heretics, had taken Kairwan again. He rebuilt the great mosque, had bazaars built for each trade-guild and earned the title of second founder of the city (*al-Nuwairī*).

Under the *Aghlabids* (800–909 A. D.) Kairwan underwent considerable expansion and reached the zenith of its prosperity. The princes of the dynasty vied with each other in enriching the town with rich monuments and multiplied the works of public utility. Ziyādat Allāh I and Ibrāhīm built waterworks and cisterns to secure the town's

supply of drinking water, for the reservoirs built for the purpose in the time of the Caliph *Hishām* had become insufficient. "The largest and most useful of these reservoirs", says al-Bakrī, "is circular in form and of enormous size. In the centre rises an octagonal tower covered by a pavilion with four doors. A long series of arcades of arches resting one upon the other ends on the south side of this reservoir". These waterworks have not completely disappeared and one of the reservoirs restored by French engineers is still called the "reservoir of the *Aghlabids*". The great mosque was rebuilt from top to bottom. The primitive edifice built by 'Oḳba had already been destroyed by Ḥasan b. al-Nu'mān [q. v.] who had rebuilt it and adorned it with pillars of marble which, without doubt, came from the ruins of Carthage. Soon becoming too small, the mosque was again enlarged in 105 = 723/724, then entirely rebuilt with the exception of the *mihrāb* in the time of Yazīd b. Ḥātim (155 = 772). Ziyādat Allāh I in his time had the whole building taken down including the *mihrāb*, which was enclosed between two walls so as to be preserved without being seen except through a narrow grill, and replaced it by the present mosque. According to al-Bakrī, 80,000 *mithkāl*s (about £ 320,000) were expended on this work. Ibrāhīm b. Aḥmad completed the work of Ziyādat Allāh; he lengthened the principal building and built above the nave abutting on the *mihrāb* a cupola called *Qubbat Bāb al-Bahw* (the cupola of the gate of the pavilion). 220 cubits long, 150 broad, divided into 17 naves by 414 columns, the great mosque could rival the most famous monuments of the East. Other religious buildings restored in the same period also claimed the attention of visitors, like the Mosque of the Three Gates, the Mosque of Sidi Ṣaḡab (Mosque of the Barber), the Mosque of the Anṣār, which according to the legend was built even before the arrival of 'Oḳba by one of the companions of the Prophet, Ruwaif' b. Thābit, and the Mosque of Ismā'il b. 'Obaid al-Anṣārī.

Outside the town rose the royal residences, *Qaṣr al-Qadīm* and *al-Raḡḡāda*. *Qaṣr al-Qadīm*, also called *al-'Abbāsiya*, was built in 184 = 800, 3 miles S. E. of Kairwan by Ibrāhīm b. Aghlab, who settled there under the protection of his negro guard and made it the seat of government. It is the "Castle of the Moat", where were received the ambassadors of Charlemagne. Around the palace there grew up a town provided with baths, caravanserais and bazaars and surrounded by a wall with five gates. Al-Bakrī mentions in it a mosque flanked by a cylindrical minaret ornamented with seven tiers of columns. Some distance off was another castle called *al-Ruṣāfa*. *Al-Raḡḡāda*, four miles S. W. was a creation of Ibrāhīm b. Aḥmad (263 = 876/877). This prince built here in a place celebrated for the purity of its air, a castle around which grew up an important town with bazaars and baths. It measured 24,000 cubits in circumference but enclosed large areas filled with parks and gardens.

A venerated sanctuary and capital of a powerful state, Kairwan was also a great commercial city. The shops of the merchants stood on either side of a covered street about two miles in length. It was also a city of learning where the study of *Mālikī* law was particularly honoured. Celebrated professors like Asad b. al-Furāt [q. v.], Ibn Rashīd

and Saḥnūn had numerous pupils there. The teaching of medicine was equally flourishing. The Jew Ishāk b. Imrān, physician to Ziyādat Allāh II and his pupil Ishāk b. Sulaimān founded a regular school there.

This prosperity did not end with the Aghlabid dynasty; it continued under the Fāṭimids and the early Zirids, although the Mahdī 'Ubaid Allāh, after living some time at Raḡḡāda, had moved the seat of government to al-Mahdiyya. The town suffered a great deal, however, from the revolt of Abū Yazīd [q. v.], "the man with the ass." The Nekkārīs captured it in 333 = 944 and pillaged it in spite of the appeals of the notables and scholars who had come to implore the clemency of the conqueror. But in 334 = 946, the Caliph Ismā'il retook Kairwan and after having defeated the Khāridjis built some distance away the town of Sabra to which he gave the name of al-Manṣūriya, in memory of his victory over Abū Yazīd, and in which he established his residence (337 = 948). His successor al-Mu'izz moved to al-Manṣūriya the bazaars and factories of Kairwan to the great dissatisfaction of the inhabitants. The new town was surrounded by a wall with five gates of which the principal, Bāb al-Futūḥ (gate of conquest) was used by the sovereign when he took the field at the head of his army. The town of Raḡḡāda on the other hand abandoned by its inhabitants and half destroyed by the Nekkārīs was razed to the ground. The gardens alone were spared. During all this period Kairwan and al-Manṣūriya still had a very active economic life. The manufacture of carpets, of woollen and cotton goods flourished there. Cultivated land and orchards extended round the town. The wealth of the inhabitants is evidenced by the fact that the agents of the Fāṭimids were able to exact from them 400,000 dinars on a single occasion. According to al-Bakrī the taxes levied each day at one of the gates of al-Manṣūriya amounted to 26,000 dirhems (about £ 600). The people of Kairwan, however, complained of the tyranny of the Fāṭimids and the bulk of them remained attached to orthodoxy. Their hostility showed itself in serious bloodsheds under the earlier Zirids. In 407 (1017-18) 3,000 Shī'īs were massacred in a rising and the town of al-Manṣūriya was pillaged by the populace. Al-Mu'izz's break with the Fāṭimids was therefore received with enthusiasm by the people of Kairwan.

This act of rebellion let loose on Ifrīqiya the Hilālī invasion of which Kairwan very soon felt the disastrous results. After the defeat of Haidērān, al-Mu'izz ordered his soldiers to evacuate the town; they sacked it first of all and he withdrew to al-Manṣūriya. He then rebuilt the walls of Kairwan on a length of 22,000 cubits and joined Kairwan to al-Manṣūriya by two walls half a mile apart (444 = 1052). In spite of these precautions the attacks of the Hilālīs became more and more serious. Kairwan was abandoned by a part of the population and in 449 = 1057, al-Mu'izz decided to evacuate al-Manṣūriya and retire to al-Mahdiyya. The Arabs then entered the town and wrought the most frightful havoc. "They destroyed all the beauty and all the splendour of the monuments of Kairwan. Nothing that the Ṣanhādji princes had left in their palaces escaped the greed of the brigands. All that there was in the town was carried off or destroyed."

(Ibn Khaldūn, *Hist. des Berbères*, transl. de Slane, i. 37). The inhabitants were scattered in all directions, "some went to Egypt, others to Sicily and Spain; a considerable body to Fās." ('Abd al-Wāḥid al-Marrākushi *al-Mu'djīb fi Talkhīṣ Akhbār al-Maghrib*, ed. Dozy², p. 259).

The capital of Ifrīqiya never recovered from this disaster. Pillaged again in 1060 by the Huwāra, its possession disputed between the Zirids and the governor, the Ka'id Ibn Maimūn, who tried to set up in it for his own benefit an independent principality with the support of the Hammādids, Kairwan remained under the domination of the Arabs and defenceless against the exactions of the nomads. "The latter levy contributions on every thing; the inhabitants are few in number, their trade and industries in a miserable condition" (al-Idrīsī, transl. de Goeje, p. 129). Stayed for a time in the reign of 'Abd al-Mu'min, who restored the town in part, its decline continued its rapid course under his successors and under the Hafsids as a result of the continued troubles of which Ifrīqiya was the theatre. At the end of the xivth century A. D. the town was almost deserted; its only inhabitants were the peasants who sought shelter there. It was gradually repopulated, but it was still very wretched at the beginning of the xvth century A. D. "The inhabitants", writes Leo Africanus who visited Kairwan in 922 (1516), "are at present all poor artisans, of whom some are carriers of the skins of sheep and goats, the others furriers whose handiwork is sold in the cities of Numidia, where no European cloth is to be had. But of all these trades there is not one, which is able to make a good livelihood and those who follow them live a miserable existence and are in very great poverty." Ill-treated by the rulers of Tunis, the people of Kairwan were in an almost continual state of revolt. They even definitely threw off the authority of the Hafsids when the latter had accepted the Spanish protectorate after the capture of Tunis by Charles V. in 1535 and recognized as chief the Marabout Sidi 'Arfa of the tribe of Shabbiya. In spite of the help of the Spaniards Mulay Ḥasan could not dispose of this pretender, who was supported by the Arab tribes and the Turks of the corsair Dragut. His successor Aḥmad Sulṭān was no more fortunate.

Under Turkish rule Kairwan felt the repercussion of all the troubles of the xviith century A. D. In 1701 the Bey Murād, to punish a rising of the inhabitants, destroyed the walls and the houses and only left the mosques and zāwiya standing. On the other hand Ḥusain b. 'Alī, founder of the Ḥusainid dynasty made great efforts to raise Kairwan from its ruins. He reconstructed the fortified wall round it and restored over fifty mosques, according to the author of the chronicle *al-Mashra' al-Malikī* (French transl. by V. Serres and Muḥammad Lasram, Tunis 1900). He had a "bardo" there, where he used to stay while his troops were going through the Djerid to collect the taxes. The inhabitants showed their gratitude to the Bey by supporting him vigorously against his nephew 'Alī Pasha, who could only capture Kairwan, where Ḥusain had taken refuge after a five years' siege (1735-1740). The town was once more razed by the victor, but it was rebuilt and, according to Desfontaines, was in 1784 "the largest town of the kingdom next to Tunis and even better built and less filthy than it".

Trade and industry were quite busy there and the people were exempt from taxes in return for the fidelity of their ancestors to the Bey Husain. Kairwan had also preserved its character as a place of sanctity and the inhabitants were very hostile to Christians. Very few Europeans, among whom were Peyssonnel, Shaw and Desfontaines had been able to visit the town. The fanaticism of the inhabitants persisted down to the end of the sixteenth century. After the signing of the treaty of Bardo (1881) which placed Tunisia under the protectorate of France, Kairwan was one of the centres of native resistance. To put an end to this, three columns under the supreme command of General Saussier set out from Tebessa, Tunis and Susa and united before the walls of the town. It was occupied without fighting on October 29, 1881.

KAIS, a little island in the Persian Gulf, in that part of it which the mediaeval Arab geographers call the “sea of Omān”, in 54° E. Long. (Greenw.) and 26° 30' N. Lat. Kais, which next to Kishm [q. v.] may now very well be considered the most important of the Persian islands of the Gulf, is about 10 miles long and five broad; it is separated from the mainland by a strait about 12 miles wide, which affords a very secure passage. Apart from a few rocky places, the island is quite flat; it is better cultivated than most of the islands of the Persian Gulf. The mediaeval Arab and Persian geographers make special mention of its prosperous condition,

noting particularly its wealth in trees (mainly date-palms) and refer to the cultivated fields, gardens and cisterns. Besides agriculture, navigation and trade, the then fairly numerous population of the island was also engaged in the pearl-fishery; for the latter see the remarks in Ibn Khurdādhbeh, Yāqūt, al-Dimashqī, Ḥamd Allāh Mustawfī and Ibn Baṭṭūṭa [*op. cit.*].

The name Kais is an arabicised form of the Persian Kis or Kish (the form Kās is also found; see al-Dimashqī, *op. cit.*). In the Portuguese and Dutch authors of the xvth and xvith centuries we find forms like QUIXI, QUEIS, CAEZ or QUECHE, QAS, GUESS etc.; cf. Vincent and Tomaschek, *op. cit.* Kenn (Khenn) is also sometimes given as the name of this island, e.g. by Vincent, Kinneir, Morier (*op. cit.*, p. 31), Ouseley, Kempthorne, Ritter and Tomaschek, and in *Selections from the records of the Bombay Government*, N° xxiv. 20, 596. But it is, however, doubtful, whether the existence of some such second name for Kais, which we know mainly from English sources (see on the other hand Schlāfi, *op. cit.*, p. 150), can be maintained. Could Kenn, the Khain of Ibn Khurdādhbeh (p. 62, 1), be the earlier name of another island near Kais, perhaps of the island of Farur (east of Kais)? See Schwarz, *Iran*, etc., p. 87. The circumstance that an Arab prince named Kais b. 'Umaira took possession of the island of Kish — it was henceforth occasionally called Djazirat Kais b. 'Umaira or Bani 'Umaira, see Yāqūt, i. 503, 2, ii. 711, 8 — may have effected the arabicisation of the old name. The latter itself does not, however, date only from the Arab chief just mentioned, as Ibn al-Balkhī, *op. cit.*, thinks, but goes back into the pre-Muḥammadan period, for we find Kish already mentioned in the Sassanian period, as one of the seven bishoprics of the Nestorian ecclesiastical province of Persis; for this reference to Kish about the middle of the sixth century in Syriac literature, see Guidi in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xliii. 413; Chabot, *Synodicon orientale* (Paris 1902), p. 680; Sachau, *Zur Ausbreitung des Christentums in der Persis* (= *Abh. der Berl. Akad.*, 1919, N° 1), p. 58.

Historical. In classical literature the island is only twice mentioned: in Arrian's *Indica* (37, 8) under the form *Karaiṇ* and in Pliny (*Nat. Hist.*, vi. 110) as Aphrodisia; cf. Vincent, *op. cit.*, Ritter, viii. 774, xii. 458 and Pauly-Wissowa, *Realenz. der klass. Altertumswiss.*, i. 2727 (s. v. Aphrodisia, N° 7) and x. 2462 (*Karaiṇ*). Perhaps we have in *Karaiṇ* or *Kar* the prototype of *Kāsh* (Kish).

In the Muḥammadan period, Kais formed a part of the province of Ardashīr Khurra in Fārs. It was only in the later middle ages that the town attained greater importance, when, as already mentioned, a prince of South Arabian origin captured it, built a fleet there and gradually began to extend his power. After the capture of Sirāf, which then enjoyed great prosperity as the main staple of the Persian-Indian-Chinese trade, the Arab dynasty of Kais rose under the last Būyids in the first half of the vth (xth) century to unlimited control of the whole Persian Gulf. This Sirāf, which was previously often regarded wrongly as a town on the coast near the island of Kais — actually confused with Kais by Ibn Baṭṭūṭa (ii. 244, 2)! — lay much further to the north; the ruins of this famous commercial

centre are near the village of Tāhiri (north of Rās Nābend, in 27° 40' N. Lat. and 52° 20' E. Long. Greenwich; cf. Schwarz, *op. cit.*, p. 59 sq. and the article SĪRĀF). Sīrāf gradually became more and more deserted under the suzerainty of the princes of Kais, as they diverted the very considerable trade and shipping from the captured Persian seaport to their own island. They also extended their power to several other districts of the mainland opposite the island of Kais. Their predecessors in the occupation of this strip of land had been a South Arabian tribe, the Banū 'Umāra; cf. on their territory, the so-called Sif 'Umāra (the 'Umāra-coast), Schwarz, *op. cit.*, p. 77 sq., 76. In the little town of Huzū there, a little dynasty of a family of the Banū 'Umāra, of whom coins still survive, ruled before the coming of the ruling house of Kais; cf. v. Bergmann in the *Numism. Zeitschr.* (Vienna), viii. 38—39 and Tiesenhausen in the *Rev. Numism. Belge*, 1875, p. 337; Huzū (probably the modern Ġirū) and Sāwiya (reading uncertain, probably the modern Tāwānah), both almost opposite Kais (in the N. W. or N. E. of it), were the most important ports of the island-rulers on the mainland. On Huzū and Sāwiya see Ibn al-Balkhī, *Fārsnāma*, p. 141; Ḥamd Allāh Mustawfī, *Nuzhat al-Kulūb*, text p. 120, transl. p. 118; G. le Strange, *The Lands of the Eastern Caliphate*, p. 257. A caravan route from Shīrāz ended in Huzū, the more important of these two towns; cf. Ḥamd Allāh Mustawfī, p. 185, 16, 186, 7. The same author (p. 171, 15, 184, 5, 186, 11 sq.) also gives the routes and distances from Kais to Baṣra, to Sulṭāniya and to the islands of Sarandīb (Ceylon) via Hormūz. Most of the smaller islands near Kais likewise became subject to the rulers of the latter, for example Dīāsak (probably the modern Lārek in the strait of Hormūz), where, according to Yāqūt ii. 9, 7, the "king" of Kais maintained a garrison celebrated for its seamanship; see also Dīāsak, i. 1025. At its period of greatest power, the dynasty of Kais also ruled over the opposite coast on the Arabian side (district of 'Omān), wherefore they are called by Yāqūt and al-Dimashqī "the lords of 'Omān".

The journey of the Rabbi Benjamin of Tudela falls within the period of Kais's prosperity (second half of the twelfth century). He notes with admiration the rich market of the island, whose chief business consisted in the exchange of Indian and Persian manufactures and produce; see the edition of the itinerary of Benjamin of Tudela by Grünhut (transl. Jerusalem 1903), p. 77 sq. The Jewish traveller wrongly gives the island, which he calls Kish, much too large an area; but there can be no doubt that he refers not to Kishm (so Grünhut, *op. cit.*, and Asher in his edition, ii. 175 sq.), but to our Kais. Benjamin of Tudela says that there were 500 Jewish families settled on the island. There must, of course, have also been a number of Persians living there. The bulk of the inhabitants, however, in the middle ages (as it is still the case to-day) were not Persians but Arabs, who were the chief settlers on most of the islands on the Persian side of the Gulf. The Venetian Marco Polo (*Travels*, Book i. Chap. 7, iii. Chap. 44) of the second half of the xiiith century knows Kais under the name Kisi (in Ital. orthography: Chisi) as a place of call for ships sailing from Babylon to India.

The decline of Kais was caused by the com-

mercial rise of the little kingdom of Hormūz [q. v.], also under an Arab dynasty. Even under the Saldjūk prince Malik Dīnār of Kermān (582—591 = 1186—1194) the ruler of Kais of that time had vainly endeavoured to get Hormūz on the mainland from the latter in return for a yearly tribute; see Muḥammad Ibrāhīm, *Tawārikh Āl Saldjūk*, ed. Houtsma, Leiden 1886, p. 160, 5 sq.; *Zeitschr. d. Deutsch. Morgent. Gesellsch.*, xxxix. 395). Further information on the relations of Kais with Hormūz is given in the *Relaciones* (1610) of the Portuguese Teixeira; the book contains from a Persian source a fairly full history of the kingdom of Hormūz; see W. F. Sinclair, *The Travels of F. Teixeira*, (= Hakluyt Society, Ser. 2, vol. ix., London 1902), p. 161 sq., 169 sq., 183 sq., 259 sq. and cf. Schwarz in the *Zeitschr. der Deutsch. Morgent. Ges.*, lxxviii. 531 sq. and HORMŪZ, ii. 325 sq. According to Teixeira (*op. cit.*, lxxviii. 534; cf. Ritter, viii. 777) about 700 (1300) the then king of Hormūz obtained from Nu'aim of Kais by purchase the island of Djarūn which lay opposite his capital. A few years later, he moved his residence to this island, which offered more protection; cf. above i. 694 sq., ii. 325 sq.). This New-Hormūz, thanks to its favourable position near the narrowest part of the Gulf, soon began to compete vigorously with the rulers of Kais and attracted more and more of the trade with India to itself. This led to long wars and feuds between the two kingdoms, which fill a great part of their history. For a time Kais was actually under Hormūz. In the end Kais completely lost its previous dominating position as the chief emporium of the Persian Gulf. Hormūz now took its place and from the tenth century to its capture by Shāh 'Abbās I in 1622 formed a great centre of international commerce. Its place was in turn taken by Bender 'Abbās [q. v.], which had to give pride of place to Būshīr [q. v.] after the middle of the xviiith century; the latter is now the most important trading port on the Persian Gulf. In the later middle ages the commercial centre of gravity within the Persian Gulf thus gradually shifted from north to south (Sīrāf-Kais-Hormūz) and returned in modern times to the north, although less adapted by nature. We know little of the later history of Kais. When the islanders became dissatisfied with their rulers, they finally called in the help of the governor of Shīrāz and as a result of his intervention Kais became permanently incorporated in Persia. According to Schlāsi, who spent 14 days on the island in 1862, there are 8 little settlements on it; he estimated the number of the inhabitants (Arabs and 1/10 Suaheli negro-slaves) at 2500—3000.

AL-KAIS, apparently an ancient Arab idol. He must have early disappeared as a deity, for Hishām b. al-Kalbī does not mention him in his *Kitāb al-Aṣṇām* and he is not given in the various passages in Arabic literature that give lists of the gods of the Djāhiliya. But that he was at one time worshipped as a god may be deduced with considerable certainty from the tribal name 'Abd al-Kais [q. v.] and from the well-known personal and tribal name Imru' al-Kais [q. v.]; cf. the Arabic names Imru' Manāt, Ἀμριαμανός and Μανουλάας in Wellhausen, *Reste arabischen Heidentums*², p. 5 sq. and אִמְרַאֲלִי (= Imra' allāhi) and אִמְרַאֲלִיּוֹת (= Imra' Yaghūth) in Lidzbarski, *Handb. der nordsemit. Epigraphik*, i. 500, as well as the Hebrew Meri-Ba'al i. Chron., ix. 40^b and ²Āshba'al (Septuaginta, Luc., and also Cod. Sin. I^oβααλ, = 'Ish-Bōshāth) i. Chron., viii. 33, ix. 39]. Further from statements like the following: "and it has been asserted that al-Kais was the name of an idol, which explains the name 'Abd al-Kais", *Hamāsa* of Abū Tammām, ed. Freytag, i. 85, schol., and "others have thought that al-Kais was the name of an idol and for this reason al-Asma'i (in verse 14 of the *Mu'allaka* of Imru' al-Kais) has rejected the reading "ya-mra'a 'l-Kaisi fa-nziū", and has preferred "ya-mra'a 'l-lāhi fa-nziū", 'Āsim b. Aiyūb al-Baṭalyūsi, *Sharḥ Diwān Imr'i 'l-Kais*, Cairo 1308, p. 3, and further from the name of the god קִישַׁי in the Nabataean inscription. of al-Hijr, which can hardly be other than as Aramaic adaptation of al-Kais (cf. Lidzbarski, *op. cit.*, p. 363; Cook, *A Glossary of the Aramaic Inscriptions*, p. 104; Nöldeke, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xl. 167; Baethgen, *Beitr. zur*

semit. Religionsgeschichte, p. 108, etc.). From the Nabataean inscription *Corp. Inscript. Semit.*, N^o. 209, 9 (= Euting, *Nabat. Inschriften aus Arabien*, N^o. 12, 9) it would seem that the deity possessed a sanctuary in al-Hijr, in which copies of documents used to be deposited; nothing else is known about his character or the area of his cult. The appellative meaning of *Kais* is obscure; according to the native dictionaries, it means: "misfortune", "need", "famine", "membrum virile" and "proud gait". But none of these meanings is suitable as the name of a deity, quite apart from the fact that I cannot find a single one actually occurring in literature. De Goeje has deduced the meaning "Lord" from al-Hamdāni, *Djazirat al-'Arab*, ed. D. H. Müller, i. 3, 9 and perhaps p. 221, 14 (see W. Robertson Smith, *The Religion of the Semites*, London 1894, p. 170, note 4, German transl. by R. Stübe, p. 132, note 219). "Lord" would, of course, be a good name for a deity, almost too good! But in view of the poor condition of the manuscripts available for D. H. Müller's edition of the *Djazirat al-'Arab*, and the problematic character in any case of the two passages in al-Hamdāni, this meaning can at best only be said to be a possible one.

As to the connection between al-Kais and the frequent personal and not uncommon tribal name *Kais* (see Wüstenfeld, *Register zu den Geneal. Tabellen der arab. Stämme u. Familien*; the indices to Ibn Duraid, *al-Ishtikāk*, ed. Wüstenfeld, al-Tabari, *Ta'rikh*, ed. de Goeje, Caetani, *Annali dell' Islam*, ii./11 and vi., *Nakā'id Djarir wa 'l-Farazdaq*, ed. Bevan; Guidi, *Tables alphabét. du Kitāb al-Aḡāni*, s. v., etc., and note also the Nabataean personal name קִישַׁי, Lidzbarski, *op. cit.*, p. 363 and Cook, *op. cit.*, p. 104), as well as the personal name 'Abd Kais (*Nakā'id Djarir wa 'l-Farazdaq*, Indices, s. v.; Ibn Duraid, *op. cit.*, p. 138, 275; Wüstenfeld, *Register*, p. 30; Ibn al-Athir, *Uṣd al-Ghāba*, ii. 137; Ibn Ḥadjar, *Iṣāba*, i. 987) no definite statement can be made. But at any rate we should not, as has always been done hitherto, overlook the fact that *Kais* always has the article (which the Nabat. קִישַׁי, קִישַׁי also shows) in the nevertheless in all probability theophoric form Imru' al-Kais as well as in the tribal name 'Abd al-Kais, while in the personal and tribal name *Kais* and in the personal name 'Abd Kais it is as regularly found without the article. (That the poet 'Abd Kais b. Khufaf, *Aghāni*¹, ix. 165, *Hamāsa*, loc. cit., p. 352 and *Lisān al-'Arab*, ii. 206 appears as 'Abd al-Kais b. Khufaf may be due to an error; see *Mufaḍḍaliyyāt*, ed. Lyall, Nr. cxvi. sq., ed. Cairo, ii. 85 sq. and *Aghāni*, vii. 148, 152 sq.). I would consider *Kais*, as opposed to the god's name al-Kais, as a simple personal name. Wellhausen sees in it the god's name before which the concept 'Abd has disappeared (*op. cit.*, p. 8). But he does not tell us why in this contraction the article of the name of the god should also have been dropped. W. Robertson Smith (*Kinship and Marriage in Early Arabia*², p. 239) had practically anticipated Wellhausen.

Halévy (*Essai sur les inscriptions du Safa*, in the *Journ. Asiat.*, 1882, p. 321), Wellhausen (*loc. cit.*, p. 67) and Gottheil (*On קִישַׁי וקִישַׁי, Journ. of Bibl. Literature*, xvii. 200) have identified our deity with the Edomite god *Kaus*, *Kōs*, *Kaush* or *Kōsh* (on the latter see especially Schrader,

Die Keilinschriften und das Alte Testament, 3rd edition, revised by Zimmern and Winckler, p. 472 sq. and W. Robertson Smith, *op. cit.*, p. 31). I consider the identity of the two to be exceedingly improbable. The comparisons of Ḳais with another Edomite god, the Koḫe of Josephus, are, of course, utterly untenable (Koḫe = Arab. Ḳuḏah, see Wellhausen, *op. cit.*, p. 67, 81 sq.; Nöldeke, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xli. 714; Lagarde, *Symmicta*, i. 121, note 1; Gottheil, *op. cit.*, p. 201, etc. and cf. Thamud. and Nabat. קוח, Littmann, *Zur Entzifferung der thamudenischen Inschriften*, in *Mitt. d. Vorderasiat. Gesellsch.*, 1904, i. 46; Lidzbarski, *op. cit.*, p. 362; Cook, *op. cit.*, p. 104), as well as the identification with the Nabataean קציו (on this cf. Lidzbarski, *op. cit.*, p. 364; Cook, *op. cit.*, p. 105), with the Semitic deity (Ζεύς) Κάριος (on this see Drexler, in W. Roscher's *Ausführl. Lexikon der griech. u. röm. Mythologie*, Col. 970 sqq.) and with אלקשי Nahum, i. 1 (De

Vogüé, *Syrie Centrale, Inscriptions sémitiques*, p. 105; H. Derenbourg, *Le poète antéislamique Imru'ou l-Ḳais et le dieu arabe al-Ḳais*, in *Biblioth. de l'École des Hautes Études, Sciences religieuses*, Vol. vii.: *Études de critique et d'histoire*, 2nd Series, p. 122; Gottheil, *loc. cit.*, p. 201 sq., etc.). On the other hand the name Ḳais perhaps appears in קיש (Septuag. Κεῖσ) 1. Sam., ix. 1, 3 etc. and the appellative Ḳais in קישיו (Septuag. Cod. Vat. Κεῖσαι, Cod. Alex. Κεῖσαι) 1. Chron., vi. 29 = קישיו (to be read קישיו); Septuag., Cod. Vat. Κεῖσαι, Cod. Alex. and Luc. Κεῖσαι) 1. Chron., xv. 17.

Gesellsch.*, vii. 500 sq.; Nöldeke, Notice of W. Robertson Smith, *Kinship and Marriage in Early Arabia*, *ibid.*, xl. 166 sq. and Wellhausen, *Muhammed in Medina. Das ist Vakid's Kitab al-Maghazi in verkürzter deutscher Wiedergabe*, p. 212, note 1. (A. FISCHER)

ḲAIS-ʿAILĀN (*Ḳaisu ʿAilāna*), one of the largest and most powerful tribal groups of northern Arabia in ancient times.

Name. For Ḳais ʿAilān we often find also Ḳais b. ʿAilān, most frequently *Ḳais* alone (in the poetry occasionally also simply ʿAilān, see *Naḳāʾid Djarir wa l-Farasaḍ*, ed. Bevan, iii. Index iii. s. v.; the "Ḳaisites" are naturally called al-Ḳaisiyyūn, but as an ethno-political group more usually al-Ḳaisiya, see al-Ṭabarī, *Taʾriḫh*, ed. de Goeje, ii. 66, 180, 777, 1614, 1663, etc.; the nisba to Ḳais-ʿAilān or Ḳais b. ʿAilān is, however, ʿAilānī, see al-Samʿānī *al-Ansāb*, p. 404^b and Ibn Ḳhallikān, *Bulāḳ* 1299, ii. 128 sq.). All three forms occur in prose as well as poetry, the middle one, Ḳais b. ʿAilān, remarkably rarely in poetry (Ḳais-ʿAilān in poetry: *Ḥamāsa* of Abū Tammām, ed. Freytag, p. 160, 659; *Naḳāʾid*, i. 117, 362 sq., 370, 375, 390; al-Ṭabarī, *op. cit.*, ii. 486; *Taḏj al-ʿArūs*, s. v. ʿyl, etc.; Ḳais b. ʿAilān: Zuhair, *Dirwān*, ed. Ahlwardt, iii. 36, *Naḳāʾid*, i. 373, Abu l-ʿAlāʾ al-Maʿarri, *al-Luzūmiyyāt*, Cairo 1891, i. 47 and also *Taḏj al-ʿArūs*, s. v. ʿyl; Ḳais: ʿAntara, *Dirwān*, ed. Ahlwardt, xxiv. 3, Append. xxi. 5; al-Nābigha, *Dirwān*, ed. Ahlwardt, Append. lxiii. 1; Zuhair, *op. cit.*, ix. 17; *Ḥamāsa*, ed. cit., 260, 302, 318, 657—660; *Naḳāʾid*, i. 374, 376

sq., ii. 902, 1041; *Aghānī*, xvii. 106, etc.). We never find before any of the three forms the word *Banū* ("sons") (wrongly in the indices to Ibn al-Athīr, *al-Kāmil fī l-Taʾriḫh*, ed. Tornberg, to Caetani, *Annali dell'Islam*, ii. 1422 and vi. 145, and even to al-Ṭabarī, *op. cit.*, etc.). What we are to understand by ʿAilān, is difficult to conceive. Those who use the form Ḳais b. ʿAilān — these are primarily the genealogists (see *Taḏj al-ʿArūs*, s. v. ʿyl and ʿkys) — see in him naturally, at least the great majority of them (see below), the father of Ḳais and they further explain that he was the son of Muḍar and therefore brother or al-Yās (Ḳhindif) b. Muḍar. According to them his real name is al-Nās (which, according to Ibn Duraid, *Kit. al-Ishṭiqāḳ*, ed. Wüstenfeld, p. 162 comes from al-Nāss; according to al-Wazīr al-Maghribī in the *Taḏj al-ʿArūs* s. v. ʿkys, al-Nāss would be the only correct form), so that ʿAilān would be his epithet (Ibn Duraid, *op. cit.*, p. 162; *Taḏj al-ʿArūs*, s. v. ʿkys; Ibn ʿAbd Rabbihi, *al-ʿIḍāʾ al-farid*, Cairo 1305, ii. 51; Abu l-Fidāʾ, *Muḫṭaṣar Taʾriḫh al-Baḫṣar*, partly ed. by Fleischer as *Historia antislamica*, p. 194; Wüstenfeld, *Genealog. Tabellen der arab. Stämme u. Familien*, D; Caetani, *op. cit.*, i. Intro., § 49; also al-Samʿānī, *op. cit.*; al-Yaʿqūbī, *Taʾriḫh*, ed. Houtsma, i. 260; al-Masʿūdī, *al-Tanbih wa l-Ishraf*, in *Bibl. Geogr. arab.*, ed. de Goeje, viii. 208; Yāqūt, *Muʿdjam*, ed. Wüstenfeld, iii. 908; Ibn Ḳhallikān, *op. cit.*, ii. 130; ʿAbd al-Ḳādir b. ʿOmar, *Ḳhiṣnāt al-ʿAdab*, ii. 449; Caussin de Perceval, *Essai sur l'Histoire des Arabes*, i. 192, etc.). But this view is contradicted directly by Ibn Ḳhalḍūn, *al-Ibar*, ii. 305 and indirectly by many others — practically by all who say Ḳais ʿAilān and these are, as we have said, the majority —; according to them ʿAilān disappears as a separate member in the genealogical table; Ḳais ʿAilān is identical with al-Nās or al-Nāss (Ḳais ʿAilān here also is said to be only an epithet, al-Nās(s) on the other hand the proper name) and is son of Muḍar and brother of al-Yās. At the same time they explain the genitive ʿAilān in the most different ways: as the name of a famous horse of Ḳais (by calling him after this horse, an endeavour has been made to distinguish our Ḳais from Ḳais b. al-Ḡhawṭh of Baḍjila, who also possessed a celebrated horse called Kubba and who was similarly called Ḳais-Kubba, *Taḏj al-ʿArūs*, s. v. ʿkys and ʿyl, and Ibn Ḳhallikān, *loc. cit.*), or as the name of a dog or of a bow, which were in his possession, or as the name of a slave or of some other man who had brought him up (in an isolated case in the form of the name Ḳais b. ʿAilān, the word ʿAilān is regarded as the name of such a slave, see ʿAbd al-Ḳādir b. ʿOmar, *op. cit.*, i. 67, ii. 449; cf. the exactly analogous interpretation of the tribal name Saʿd (b.) Hudhaim in Ibn Kūtaiba, *Kit. al-Maʿarif*, ed. Wüstenfeld, p. 51, Ibn Duraid, *op. cit.*, p. 319, *Ḳanūs* and *Taḏj al-ʿArūs*, s. v. *hahm*, etc.), or as the name of a mountain, where he is said to have been born or lastly, — and most stupidly as no notice is taken of genitive relationship in the form *Ḳaisu ʿAilāna* — as an otherwise quite unknown adjective, interpreted as qualifying Ḳais with the meaning "needy, dependent" (see also Ibn Duraid, *op. cit.*; *Ṣiḥāḥ*, *Lisān al-ʿArab* and *Ḳamūs*, s. v. ʿkys and ʿyl; al-Samʿānī, *op. cit.*; Abu l-Fidāʾ, *op. cit.*; Ibn Ḳhalḍūn, *op. cit.*; ʿAbd al-Ḳādir b. ʿOmar, *op. cit.*, and

Hamāsa, *op. cit.*, i. 124; Reiske, *Prima lineae historiae regnorum arabicorum*, ed. Wüstenfeld, Tables v. and viii. on p. 136; Sprenger, *Das Leben u. die Lehre des Propheten Moḥammad*, iii. p. cxxxix, etc.). Only very rarely do we find the statement that ^ʿAilān was an epithet of Muḍar (Ṣiḥāḥ and *Lisān al-ʿArab*, s. v. ^ʿyl) and most strange is the assertion twice made by Ibn Kutaiba (*op. cit.*, p. 31 and 38) and hardly reconcilable with his other statements, that Kais ^ʿAilān is identical with Ḳamaʿa b. al-Yās b. Muḍar.

These confused statements seem to me to be nothing but guesses. I should like to think myself that Kais ^ʿAilān is the real name of our confederation of tribes and that it was the genealogists who first made Kais b. ^ʿAilān out of it. As Arab tradition obviously knows absolutely nothing of a tribe or group of tribes called ^ʿAilān, I should further like to assume — of course with all reserve — that the combination *Ḳaisu ʿAilāna* is not to be interpreted on the model of *Taghlibu Wāʿilīn*, "the Taghlib of the tribal group of Wāʿil", *Taimu ʿl-Ribābi*, "the Taim of the al-Ribāb confederacy", *ʿAdiyu ʿl-Ribābi*, "the ʿAdi of the al-Ribāb confederacy", *Djarmu Ḳuḍʿata*, "the Djarm of the Ḳuḍʿa confederation of tribes", *Wāʿilu Bāhila*, the Wāʿil of the Bāhila group of tribes", also *Aʿshā Banī Ḳaisin*, "the Aʿshā of the Banū Ḳais", *Aʿshā Bāhila*, "Aʿshā of Bāhila", etc., (see e. g. *Naḳāʿid*, iii. Ind. iii. s. vv.), but on the model of *Ḳaisu Kubba*, "Ḳais, the owner of the horse Kubba" (see above; the name is everywhere so explained), *Rabīʿatu ʿl-Farasi*, "Rabīʿa with the horse", *Anmāru ʿl-Shāʿi*, "Anmār with the sheep", *Rabīʿatu ʿl-Djūʿ*, "Hunger-Rabīʿa", *Zaidu ʿl-Khaili*, "horses-Zaid", etc. (see e. g. *Naḳāʿid*, iii. Ind. iii. and also *Tādī al-ʿArūs*, s. v.). What we are to understand, however, in this case by ^ʿAilān, whether, with the native explanations quoted, a horse or a dog or something of the kind is quite uncertain. According to the native dictionaries (I cannot quote an actual reference in literature) ^ʿAilān as a noun means a "male hyena". As a name, it is not found elsewhere, according to the native lexicons and according to ʿAbd al-Ḳādir b. ʿOmar, *op. cit.*, i. 67 (see, however, *Tādī al-ʿArūs*, s. v. ^ʿyl). — The Arab genealogists may have simply invented the name *al-Nās* (see above) as a counterpart to *al-Yās*.

Branches of the confederation: Kais (^ʿAilān) and *Khindif* (according to the genealogical legend, the wife of al-Yās) comprise together the whole of Muḍar (Ibn Kutaiba, *op. cit.*, p. 31, al-Ṭabarī, *op. cit.*, ii. 1298, al-Masʿūdī, *op. cit.*, p. 324, al-Bakrī, *al-Muʿdjam*, ed. Wüstenfeld, p. 56, Yāḳūt, *op. cit.*, i. 463, Ibn Khaldūn, *op. cit.*, ii. 305, Caussin de Perceval, *op. cit.*, i. 192, etc.). Between the two groups there were very ancient points of dispute (see e. g. al-Bakrī, *op. cit.*, p. 56 = Wüstenfeld, *Die Wohnsitze u. Wanderungen der arab. Stämme*, from vol. xiv. of the *Abhdlg. d. Götting. Ges. d. Wiss.*, p. 81). To Kais-^ʿAilān were reckoned the following large tribes or more accurate tribal groups: *Ghatafān* [q. v.], with ^ʿAbs [q. v.], *Dhubyān* [q. v.], the two main branches of the *Dhubyān* are *Fazāra*, q. v. and *Murra*, q. v.) and *Ashdja*-*Hawāzin* [q. v.], with *Thakīf* [q. v.], in whom many saw descendants of *Thamūd* [q. v.] (see e. g. *Aghānī*, iv. 76), ʿĀmir b. Ṣaʿsaʿa [q. v.], *Kilāb* [q. v.], from them descended the dynasty of *Mirdāsids* of Aleppo, q. v.), *Kulaib*,

Ḳushair, *ʿUḳail* (q. v.; this is the tribe of the ^ʿUḳailid dynasty of Mosul), *Hilāl* [q. v.] and *Djusham* — *Sulaim* [q. v.] — *Bāhila* [q. v.] — *ʿAdwān* — *Ghanī* [q. v.], etc. (On the branches of the Kais ^ʿAilān see especially Ibn Duraid, *op. cit.*, p. 162 sqq.; Ibn Kutaiba, *op. cit.*, p. 38 sqq.; Ibn Khaldūn, *op. cit.*, ii. 305 sqq.; Abu ʿl-Fidā, *op. cit.*, p. 194 sqq.; Ibn ʿAbd Rabbihi, *op. cit.*, ii. 51; Wüstenfeld, *Geneal. Tabellen*, Tab. D sqq. and Reiske, *op. cit.*, Tab. viii. sq. on p. 136.

Distribution. The Kais ^ʿAilān, according to legend, were originally settled in the low lying parts of the *Tihāma* (al-Bakrī, *op. cit.*, p. 57 = Wüstenfeld, *Die Wohnsitze u. Wanderungen d. Arab. Stämme*, p. 81 = Yāḳūt, *op. cit.*, i. 463 sq.). Somewhere about the time of Muḥammad they spread, in keeping with the large number of their subdivisions over vast areas of central and northern Arabia; we find them (still?) in the *Tihāma* (Ibn Khaldūn, *op. cit.*, ii. 305), then again S. E. and N. E. of Mecca (the *Thakīf* here owned the valuable town of *Tāʿif* and the *Sulaim*, *Hilāl* and ^ʿUḳail all sorts of famous mines; see e. g. al-Yaʿqūbī, *al-Buldān*, in the *Bibl. Geogr. Arab.*, vii. 316, 312), in the region of Medina (Ibn Khaldūn, *op. cit.*, ii. 305 sqq., 312), in other parts of the *Ḥidjāz* (al-Ḥamdānī, *Djazīrat al-ʿArab*, ed. D. H. Müller, i. 50; al-Bakrī, *op. cit.*, p. 60 = Wüstenfeld, *Die Sitze und Wanderungen*, etc. p. 84), in the *ʿAliya* (Yāḳūt, *op. cit.*, iii. 688, 697; Ibn al-Athīr, *op. cit.*, v. 53), throughout the highlands of *Nadjd* (al-Masʿūdī, *op. cit.*, p. 209; al-Yaʿqūbī, *al-Buldān*, p. 312), in the *Yamāma*, where they occupied the important *Falaḳj* (al-Bakrī, *op. cit.*, p. 60 = Wüstenfeld, *Die Sitze u. Wanderungen* etc., p. 84; Yāḳūt, *op. cit.*, ii. 238, iii. 908; Ibn Khaldūn, *op. cit.*, ii. 312 sq.; Wüstenfeld, *Bahrein u. Jemāma*, from the *Abhdlg. der Götting. Ges. d. Wiss.*, xix. 40; Wüstenfeld, *Register zu den geneal. Tabellen*, s. v. *Kaʿb ben Rabīʿa*), in *Bahrain* (al-Ṭabarī, *op. cit.*, i. 1968) and as far as in the *ʿIrāk* and therewith the former kingdom of the *Lakhmids* of al-*Hira* (al-Masʿūdī, *Murūdj al-Dhahab*, ed. Barbier de Meynard, v. 65; Sperber, *Die Schreiben Muḥammads an die Stämme Arabiens*, reprint from the *Mitteilg. d. Seminars f. Orient. Sprachen zu Berlin*, xix./ii. 38); see also Blau, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxiii. 583 and the map on p. 559, Caussin de Perceval, *op. cit.*, i. 192 and Caetani, *op. cit.*, ii. the map on p. 376.

The great Arab campaigns of conquest which began with the rise of the Caliphate and the tremendous political revolutions produced by them in Western Asia and North Africa brought the Kais-^ʿAilān like most Arab tribes out of their ancient dwelling-places. To all appearance, however, several branches of them had emigrated northwards even before Islām. At any rate we find them later, partly even under the earlier Caliphs, throughout Syria: at *Ḥalab*, in the region of *Ḥims*, in *Damascus* and the *Ghūḷa*, in the *Ḥawrān* with its capital *Boṣrā*, in *Bathaniya* with its capital *Adhriʿāt*, in the *Djawlān* with its capital *Bāniyās*, in the *Balkā* and in *Palestine* (al-Balādhurī, *Futūḥ al-Buldān*, ed. de Goeje, p. 451; Ibn Khaldūn, *op. cit.*, ii. 312; Abū Ḥanifa al-Dinawarī, *al-Aḳhbār al-ʿiwāl*, ed. Guirgass and Kratchkovsky, p. 183; al-Yaʿqūbī, *op. cit.*, p. 325 sq., 329; Ibn al-Athīr, *op. cit.*, v. 331; Yāḳūt, *op. cit.*, ii. 744 etc.), in N. W. Mesopotamia, in the large

district called after them Diyār Muḍar [q. v.], with the important towns of Ḳarḳisiyā’ (Circesium), al-Rahba, ‘Arābān, al-Ḳhānūka, al-Rakka, Bālis (Barbalissus), Ḥarrān (Carrhae), Ḍjīr Manbidj, Sarūdī, Tell Mawzan, Sumaisāt (Samosata), etc. (Ibn Ḥawqal, *al-Masālik wa ’l-Mamālik*, in the *Bibl. Geogr. arab.* ii. 155; al-Balāḍhūrī, *op. cit.*, p. 178 = Yāḳūt, *op. cit.*, iv. 391; al-Ṭabarī, *op. cit.*, ii. 72 = Ibn al-Aṭhīr, *op. cit.*, iii. 373; al-Ṭabarī, *op. cit.*, ii. 1891; Ibn Ḳhaldūn, *op. cit.*, ii. 310; Caetani, *Studi di Storia orientale*, i. 271 and Caussin de Perceval, *op. cit.*, i. 192), in the ‘Irāq, where they also formed an apparently large fraction of the population of al-Ḳūfa and al-Baṣra (al-Balāḍhūrī, *op. cit.*, 451; al-Ya’qūbī, *op. cit.*, p. 310; al-Ṭabarī, *op. cit.*, i. 2986, 3454, ii. 777; *Aghānī*¹, iii. 52; Ibn al-Faḳīh, *Mukhtaṣar Kitāb al-Bulḍān*, in *Bibl. Geogr. arab.*, v. 170; Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 183; Ibn al-Aṭhīr, *op. cit.*, iv. 116, v. 59), in Baḥrain (Ibn al-Aṭhīr, *op. cit.*, vii. 341; Ibn Ḳhaldūn, *op. cit.*, ii. 313) and even near Iṣbahān (al-Ya’qūbī, *op. cit.*, p. 275).

In the time of Ibn Ḳhaldūn (xivth cent.) only remnants of the once so powerful group of tribes of the Kais ‘Ailān were still settled in Central Arabia; considerable bodies of them had settled in different parts of North Africa, ‘Adwānī tribes for example in Ifrikiya, Sulaimīs there also and in the far west, near Fes (according to Ibn al-Aṭhīr, *op. cit.*, x. 401, — whether rightly or not is another question — ‘Abd al-Mu’min, the founder of the Almohad dynasty traced his descent from the Sulaim), Fazārīs and Rawāḥīs in Barqa, other Ḍhubyānīs in Barqa, in Tripolis and in Fezzān, Aṣḥdja’īs in the marches of Algeria and Morocco, Hilālīs in Ifrikiya and at Bône and Constantine, Ḍjushamīs in Morocco etc. (Ibn Ḳhaldūn, *op. cit.*, ii. 305 sqq.).

History. The history proper of most Arabian Beduin tribes begins for us with their (“battle”) days” (see AIYĀM AL-‘ARAB). So it is with the Kais-‘Ailān. Their feuds were particularly numerous, which is not remarkable in so large a group with its multitudinous ramifications. Ibn ‘Abd Rabbihi discusses them in the first place in his account of the Aiyām al-‘Arab in the *Ikd al-Farīd* (iii. 47—93). He describes in this place the following entirely or essentially civil Kaisi battles (cf. Reiske, *op. cit.*, 204—252, following al-Nuwairī, who on this matter is dependent entirely on Ibn ‘Abd Rabbihi): the Yawm Man‘adj (Man‘adj, also called Yawm al-Radha, between Ḡhanawīs and ‘Absīs), the Yawm al-Nafrāwāt (between ‘Amiris and ‘Absīs), the Yawm Baṭn ‘Āḳil (between Ḍhubyānīs and ‘Amiris), the Yawm Shīb Djabala (between ‘Amir, ‘Abs, Ḡhanī, Bāhila and Baḍjila on one side and Tamīm, Ḍhubyān, Asad, Lakhm and Kinda on the other), the endless war of Dāḥīs and al-Ḡhabrā’ (between ‘Abs and Ḍhubyān), with the “days” of Ḍhu ’l-Muraiḳib, Ḍhū Ḥusā, al-Ya’mariya, (Ḍjafr) al-Habā’a, al-Farūk, Ḳaṭan and Ḡhadīr Ḳalyād (?), the Yawm al-Rakam (or al-Rakm, between Ḡhaṭafān and ‘Amir), the Yawm al-Nutā’a (al-Bathā’a?, between ‘Abs and ‘Amir), the first and second Yawm Ḥawza (between Sulaim and Ḡhaṭafān), the Yawm ‘Adanīya (other Milhān, between Sulaim and Ḡhaṭafān), the Yawm al-Liwā (between Ḡhaṭafān and Hawāzin) and the Yawm al-Salā’a (between Hawāzin and Ḡhaṭafān). Also the following encounters

between Kaisīs and Non-Kaisīs: the Yawm Raḥraḥān (between ‘Amir and Tamīm), the Yawm Dhāt al-Aṭhl (between Sulaim and Tamīm), the Yawm al-Kadid (between Sulaim and Kināna), the Yawm Burza (or Buzra?, do.), the Yawm al-Ḳiḳa’ (do.), the Yawm al-Su’bān (between ‘Amir and Tamīm), the Yawm Akrun (between ‘Abs and Banū Ḍārim), the Yawm al-Marrūt (between Banū ’l-‘Anbar and Banū Ḳuṣhair and the Yawm Dārat Ma’sal (between Tamīm and Kais). Al-Ya’qūbī, *Ta’rīkh*, i. 261 also mentions as Kaisī the “days” of al-Baidā’, Faif al-Rīḥ (between Ḳhath’am and ‘Amir), al-Milbaṭ and al-‘Urrā. Cf. also the section in Ibn al-Aṭhīr on “the ‘days’ of the Arabs in the pagan period” (*op. cit.*, i. 367—517), pp. 411 sqq., 435 sqq., 420 sqq., 482 sqq., 478 sq., 473 sqq., in the chapter which ‘al-Maidānī in his *Madjma’ al-Amthal* has devoted to the “names of the days of the Arabs” (Chap. 29), nos. 76, 12, 11, 66, 96, 122, 30, 53, 22, 55 and *Naḳā’id*, iii. Ind. iv. under the separate place-names. Within the scope of this article at least, no attempt can be made to give these wars and feuds in more accurate historical and chronological sequence. Indeed, speaking generally we may say that it is a difficult, indeed for the most part an insoluble task, to get at the historical basis of the essentially legendary traditions of the Aiyām al-‘Arab, — which we may call the epic of the Arabs. The most important and therefore also the most celebrated in poetry of the above-mentioned “days” is certainly that of Shīb Djabala (see DJABALA, also ḌHUBYĀN and also Blau, *op. cit.*, p. 583, *Mufaḍḍaliyyāt*, ed. Lyall, ii. transl., p. 251 and especially *Naḳā’id*, iii. Ind. iv., s. v. *Djabalatu*). Of the encounters in the Dāḥīs wa ’l-Ḡhabrā’ war [see ḠHAṬAFĀN, ‘ABS and ḌHUBYĀN], the most celebrated is that of al-Habā’a. It need not surprise us to find that the Kaisī tribes, as we see from the above, were also continually quarrelling with one another. The individual members of the great tribal confederacies never thought of maintaining peace as a principle within the limits of their group. Ibn ‘Abd Rabbihi and al-Nuwairī really ought also to have described the al-Fidjār battles as Kaisī, as in them the Hawāzin, who were Kaisī, with the Ṭbaḳīf at their head formed one of the two contending parties (see FIDJĀR and HAWĀZIN, also Ibn al-Aṭhīr, *op. cit.*, i. 439 sqq., al-Mas’ūdī, *Murūdī al-Dhahab*, iv. 120, 153, al-Mas’ūdī, *al-Tanbīh wa ’l-Ishrāf*, p. 208 sq., al-Diyārbakrī, *Ta’rīkh al-Ḳhamīs*, Cairo 1283, i. 288, 293, Wüstenfeld, *Gesch. der Stadt Mekka*, Vol. iv. of the *Chroniken der Stadt Mekka*, p. 51 sqq., Sprenger, *Das Leben und die Lehre des Moḥammad*, i. 148, Caetani, *Annali*, Introd., § 140, Huart, *Hist. des Arabes*, i. 92, etc. The question at issue in this was really the endeavours of the Hawāzin to deprive the Kināna of Mecca and the Ka’ba (cf. *Aghānī*, xiii. 3 sq.).

Like the other great central Arabian Beduin tribes the Kais-‘Ailān belonged to the short-lived empire of the Kinda (q. v. and Ḥamza al-Isfahānī, *Ta’rīkh*, ed. Gottwaldt, p. 140; Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 54; Ibn al-Aṭhīr, *op. cit.*, i. 376, 406; Reiske, *op. cit.*, 98; Caussin de Perceval, *op. cit.*, ii. 287; *al-Mufaḍḍaliyyāt*, *op. cit.*, transl., p. 250). Otherwise the only thing regarding the pre-Muhammadan history of the Kais-‘Ailān handed down to us is the statement that they had worshipped Sirius (?), Pococke, *Specimen hist. Arabum*, p. 4; Caussin de Perceval, *op. cit.*,

i. 349; Krehl, *Über die Religion der vorislam. Araber*, p. 24), and that the ‘Adwān had owned the *ifāda*, i. e. the management of the course run between ‘Arafāt and al-Muzdalifa in the Meccan Ḥadjj ceremonies [see ḤADJĠ II, 198] (Ibn Hishām, *Sira*, ed. Wüstenfeld, p. 77 sq.; al-Ṭabarī, *op. cit.*, i. 1134, Ibn Khaldūn, *op. cit.*, ii. 305, etc.).

The Kais-‘Ailān were, of course, thoroughly antagonistic to Muḥammad at first. The Ghatafan and Sulaim [q. v.] especially proved very unpleasant neighbours to Medina in the first seven years after the Ḥidjra. But a clan of the Ghatafan, the Ashdja‘, who dwelled N. E. of Medina, considered it advisable as early as 627, after the “Battle of the Ditch” to conclude with Muḥammad a — purely political — treaty of alliance (Sperber, *Die Schreiben Muhammads an die Stämme Arabiens*, p. 8 sq.) and the vastly more powerful Sulaim along with a number of Ashdja‘is took part in 630 in the “conquest” of Mecca on the side of the Prophet, and indeed, shortly after, we find them fighting at Hunain under the Muslim flag against their brother-tribe, the Hawāzin, although they must have seen that the latter’s resistance to the state of Medina was the last possible attempt to break Muḥammad’s hegemony over Arabia (Ibn Hishām, *op. cit.*, p. 810, 828–864; al-Ṭabarī, *op. cit.*, i. 1647; al-Wāqidī, *al-Maghāzī*, abbrev. transl. by Wellhausen, p. 326, 358; Ibn Sa’d, *al-Ṭabaqāt*, ed. Sachau, ii./i. 97, 109; Ibn Khaldūn, *op. cit.*, ii. 308; Caetani, *Annali*, ii. 147, 153, 444 etc. When Muḥammad died all the Kaisi tribes had probably submitted to the law of Islām (Ibn Sa’d, *op. cit.*, i./ii. 41 sqq.; Wellhausen, *Skizzen u. Vorarbeiten*, iv. 139 sqq.; Sperber, *op. cit.*, 38 sqq. etc.). After the Prophet’s death, it is true, the majority of them joined more or less openly in the apostacy which set in over all Arabia. The Ghatafan once more were the most active in this. They several times endeavoured to overrun Medina and finally joined Tulaiḥa, the prophet of the Asad. But the old days of Arabia were past. Tulaiḥa and his followers were defeated at the well of Buzākha by Khālīd b. al-Walīd, “the sword of God” (end of 632) and the rebellious central Arabian tribes had again to submit to the yoke of Medina and Islām (al-Ṭabarī, *op. cit.*, i. 1870, 1885, 1889, 1898 sqq.; Ibn al-Athīr, *op. cit.*, ii. 264; Caetani, *op. cit.*, ii. 604 sqq.; A. Müller, *Der Islam im Morgen- u. Abendland*, i. 174 sqq. etc.).

Henceforward the Kais ‘Ailān show themselves good Muslims. Bodies of them took part in the battles against the Persians under Khālīd b. al-Walīd, under al-Muthannā al-Shaibānī and under Sa’d b. Abī Waqqās (al-Ṭabarī, *op. cit.*, i. 2219 sqq.; Ibn al-Athīr, *op. cit.*, ii. 347; Caetani, *op. cit.*, ii. 954 sq., iii. 155, 281 sqq.). In the “battle of the Camel” (656) and at Siffin (657) they fought on the side of ‘Alī (Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 155 sq., 183 sq.; al-Ṭabarī, *op. cit.*, i. 3174, 3224, 3309; Ibn al-Athīr, *op. cit.*, iii. 189).

In the period of the great Muslim conquests in which they — in so far as they had not done so earlier (see above) — had moved their settlements northwards, especially to Syria, their power had become such that from the beginning to the end of the Umayyad period they formed one of the deciding political and military factors in the Caliphate. In this capacity they were in constant antagonism to the Kalb, the

chief tribe of the Qudā’a, who inhabited the strip of territory between the ancient Moab and Palmyra, an antagonism, at the root of which probably lay ethnic differences (but see Wellhausen, *Das arab. Reich und sein Sturz*, p. 112) — the Kais were Ma‘addis (Nizāris and Muḍaris), that is North Arabians, while the Kalb were — or at least were considered — Yemenis, South Arabians [see KALB B. WABARA and KAHTĀN]. — This antagonism being augmented through the Baṣra-Khurasān trouble between the Tamim and the Asd [q. v.], very early developed into a general vendetta between Muḍar and Yemen. The Umayyad Caliphs relied sometimes on the Kais and sometimes on the Kalb according to their family connections, the result of marriages into these two extremes, which had as a result that, for example between 719 and 745, i. e. within 26 years, the actual control of the government passed five times from one group of tribes to the other. This state of things was, of course, intolerable and, in fact, the fall of the Umayyad dynasty was really due in the end principally to this feud between Muḍaris and Yemenis.

Mu‘āwiya I had relied on the Kalb and Yazīd I, who was born of a Kalbi mother had also depended mainly on them. As a result, the Kais refused their homage to their successors Mu‘āwiya II, whose mother was likewise a Kalbi, and Marwān I, and declared themselves for the anti-Caliph ‘Abd Allāh b. al-Zubair [q. v.]. In 684 the Sulaim, the ‘Amir and the Ghatafan — that is all Kaisis — fought under al-Daḥḥāk al-Fihri on the Mardj Rāhiṭ in the Ghūta of Damascus for Ibn al-Zubair against Marwān, whose army consisted of Kalbis and other men of Yemen. They suffered an unusually severe reverse, which plays a great part in the songs of the Kalbi and Kaisi poets and by the laws of the Arab vendetta necessarily perpetuated the hatred of the Kais for the Kalb (see AL-DAḤḤĀK B. KAIS AL-FIHRI and in addition to the literature quoted there al-Mas‘ūdī, *Murūdj al-Dhahab*, v. 201; al-Mas‘ūdī, *al-Tanbih wa’l-Ishraf*, p. 308 sqq.; Ibn al-Athīr, *op. cit.*, v. 204; Yāqūt, *op. cit.*, ii. 743 sq.; Ibn Badrūn, *Sharḥ Kaṣīdat Ibn ‘Abdūn*, ed. Dozy, p. 184 sq.; Ḥamāsa, ed. Freytag, p. 260 sqq., 317 sqq.; al-Maidānī, *op. cit.*, ii. 338, and Huart, *op. cit.*, i. 264 sq.). But they remained partisans of Ibn al-Zubair and maintained themselves with great tenacity in Mesopotamia under their important chief and leader Zufar b. al-Ḥarith al-‘Amirī al-Kilābī and his lieutenant ‘Umayr b. al-Ḥubāb al-Sulamī, who did not capitulate till 691 in the reign of ‘Abd al-Malik after a siege of considerable length in their strongholds, Qarkisiyā and Ra’s al-‘Ain (Resaina) (Wellhausen, *Das arab. Reich u. sein Sturz*, 115 sqq., with references to the most important sources, al-Ṭabarī, *op. cit.*, ii. 643, 777; Ibn al-Athīr, *op. cit.*, iv. 188, 192, 242, 259, Dozy, *Gesch. der Mauren in Spanien*, German ed., i. 86, 101 sqq.; A. Müller, *op. cit.*, i. 373, 385). ‘Umayr b. al-Ḥubāb was the commander of the Kaisi force which fought against the Shī‘is under Ibrāhīm b. al-Ashtar in August 686 on the banks of the Khazir, a tributary of the Great Zab, in the Umayyad army led by ‘Ubayd Allāh b. Ziyād, but to revenge the day of Mardj Rāhiṭ, they deserted in the battle (Abū Ḥanīfa al-Dīnawarī, *op. cit.*, 301 sq.; al-Ṭabarī, *op. cit.*, ii. 708 sqq.; Ibn al-Athīr, *op. cit.*, iv. 215 sqq.; al-

Mas‘ūdī, *al-Tanbih*, p. 312; al-Maidānī, *op. cit.*, ii. 339; Weil, *op. cit.*, i. 380 *sqq.*; Dozy, *op. cit.*, i. 100; A. Müller, *op. cit.*, i. 381; Wellhausen, *Die religiös-politischen Oppositionsparteien im alten Islam*, in the *Abhdlg. d. Götting. Ges. d. Wiss.*, Phil.-hist. Kl., n. F., v. N^o. 2, p. 84; Wellhausen, *Das arab. Reich u. sein Sturz*, p. 116). In spite of this collapse of the Kaisis in their great war against the Umayyads, their smaller struggle against the Kalb continued without interruption, at first mainly under the leadership of ‘Umayr b. al-Ḥubāb. It took the form of a series of “days” fought mainly in the Samāwa, the desert between the ‘Irāk and Syria and forced the north-eastern part of the Kalb to migrate for a time to the Ghawr of Palestine. The most celebrated of these “days” is the battle of Banāt Ḳain between the Fazāra and the Kalb in 692 or 693. When ‘Umayr with his Sulaimis settled on the Great Khābūr (Chaboras) there resulted encounters with the Christian Taghlibis, who dwelled in eastern Mesopotamia; these led to a bitter tribal and blood-feud, fought out chiefly on the Khābūr, the Balikh (Bilechas), the Tharthār and in the Tigris region. The best known “days” of this conflict, which gradually reduced the weaker Taghlib to great extremity, are those of al-Ḥashshāk, where ‘Umayr fell (in 689; the *Naḳā‘id*, p. 373, 400, 508 give for this event the battle of Sindjār), and that of Mount al-Bishr (Wellhausen, *op. cit.*, pp. 125—130; *Naḳā‘id*, p. 401, 508, 899, also 902, 1038 and 1041; Yāqūt, *op. cit.*, i. 632; al-Bakrī, *op. cit.*, p. 179; al-Maidānī, *op. cit.*, ii. 329, 339). We hear of bloodshed as a result of this enmity between the Kais and the Taghlib as late as 814 in the reign of al-Ma‘mūn (Ibn al-Athīr, *op. cit.*, vi. 213).

After the capitulation of the Kais, ‘Abd al-Malik showed himself a clever statesman and above party; he summoned Zufar b. al-Ḥārith and later also his sons to his court at Damascus and married a Kaisi lady of the ‘Abs, called Wallāda, who became the mother of his sons Walid I and Sulaimān besides other children. Walid I was most probably a Kaisi at heart, but he took care not to irritate the Kalb. Sulaimān seems in spite of his fondness for the Yemenī (Azdi) Yazid b. al-Muḥallab to have at least had the intention of placing the interest of the empire before that of parties. As might well be expected in his reign the Kaisis were partisans of the great Ṭhaḳīfī al-Ḥadjdīdī [q. v.] and of the Bāhili Ḳutaiba b. Muslim (q. v. and *Naḳā‘id*, iii. index III, s. v. *Ḳaisu ‘Ailāna*). In the reign of ‘Omar II, who was a pronounced advocate of the policy of conciliation, the dissensions between the two great tribal groups did not make themselves felt. On the other hand in the reign of Yazid II, who in his struggle with the Azdi Muḥallabids had naturally to rely on the support of the Kais, the result was a purely Kaisi party government. His brother and successor Hishām endeavoured to do away with this by withdrawing the Fazāri ‘Omar b. Hubaira, whom Yazid II had appointed viceroy of the ‘Irāk and the East, and replacing him by the Baḳīlī Khālīd b. ‘Abd Allāh al-Ḳasrī, a distinguished statesman, but the Caliph finally found himself forced to allow the latter to be overthrown and replaced by a Kaisi, the Ṭhaḳīfī Yūsuf b. ‘Omar, a relative of Ḥadjdīdī. Under Walid II, who appeared to have fallen entirely under the influence of Yūsuf

b. ‘Omar, the wrath of the Yemenis ultimately found vent in a rising stirred up by personal enemies of the Caliph, which led to the murder of Walid II and the enthronement of Yazid III. The new Caliph sought his support exclusively among the Yemenis, especially the Kalb, the last Umayyad, Marwān II, relied no less exclusively on the Kais, into whose territory — to Harrān — he even removed his capital. Marwān II fell before the ‘Abbāsids. Even in the decisive battle on the Great Zāb which he fought against them in January 750, the feud between the Kais and the Ḳuḍā’a proved fatal (cf. Wellhausen, *op. cit.*, p. 131 *sq.*, 140 *sq.*, 162 *sq.*, 194 *sqq.*, 199 *sqq.*, 203 *sqq.*, 224 *sqq.*, 229 *sq.*, 235 *sq.*, 341, where the necessary sources are everywhere given; A. Müller, *op. cit.*, i. 408, 435 *sqq.*, 445 *sq.*; also the pertinent sections in Weil, *op. cit.*, Dozy, *op. cit.*, Huart, *op. cit.*, Muir, *The Caliphate, its Rise Decline and Fall*, etc.). The quarrel between Kais and Kalb had its effect in history not only in Syria, the ‘Irāk and Khurāsān, but also in the other provinces of the vast Arab empire, notably in North Africa and Spain, where the two parties just as well were at deadly enmity (for North Africa and Spain see especially Dozy, *op. cit.*, i. 138 *sqq.*).

In the severe fightings of the later Umayyad period, the Kais had suffered losses from which they never again recovered. What we learn of them during the ‘Abbāsīd period is not of any great historical interest. The following are the main outlines: In the years 790, 792, 796 and 803, i. e. in the reign of Ḥārūn al-Rashīd, they had all sorts of new encounters in and around Damascus with their hereditary Yemeni enemies (al-Ṭabarī, *op. cit.*, iii. 609, 625, 639 *sqq.*, 688; Ibn al-Athīr, *op. cit.*, vi. 87 *sqq.*, 129; A. Müller, *op. cit.*, i. 490; see also above AL-ḲAIN B. DJASR). They rebelled under Ḥārūn in 794 and again under al-Ma‘mūn in 828, in combination with the Yemenis, in Egypt (al-Ṭabarī, *op. cit.*, iii. 629, 1099; Ibn al-Athīr, *op. cit.*, vi. 97, 288; Weil, *op. cit.*, ii. 146 *sq.*; A. Müller, *op. cit.*, i. 490). In 811 under al-Amin, they fought the pretender ‘Alī b. ‘Abd Allāh al-Sufyānī chiefly because he had Kalbī blood in his veins (Ibn al-Athīr, *op. cit.*, vi. 172 *sq.*; Weil, *op. cit.*, ii. 187); after the death of al-Mu‘taṣim in 842 they stirred up a revolt in Damascus but were quickly brought back to obedience by a severe defeat inflicted on them by al-Wāthik’s army on the for them ill-omened Mardī Rāhiṭ (see above) (Ibn al-Athīr, *op. cit.*, vi. 376). The Kaisis of Bahrain played a certain part in the initial stages of the Ḳarmāṭian movement in 894 *sqq.* (Ibn al-Athīr, *op. cit.*, vii. 341; cf. Weil, *op. cit.*, ii. 508, note 3).

The Kais appear, compared with the Kalb, to have been in general more savage, less civilised, more hardy, more treacherous and more cruel. The reason, no doubt, is that they were in much closer contact with the life of the desert than their rivals, who had been for centuries already settled in Syria, a home of ancient culture, and had naturally not remained uninfluenced by the refining influences of the Byzantine empire, whose eastern marches had been their home before the Muslim conquest. Their readiness to face battle or death is occasionally celebrated, not only in poetry (al-Ṭabarī, *op. cit.*, ii. 1930).

Famous Kaisis (with the exception of those already mentioned). The best known poets of the

Kais were: al-Nābigha al-Dhubyānī, ‘Antara, Labid, ‘Amir b. al-Tufail, Tufail b. ‘Awf, ‘Urwa b. al-Ward, al-Shammākh, al-Khansā, Abū Mihdjan, al-Huṭai’a, Ta’abbata Sharā, Dhū ‘l-Iṣḥā al-‘Adwānī, Duraid b. al-Simma, al-‘Abbās b. Mirdās b. Mazarrid, Khidāsh b. Zuhair, al-Nābigha al-Djā’idī, etc. [see the pertinent articles]. The great philologist al-Aṣma’ī [q. v.] was a Bāhilī. — Other Kaisis of historical importance are given by Ibn Khaldūn, *op. cit.*, ii. 305 sqq., Ibn Kṭaiba, *op. cit.*, p. 38 sqq., Ibn ‘Abd Rabbihi, *op. cit.*, ii. 51 and Abū ‘l-Fidā, *op. cit.*, p. 194 sqq.

The Dialect of the Kais-‘Ailān. The Arabic philologists give us the following — as a matter of fact they are in the main common to most tribes of the Nadjd — phonetic and grammatical linguistic peculiarities of our group of tribes: They still pronounced the *hamza* as a guttural stop and they had even changed it to ‘ain when initial (in part only? so that they said ‘an, ‘anna, ‘aslama, ‘idhan for ‘an, ‘anna, ‘aslama, ‘idhan). They had a tendency to *imāla* and to *ishmām*; and they said *iṣlamu*, *tintaliḥu*, *tistakhridju* etc. for *taṣlamu*, *tanṭaliḥu*, *tastakhridju* etc., *hublay* for *hubla* or *hublā*, *kū* and *ki* for *huwa* and *hiya* (? always) and *min ladunihī* for *min ladunhu*. Cf. Howell, *A Grammar of the Classical Arabic Language*, iv. 930, ii./iii. 425, iv. 739, 824, 1313, 1476, note 4, ii./iii. 11 sq., iv. 135, note to 1435, l. 8, i. 523, iv. 835, i. 780; Sibawaihi, ed. Derenbourg, ii. 168 sqq., 275 sqq., 279 sqq.; al-Zamakhsharī, *al-Mufaṣṣal*, ed. Broch, § 527, 580, 643, and thereon Ibn Ya’ish; al-Suyūṭī, *al-Mukhtār*, p. 104, 109; Ibn Djinnī, *al-Khaṣā’iṣ*, p. 411; al-Ḥariri, *Durra*, ed. Dialektspaltung*, in the *Zeitschr. f. Assyriologie*, xxi. 31 sqq.; Schaade, *Sibawaihi’s Lautlehre*, p. 78 sq., etc. On words and expressions peculiar to the Kaisis see Freytag, *Einl. in das Studium der arab. Sprache*, p. 87 sq., al-Suyūṭī, *op. cit.*, i. 109 (anṭā for ‘aṭā, see thereon Landberg, *Arabica*, v. 147, note 1 etc.), Ibn Hishām, *Sira*, 385, 3 etc.

Bibliography given in the article itself. (A. FISCHER)

KAIS B. AL-KHAṬĪM B. ‘ADĪ, with Ḥassān b. Thābit [q. v.] the most important poet of pre-Muḥammadan Yathrib, the latter Medina. He belonged to the Banū Zafar, a family of the Nabit of al-Aws [q. v.]. In the desperate fighting between the two tribes of al-Aws and al-Khazraj, he championed the former with tongue and sword. Very little is known of the facts of his life, if we except the later, very doubtful stories. The account of the revenge he took on the murderers of his father and grandfather is however quite authentic, and by this he won particular fame with posterity. This event was later embellished with all sorts of fictitious details, some of which are echoes of the Cyrus saga and form a parallel to the legend of the young Parzival (see Singer, *Arab. und europ. Poesie im Mittelalter* in the *Abhandl. d. Preuss. Akad. d. Wissenschaft.*, 1918, phil.-hist. Kl., N^o. 13, p. 7 of the reprint). All else that we know of the life of the poet is that he took an active

part in the political and military activities of his tribe. His *Diwān* contains references to a whole series of *Ḍiyām* of the Aws. In the decisive battle of Bu‘āth [q. v.], later often celebrated in song, he did not take part, apparently on account of a wound received previously. Not long after this battle and before the Hijra he was treacherously murdered. Kais was involved in polemics with almost all the Khazrajī poets of his day, notably with Ḥassan b. Thābit and ‘Abd Allāh b. Rawāḥa [q. v.], both of them survived him by a considerable period. Although he was still alive at the beginning of Muḥammad’s prophetic activity, his *Diwān* shows no trace of a knowledge of it. All that the later sources tell of his meeting with the Prophet is pure invention.

Kais’s *Diwān* is preserved in an old manuscript (dated 419 A. H.) in the Top Kapu Seray Library in Constantinople, as an appendix to the *Diwān* of Ḥassan b. Thābit. The second manuscript so far known which is in the Egyptian National (formerly Khedival) Library in Cairo, seems to be a later copy of the above. The poems were collected by Ibn al-Sikkīt, but the final editor seems to have been al-Sukkari. What has survived for us in the *Diwān* is certainly only a fragment of the original total.

Kais reveals in his poems the two sides of his life, the settled and the nomadic, which was so characteristic of the Arabian oases of the time. His descriptions of war and women are celebrated. The real Beduin, the description of the riding she-camel, the ride through the desert and hunting are almost entirely lacking in his poems. Kais is highly esteemed by later generations, perhaps more for his chivalrous character than for his poetic gifts. His poems are a very important source for our knowledge of conditions in Medina immediately before Islām.

Bibliography: *Der Diwān des Kais b. al-Ḥaṭīm*, ed. T. Kowalski (Leipzig 1914). Besides the literature given there, in the historical introduction, al-Samhūdī’s *Wafā’ al-Wafā’ bi-Akhbār Dār al-Muṣṭafā* (Cairo 1326/27, 2 vols.) is very important for the topography of Medina and therefore also for the understanding of the *Diwān*. (T. KOWALSKI)

KAISĀN, ABŪ ‘AMRA, a client of the ‘Uraina, who belonged to the Baḍila [q. v.], was one of the leaders of the Mawālī [see MAWLĀ] in Kūfa in the time of al-Mukhtār [q. v.] and was one of the latter’s intimates. Al-Mukhtār made him commander of his police force (*ḥaras*, *shurṭa*). In this capacity this ardent Shī‘ī took part in avenging al-Ḥusain by killing, wherever possible, those who had taken the field against him and destroying their houses. For example, he beheaded, by al-Mukhtār’s command, ‘Umar b. Sa’d b. Abī Waḥkās who had commanded the troops sent against al-Ḥusain. In the battle of Madhār (67 = 686) Kaisān commanded the Mawālī; he was perhaps killed in this fierce battle. According to al-Kashshī, Kaisān’s method of procedure is said to have originated among the people of Kūfa the proverb applied to one who is deprived of his wealth: “Abū ‘Amra has entered his house”; cf. al-Dinawarī, p. 297, 5: — “Abū ‘Amra has visited him”. A verse in al-Kashshī describes him as wicked than Iblis. — As Muḥammad b. al-Ḥanafiya was the Imām of the Kaisāniya, Kaisān is occasionally represented as his client or pupil.

KAISĀNĪYA was first applied to the Kūfa group of Shi'a, the Mawālī, represented by Kaisān Abū 'Amra (see above), whose interests were championed by al-Mukhtār. The name was then extended to those who held the views, which had considerable currency among the Shi'is led by al-Mukhtār, and continued to be influential even later. When the little known Kaisān came in time to be practically forgotten, his name was often explained as a *laḡab* of al-Mukhtār. Mukhtāriya thus became another name for the older stratum of the Kaisāniya. The latter name, however, is also derived from a certain Kaisān, a mawlā of 'Alī, who fell at Šiffin (al-Ṭabarī, i. 3293, 10), from whom al-Mukhtār is said to have derived his views. The Kaisāniya were also called Khashabiya [q. v.] from the wooden club which the Mawālī carried as a weapon.

The contemporary Kaisānis ascribed special knowledge to al-Mukhtār and to some extent regarded him as a prophet. There must also have been among them an echo of a cult, followed especially by some Yemen clans and described as Saba'i, the worship of an alleged chair of 'Alī's, which was compared with the Ark of the Covenant and also used as an oracle. Their Imām in succession to al-Ḥusain was Muḥammad b. al-Ḥanafīya [q. v.], whom al-Mukhtār put forward as a mere figure-head. As al-Shahrastānī tells us, the Kaisānis held the view that he was master of all knowledge and had obtained from the two Saiyids (i. e. al-Ḥasan and al-Ḥusain) all mystical, allegorical and esoteric knowledge as well as knowledge of the celestial spheres and of the souls. In time there came to be Kaisānis who regarded Ibn al-Ḥanafīya as the Imām in immediate succession to his father and thus excluded al-Ḥasan and al-Ḥusain. In proof of this they pointed to the tradition that 'Alī in the Battle of the Camel had entrusted the standard to Muḥammad b. al-Ḥanafīya. This view probably arose in opposition to those held by the Imāmis and Zaidīs.

Ibn al-Ḥanafīya's death, probably in 81 = 700, resulted in a split in the Kaisāniya. Apart from those who raised his son 'Alī to be Imām, a section of them transferred the Imāmate to his son Abū Ḥāshim [q. v.], who was regarded as heir to the secret knowledge of his father. They were called Ḥāshimiyyā; but after the death of Abū Ḥāshim (98 = 716/7 or 99 = 717/8) they broke up into various branches on the question of succession. The 'Abbāsids now spread the idea that Abū Ḥāshim before his death had transferred his rights to the Imāmate to Muḥammad b. 'Alī b. 'Abd Allāh b. 'Abbās [q. v.].

A group of the Kaisāniya, however, did not believe in the death of Muḥammad b. al-Ḥanafīya. According to them, he lived in concealment in a ravine in the mountains of Raḍwā [q. v.] out of which he would one day emerge at the head of his followers as Mahdī [q. v.] in order to fill the earth with righteousness. His stay there is described with Messianic features by the Kaisānī poets al-Kuṭaiyir [q. v.] and al-Saiyid al-Himyarī [q. v.]. These views of the concealment (*ghaiba*, q. v.) and return (*raḍ'ā*, q. v.) are attributed to a certain Abū Karib (Kurayb), whose followers were therefore distinguished as Karibiya (Kuraybiya) [q. v.].

According to al-Shahrastānī, all Kaisānis held the view that religion consisted in obedience

to a man; by means of allegorical interpretation (*ta'wil*, q. v.) the prescriptions of law were transferred to such men. — Among the Kaisānis also arose the view that "the intervention of new circumstances can produce the alteration of a divine decision already made" (*badā'*, q. v.). Besides the doctrine of the return of the hidden Imām, metempsychosis (*tanāsukh*, q. v.) had also followers among them.

The Kaisānis could not survive alongside of the Imāmiya [q. v.] and the Zaidiya [q. v.]. For Ibn Ḥazm the Kaisāniya was an extinct sect. — To Kaisāni influences should probably be ascribed the fact that concealment and return were attributed to 'Alids, whom the Zaidīs had championed. — A remarkable document, which is said to contain Ḥarmatian doctrines (see ḤARMATIANS) may also emanate from Kaisāni circles. In it a certain Aḥmad b. Muḥammad b. al-Ḥanafīya appears as Mahdī and Prophet (al-Ṭab., iii. 2128 sq.; Ibn al-Aṭhir, *al-Kāmil*, vii. 311, 16 sqq.; de Sacy, *Exposé de la religion des Druzes*, Paris 1838, i. Intro. p. clxxvii. sqq. An Aḥmad is, however, not known among the sons of Muḥammad b. al-Ḥanafīya (cf. Ibn Sa'd, *al-Ṭabaḳāt*, v. 67; Aḥmad b. 'Alī al-Dā'ūdī al-Ḥasanī, *Umdat al-Ṭālib fī Ansāb Āl Abī Ṭālib*, Bombay 1318, p. 319 sqq.).

KAISAR (A.), the usual name in Arabic for the Byzantine Emperor. The word, of course, represents the Greek *Καῖσαρ* and came to the Arabs through the intermediary of the Aramaic (cf. Fraenkel, *Die Aramäischen Fremdwörter im Arabischen*, Leiden 1886, p. 278 sq.). The borrowing must have taken place at quite an early period as the word in Syriac later appears almost always in the form *Kesar* (cf. Payne Smith, *Thesaurus Syriacus*, s. v.). The Arabs, centuries before Muhammad, had relations with the Byzantines (cf. A. Müller, *Der Islam im Morgen- u. Abendland*, i. 10 and the article *GHASSANIDS*). Among the old Arabic poets, Imru' al-Qais in particular frequently mentions the *Qaisar*, who, indeed, played a great part in his life (cf. IMRU' AL-QAIS). The word does not occur in the *Qor'ān* but is quite frequent in the biography of Muhammad and especially in Tradition, where *Qaisar* — always, we may note, without the article like a proper name — is usually mentioned in the first place among contemporary secular rulers; next to him come the king of the Persians and the Negus of Abyssinia (that the Persian Hurmuzān in al-Bukhārī, *Ṣaḥīḥ*, *Djizya*, Bāb I = ed. Krehl-Juynboll, ii. 292, 5 from below gives a different opinion is, of course, not to be wondered at). In the narratives mentioned a great part is played by the epistle said to have been sent by Muhammad through Dihya [q. v.] to the governor of Boṣrā and through him to the Emperor Heraclius, who thereupon interrogated Abū Sufyān, who happened to be within reach, regarding the new prophet. Here as well as in the story of the embassy of the Prophet to the Ghassanid al-Hārith b. Abi Shamir (of doubtful authenticity; cf. Nöldeke, *Die Ghassanischen Fürsten* etc., in the *Abhandl. d. Kgl. Preuss. Akad. d. Wiss. zu Berlin*, 1887, phil.-hist. Klasse, p. 42 of the reprint), Heraclius (in contrast to Kisrā) appears as a man, at heart inclined to Islām, whom only fear of his subjects prevents from openly professing the new religion. — The Traditions further record all sorts of sayings and prophecies of Muhammad regarding *Qaisar*, which can at once be recognised as later views thrown back into the past. In al-Bukhārī, *Tafsir* to Sūra lxvi. Bāb 2 (Kr.-J. iii. 360 middle of page) Muhammad comforts 'Omar, who is lamenting the neediness of his existence, contrasted with the splendid court of Kisrā and *Qaisar*, with the words: "Art thou not content that this world belongs to them and the next to us?" In *Djihād*, Bāb. 93 (Kr.-J., ii. 229 below) we read: "To the first army of my community that plunders the city of *Qaisar* (Constantinople) its sins are forgiven". In *Aimān*, Bāb 3 (Kr.-J., iv. 259, 9) the prophet foretells the final decline of the power of the East Roman Empire as well as that of the Persian kingdom.

In later poets also, *Qaisar* is still a current conception as a symbol of power and wealth — again alongside of Kisrā. Thus Ibn Djinnī (best known as a grammarian) in a verse quoted in Ibn

Khallikān, *Wafayāt*, ed. Wüstenfeld, fasc. iv. 129, 4 from below, prides himself on being descended from the 'Caesars'.

Bibliography (here and in the text mainly from references given by Prof. A. Fischer, Leipzig and Prof. A. J. Wensinck, Leiden): Abu 'l-Fidā', *Mukhtaṣar Ta'rikh al-Bashar*, part ed. and transl. by Fleischer as *Abulfedae Historia antislamica*, p. 132 at end; Imru' al-Qais, *Diwān*, ed. Vorarb.*, iv. 98; Caetani, *Annali*, year 6 A. H., § 50. (A. SCHAADÉ)

KAISĀRIYA (also KAISĀRIYA), plur. *ḳayāsir*, the name of a large system of public buildings laid out in the form of cloisters with shops, workshops, warehouses and frequently also living-rooms. According to de Sacy, *Relation de l'Égypte par Abd Allatif* (Paris 1810), p. 303 sq., the *ḳaisāriya* was originally distinguished from the *sūḳ* or *bāsār*-street probably only by its greater extent, and by having several covered galleries around an open court, while the *sūḳ* consists only of a single gallery. At the present day in any case the term *ḳaisāriya* is not infrequently quite or almost identical in meaning with the Persian word *kārwānserāi*, which first came into use in the nearer East in the xvth century, or the likewise modern analogous names, *khān*, *wakāla* (okella), *funduk* [q. v.] and *bezzistān* [q. v.].

Origin. The word *ḳaisāriya* is certainly of Greek origin: *καῖσαρεια* "imperial", an abbreviation for *ἡ καῖσαρεια ἀγορά* "the imperial market". As H. Thiersch has shown, not only is the plan of the mosque — according to R. Kasdorff, however, in his *Haus und Hauswesen im alten Arabien*, Halle 1914, p. 69, the early Muslim mosque was of ancient Arab origin — to be traced to the old quadrangular court (with or without cells around it) of the *agora*, but also the *ḳaisāriya*, which was used on the one hand as a warehouse for goods (whence developed the market-place) and on the other hand, without any doubt, usually also as lodgings. The expression *ἡ καῖσαρεια* recalls the fact that the oldest of these public buildings were imperial i. e. state institutions, while in the Muslim period they were mainly due to private initiative (foundations of rich merchants, members of royal families or high officials). Thiersch thinks (*op. cit.*, p. 233) that the place where the idea of these buildings originated — like many other things in the new Muslim period — seems to have been Alexandria, which was especially rich in covered market-places and halls. Whether we should actually consider the Caesareum, the Caesar temple in Alexandria, to which the market-place and warehouses were attached (Strabo, xvii. 794), as the original in name and fact of the *ḳaisāriya* (as does Vollers in the *Ztschr. d. Dtsch. Morg. Ges.*, li. 302) is uncertain. A derivation of the word *ḳaisāriya* from the name of the Palestine town of *Ḳaisāriya* (see be-

low), which de Sacy (*op. cit.*) recommends, can hardly be supported with sound arguments. The word in any case was originally used only in those districts which, like Syria, Palestine and parts of North Africa had been under (imperial) Byzantine rule. The idea was only transferred later to other lands, especially to Spain and the east. In Spanish and Portuguese we find *kaisāriya* as a loan-word: Span. *alcaicería* (*cayceria*, *caeceria*), Portug. *alcaçarias*; cf. Fr. Cañes, *Dic. Español Latino-Arábigo* (Madrid 1787), i. 69a; Dozy-Engelmann, *Glossaire des mots espagnols et portugais dérivés de l'arabe*² (Leiden 1869), p. 73, 79; D. Leopoldo de Eguilaz, *Glos. etim. de las palabras españolas . . . de origen oriental* (Granada 1886), p. 126.

The following notes may help to elucidate the occurrence of the word in the Islamic world. In Egypt we have especially good evidence of its use in Cairo. Al-Makrizī (d. 845 = 1441) in his description of the city gives a large number of *kaisāriya*'s; cf. *al-Khiṭaṭ* (Bulāḳ 1270), ii. 86—91; E. Reitemeyer, *Die Städtegründungen der Araber im Islam* (1912), p. 117. Later its place was gradually taken by the word *wakāla* (*okāle*, *okelle*) and in Niebuhr's time (1761) only the market-place in the suburb of Bulāḳ was still called *Kissarie*. — In Fez (see Fās, ii. 72 *sqq.*) in Morocco by *kaisāriya* one understands the central market shut off by gates and walls from the other parts of the town; see Dozy, *op. cit.*, ii. 432; T. Williams in the *Beitr. zur Assyriol.*, iii. 583; E. Reitemeyer, *op. cit.*, p. 148, and cf. also above, ii. 73^a. — In Granada in Spain in the *Alcaicería* is that quarter of the town where the raw silk is sold; see Tollhausen, *Spanisch-deutsch. Wörterb.*, i. Leipzig 1888, p. 28b; F. v. Schack, *op. cit.*, ii. 327. — In Syria we have evidence of the use of the word *kaisāriya* as the "name of the shops of the wholesale dealers" in Beirut (see Niebuhr, *op. cit.*, ii. 469 and K. Müller, *op. cit.*, p. 7), in Damascus (see Ibn Džubair, *Riḥla*², ed. Wright and de Goeje, p. 288, ²¹ (year 1184) and Seetzen, *Reisen durch Syrien* etc. (Leipzig 1854—9), i. 269) and also in Aleppo (see Ibn Džubair, p. 252, ¹³; Yāḳūt, *Muḏjam* (ed. Wüstenfeld), ii. 307, ²³; Ibn Baṭṭūṭa (ed. Paris), i. 151; A. Russell, *The Natural History of Aleppo*², London 1794, i. 36; German transl., i. (Göttingen 1797), p. 45). — In al-Ḥasā (Hofhūf, q. v., p. ii. 324 *sq.*) in Eastern Arabia the quarter of the town that contains the shops is called el-Gaisāriye; see *Der Islām*, viii. 32. — Going still further east we find a square called *Kaisāriya* in Mōṣul: see Ibn Džubair, *op. cit.*, p. 235, ¹⁶; in al-Salāmiya near Mōṣul: Yāḳūt, iii. 113, ²¹; in Irbil: Yāḳūt, i. 186, ²²; in Baghdād: see Massignon, *op. cit.*, p. 92 (the present bazaar centre); in Kerbelā: see Massignon, *op. cit.*; in Iṣfahān: see Ritter, *op. cit.*, ix. 49; Vullers, *Lexic. Persico-Lat.*, ii. 753a, and cf. also (Ispahan) Pietro della Valle, *Viaggi* (Brighton 1843), ii. 8, German transl., (Gent 1674), iii. 5; [Dupré], *Voyage en Perse* (Paris 1819), ii. 125 and W. Ouseley, *Travels in Various Countries of the East*, iii. (1819), 16; in Tibriz: see Ritter, *op. cit.*, ix. 856; in Khwārizm (Urgandj): Ibn Baṭṭūṭa, iii. 4.

We may further note that, according to a reference in Niebuhr (*op. cit.*), about the middle of the xviiith century large public buildings in the Barbary States (N.W. Africa) were called *casseries*. In Algiers at the present day *kaisā-*

riya means barracks; see Dozy, *op. cit.* In the ruined cities of Ḥawrān the palaces of the erstwhile Roman or Byzantine governors are now also called *kaisāriya*; see Wetzstein, *Reisebericht über Hauran* etc. (Berlin 1860), p. 55. In general it appears that in modern times the use of the word *kaisāriya* as market-place and suchlike has to a great extent given way to newer words like *khān*, *wakāla*, *funduk* and *bezestān*.

KAISĀRIYA or KAISĀRIYA = *Καίσαρεια* (Caesarea), a name bestowed in the reign of Augustus and Tiberius on a whole series of towns of the Roman East, and also in North Africa and Spain. 17 places of the name are known; see Pauly-Wissowa, *Realencykl. d. klass. Altertumswissensch.*, iii. 1288 *sq.* The Arab writers only know of two towns named Kaisāriya, viz.: 1. a town in Palestine, on the coast in 35° N. Lat. about 24 miles south of Haifa. Its earlier name Στρατωνος πόλις (cf. Stark, *Gaza und die philistäische Küste*, 1852, p. 450 *sq.*; Neubauer, *op. cit.*, p. 11—15) is of uncertain etymology. To distinguish it from places of the same name, especially the north Galilaean Caesarea (Caesarea Philippi, Paneas, Bāniyās [q. v.], this town was called more definitely Caesarea Stratonis, C. Palaestinae or C. maritima). The Arabs distinguish it by the addition of Filistin (Kaisāriya in Palestine) from the town of the same name in Asia Minor.

The origin and antiquity of Caesarea is veiled in obscurity; but it was certainly in existence in the second century B. C. In 22 B. C. Herod I laid out a fine city, which received the name of Caesarea in honour of Augustus, on the site of the ancient settlement which had fallen into ruins (on the date cf. Otto in Pauly-Wissowa, *op. cit.*, Suppl. Heft 2, col. 68, note). Part of the plan of the new foundation was the making of a splendid harbour which gave the town a great economic importance by giving the Jews access to the Mediterranean. Caesarea rapidly developed to be the first town in the country and maintained this position for some four centuries. It was also of great importance for Christianity, which early found a footing there, as it was its spiritual metropolis in Palestine down to the time of the Council of Chalcedon (451). As late as the Arab invasion Caesarea was still a flourishing town. It vigorously resisted the advance of the Muslims and withstood them in a long siege until finally Mu'āwiya took the city by storm. The statements in the Oriental sources regarding the date of its fall and the length of the siege vary; the siege probably began in 18 (639) and ended in 19 (640).

The accounts also differ very considerably as to the number of the defenders. On the Muslim conquest see de Goeje, *Mém. sur la Conquête de la Syrie*², p. 166 sqq.; Caetani, *Annali dell' Islam*, iv. 31 sq., 156—162.

Kaisāriya remained in undisputed possession of the Muslims until the First Crusade. During this it was stormed and taken by Baldwin I on May 31, 1101; see Wilken, *Gesch. der Kreuzzüge* (Leipzig 1807—1832), ii. 102—104; R. Röhrich, *Gesch. der Kreuzzüge im Umriss* (Innsbruck 1898), p. 57. Among the rich booty taken by the Christians on this occasion, the most valuable was a six-sided emerald, a vessel of green glass which was believed to have been used as a bowl of the Last Supper (this belief apparently first arose under the influence of the story of the Graal). The Genoese received those sacred relics along with a third part of the city as a reward for the services which they had rendered at its capture. The vessel is still preserved in the Cathedral at Genoa and is known as the *sacro catino*. On it see Wilken, *op. cit.*, ii. 103, 108—111; Mislin, *op. cit.*, ii. 112 sqq.; Fr. Kampers, *Das Lichtland der Seelen und der hl. Gral* (Cologne 1916), p. 85 sq.

After the battle of Hattin (July 5, 1187) so disastrous for the Christians, Saladin reoccupied Kaisāriya without striking a blow; see Schultens, *Vita . . . Saladini auct. Bohadino I. Sjeddadi* (Leiden 1755), p. 71 and glossary s. v. (p. 23). When a few years later, on Aug. 30, 1191, Richard Coeur-de-Lion occupied the city he found it in ruins. The Crusaders rebuilt the citadel in 1218. But as a result of their carelessness, the Egyptian Sultān al-Malik al-Mu'addam was able to recapture it within two years (in 1220). It was not till Louis IX of France took it, that Kaisāriya was again regained for the Christians. He spent a whole year (1251—1252) in it, engaged on the building of an extraordinary system of defences, notably a strong wall encircling the town. In spite of all this, Kaisāriya had to surrender after only seven days' attack to Sultān Baibars in 1265. The town, in which the Christians defended very stubbornly their last resort, the strong citadel, was completely destroyed after its capture; cf. Wilken, *op. cit.*, iii. 296, iv. 408, vi. 158, 303, vii. 474 sq.; Kugler, *Gesch. d. Kreuzzüge* (Berlin 1880), p. 387; Röhrich, *op. cit.*, p. 253. Sultān al-Ashraf completed the work of destruction in 1291.

The earlier Arab geographers describe Kaisāriya as a beautiful and important city strongly fortified; they particularly praise the fine fruits grown here, the woods and the running water. In Yākūt's time Kaisāriya was still only a village. When Abu 'l-Fidā' [q. v.] wrote (721 = 1321) it was in ruins, after the devastations wrought in 1265 and 1291. In the xviiith century only a few fisher families lived here; a little later the place was quite deserted. Since 1884 the Turks have settled Bosnians there. Kaisāriya now is one of the most important ruined sites in the country west of the Jordan; numerous remains of the ancient and mediaeval city have survived. The Roman town covered an area of 400 acres, while the mediaeval — a quadrangle with walls, ditches, bastions and towers — only occupied about 1/10 of the area of the Roman site.

The harbour is now unusable; but the once great harbour buildings with the Drusus tower

built by Herod are still to be traced, as well as in the southern part on the sea shore the great amphitheatre built by Herod I to hold 20,000 spectators. A little to the northeast are the remains of the hippodrome. The aqueducts are also partly preserved. The mediaeval castle, a quadrangle with a high tower, has been recently adapted by the Turks for a government office. The ruins of the city walls that still exist date from the fortifications of Louis IX. Only a few remnants are left of the great church of the Crusaders with its three naves. Much ancient and mediaeval material has been carried off in course of centuries to build other neighbouring towns. Djazzār Pasha of 'Akkā for example (d. 1209 = 1804; see above i. 1033) for his famous buildings in 'Akkā (notably the great new mosque) brought stones and pieces of buildings (especially ancient columns) from the ruins of Kaisāriya and 'As-ḳalān [q. v.]. Kaisāriya was also used as a quarry for the rebuilding of the Franciscan monastery in Jaffa. On the ruins see especially R. Pococke (1737), *Descr. of the East* (London 1743—5), ii. 58 sq., German transl. (Erlangen 1791), ii. 85—87 (with plan: copperplate Vb); A. v. Prokesch (1829), *Reise ins heil. Land* (Vienna 1831), p. 28—34; Wilson (1842), H. Barth (1846) in Ritter, *op. cit.*, xvi. 599, 604—7; G. Hanel (1847) in the *Zeitschr. d. Deutsch. Morgenl. Ges.*, iv. 339 sq.; v. d. Velde, *Reise durch Syrien und Palästina*, i. (Leipzig 1855), p. 253—6; V. Guérin, *Descr. géogr. . . de la Palestine*, 2^e partie, ii. (Paris 1875), 321—339; Dalman's *Palästinajahrbuch*, v. 15, viii. 128 sq.; H. Thiersch in the *Zeitschr. d. Deutsch. Palästinavereins*, xxxvii. (1914), 62 sq.

KAİŞARIYA (in Arabic authors also KAİSÄRIYA and KAİŞÄRIYA), a town in Asia Minor (Rüm), in 35° E. Long. (Greenwich) and 38° 15' N. Lat. at the northern base of the Ardjish-Dagh [q. v.], 3,500 feet above sea-level on a treeless plateau, watered by the Kara-Şu, a tributary of the Kizil Yрмаk (Halys) — the latter flows about 14 miles North of Kaışariya. At the present day it is the chief town of a sandjak of the vilâyet of Angora [q. v.]. The mediaeval and modern town is the successor of the ancient Mazaca, the capital of Cappadocia, to which Tiberius after its conquest gave the name Caesarea. Mazaca was a mile or two S. W. of the modern town, on the spurs of the Ardjish-Dagh, while the latter gradually grew up around the buildings which the great church-father Basilus, a native of Caesarea (329—379), erected here. Justinian I fortified this new settlement.

During the middle ages Caesarea in general shared the political history of central and eastern Asia Minor. In the viith century it passed into the hands of the Arabs, was retaken for a time by the Byzantines, but in 108 (726) again passed under Arab rule; cf. Weil, *Gesch. der Chalifen*, i. 637 and the Syriac chronicle of Dionysius of Tell-Mahrē (ed. Chabot), p. 26 sq. In the xith century Kaışariya was taken by the Saldjûks and played an important part as the second town in their empire. This was its period of greatest prosperity. In the xiiith century it was the residence of the Turkish dynasty of the Dānishmendids (cf. DĀNİSHMENDIYA).

In the xvth century Kaışariya had for a considerable time to acknowledge the suzerainty of the Mongol Khāns of Persia (the so-called İl-Khāns), as is shown by the coins they struck here. Ibn Battūta makes special mention of the strong Mongol garrison in the town. About 800 (1398) Bāyazid I [q. v.] took it (cf. Weil, *op. cit.*, v. 70) and it remained henceforth in Turkish hands. Kaışariya fell only for a very brief period into the power of the Mamlūk Sulṭāns, in 675 (1277) when Baibars and again in 822 (1419) when Ibrāhīm, son of Sulṭān al-Mu'ayyad advanced into this region of Asia Minor; see Weil, *op. cit.*, iv. 82, v. 146.

Kaışariya is now one of the most important towns in the interior of Asia Minor. The population of the Sandjak of Kaışariya was estimated by Cuinet in 1892 at 210,732, of whom 136,000 were Muslims, 45,318 Armenian Orthodox, 25,449 Greek Orthodox, 1,800 Protestant and 1,575 Roman Catholic Armenians. In 1813 Kinneir estimated the population at about 25,000 (including 15,000 Armenians, 300 Greeks and 150 Jews), Ainsworth in 1839 at 18,522, Cuinet in 1892 at 72,000 (45,000 Muslims, 14,400 Greek Orthodox, 9,000 Armenian Orthodox, 800 Catholic Armenians, 1,200 Protestants). In 1896 R. Oberhummer-Zimmerer put it at about 60,000, of whom 25% were Christians (including 10,000 Armenians), Baedeker in 1914 at 54,000 of whom 33% were Christians. H. Barth in 1858 estimated the number of inhabited houses at 8,000—10,000.

In the last centuries of the ancient period there must have been a strong Jewish community in Kaışariya, for the Sāsānid Sapor (Sābūr) I (241—

272) is said, according to Jewish sources, to have slain no less than 12,000 Jews here about 260, in his incursion into Roman Asia Minor; cf. Ersch and Gruber, *Allgem. Encycl.*, 2nd Sect., xxvii. 184 (note 87) and Pauly-Wissowa, *op. cit.*, 2nd Series, i. 2330. In the middle ages the town seems to have been a great centre of Halakha study in Asia Minor; cf. A. Neubauer, *op. cit.*; H. Graetz, *Gesch. der Juden*⁴, iv. 61, 263. The character of the present inhabitants is unfavourably criticised by several authorities (e.g. Chantre and Ramsay). During the hot months many of them live in the hills which form the last spurs of the Ardjish-Dagh.

The impression made by Kaışariya is imposing and picturesque especially on account of its beautiful situation and considerable extent. Various travellers, like Moltke (*Briefe über Zustände u. Begebenheiten in der Türkei*⁶, Berlin 1893, p. 330) and Naumann have therefore considered it the prettiest and finest town in the interior of Asia Minor. Its interior is therefore the more disappointing with its filth and dirt, its numerous ruined streets and miserable cottages in the suburbs. The tuff of the neighbourhood yields excellent building material. For fear of earthquakes, the houses of the town are usually left (as Barth observes) unfinished in the upper stories.

The Arab geographers of the middle ages mention particularly among the buildings a mosque, erected in memory of Saiyid Battāl, the Turkish warrior of the faith and national hero [cf. above i. 680]. They also report that the town contained the highly venerated sarcophagus of Muḥammad b. al-Ḥanafiya [q. v.]. No remains are preserved of the important churches which existed here in the early Christian period. We find, however, important monuments of the Saldjûk epoch, notably the Ulu-Djāmi' of 1206, the Huen mosque of 1236 with Madrasa, also somewhat outside of the town, the round tomb or Syrtshaly Gümbet and the Köshk Önü, a khān-like building around an octagonal tomb of 1340. The walls of the town also date from the Saldjûk period but have been restored at a later date. This is also true of the citadel which, now filled with Turkish houses, affords a splendid panorama.

Kaışariya is an important junction of roads and carries on a considerable trade. Local industry is limited to the manufacture of carpets and leather, the manufacture of various dyes, and (according to Barth) to the peculiar preparation of dried meat, which is sold throughout Asia Minor.

About half an hour South-West of Kaışariya rise in vineyards the ruins of the ancient Mazaca Caesarea, called by the natives Eski-Kaışariya, more usually Eski-Shehir (i. e. Old Town) and Zorzat by the Armenians. A series of not inconsiderable villages surrounds the modern town in the form of an arc from West to South-East, like suburbs. For example the little town of Talas lies 1¼ hours to the South-East, the birthplace of St. Sabas († 532) with an ancient castle, powerful walls in the form of a quadrilateral, and the buildings of the American Mission (schools, hospital, etc.). ¾ hour further to the South lies Sindjidere, where in the monastery of St. John, surrounded by well conducted schools, the Greek Archbishop lives. Talas and Sindjidere are already on the North-eastern spurs of the Ardjish-Dagh.

In the West and South of Kaışariya there was

a settlement of Christian monks at a very early period. There still exist here old monasteries and towns of caves, with churches, halls, cells and tombs. Special mention may be made of the cave-churches at Ūrgūb and at the rocky cone of Mačan. For further information regarding these Christian foundations see Ch. Texier, *Descr. de l'Asie Mineure*, ii. (Paris 1849), p. 53 sq. (and plates lxxxv.—viii.); Ch. Texier and P. Pullan, *Byzantine Architecture*, London 1864, p. 40 sq.; Oberhummer-Zimmerer, *op. cit.*, p. 120 sq., 244—250, 298; H. Rott, *Kleinasiatische Denkmäler* (Leipzig 1908), p. 121 sq., 155—170, 210 sq.

KĀ'ITBEY, AL-MALIK AL-AṢḤRAF ABU 'L-NAṢR SAIF AL-DIN AL-MAḤMUDĪ AL-ZĀHIRĪ, Sultān of Egypt and Syria (873—902 = 1468—95) was purchased by Barsbey [q. v.], manumitted by Sultān Djaḳmaḳ, became a life-guard, then *Dawādār Ṣaḡhīr* i. e. writer in the office of the Grand *Dawādār* (see *DAWĀTDĀR*, i. 931), then Emir of

10 Mamlūks under Ināl [q. v.], *Ṭablaḳḥāna* (i. e. Emir with the right to have a band accompanying him), under Sultān *Khoshḳadam* [q. v.], inspector of houses of refreshment and shortly afterwards commander of a thousand (*Muḳaddam Alf*). In 872 (1467/8) he became *Rā's nawbat al-Nuwawāb* (chief leader of the companies, i. e. Commander of the Mamlūks).

When Temirboghā ascended the throne in Djumādā I, 872 (Dec. 1467), he appointed his friend Kā'itbey Atābek but the Sultān had no real power, as he had very few supporters among the Mamlūks at his command. He had not the money to win over new followers; the treasury was empty. After an unsuccessful rising by the Ustādār Khā'irbey the crown was offered in the month of Rajab of the same year (Feb. 1468) to Kā'itbey, who accepted it after some hesitation. Temirboghā retired into private life to Damietta, to which he was not taken as a prisoner but travelled in perfect liberty accompanied by some friends. Unlike other Mamlūk Sultāns, Kā'itbey treated deposed Sultāns or descendants of former Sultāns throughout his reign with magnanimity and honour, frequently invited them to polo tournaments in Cairo, allowed them to make the pilgrimage to Mecca and even allowed them to visit the capital in his absence without any suspicion or fear of conspiracies.

Kā'itbey's chief political problem was his relations with the Ottomans. The rivalry between them and the Egyptians found expression in the fighting among their vassals in Asia Minor. The ruler of Albistān [q. v.], *Shāh Suwār* (cf. *DHU 'L-ḲADR*, i. 960a) was at war with Egypt (cf. *KHOSHḲADAM*) and was secretly supported by the Ottomans, while Kā'itbey assisted prince Aḥmad of Ḳaramān in his war with Muḥammad II. The first two expeditions sent against *Shāh Suwār* (872 and 873) ended disastrously through the carelessness of the Egyptian commanders and more especially the lack of discipline among their troops and the rivalry between the Egyptian and Syrian corps. Kā'itbey later succeeded in depriving *Shāh Suwār* of the help of the Ottoman Sultān by agreeing to drop the assistance he had himself been giving Aḥmad of Ḳaramān. Thus weakened, *Shāh Suwār* was decisively defeated in 876 (1471) by the Atābek Ezbek. *Shāh Suwār* fell back to Zamanṭū. Besieged there he capitulated on condition that he was allowed to remain in possession of his kingdom as vassal of the Sultān; but he was taken prisoner, brought to Cairo and executed contrary to the laws of war. The prince of the White Sheep, Uzun Ḥasan, the ruler of Diyār Bakr and a part of Persia, was a dangerous rival to Kā'itbey, and advanced from triumph to triumph; in 872 he defeated the Sultān of the Black Sheep and in 873 the Sultān of Samarkand, but when in 876 (1471) he declared war on Muḥammad II he was defeated and thus became less dangerous for Kā'itbey. He died in 880 (1475) and was succeeded by Ya'qūb Bey. A quarrel arose between Bayinder, the latter's governor in al-Ruhā (Edessa), and the Sultān's general Yeshbek, because Bayinder had given shelter to Saif, the rebel chief of the Beduins of Ḥamā. Yeshbek advanced on al-Ruhā and, although satisfaction was offered in every respect, he insisted on besieging the town, but was defeated during a sortie and killed with several of his staff; other Egyptian notables were taken prisoner. Kā'itbey could not

wipe out this defeat and had to make peace, as he was threatened with a struggle with the new Ottoman Sulṭān Bāyazīd [q. v., i. 684]. Apart from continual friction regarding the ownership of Albistān, Bāyazīd felt himself threatened, because Kā'itbey had given a friendly welcome to his brother Djem [q. v., i. 1034 sq.], the pretender to the throne and had even encouraged him to fight against Bāyazīd. An embassy sent to Dāyazīd to endeavour to maintain peace was unsuccessful. The Ottomans invaded the southern part of Asia Minor in 891 (1486) and occupied Tarsūs and Adana; other Ottoman troops besieged Malatya. The Egyptian forces operated with success against both armies especially as Kā'itbey had won over 'Alā' al-Dawla, prince of Albistān. In 893 (1488) the Ottomans were no more successful. An endeavour to land a considerable body of troops in the bay of Iskanderūn [q. v.] failed. In 895 (1489/90) the Atābek Ezbek inflicted a decisive defeat on the Turks at Caesarea in Asia Minor, where several generals were captured. Kā'itbey showed a wise moderation in retaining his inclination for peace, recognizing the enormous resources of the Ottomans and peace was concluded in 896 (1491). The rest of the reign of Kā'itbey was peaceful but the domestic situation did not improve. It is true that he succeeded by his authority alone in preventing a fight between the hostile Mamlūk factions, but he could not permanently restrain their outbursts and he did not succeed in introducing a sound financial system.

Kā'itbey was by far the most important ruler of the Burdjī dynasty (see i. 796). He once more raised the prestige of the Mamlūk empire to a great height abroad, so that he could with good reason consider himself the first prince of Islām. For his campaigns and his buildings he required considerable means, which he could only raise by extortion, in the total absence of a regulated system of taxation. This is made a severe reproach against him by the chroniclers. In the modern view it is an obvious duty of a country to provide the necessary means for its army. It was just this lack of organised taxation that brought about the ruin of the Mamlūk empire. The Sulṭān was left to provide funds for himself by force. He either extorted them (if necessary by torture) from the high officials of the treasury, who had enriched themselves by dishonest means or "visited" the great shaiḫs of the provinces and received gifts — presumably not always voluntary — from them (on one tour alone he raked in 200,000 dinārs). He also levied contributions (e. g. to the amount of the five-monthly rental) from the real estate belonging to the pious foundations or from private individuals and forced the reservists, the Awlād al-Nās [on them cf. the article IBN IYĀS], to pay large sums in order not to be sent to the front. When the expedition planned did not take place, he gave back the money to the general amazement. He taxed Jews and Christians correspondingly. He also levied a very burdensome tax on the sale of corn. His expenses were on a corresponding scale. In the years 872—894 A. H. he expended over 7,000,000 dinārs (70 million francs) in paying the army, a large sum for these days. His buildings as well as the renovation of older buildings required large sums. The mosque at his tomb before the gates of Cairo, the Khānḳāh (monastery) in the village of this name near the

capital, the building of the castle at Aleppo, work on the mosque in Medina which was destroyed in 881 (1475/6) by a fire caused by lightning are celebrated. Although he was nearly 60 years old when he ascended the throne, he spent the earlier years of his reign in an almost feverish state of activity. Not only did he, contrary to the previous custom, daily leave the citadel for riding and excursions but he travelled round unceasingly and made the pilgrimage to Mecca and great tours of inspection to Aleppo and beyond to the Euphrates. He was able to keep his Mamlūks in control and the always rebellious Beduins in the Delta as well as the Arab tribes in Nābulus and Ḥamā. The period of his reign seemed an ideal one to the historians in contrast to those of his successors. He was of unusual, almost sadistic cruelty. He loved to be present at whippings and tortures, sometimes taking part in person; he was exceedingly strict to his son and once, as a punishment, made him live in the Mamlūk barracks and perform the most menial duties. He had only one legal wife; of his slaves the best known is Āsil Bāi, the mother of his son Muḥammad al-Naṣir (cf. her biography in my article in *Ztschr. des Deutsch. Pal. Vereins* 1905, p. 191).

AL-KAIYĀL, AḤMAD AL-KAIYĀL AL-KHAṢIBĪ, a philosopher of the third century A. H., with Isma'īli and gnostic tendencies; al-Shahrasṭānī knew of works by him in Arabic and Persian; the fragments which he gives are to be compared with *Rasā'il Iḡḡwān al-Safā* — cf. *Shahrasṭānī, Milāl*, Cairo 1317, ii. 17—18.

(L. MASSIGNON)

KĀIYIM (A.), originally: "he who stands upright", then (with *bī*, *'alā*, *lī* or the genitive alone): he who takes something upon himself, takes care of something or someone and hence also has authority over them. Thus we find the pre-Islāmic poet al-Ḳuṭāmī (*Diwān*, ed. Barth, Leiden 1902, No. 26) already speaking of a "ḡaiyim of water", i. e. apparently the man in charge of it, the supervisor, and the poet Bā'ith b. Ṣuraim (*Ḥamāsa* of Abū Tammām, ed. Freytag, p. 269, verse 2) speaks of the ḡaiyim of a woman i. e. he who provides for her, her husband. The first mentioned meaning, (supervisor etc.), is then found in all possible applications, administrator of a pious foundation, of baths, superintendent of a temple, caretaker of a saint's grave, etc.; indeed, in al-Bukhārī, *Ṣaḡīḡ*, *Da'awāt*, Bāb 10 (ed. Krehl-Juynboll, iv. 189, 6), in Muḥammad's night-prayer, the expression is even applied to God as the director of heaven and earth, and this application seems also to be present in 'Omar b. Abī Rabī'a, ed. P. Schwarz, No. 91, 11, where the poet swears by the "religion of the Kāiyim". Here, of course, it is most probably a question of an inversion (perhaps caused by the metre) of the Ḳorānic expression *al-Dīn 'l-kāyimu* (see below) on the model of *Bairu 'l-Muḡaddasi*. (Cf. Wright, *Grammar*³ ii.

§ 95 sq. and al-Kaṣṭallānī on Bukhārī, *Ṣawm*, bāb 67 end).

The meaning "provider, husband" of a woman is frequently found in the eschatological traditions, in which it is said that with the approach of the last day the number of women will increase in proportion to men, so much that there will only be one ka'iym for every 50 women.

The adjectival meaning "commanding" (a branch of knowledge) perhaps arises out of the same sphere of conceptions as "provider", "master"; it is found in a biographical notice of a scholar in Yāqūt, *Mu'djam*, ed. Wüstenfeld, ii. 225, 18. On the other hand, ka'iym, also an adjective meaning "correct, right", repeatedly found in the Kor'an in the expression *al-Dīn 'l-ka'iymu* and similar combinations may have to be semasiologically separated from the former meaning.

Bibliography (here as in the text mainly from references given by Prof. A. Fischer, Leipzig and Prof. A. J. Wensinck, Leiden): Ka'iym = administrator: al-Bukhārī, *al-Ṣaḥīḥ Waṣāyā*, Bāb 32 (ed. Wüstenfeld, ii. 125, 2 from below; = husband: al-Bukhārī, *op. cit.*, *Nikāḥ*, Bāb 110 (ed. Kr.-J. iii. 453, 7 from below) and *passim*; 'Omar b. Abī Rabi'a, *op. cit.*, poem N^o. 269, 3; = correct, orthodox: Sūra ix. 36 and *passim*; xcvi. 4 and thereon al-Kaṣṭallānī's note on the quotation of this passage from the Kor'an in al-Bukhārī, *op. cit.*, *Imān*, Bāb 34 (Kr.-J., i. 19, 16). (A. SCHAADE)

AL-KA'IYŪM (A.), one of the "beautiful names" of Allāh (see i. 303), according to some theologians the greatest name of Allāh (see *Taḏj al-Arūs*, ix. 36, 7 from below — ult. The word is of Jewish origin and means like its prototype, the Hebrew קַיִם, or the Aramaic ܩܝܡ (cf.

Hirschfeld, *New Researches into the Composition and Exegesis of the Quran*, London 1902, p. 69, 12 and note 89; Brünnow-Fischer, *Arabische Chrestomathie*, Berlin 1913, glossary under *ḥwīm*) "the eternal". Muḥammad, who uses it three times in the Kor'an (ii. 256; iii. 1 and xx. 110) may have picked it up from the Jews of Medina (the attribution of the whole of Sūra xx. as "Meccan" would then have to be revised). When late (post-Kor'anic) texts e. g. al-Bukhārī, *al-Ṣaḥīḥ*, *Tawhīd*, Bāb 24 (ed. Krehl-Juynboll, iv. 466, 12; Muḥammad's night-prayer) have the variant *ka'iām*, the *ā* in the last syllable is probably only to be regarded as another reproduction of the Hebrew *kāmes*. The other meanings which Arab exegesis has given the word may be due to ignorance of its foreign origin (cf. *Taḏj al-Arūs*, l. c.; al-Ṭabarī, *Djāmi' al-Bayān*, Bulāḥ 1324, iii. 5 on Sūra ii. 256).

AL-KA'KĀ' B. 'AMR B. MĀLIK AL-TAMIMĪ, an Arab general. When Saḍjāh bint al-Ḥārith gave herself out to be a prophetess after the death of

Muḥammad, al-Ka'kā' joined her and is said to have fought on her side. But in the period following he always retained his Muslim views, and as a subordinate of the famous Khālīd b. al-Walīd [q. v.] he played a very prominent part in the earliest wars of Islām. As early as the year 11 (632) he is reported to have fought faithfully on the side of Khālīd in the battle of Buzāḥka [q. v.] and after the capture of al-Hīra [q. v.] in Rabi' 1, 12 (May/June 633) there was an encounter between the Muslims under al-Ka'kā' and the Persians at al-Ḥasid in the vicinity of al-Anbār [q. v.] in which the latter were defeated. The exact date cannot be ascertained; according to one statement the fight was in the year 12; by others it is put in Khālīd's campaign in Syria. In Radjab 14 (Aug.—Sept. 635) al-Ka'kā' took part in the conquest of Damascus and in the following year he commanded a squadron in the battle of the Yarmūk, which also ended in the victory of the Muslims. Special mention is made of the way in which he distinguished himself in the desperate battle of al-Kādisiyya [q. v.] in 16 (637); Sa'd b. Abī Waqqās was in command here, but the success is ascribed to the timely intervention of al-Ka'kā'. He is again mentioned among the valiant heroes who took part in the capture of al-Madā'in in the same year, when countless booty fell into the hands of the Muslims. According to some accounts he commanded the vanguard in the battle of Djalulā [q. v.] at the end of the same year and organised a garrison in Hulwān [q. v.]. He also shared in the capture of Nihāwand in 21 (641/642) and before the battle of the Camel (36 = 656) he was sent by 'Alī to al-Baṣra to negotiate with Ṭalḥa and al-Zubair. He afterwards settled in al-Kūfa. Al-Ka'kā', who is one of the favourite heroic figures in Arab legend, was also famed as a poet and celebrated his warlike deeds in several poems.

KIAKHTA, in older spelling KAKHTA, sometimes AL-KAKHTĀ, the name of a place on the Kīakhta-Šu, a tributary of the Euphrates, about 40 miles S. E. of Malatya, the residence of a kaimmakam and chief town in a qazā (circle) of the same name, which comprises the three *nāḥiyas* (communities) of Gerger, Şhiro and Merdis, with a population of about 46,000 (according to Cuinet mainly Kurds; with them over 4000 Armenians) and belongs to the *liwā* (administrative district) of Malatya in the province of Ma'mūrat al-'Aziz (Khārpūt). The modern Kīakhta which numbers only a few hundred huts with about 1000 inhabitants, almost exclusively Kurds, was famed in the middle ages for its exceedingly strong castle which, built on a steep eminence, guarded the eastern road from Sumeisāt to Malatya and was one of the frontier strongholds (*Thuḡūr*) of the

Muslim lands, and has again achieved fame in modern times through the discovery on the neighbouring Nemrūd-Dagh of monuments of Antiochus I of Commagene of the first century B. C. We first meet with the name in the Oriental historians of the Crusades; in Bar-Hebraeus and Michael Syrus it is written *Gakhta*; the ancient and the Byzantine name are not known; but the bridge built in the reign of Septimius Severus about 200 A. D. over the Bōlām-Şu at Kiakhta and the remains of Byzantine buildings on the fortress show that the place was an important frontier station, even in antiquity and at the beginning of the middle ages. The hypothesis of Ainsworth that Kiakhta represents the ancient Claudias, the *Ḳalawdhīya* of the Arabs, is untenable (see the article *ḲALAWDHĪYA*).

As a result of the battle of Manzikert (Melāzgird) on Aug. 19, 1071, these frontier districts were definitely lost to the Byzantine empire and became a shuttlecock between the Dānīshmandoghlu of Malatya, the Saldjūks of Rūm and the Ortokids of Khārpūt, who disputed the ownership of Kiakhta with one another and the Crusaders, who ruled in Urfa (Edessa) and Mar'ash. At the same time Armenians, who by the second half of the eleventh century had migrated into these regions in considerable bodies, had made themselves independent in various strong places like Malatya, Hişn Mansūr, Gerger and Kiakhta (Michael Syrus, ed. Chabot, iii. 158 sqq., 198 and 205 sq.) and kept ground against the neighbouring Muslim rulers. To this period belongs an inscription of the citadel of Kiakhta of the year 525 (1130/31) in which a certain Malik al-Manşūr is mentioned as restorer of the defences (O. Hamdy Bey, *Le Tumulus de Nemroud Dagh*, p. 2 sqq.).

After Baldwin, Count of Mar'ash, and his successor Renaud had fallen in quick succession in battle with Nūr al-Dīn, the warlike Jocelin of Edessa seized their lands, which included Gerger and Kiakhta; when he was captured in May 1150 by Nūr al-Dīn, Kiakhta and the neighbouring strongholds like Gerger, Hişn Mansūr, etc., fell into the hands of Ḳarā Arslān of Khārpūt; Krikor, the last Armenian ruler of Kiakhta, was granted another district by the victor (Michael Syrus, iii. 294 sq., Chalaudon, *Les Comnènes*, ii. 421, 423). Thus ended Christian rule in these regions.

On October 25, 1177, Sulţān Kīlīdj Arslān conquered Malatya and drove out the last Dānīshmandoghlu, who fled to Khārpūt (Michael Syrus, iii. 273) but the border strongholds like Hişn Mansūr, Kiakhta and others seem not to have been as yet occupied by the Saldjūks.

In the year 623 (1226) war broke out between 'Alā' al-Dīn Kaikobād (see KAİKOBĀD I) and Mas'ūd, the Urtukid of Āmid and Mārdīn; after Mas'ūd and his allies had suffered a severe defeat at Kiakhta in Shawwāl of this year, this stronghold, which had hitherto been under Mas'ūd's control, passed into the hands of the victor (Ibn al-Athīr, ed. Tornberg, xii. 300; Abu 'l-Fidā', *Tārīkh*, Constantinople, iii. 144; Houtsma, *Recueil*, etc. iii. 280, iv. 118 sqq.) and remained in possession of the Saldjūks of Rūm, also when they had already become vassals of the İlkhāns. During the rising of Baba Rasūl Allāh (638 = 1240—1241), Kiakhta and the surrounding country were plundered by the followers of this madman (Bar Hebraeus, *Keṭābā de Maḳt'ebanūt Zaḡnē*, ed. Bedjan,

p. 473; *Chronik*, ed. Bruns and Kirsch, ii. 517 = *Tārīkh Mukhtaşar al-Duwal*, ed. Şāḫānī, Bairūt 1890, p. 439) after having been devastated a few years earlier by the Khwārizmīs driven out of Rūm (Bar Hebraeus, *Tārīkh*, etc., p. 437 sq.); afterwards, under Kaikā'us II, it was used from time to time as a place of banishment (Houtsma, *Recueil*, etc. iv. 259, 262) and it is also mentioned in other connections (Bar-Hebraeus, *op. cit.*, p. 499, 14 = *Tārīkh* etc., p. 467 sq., anno 1257). Munadjjimbashī, *Tārīkh* iii. 271, reports that the last 'Alā' al-Dīn of Ḳonya granted a fief in Pighī-Eli near Kiakhta to a son of 'Othmān and grandson of Ertoghrlu; and Eretna, who had made himself independent as governor for the İlkhāns in Asia Minor (728—753 = 1328—1352) ruled also in the domain of Malatya; on Eretna see M. von Berchem and Halil Edhem, *Matériaux pour un Corpus Inscr. Arabicarum*, Cairo 1910, p. 41 sqq.). In the campaigns of the Egyptian Mamlūk Sulţāns against the Mongols, Kiakhta is repeatedly mentioned (al-Maḳrīzī, *al-Sulūk li Ma'rīfat Duwal al-Mulūk*, French transl. by Quatremère entitled *Hist. des Sultans Mamelouks*, ii./i., p. 61) and in 682 (1283/1284) Ḳarā Şonkor, the Egyptian governor of Ḥalab, occupied the town, which he again fortified strongly (al-Maḳrīzī, *op. cit.*; Abu 'l-Fidā', *Tārīkh*, iv. 18) and it is therefore expressly mentioned in the treaty of 1 Rabi' II, 684 with Leon, king of Little Armenia, as the territory of Sulţān Ḳalā'un (al-Maḳrīzī, *op. cit.*; ii./i. p. 168). Kiakhta seems, however, to have been temporarily lost again with other places; in connection with the Egyptian campaign against the Mongols in 715 (1315—16), in the course of which the Mamlūks conquered and destroyed Malatya, it is reported that the people of Ḳal'at al-Rūm, Behesnā, Kiakhta and Gerger used to make raids into Muslim territory (Abu 'l-Fidā', *op. cit.*, iv. 77). Later this area must have been under the rule of the Dhu 'l-Ḳadrioghlu of Mar'ash, the vassals of the Mamlūk Sulţāns, down to the first Ottoman conquest. When Bāyazid I, in 801 (1398/98, according to Egyptian sources (see Weil, *Gesch. der Chalifen*, v. 70 and 74; Neshrī in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xv. 352: 800 A. H.; the old Ottoman Chroniclers in Leunclavius, *Histor. Musulm.*, col. 337, 24 sqq., 338, 17 sqq.; do. ed. Giese, p. 34 sq., and 'Ashīk Pasha Zāde, *Tārīkh*, p. 74: 798 A. H.) opened hostilities against Egypt, he first of all occupied the region of Malatya and drove out the Turkomans, i. e. the Dhu 'l-Ḳadrioghlu, who had hitherto ruled there; on his campaign against Syria in the early months of the year 803 (1400/1401), Timūr conquered Malatya and the whole district as far as Kiakhta, drove out Bāyazid's garrisons and installed the "Turkoman" Ḳarā 'Othmān (Sharaf al-Dīn 'Alī Yezdī, *Zafarnāma*, Calcutta, ii. 271 sqq., 278; Weil, *op. cit.*, v. 82). After Timūr's withdrawal, the Mamlūk Sulţāns again entered this territory which they held till the destruction of their power by Selim I. It is specially mentioned that Kiakhta was captured by them in 820 (1417/1418; al-Maḳrīzī, *op. cit.*, ii./i. 61 note; Weil, p. 139); lastly we read in Ibn Iyās, *Badā'ī al-Zuhūr*, Cairo 1311, ii. 141, that Uzun Ḥasan seized this stronghold in 877 (1472/1473). In the report of his victory (*fathnāme*) from Ḥalab (end of Radjab 922) Selim I expressly mentions the capture of Gerger and Kiakhta. Under Ottoman rule it

had no longer the importance as a frontier fortress that it had in the middle ages, when it is specially mentioned as such by Abu 'l-Fidā' (*Takwīm*, ed. Reinaud, p. 262 sq.) and al-Dimashqī (ed. Mehren, p. 206). Djalālzāde (middle of the xvth century) had given it a section to itself in his description of the Ottoman empire for the district of Gerger and Kiakhta (von Hammer, *Des Osm. Reiches Staatsverf.*, ii. 449); in Ewliya also (*Siyāhet-nāma*, iv. 22) it is occasionally mentioned, but the great geographical works of the xvith century, the *Manāzir al-'Awālim* of Muḥammad 'Ashīk (f. 176r of the Vienna MS.) and the *Djihānnūma* of Kīatib Čelebi (Constantinople 1145, p. 600 sq.) only know Kiakhta from Abu 'l-Fidā', whose statements they translate word for word; among the Anatolian Kaḡā's Kiakhta was placed in the outposts of the seventh stage (v. Hammer, *Gesch. d. Osm. Reiches*, ix. 8, N^o. 470). In the course of the last three centuries, these remote and inaccessible districts have been settled by Kurds; Kīatib Čelebi, *op. cit.*, describes them as a useless, rebellious horde of highway robbers; they obeyed only their own chiefs (*bey beyleri*) and during the last century it required repeated military expeditions to restore the authority of the Porte in the region inhabited by them. In these fightings the fortress of Kiakhta also played a part, as a Kurdish Bey with his followers had entrenched himself in it; it was stormed in 1838 by Turkish troops and from this incident became known in Europe through reports of Ainsworth and v. Moltke (cf. C. Ritter, *Erkunde*, x. 870, 874, 883 sq.). An archaeological excavation of the fortress has yet to be made; there is a brief description in Ḥamdī Bey's work on the Turkish expedition of 1883; he paid special attention to the Muslim inscriptions (still unpublished); his statements are supplemented in details by the *Sālnāma* of Khārpūt. The great iron gate, which is mentioned as early as the Saldjūk conquest in 1226, was brought along with the gate of the fortress of Gerger in 1882 to Diyār Bakr.

(Paris 1912), passim; J. Laurent, *Byzance et les Turcs Seldjoudides dans l'Asie Occidentale jusqu'en 1081* (Paris-Nancy 1913), passim. (J. H. MORDTMANN)
2. A town in Transbaikalia, 30° 19' N. Lat., 106° 40' E. Long., 2550 feet above sea level. Kiakhta is separated from Maimačin (Dai Oergö) by a neutral zone of about 50 yards broad and connected with Troiskosawsk by the only high road in the district, about 3½ versts long. Lying on the Kiakhta brook (Mong. Kāktugorekhon) and surrounded by mountains (Burgultei = Eagle mountain) Kiakhta arose out of a Russian frontier post south of the Kiakhta brook on the Roro, a stream that forms the frontier, through the fact that here on Aug. 10, 1727 the treaty of Kiakhta was signed. The Chinese opened this

point for trade between Russia and China and founded here Maimačin (trade-frontier) and the Russians the frontier post of Kiakhta. Henceforth Kiakhta has been the corridor for the exploration and penetration of Mongolia and China, for science, politics, trade (tea-trade) and commerce. Fortified with palisades, it has formed down to the present day a little republic of merchants with its own taxes (tax on tea), customs, its own administration, council of elders, fire-brigade and church. In addition to houses of stone there are still also wooden buildings in Kiakhta and great business-houses with large yards for caravans, but no shops; besides the Russian wholesale business there is the detail trade among the Mongols and Chinese. Since 1727 the famous December fair has been held annually in Kiakhta. Kiakhta is the main depot and clearing house for the so-called caravan tea. At one time rhubarb was smuggled into Russia. Now gold is smuggled into China. As a result of the treaty of Peking 1898 and the opening of the great Siberian railway the import of tea, silk and cotton goods has considerably decreased; the export of cloths, furs and leather is rather busier. There is a steppe post and telegraph to Peking via Urga.

KĀKŌYIDS, a dynasty, which reigned from 398 (1007) to 443 (1051) over the provinces of Iṣfahān and Hamadhān. It descends from Dushmanziyār Rustam b. al-Marzubān, a native of Dailam, who held the fief of Shahriyār and received the title of *ispahbadh* from the Būyid Maḡd al-Dawla (cf. Ibn Isfandiyyār, *Hist. of Ṭabaristān*, transl. Browne, p. 228, 230, 231, 239; Zāhīr al-Dīn, *Ta'rikh-i Ṭabaristān*, ed. Dorn, p. 195, 209; Mīrkhond, *Rawḡat al-Safā*, iv. 26).

Kākōye in the dialect of Dailam is the hypo-

coristic diminutive of *Kākū* "maternal uncle" (cf. J. de Morgan, *Mission scientifique en Perse*, v. 216, No. 363; Riḍā Kulī Khān, *Farhang-i Naṣirī*, s. v.). The surname Ibn Kākōye had been given to the founder of the dynasty, because he was the son of the maternal uncle of Maǧīd al-Dawla by the mother of the latter, sister of Dushmanziyār (Ibn al-Athīr, ix. 338, better explanation than p. 146), his patron.

In place of Dushmanziyār, the coins have the name Dushmanzār (cf. F. Justi, *Iranisches Namenbuch*, p. 88; genealogical table, p. 445). The dynasty consisted of five members:

1. 'ALĀ' AL-DAWLA ABŪ DJĀ'FAR MUḤAMMAD N. DUSHMANZIYĀR, surnamed *Ibn Kākōye*, who was the first to declare himself independent, soon after 398 (1007); he was cousin of the wife of the Būyid Fakhr al-Dawla [q. v.], mother of Maǧīd al-Dawla, who had him appointed governor of Iṣfahān; he seized Hamadhān (414 = 1023), Rai (419 = 1028) and Iṣfahān (421 = 1030); continual wars with the Kurds, with the *ispahbadh* of Ṭabaristān and with the Ghuzz prevented him from peacefully enjoying the possession of these places. In 420 (1029) he declared himself a vassal of Sulṭān Maḥmūd of Ghazna; in 424 (1033) he was confirmed in the government of Iṣfahān by Sulṭān Mas'ūd, who had succeeded his father; in 425 (1034) he rebelled, was twice defeated, lost Iṣfahān, tried to retake it two years later and ultimately succeeded after some time. The philosopher and physician Ibn Sīnā [q. v.] filled the ministerial office at his court, after having been dismissed from the service of the Būyid Tādī al-Dawla (Ibn Khallikān, ed. Wüstenfeld, No. 189; transl. de Slane, i. 442); he was still minister at his death in 428 (1037). 'Alā' al-Dawla died in 433 (1041), after having built a wall round his capital in 429 (1037).

2. ZAHĪR AL-DĪN ABŪ MANŠŪR FARĀMARZ, his eldest son, succeeded him at Iṣfahān; he fought against his brother Abū Ḥarb, who had appealed for assistance to the Ghuzz Saldjūks, settled in Rai; the latter was defeated. Having sought refuge with the Būyid Abū Kālīdjār b. Sulṭān al-Dawla [q. v.] he induced the latter to undertake the siege of Iṣfahān; the quarrel was terminated by a peace between the two brothers, which lasted till 435 (1044). Zahīr then seized the two fortresses of Kirmān belonging to Abū Kālīdjār, who in order to get them back, took Abarkūh and defeated the Iṣfahān army. Besieged in his capital by Toḡhrul Beg in 438 (1047) he was left in possession of his fief in consideration of paying homage till 443 (1051) when the Saldjūks finally obtained Iṣfahān after a long siege; he made it his capital and had the walls destroyed, saying that only a weak prince has need of walls to protect him. Abū Manšūr received as fiefs the two cantons of Yazd and Abarkūh. He accompanied Toḡhrul-Beg when the latter went to Baghdād to marry the daughter of the Caliph al-Ḳā'im in 455 (1063).

3. ABŪ KĀLĪDJĀR GERSHĀSP, brother of the preceding, was reigning at Hamadhān when this town was besieged by the Ghuzz in 420 (1029). He made peace with their chief Gök-Tāsh and married his daughter; but the Ghuzz began their attacks again after the capture of Rai and forced him to take refuge in the fortress of Kinkawar. These Turks entered Hamadhān in 430 (1038);

having succeeded in drawing Abū Kālīdjār after them, they attacked him but he escaped. It was immediately after this that his father 'Alā' al-Dawla surprised and defeated them. On the latter's death Gershāsp made Nihāwand his residence. Farāmarz having recaptured Hamadhān gave it as fief to his brother on condition that he had the *khutba* pronounced in his name. In 434 (1042) Toḡhrul-Beg seized this town and demanded that Gershāsp should hand over Kinkawar, which its defenders refused to do. In 436 (1044) Gershāsp regained Hamadhān and declared himself a vassal of the Būyid Abū Kālīdjār; next year Toḡhrul sent his brother Yannāl to reoccupy this town, from which the prince had fled and taken refuge among the Djawzakān Kurds. Yannāl in 439 (1047) took Kinkawar, which was commanded by a lieutenant of Gershāsp's, Oḳbar b. Fāris, who, to obtain the best conditions of surrender, pretended that he still had considerable supplies. After the loss of his possessions, Gershāsp took refuge with the Būyid Abū Kālīdjār. In 441 (1049) he was in Iṣfahān and received favourably the overtures of Mawdūd the Ghaznawid who was seeking help against the Saldjūks, but he lost many soldiers in the desert and fell ill, which forced him to return. He died at al-Ahwāz in 443 (1051).

4. 'ALĪ, son of FARĀMARZ, married Arslān Khātūn, daughter of the Saldjūk Dā'ūd, aunt of Sulṭān Malik-Shāh, in 469 (1076). Having sought refuge in Kirmān he was given the fief of Yazd (*Rec. de Textes rel. à l'hist. des Seldjoudes*, i. 26). He was killed in 488 (1095) fighting by the side of Tutush (Ibn al-Athīr, x. 312).

5. 'ALĀ' AL-DAWLA ABŪ KĀLĪDJĀR GERSHĀSP, son of 'Alī; as prince of Yazd, he was in the service of the Saldjūks; he had married the sister of Sulṭān Muḥammad and of Sandjār; dispossessed of his fief, which was given to the cupbearer Qaradjā by Sulṭān Maḥmūd, he put himself under Sandjār's protection and was present at the battle in which the latter defeated his nephew (513 = 1119). He had escaped from the fortress of Farazān, in which Maḥmūd had had him interned (*Rec. de textes rel. à l'hist. des Seldjoudes*, ii. 133).

KĀLĀ (PL. KĀLĀ, KULĀ) in Arabic the name for a fortress or stronghold built on a hill or small elevation. In Turkish it also means the interior of a city in contrast to the outer suburbs (cf. Zenker, *Türk-arab.-pers. Handwörterbuch*, p. 707^a). The word which looks good Arabic and is fairly generally regarded as a genuine Arabic word may be a loanword from Iranian. Fränkel first raised doubts as to its genuineness in *Die Aram. Fremdwörter im Arabischen* (Leiden 1886), p. 237, because it cannot be derived from any Arabic root. Quite recently A. Siddiqi, *Studien über die pers. Fremdwörter im klass. Arabisch*

(Göttingen 1919), p. 70 sq. has championed the Persian origin of the word. The original is considered to be the Persian *kālāt* (a fort or village on a hill), (see Vullers, *Lex. Pers.-Lat.*, ii. 859). This *kālāt*, strictly an appellative, appears at various places on Irānian soil, especially in Afghānistān and Fārs, as a local place-name also (Kelāt, Kilāt); cf. G. Le Strange, *The Lands of the Eastern Caliphate* (Cambridge 1905), p. 269 sq., 332, 395. The form *kālāt* is of recent origin and has arisen through the addition of an inorganic *t* to the older *kālā*; cf. Andreas in the *Mitt. d. Vorderasiat. Gesellsch.* (Berlin), ii. (1897), 85 sq. and Pauly-Wissowa, *Realencycl. der klass. Altertumswiss.*, i. 1176. *Kālā* (also *kulā*) has survived for example in place names in Māzandarān; for references see Melgunof, *Das südl. Ufer des Kaspischen Meeres* (Leipzig 1868), p. 303 sq. The old Irānian form of the word must, however, have been **kalak*; this is shown by the Armenian *khalakh* (town), which is certainly of Irānian origin, not perhaps an Aramaic loan word (from Aram. *karkhā*), which P. de Lagarde, *Armen. Studien* (Göttingen 1877), No. 2357 and Hübschmann in the *Zeitschr. d. Dtsch. Morgenl. Gesellsch.*, xlvii. 252 wished to make it. **Kalak* would regularly become *Kālā* (Andreas, *op. cit.*). It is still uncertain why the Arabs added an *ain* at the end of the word. The word certainly was borrowed very early; the prototype yielded was perhaps not *kalā*, but still the oldest form **kalak*, the final *k* of which first of all becoming *ḳ* might be weakened in pronunciation to *ain*. [It is also possible that the Arabs took Persian *l* as a so-called emphatic *lām*, cf. *al-ʿaskar* from *lash-kār*. Ed.] In the Arabic linguistic area there are a fairly large number of place names, which have *kalʿa* as their first member; cf. AL-KALʿA, KALʿAT; Yāqūt, *Mushtarik* (ed. Wüstenfeld), p. 357; al-Balādhuri, *Futūḥ al-Buldān* (ed. de Goeje), p. 533 (Index); Ibn al-Aṭhīr, *al-Kāmil* (ed. Tornberg), xiii. 786—9 (Register); Vullers, *op. cit.*, ii. 735. (M. STRECK)

AL-KALʿA. See ALCALA, KALʿAT BANĪ ʿAB-BĀS etc.

KALAH (also KALĀH, KALĀ, KILĀ and KILLĀH), according to the mediaeval Arab geographers the name of an island or peninsula, which played an important part as an intermediary in the trade and navigation between Arabia, India and China. It was particularly noted for its tin-mines; it is at the same time described as a centre of trade in camphor, bamboo, aloes, ivory, etc. Its capital was likewise called Kalah; cf. e. g. al-Dimashqī, p. 152, ii. 170, 1; al-Nuwairi (in A. v. d. Lith, *op. cit.*, see below, *Bibl.*), p. 281; the sea washing this region, described as difficult to navigate, was called the "sea of Kalah" after it; see al-Masʿūdī, i. 370, 10, 340, 1; al-Dimashqī; p. 152, ii. 169, 20. The identification of the situation of this territory is of importance for the history of Indo-Arabian trade. According to the statements given by the merchant Sulaimān (his journal was edited in 237=851) and Yāqūt, a location in Further India is alone possible. The islands and peninsulas of Further India have been especially famous for centuries as producers of tin; cf. thereon Ritter, *Erdkunde*, v. 23, 24, 28, 30, 77—80, 438—439. As it is expressly stated of Kalah (e. g. by Abū Zaid al-Sirāfi; see below, *Bibl.*) that it — at least for a time — was under the rule of the king of Zābedj (= Java; see A. van der

Lith, *op. cit.*, p. 231 sq. and JAVA, ii. 574 sqq.), in identifying it, we must look in the first place to the south-western part of Further India, in the region of the Strait of Malacca. We may leave Sumatra out of this limited choice, especially as it only produces tin in small quantities and of inferior quality. The island of Bangka on the S. E. coast of Sumatra, now famous as a rich tin-producer, is to be left out of the reckoning, as the mines there have only been known since 1710 and were not worked before (cf. A. v. d. Lith, p. 263). This only leaves us the peninsula of Malacca and we would have to follow Walckenaer (in *Nouvelles Annales des Voyages*, Paris 1852, p. 19) and identify the modern town of Quedah (Queda, Kedah, Keddah) on the west coast of the peninsula in 6° N. Lat. with the Kalah of the Arab authors. The province of Quedah (on it cf. Ritter, *Erdkunde*, v. 20 sq.), watered by the river Kalang, which would appear to coincide more or less with the area of the "peninsula" of Kalah, is still distinguished in Malacca for its busy tin trade. The actual name of the chief town is Kadah (to-day pronounced Kedāh). Quedah is to be explained as simply a corruption through the Portuguese. In the Turkish *Muḥit* of Sidi ʿAlī (see i. 287), written about 1554 the form Kēdā is found; see Bittner and Tomaschek, *Die topogr. Kapitel des indischen Seespiegels Muḥit* (Vienna 1897), p. 86 and see also there the maps reconstructed by Tomaschek from the statements of the *Muḥit* and from Portuguese sources (plates xxiii. and xxiv.) Quedah is at the present day an unimportant place but in earlier centuries it was a flourishing, much visited and populous harbour; see thereon Ritter, *op. cit.*, p. 25 and A. v. d. Lith, p. 261.

The identification put forward by Walckenaer is also accepted by A. v. d. Lith, p. 259, 308, de Goeje (in *De Gids*, Amsterdam 1889, iii. 297), Tomaschek, *op. cit.*, and G. Le Strange in his translation of Hamd Allāh Mustawfī's *Nuzhat al-Kulūb*, p. 194. Quatremère, *op. cit.*, p. 734 and Yule-Burnell, *op. cit.*, p. 145 consider it probable. The latter both think that Kalah might be identical with the Kālā of Ptolemy. But the situation required for the latter town (cf. the article *Kōli* in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, xi. 1075) seems to refute this.

The equation Kadah (Quedah) = Kalah seemed to be made quite certain by the fact emphasised by Kern in A. v. d. Lith, p. 308, that Malay *d* is pronounced very like *l*; Malay *Kadah* would therefore have sounded to an Arab ear as *Kalah*. But on the other hand it should be remembered that recently G. Ferrand (see *Bibl.*) contests the plausibility of a phonetic change from *Kadah* to *Kalah*. According to his investigations, Kalah would not be Kadah at all, but is rather to be equated to Kērah, Kra (on maps) in the northeast part of Malacca (near 10° N. Lat.).

After what has been said above we are only left with the choice between Kēdah or Kērah (Kra) on Malacca for the identification of the Kalah of the Arabs. The other attempts to locate the position of Kalah — on Ceylon (harbour of Ghālī, Galle, Pointe de Galle; so Reinaud and Dulaurier), Malabar (so Renaudot; see Ouseley, *op. cit.*), Coromandel (so Gildemeister) — should now be definitely rejected as wrong.

Besides Kalah we find occasionally in the Arab geographers also Kalāh-bār, e. g. in the voyage

of the merchant Sulaimān (Reinaud, *Relation*, etc. ii. 18, 13) and in al-Mas'ūdī, i. 3, 3). Reinaud wished to separate this from Kalah entirely and connect the name with Coromandel, or rather its older Sanskrit form (which Gildemeister had already compared with Kalah). But that so far west a location for Kalāh-bār is excluded is shown by Sulaimān's reference, according to which Kalāh-bār (like Kalah, see above) was a dependency of the king of Zābedj (Java); Kalah and Kalāh-bār are probably identical as Quatremère, *op. cit.*, p. 733 sq. and A. v. d. Lith, p. 258, 253 have said. What -bār means in Kalāh-bār is quite uncertain; the explanations of Sulaimān (as = *mamlaka* = kingdom) and of al-Mas'ūdī (= sea) arouse little confidence.

Most probably it is from the district of Kalah in Malacca discussed above — whether it is Kēdah or Kērah (Kra) — that tin gets the name *kal'ī* = "the Kalā'ite" in Arabic. Like the Persian *kālū* (*Kālūt*; see the art. *ḲALĀ'*) the Arabs usually reproduced Kalah by *Ḳal'a*; hence the nomen relativum *kal'ī* (*kalā'ī*). The somewhat fanciful observation of the traveller Miṣ'ar b. Muḥalhil (in Yaḳūt, ii. 162, 6; al-Ḳazwīnī, ii. 69, 23; Schlözer, *op. cit.*, p. 18 sq. that tin is called *kal'ī* from the fort (*kal'a*) of Kalah, on which alone mines of this metal existed may be described simply as an attempt to explain the form *kal'ī* (with *ḵ*). Besides Kēdah and Kērah, Kēlang, Klang, a district in Selangor in Malacca might possibly come into consideration; cf. thereon the article *ḲALĀ'* as well as for the relationship of *kal'ī* to the Malay *kaling* = tin.

This same al-Ḳal'a, which was said to be the site of a very fine tin-mine, is usually regarded by the Arab geographers and lexicographers as the place of manufacture of a celebrated kind of Indian sword, called *kal'ī* (*kalā'ī*) to distinguish it. (Further information in article *ḲALĀ'*).

A thorough examination of the Kalah problem is given by A. v. d. Lith in the notes to his edition of the *Kitāb 'Adjā'ib al-Hind*, p. 256—64 (258: extracts from Ibn Sa'īd and al-Nuwairī), 279 (passage from the *Muḥḥaṣṣar al-'Adjā'ib*, 308; G. Ferrand in the *Journ. Asiat.*, 11th series, xii. (1918), p. 89, 109; xiii. (1919), p. 312, 438 note 2, 439 sq. and xiv. (1919), p. 214—233, also vol. 1923, p. 31. (M. STRECK)

ḲALĀ'-I SEFID. See *ḲALĒ-I-SEFID*.

ḲALĀ'-I SULTĀNIYE. See *ḲALĒ-I-SULTĀNIYE*.

KALĀM ("speech") is defined by the grammarians as such utterance (*lafz*) with the voice as is compound (*murakkab*), not single words, and which conveys a meaning by convention, not nature (*wad'*, not *ṭab'*, as in exclamations; *ḥésic* not *ḥúsic*). So the *Adjurrāmiya*; the *Mufaṣṣal* (§ 1) says it must be a complete sentence, however simple, and Ibn 'Aqīl (*Sharḥ al-Alfiya*) distinguishes in detail between it and *kalim* (a compound of three or more words, not necessarily giving a complete sense) and *kalima* (a single word with a meaning by convention) and *ḳawḥ* which covers them all. The *Dict. of the Techn. Terms* (pp. 1268—1270) gives a thoroughly scholastic discussion of *kalām* and its parts, phonetically, grammatically, lexicographically, rhetorically. See, also, De Sacy in *Anthol. Gramm.*, Arabic text, pp. 73 and 93 and notes. In lexicography *kalām* is a generic noun for speech, little or much (al-Djāwharī in *Ṣaḥāḥ* and *Lisān*, xv. 428), applying to every kind of talk, *li-kullī mā yutakallamu bihi* (Ibn 'Aqīl), or an expression for successive sounds (*aṣwāt*) giving an intelligible meaning (al-Fayyūmī, *al-Miṣbāḥ*). This is the actual usage of the root in the language. Thus *bi-kalāmī*, said by Allāh to Mūsā (Ḳur. vii. 141) is paraphrased by al-Baidāwī (ed. Fleischer, i. 343 *infra*) *bi-taklīmī iyāka*, "by my speaking to thee", and on Ḳur. xlviii. 15, al-Baidāwī says that *kalām* is an *ism* for *taklīm* (ii. 268, 10). In the remaining two occurrences, *kalām Allāh*, Ḳur. ii. 70, is ambiguous and may mean either Allāh's actual speaking to Mūsā or the Law, while in Ḳur. ix. 6, it seems to mean clearly the content of Islām. The 2nd stem of the verb is used fre-

quently in the Qur'ān in the sense "to speak to" some one with the accus. of the person addressed (al-Ash'arī *al-Ibāna*, ed. Haidarābād, p. 27, says that *taklim* means *al-mushāfaha bil-kalām*) and the 5th stem occurs four times (xi. 107, xxiv. 15, xxx. 34, lxxviii. 38) in the neuter sense "to speak, talk, discuss" with a *bi* of the subject discussed; in xxiv. 15 appears a shade of contemptuous reference, mere "talking with the mouth" (cf. Dozy, *Suppl.*, ii. 486a). In the later development *kalām* came to mean the statement of an intellectual position or an argument upholding such a statement, and a *mutakallim* was a person making use of such *kalām*'s; so *passim* in the *Fihrist*. By al-Mas'ūdī (*Murūdj*, Paris ed., viii. 161) *takallam* is used of the "patter" of a public story-teller and mimic by the roadside.

II. The first technical use of *kalām* seems to have been in the phrase *kalām Allāh*, meaning either the Qur'ān or Allāh's quality (*ṣifa*) called Speech. For these applications the way was prepared in the Qur'ān passages already quoted. But the order in which they came and the influences which produced them are still, like all the beginnings of Muslim theology, exceedingly obscure, and we are not yet in a position, in spite of Horten's collection of materials in *Die philosophischen Systeme der spekulativen Theologen im Islam* (Bonn 1912) even to sketch their development. It seems clear that the Muslim thinkers were affected (i) broadly by the conceptions, classifications and dialectic of Greek philosophy; (ii) much more minutely by personal intercourse and discussion with the theologians of the Oriental Christian Church and (iii), perhaps, by some ideas of the Indian philosophical schools. The last influence has been suggested tentatively by Horten, especially at several points in his *Systeme*; but he has not supported it by any detailed references or translations from Indian literature; it remains, therefore, a bare, although very possible suggestion; cf. further on it Massignon's review in *Der Islam*, iii. 408. The idea of representing the problem of the personality of Allāh as a combination of a *dhāt* or essence with *ṣifāt*, or "qualities", seems partly due to the methods of Greek theories of personality, partly to the Qur'ānic rhetoric which, following the fashion of the old poetry, describes Allāh by means of epithets, and partly to Christian explanations of the relation of the persons in the Trinity. The problem, however, remained of the relation between these qualities and the essence, and was eventually given up by orthodox Islām which took refuge in the statement, "they are not He (i. e. Allāh himself), nor are they other than He"; this was an admission that the relationship was a theological mystery, ungraspable by human thought. These qualities, further, were uncreated and eternal; the personality of Allāh was unthinkable without them. But rationalistic Islām, later the Mu'tazilites could not admit such a mystery and tended to reject the qualities as having necessary relationship to the essence. In these discussions the quality "Speech" was evidently prominent, and on it the influence of the Christian theologians was peculiarly felt. It is never represented by an epithet in the Qur'ān, i. e. Allāh is never a Speaker, *mutakallim* or *kalim*, although the later theologians used *mutakallim* frequently of him, and there is only one certain use of *kalām* for

the actual Speech of Allāh (Qur. vii. 141); but Allāh is represented again and again by means of verbs as "speaking", and al-Ash'arī (*al-Ibāna*, p. 23 sqq.) quotes over ten passages, using different expressions, as bases for the doctrine that both the Speech of Allāh, as a quality inherent in Him, and the Qur'ān as a manifestation of that quality are uncreated. These passages, it may be said, give distinctly the impression that the doctrine was historically reached through other means, or arose by other causes, and that these proof-texts were then sought as a Qur'ānic basis. The rationalistic theologians, on the other hand, denied the possibility of a material, yet uncreated, manifestation of the eternal quality of Speech. Thus when Allāh spoke to Mūsā (Qur. iv. 162; vii. 139 sqq.; xx. 8 sqq.; xxviii. 30) from the tree (*shaj'ara*) they held that the sound of the words was created in the tree as a *maḥall*, and was therefore a state (*ḥāl*) in it (cf. Goldziher on Fakhr al-Din al-Rāzī in *Der Islam*, iii. 245 sqq.). This the later Ash'arites met by explaining that Mūsā did not hear this Speech as an ordinary act of hearing, but spiritually and as coming from every direction and perceived by every one of his organs. It was thus received in his sensorium by the *ḥiss al-mushṭarak*, the Aristotelian "common sense" (al-Baidāwī on Qur. vii. 139, xx. 12; ed. Fleischer, i. 343, 9, 593, 1). Further, it was recognized at least as early as al-Ash'arī (*al-Ibāna*, p. 25) that this Speech must go on without ceasing, for the quality is perfect and silence would be an imperfection in it. The Qur'ān (xviii. 109; xxxi. 26) and traditions (*al-Ibāna*, p. 25) speak also in violent metaphors of the *kalimāt*, separate words of Allāh, as being numberless; from all eternity Allāh has been speaking. But al-Ash'arī protests (*op. cit.*, p. 41) against the application of the term *lafz*, verbal utterance, to the Qur'ān; that is not seemly even in the case of our recital of it. Similarly the *Lisān* (xv. 427, 17) says that you must not call the Qur'ān *ḥawṣ al-Allāh*. Al-Ash'arī does not seem himself to have reached the position of the later Ash'arites that the Speech of Allāh is thinking, at least "ideas in the mind", *kalām* or *ḥadīth nafsī*, and therefore can go on without letters or words. Al-Ash'arī's desire was only to protect the Qur'ān arbitrarily from any approximation to the transitory and created, and he had not thought out what his position meant. The numberless *kalimāt* of Allāh are still speech but not like our utterance with the mouth. In part they are His creative acts, as He creates by the single word, *kun*, "come into being!" See further under KALĪMA.

For the later orthodox theologians the proof of the *kalām* of Allāh was simplified down to an *idjmā'* [q. v.] of all peoples that Allāh has spoken to the prophets and must therefore be a speaker, possess a quality of Speech; see, e. g. al-Taftāzānī's comm. on the *ʿAḳā'id* of al-Nasafī, Cairo 1321, p. 75 sq. Its nature has been indicated above. But the relation of this quality to the *kalām Allāh* of the Qur'ān was still to be defined. The Ḥanbalites continued to avoid any closer definition as al-Ash'arī had done; it was the uncreated, eternal Speech of Allāh, and that was an end of it. Some even tried to transfer its uncreated character to the very material on which it was written. For the Mu'tazilites it was simply created, like the words which reached the ears of Mūsā. The Mā-

turidites followed their normal method in dealing with theological mysteries, of putting the two elements flatly side by side and attempting no solution. Al-Nasafi ('*Akādīd*, p. 79) says: "The Qur'ān, the Speech of Allāh, is created and it is written in our copies, preserved in our hearts, recited by our tongues and heard by our ears. Yet it does not reside (*ḥall*) in these". Al-Taftāzānī, as an Ash'arite, suggests as an explanation that the word "fire" written on a piece of paper does not have in it the burning quality of fire and consume the paper.

The later Ash'arite view of this relation may be given in the words of al-Fadālī (d. 1236 = 1820; see AL-FADĀLĪ) in his *Kifāya* (ed. 1315 with al-Baidjūrī's comm., p. 50). "These Glorious Expressions [the words of the Qur'ān] are not a guide to the eternal quality in the sense that the eternal quality can be understood from them. But what is understood from the expressions equals (*musāwī*) what would be understood from the eternal quality if the veil were removed from us and we were to hear it"; apparently the distinction between *ḡusūbiyas* and *ḡusūbiyas*. Thus the wording of the Qur'ān is created, and al-Fadālī has even a shade of doubt whether that wording goes back to the Preserved Tablet, that is to Allāh, or is due to Djibrīl or even to Muḥammad. Similarly Ibn Ḥazm [q. v.] reports (*Milal*, ed. Cairo, 1317, p. 211 *infra*) that this was the Ash'arite doctrine even in his time and especially of al-Bākillānī [q. v.] and that their formula was that the Qur'ān was the *kalām* of Allāh only in the sense that it was an 'ibāra, an "expression" for the *kalām* of Allāh. Similarly in al-Fikh al-Akbar, ascribed to Abū Ḥanifa (d. 150) with a comm. by al-Maturidī (d. 333), the word for this relation is already 'ibāra and also *ḥikāya*, "reproduction" (Ḥaidarābād 1321, p. 23). There is a very complete analytical and objective, but not historical, statement of the different positions in the *Mawāḥif* of al-Idjī with comm. of al-Djurdjānī, Bulāḡ 1266, p. 495.

In this the influence of Christian theologians seems plain. The parallel between the uncreated but creating Logos, the reason and word of God, with its earthly manifestation in Jesus and this *kalām*, as eternal quality, as creative agency and as revelation in time is very close. The position of the Ash'arite school that the quality is practically the thinking of Allāh, although they carefully guard against confusion with our "thoughts" which originate in time (al-Fadālī, p. 52) suggests the rational side of the Logos, the Hebrew *דבור*, the divine *σοφία*. But it is not allowable to ascribe 'aql, *νοῦς*, to Allāh because of philosophical and etymological implications; cf. *Mawāḥif*, ed. Cairo, p. 541, ed. Sörensen, p. 161, 'AQL, and al-Baidjūrī on Kur. ii. 41, ed. Fleischer, i. 57, 13. The Christian theologians naturally translated their Syriac *mellēthā*, ὁ λόγος, with al-*kalām*. On Christian influence in Muslim theology see further in Graf, *Die arabischen Schriften des Theodor Abu Kurra* and the various articles cited by Horten in his *Philos. Systeme*, p. 626; especially C. H. Becker, *Christliche Polemik u. islamische Dogmenbildung in Zeitschr. für Assyriol.*, xxvi. 175 *sqq.*

III. It is not an overhazardous conjecture that similar influence worked in developing the use of *kalām* = theology and of *mutakallim* = theologian. The Syriac *mallel* (= *takallama*) and its deriva-

tives were parallel to λέγω and λόγος on both sides of their meanings of reason and speech. Thus *mamallēl allāhāyāthā* meant θεολόγος and *mellila*, λογικός. Starting, therefore, with *kalām* = speech, the development was easy to intellectual argument, especially as applied to theology. How much in the dark Muslims were on the origin of this use is evident from the eight explanations which al-Taftāzānī gives (comm. on al-Nasafi, p. 10 *sqq.*): (i) Theologians begin, "The *kalām* (statement, argument) on such and such a doctrine is ..." (ii) Deals most with doctrine of Speech of Allāh. (iii) Gives same weight to Speech in theology as philosophers give to *manṭiq*, logic. (iv) Most essential of sciences taught by speech. (v) Speech between opponents necessary to it rather than consideration or reading. (vi) The most disputations of the sciences taught by speech. (vii) For its weightiness it is the "statement" as opposed to other sciences. (viii) The cutting, impressive science from *kalm* = *djarh*. Ibn Khaldūn, (see below) gives only two explanations: (i) That the science deals with speech only and not action ('amal). (ii) The same as (ii) above; cf. further Haarbrücker's translation of al-Shahrastānī's *Milal*, i. 26, and remarks, ii. 388—393.

But *kalām* came only slowly to be the name for theology. At first, *fikh*, "intelligence", was used for the whole speculative side of theology and canon law, as opposed to 'ilm for the traditional side [see *FIKH*]. Then theology came to be called "the greater *fikh*", al-Fikh al-Akbar, as in the book ascribed to Abū Ḥanifa and al-Maturidī, referred to above. There, p. 6, it is said, "al-fikh *fī'l-dīn afḍal min al-fikh fī'l-'ilm*", which would have been expressed later, "*kalām* is more excellent than *fikh*". *Kalām*, in that book, is not used technically except for the Speech of Allāh, *ḡawī* generally taking its place; in the *Ibāna* of al-Ash'arī [q. v.] *kalām* occurs, similarly, only in titles to sections. But in the *Fihrist* (c. 377—400) *kalām* is used normally in the sense of "statement" and also technically, with *takallam* and *mutakallim*, of theology; while *fikh* is used, as regularly thereafter, of canon law. But there followed speedily a further development: 'Ilm al-Kalām came to mean not simply theology, but scholastic theology of an atomistic type, going back most strangely to Democritus and Epicurus, and a *mutakallim* came to mean a theologian, first Mu'tazilite and later orthodox, behind whose theology lay the atomistic system which was Islām's most original contribution to philosophy. The importance of this conception of the matter of the universe, as being of a grained structure and not infinitely divisible and continuous can hardly be over-emphasized. In Europe, until the xviith century, it was eclipsed by the authority of Aristotle; but it re-appeared then, first in a qualitative form (Boyle and Newton) and later quantitative (John Dalton). It would be curious to contrast the experimental researches of these with the a priori speculations of Islām. A *mutakallim*, then, was thus distinguished, although calling himself an Ash'arite, from the Hanbalite conservative traditionalists among whom al-Ash'arī had reckoned himself, from the mystics who found their basis in religious experience (*ma'rifa*; *khaṭarāt* and *wasāwīs* in *Fihrist*, p. 183, 12) rather than in 'ilm and dialectic, and from the philosophers (*ḥukamā*) who based upon a blend of

Aristotelian and Neoplatonic philosophy; although all these might profess to hold the same doctrines of the Sunni faith. This leaves out of account, of course, the Shī'ite system, a structure of Mu'tazilite rationalism erected on the doctrine of *al-'ilm*, i. e. that the ultimate basis of our knowledge is not reason but authoritative instruction by an inerrant guide, always in the world, whom man must seek and obey (cf. e. g. al-Ghazālī's *Munqidh*, ed. 1203, pp. 21 sqq. and Goldziher's *Streitschrift des Gualt gegen die Bāṭinijja-Sekte*, passim) and the pantheistic side of Sūfism which is not really Muslim at all, except in vocabulary and imagery.

It is a great misfortune that the beginning of the *reḥ* *Makalat* of the *Fihrist*, which deals with Kalām in this sense, is lost, and with it the account of the origin of this science, and that the first *fann*, especially, has reached us in so hopelessly a condition (Houtama, in *Zeitschr. für die Kunde des Morgenlandes*, iv. 217—235, essentially supplementing Flügel's ed.). Yet it is clear that the author divided the *mutakallim*'s of his day (end of ivth cent. of H.) into five: (i) Mu'tazilites; (ii) Shī'ites, both Imāmites and Zaidites; (iii) Predestinarians and Anthropomorphists; (iv) Kharijites; (v) ascetic Sūfis. This arrangement may be due to the Shī'ism and, therefore, Mu'tazilism of the author; but the Mu'tazilites were certainly the first *mutakallim*'s. He places al-Ash'ari in the third class and has evidently no idea of the importance of his school — he seems to have been a joke (p. 181, 16); yet he died c. 330. Nor is there any mention of al-Māturīdī who had died 333. Al-Bakillānī died 403, four years after the last date in our MSS of the *Fihrist* (Flügel's preface, p. xii). Certainly the author of the *Fihrist* grievously misread the future, for in his third class lay orthodox Sunni Islām. Of his fourth class only the Hāshītes [q. v.] continued to have any importance. Nor does he show any idea of the speculative possibilities in his fifth class.

We cannot, as yet, write a connected history of the atomic theory of Islām, the essential *differentia* of the system of the *mutakallim*'s, and it may never be possible. We have only references to and short quotations from the earlier disputants upon that system. Even the extant writings of al-Ash'ari do not give us any help, and we have, so far, none of al-Bakillānī's writings, which probably would. Fortunately Horten has gathered up and unangled, with great diligence, in his *Philosophische Systeme* the later references and quotations, and from these it would appear that the Mu'tazilite Abū 'l-Hudhail al-'Alīf (d. 235 or 226; cf. Abū 'l-Hudhail and Horten, pp. 246 sqq.) was the founder of the atomic school and was opposed in it by two other Mu'tazilites, Hishām b. al-Hakam (d. 231 (?); cf. Hishām and Horten, pp. 170 sqq.) and al-Nazzām (d. 230; Horten, pp. 189 sqq.). It thus arose among the Mu'tazilites, however it may have reached them; but we cannot be sure to what extent their system was exactly that which lies behind all the reasonings of the later *mutakallim*'s. It is unnecessary to describe the system here, as it has already been given under ALLĀH, i. 307 sqq. It may, however, be worth while to give the following references to Horten where he deals especially with it, pp. 22 sqq., 42 sqq., 178, 191, 246 sqq., 263 sqq., 526, 551. Pp. 195, 235, 236 make it plain that the division of time into atoms, which

could not be further divided, i. e., that time is not endlessly divisible, goes back to Zeno's paradox of Achilles and the tortoise; it was a solution of that paradox and made motion possible; cf. William James, *A Pluralistic Universe*, p. 228—231. Ibn Hāzim in his *Milāl*, because of his very hostility, has given us particularly full accounts, e. g. v. 92 sqq. But in the nature of the case it is not probable that the earlier disputants put their discussions into permanent written form, and still less permitted copies to be freely made and spread abroad. We have the classic case of al-Djunaid (d. 297 = 909), a very great theologian and ascetic Sūfi, on whom no shadow of real suspicion of heresy ever fell, but who openly said that the seeker of the divine Reality might expect to be called a heretic (Goldziher, *Vorlesungen*, p. 175; see, further, al-Kushairī, *Risāla*, Būlāq 1290, pp. 139 sqq. and Djunaid, above, i. 1063). When he discussed questions of *tawhid*, that is the doctrine of the person of Allāh, with his students, it was behind closed doors. We can hardly imagine that these discussions were concerned with such questions as are in al-Ghazālī's *al-Risāla al-Kudsiya* or *al-Iḥṣāḍ*, or even al-Taftazānī on al-Nasafī; they must have cut much deeper and have been like those which Ibn Hāzim has exposed to us with malicious indignation, dragging those Godless *mutakallim*'s from behind their closed doors. In reply the *mutakallim*'s would have protested that he was not playing the game and did not understand their object. The Mu'tazilites preceded the orthodox theologians in open publication. We still have the *Masā'il* of Abū Raschid, a Mu'tazilite, who wrote about 400 (1009) (Horten, *Philosophie des Abu Raschid*; Arthur Biran, *Atomistische Substanzlehre*). Al-Ghazālī, at a somewhat later day, actually did put such discussions into writing in his two *al-Maḡnūn*; but it was on the basis of Neoplatonic philosophy and not of atomism (see below).

In the *Muḥaddima* of Ibn Khaldūn (d. 808 = 1406) we get another view of this development, about four centuries later than the *Fihrist* (Quatremère's ed., iii. 27—43; Būlāq, 1274, pp. 223—228; trans. De Slane, iii. 40—64). In Quatremère's text (pp. 44—59; trans. De Slane, pp. 64—85) there follows a section on the *mutaḥabib* passages in the *Kur'ān* which is not found in some of the MSS., nor in the Būlāq editions. Ibn Khaldūn evidently added it later from a perception (i) that his view of these passages was essential to his general position and (ii) that he had not dealt fully enough with some of the theological matters of controversy. He traced, in fact, the origin, in great part, of the science of Kalām, viewed as defensive scholasticism, to these ambiguous and obscure passages; it sprang, thus, more from exegetical than from philosophical pressure. There is certainly truth in this; but it seems also certain that the early Muslim theologians, under the influence of outside ideas which were pressing in upon them, made use of the obscure verses to secure a possible footing in Islām for these outside ideas. In this they were greatly aided by Muhammad's own confused thinking, and also by a certain largeness of conception and width and freedom of ideas which belonged to his greatness; he had not been a metaphysician; but a keen psychologist. But it is especially characteristic of Ibn Khaldūn's position, and in striking contrast to his otherwise

openmindedness and genuinely scientific spirit, that he rejected all *ta'wīl*, or elucidation, of these passages as absolutely as Ahmad b. Ḥanbal or al-Ash'arī themselves. He interpreted *Ḳur.* iii. 5 (cf. al-Baidāwī, ed. Fleischer, i. 146, r) as meaning that only Allāh knew their meaning and that man should abstain from useless speculation. He thus secured a method of practically throwing out all the passages of the *Ḳur'ān* which did not suit his view of the universe, e. g. those speaking of the *djinn* [q. v.], and also, which was worse, set up a limit to man's investigation of the world.

Kalām having thus arisen from these difficulties, or impossibilities, of exegesis, the different sects developed according as the anthropomorphic *Ḳur'ānic* expressions bearing on the essence (*dhāt*) of Allāh or on his qualities (*ṣifāt*) were treated literally (*tashbīḥ*, *taḍṣīm*) or as having a meaning different in his case from the literal and unknown to us (*tanzīḥ*) or according as *tanzīḥ* was applied also to the other descriptives of Allāh, the meanings of which were quite plain and possible in the literal sense because they all expressed ideas apart from the concrete. This last was the position of the Mu'tazilites, between whom and the first sect, the anthropomorphists, stood the sect which professed to follow the doctrine of "the Fathers" (*al-salaf*). So the orthodox party was driven to the use of rational proofs (*adilla 'akliya*) and there arose al-Ash'arī who combined *'aql* and *naql*, denied *tashbīḥ*, establishing "the qualities consisting of ideas" (knowledge, power, will, life), and limited *tanzīḥ* as the *salaf* had done. He also established "hearing" and "sight" and "the speech which exists in the mind" (*al-ḥā'im bil-nafs*). He also discussed (*takallama*) with the Mu'tazilites their ethical position (*aṣṣaḥ*, *taḥṣīn*, *taḥbīḥ*) and eschatology and future rewards and punishments. He discussed with the Imāmiya the principle of government, and demonstrated that it was not a part of the Faith, but a convenience upon which the people had agreed. With all this compare and contrast Goldziher in *Vorlesungen*, pp. 119 sqq. The next great name given is that of al-Bāḳillānī (d. 403) [q. v.]. He reduced the whole to a system and established the intellectual basis and arranged the arguments. Thus he established the atom (*al-djawhar al-fard*) and the void (*al-khālā'*) — it is to be noticed that *djawhar* with the Aristotelian Neoplatonists means "substance" in the philosophical sense, and that *al-khālā'* is exactly the Lucretian *inane*; that an accident (*'araḍ*) cannot subsist in an accident and that it cannot continue through two atoms of time (see also, Ibn Khaldūn, ed. Quatremère, p. 114; De Slane, p. 157). So he made these principles only secondary in importance to the articles of the Faith, because he held that the nullity of an argument meant logically the nullity of the thing which it proved, and the converse. These principles were arguments for the Faith; the Faith was true, therefore these principles must be true. It is evident that formal logic was not the strong point of those who built up this system, however ingenious it might be; and that Ibn Khaldūn remarks. And it is further evident that with al-Bāḳillānī the historical value of Ibn Khaldūn's outline begins. He makes no mention of Ibn Ḥazm [q. v.], a theological free lance, who died in 456; but he gives the titles of two of the books of the Imām al-Ḥaramain (al-Djuwainī, q. v., d. 478), a teacher of

al-Ghazālī, apparently because of his reputation although no distinctive development is attached to his name. Immediately after him the science of formal logic was taken up by the theologians who had discovered that it was only a tool for thinking and not a part of philosophy. But this led to an examination of their foundations and to the rejection of a great part of them; so that they no longer argued, as al-Bāḳillānī had done, from the nullity of the proof to the nullity of the thing proven. Their new proofs were derived, to a considerable extent, from the physics and metaphysics of the philosophers, and thus they entered upon a new method which was called *ḥarīkat al-muta'akḥḥirīn*; yet they also introduced into it a considerable amount of opposition to the philosophical positions because these seemed to be the same as their own earlier heresies. Leaders in this new school were al-Ghazālī (d. 505) and al-Rāzī (d. 606; see on him especially Goldziher in *Der Islam*, iii. 213—247) and to their books Ibn Khaldūn would still send the student of theology who wished guidance in his criticism of the philosophers, although there was in them some amount of opposition to the older method. It is to be remembered, too, that al-Rāzī was a systematic user of *ta'wīl* (Goldziher, p. 227) of which Ibn Khaldūn disapproved. But such students as wished simply to follow the path of the *salaf* in theology should take the old method of the *mutakallim's* — only there could true *'ilm al-kalām* be found — and especially should study the *Irshā'a* of the Imām al-Ḥaramain. This apparently means that with al-Ghazālī there came a sharp abandonment of the method of the atomists and a going to school instead with the Aristotelian Neoplatonists. Such, too, is certainly the evidence of al-Ghazālī's writings. After al-Ghazālī and al-Rāzī came still deeper confusion between theology and philosophy, until the subject matter of the two was regarded as one. Yet the *mutakallim's* had distinguished sharply the physics and metaphysics of the philosophers from their own theocentric position, using an intellectualist system in defence of dogmas laid down by divine authority. He gives as an example of this confusion the *Ṭawālī'* of al-Baidāwī (d. 685 = 1286) and every user of al-Baidāwī's *Ḳur'ān* commentary will recognize what he means. The learned of Persia (al-'Adjam) who followed al-Baidāwī had used the same method in all their works. Of the kind of *Kalām* that was left in his own day Ibn Khaldūn had no good opinion; its ambiguities (*iḥāmāt*) and generalities (*iṭlāḳāt*) were a profanation of the Creator rather than a defense. And no *Kalām* was longer needed; it had been a defense against the Muḥida and the Muṭadi'a and they were extinct. But it was rather disgraceful for one who knew the Sunna by heart not to be able to give a reason for the faith that was in him.

Yet *Kalām* had still a long course to run, and the commentary of al-Baidjūrī on the short treatise of al-Faḍālī, already referred to, gives a good idea of the development of the system of the *mutakallim's*. Text and comment are quite modern — al-Faḍālī died in A. D. 1821 and al-Baidjūrī in A. D. 1844; they are finished scholasticism and the title, *Kifāyat al-'Awāmīn fī 'Ilm al-Kalām*, "The Sufficiency of the Commonality in the Science of *Kalām*", with reiterated statements in the text that only so much is given as is necessary for sal-

vation, shows a purely intellectual view of religion. The commentary is based throughout on atomistic reasonings; the physics and the metaphysics are atomic. The text suggests an intentional counterblast to the treatise of al-Ghazālī with a similar title, *Ilājām al-'Awānīm 'an 'Ilm al-Kalām*, "Reining back of the Commonalty from the Science of Kalām", yet the intention is nowhere expressed. In it al-Ghazālī had denounced the corrupting of the simple faith of the multitude with intellectualist arguments and had advocated very subtly what we would now call psychological methods — startlingly, for modern ideas, backed by the secular arm of the state. But al-Ghazālī had opposed the *mutakallīm* system and method from the beginning. On the one hand he knew, as a fact of psychology, that being convinced against one's will left one of the same opinion, and on the other, he did not approve of atomism as philosophy. He appears to make no specific reference to it in his works, and where he does give an abstract of the theology, as a formal science (e. g. in *al-Risāla al-Ḥudsiya*, and in *al-Iḥisād*) he stops short of absolutely philosophical bottoming. That, for him, was intellectually impossible; but such an outline of concatenated dogmatics, as in the two books mentioned, was justifiable (*Arba'in*, pp. 25 sqq., ed. 1328). The only real philosophy for him was, apparently, the Aristotelian-Neoplatonic amalgam, and with it he had dealt in his books which have reached us in a sceptical but respectful spirit. Probably following the economy of teaching, which he himself professed, and which he and all Islām practised, he dealt thoroughly and destructively in other books with the atomic system, and this may explain the mysterious allusions which have been called "the secret" of al-Ghazālī (e. g. W. H. T. Gairdner on the *Mishkāt* in *Der Islam*, v. 121—153). For his attitude towards the *mutakallīm*'s see further AL-GHAZĀLĪ, above, ii. 147 sq., *al-Munqidh*, pp. 8 sqq., and *Mishkāt al-Anwār*, Cairo 1322, 47 sqq.

It is significant that reform movements in Islām at the present time seem to have cut loose from the atomic philosophy, and to have gone back for leadership to Ibn Sīnā [q. v.], Ibn Rushd [q. v.] and the Aristotelians generally. Djamāl al-dīn al-Afghānī (see above, I, 1008 sqq.; E. G. Browne, *The Persian Revolution of 1905—1906*, Cambridge 1910, Chap. i.; Goldziher, *Die Richtungen der islamischen Koranauslegung*, Leiden 1920, pp. 322 sqq.) and his friend and pupil Muḥammad 'Abdu were the protagonists of this renaissance and continued the long interrupted method of al-Ghazālī, even on the side of the economy of teaching. The atomic system had crystallized and had become identified with the stiffest orthodoxy. In its origin, also, it had been, even with the Muṭazilites, a weapon for the defence of accepted views and not an instrument of free investigation. Modern Islām, therefore, could have nothing to do with it, although it is possible that modern western atomic speculation may galvanize it into a semblance of life just as microbes have been used to defend the Qur'ānic doctrine of the *djinn* (Goldziher, *Koranauslegung*, p. 356). Yet it should never be forgotten that this theory is the most original contribution which Muslim thinkers have made to the history of philosophy.

(D. B. MACDONALD.)

KĀLAM (κάλαμος, reed) the reed-pen used for writing in the Arabic character. It is a tube of reed cut between two knots, cut obliquely (or concave) at the thicker end, having the point slit, as with us for the quill and later for the steel pen. It has to be very firm so that it does not wear away too quickly; the best kind comes from Wāsiṭ and grows in the marshes (*baṭā'ih*) of the 'Irāk. It is allowed to steep like hemp and is kept in the water until its skin has taken on a beautiful dark brown colour. Its fibres should be quite straight so that the slit may also be even. To make the slit the slanted end of the *kalam* is laid on a long flat piece of ivory or bone, which is specially used for this purpose and is called *mikāṭṭa* (Turk. *mikṭa'*); the point is then slit with a sharp backward cut with a special very sharp knife with a long handle (penknife, Turkish *kalamtırāsh*).

The part of the point to the left of the incision is called *insī* ("human"), because turned towards the writer and the right *waḥshī* "savage". If the former is slightly softer than the latter so much the better. It has been made a rule that in the kinds of writing called *naskh*, *thuluth* and *riḳā'* the *waḥshī* side ought to be twice as broad as the *insī* side; in the kinds called *diwānī* and *ḥirma*, it is the other way about. The *nasta'liq* is written with a pen slit exactly down the centre.

To protect the *kalam* from damage it is kept in a holder (*miklāma*). These are of two kinds: 1) a metal box in the form of a long flat tube closed at one end by a lid with hinges and often adorned with arabesques. Attached to it is an inkwell (*dawāt*, popularly *dawāya*). This kind is peculiar to the Arabs. In Osmanli Turkish it is called *diwīt* (from Ar. *dawāt*); at an earlier period it was also called *kubūr* (strictly plur. of *ḥabr* "grave") by the Ottoman Turks, a word which is found as early as Abū Yūsuf, *Kitāb al-Kharāj* (Cairo 1302, p. 17) with the meaning of "holder", "case"; 2) a papier-mâché box adorned with lacquerwork. In it is a drawer which also holds an inkwell. This kind is used particularly in Persia and is called *kalamdār* "pen-box".

Sūra lxviii. of the Qur'ān (*Sūrat Nūn*) is sometimes called *Sūrat al-Kalam* from its opening: "N. — By the pen and what they write," According to the traditions quoted by al-Ṭabarī (*Tafsir*, Būlāk 1323—30, xxix. 107) the *kalam* was the first thing created by God so that he could write down events to come; two explanations have been given of this *kalam*: 1) the implement used for writing, a divine gift like the

latter; 2) a kalam of light, as long as the distance from heaven to earth, which wrote down all things that are to happen until the last judgment (cf. Fakhr al-Dīn al-Rāzī, *Mafāṭīḥ al-Ghaib*, Cairo 1278, vi. 330; Muṭahhar b. Ṭāhir al-Makḍisī, *Kitāb al-baḍʿ wa ʿl-taʾrīkh*, ed. Huart, i. text, 161 sq., transl. 149).

The kalam is the emblem or symbol of the administrative services as opposed to the *saif*, which marks the military officer. Ibn al-Wardī († 749 = 1349) wrote a *Mufaḥḥarat al-Saif wa ʿl-kalam* and Ibn Nubāta († 768 = 1366) a work with a similar title; Djalāl al-Dīn Muḥammad b. Asad al-Dawānī († 907 = 1501), ʿAlī b. ʿAbd al-ʿAzīz Umm al-Walad-Zāde († 920 = 1514) and Kīnālī-Zāde († 979 = 1572) each wrote a *Risāla Kalamiya* on the same subject (Brockelmann, *Gesch. d. arab. Litt.*, ii. 140, 211, 430, 433).

(CL. HUART)

KALANDAR, a Ṣufī religious order, founded by Kalandar Yūsuf [cf. KALANDARĪ], an Arab of Spain, contemporary with Ḥādīdī Bektāsh [q. v.], brought to Damiatta by the Shaikh Djamāl al-Dīn al-Sāwī, a native of the town of Sāwa in Persia; he is buried in the Zāwiya which he had founded there. He shaved his beard and eyebrows, since by doing this he had escaped in an amorous adventure; all his pupils followed his example. This sect, however, must have its origin in an earlier period, for it appeared in Damascus towards the year 610 (1213); it attracted attention by a strange costume adopted from the Persians and Mazdeans, which orders from the authorities forced it to abandon. The Mamlūk Sultān al-Malik al-Nāṣir Ḥasan, grandson of Kalāʾūn, in 761 (1360) forbade them to shave the beard. According to al-Makrīzī's account of them, they made it a rule to lay nothing aside and never to amass this world's goods; but in his time they did not wear coarse garments nor subject themselves to any mortification or any devotional exercises, saying it was sufficient for them that their hearts were at peace with God. They wanted nothing more; they made no effort to attain a degree of virtue more eminent than this state of peace at heart. To show their indifference as regards everything outside their ideal, they took the course of throwing off the restraint of all the laws of politeness usually observed in society. Their morals also were very loose. Bābā Ṭāhir ʿUryān of Hamadhān said: "I am the mystic gipsy called *kalandar*. I have neither fire, home nor monastery. By day I wander about the world, and at night I sleep with a brick under my head" (*Quatrains*, N^o. vi., *Journ. Asiat.*, Series viii., Vol. vi. 1885, p. 516). The description of the odd costumes which accompanies the French translation of Chalcocondylas by B. de Vigenère (Paris 1662) and which is taken from the *Navigations* of Nicolas de Nicolay (Lyons 1568) gives on p. 23 an engraving showing one of these Kalandar

dars wearing a kind of hair-shirt of wool and horse-hair coming barely down to the hips; he has his hair closely clipped, face clean shaven and on his head a felt hat surrounded by a fringe of horse-hair of the length of a hand. He wears rings in the ears, around the neck, on the wrists and under the pubis. He has no shoes; some of them used to walk quite naked in the streets. It is only fifty years ago that the Ottoman police finally succeeded in suppressing them. There was a convent of this order in Constantinople, founded in the reign of Muḥammad II with a mosque and a madrasa (Hammer, *Hist. de l'Empire ottoman*, transl. by Hellert (Paris 1835—43), xviii. 110, 131. Sometimes they have been confused with the Malāmatiya [q. v.]; cf. especially A. Le Châtelier, *Les confréries musulmanes du Hedjaz*, Paris 1887, p. 253 sqq.

(CL. HUART)

KALANDARĪ, the reputed but mythical founder of the Kalandariya. According to all the information available regarding the early history of these dervishes, it is more than probable that we have not here to do with a body similar to the other dervish orders introduced from Eastern Persia, but rather with a kind of wandering monks, who followed in their mental and physical mode of life the ideal which al-Makrīzī, *al-Khiṭaṭ* (Būlāḳ 1270), ii. 432 sq. attributes to them, a propos of his description of the Kalandarī monastery in Cairo (cf. thereon de Sacy, *Chrest. Arabe*², Paris 1826, i. 263—275). According to this and to descriptions which e. g. al-Suhrawardī (in Silvestre de Sacy in *Notices et Extraits des Mss. de la Bibl. du Roi*, xii. Paris 1831, p. 341) or Djamī, *Nafahāt al-Uns*, ed. W. Nassau Lees (Calcutta 1859) as well as Saʿdī himself (cf. *Gulistān*, transl. by K. H. Graf, *Moslicheddin Saʿdī's Rosengarten*, Leipzig 1846, p. 294 sq.) give of the Kalandar dervishes of the time, we have to deal with wandering dervishes, Malāmatī's (cf. al-Makrīzī, *al-Khiṭaṭ*, ii. 432; but on the other hand see the *Burhān-i Kāfi*^c under *Kalandar*, where a rigid distinction is made between *kalandar*, *malāmatī* and *ṣūfī*), without fixed abode and without fixed rules for their order and with an utter neglect of the laws of religion or of the forms of society. Abū Saʿīd b. Abū ʿl-Khair composed a quatrain on them, which gives an excellent picture of the real Kalandar of his time (cf. *Sitzungsber. der Kgl. Bayr. Akad. der Wissensch.*, phil.-hist. Kl., 1875, ii. 157; Ign. Goldziher, *Vorlesungen über den Islam*, Heidelberg 1911, p. 172; F. Babinger in *Der Islam*, xi. 1911, p. 66 sq.). What, then, is usually called the founder of a so-called order of kalandars, is apparently nothing more than some important

protagonist of these views. This is certainly true of Yūsuf, said to have been a Spanish Arab, who is often represented as the founder of the Ḳalandariya, as well as of Shaikh Djāmāl al-Dīn of Sāwa in Persia, who, Ibn Baṭṭūṭa says (i. 61 sq.), settled in Damietta and ended his days there. The expression *Ḳudwa* in Ibn Baṭṭūṭa here obviously means nothing more than "pattern, model". The Ḳalandars seem to have originated in Central Asia and to have been strongly influenced by Indian ideas. According to al-Makrīzī (d. 1442), they came about 400 years before his time into Arab lands. About 610 (1213) the first of them appeared in Damascus (*al-Khiṭaṭ*, ii. 433). Here there died in 622 (1225; this, not 722 = 1322 is to be read in *al-Khiṭaṭ*, ii. 433) the Persian Shaikh Ḥasan of the Djawālīkī sect, who flourished under Sulṭān al-Malik al-ʿAdil Ketbogha and founded a monastery of Ḳalandars not far from Cairo (Seryākūs = Kyriakos?). The Ḳalandaris may have been most numerous in Persia and the great bulk of them, still in the xviii century at least, seems to have been concentrated in Ardabil [q. v.], the stronghold of the Ṣafawiya (SAFAWIDS, q. v.; cf. Adam Olearius, *Persianische Reisebeschreibung*, op. cit., 1656, p. 685: the *Kalenderan*). In Anatolia also and even in Rumelia in the early Ottoman period down to the xvth century, they several times played a dangerous part by attacks on the authority of the state and serious risings (cf. F. Babinger in the *Islam*, xi. 14; Pečewī, *Tārīkh*, Sтамбул 1283, i. 1283). Even in the Salḡūḡ period similar risings seem to have been led by Ḳalandaris. There are also various indications of connections between Ḳalandaris and Bektaşhis.

ḲALANDARĪ has also become the name of a certain tune in Turkish.

Bibliography: cf., besides the works quoted above, also F. Babinger in *Der Islam*, xi. 94 and the references given here; also d'Herbelot, *Bibliothèque Orientale* (Paris 1697), p. 244; do. (Maestricht 1776), p. 224 s. v. *Calender*; Adam Olearius, *Persianischer Rosenthal*, Book viii. § 67; *Burhān-i Ḳāfī*, ed. Th. Roebuck (Calcutta 1818), s. v.; J. P. Brown, *The Dervishes* (London 1868), where the presumably not Persian origin of the word *kalender*, *ḳarendal* etc. is also discussed (cf. besides Dozy, *Supplément*, ii. 340 also *Der Islam*, xi. 94, note). (FRANZ BABINGER)

ḲALANSUWA, ḲALANSIYA (A.), the name for a cap which was worn by men either under the turban proper or alone on the head. The word, from which verbal forms are derived as denominative verbs, is apparently of foreign origin; while it used to be commonly connected with the Latin *calantica*, for which, however, the form *calantica* is difficult to quote — and besides it means a head-cloth for women —, Fraenkel wishes to derive it through the Aramaic קליס (cf. Arabic *ḳālīs*, *ḳālis*, Dozy, *Supplément* ii., 395) from *κάλος* (*conus*). The Arab grammarians and lexicographers have found in the manifold formation of the broken plural and the diminutive a reason for using *ḳalansuwa* as a paradigm for substantives of more than three radicals with such peculiarities.

Caps of different shapes are called *ḳalansuwa*; varieties of the *ḳalansuwa* are *ṭurṭūr*, *burnus*, *urṣūṣa*, etc. While it is related of the companions of the Prophet that they wore tight-fitting *ḳalan-*

suwa's, later a long peaked sugar-cone shape, supported within by pieces of wood became fashionable, for which the name *ḳawila* is usual. It seems to have come from Persia (cf. the head-dresses in the Dura-Ṣālihiya first century paintings, in J. H. Breasted, *Oriental Precursors of Byzantine Painting*, Chicago 1924) for it was regarded by the pre-Muḥammadan Arabs as a noteworthy feature of Persian dress (Jacob, *Alt-arab. Beduinleben*², p. 237) and is said to have been first adopted in the reign of the first Umayyad by ʿAbbād b. Ziyād from the inhabitants of the city of Ḳandāhar, conquered by him (Yāḳūt, *Muʿjam*, ed. Wüstenfeld, iv. 184). High, black *ḳalansuwa*'s were worn by the ʿAbbāsīd Caliphs from al-Manṣūr to al-Mustaʿīn and by their viziers and ḳādis. The latter adhered longest to the *ḳalansuwa*, so that in the course of the third (ixth) century — also popularly known as *dannīya*, pot-hat, or *ḳawila* — it became their regular official headgear together with the neck-veil *tailasān* and at times was strictly forbidden to other classes of the community (al-Kindī, ed. Guest, p. 460, 586). — On the other hand criminals had a *ḳalansuwa* put on their heads when they were led through the streets. The *ḳalansuwa* was also worn among the Umayyads in Spain, where *muḳallas* meant a Muḫī wearing the *ḳālīs*. A headdress introduced by Timūr into his army was also known as *ḳalansuwa*.

The name *ḳalansuwa* appears several times in Ibn Baṭṭūṭa according to whom (ed. Defrémery and Sanguinetti, ii. 378) the Ḳipčaks, for example, called their *ḳalansuwa*'s by the Persian name *kulāh*. Of the Futūwa [q. v.] societies in Asia Minor (*akhiyat al-fityān*) he says (ii. 264) that their members wore several *ḳalansuwa*'s above one another, a silk one on the head, above it a white woollen one, to the top of which was tied a strip of cloth 2 fingers broad and 1 ell long; at meetings only the woollen *ḳalansuwa* was taken off, the silk one remaining on the head. A similar pendant strip of cloth is also part of the dress of the Coptic priests of modern Egypt and is there called *ḳallūsa* or *ḳalaswa*; here the name appears to have been transferred from the cap itself to its most striking and therefore better known part.

At periods when, as in the second (viii) century, both Muslims and Christians wore *ḳalansuwa*'s, the latter had to tie two knots of another colour to it (Ṭabari, ed. de Goeje, iii. 1389); but when the *ḳalansuwa* went out of fashion with the Muslims in the third century, it remained the mark of the Christians. The word is therefore frequently found in Arab authors meaning the headdress worn by Christian monks and hermits, Greek priests and even the Pope himself. Through the Crusades the high cap with the veil seems to have found its way to Western Europe as a woman's dress.

The name *ḳalansuwa* was also given to other objects of similar shape: *ḳ. nuḥās* is the metal cap of the obelisk near Heliopolis (ʿAin Shams q. v.). *Ḳ. Turāb* in modern Arabic for a chemical sublimating vessel. *Ḳ. buḳrāṭ* is used by surgeons for a particular kind of head-bandage; *ḳālīs* (*ḳālis*) is the name of a plant, which seemed to represent a human head with a high cap. *Ḳalansuwa* was also the name of a fortress near al-Ramla in Palestine.

Supplément, ii. 395, 401; Fraenkel, *Die aram. Fremdwörter im Arabischen*, p. 53 sq.; Mez, *Die Renaissance des Islāms* (Heidelberg 1922), p. 26, 45 sq., 130, 217, 348 sq., 367; Thorning, *Beitr. z. Kenntnis des islam. Vereinswesens (Türk. Bibl. xvi.)*, p. 215 sq. — Lammens, *Remarques sur les mots français dérivés de l'arabe* (Beyrouth 1890), p. 71 sq. (supposes an influence of *Kalansuwa* on the French word *calotte*). (W. BJÖRKMAN)

KALĀNTAR (comparative from *kalān* "great") means at the present day in Persia the chief personage in a town, a kind of mayor, burgo-master, bailiff. This office is filled by election; the person elected has to be approved by the higher authority. The main duty of this official is to levy taxes.

KALĀT (KELĀT, KILĀT, KHELĀT). 1. The town of Kalāt is the capital of the Khānate and fort of the same name, the most important part of Balōčistān, and the residence of the Khān, its ruler. The word Kalāt or Kilāt represents the Arabic *ḥalāfa* or rather the Persian *kālāt* [cf. the art. KAL'Ā], which in India is usually pronounced *kila*. In Balōči *khlāt* is the common word for a fort. On coins we find both كلات and قلات (W. H. Valentine, *Copper Coins of India*, vol. ii. 1921, p. 223). It has been known in earlier times as Kalāt-i-Sēva (from a legendary Hindu king) and Kalāt-i-Nīčārī, which connects it with the Brahōi tribe of Nīčārī, which is generally accepted as belonging to the oldest branch of the indigenous Brahōis [s. BALŌČISTĀN, i. 627, 630]. The town was unknown to the early Arab historians under its present name. It is however possible that it may represent Kizkānān, which Arab geographers mention as the residence of the ruler of Kuṣḍār (al-Iṣṭakhrī, *Bibl. Geogr. Arab.*, i. 176 ult. sq.; Ibn Ḥawqāl, *ib.*, ii. 232, 5 sq.). Its situation is in the modern district of Sarāwān, close to the boundary of Djahlāwān [q. v.]; thus it would have been included in the ancient province or kingdom of Tūrān, of which the capital was Kuṣḍār (now generally written Khozdār, in Djahlāwān). [In the *Shāhnāma* Kelāt belongs to Tūrān; cf. ed. Vullers ii. 794. — Ed.]

After the Balōč tribes had passed through the Brahōi country on their way to the Indus valley, in the xvth and xvth centuries, Kalāt remained in the hands of the Brahōis under a chief of the Kambarānī clan, from whom the line of Khāns is descended. Their power gradually extended during the Indian expeditions of Nādir Shāh and Aḥmad Shāh Durrānī [q. v.], whose suzerainty was admitted by the Khāns. The greatest of these, Naṣir Khān, endeavoured to shake off the Durrānī yoke. He was defeated by Aḥmad Shāh, but the latter, who besieged Kalāt in 1172 (1758), was unable to take it, and Naṣir Khān made favourable terms for himself. He built a strong fort (known as the Mīrī) and strengthened his position among the surrounding tribes. In 1834 Shāh Shudjā' al-Mulk took refuge in Kalāt with Mihrāb Khān after his failure to recover Qandahār. In 1838

through the intrigues of his followers Mihrāb Khān was embroiled with the British force advancing on Qandahār by the Bōlān Pass; Kalāt was taken by storm, and the Khān himself killed in the attack. Two years later the fort was taken by disaffected Brahōi tribes. The British Agent, Love-day, and the traveller Masson fell into their hands and the former was murdered. This led to a second British occupation for a time, but the Khāns were re-instated and remained practically independent for the next thirty years. Under the British protectorate, Kalāt remains the capital of the Khān's dominions. It is a small town situated in the high plateau 6780 ft. above the sea with a population of under 5000. The best descriptions of Kalāt are those of Pottinger, who visited it in 1810, and Masson (1831 and 1840).

2. The Khānate or State which takes its name from the town of Kalāt. This includes the provinces of Sarāwān, Djahlāwān, Kačchī and Makrān, and the tributary states of Las Bela and Khārān.

For details see under BALŌČISTĀN.

(M. LONGWORTH DAMES)

KAL'AT BANĪ 'ABBĀS, a town in Algeria (department of Constantine) 24 miles N.E. of Burdj Bu 'Arraridj. Kal'a occupies at the height of 3,500 feet a natural fortress formed by a plateau surrounded on three sides by rugged and deep ravines, 1800 to 2000 feet high and joined to the adjoining country by a narrow tongue with precipices on either side. The town is divided into four quarters, which formerly were frequently fighting with one another and one of which is now almost in ruins. It is the most important centre of the tribe of Banū 'Abbās, whose territory lying between the Wādī Sāhel and the Madjāna contains about 24,000 souls. The town itself with an exclusively native population numbers 3000 inhabitants. The few patches of tilled land at the bottom of the ravines not sufficing to maintain the inhabitants, the latter have for long had to devote themselves to industry. They used to make woollen burnuses in large numbers, which they sold in Algeria and Tunisia. At the present day many of them emigrate and follow the trade of embroidering burnuses in the towns of the Tell.

Kal'a was founded in the second half of the fifteenth century A.D. by the marabout Sidi 'Abd al-Rahmān, a descendant, according to some, of the Idrisids, according to others, of the Hammādid. He established a zāwiya on the rock of Kal'a and put himself at the head of the Banū 'Abbās, who had risen against the Zwāwa, to whom they had hitherto been subject. His son Aḥmad built a *ḥaṣba*, proclaimed himself Sultān and extended his authority over the country between the Hodna and

the sea (the "kingdom of Labès" of Marmol). 'Abd al-'Azīz, his successor, further increased his power with the support of the Turks, whom he assisted against the Kabyls of Kuku and supported in their expeditions against the Moroccans and the people of Tuggūrt and Wārgla. The rupture of this alliance in 1552 brought about wars between the Turks and the Banū 'Abbās, which lasted down to the end of the sixteenth century A.D. Besieged several times, during this period, Ḳal'a could never be taken. After the death of 'Abd al-'Azīz, killed in defending his capital, power was exercised by his brother, Amokrān. The latter extended his territory as far as the Sahara, repelled several Turkish attacks and fell fighting them in 1600. His son Sidi Nāṣir, a man of the *Zāwiya* rather than the battlefield, dissatisfied the Banū 'Abbās and was assassinated by them. With him the kingdom of Ḳal'a disappeared. Henceforth the town was only the family citadel of the Mokrānī, *shaikhs* of the Maḍjāna, descendants of Sidi Nāṣir. Protected by its impregnable situation, it remained independent down to the French conquest. It served as an asylum for the adversaries of the Turks and the members of the great native families, who in time of war stored their grain and treasures for security with private individuals here. The honesty of the latter was proverbial. Thus Ḳal'a benefited in the midst of the disorders, which were ruining the country, by a regular neutrality and in spite of the quarrels of the *ṣofs* [cf. i. 702^b], inevitable in a Kabyl city, enjoyed a remarkable prosperity. It is at Ḳal'a that Mokrānī was buried the leader of the rising of 1871; his tomb is, however, now quite forgotten and neglected.

ḲAL'AT BANĪ ḤAMMĀD, a town in the Central Maghrib, which has now disappeared, but was in the *v*th (xth) century the capital of the Ḥammādid empire (cf. the article ḤAMMĀDIDS ii. 252). Al-Ḳal'a (Ḳal'at Abi Ṭawil in al-Bakrī and in the *Kit. al-Istibṣār*) was founded by Ḥammād b. Bulukkin [q. v.] in 398 = 1007-8 on a flank of a mountain called Kiyāna or 'Adjisa by Ibn Khaldūn and Tākārbast (now Ḍjabal Takerbust) by al-Idrīsī. A Roman fort had perhaps previously occupied this site; in the *iv*th (xth) century Abū Yazid [q. v.] had tried to check in these regions the Fātimid troops, who were pursuing him on his retreat through the Maghrib. The place seemed therefore well suited to enable Ḥammād to resist the attacks of his enemies from the West, the Zenāta, who had just besieged his capital Ashīr [q. v.] and those from the east, the Zirids of Ḳairawān. Ḥammād peopled the new town by transporting thither the inhabitants of al-Msila and of Ḥamza, which he destroyed, and a large number of members of the tribe of Ḍjerāwa. He built mosques, caravanserais, and various public

buildings and surrounded the whole with a wall which ran round the mountain. These defences, built, according to Ibn Ḥammād, by a Christian slave, enabled Ḥammād to offer a successful resistance to the Zirid Bādīs, when this prince came to besiege al-Ḳal'a in 406 = 1016. Thus Ḥammād made it a habit to live sometimes at Ashīr and sometimes at al-Ḳal'a and it was in this town that he died in 419 = 1028-29. Al-Ḳal'a rapidly became very prosperous. "The population increased rapidly, students came there in large numbers from the most remote parts of the empire, attracted by the resources which the new capital offered to those who cultivated science, commerce and the arts" (Ibn Khaldūn). The importance of al-Ḳal'a further increased after the sacking of Ḳairawān by the Hilālīs. Many inhabitants of Ifrīkiya came to seek shelter there. The population was very mixed. It is worth noting that it included a small community of native Christians; well treated by the rulers, they had a church dedicated to the Virgin and administered by an official, perhaps a bishop, whom Paul the Deacon calls by the Oriental name of *califa*. The country around was quiet, thanks to an alliance made by the Ḥammādid with certain sections of the Athbedj; the harvests surpassed the needs of local consumption and were stored in granaries, where they could be kept for several years. Life was easy there, owing to the abundance of fruits and of cattle fattened on the adjoining pasturage; the markets were attended by caravans, which came from all parts of the Maghrib and even from Egypt and Syria and the 'Irāk. Magnificent buildings were erected by al-Nāṣir: the Ḳaṣr al-Mulk (Government-Palace), the private residence of the emīrs, the Ḳaṣr al-Manār (Palace of the Signal), the Ḳaṣr al-Kawkab (Palace of the Star), the Ḳaṣr al-Salām (Palace of Bliss).

The situation altered in the second half of the *v*th century. Breaking their alliance with the Ḥammādid rulers, the Arabs began to plunder the region of Hodna and thrust their incursions up to the very gates of al-Ḳal'a. The insecurity became such that al-Manṣūr, while continuing to make frequent stays at al-Ḳal'a, moved the seat of government in 483 (1090/1) to Bougie, which had been founded by al-Nāṣir in 1062/3 [see Bougie, i. 766], but the attacks of the Arabs multiplied and made the lot of the inhabitants more and more precarious. In the reign of al-'Azīz the nomads invaded all the territory of al-Ḳal'a and forced the garrison to take refuge in the town out of which they could not go. Thus Yahyā, who succeeded al-'Azīz, decided in 543 (1048) to remove from al-Ḳal'a all objects of value, that were still there. Four years later, the Ḥammādid empire succumbed to the attacks of the Almohads. When master of Bougie, 'Abd al-Mu'min sent his son 'Abd Allāh to lay siege to al-Ḳal'a. The place, defended by Ḍjusham, Yahyā's brother, was taken by assault, the garrison put to the sword, 8000 inhabitants slain and many others taken prisoner. The conquerors carried off vast booty (547 = 1152—1153).

Still al-Ḳal'a survived this disaster. Some of the inhabitants repopulated, if not the town itself, at least the Ḍjerāwa quarter, E. of the wall. According to the author of the *Kit. al-Istibṣār*, they were still fairly numerous at the end of the *v*th (xth) century and were engaged in the making

of garments, which were celebrated. But in 580 = 1185, 'Alī b. Ghāniya captured al-Ḳal'a after a three days' siege. It was undoubtedly he who completed the destruction of the town, for it is never mentioned again after this date. Considerable ruins alone recall the existence of the ancient Ḥammādī capital. They lie about 20 miles S. of Burdj Bū 'Araridj, on the southern slope of the Djabal Maadid, in the N. of Hodna, at a height of 3600 feet and occupy the summit of the cliffs which command the right bank of a tributary of the Wādī Selmān. The mināret of a mosque is still standing. Excavations made by P. Blanchet (1898) and again in 1908 by General de Beylié have made it possible to trace the wall and recognise the remains of various buildings: the Dār al-Bahr, so called, perhaps, from a tank there, the palace of the Signal, the palace of Bliss and the mosque. Fragments of decoration, painted terracottas, stalactites of faience, faiences of metallic lustre, and capitals have been brought to light. The study, which has been made of them, leads to the conclusion that Berber art before the Hilālī invasion was in great part Oriental in its inspiration and is revealed as a combination of Persian and Mesopotamian elements with local Byzantine art.

ḲAL'AT DJA'BAR. See DJA'BAR, I, 985.

ḲAL'AT HUWĀRA, a town in Algeria (department of Oran, a mixed commune of Mina) 20 miles N.E. of Mascara, on the Wādī Ḳal'a, one of the branches of the Hillil. Population (1911): 2072 inhabitants, of whom 2047 natives. Carpet-making, at one time a flourishing industry here, still employs 500 workmen, although on the decline.

Ḳal'a was founded in the vith (xith) century by Muḥammad b. Ishāk, chief of the Huwāra, living in the region of Mina. He built a citadel and gathered round it his tribesmen as well as the Masrāta, a Berber clan related to the Huwāra. Ishāk's descendants were faithful servants of the 'Abd al-Wād of Tlemcen and as a reward received the government of the land of the Tūdjīn. After the occupation of Tlemcen by the Marīnids (759 = 1358), the people of Ḳal'a recognised the authority of the conquerors, then passed again under the rule of the sovereigns of Tlemcen after the restoration of the Ziyānid dynasty. In the xvth

century Arūdī seized the town (1517) and placed a garrison of 400 men there under his brother Ishāk. Retaken in 1518 by the Spaniards, Ḳal'a was restored by them to the Sulṭān of Tlemcen and passed finally to the Turks towards the middle of the xvth century. It is described by the writers of this period (Leo Africanus, Marmol) as one of the principal places in the land of the Banū Rāshid (the Beni Rasi of Leo, the Beni Arax of Marmol). According to these authors, Ḳal'a was a very strong place inhabited by merchants and well-to-do artisans. During the Turkish period, Ḳal'a frequently served as a place of refuge for Beys and Turkish officials, as well as for numerous families from Oran and Algiers, so that about 1830, the population was in great part composed of Ḳuloghlu, i. e. of half-castes born of the marriages of Turks with native women. On various occasions the town has suffered from earthquakes but it was, on the other hand, greatly extended by the Bey of the West, Bū Shelāghem in 1736. The population was employed in agriculture and industry (manufacture of soap and especially the weaving of carpets). After 1830, Ḳal'a recognised the authority of 'Abd al-Ḳādir, who drove out the Ḳuloghlu, and was in 1845 occupied by the French. Ḳal'a was the birth-place of the celebrated marabout Sidī Aḥmad b. Yūsuf (ixth cent. A.H.), to whom are attributed satirical sayings very popular in Algeria (Cf. R. Basset, *Les dictons populaires attribués à Side Ahmed ben Yūsuf*, Paris 1890).

ḲAL'AT NADJM, the name of a celebrated citadel in Northern Syria, on the right bank of the Euphrates in 36° 53' N. Lat. and 38° 18' E. Long. (Greenwich). Its importance lay in the fact that it commanded the passage of the river here, where it was crossed by a bridge. It was here that a caravan route from Syria to Mesopotamia, much used in the middle ages, crossed the river. The route ran from Ḥalab via al-Bāb [q. v.] to Manbidj, thence in a fairly straight line to the Euphrates, then across the river in a slightly north-eastern direction to Ḥarrān. The distance from Manbidj to Ḳal'at Nadjm is given as 4 farsakh (a short day's journey), that from the Euphrates to Ḥarrān as 2 days' journey. As there are two small islands in the river at Ḳal'at Nadjm, a passage is very easily effected by a short bridge of boats.

In the middle ages Ḳal'at Nadjm was the bridgehead of Manbidj (the ancient Bamyke; cf. MANBIDJ), a very busy emporium, which the Caliph Ḥārūn al-Rashid had raised to be the capital of the 'Awāṣim province [q. v., I, 515]. So long as Manbidj flourished, Ḳal'at Nadjm retained its importance; with the decline of Manbidj — by the xvth century A. D. Manbidj was already for the most part in ruins; see G. le Strange, *Palestine under the Moslems* (London

1890), p. 501 — the importance of Kał'at sank also, for traffic across the Euphrates turned more and more to the northern crossing at al-Bira (Biredjik; q. v., i. 723). In ancient and mediaeval times there were in the central Euphrates, below where it breaks through the Taurus, a series of places where bridges maintained the connection between Syria and Mesopotamia; on these crossings, some of which succeeded others in course of centuries, see the references in the article BIREDIK (i. 723). Whether there was already a bridge in ancient times at Kał'at Nadjm and whether the isolated hill commanding the ford was already inhabited or defended, we do not know. But it is very probable that a place so favoured by nature was used long before the coming of the Muslims. What ancient town is to be sought on the site of Kał'at Nadjm or the immediate vicinity can hardly be decided with certainty. Most probably we have to locate here the Caeciliana of the Roman itineraries (*Kaivilia* of Ptolemy); cf. the article Caeciliana in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, ii. 1172 and Streck's addition in Suppl. i. 266; Regling in *Klio*, i. 472; V. Chapot, *La frontière de l'Euphrate* (Paris 1907), p. 281; H. and R. Kiepert, *Formae orbis antiqui*, part v. (1910); L. Bell, *op. cit.* (see the *Bibl.* there), p. 23. Ainsworth, *op. cit.*, p. 224 sought Caeciliana in the ruined site of Sarisat (Srēsāt on Kiepert's map in Sachau (*op. cit.*), north of the Sadjūr river, whereas the map of Syria and Mesopotamia published on a scale of 1:400,000 by the cartographical department of the Prussian Survey, sheet 1b. (Halab) seeks to identify the ancient place in question with the modern Khirfān (Djabal al-Hamām, a little N.W. of Kał'at Nadjm). Less commendable than the identification of Caeciliana with Kał'at Nadjm seem to me the other identifications that have been proposed: namely with Betammali (Bethammaris), as Benzinger suggests in Pauly-Wissowa, *op. cit.*, iii. 362 (adopted on the above mentioned map of Mesopotamia and Syria, 1:400,000) (see thereon my additional note in Pauly-Wissowa, Suppl. i. 269), also with Callicome (so d'Anville, *L'Euphrate et Tigre*, Paris 1779), on which see my article on this name in Pauly-Wissowa, Suppl. i. 270. The Thilaticomum of the *Itinerarium Antonini* and the *Tabula Peutingeriana* was suggested by Mannert, *Geogr. d. Griech. und Römer*, vi. 1 (Leipzig 1831), p. 394, 397 and Ainsworth, *op. cit.*, i. 224. Nöldeke proposed (*op. cit.*, p. 13) the Gerre (Gerrha, Serre) of Ptolemy and the itineraries (see the article Gerre in Pauly-Wissowa, vii. 1270); on what are perhaps its ruins see Chapot, *op. cit.*, p. 282. Finally it should be mentioned that Chesney in *Expedition for the Survey of the Rivers Euphrates and Tigris* (London 1856), i. 420 and in *Narrative of the Euphrates Expedition* (London 1868), p. 234, wrongly would find Dijsr Manbidj — which, as will be emphasised immediately, is only an older name for Kał'at Nadjm — in the Kara or Büyüik Manbidj, 10 miles to the south of it (which Nöldeke, *op. cit.*, p. 14 considers the Eragiza of the classics, Regling in *Klio*, i. 471 Betammali).

Al-Balādhuri (*Futūh al-Buldān*, ed. de Goeje) p. 150, 15 *sgg.* (excerpted by Yāqūt, i. 478, 8 *sg.*) especially mentions that the bridge of Kał'at Nadjm was built by the Caliph 'Othmān, but

expressly adds that, according to some, traces were still to be seen of an older bridge, which would seem to prove the existence of a river-crossing here, dating back to pre-Muhammadan times. Al-Balādhuri, however, does not call the place Kał'at Nadjm but Dijsr Manbidj, "the bridge of Manbidj". The older Arab geographers and historians know it only by this name. Even if the name Kał'at Nadjm perhaps only begins to appear in Arabic literature from the xiith century A.D. (to judge from the references quoted), it is clear from an important passage in the Halabī chronicle (not written, however, till the xvth century) of Ibn al-Shihna (*al-Durr al-Muntakhab fi Tu'rikh Mamlakat Halab*, Beirut 1909; cf. on this work above II, 236) that its origin must be put back to the tenth century. Here it is stated (p. 230), that Kał'at Nadjm was long ago called Dijsr Manbidj, and remained a little village in the Muslim period until it was refounded by a certain Nadjm, a slave (*ghulam*) of Ḥubbā al-Šafwanī, about 300 A. H. (912 A.D.). From this Nadjm comes the new name Kał'at Nadjm (N.'s citadel), which in time quite supplanted the earlier name Dijsr Manbidj. Similar changes of place-names occurred elsewhere in Syria and Mesopotamia in the middle ages; for example the strong castle of Kał'at Dawsar, which rose farther down the Euphrates on the left bank between al-Bālis and al-Raḡḡa, received the name Kał'at Dja'bar [see the art. DJA'BAR] after the Arab chief Dja'bar b. Mālik (in the xiith century A.D.) had taken possession of it.

The passage quoted from Ibn al-Shihna's history further shows that the form Kał'at al-Nadjm and the translation of the name founded on this as "the star-castle", which have become quite familiar in European literature (and therefore also on maps: Kał'at en-Nedjm), are wrong. The Arabic sources, moreover, show, so far as we can see, almost always the correct Kał'at Nadjm; the Syrians reproduce this by Kał'a Nagam, e.g. Barhebraeus, *Chronicon Syriacum* (ed. Bedjan), p. 509, 23. If the reading Kał'at al-Nadjm is occasionally also found in our editions of the texts — e.g. in Yāqūt, iv. 165, 8 (against iii. 860, 22; *al-Mushtarik*, p. 357, 2, *al-Marāsid*, ii. 443, 2) and al-Kazwīnī, ii. 160, 23 — it would still have to be investigated whether the manuscripts really support this reading. At the same time we do not deny that later Arabic writers, in ignorance of the origin of the name of the place, occasionally may have written Kał'at al-Nadjm and this may have given the etymology "star-castle". For example, Ibn al-Shihna (*op. cit.*, p. 229) gives a passage from a *risāla* of the ḡadī al-Faḡīl [q. v.], in which the latter explains the name of the fortress in poetical fashion as "a star in the clouds", "an eagle in the sky". Similarly Ritter (*op. cit.*, x. 1062, following J. v. Hammer) writes: "The castle is said to have taken its name from its height, reaching up to the stars". Lastly Ainsworth (*op. cit.*, i. 229) takes the name Kał'at al-Nadjm back to al-Ma'mūn, who is said to have built an observatory here. That the Caliph had observations of the heavens made in the region between Palmyra and al-Raḡḡa on the Euphrates is certainly true (cf. above i. 498^b), but his responsibility for the doubtful place-name is to be denied, after what we have said above. In this connection it may also be pointed out that we have several places called

Kawkab (= star) in Nearer Asia, for example one in Northern Syria, but an identification of the latter with Kał'at al-Nadjim, "the star-castle", which R. Röhricht, *Gesch. des Königreiches Jerusalem* (Innsbruck 1898), p. 237, note 3 proposes, is impossible. It is noteworthy that Ḥamd Allāh Mustawfī (*Nuzhat al-Kulūb*, ed. G. Le Strange, vol. i., Leiden 1915, p. 103, 22) says that the citadel of Ḥarrān was called Kał'a-i Nadjim. As there is no confirmation of this in Arabic sources, this must be an error of the author's.

The citadel and the bridge of Kał'at Nadjim play a not unimportant part in the history of the wars of Islām. Soon after their invasion of Syria the Arabs occupied this region (in 18 = 639), the Euphrates villages, as al-Balādhurī (p. 175, 9) calls it. In the accounts of the fightings between 'Alī and Mu'āwīya, which led in 657 A. D. to the battle of Siffin (on the right bank of the Euphrates opposite Kał'at Dja'bar already mentioned) the bridge of Kał'at Nadjim is frequently mentioned; cf. e. g. al-Ṭabarī, i. 3259, 15 sq. and Ibn Miskawaih, *Tağārīb al-Umam* (Gibb Mem. Ser., i. N^o. 7), i. 571, 7. When 'U-baid Allāh b. Ziyād took the field against Mukhtār in 65 (685) in the 'Irāk, he crossed the Euphrates by this bridge; see Wellhausen, *Das Arabische Reich und sein Sturz* (Berlin 1902), p. 115. In 330 (941) after the murder of Ibn Rā'ik (on whom see above ii. 407) there was fighting here between the latter's troops and those of the Ḥamdānid Nāsir al-Dawla; see *Zeitschrift d. Deutsch. Morgenl. Gesellsch.*, x. 470. The citadel of Kał'at Nadjim changed hands several times then as in later centuries; we find as its possessors, in turns, the Ḥamdānids, the Mirdāsids of Ḥalab (cf. above ii. 229 sqq.), the Banū Numair (see Ibn Ḥawkal, p. 159, 19; Ibn al-Shihna, *op. cit.*), Sulṭān Nūr al-Dīn al-Zankī (1146—73) and his successors in Syria, the Ayyūbids. Nūr al-Dīn (according to Abū 'l-Fidā', *Taḳwīm al-Buldān*, ed. Paris, p. 233) renovated the castle — on which account Ibn Djbair, who passed it two or three decades later, calls it "a new citadel" — and placed a strong garrison in it, which was very troublesome to the neighbouring Syrian towns occupied by the Franks. Kał'at Nadjim was also for a time in the hands of the Begteginid princes of Irbil (on them see above ii. 591). After the death of Salāḥ al-Dīn (1193) his sons and grandsons (al-Malik al-Afdal, al-Malik al-Zāhir, al-Malik al-'Aziz) and his brother (al-Malik al-'Ādil) several times succeeded one another in the possession of the town (cf. above vol. i., ii. and Yāqūt, iii. 165, 18; Abu 'l-Faradj (Barhebraeus), *Ta'riḫ Mukhtasar al-Duwal*, ed. Beirut, p. 393, 11; Abu 'l-Fidā' (ed. Reiske-Adler), iv. 109, 189; Weil, *Gesch. der Chalifen*, iii. 435).

When Hulāgū in 658 (1260) began his campaign against Syria (cf. above II, 332), he had to fight for the Euphrates crossings and the forts defending them; see Barhebraeus, *Chronicon Syriacum* (ed. Bedjan), p. 509, 23. Barhebraeus, who was then bishop of Ḥalab, and went to meet the Mongol ruler to beg that the Christians be spared, was shut up by him in Kał'at Nadjim (see *op. cit.*, p. 510, 17).

On the topography of Kał'at Nadjim and the present condition of the castle there, we have various accounts by European travellers, e. g. by Helfer and Ainsworth (on their visit together in

1836), Sachau (1879), M. v. Oppenheim (1896) and Miss Gertrude L. Bell (1909). According to their descriptions, the rocky cone about 160 feet high stands quite alone, crowned by the picturesque ruins of the citadel, falling steeply towards the river and fairly difficult of ascent on other sides also. All parts of the castle are still standing upright and are quite well preserved. Two stories are distinguished with an agglomeration of rooms of various sizes. The only parts damaged are those which were bombarded during the taking of the castle by Turkish troops about 1820. When at this time an Arab tribe refused tribute to the government and took refuge in this stronghold, the soldiers of the Pasha had to besiege and storm it, and a large gap was made in the wall in the process. A peculiar feature of Kał'at Nadjim are its not yet fully investigated caves and subterranean passages, which, according to the Arabs, run through below the Euphrates to the Mesopotamian side (compare the Oriental stories about a similar system of tunnels made by the Queen Zenobia in Fr. Müller, *Studien über Zenobia und Palmyra* (1902, p. 37). Kał'at Nadjim is now quite deserted and forms a refuge only for countless wild pigeons and bats. According to Sachau, there are still three Arabic inscriptions here. One of them is carved out over the main gateway which is flanked by two high towers and gives an account of the restoration work done by the Ayyūbid al-Malik al-Zāhir in 605—612 (1208—1215); beside it, is a second one which gives the name of the architect. A third inscription of the same ruler (of 1215 A. D.) may be read over the door of what was once the little mosque of the castle.

According to the Arab geographers (Ibn Djbair, Yāqūt, al-Qazwīnī, *al-Marāsid*), a little town lay below the castle rock, probably at the river's edge, which served as a market for the numerous travellers as well as for the Beduins of the surrounding desert. The remains still in existence of buildings of an earlier period at the foot of the hill on the south cannot, as Sachau observes, be considered the remains of a town on account of the way in which the ground is cut up; but the Muslim cemetery in the vicinity with the ruins of two buildings (mosques or chapels) may mark the site of the small mediaeval village. At the present day there is no bridge there. Whether traces of any earlier ones can be found seems very doubtful. Chesney (*Expedition*, i. 420; *Narrative*, p. 230; see above) has, it is true, thought to discover remains of one and M. v. Oppenheim claimed to find traces of old bridges in no less than three places (see *Berliner Zeitschr. für Erdkunde*, xxxvi. 80 sq. and *Byzant. Zeitschr.*, xiv. 1905, p. 7), but according to Chapat (*op. cit.*, p. 281, note 7), who likewise examined the area in question, there is nowhere any trace of such remains to be seen.

A little to the south of Kał'at Nadjim, but on the left bank of the stream, there lies close to the Euphrates a mound of ruins, part of which has at one time been swept away by the river, called Tell Mas'ūdīya, out of which M. v. Oppenheim dug a large ancient mosaic of the river-god Euphrates; see *Byzant. Zeitschr.*, xiv. (1905), p. 7 and Moritz in the *Beitr. zur Assyriologie*, vii./ii. 1913, p. 158. Also on the east bank opposite Kał'at Nadjim there lies a very winding system

of hills, called *Djabal Šarrin* after the ancient ruined site of Šarrin. S.E. of the latter (N.E. of Tell Mas'ūdiya) rise two great grave-towers, one of which has in the second story a porphyry sarcophagus with the oldest known inscription in pure Syriac (73 A.D. = 385 Seleucid era). This monument of an Edessa man named Ma'nu bar Ma'nu, with inscriptions relating to the building and to the deceased, is of great value from the linguistic as well as the palaeographical side. M. v. Oppenheim and H. Pognon found and copied it independently; cf. Pognon's publication and edition of the text in his *Inscriptions Sémitiques de la Syrie* (Paris 1907—1908), p. 15—22 (and Pl. xiv.) and see thereon Nöldeke in the *Zeitschr. f. Assyriol.*, xxi. 151—153. The edition of the text by B. Moritz in the *Beiträge zur Assyriologie*, vii./ii. 1913, p. 158—165 is based on v. Oppenheim's material. The ancient names of Tell Mas'ūdiya and Šarrin are unknown; perhaps it was one of the above mentioned stations in the itineraries (Gerre or Thilaticum).

KA'LAT AL-RŪM. See RŪM KA'LA.

KA'LAT SHERKAT, an extensive group of ruins in the wilāyet of Mōsul, on the right bank of the Tigris in 35° 30' N. Lat. and 45° 15' E. Long. (Greenwich). They rise on the edge of the desert on the sharp spur of the hilly lands, cut up by many valleys, which slope from the ridge of the

Khanūka mountains, an eastern spur of the Djabal Hamrīn, down towards the Tigris. The name Ka'lat Sherkat is not found in the Oriental writers of the middle ages nor, so far as I can see, in those of later centuries either. Whether the spelling *ת(ר)אשר* = *Ashshur* *SH R (D) T (?)*, which is found in Aramaic inscriptions of the Parthian period, is really connected with Sherkat, as Jensen (*Mitt. der Deutsch. Orient-Gesellsch.*, n^o. 60, p. 46) supposes, is very doubtful. Perhaps the name Sherkat — not Sherkat; cf. Streck, *Die Inschriften Assurbanipals* (Leipzig 1916), p. 792 — only dates from the xviiith century A.D.; in the literature of European travellers it seems to appear first about the time of Rich (1821). The meaning (? a personal name) is quite unknown. The Turks also give the place the name (often found where Turkish is spoken) of *Toprak-Kal'e* = "Earth-citadel", which is without significance; cf. Rich, *op. cit.*, ii. 137 sq.

Ka'lat Sherkat occupies the site of the oldest capital of the Assyrian empire, the city of Ashshur, from which the whole district ruled by it also took the name Ashshur (Assyria), while the city itself apparently derived its name from the national deity of this name (hardly the reverse). The site offers many advantages for an effective defence and was presumably planned by the inhabitants of southern Mesopotamia (Babylonia) as a military bulwark against the inroads of northern barbarians. That Ka'lat Sherkat was fortified in the archaic period has been shown by the excavations of the Deutsche Orientgesellschaft. These further show that the Semitic settlement was preceded by a non-Semitic (Sumerian) occupation; Sumerian sculptures have been found which are closely connected with those from Telloh in South Babylonia (about 2600 B.C.). In the time of the third Babylonian dynasty of Ur (2296—2786 B.C.), Ashshur was a small state dependent on Babylonia. The beginnings of Ashshur may safely be put back to 3000 B.C. and perhaps even farther; thereon cf., most recently, Weidner in *Boghazköi-Studien*, Heft 6 (*Der Zug Sargons von Akkad*, Leipzig 1922), p. 96. Some not inconsiderable time before 2000 B.C. an end was made of the Sumerian colonisation of Ashshur by the invasion of the Semites.

The numerous historical inscriptions, which were brought to light by the excavations of the Deutsche Orient-Gesellschaft in Ka'lat Sherkat have extended in a most unexpected fashion our knowledge of the history of the city and kingdom of Ashshur, especially with regard to the older periods. Its chronology now begins about 2300 B.C. or even earlier. From Puzur Ashir I (2086—2072) to the fall of Nineveh, with the help of the dynastic lists of Ashshur, we can restore the series of rulers without a gap; cf. E. Weidner, *Die Könige von Assyrien. Neue chronol. Dokumente aus Assur*, in the *Mitt. der Vorderasiat.-Aegypt. Gesellsch.*, xxvi. (1921), n^o. 2; with the chronological list of the kings of Ashshur given there (p. 64 sq.) compare the (somewhat later) list given by Schroeder in *Keilschrifttexte aus Assur historischen Inhalts*, Heft 2 (1922), p. 101 sq.

Ashshur retained its place as capital down to the middle of the tenth century B.C. Older rulers built other towns as royal residences, but only temporarily, for example Salmanassar I (1280—1261) chose Kalkhu (Bibl. Hebr. Kālāh) farther to the north at the mouth of the upper

Zāb for his capital and his son and successor Tukulti Ninurta I (1260—1232) built a new capital for himself in the immediate vicinity of Ashshur to the northeast of it, which he called after himself Kār ('wall, citadel of') Tukulti Ninurta (now the ruins of Tūlūl 'Akr). After their death both these towns again lost their predominance to Ashshur. It was only from the tenth century onwards that the latter became more and more overshadowed by Kalakh and Nineveh and the later kings chose these two places only as the centres of their kingdom. Ashshur survived the fall of Nineveh, however; cf. Streck, *op. cit.*, CDXLV and note 3 and p. CDLIX, note 1. It is mentioned in the proclamation of Cyrus to the Babylonians, which is preserved in cuneiform. During the greater part of the Graeco-Roman period, especially in the 400 years of the Parthian epoch (which is represented by countless remains of buildings), it was an inhabited town, and as such — under other names (Kainai; perhaps also Labbana and Libba) — it is several times mentioned by classical authors; thereon cf. E. Herzfeld in *Memnon*, i. (1907), p. 98 sq., 237 sq. In the Parthian strata of the ruins of Kal'at Sherkāṭ 43 Aramaic inscriptions, mainly in memoriam, were found, which, in so far as they were dated, cover the period of the Seleucid (Arsakid?) era (199/200—227/228 A.D.), i.e. they cease just with the rise of the Sassanians. An interesting fact is also to be deduced from these documents, that the cult of Assyrian deities and names of gods still survived in Ashshur in the third century A.D. On these inscriptions cf. Jensen in the *Sitzungsberichte der Berliner Akademie*, 1919, liii. 1042—1051, and in the *Mitt. d. deutsch. Orient-Gesellsch.*, 1920, n^o. 60.

The name Ashshur appears in the Aramaic form Athūrā as early as the old Persian version of the Behistūn inscription; see Weissbach, *Die Keilinschriften der Achaemeniden* (= *Vorderasiat. Bibl.*, iii.), p. 140. By Athūrā we have here probably not to understand the whole of Assyria but only the district of Ashshur. The classical authors give the Aramaic equivalent of Ashshur in the form Ἀσσορία, Ἀσσορία; see Pauly-Wissowa, *Realencykl. d. klass. Altertumswissensch.*, ii. 2260; Herzfeld, *op. cit.*, i. 127. Ashshur presumably became more and more deserted under the Sassanians. The Syriac authors know of Athor down to the late middle ages as the name of a parish; see G. Hoffmann, *Auszüge aus syrisch. Akten persischer Märtyrer* (Leipzig 1880), p. 175, 210.

The Arab geographers of the middle ages likewise are acquainted with Athūr. It is given by them firstly as an earlier name of Mōsul, then as the name of the province which was later usually called al-Djazīra and finally as the name of a ruin near al-Salāmiya (probably the Biblical Resen, 2½ miles N.W. of Nimrūd, the ancient Kalākh; cf. Streck, *op. cit.*, p. CDXXVI). Sometimes Akūr is written instead of Athūr and sometimes the one, sometimes the other noted as a variant. Akūr is either to be regarded as a corruption or, perhaps better, as a parallel dialect form. Cf. for Athūr or Akūr: Ibn Rosteh in the *Bibl. Geogr. Arab.*, vii. 104, 6 (arḍ Athūr, "land of A." = Mōsul); Yāqūt, *Mu'djam* (ed. Wüstenfeld), i. 119, 16, 340, 5, iii. 118, 18. For the Djazīrat Akūr see Yāqūt, *Mu'djam*, ii. 72, 13, 231, 9; this coincides with the Iklim Athūr (Akūr), the Kalma (region

of) A., of which only al-Mukaddasī (*Bibl. Geogr. Arab.*, iii. 20, 3; cf. also 27, 10, 28, 7) speaks and which, according to him, is divided into three large divisions. On (Dj)azirat Akūr as an older name for Djazīra see above i. and G. Le Strange, *The Lands of the Eastern Caliphate* (Cambridge 1905), p. 86.

From the statements of the Arab geographers this much is evident that in the middle ages a ruin was still known which covered the site of the ancient Ashshur; only the name had been erroneously connected with a deserted locality near al-Salāmiya. It may here be recalled that, according to Layard, *Nineveh and Babylon* (London 1853), p. 165, the Arabs at the present day call a high hill in the corner of the ruins of Nimrūd (Kalākh) 'Tell Athūr'. The Arab geographers further make the observation, which is quite correct, that the earlier name of the province of al-Djazīra, which, indeed, practically coincides in area with the ancient Assyria, is derived from the deserted town of Athūr. When Athūr ultimately came to be erroneously regarded as the ancient name of the later capital Mōsul, we have a false identification here similar to the case of Baghdād, which western travellers throughout the middle ages down to Pietro della Valle (1616—17) equated with Babylon and always called so.

On the Arabic names Athūr or Akūr cf. also A. Schultens, *Vita et res gestae... Saladini* (Leiden 1755), *Ind. Geogr. s. v. Mosula*; Fr. Tuch, *De Nino urbe* (Leipzig 1845), p. 16 sq.; Tuch's *Kommentar über die Genesis*, 2nd ed. by Merx (Halle 1871), p. 61 sq.; Layard, *Nineveh and its Remains*³ (London 1849), ii. 245.

The ruined area of Kal'at Sherkāṭ is of considerable extent (nearly 180 acres), very little smaller than that of the two other royal cities of Assyria, Kalāh (Nimrūd) and Nineveh (Ḳuyundjik). It is sharply defined; there is no doubt on any side as to how far the ancient city reached. The Tigris flowed along the east front; the north front was formed by a natural ledge of rock, which was strengthened by defensive walls and made inaccessible. On the finest part of Ashshur, in the eastern part of the north plateau, the Shammar Shēkh Ferhān Pasha in the second half of the sixteenth century founded a settlement which later became a Turkish outpost, which until the Great War served as barracks for troops of regular cavalry or mounted police. Apart from this temporary use as a military post by the government, Kal'at Sherkāṭ has been quite uninhabited since the memory of man.

The extensive ruins early excited the interest of European travellers. Their importance was first emphasised by Cl. Rich, who examined them carefully on a Tigris journey in March 1821; see his *Narrative of a Residence in Koordistan* (London 1836), ii. 137 sq. In 1836 Ross visited them; see a communication by him in the *Journ. of the Royal Geogr. Society*, ix. (1839), p. 451—453. The first thorough description of the site we owe to W. Ainsworth. He visited it along with Layard and Mitford in 1840 when on an excursion to al-Hadr [q. v., ii. 204] (the caravan road to al-Hadr branches off at Kal'at Sherkāṭ; see his report in the *Journ. of the Royal Geogr. Society*, xi. (1842), p. 4—8). Layard again in 1847 spent two days at Kal'at Sherkāṭ, engaged in examining the ruins; see Layard, *Nineveh and its Remains*³,

ii. 45—63. Later (1852) H. Rassam conducted excavations on the spot; on these cf. Layard, *Nineveh and Babylon* (London 1853), p. 581 and H. Rassam, *Ashur and the Land of Nimrod* (New York 1857), p. 1321.

A systematic examination of the whole system of ruins was first effected between Sept. 1903 and June 1914 by excavations of the Deutsche Orientgesellschaft which extended over practically the whole site of the town. Accurate plans were made of all parts examined. As the excavations proved, the kings Tiglathpileser I (1115—1103) and Salmanassar III (859—825) in particular displayed very great activity in building at Ashshur; the latter renovated completely almost all the great works of his predecessors. The most prominent buildings within the town are the great temples — the sanctuary of Ishtar, the oldest of all, showing a Sumerian stratum below it, then the Ashshur temple, also of very great antiquity, called E-Kharsag-kurkurra with a great temple tower (*sikkuratu*) belonging to it, and lastly the sanctuary of Anu and Adad. Besides there was a series of smaller temples; of special interest is a "New Year Festival House", a work of Sanherib (705—682), discovered before the city gates. Palaces also were uncovered; but we have not yet detailed information regarding them. The powerful fortifications (double wall, Tigris-quay, wall and citadel) with which the Assyrian rulers protected their capital are most impressive. Among the monuments brought to light in great number special mention should be made of two rows of steles with reliefs and inscriptions (one north of kings and one south of officials), which belong to the xiv—viii centuries and are of fundamental importance for our knowledge of Assyrian history. The topographical and archaeological investigation of the site has, at last, also given us a clear picture of the extent and significance of the erstwhile "city of the Parthians" (we have to distinguish two periods of Parthian building).

An exhaustive work on the topography and history of Ashshur based on the German ten years' excavations on a large scale is not yet available. For the present we have only the official reports, almost all by W. Andrae, the leader of the German expedition in Assyria, published in the *Mitteilungen der Deutschen Orient-Gesellschaft*, N^o. 20—22, 25—26, 28—29, 31—33, 36, 38, 40, 42—45, 47—49, 51 and 54. On two of the principal temples, on the fortificatory works and the rows of steles, Andrae has published monographs in the *Wissensch. Veröffentl. der Deutsch. Orient-Gesellschaft*, namely: *Der Anu-Adad-Tempel in Assur* (Leipzig 1909; = *Wissensch. Veröffentl.*, N^o. 10); *Die Stelenreihe von Assur* (1913; = *op. cit.*, N^o. 24); *Die Festungswerke von Assur* (1913, 2 vols.; = *op. cit.*, N^o. 23); *Die archaischen Ištar-Tempel in Assur* (1922; = *op. cit.*, N^o. 39).

The yield in inscriptions from the excavations in Ashshur has been very rich and exceedingly important. They have to a very great extent extended our knowledge of Assyrian chronology, history and religion. The publication of the texts is likewise being done in the *Wissensch. Veröffentl. der Deutsch. Orient-Gesellschaft*; so far there have appeared: *Keilschrifttexte aus Assur historischen Inhalts*, 2 parts, Leipzig 1911 and 1922, ed. by

Messerschmidt and Schroeder (= *Wissensch. Veröffentl.*, N^o. 16 and 37); *Keilschrifttexte aus Assur religiösen Inhalts*, ed. by Ebeling, vol. i. 1915—1919 (= *op. cit.*, N^o. 28), vol. ii. (part 1—2), 1920 (= *op. cit.*, N^o. 34); *Keilschrifttexte aus Assur verschiedenen Inhalts*, ed. by Schroeder, 1920 (= *op. cit.*, N^o. 35); *Altaramäische Urkunden aus Assur* (dating from the latest period of the Assyrian empire), ed. by Lidzbarski 1921, *op. cit.*, N^o. 38.

Bibliography: Apart from the references already given we may mention the following: Ritter, *Erdkunde*, xi. 666 sq., 671—676; Fr. Delitzsch, *Wo lag das Paradies?* (Leipzig 1881), p. 252—255. Delitzsch also in 1903, before the beginning of the German excavations, drew up a sketch of the history of the town (especially its buildings) based on the inscriptions then known, in the *Mitteilungen der Deutsch. Orient-Gesellschaft*, N^o. 20, p. 30—36; M. v. Oppenheim, *Vom Mittelmeer zum persischen Golf* (Berlin 1900), ii. 203—210; E. Herzfeld in *Mennon*, i. (1907), p. 97—116, 231 sq., 237; M. Streck, *Die Inschriften Assurbanipals* (Leipzig 1916), iii. 773; B. Meissner, *Babylonien und Assyrien*, i. (Heidelberg 1920), *passim* (see Index), esp. p. 12 sq., 33 sq., 300 sq. — The best map of the region of Kał'at Sherkāṭ is the one of Mesopotamia and Syria published by the cartographical department of the Prussian Survey on the scale of 1:400,000, sheet 4 C (Sāmarrā). The latest plan of the ruins of Ashshur is given by Andrae in his *Die Festungswerke von Assur* (1913), Plates i. and iii. On the flora of Kał'at Sherkāṭ and district E. Herzfeld writes in the *Orientalist. Literaturzeit.*, Suppl. ii., Berlin (1908) on the basis of the collection made by him as a member of the German expedition in Ashshur in 1903—1905 and (somewhat enlarged) in Sarre-Herzfeld, *Archaeolog. Reise im Euphrat und Tigrisgebiet*, iv. (Suppl. Berlin 1920), p. 25—26. He gives the plant-names in the dialect of the half nomadic Djebbūr Arabs of the district. (M. STRECK)

KAŁATA. See CONSTANTINOPLE, I, 867.

KAŁĀ'UN, AL-MALIK AL-MANŠUR SAIF AL-DĪN ABU 'L-MA'ĀLI AL-ALFI (the "Thouander", a name, it is said, given him because he was bought for 1000 pieces of gold) AL-ŠĀLIHĪ AL-NAḌJMĪ, the sixth Sultān of the Bahri [q. v.] Mamluks, born in Kıpçāk [q. v.], was brought to Egypt, sold to Sultān Šālih Aiyūb [q. v.] and manumitted by him in 647 (1247). The beginning of his career is unknown. Under Sultān Baibars [q. v.] he became commander of a thousand. He later distinguished himself in a campaign in 671 (1272) against the Mongols by a skillfully executed passage of the Euphrates and again in 672 (1273) in a war against the Armenians. Sultān Baraka Khān, son of Baibars, sent him again against the Armenians in 677 (1278). When this Sultān was deposed a year later, the Emirs chose his seven-year-old brother al-Malik al-ʿĀdil Salāmish as Sultān and appointed Kałā'ūn his guardian and Atabek. In reality Kałā'ūn ruled and was mentioned in the Friday prayer and on the coins along with Salāmish; after three months Salāmish was deposed and Kałā'ūn in due form raised to the throne and confirmed by the Caliph. While he was at once recognised in Egypt, he had to fight a rival in Syria, the Emīr Šonkor al-Ashkar, who was chosen

Sulṭān in Damascus by the Syrian troops. Şonkor found support among the Beduins of Syria, as well as with the sons of Baibars, the deposed Baraka Khān, to whom on his deposition Karak [q. v.] had been given as an independent principality, and his brother Khidr, who occupied several fortresses in the southern part of Syria. Both sides gathered together their armies; there was a battle in the beginning of 679 (1279) south of Damascus, which was decided in favour of Kalā'ūn, as a result of the desertion of Damascus troops. Baraka Khān had died shortly before; his brother Khidr was glad to conclude peace with Kalā'ūn in the spring of the year 680, by which he was granted Karak as a fief. Şonkor had appealed for assistance to the Mongols and they, always ready for loot, had invaded Northern Syria, plundering as they went. When the Mongols were preparing for a second campaign on a larger scale, Şonkor, who had become afraid of his too ardent friends, had made peace with Kalā'ūn on condition that he was left the North Syrian fortresses of Şahyūn, Şhaizar, Apamea and several other places to rule independently. Freed from these opponents, Kalā'ūn was able to devote his attention to the invading Mongols, who were reinforced by Armenians, Franks and Georgians. The armies met at Hims. In spite of their superiority at first, the Mongols were defeated and had to withdraw from Syria. While the Sulṭān, as we have seen, was threatened from several sides, the Crusaders, who still occupied the greater part of the Syrian coast, had not decided to collect their full strength for a decisive effort. Only the Knights of St. John in the fortress of Marḳab had enticed the governor of Hişn al-Akrād [q. v.], who was approaching it, into an ambush and inflicted a severe defeat on him in a surprise attack; after the destruction of the Mongol army, they, like the Count of Tripolis and the Templars a year later, were content to have peace on favourable terms. An agreement was also made with the city of 'Akkā in 682 (1283). Kalā'ūn, however, punished the Armenians for the help they had given the Mongols, by invading their country and doing them great damage by plundering and ravaging it.

The Khān of the Mongols, Abākā [q. v.] died in 680 (1281); his successor adopted Islām, taking the name Aḥmad. Letters and embassies were exchanged between him and Kalā'ūn and although their relations did not result in an alliance, they were by no means unfriendly. In 683 (1284) Aḥmad was murdered. His successor Arghūn [q. v.] remained a pagan and favoured the Jews and Christians in his Empire. His plan was to induce the Pope and the king of France to cooperate with him in a crusade against Kalā'ūn. This scheme, however, did not materialise. The Sulṭān for his part entered into diplomatic negotiations with the republic of Genoa, with whom he concluded a commercial treaty; he had a kind of defensive alliance with king Alfonso of Castile and James of Sicily. Embassies were exchanged with the Byzantine Emperor, with the Emperor Rudolf of Hapsburg, the king of Yemen and the prince of Ceylon. The prince Tudan Mangū of Kıpçāk, who became a convert to Islām, obtained from Kalā'ūn, as the first ruler in Islām, a title and a standard with a coat-of-arms.

It was Kalā'ūn's aim to extend his rule over

the whole of Syria. To attain this end he did not hesitate to break his treaties with the Crusaders. For example at the beginning of 684 (1285) he fell suddenly upon the fortress of the Knights of St. John at Marḳab and undermined the walls so rapidly with his sappers, that the garrison had to surrender and depart. He adopted another plan to capture the stronghold of Maraḳīya, built in the sea near the coast and considered impregnable. It belonged to a vassal of Bohemund VII of Tripolis. Kalā'ūn pursued and threatened the latter so long that finally he bought it from his vassal, and let the Sulṭān dismantle it to appease him. Margaret of Tyre had to purchase peace with Kalā'ūn on humiliating terms. Having thus consolidated his position, he was able in 686 (1287) to think of depriving his old opponent Şonkor al-Ashḳar of his possessions in Syria. In the course of several campaigns he compelled him to give up his kingdom and retire to Cairo. He threatened Khidr, prince of Karak, so long that the latter finally yielded up his principality to him. In 688 (1289) he decided to capture Tripolis, the largest town still in the possession of the Crusaders. Prince Bohemund had died and his mother and sister were making claims on the vacant throne. The Sulṭān intervened in the quarrel and finally began the siege of the town. Although Tripolis received help from the sea, its position soon became desperate, so that the mother of the late ruler left the town with the Genoese and Venetian colony. With the help of his sappers the Sulṭān succeeded in undermining the walls and took the town by assault. It was for the most part destroyed and not rebuilt till a few years later, several miles from the sea on the bank of the river Qadisha. (From the Christian period date the great mosque, the Taīlān mosque, both formerly churches, and the foundations of the citadel). The stronghold of Baṭrūn, south of Tripolis, was shortly afterwards taken. This was Kalā'ūn's last feat of arms. When about to depart next year to besiege 'Akkā on the pretext that Muslims had been robbed and murdered by Christians there, he died quite near Cairo, just after starting for Syria. Besides his continuous campaigns in Syria he had also to wage war against Nubia. In two battles he was victorious against king Şhamāmūm but he could only maintain his authority there as long as his armies remained. He gained no permanent success in Nubia, although he succeeded in making king Şhamāmūm resume payment of the ancient tribute. He had frequently to take the field with full strength against the Beduins of South Palestine and Upper Egypt; it is a sign of his strength that he, unlike other Sulṭāns, was able to subdue the rebels completely. Kalā'ūn, on the whole, maintained his authority over the sacred city of Mecca, although the Sharif from time to time endeavoured to make himself independent.

Sulṭān Kalā'ūn succeeded in consolidating Mamlūk power in Syria and gradually made good the damage done by the incursions and ravages of the Mongols. We find his renovations on a grand scale in the citadels of Aleppo, Baalbek and Damascus. His most famous building is the hospital in Cairo in which there were large wards for the different illnesses, laboratories, kitchens, ample storerooms with provisions and medicaments. It was connected with a mosque and a school (see below). He was the only one of the Mamlūk

Sultāns to found a dynasty; his descendant in the fifth generation reigned till 783 (1382).

(SOBERNHEIM)

KAŁAWDHIYA, according to Yāqūt, *Muḍjam*, ed. Wüstenfeld, iv. 167 a fortress near Malatya, undoubtedly the ancient Claudia, which is mentioned as early as Pliny, *Historia Naturalis*, v. 85 as Claudiopolis, and under the later Roman Empire was one of the *castra praesidiaria*, the fortified permanent camps on the eastern frontier between Samosata and Melitene. It was taken from the Arabs and destroyed by Constantine V Copronymos, probably in 755 A. D., together with Malatya (al-Balādhuri, ed. de Goeje, p. 186 sq., Abu 'l-Fidā', *Ta'rikh*, under the years 133 and 138 of the Hidjra; Barhebraeus, *Kethābhā de Makhtebhānūt Zabhnē*, ed. Bedjan, Paris 1890, p. 122 below), but retaken and rebuilt by the Abbāsīd al-Manṣūr in 140 (757/758) (al-Balādhuri, p. 188 = Ibn al-Athīr, ed. Tornberg, v. 382; Abu 'l-Faradj, *Ta'rikh Mukhtaṣar al-Duwal*, ed. Ṣāliḥānī (Bairut 1890), p. 210, without giving a date; according to Yāqūt, *op. cit.*, in 141 A. H.) and the Christian population transplanted to Constantinople (Michael Syrus, *Kethābhā de Makhtebhānūt Zabhnē*, ed. Chabot, ii. 518, 522). In the first quarter of the tenth century the district of Melitene again passed under Byzantine rule and was not lost again until the Saldjuḳ invasion; in the tractate *περί παραβρομῆς πολέμου* (*de violatione bellica*) of the second half of the tenth century the place is mentioned under the name *τὰ Καλοδία* along with Melitene (Leo Diaconus, ed. Bonn 1828, p. 250). Armenian bands entered the district of Kaławdhiya and established themselves there in 1066 (Michael Syrus, *op. cit.*, iii. 158). The Byzantines were followed in their rule in these regions by the Dānīshmandoghlu and their rivals, the Saldjuḳs of Konya. In this period Kaławdhiya is repeatedly mentioned by the Syriac chroniclers, for the last time in the year 1273 (Michael Syrus, *op. cit.*, p. 304, year 1152, p. 400, year 1185; Barhebraeus, *op. cit.*, i. 522 = ii. 543, year 1257; *id.*, i. 549 = ii. 574, year 1273); among other things they report that in October 1152 the Euphrates overflowed its banks as the result of a great landslide and made a way out at the foot of the hills of K. (see Michael Syrus, *op. cit.*, p. 306 = Barhebraeus, *op. cit.*, i. 341, ii. 348). Hamdu'llāh Mustawfî, *Nuḣḣat al-Kulūb*, ed. Le Strange, p. 98 sq., knows K. under the name Erkaławdiya as a considerable fortified place in a fertile region, which produced corn, cotton, grapes and fruit plentifully; he thinks, like Yāqūt, that Ptolemaeus, the author of the *Almagest* came from there, and was therefore called al-Kaławdi.

With this the place disappears from history; for, although Ḥadīdjî Khalifa (xviith cent. A. D.) still mentions Erklūdiyā in his *Djihannumā*, p. 601, he only knows it from Hamdu'llāh Mustawfî and Otter, *Voyage en Turquie et en Perse* (Paris 1748), ii. 284 (beginning of the xviiith century) translates, as usual with him, only the statements of the Turkish geographer. The site has so far not been discovered; Ainsworth, *Travels and Researches in Asia Minor* (London 1842), i. 263 wishes to identify the ancient Claudias with the modern Klakhṭa [q. v.], which is, however, impossible because the Syriac chroniclers mention Kaławdhiya and Klakhṭa together contemporaneously as different places.

Bibliography: Runge in Pauly-Wissowa, *Realenzykl. des klass. Altertums*, s. v. Claudia; Tomaschek in the *Beitr. z. alten Geschichte u. Geographie, Festschr. für H. Kiepert* (Berlin 1898), p. 141; Vincent W. Yorke in *The Geographical Journal*, viii. (1896), p. 463 and 471. (J. H. MORDTMANN)

KALB, the dog, is also in Islām one of the "unclean beasts," primarily because its flesh may not be eaten (al-Nawawî, *Minḥādī al-Tālibin*, ed. v. d. Berg, iii. 312); and further because, according to the Ḥadīth, there are several special regulations regarding it. For example dogs render food which they lick impure and render unavailable water intended for ritual purifications (al-Bukhārî, *Wuḍū'*, bāb 33). Vessels, likewise, which have been licked by dogs, require to be cleaned several times, including once with sand. In a certain way they render impure the whole room in which they are; for angels do not enter a house in which there is a dog and Muḥammad had first to sprinkle the place on which a young dog had lain concealed with purificatory water before Djibril would appear to him (Muslim, *Libās*, trad. 31 sqq.). — Dogs "cut off the ṣalāt", i. e. they make the ṣalāt worthless when they come into the immediate vicinity of the man at prayer (Ibn Mādja, *Iḳāma*, bāb 30) and one is all the more inclined to attribute this rule to the impurity of the dog, as it also holds for menstruating women. The Arab commentators, however, explain it by saying that the dog frightens the worshipper and distracts him from his devotions (al-Sindî, commentary on Ibn Mādja as cited above). This is especially true of the black dog, for "he is Satan". This saying is either to be interpreted literally as meaning that Satan occasionally appears in the form of a black dog (cf. Faust) or it only means that black dogs in general are considered particularly dangerous. Dogs in general are considered noxious and should therefore be exterminated (al-Nasā'î, *Ṣaid wa 'l-Dhabā'ih*, bāb 9—14), but as "Allāh does not create anything in which there is not a trace of his wisdom" (al-Sindî, commentary on this passage), this rule is applied only to black dogs.

It is only permitted to keep dogs for hunting, for herding and for watching (al-Nasā'î, *op. cit.*); whoever keeps a forbidden dog has to forfeit a portion of his possessions daily (cf. *Babylon. Talmud, Shabbā'ih*, fol. 63a: "whoever possesses a dangerous dog keeps good fortune away from his house"). Dealing in dogs on the other hand is strictly forbidden (al-Bukhārî, *Buyū'*, bāb 25).

But in spite of its impurity and dangerousness

the Arabs are able to appreciate the good qualities and services of the dog. Muḥammad himself promises a woman a divine reward for a kindness, which she had done a thirsty dog (al-Bukhārī, *Wuḍūʿ*, bāb 33), and al-Kāẓwīnī (p. 403) characterises the dog as "a particularly intelligent, very useful animal, patient in hunger and on the watch, whose cleverness and fidelity are shown in many ways". Al-Kāẓwīnī describes very fully the symptoms of hydrophobia; cf. thereon *Babylon. Talmud*, *Yomā*, fol. 83b: "there are five symptoms in a mad dog; its mouth is open, its saliva runs, its ears have a foul smell, its tail lies limply on its hips and it wanders aimlessly along the sides of the streets".

The dog of the seven sleepers (Sūra xviii. 17) is a special matter. According to al-Baiḍāwī (ed. Fleischer, p. 557) it was a dog with the gift of speech, in al-Ṭabarī's view (*Tafsīr*, xv. 141, 1st ed. p. 131), a man in the form of a dog, but perhaps simply an ordinary dog. — On the dog-star (Sirius) see AL-KALB and AL-*SHIʿRĀ*.

AL-KALB, the Dog-Star in astronomy: *Ṣurat al-Kalb al-akbar* (the constellation of the Great Dog) and *Ṣurat al-Kalb al-aṣḡar* (constellation of the Little Dog) or also *Ṣurat al-Kalb al-Mutakaddim* (constellation of the fore-runner dog; προκυων), the former known as canis major and the latter as canis minor, two constellations of the southern heavens, the names and configuration of which the Arabs took out of *al-Madīstī* of Ptolemaios. Like the latter, the Arabs allotted 18 stars to the *ṣūra* proper of Canis Major, of which Sirius (*al-Shiʿra ʿl-abūr*) is of the first magnitude (actually 1.6), while outside of the constellation lie 11 stars, and to Canis Minor two stars of which Prokyon (α Canis Minoris, *al-Shiʿra ʿl-ghumaiṣā*) is also of the first magnitude (actually 0.5). As regards the stellar co-ordinates (latitude and longitude), the star-catalogues of ʿAbd al-Raḥmān al-Ṣūfī (d. 376 = 986) and al-Bīrūnī (d. 440 = 1048) are based entirely on the Ptolemaic *Almagest*, while the star-catalogue of Ulugh Beg prepared for the period 1437 contains numerous new definitions of star positions.

The name Dog-Star probably goes back to ancient Egypt where the modern Sirius (*σειριος* = burning, brilliant — with the addition of *Kéon* = Dog-Star) was called *Sopdet*, which undoubtedly became the Greek *Sothis*. The name of the star had originally nothing to do with dog, but in the Greek terracottas which are frequently found in Egypt, Isis, to whom the star was sacred, is often represented with a dog and (according to L. Borchardt) with a particular kind of dog, the so-called Arment (Erment)-dog. Sirius alone is also reproduced in terracottas in that way; sometimes

he also has a star above his head. According to Borchardt, it is not improbable that the star which appears in the star-tables from the Ramesid graves, which precedes or follows Sopdet, is the modern Prokyon.

In Babylonia Sirius was called "Arrow-Star", never Dog-Star. The older Babylonian name (according to F. X. Kugler) was *Kakkab mishrē*, the late Babylonian *Kak Kashti* ("weapon of the bow" = "arrow").

KALB B. WABARA, the eponymous ancestor of the tribe of Kalb, a confederation of nomadic Syrian Arabs attached to the powerful *Qudāʿa* [q. v.] group. The Banū ʿUdhra [q. v.] have been the most famous among the clans of the Kalb since the Hidjra, especially in literary history. The pre-Muḥammadian annals of Kalb are very obscure and semi-fabulous. Zuhair b. Djanāb [q. v.], an almost legendary personage — reckoned among the *muʿammarūn* or centenarians —, is said to have been one of their principal chiefs. They seem to have developed independently of other tribes in the Peninsula and to have had no relations with them. Their dialect showed curious peculiarities and we know of no pre-Islamic poets using it. About the time of the Hidjra they were the most important Arab group in Syria.

The conquest of this country brought them to the front, not least through the close alliance made by Muʿāwiya I with their tribe, a union sealed by his marriage with Maisūn [q. v.], mother of Yazid I. This political alliance brought them into high office, at court and in the army; to the latter they furnished disciplined contingents and captains of great bravery. Towards the middle of the first century A.H. their numbers must have been considerable: 2000 of them were receiving the pension of 2000 dirhems, the *sharaf al-aṭā*, a distinction reserved for the *ashraf* or nobles. Half-settled, half-nomadic they covered with their huge flocks — for they were great herdsmen — the tSamāwa the steppes separating Syria from the ʿIrāk and hence called Samāwa of Kalb and desert of Kalb. They held the springs, the oases at the east and south of Ḥawrān, especially Dawmat al-Djandal, Tabūk and several others dotted about the Wādī ʿl-Kurā with their palm-groves, the property of the Banū ʿUdhra. In Syria they were grouped round Salamiya and Palmyra, towns which belonged to them. A part of the district of Emesa and of the lower valley of the Orontes were united in their territory and in

the Ghūṭa [q. v.] of Damascus a number of villages belonged to the Kalb. The possession of commercial centres like Palmyra and Dawmat al-Djandal leads us to suppose that this active Syrian tribe must have profited by the caravans passing by these routes, still very much used in the first century of Islām.

They seem to have inherited the ancient hegemony of the Ghassānids. Like the latter and other Syro-Arab tribes at the time of the Hidjra the great majority of them professed the Christian religion and probably were Monophysites. They gradually exchanged it for Islām; one group is even said to have sent a deputation to the Prophet. In the following of the latter several Kalbis — we may mention Zaid b. Hāritha, his adopted son, and Dahya b. Khalifa, his diplomat — rose to fill important positions. Islām spread among the Kalb, especially from the time when frequent marriages — the first that of Nā'ila, wife of the Caliph 'Othmān [q. v.] — with the Omayyads assured them preponderance over the other tribes. Yazīd I, with his mother Maisūn, passed a part of his youth in the desert of Kalb and contracted a marriage with a Kalbiya. The supremacy of this tribe and of the powerful family of Bahḍal [q. v.] incited the Kais against them. Refusing to recognise Mu'āwiya II, the latter declared for Ibn al-Zubair [see 'ABD ALLĀH B. AL-ZUBAIR]. The victory of Mardj Rāhiṭ [q. v.], due mainly to the bravery of the Kalbis, completed the rupture between them and the Kais. Burning for revenge, they attacked the Kalb everywhere and succeeded in driving them out of Mesopotamia and the adjoining districts of the Samāwa. Besides, with the advent of the Marwānids, their popularity had sunk for the time at the court of Damascus, where their striking triumph at the battle of Mardj Rāhiṭ gave offence. They were not long in regaining their influence. They continued to figure among the most stalwart supporters of Omayyad rule. On several occasions, their contingents rendered effective assistance in retaking the 'Irāk from the rebels in the East. They were therefore proclaimed the bravest among the Qudā'a. In a word, the name of Kalbi had become synonymous with partisan of the Omayyads. The almost constant policy of this dynasty was to rely on the Kalbī alliance and through it on the support of the other Syrian tribes. A tradition said that the Kalb would be the last adherents of al-Sufyānī [q. v.]. This state of affairs inevitably led to a violent reaction under the 'Abbāsids and precipitated the fall of the Kalb, decimated by their long struggle with the Kais and their active participation in all the wars of conquest. Soon their solidity was broken up and the designation of Kalbī, an object of suspicion to the Baghdād government, gradually disappeared. Ibn Sa'id, quoted by al-Kāḡashandī (in his *Nihāyat al-Arab*), says that in his day there were great numbers of them settled on the shores "of the straits of Constantinople and divided equally between Christianity and Islām".

AL-KALBĪ, a family of scholars of Kūfa. The elder al-Kalbī, ABU 'L-NADIR MUḤAMMAD (B.

MALIK, according to Ibn al-Kūfī in the *Fihrist*) B. AL-SĀ'IB B. BISHR, whose grandfather with his sons al-Sā'ib, 'Ubaid and 'Abd al-Rahmān had fought by the side of 'Alī in the battle of the Camel and whose father had fallen by the side of Muṣ'ab b. al-Zubair, had taken part in the battle of Dair al-Djamādīj [q. v.] in 82 (101) as a follower of 'Abd al-Rahmān b. Muḥammad b. al-Ash'ath [q. v.]. He then devoted himself to historical and philological studies; he read the *Naḡā'id* of Farazdaq [q. v.] with the poet himself. He lectured in Kūfa on Qur'ānic exegesis and history; at the invitation of Sulaimān b. 'Alī he expounded the Qur'an for a time in the latter's house at Baṣra. His commentary on the Qur'an was still used by al-Tha'labī († 427 = 1036; q. v., (see *Cat. Codd. MSS. Or. in Museo Britannico*) pars ii. N^o. 821). He died in 146 (763).

His son ABU 'L-MUNDHIR HISHĀM mainly continued his father's historical studies, in which the latter had been his teacher. Both scholars have often been attacked by critics of traditions and even accused of forgery (see *Kit. al-Aghānī*, ix. 19; xi. 48; xviii. 161; Goldziher, *Muh. Studien*, i. 186); but on the other hand they did not lack warm defenders (e. g. Yāqūt, *Mu'djam*, ed. Wüstenfeld, ii. 158). Modern research has confirmed many of their statements, which they reached sometimes by regularly scientific methods such as the study of inscriptions, against the fanatical criticism of their co-religionists (see Nöldeke, *Gesch. der Araber u. Perser*, p. xxvii.). Muḥammad, who worked for a time also in Baghdād, died in his native town of Kūfa in 204 (819), according to others in 206.

Of the 140 works of Muḥammad, listed in the *Fihrist*, pp. 95—98), there have survived: 1. *Kit. al-Nasab al-Kahir* or *al-Djamhara fi 'l-Nasab* (*Djamharat al-Ansāb* in Ḥājjidī Khalifa), on the genealogies of the Arabs in a MS. of the Escorial (see Casiri, *Bibl. arabico-hispana*, N^o. 1693), of whose second volume the Brit. Museum (see *Cat. Codd. MSS. ... Mus. Brit.*, Pars ii. N^o. 915) owns a modern, almost worthless copy, perhaps only of an extract; a fragment of the work is perhaps preserved in a Paris manuscript (*Bibl. Nat.*, de Slane, *Cat.*, N^o. 2047). Of an apparently much condensed version of the work by Abū Sa'id 'Alī b. Mūsā al-Sukkārī (d. 465 = 1075), which is chiefly based on Muḥammad b. Ḥabīb's recension, but also uses that of Ibn al-A'rābī and other fundamentally independent sources also, the first volume is preserved in the British Museum (see *Cat.*, N^o. 1202 and also p. 783b). The extract by Yāqūt is in Cairo, Khed. Library, see *Fihrist*, v. 156; Vollers, *Zeitschr. d. Deutsch. Morg. Gesellsch.*, xliii. 116). 2. *Kit. Nasab Fuḡūl al-Khail fi 'l-Djāhiliya wal-Islām* (cf. Hammer, *Denks. der Wiener Akad.*, phil.-hist. Kl., vi. 214, n^o. 50) in Gotha (see Pertsch, *Die arab. Hds.*, N^o. 2078) and in the Escorial (see Casiri, N^o. 1700, 2). 3. *Kit. al-Aṣnām*, or more accurately *Kit. Tankis al-Aṣnām*, which Ahmed Zeki Pasha [Ibn al-Kalbi, *Le Livre des Idoles* (*Kitāb al-Aṣnām*), Cairo 1914] has published. An apparently very full synopsis which enables us to judge of the extent and arrangement of the book is to be found in 'Abd al-Qādir al-Baghdādī's *Khizānat al-Adab*, iii. 242—6. The numerous extracts in Yāqūt have been collected by Wellhausen, *Reste arab. Heidentums*², p. 10—64 (cf.

also 243) and translated and annotated. 4. An extract from the *Kit. al-Kulāb* (*Fihrist*, p. 97, 18) is given by Ibn al-Anbārī in his commentary on the *Mufaḍḍalīyāt*; see C. J. Lyall, *Ibn al-Kalbī's Account of the first Day of al-Kulāb in the Orient. Stud. Th. Nöldeke gewidmet* (Giessen 1906), i. 127—154.

Bibliography: Ibn Sa'd, *Ṭabaqāt*, vi. 249—250; Ibn Ḥaǧǧar, *Tahḍīb al-Tahḍīb* (Haidarābād 1325—7), ix. Qorāns*, ii. 168, 170, 171; Brockelmann, *Gesch. d. ar. Lit.*, i. 138—140.

(BROCKELMANN)

ԳԱԼԵՒՍ ՏԵՖԻԴ, a fortress in Fārs, in 30° 10' N. Lat. and 51° 30' E. Long. (Greenwich). It is built on a mountain with a flat top, in the eastern part of the valley of Kohra, which falls steeply down on all sides. On its summit, which can only be reached by cliff-paths, lies an extensive well-wooded plateau watered by numerous springs. A strong garrison is necessary for its defence as is noted in the *Fārsnāma*. Descriptions of the fortress and the country round it are given, among Oriental writers for example by Ibn al-Balkhī in the *Fārsnāma* (the pertinent passage is copied by Mustawfī, *Nuḥat al-Kulūb*, 'Alī Yazdī and Mirkwānd (see *Bibl.*). Of descriptions by European travellers in the sixteenth century, that of Stolze deserves special mention; along with Andreas he explored the mountain and castle thoroughly. The statements of Kinneir who visited Գալեւս Տեփիդ in 1810 are unreliable, according to Stolze.

The name of the fortress is given in the Persian geographers and historians as Գալեւս Isfid (Sefid, Sepid), the "white citadel"; Գալեւս Ispid-diz (the "white fortress") is also found; Գալեւս Sefid is the only form in use at the present day. Translated into Arabic the name is given in Ibn al-Athīr (ed. Tornberg), xi. 46 as al-Գալ'a al-Baiḍā'. The name "white citadel" which is found elsewhere as a name for a castle in areas where Arabic and Persian are spoken (e. g. in al-Ḥira, al-Madā'in, in the oasis of Ruḥbe east of Hawrān, and in the region of Գairawān, in Afghanistan, etc.; for Biredjik cf. above i. 723) may very probably originate in the dazzling white colour of the building-stone used. The name Գալեւս Gul u Gulāb (citadel of the rose and rose-water), borne by Գալեւս Sefid in al-Bundārī, *Tawārikh al-Salḍjūq* (ed. Houtsma, 2., p. 188, 13) is remarkable.

Գալեւս Sefid is the most noteworthy point on the mountain road which leads from Behbahān to Shirāz and furnishes communication between Khuzistān and Fārs. It may be regarded as certain that a commanding place like this was very early fortified. The "Persian passes" through which Alexander the Great tried to enter the ancestral home of the Achaemenids and which were defended by the Satrap of Persis, Ariobarzanes, with his strong forces, have often been sought in the valley of Գալեւս Sefid; e. g. by Vincent, Müttel, Droysen, Forbiger. Ritter (*Erdkunde*, ix. 138) in differing from these, considers Գալեւս Sefid to be the stronghold of the Uxians and places the "Persian Gates" farther east. Ritter's view has been attacked particularly by Müttel in his edition of Curtius (Berlin 1841),

p. 414 sq. and by Stolze (*op. cit.*, p. 262 sq.). That the region of Գալեւս Sefid does not correspond to the situation of the "Persian Gates" of the historians of Alexander and that the latter should be located elsewhere has been fairly convincingly proved by Stolze, *op. cit.*

Գալեւս Sefid is not mentioned by the Arab geographers of the middle ages. Like the adjoining town of Nawbandjān (Nawbandādjān) it must have been allotted to the Persian province of Sābūr in the Caliphate period. From the tenth century on we find cropping up in the Oriental sources a nomadic people named the Shul, after whom the whole area, inhabited by them from the west of Shirāz to the frontiers of Fārs and Khuzistān was called Shulistān. There is definite evidence to show that Գալեւս Sefid belonged to Shulistān. On the Shul and the land of Shulistān cf. the references in Quatremère, *op. cit.*, p. 380 sq. and also Mustawfī, *Tārikh-i Guzida* (ed. Browne, *Gibb Mem. xiv.*), p. 538, 658, 660, 696, 726.

Գալեւս Sefid is frequently mentioned by Persian poets and chroniclers. It is first found in Firdawsī's *Shāhnāma* (ed. Mohl, ii. 92, 245 sq.); here the conquest of the stronghold is related as one of the noteworthy deeds of the hero Rustam. As the *Fārsnāma* (written about 500—1106) reports, the fortress of Գալեւս Sefid had lain in ruins for many years until it was rebuilt by a certain Abū Naṣr from Tīr-Murdān (a district of the province of Sābūr) during the turmoils of the last decades of Būyid rule, that is in the first half of the 10th (xth) century. The mountain, difficult of access, served not infrequently in wartime as a secure hiding-place. For example in 534 (1139) Buzāba, Governor of Fārs, retired here before Գարā Ṣonqor, Atābeg of the Salḍjūq Sultān Mas'ūd; cf. the article BUZĀBA, i. 809). The Salghurid Abū Bakr, Atābeg of Fārs from 623 to 658 (1226—1260) (on him see above i. 82) transported his treasures to Գալեւս Sefid and placed a garrison in the citadel in order to have a place of refuge here in case of a catastrophe. The last Atābeg of Fārs of the Salghurid dynasty, Salḍjūqshāh, met his death at the foot of Mount Գալեւս Sefid in battle with one of Hūlāgū's generals in 663 (1264); see J. v. Hammer, *Gesch. der Ilchane* (Darmstadt 1842), i. 243 and cf. also Mustawfī, *Tārikh-i Guzida*, p. 509.

Although Hūlāgū issued an order to destroy all the fortresses in the lands conquered by him, an exception was made of Գալեւս Sefid, as is expressly mentioned; cf. the passage in the *Tārikh-i Waṣṣāf* in Quatremère, *op. cit.*, p. 382. The citadel could therefore continue to serve as a place of refuge, and was also on several occasions used as a state-prison for political opponents. Thus for example Mas'ūd Shāh of the Indjū dynasty, who ruled as governor of Fārs from 736 (1335) imprisoned his brother Muḥammad in Գալեւս Sefid (cf. above ii. 504); when later Abū Ishāq, a younger brother of the Mas'ūd Shāh just mentioned, came into conflict with the Muzaḥfarid Mubārīz al-Dīn and had to flee after the capture of his capital Shirāz in 754 (1353) he went to Գալեւս Sefid (see Mirkhwānd's account in Quatremère, *op. cit.*, p. 382; Mustawfī, *Tārikh-i Guzida*, p. 658, 15 sq., and cf. above ii. 804). A few years later the sons of Mubārīz al-Dīn, Shāh Sultān and Shāh Shudjā' rebelled against their father, blinded him and imprisoned him in Գալեւս Sefid

in 759 (1358); see Mustawfi, *Ta'rikh-i Guzida*, p. 681; Defrémery in the *Journ. Asiat.* 1864, ii. 112. In 785 (1383) Shāh Shudjā' had his son Sultān Shibli sent to Kāle-i Sefid as an alleged rebel (see Mustawfi, *op. cit.*, p. 724; Quatremère, *op. cit.*, p. 382; Defrémery, *op. cit.* (1845), i. 437).

Kāle-i Sefid has attained special fame through its capture by Timūr. The latter on his second campaign in Fārs in 795 (1393) passed by the road from Behbahān to Shirāz, besieged this barrier fortress, considered impregnable, and stormed it on the third day. All the members of the Muzaḥfarid dynasty were captured and put to death (cf. Sharaf al-Din 'Alī Yazdī, *Zafarnāma*, Bibl. Ind., New Series, N^o 616, Calcutta 1887, i. 600 sq.; Mustawfi, *op. cit.*, p. 751).

We read of the capture of Kāle-i Sefid by Hamza-Bey several centuries later, in the reign of Shāh 'Abbās I; see Quatremère, *op. cit.*, p. 384. The Māmasenī have now settled in a large part of what was once called Shūlīstān; they are a robber Lūr-tribe, who belong to the Bakhti'yāri [q. v., I, 603]. They centre round Kāle-i Sefid. On them see Layard in the *Journ. of the R. G. S.*, xv. 28; Ritter, *Erkunde*, viii. 390, ix. 137; C. de Bode, *Travels in Luristan and Arabistan* (London 1845), i. 210, 219 sq., 262 sq. When the Māmasenī in the latter part of the reign of Fath 'Alī Shāh (1797—1834) were in constant rebellion under a robber chief named Walī Khān Bakash, an army of Ādharbaidjāni troops was sent against them, who besieged Kāle-i Sefid and forced the stubborn defenders of the citadel to yield (cf. Curzon, *op. cit.*).

It should further be mentioned that below the fortress on the mountain there was at one time a second smaller castle, the name of which is variously given as Astak (*Fārs nāma*, p. 158, 17) or Nishnāk (Mustawfi, *Nuzhat al-Kulūb*, p. 132, 5); further variants of the name are given here in note 1).

The little village of Tell Espid should not be confused with this; it lies northwest of Kāle-i Sefid in the adjacent plain on a hill some 2400 feet high; cf. Wells in the *Proc. of the Roy. Geogr. Soc.*, 1883, v. 161 and Herzfeld, *op. cit.*, p. 85.

KALE-I SULTANIYE, in popular speech usually ČANAQ KALE'SI ('Pot-castle'), the town and fortifications known to Europeans as the Dardanelles, the chief place in the sandjak of Bigha [q. v., I, 716, cf. also DARDANELLES, I, 922], situated at the narrowest part of the straits. The modern settlement has taken the place of the very ancient seaport of Abydos; the latter name, indeed, survived down to the xvth century on Italian charts in the form Avido, Aveo, as the name for Kāle-i Sultāniye (the bay: la bocca d'Aveo). While the form Andus [q. v.] found in Yākūt, *Mu'djam* (ed. Wüstenfeld), i. 374 also is to be read Abydus, the statement of Joh. Leunclavius, *Historiae Musulmanae*, Frankfurt 1591, p. 182, 55, taken from the *Codex Hanivaldianus* (Neshri?), that Abydos is called Aydos by the Ottomans can be said to be wrong. There is a confusion with Aidos in Koča Eli and the whole story of the conquest in Leunclavius refers to this place and not to Abydos. Here from the days of the Roman empire was the chief custom-house of Byzantium, where every vessel entering the straits had to pay a tithe (Agathias, v. 12; cf. the customs regulations of Abydus published by A. D. Mordtmann Jun. in the *Athen. Mitteil.*, vi. 182 sqq.) and it was strongly fortified, as the key to the capital. In spring of 717 the town was taken along with the coasts of the Hellespont by the Umayyad general Maslama (Theophanes, ed. Bekker, Bonn 1839, p. 395). In those days there was attached to a tower here the great chain which barred the Muslim ships' entrance to the straits (Ibn Khordādhbeh, ed. de Goeje in the *Bibl. Geogr. Arab.*, vi. 103 sqq.; cf. Yākūt, i. 374; al-Idrisi, *Nuzhat al-Mushṭāk*, Fr. transl. by Jaubert, *Géographie d'Edrasi*, ii. 135, 301, 303). While the siege and capture by Emir Orkhān are as uncertain as the crossing of the Dardanelles attributed to him at this place (cf. Joh. Dräseke in the *Neue Jahrbücher für klass. Altert.*, xxxi. (1913), 476—504), the statement that in the reign of Murād about 1354 the straits were crossed in small boats at Abydus, is more worthy of belief (Dukas, ed. Bekker, Bonn 1834, p. 14, 8, 39, 13; Phrantzis, ed. Bekker, Bonn 1838, p. 45, 15). This would, it is true, be in contradiction to the Turkish account which places the crossing at Kemer opposite Hexamilia. The place did not become of any considerable importance in the Muslim period until the time of Muḥammad II, who took it in 1461, built great defensive works here for the protection of Constantinople, which he had recently captured, and founded a town here (Chalkokondylas, ed. Bekker, Bonn 1843, p. 529, 18 sqq.). The fortress was armed with about 30 large and a number of smaller guns. All incoming ships had henceforth to cast anchor there, to show their papers and pay toll (Chalkokondylas, *op. cit.*, p. 530; cf. thereon Kritobulos, ed. C. Müller, *Fragm. Hist. Graec.*, v. 146). The town was now regarded as the main defence of the Dardanelles, although by the middle of the xvth century we find European travellers who sailed through the straits wondering at the insufficiency of the defences; for example Pierre Belon, to whom the walls and towers, said to be built out of the ruins of Scamandria, seemed not nearly strong enough

for the "key to Turkey" (*Les observations de plusieurs singularitez*, Paris 1854, p. 77^b sqq.; there, also, is a picture of the Dardanelles forts following p. 78). It is certain that European fleets could pass the straits unhindered in the middle of the xviith century, and that the bastions on both European and Asiatic sides were in almost complete ruins. Although about 1550, 32 great guns still barred the entrance to hostile ships (cf. Charrière, *Négociations*, Paris 1848, i. 374 and 380, where "les deux chasteaux du Hellespont nommez Dardanneaux", the "XXXII groz canons dont nul navire ne peult entrer ou sortir malgré eulx" as well as the search of a ship are described), a very short time after, it was no longer possible to think of any serious resistance being made by them. It was the vigorous Sultana Kösem, who reigned for a period for her minor grandson Mehmed IV, who, with the grand vizier Mehmed Köprülü, devoted special attention to the decaying Dardanelles forts and decided to renovate and remodel them completely. The building of Seddu 'l-Bahr and Küm Kal'e, the two so-called "new castles", was also decided upon at this time (cf. J. v. Hammer, *Gesch. des osman. Reiches*, Pest 1827—35, v. 516). In 1658 the work was begun under the supervision of 'Ankabüt Ahmed Pasha, commander of the Dardanelles, and under the direction of the architect Mustafa Agha, and by Sept. 1659 Sultan Mehmed IV was able to inspect the new works (cf. Na'imā, *Stambul* 1147, ii. 698 sq., 704; J. v. Hammer, *op. cit.*, vi. 65 sq.) and dedicate a mosque (Ewliya, v. 307; according to him, the name Kāl'e-i Sultāniye arose at this time in honour of Kösem Wālide, but it is probably older). The appearance of the new citadel is accurately known from European descriptions of the time. The fortress proper was surrounded by a strong wall at each of the four corners of which there rose a fortified tower. In the middle was the donjon, which had been increased in height. Nearly 30 guns were placed here in no regular order, so as not to injure the opposite works of Kilidu 'l-Bahr when they were fired. Behind the defences lay the town proper, inhabited chiefly by Turks and Jews, numbering some 3000 inhabitants about 1680 (cf. Grelot, *Relation Nouvelle d'un voyage de Constantinople*, Paris 1681, p. 24, 28, 30 with a picture of the Dardanelles defences on p. 41; further pictures in Pitton de Tournefort, *Relation d'un voyage du Levant*, Paris 1717, i. 453 sqq., Amsterdam 1718, i. 175 sqq.). There were definite rules regulating the passage of ships. Every merchantman had to announce its arrival with 3, 5, 7 shots to which 1—5 were fired in reply. This had to be returned with 3, 5, 7 shots and not till then could the voyage be continued. All ships coming from Constantinople had to cast anchor here to be examined and pay tolls (cf. M. de Thevenot, *Relation d'un voyage fait au Levant*, Paris 1665, p. 32 sqq.; Jacob Spon and George Wheler, *Voyage d'Italie, de Dalmatie, de Greece et du Levant fait aus années 1675 et 1676*, the Hague 1724, i. 123 sqq.). Not more than five Christian ships could go through at the same time (cf. Grelot, *op. cit.*, p. 30). These regulations survived into the xviiith century, although there was considerable laxity in their enforcement (cf. R. Chandler, *Travels in Asia Minor*, Oxford 1775, p. 11). A hundred years later the defences were again in the most wretched state, vividly described by

Baron Franz von Tóth (Tott) (*Mémoires du Baron de Tott*, Amsterdam 1784, iii. 43 sqq.). In 1770 the Russian fleet was able to sail through the straits without opposition. Von Tóth thereupon hurriedly repaired the fortifications (cf. Edgár Páloczy, *Báró Tóth Ferenc, a Dardanellak megérosítoje*, Budapest 1916), without, however, being able to stop their decay. The town seems to have been in quite a flourishing condition at this time, according to R. Pococke, *A Description of the East* (London 1743—1745), ii. 102—104, it was 1½ miles around and had 1200 inhabitants (200 Greeks, 100 Armenians and 50 Jews), who carried on a busy trade in silk, sailcloth and earthenware. The annual export was put at 15,000 dollars. A French Consul, as well as a Dutch and English dragoman had their offices in Kāl'e-i Sultāniye. The potteries, which seem to have begun about 1740, were for a long time famous and gave the place the name Çanağ Kāl'esi. The inhabitants lived in different quarters separated into nations. Armenians who fled from Shāh Tahmāsp are said to have been settled here as early as 1529 (according to Cabanel in V. Cuinet, *La Turquie d'Asie*, iii. 689 sqq.) but a regular Armenian colony only dates from about 1650. At the same time there is evidence of a, sometimes large, Jewish settlement, which played a prominent part in the business world (cf. Grelot, *op. cit.*, p. 24; Baron de Tott, *op. cit.*, iii. 59; J. B. Lechevalier, *Voyage de la Propontide*, Paris an VIII (= 1800), i. 14, according to whom the people were almost all Jews, who did a brisk business in provisioning passing ships (cf. thereon Grelot, *op. cit.*, p. 28). There is no documentary evidence of the presence of Greeks before 1690 in Kāl'e-i Sultāniye. In the xixth century the fortress sank practically to insignificance. The bold passage of the English fleet through the Dardanelles on Feb. 19, 1807 resulted in the defences being again repaired (cf. Zinkeisen, *Gesch. des osm. Reiches*, vii. 434) but without their afterwards keeping pace with the rapid development of modern artillery. A very full description of the fortifications in 1836 is given by Helmut v. Moltke, *Briefe über Zustände und Begebenheiten in der Türkei* (Berlin 1841), p. 51 sqq., 8th ed. (1917), p. 55 sqq. and by Abercromby Grant, *Narrative of a Journey to Greece in 1830*, p. 431 (with sketches). Kāl'e-i Sultāniye and its forts only became of considerable strategic importance again during the Great War, when as a result of an indirect bombardment from the Gulf of Saros by the Anglo-French fleets the town, which had been almost deserted by its inhabitants, suffered severe damage in March 1915 and was burned down. It had previously suffered from frequent fires and especially from the great earthquake of Aug. 9, 1912. About 1890 the town had about 11,000 inhabitants, 11 larger and several smaller mosques and 4 churches, but now the number must be much smaller.

Bibliography. In addition to the works quoted cf. also Sāmī, *Kāmūs al-A'lām*, v. 3685 sqq., 'Alī Djewād, *Memālik Lughatī* (Constantinople 1895/99), s. v.; Ahmed Rif'at, *Lughat-i tārīkhīye we-djughrāfiye* (Stambul 1881), s. v.; Ahmed Mukhtār, *Osmānlı Memlekelleri* (Stambul 1896), s. v.; Cuinet, *La Turquie d'Asie*, iii. 689 sqq.

(FRANZ BABINGER)

KAŁGHA, the title of the heir-apparent among the Tatars of the Crimea from the time of Mengli Girāy (last rule 883—921 = 1478—1515). The origin of the title is unknown; in manuscripts the same word is also written *kāghilghāy*, which has caused W. Smirnow (*Krimskoje Chanstvo pod verchovenstvom Ottomanskoj Porți do načala XVIII vjeka*, St. Petersburg 1887, p. 350 sq.) to suggest that we have here to deal with a non-Turkish (probably a Mongol) word. We have perhaps to connect with *kałgha* the Central Asian word *kałkhān*, a name frequently given to the prince of Balkh (Balkh appears as the residence of the heir-apparent beside Bukhārā, the royal residence of the Khān of the Özbegs); this word also is sometimes written *Ka'ikhān* (no doubt for *Kaghilkhān*); cf. J. Senkowski, *Supplément à l'histoire générale des Huns* etc., St. Petersburg 1824, p. 74 sq. When, under Muḥammad Girāy II (985—992 = 1577—84), Alp Girāy, brother of the Khān, was designated *kałgha*, the rank of second heir-apparent (*wali 'ahd khāni*) was created for the Khān's son, prince Sa'ādat Girāy and retained in later reigns. The name Nūr al-Dīn of this prince's tutor (*ataliġh*) was transferred to the prince himself and to his rank (Muḥammad Riḍā, *al-Sab' al-Sayyār*, Kazan 1832, p. 103, more fully in the abbreviated recension by Hurramī Ćelebi, which only exists in manuscript; on the manuscript see A. Samojlovich in the *Izv. Tavrič. učenoj arch. kom.*, No. 49; cf. O. Retowski, *Die Münzen der Girei*, Moscow 1905, p. 93 = *Trud. Mosk. Numism. Obsč.*, iii. 32). Henceforth the Nūr al-Dīn along with the *kałgha* is found not only among the members of the ruling house but also among the members of the most important families like the Širīn and Manķit (cf. Radloff, *Wörterbuch*, ii. 253, where both family names are erroneously taken as adjectives). (W. BARTHOLD)

KAŁHĀT (in Marco Polo CALATU, in Portuguese writers CALAIATE), a once flourishing seaport in 'Omān lying northwest of Rās al-Hadd. Ibn Baṭṭūṭa, who visited the town during his travels in 'Omān, specially mentions the fine streets and splendid lofty mosque, which afforded a wide view of the sea and the harbour and was built by the pious Biti (of noble family) Maryam. The inhabitants of the town, who lived by trading in Indian products, and spoke a bad Arabic, were members of the Ibāḍiya sect (see IBĀḌIYA), but concealed their creed from their rulers, the kings of Hormuz [q. v.] (cf. also Ibn al-Aṭhīr, *al-Kāmil*, ed. Tornberg, xii. 198 below), who were Sunnis. According to Yāqūt, who calls Kałhāt the most beautiful district in 'Omān and places its foundation in the xiith century, the sectarians of this town openly professed their faith. The Portuguese broke the power of the kings of Hormuz in the beginning of the xvth century.

AL-KĀLĪ, ABŪ 'ALĪ ISMĀ'IL B. AL-KĀSİM B. 'AYDĤŪN B. HĀRŪN B. 'ISĀ B. MUḤAMMAD, a great Arab philologist, born in Djumādā II, 288 = May-June, 901 (according to others in 280), at Manāzġuird, a little town in Armenia which was then a dependency of Diyār Bakr, and died at Cordova on Djumādā I 7, 356 = April 19-20, 967 (according to others Rabi' II, Djumādā II, 356, and also 366 according to Ibn 'Idhārī).

In 303 having gone to Baghdād in company with some people of the town of Kāliqala, he was confused with them and in consequence was surnamed al-Kālī. However, he is usually called in the East Abū 'Alī al-Baghdādī. After studying Islāmic Tradition and particularly Arabic language and literature, al-Kālī, at the end of his resources, left Baghdād in 328 (939/40) and went to Spain where he did not arrive until 330 = 941/2, in the reign of the Caliph 'Abd al-Rahmān al-Nāṣir. The son of this prince Abū 'l-'Aṣī al-Ḥakam who was fond of learning and of scholars received him very kindly, and, indeed, it is said that even he had written to the East to get al-Kālī to come to the West. Abū 'Alī arrived in Cordova on Sha'bān 26, 330 (May 16, 942), where he began to teach Tradition and especially the Arabic language and literature. As teachers he had 'Abd Allāh b. Muḥammad al-Baghawī, 'Abd Allāh b. Sulaimān b. al-Ash'ath al-Sidjīstānī, Ibn Duraid, Ibn al-Sarrāġ, al-Zaġdġādġ, al-Akhfash al-Ṣaghīr, Niṭṭawaih, Abū Bakr Ibn al-Anbārī, Ibn Ḳutaiba, Ibn Durustawaih, etc. Among his pupils we may specially mention the grammarian and lexicographer Abū Bakr Muḥammad b. al-Ḥasan al-Zubaidī.

Among his works we now only possess: 1^o. *Kit. al-Amālī wa 'l-Dhail wa 'l-Nawādir*, a kind of anthology containing a large number of notes on proverbs, language and poetry, publ. at Bulāġ in 1324; indexes of poets and rhymes have been published by F. Krenkow and A. Bevan at Leiden in 1913; 2^o. *Kit. al-Nawādir*, part I, Cambridge, Univ. Libr., E. G. Browne, *A Hand-list of the Muḥammadan Manuscripts*, No. 926; 3^o. *Kit. al-Burī' fī Ḡharīb al-Ḥadīth*, remained unfinished, Paris, Bibl. Nat., No. 4235.

KALĪ, KALĀĪ: 1. The name for tin, or for a specially good quality of tin among the Arabs, occasionally also called *al-raṣāṣ al-kaḷī* and *al-raṣāṣ al-abyaḍ*, i. e. "Kaḷī-lead" or "white lead"; see *Lisān al-'Arab*, x. 167, 16; Dozy, *Supplément aux Dict. arab.*, ii. 397^a; Vullers, *Lex. Pers.-Lat.*, ii. 735^a; Quatremère in the *Journ. des Savants* 1846, p. 731. For other names of tin in Arabic (Kaṣḍir = *Κασσίτερος*, etc.) see e. g. al-Dimashqī, *Nukhbat al-Dahr* (*Cosmography*, ed. Mehren), p. 54, 1. The word apparently comes from the Far East, from which the Arabs may possibly have got it directly, without the (not impossible) intermediary of modern Persian, which al-Djāwālīqī, *al-Mu'arrab* (ed. Sachau), p. 125, 6 demands (the original would be Persian *Kalhā*). The correction *kalahi* for *Kalhā* there proposed is based on Ibn Sa'īd, quoted in G. Ferrand, *Relations de voyages et Textes géograph. ... relat. à l'extrême-Orient* (Paris 1913—1914), p. 343. The word *Kalī* (in Ghilānī: *Kālīb*) found in the modern Persian dialect of Māzandarān — see Melgunof in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxii. 198 — must have come through the Arabic; from the latter the word entered Turkish: *Kalai* (Sāml, *Kāmūs-i Türki*, p. 1032) and thence into modern Greek: *τὸ καλδί*. As a loan-word *Kalā'ī* travelled still further, into Portuguese (*calaim*, *calin* = Indian tin); see Dozy and Engelmann, *Gloss. des mots espagnols et portugais dérivés de l'Arabe*², (Leiden 1869), p. 245; Yule and Burnell, *Hobson-Jobson*², (London 1903), p. 143. The cradle of the word might be the district of Kalah in the peninsula of Malacca, which was celebrated for its tin-mines (see KALAH above). The Arabic geographers and lexicographers usually derive the name *Kalī* from al-Kal'a in India (= Kalah, q. v.); so, for example, Yāqūt, *Mu'djam* (ed. Wüstenfeld), iv. 162, 6; al-Firūzābādī, *al-Kāmūs* (Cairo 1301), iii. 71, 5; cf. also Ḥamd Allāh Mustawfī, *Nuḥat al-Kulūb* (ed. le Strange, Gibb Mem. Ser., xxiii.), p. 203, 6. At the same time the word — certainly erroneously — is also connected with an (alleged) tin-mining area al-Kal'a in Ceylon (Yāqūt, i. 21, 13; iv. 162, 13), in Spain (Yāqūt, iv. 162, 15 sq.; Ḥamd Allāh Mustawfī, p. 203, 8) and in Yemen (Yāqūt, iv. 162, 17; al-Firūzābādī, *op. cit.*).

The most usual word for tin in Malay at the present day seems to be *timah*. At the same time we find with this meaning also *kaling*, *kaleng* — not *kelang*, as written by Langlès, Quatremère, Dozy-Engelmann, Yule-Burnell and others — which, according to the dictionaries, means primarily tin-plate, or tinned iron-plate (but nevertheless is the meaning tin an older one?); cf. Wilkinson, *A Malay-Engl. Diction.* (Singapore 1901), p. 497^b; Wilkinson, *An abridged Malay-Engl. Diction.* (Singapore 1919) and Klinkert, *Nieuw Maleisch-Nederl. Woordenboek* (Leiden 1916). It is obvious that the Arabic *Kalī* is to be traced back not to *Kal'a* (*Kalah*) but to this Malay word. Quatremère, *op. cit.*, definitely puts forward some such derivation of *Kalī*, whereas Dozy-Engelmann, *op. cit.*, and Yule-Burnell, *op. cit.*, leave the question undecided. Is the similarity of name simply an accident? It is hardly possible that the Malay *Kaleng* itself is only a corruption of the Arabic *Kalī*. The further pos-

sibility has also been considered that the name of the district of Kalah — from the Malay *Kaling* — may mean simply "land of tin", a view expressed as long ago as Langlès in his edition of the voyages of Sindbād the Sailor in Savary's *Grammaire de la langue arabe* (Paris 1813), p. 499 = reprint (Paris 1814), p. 63. Yule and Burnell quote as an analogy the fact that the little state of Selangor (north of the town of Malacca) was formerly known as Nagri Kalang = "land of tin". To this we may add, quoting Wilkinson, *Malay-English Dictionary*, p. 526^b, that *Kēlang*, *Klang*, properly only the name of a district in Selangor and of a little township in this district, is also often extended to include the whole state of Selangor. Perhaps the origin of *Kalī* is to be sought in this *Kēlang*.

2. The name of a particular kind of sword, which is often mentioned, especially in the old Arabic poetry. Cf., for example, Aws b. Ḥaḍjar (ed. Geyer, *Sitz.-Ber. d. K. Akad. der Wiss. zu Wien*, phil.-hist. Kl., 1892), xii. 33; Ru'ba b. al-Adjdjadī (ed. Ahlwardt, *Sammlungen alter arab. Dichter*, iii. 137), N^o 49, 43; scholiast to Tarafa, *Mu'allaka* (in Arnold, *Septem Moallakat*, Leipzig 1850, p. 61). On Tha'alibi, *Laṭā'if*, p. 102, 7, 130, 4 (quoted in Dozy, *Supplém. aux dictionn. arabes*, ii. 396^b) see Fleischer in the *Sitz.-Ber. d. Sächs. Gesellsch. d. Wissensch.*, 1886, p. 45. Cf. also Ibn Sa'īd, *al-Ṭabaḳāt*, I/1. 50, 21. This kind of sword is usually said to be of Indian origin (cf. for example al-Firūzābādī, *al-Kāmūs* under *ḵl'*) and, indeed, Indian swords were from early times famous among the Arabs and celebrated by the poets; on this cf. Schwarzlose, *Die Waffen der alten Araber* (Leipzig 1886), p. 127 sq. and A. Siddiqi, *Studien über die persischen Fremdwörter im klassischen Arabisch* (Göttingen 1919), p. 88 sq. As a more definite place of origin we usually find the Arab geographers and lexicographers giving that al-Kal'a from which the tin of this name comes. Occasionally also the Syro-Arabian desert (the Bādiya) or the district of Ḥulwān in the 'Irāk is given as the place of origin; cf. *Lisān* and al-Firūzābādī, *al-Kāmūs* under *ḵl'*. The Yemen, which produced the finest swords next to India, is sometimes also described as the place of origin of the *kaḷī* sword, for example in the above quoted gloss to Tarafa's *Mu'allaka*. Jacob, *Altarabisches Beduinenleben* (Berlin 1897), p. 149, would like to decide in favour of Yemen, in particular the "fortress" (*kaḷ'a*) of 'Aden, in support of which could be quoted the fact that in a poem by 'Alkama (ed. Socin), N^o 3, 4, there is mention of "pearls from *Kal'a*" *Kalā'ī*. Nevertheless, the derivation of the Arabic word from an East-Indian place al-Kal'a (Kalah on Malacca? see KALAH) seems to me more probable. It is unnecessary to distinguish between two different kinds of sword, *kaḷī* and *kalā'ī* (see Freytag, *Lex. Arab.-Lat.*, s. v. *kaḷ'a* and *kalā'a*), in spite of Schwarzlose, *op. cit.*, p. 130.

(M. STRECK)

KALĪ KALĀ. [See ERZERUM].

KALĪLA WA-DIMNA is the title of an Indian mirror for princes, formed by the corruption of the Sanskrit names of the two principal characters, two jacksals, Karaṭaka and Damanaka (in the old Syriac translation the forms are still Kalilag and Damag); it was translated from Sanskrit into Pahlavi and thence into Arabic,

and became widely known in Muslim as well as Christian literatures.

1. The original work. The Indian original was composed by an unknown Viṣṇuīte Brahman, according to Hertel probably about the year 300 A. D. in Kāshmir; the main argument for this, the reproduction of denarius by *dināra* is, however, not cogent, as the pronunciation of the *ṇ* as *i* is older than Hertel supposes (see also A. Berriedale Keith in the *Journ. Roy. As. Soc.*, 1915, p. 505). It consisted of an introduction and five books each of which bore the name *tantra* i. e. "case of good sense". The book was intended to instruct princes in the laws of polity by means of animal-fables composed in perfect Sanskrit. The oldest descendant of the original work is the *Tantrākhyāyika*, rediscovered by J. Hertel (see *Tantrākhyāyika*, die älteste Fassung des *Pañcatantra*, transl. from the Sanskrit with introd. and notes by J. Hertel, 2 parts, Leipzig and Berlin 1909). A second recension of the original work is called the *Pañcatantra* (see J. Hertel, *Pañcatantra*, etc. in Harvard Oriental Series, Vols. 11—14); it has become a very popular book in India and is current there in countless versions. J. G. L. Kosegarten published an uncritical mixed text, Bonn 1848; on this Th. Benfey based his translation, *Pantschatantra, fünf Bücher indischer Fabeln, Märchen und Erzählungen*, transl. from the Sanskrit with introd. and notes, 2 parts, Leipzig 1859. In the introduction to this work the history of the migration of Indian literary subjects to Europe was first exhaustively investigated.

2. The Pahlavi translation. A rather early recension of the *Pañcatantra* was translated from Sanskrit into Pahlavi by order of the Sassanian king Khusrav Anūsharwān (531—579) by his physician Burzōe, whom he had sent to India for this purpose, and expanded by the addition of an appendix of fables from other Indian sources; of these the three first (chap. 11—13 in de Sacy) are taken from the twelfth book of the *Mahābhārata*, the other five (de Sacy's chap. 14, 15, 17, 18 and the story of the king of the mice, see below, not given in de Sacy) have so far not been found again in Indian literature, although there is no reason to doubt their Indian origin. Burzōe prefaced his translation with an autobiographical introduction which the vizier Buzurjmihr, it appears, signed with his own name as an honour to the author (see *Burzōes Einleitung zu dem Buche Kalila wa-Dimna*, transl. and annot. by Th. Nöldeke, *Schriften der wissenschaftl. Gesellsch. in Strassburg*, Heft 12, Strassburg 1912).

3. The old Syriac translation. Burzōe's Pahlavi translation itself is lost; but by about 570 A. D. it had already been translated by the Periodeut Būd into Syriac. This translation only survives in one manuscript, which was formerly preserved in the monastery at Mārdin, then in the library of the Patriarch of Mōsul and afterwards came into the possession of Mgr. Graffin in Paris. From a defective copy of this, which Socin had brought with him, Bickell prepared the first edition (*Kalilag und Damag, alte syrische Übersetzung des indischen Fürstenspiegels*, text and Germ. transl. by G. Bickell, with an introduction by Th. Benfey, Leipzig 1876). F. Schulthess was later able to prepare a much more reliable text based on three new copies which

Sachau had had prepared in Mōsul (*Kalila und Dimna*, Syriac and German, Berlin 1911).

4. The Arabic translation. About three centuries later 'Abd Allāh b. al-Muḳaffa^c (see IBN AL-MUḲAFFA^c, II, 404) translated Burzōe's Pahlavi version into Arabic. He wrote an original preface to his book, inserted in Burzōe's introduction probably the section on the uncertainty of religions, added after the first book of the *Pañcatantra* a chapter written by himself on Dimna's trial (chap. 6 in de Sacy), which by punishing the traitor satisfies the feeling of justice, outraged by the immoral teachings of this book, and apparently also added the chapter "monk and guest" (N^o. 16 in de Sacy). Ibn al-Muḳaffa's edition was originally a stylistic work of art intended for literary connoisseurs; but from the nature of its matter, it soon became very popular and therefore much corrupted in transmission. Even the numerous quotations in Ibn Kūtaiba's '*Uyūn al-Akhbār*' already no longer reproduce Ibn al-Muḳaffa's text word for word. The fairly numerous manuscripts of the work are all of late date. Sylvestre de Sacy's edition (*Calila et Dimna, ou Fables de Bidpai*, Paris 1816) is based on an inferior manuscript and arbitrarily emended from other manuscripts (see Nöldeke, in the *Göttinger Gelehrte Anz.*, 1884, p. 676). In de Sacy's text, Ibn al-Muḳaffa's preface is preceded by a new preface by an otherwise unknown Bahnūd b. Saḥwān or 'Alī b. al-Shāh al-Fārisī, in which he gives an account of the history of the book in India, as well as a report said to have been written by Buzurjmihr regarding Burzōe's mission to India with the commission to bring back the book; in several manuscripts this is followed by another story of Burzōe's being sent for a miraculous plant. Some manuscripts (see J. Derenbourg, *Directorium vitae humanae*, p. 323) add at the end two more fables, of the heron and the duck and of the dove, the fox and the heron from other, as yet unknown sources. This latter story is also inserted in the oldest Oriental reprint of de Sacy's edition, Bulāḡ 1249 (according to Chauvin, *op. cit.*, p. 13, in the University Library of Cambridge; a copy in my possession also); from this it has passed into the more recent editions printed at Cairo, Mōsul and Bairūt, the list of which in Chauvin, p. 13 sqq., according to Cheikhō (see below), p. 6, is not yet complete. Valuable contributions to the criticism of de Sacy's text from Italian manuscripts are given by I. Guidi, *Studi sul testo arabo del Libro di Calila e Dimna*, Rome 1873. The story of the king of the mice and his ministers, not given in de Sacy, which is shown by the Syriac text to belong to the Pahlavi work, was published by Nöldeke in text and translation in the *Abhandl. der Königl. Gesellsch. der Wissensch. zu Göttingen*, 1879, xxv. N^o. 4. The complete material from 16 Paris manuscripts for the story of the ascetic and the broken jug was given by Zotenberg in the *Journ. Asiat.*, Ser. 8, vii. (1886), p. 117—123.

While the numerous printed editions of the East in the main reproduce de Sacy's text, A. N. Tabbara (*Kalila et Dimna, trad. arabe copiée d'après un ancien manuscrit trouvé à Damas, avec notes*, Beyrouth 1322 = 1904) claimed to have discovered a new source for textual criticism; but his manuscript (of 1080 = 1675) is too modern to afford new material and his edition is, besides, bowdlerized. On the other hand L. Cheikhō found

in the Lebanon monastery of Dair al-Shīr a valuable manuscript of the year 749 = 1339, and made it accessible in an excellent edition: *La version arabe de Kalilah et Dimnah d'après le plus ancien manuscrit arabe daté*, Beyrouth 1905. I have not seen the new edition by Khalil al-Yāzidjī (ibid. 1908); that of Salīm Ibrāhīm Šādir and Shāhīn 'Atīya (ibid. 1910) is intended for school use. The modern European translations from de Sacy's text are given by Hertel, *op. cit.*, p. 393; to these may now be added M. Moreno, *La versione araba de Kalilah e Dimnah*, transl. into Italian, San Remo 1910 (see *Riv. d. Studi Orient.*, vi. 201).

5. Arabic versifications. The translation by Ibn al-Muḳaffa' has been three times put into Arabic verse. The first version was made by his younger contemporary Abān al-Lāhīkī (q. v.; see also A. E. Krymski, *Abān al-Lāhīkī, le Zindīq (environ 750—815), versificateur arabe des recueils des apologues indo-persans. Essai sur sa vie et ses écrits, tiré de l'unique manuscrit de Souli...*, *Bibl. Khéd.*, No. 594, et d'autres sources primitives. Appendices: a. Barlaam et Joasaph, essai littéraire-historique; b. Texte arabe intact d'al-Awrāq par Souli, éd. en collaboration avec Mirza Abdoullah Ghaffarov (also in Russian with Russian title) Moskva 1913; on the manuscript cf. Horovitz in the *Mitt. des Seminars für Orient. Sprachen*, Berlin, x. 35. This version is lost; with the help of it, but on the basis of the text of Ibn al-Muḳaffa' about the year 1100, Ibn al-Habbāriya [q. v.] composed in ten days a poetic version in elegant and flowing language entitled: *Natā'idj al-Fiṭna fī Naḡm Kalīla wa-Dimna*, lith. Bombay 1317 (see Houtsma in the *Orient. Stud. Th. Nöldeke...*, *gewidmet*, i. 91—96). A third versification of the book entitled *Durr al-Hikam fī Anthāl al-Hunūd wa'l-Adjam* was completed by 'Abd al-Mu'min b. al-Ḥasan b. al-Ḥusain al-Ṣaḡhānī after 80 days' work on Djumādā I 20, 640 (Nov. 15, 1242). It exists only in a manuscript in Vienna (see Flügel, *Die arab., pers. und türk. Hds. der...*, *Hofbibliothek zu Wien*, i. 469, No. 480).

6. The later Syriac translation. In the tenth or eleventh century a Syriac cleric translated the work from Ibn al-Muḳaffa's text again into the then already dead language of his church; he endeavoured to give the book a Christian tinge and therefore amplified the verses of the Indian original, already much distorted in the Pahlavi translation, into long and weary moral discourses. He also made a series of mistakes in the translation. But as the text he used was much nearer the original than the most of our manuscripts, this translation is, in spite of its defects, of considerable value for textual criticism; it is edited by W. Wright, *The Book of Kalilah and Dimnah transl. from Arabic into Syriac*, London 1884. In contrast to the naturalism of the original, Keith-Falconer, the English translator of this version (Cambridge 1885) is even more prudish than the latter itself; on text and translation see Nöldeke in the *Göttinger Gelehrte Anz.*, 1884, p. 673 sqq., 1885, p. 753 sqq.

7. Persian prose and verse translations. According to Firdawsī in the *Shāhnāma* (see de Sacy in *Not. et Extr.* X (1818), i. 140 sqq.), Ibn al-Muḳaffa's book was translated into Persian under the Sāmānid Naṣr b. Aḥmad (914—943) by order of the vizier Bal'āmī [q. v.]; but

it appears that this translation was never completed. By order of the same ruler the poet Rūdhakī (d. 304 = 916) put the book into Persian verse of which, however, only 16 verses have survived in quotations in Asadī's *Lughat-i Furs*, ed. Horn, p. 18 sqq.

Ibn al-Muḳaffa's work was translated into Persian prose probably after the year 539 = 1144 (see Rieu, *Cat. of the Pers. MSS. in the Brit. Mus.*, p. 745/6) by Nizām al-Dīn Abu 'l-Ma'ālī Naṣr Allāh b. Muḥammad b. 'Abd al-Ḥamid, who dedicated his work to Bahrām Shāh of Ghazna [q. v., I, 586]. Naṣr Allāh in a new preface announces his intention of reproducing the work completely, including the aphorisms which seemed to him particularly valuable, with all the rhetorical adornment of artificial prose; he only gives Burzō's introduction in ordinary prose, as an artificial style does not suit its matter. The work was lithographed in Tih-rān in 1282 (= 1864; this disposes of Chauvin's doubts, p. 46/7), 1304 and 1305. Cf. de Sacy in *Not. et Extr.* X, i. 96 sqq.; E. G. Browne, *A Literary History of Persia*, ii. (London 1906), p. 349.

A metrical version of the book was given by Aḥmad b. Maḥmūd al-Tūsī Kānī, a contemporary of Djalāl al-Dīn Rūmī at Konya, whither he had fled before the Mongols from his native city of Tös, for Sultān 'Izz al-Dīn Kaikā'ūs (643—662 = 1244—1263), probably based on Naṣr Allāh's translation, which, however, he nowhere mentions; see Rieu, *Cat. of the Pers. MSS. in the Brit. Mus.*, p. 582 sqq.; E. G. Browne, *A History of Pers. Literature under Tartar Dominion* (Cambridge 1920), p. 111.

This work was, however, put in the shade completely by the revision of Naṣr Allāh's translation done by Ḥusain Wā'iz Kāshifī (d. 910 = 1504, see KĀSHIFĪ), the court-preacher of Ḥusain Baikarā of Herāt [see ḤUSAIN MİRZĀ]. In honour of Ḥusain's minister Aḥmad Suhailī he called his work *Anwār-i Suhailī*. He professed to be making the rhetorical artificial prose of Naṣr Allāh easier to understand by giving it in a new version but in reality he created an even more florid and verbose concoction, "full of absurd exaggerations, recondite words, vain epithets, far fetched comparisons and tasteless bombast and represents to perfection the worst style of those florid writers who flourished under the patronage of the Timurids" (E. G. Browne, *Lit. Hist. of Persia*, ii. 352, *op. cit.*, p. 503 sqq.). But as this style remained predominant in Persia and particularly in India down to the threshold of the modern period, the work had an unparalleled success and was printed in England (first complete edition London 1836), where it was used as a text book for the examination of English officials in India in Persian and repeatedly printed and lithographed in India and Persia, translated into several Indian dialects, into Pushtu, Georgian and all the principal languages of Europe (see Chauvin, p. 26—43). Ḥusain replaced the four prefaces at the vulgate of Ibn al-Muḳaffa' by a new introduction from a so far unidentified source; de Sacy supposes (*Not. et Extr.* X, i. 59) that in it we have the older *Djāwidān Khirad*, which al-Turtūshī was still able to use for his *Sirādj al-Mulūk* (Bulāḡ 1289), p. 97, 22—24, 185, 25 sqq. The Emperor of China Humāyūnfāl is persuaded to give up the idea of abdicating his throne by his vizier, who

tells him how the Indian king Dabshalim was directed by a dream to a cave in which an old man would give him a treasure. Of the latter Dabshalim keeps only the testament of Hōshang, king of Persia, which contains 14 pieces of advice for rulers, and with these he goes to Ceylon where the Brahman Bidpai or Pilpai explains each of these precepts by stories which form the separate chapters of the book.

Dislike of the extravagant and luxurious style of the *Anwār-i Suhailī* induced the Emperor Akbar (1556—1605) to commission his vizier Abu 'l-Faḍl to prepare a new edition of the work. This bears the title *'Yār-i Dānish* and was completed in 996 (1578). It retains the arrangement of its model but restores Ibn al-Mukāffā's preface and Burzōe's introduction. The work itself is not yet printed but a Hindustānī translation by Hafiz-uddin, entitled *Khirad Afrōz*, was published by Th. Roebuck (Calcutta 1815) and by Eastwick (Hertford 1857, London 1867) on account of its elegant diction.

8. Turkish translations. Ibn al-Mukāffā's work was twice translated into Eastern Turkī from Naṣr Allāh's translation; see the manuscripts in Dresden in Fleischer, *Cat. Codd. Mss. orient. Bibl. Regiae Dresdensis* (Lipsiae 1831), p. 19, N^o. 136 and Munich in Aumer, *Die pers. und türk. Hdss. der K. Hof- und Staatsbibliothek*, p. 54.

Naṣr Allāh's edition was translated into old Ottoman Turkish (not into Eastern Turkī, as Hertel, p. 407 says, relying on a somewhat misleading expression of Éthé's, *op. cit.*) by Mas'ūd for 'Umürbeg, prince of Aidīn (d. 750 = 1349) (a MS. in the Bodleian, Marsh. 180). This prose text was put into verse by an unknown author who dedicated his work to Sultān Murād I (761—792 = 1359—1389); only about half has survived in a Gotha manuscript (see Pertsch, *Verz. der türk. Handschr. d. Herz. Bibl.*, p. 168, N^o. 189). A modern Ottoman prose version, which must have been made before 955 (1548), exists in the Bodleian MS. Marsh. 61; cf. H. Éthé, *On some hitherto unknown Turkish Versions of Kalilah and Dimnah* in the *Actes du 6^e Congr. internat. des Orientalistes*, 2nd sect., i. 241 sqq.

'Alī b. Šālih, called 'Alī Wāsī' or 'Alī Čelebi, translated the *Anwār-i Suhailī* into Ottoman rhymed prose and dedicated his work to Sultān Sulaimān I (1512—1520) with the title *Humāyūn-nāma*; it has been several times printed in Būlāḡ and Stambul (see Chauvin, p. 50). Among the different European translations of the *Humāyūn-nāma*, the best known is the French of Galland, published after his death by Gueulette (Paris 1724); it was translated by Gonggrijp into Malay (Batavia 1866) and the latter version inspired a Javanese translation by Kramaprawira, which was put into Javanese verse by an anonymous poet. The luxuriousness of its language, in which the *Humāyūn-nāma* surpassed even its Persian original, induced the Mufti Yahyā Efendī and 'Oth-mānzāde, who died in 1139 (1726) as Kādī in Cairo, to prepare extracts from it (see Éthé, *op. cit.*, p. 242).

The *Anwār-i Suhailī* was translated, apparently with the assistance of the *Humāyūn-nāma* by Faḍl Allāh b. 'Isā Tashkendī at the instigation of Muḥammad Mūsā Bai Bāčā into modern Eastern Turkī prose (to be more accurate into the language of Tashkend and Farghāna as the colophon,

or the language of Turkeṣtān and Farghāna as the title states); the latter then had the book lithographed by the calligrapher Mīrzā Hāshim Khodjandī, according to the colophon in 1306 (1888); according to the title, the book was published in 1893.

Ibn al-Mukāffā's book was translated from the Arabic into Qazan Turkī by 'Abd al-'Allām Faiz Khān Oghlu and printed at Kāzan 1889 (University Press, *Orient. Bibliographie*, iii. 1421), in the same year at Wjatschakow (*ibid.*, iv. N^o. 3935) and in 1892 at Cirkova (*ibid.*, vi. 167, N^o. 3166). The introduction, however, was, according to a communication from Prof. Hommel, borrowed from the *Anwār-i-Suhailī*.

9. The Mongol translation. The Mongol translation which Malik Iftikhār al-Dīn Muḥammad b. Abī Naṣr, a descendant of Muḥammad Bakrī, prepared in Qazwin has not survived (see Ḥamd Allāh Mustawfī, *Tārīkh-i Guzida*, ed. Browne, Gibb Mem. xiv. p. 844/5, transl. p. 233; Browne, *A Hist. of Persian Literature under Tartar Dominion*, p. 93, and correctly stated as early as Hammer-Purgstall in the *Journ. Asiat.*, 3rd Ser., i. 580). This statement is confused in Ḥādjīdī Khalīfa, v. 239, who ascribes a translation into Turkish (*lughat al-Turk*) to the ancestor Muḥammad Bakrī (see de Sacy, *Not. et Extr.* X, 175; Éthé, *op. cit.*, p. 243, who does not take notice of von Hammer's correct statement). As Flügel wrongly translates *in linguam Tatarorum*, Hertel (p. 414) wrongly identifies this reported Tatar translation with the above mentioned Qazan Turkī (so-called Tatar) translation quoted in Chauvin, p. 78, note.

10. The Ethiopic translation. An Ethiopic version, which was certainly based on a text, indigenous to Egypt, of the Arabic of Ibn al-Mukāffā, is also lost: it is mentioned in a work composed in 1582 (see Wright, *Cat. of the Ethiop. MSS. in the Brit. Mus.*, p. 82b) (see Nöldeke, *Gött. Gelehrte Anz.* 1884, p. 676, note 5).

11. The Hebrew and older European translations. At the beginning of the twelfth century a certain Rabbi Jō'el translated Ibn al-Mukāffā's work into Hebrew from a valuable manuscript which, however, already contained the false story of Burzōe's mission and the two not genuine fables at the end of the heron and the duck and of the fox, dove and heron. From the unique manuscript, exceedingly corrupt in the beginning, J. Derenbourg published this translation along with that of Jacob b. Eleazar of the xiiith century (*Deux versions hébraïques du Livre de Kalilah et Dimnah* in the *Bibl. de l'École des Hautes Études*, fasc. 49., Paris 1881). Jacob's version while based on a similar text to that of Jō'el is, however, very free, composed in elegant rhymed prose and full of Biblical locutions. The version of the Rabbi Jō'el was then translated into Latin by the baptised Jew John of Capua for Cardinal Ursinus between 1263 and 1278 with the title *Directorium vitae humanae* (cf. Johannes de Capua, *Directorium vitae humanae*, publ. and annot. by J. Derenbourg in the *Bibl. de l'École des Hautes Études*, fasc. 72, Paris 1887; a new edition based on manuscripts which he has recently discovered is to be expected from Hilka). With the exception of an old Spanish version, which reproduces the same text as Rabbi Jō'el much more faithfully than John of Capua does (see Clifford G. Allen, *L'an-*

cienne version espagnole de *Kalila et Digna*, texte des mss. de l'Escorial, précédé d'un avant-propos et suivi d'un glossaire, Thesis, Paris-Macon 1906), all later translations into Western European languages with the exception of quite modern ones are based on the Latin text of John of Capua (see Chauvin, p. 59—72; Hertel, p. 366—400).

12. The Greek translation. Towards the end of the xith century, Symeon son of Seth translated Ibn al-Muḳaffā's work fairly freely into Greek from a manuscript which was still free from later additions but contained the chapter on the king of the mice and his ministers. He called the book *Στεφανίτης καὶ Ἰχνηλάτης*, because he recognised in *Kalila* the Arabic *ikhlāl* and in *Dimna* the Arabic word for "trace". See *Στεφανίτης καὶ Ἰχνηλάτης*. *Quattro recensioni della versione greca del Kitāb Kalilāh wa-Dimna*, pubbl. da Vittorio Puntoni, *Pubblicazioni della Soc. Asiat. Ital.*, ii. (1889). This version was in turn translated into Latin and German as well as into several Slavonic languages.

13. The Persian translation of the *Hitoṇpadēsha*. The later Sanskrit version of the *Pañcatantra*, the *Hitoṇpadēsha*, was translated very freely into Persian, probably in the reign of Akbar, by a certain Tādj al-Dīn, under the title *Mufarriḥ al-Kulūb* (see de Sacy, *L'électuaire des cœurs, ou traduction persane du livre indien intitulé Hitoṇpadēsa par Taadj-eddin, ms. persan de la Bibl. du Roi*, No. 386 in the *Not. et Extr.* X, i. 226—264). This work was then translated by the highly esteemed Hindūstānī author Mīr Bahādur 'Alī Ḥusainī in 1217 (1802) into his mother tongue (see Garcin de Tassy, *Hist. de la Littér. hindoue ou hindoustanie*², i. 609 sqq.). A year later the latter was edited by Gilchrist as *Ukhlaqi Hindie or Indian Ethics*, transl. from the Version of the celebrated Hitoṇpadēs or Salutory Counsel by Meer Buhadoor Ulee, . . . under the superintendence of John Gilchrist, Calcutta 1803; cf. J. Hertel, *Die Akhṣāq-ḥ Hindī und ihre Quellen* in the *Zeitschr. d. Deutsch. Morg. Gesellsch.*, lxxii. 65—86, lxxiv. 95—117, lxxv. 129—200.

14. The older Malay translation. On a mixture of Ibn al-Muḳaffā's work and a Tamil text of the *Pañcatantra* is based the Malay version *Hikayat Kalila dan Damina*, which was first brought to notice by Werndly in his *Malteische Sprachkunst*, Amsterdam 1736, and was published in 1876 by Gonggrijp at Leiden (2nd ed. 1892; cf. J. J. Brandes in the *Festbundel aan Professor M. J. de Goeje*, Leiden 1891, p. 77 sqq.). This work was next translated into Javanese (Batavia 1878) and Madurese (ibid. 1879).

15. Imitations of *Kalila wa-Dimna*. Setting aside the fables included in the *1001 Nights*, Ibn al-Muḳaffā's work has been three times imitated in Islāmic literatures. Ibn al-Habbāriya (see above) followed up his versification with the *Kit. al-Sādīḥ wa'l-Bāghim* (see above p. 378 sq.; also printed in Cairo 1294). While this was only an imitation of the beast-fable, Muḥammad b. 'Abd Allāh b. Zafar al-Ṣakālī (d. 565/1169 or 568/1172) in his *Sulwān al-Muṭā*, which he first composed in 545 (1150) and dedicated in 554 (1159) in a new edition to the Kā'id of Sicily, Abū 'Abd Allāh Muḥammad al-Ḳurashī, intended to produce a mirror for princes, like the *Kalila wa-Dimna*; in addition to beast-fables the book also contains

historical anecdotes. It was lithographed at Cairo 1278, printed Tunis 1279, Bairūt 1300; translated into Turkish by Kara Khalilzāde (d. 1168—1754) and printed Stambul 1285; translated into Italian by M. Amari, *Solwan al-mota ossiano Conforti politici di Ibn Zafer, arabo siciliano del XII secolo*, Florence 1851, 1882 (Engl. transl. London 1852).

Another mirror for princes in which historic anecdotes are mingled with beast-fables for the edification of the reader, was composed about the end of the fourth century A. H. by the prince of Ṭabaristān, Ispahbadh Marzubān in the Persian dialect of his land. This work itself has not survived, but in the viith (xiiith) and viiith (xiiiith) century it was twice translated into classical Persian. This was first done at the court of the Saldjūk of Asia Minor, Sulaimānshāh (588—600 = 1192—1204) by his vizier Muḥammad b. Ghāzi of Malatya; his work, entitled *Rawḍat al-'Uḳūl*, exists in two manuscripts in Leiden and Paris. The *Marzubānnāma* of Sa'd al-Dīn-i Warāwīnī, composed between 607 and 622 (1210—1225), enjoyed greater popularity. It has been edited by Mīrzā Muḥammad (Gibb Mem. Ser., vol. viii.).

Warāwīnī's version was translated by an unknown author into Ottoman Turkish (a copy of 848 (1444) in Berlin; see Pertsch, *Verz. der Türk. Hdss.*, No. 444); this Turkish version was again translated anonymously into Arabic (MS. Berlin, see Ahlwardt, *Verz.*, No. 8472). A second Arabic translation, which, according to the Gotha MS. (see Pertsch, *Die Arab. Hdss. der Herz. Bibl.*, No. 2692), is also based on the Turkish, was made by Ibn 'Arabshāh [q. v.]; there is another MS. in Paris (de Slane, *Catal.*, No. 3524) and it was lithographed in Cairo in 1278. The same author then rewrote his work in artificial prose in his *Fākihat al-Khulafā' wa-Mufakkarat al-Zurafā'*, and added several new stories.

The same recension which had been translated into Ottoman Turkish and which is distinguished from Warāwīnī's vulgate as well as from the *Rawḍat al-'Uḳūl* by the tenth (concluding) chapter *dar bayān-i ziyādat-i 'umr wa-dawlat wa-zindagānī kardan bā dōst udushman*, was translated into Ḳazan Turkī by an unnamed writer for a certain Sulaimān Bek, son of Muḥammad Bek, and printed at Ḳazan in 1864 under the title *Kitāb Destūri Shāhī fī hikāyāti Pādishāhi*.

(C. BROCKELMANN)

KALĪM, a Persian poet of India of the seventeenth century. His full name was MĪRZĀ ABŪ ṬĀLIB KALĪM of Hamadhān. He lived first in Kāshān, so that he is also given the *nisba* Kāshānī as well as Hamadhānī. In the beginning of the reign of Djahāngir (q. v., 1014—1037 = 1605—1627) he came to India to his court. A considerable journey took him in the following years to the 'Irāq, from which he returned in 1028 (1619) to India and lived there henceforth as court-poet of the Moghul Emperors. Under Djahāngir's successor Shāh Djahān (1037—1068 = 1628—1656), whom he celebrated in an epic — the title of which is given in three forms: *Shāhān-shāhnāma*, *Shāhnāma* and *Pādishāhnāma* — he was given the title of honour *Malik al-Shu'arā'*.

He died in Kashmīr in 1062 (1652); the date 1061 (1651) has less authority. His *Diwān* contains the usual kinds of poetry, especially *qaṣīdas* and *mathnawīs* of a panegyric character. Manuscripts of the *Diwān* are frequent — a lithographed edition appeared at Lucknow in 1878 — but his *Shāhānshāhnāma* seems only to exist in extracts. He is estimated to have left 24,000 verses.

(H. H. SCHAEFER)

KALĪM ALLĀH. *Kalīm* is one who speaks to you, following the equation *fa'il = mufa'il* (e.g. al-Baidāwī, ed. Fleischer, i. 445, 20, 583, 13, 595, 7); so in the *Lisān* (xv. 428 *infra*) which adds that the *Tahdhīb* (of al-Azhari) allows it to mean also one to whom you speak. In consequence, *Kalīm Allāh* has become the special honorific title of Mūsā, "He who spoke to Allāh", or, following the *Tahdhīb*, "He to whom Allāh spoke", because of several passages in the *Qur'an* describing direct speech between Allāh and Mūsā — especially *Qur.* iv. 162, *wa-kallam Allāhu Mūsā taklīmā*, where the addition of the infinitive is said to show that literal and direct speech is meant and not a metaphor (*Lisān*, xv. 429, 3 sqq.; al-Ash'ari, *al-Ibāna*, ed. Haidarābād, 1321, p. 27 *infra*). In these passages the emphasis is always on Allāh's speaking to Mūsā, and this may be the cause of the extension of meaning of *kalīm* in the *Tahdhīb*. Further, the third stem of *kalm* does not occur in the received text of the *Qur'an*; but in *Qur.* ii. 254, there is a variant reading, *kālam Allāha* (al-Baidāwī, i. 130, 9) and this variant reading is given by al-Baidāwī as the source of the honorific title, *kalīm = mukālīm*. Yet in this passage there is no mention of Mūsā. Cf., also, the epithet with similar meaning *naḍī*, applied to Mūsā in *Qur.* xix. 53, where al-Baidāwī (i. 583, 13) equates *naḍī* with *munāḍī*.

Bibliography: See under KALĀM. Add Goldziher, *Die Richtungen der islamischen Koranauslegung*, p. 174; and on variants in the *Qur'an* text, pp. 1—54; Dozy, *Supplément*, ii. 486b.

(D. B. MACDONALD)

KALIMA. For the primary meaning see under KALĀM. Each utterance of Allāh is a *kalima*, whether it is the single creative word, *kun*, "come into being!" or a longer expression. Thus it is a synonym of *dīn* (Dozy, *Suppl.* ii. 286a); *kalimatān baḳīyatan*, in *Qur.* xliii. 27 is interpreted as meaning the *tawhīd*, the first of the two articles of the Muslim creed (al-Baidāwī, ed. Fleischer, ii. 237, 25) and "two words" in *The 1001 Nights* (Calcutta ed., N. 834, iv. 159; in the Breslau text, iv. 327, it is *fard kalima*) means the two articles. In this wide sense the *kalima* of a poet can mean a whole *qaṣīda* by him (*Lisān*, xv. 428 *infra*; al-Baidāwī, i. 154, 17 on *Qur.* iii. 34) and

it is a question whether 'Isā is called a *kalima* from Allāh (*Qur.* iii. 34, 40) because he is an expression of the *kalām* of Allāh, or because he was produced by the single creative word *kun*, and is thus a primary creation like Adam (al-Baidāwī, *loc. cit.*; *Lisān*, xv. 430 *supra*). From the doctrine of Allāh's *kalām* it follows that his *kalimāt* must be innumerable (see KALĀM). But all contingent existences (*al-mumkināt*) have been produced by *kalimāt* of Allāh, i. e. the creative commands *kun*; therefore the Speech of the Reality (*al-ḥaqq*) is the self of the identities of the contingent existences, or the contingent existences themselves (*nafs a'yān al-mumkināt*, *Dict. of Techn. Terms*, p. 1271, *infra*). The half page which follows the last reference shows how this is the bridge from the orthodox doctrine of Allāh's quality, Speech, to the Neoplatonic Chain and all its descendants.

Bibliography: Has been given above. See further on 'ABD AL-RAZZĀK (i. 61 sqq.); AL-INSĀN AL-KĀMIL (ii. 510 sq.).

(D. B. MACDONALD)

AL-ḲALḲASHANDĪ, *nisba* from ḲalḲashanda near Ḳalyūb.

I. SHIHĀB AL-DĪN ABU 'L-'ABBĀS AḤMAD B. 'ALĪ B. AḤMAD B. 'ABD ALLĀH (in MSS. often briefly called AḤMAD B. 'ABD ALLĀH) B. ABĪ GHUDDA, died on Djumādā II 10, 821 (July 16, 1418), wrote besides a number of smaller works a guide to the artistic composition of essays and reports, especially for the use of Egyptian government officials; just as Ibn Ḳutaiba [q. v.] in his *'Uyūn al-Akhbār* and the supplements to that work wished to afford the secretary class an encyclopaedic survey of the most important branches of knowledge of his time, so al-ḲalḲashandī's work, composed after 791 (1387), entitled *Subḥ al-A'shā fī Shīn'at al-Inshā'*, presents in a much more comprehensive and systematic form practically the whole knowledge of his time and contains information of the utmost value, especially regarding the history and geography of Egypt and Syria. It has been printed as a publication of the Dār al-Kutub al-Ḳhadiwiya (al-Sultāniya) (Cairo 1331—8 [1913—9], 14 vols.). Cf. F. Wüstenfeld, *Die Geographie und Verwaltung von Ägypten nach dem Arab. des Abu 'l-'Abbās al-Calcaschandī in the Abh. d. Kgl. Gesellsch. d. Wiss. zu Göttingen*, phil.-hist. Cl., XXV (1879); W. v. Tiesenhausen in the *Zapiski Vost. Otdj. Imp. Russk. Arch. Obš.*, i. 208; do., *Gesch. der Goldenen Horde*, i. 395; H. Sauvaire, *Extraits de l'ouvrage de K. intitulé Lumière de l'aurore pour l'écriture des hommes* (Arab. MS. of the Bodleian Library) in the *Mém. de l'Acad. de Marseille*, 1886, 1887; H. Lammens, *Correspondances diplomatiques entre les sultans mamlouks d'Égypte et les puissances chrétiennes in the Revue de l'Orient chrétien*, ix. (1904), 151—187, 359—392. A selection from it entitled *Daw' al-Ṣubḥ al-Musfir wa-Djany al-Dawḥ al-Muthmir* was printed in Cairo 1906. His second great work which he composed in 812 (1409) is a genealogy and history of the Arab tribes before Muḥammad with an alphabetical list entitled *Nihāyat al-Arab fī Ma'rifat al-Ḳabā'il al-Arab*, MSS. in Berlin (Ahlwardt, *Verzeichn.*, N^o. 9382/3) and London (*Cat. Codd. Mss. Or...* in *Mus. Brit.*, N^o. 341/2); according to Lammens in the *Mél. de la Fac. orient. de Beyrouth*, III/i. 150 N. 1, it has been printed in Baghdād n. d.; in this

text the author is called Muḥammad b. 'Abd Allāh; Lammens concludes from this that the authors of the *Ṣubḥ* and of the *Nihāya* were different individuals; but here either the father is confused with the son (see N^o. 2) or the printed book contains the work of the son. The alphabetical list was worked up by Abū'l-Fawz Muḥammad Amīn al-Suwaydī in 1229 (1814) into a genealogical survey and extended to the Caliphs and Sultāns with the title *Sabā'ik al-Dhahab fī Ma'rīfat Ḳabā'il al-'Arab*, lith. Baghdād 1280, Bombay 1296. After the year 818 (1415) al-ḲalḲashandī wrote a supplement to it entitled *Kalā'id al-Djumān fī 'l-Ta'rīf bi-Ḳabā'il 'Arab al-Zamān*, MSS. in Berlin (Ahlwardt, *Verzeichn.*, N^o. 9384) and London (Rieu, *Suppl. to the Cat. of the Arabic Mss. in the Brit. Mus.*, N^o. 595); a synopsis by al-Suyūṭī in Berlin (Ahlwardt, *Verzeichn.*, N^o. 9385).

2. His son NAḌīm al-Dīn Muḥammad imitated his two chief works, the *Ṣubḥ* under the title *Kalā'id al-Djumān fī Muṣṭalah Mukātabāt Ahl al-Zamān* (see Rieu, *Suppl.*, N^o. 1020) and the *Nihāya* under the title *Nihāyat al-'Arab fī Ma'rīfat Ansūb al-'Arab*, dedicated to the Grand Emīr of the Arabs of the East and of the West Zain al-Dīn Abū 'l-Djūd Baḳr b. Rashīd al-Zainī; the autograph of the year 846 (1442) in the Bibl. Nat. of Paris (see de Slane, *Cat.*, N^o. 2049), another MS. in Cairo, Khed. Bibl. (*Fihrr.*, v. 170; author Muḥammad b. 'Abd Allāh, see Vollers, *Zeitschr. d. Dtsch. Morg. Gesellsch.*, xliii. 118; on the Baghdād printed text see above).

3. ABU 'L-FATH IBRĀHīm b. 'Alī b. Aḥmad al-Maḳḍisī, BURHĀN (DJAMĀL) al-Dīn, d. 922 (1516), Traditionist, whose works are detailed in Brockelmann, *Gesch. d. ar. Litt.*, ii. 78.

Bibliography: Wüstenfeld, *Geschichtschreiber*, N^o. 467; Brockelmann, *op. cit.*, ii. 134.

(C. BROCKELMANN)

KALMUCKS, the Turkish name for a Mongol people who call themselves OIRAT. In Radloff's *Wörterbuch* (ii. 272), the forms Ḳalmaḳ (Central Asian dialects), Ḳalmīḳ (Volga dialects; whence the Russian word) and Ḳalmūḳ (Ottoman; whence the Crimean Tatar expression *ḳalmūḳ-i bad-maḳhūḳ*) are given. In Central Asia the Turkish speaking Teleuts are called "White Kalmūcks" (Aḳ Ḳalmaḳ) and the Western Mongols proper "Black Kalmūcks" (Ḳara Ḳalmaḳ). The word is derived (probably only by a popular etymology) from the verb *ḳalmaḳ* "to remain"; it is said to denote the Oirat, who "remained" pagans, in contrast to the Dungans (the Chinese-speaking Muḥammadans), who "returned" (verb *dönmek*) (according to the well known Muslim idea) to Islām.

The word Ḳalmaḳ seems first to occur in the *Muḳaddima* (not included in the printed edition) to the *Zafar-Nāma* of Sharaf al-Dīn Yazdī, not, it seems, as an ethnographical term but as a geographical one. It is said that after the expulsion of the Mongol dynasty from China only their "original territory" (*yurt-i aṣlī*), i. e. Ḳaraḳorum and Ḳalmaḳ remained in their possession; the "Emīrs of the Oirat" later deprived them of this also.

From the time of Wais Khān (1418—28) the Mongols on the Ili [q. v.] had to fight against the "infidel Ḳalmaḳ"; accounts of these wars are found, notably in the *Ta'rikh-i Rashīdī* (ed. Ney-Elias, see Index). Wais Khān was twice taken prisoner by the Ḳalmaḳ and had to give his sister

in marriage to the chief of the Ḳalmaḳ Isān Taiḣi (properly Esen Taiḣi). Toghon, father of the latter, was then ruling in Mongolia on the Chinese frontier, where he was succeeded in 1439 by Esen Taiḣi. After the death of Esen Taiḣi (1455) the great nomad kingdom of the Oirat broke up; individual princes are mentioned from time to time later, as ruling in the neighbourhood of Muslim lands; in the beginning of 864 (end of 1459) a Ḳalmaḳ embassy appeared in Herāt. According to Chinese sources, the Oirat in 1552 had to submit to Altan Khān, prince of the Tūmet. The name Ḳalmaḳ seems to have been extended by the Muslims to this kingdom. According to the Ottoman Saifī (wrote 990 = 1572), the prince of the Ḳalmaḳ bore the title *Altun Khān* (Turk. *Altun* = Mongol *Altan*); cf. the text in the Leiden MS. N^o. 917 and the translation by Ch. Schefer in Abdoul Kerim Boukhary, *Histoire de l'Asie Centrale*, transl. p. 292 sq. The Muḥammadan sources also report the restoration of the Oirat kingdom under Khara Khula (d. 1634). In Turkestan the Ḳalmaḳ, during this period also, were regarded as powerful foes to Islām. The prince of the Ḳazaḳ (Kirgiz), Tawakkul Khān, had to fly before them to Tashkend, where he was received by Nawrūz Aḥmad Khān or Barāḳ Khān (d. 1556); but Nawrūz Aḥmad is said to have replied to his guest's appeal for help that ten such princes as they two could do nothing against the Ḳalmaḳ. At a later date on the other hand we find Tawakkul described in Russia as "Czar of the Ḳazaḳ and of the Kalmucks" on the occasion of his embassy to the Czar Feodor (1594), perhaps because a few bodies of Kalmucks had attached themselves to him; according to the *'Abdallāh-Nāma* (MS. of the Asiatic Museum, N^o. 574, f. 352^a) there were also Kalmucks (Ḳalmāḳān) in Tashkend in the army of Bābā Khān (a son of Nawrūz Aḥmad) about 1582. In the winter of 1603—4 took place the first raid of the Kalmucks into Khwārizm (Abu 'l-Ghāzī, ed. Desmaisons, text p. 275). Soon afterwards, under the Czar Wassilij Shuiskij (1606—1610), the Kalmucks for the first time entered into relations with the Russian government, although it was not till 1632 that Kalmucks settled on the Volga on a large scale. This branch of the Kalmucks had separated from their kinsmen, under the leadership of Kho Urluk, as early as 1618. The land of the Volga Kalmucks therefore did not belong to the empire founded by Khara Khula, although the relations between the two branches of the people had not yet been broken. Representatives of the Volga Kalmucks still appeared at the *ḳurultai* (parliament) of 1640; Batur, the son and successor of Khara Khula gave his daughter in marriage to the grandson of Kho Urluk. By the same *ḳurultai* the dominance of Buddhism was firmly established among all branches of the Kalmucks. The progress made by Islām described in the *Ta'rikh-i Rashīdī* (p. 91) in connection with the above mentioned marriage contract apparently was not maintained. Most of the Muslim territories of Turkestan were under the suzerainty of the Buddhist Kalmuck prince on the Ili, the founder of the last great nomad empire in Central Asia, until the destruction of this empire by the Chinese in 1758 (subjection of Kāshgharia in 1682, conquest of Tashkend in 1723); as late as 1749 the regent (*Atalik*) of

Bukhārā and his opponent had to submit a dispute to the verdict of an embassy of the Kalmuck prince (*Tūra-i Kalmūk*) (Muḥammad Waḡa Karmīnagī, MS. of the Asiatic Mus., c. 581b, f. 101^b sqq.) A great part of the pasture grounds of the Kazaḡ was at once occupied by the Kalmucks. Islām was then almost completely driven out of the southern part of the modern Semirječe. From this period date several Buddhist monuments, including Tibetan inscriptions. It was only after the decline of the Kalmuck empire that these areas were again occupied by the Muḥammadan Kazaḡ. The wars of the Volga Kalmucks with the Crimean Tatars and their raids into Khwārizm had less effect on Islām; from 1724 the Kalmuck chiefs on the lower course of the Volga were simply considered governors (*namjestnik*) of the Czar of Russia. No connection existed then with the ruler on the Ili. The decision of the "governor" Ubushī and a great part of his people to migrate from Russia and settle on Chinese territory proved disastrous for the Kalmucks. During this migration heavy losses were inflicted on the Kalmucks in Central Asia, especially by the Kazaḡ (1771). Henceforth the Kalmucks were of no political significance either in Russia or in China. During the Muḥammadan rising in the Ili valley the great Kalmuck temple of Buddha near Kulḡja was destroyed (Radloff, *Aus Sibirien*, ii. 403). After the Russian revolution an "autonomous Kalmuck territory" (*awtonomnaja kalmizkaja oblast'*) arose in what was formerly the gouvernement of Astrachan, between 45° and 48° N. Lat. and 44°—48° E. Long. A portion of the Kalmucks in Semirječe (less than 2000 souls) which has adopted Islām and taken to agriculture is called Sart-Kalmaḡ.

KALPAK (т.), A Central Asian headdress, which was introduced by the Turks into Europe and became widely distributed there. The word *kalpak* is found in the most diverse Turkish dialects in meanings which are detailed by W. Radloff in his *Versuch eines Wörterbuches der Türkidialekte*, ii. 268 sq. (cf. also *kalabak*, ii. 234). The Eastern Turkish *tülpäk*, Djag. East. Turk. *tälpäk*, Kirg. and Karakirg. *telpäk*, meaning cap, felt cap (cf. also the French *talpack*) is certainly related. Cf. thereon Pavet de Courteille, *Dict. turk-oriental*, p. 408). In its original form the *kalpak* is a cone-shaped sheepskin cap, flattened on top, covering the head down to the eyes and ears, for the manufacture of which skins of darker colour, in people of rank particularly a black astrachan, were used and then trimmed with softer fur of a brighter colour. Such caps have been worn among almost all Tatar tribes from ancient times to the present day. In earlier times, as G. Rosen suggests, they were a part of the national costume also among the Ottomans. Nevertheless, neither this headdress nor the word *kalpak* can be proved to have existed before the middle of the xviiith century. The *kalpak* must, very soon after this, under the arabicising influence of Islām,

have been driven out by the turban in its countless forms (cf. 286 styles in Michael Thalmann, *Elenchus librorum or. mss.*, Vienna 1702, vi. 29 sq. on Codex Turc. VII, Bologna). But the *kalpak* remained as the distinguishing headgear of prominent Christian subjects of the Sublime Porte, with, it is true, considerable alterations in its original appearance. In place of the fur a thick black felt was used and the shape became swollen almost like a melon. Of these headdresses three kinds were especially known, called after professions which particularly wore them, viz. the *kalpak* of the physicians, of the money-changers and of the interpreters (*hekim*, *şarraf* and *terdžumān kalpaghī*). As late as the beginning of the sixteenth century the embassy interpreters, who were not Turkish subjects, had to wear the *kalpak*, when they went on business to the Porte. In the house the *kalpak*, which, on account of its weight, was too hot and uncomfortable for indoor wear, was placed on a stand elaborately carved, often painted and adorned with gilding, the *kalpaklık*, a piece of furniture, which was considered the sign of a distinguished and prosperous Christian household. When, with the coming of the fez, the *kalpak* threatened to go entirely out of use among the Christian population also, an edict (*firmān*) of the grand vizier 'Izzet Meḥmed Pasha ordered in 1842 that all non-Turkish subjects should wear the *kalpak* instead of the fez. But this order was not long enforced. At the present day the *kalpak* is still made and worn only by Armenians. The fine lambskins stretched over pasteboard shapes were at one time imported from Ural in Russian Tartary, and also from Khiva and Bokhārā, and manufactured and sold on the so-called *Kalpakdžilar* Čarshusu in Stambul. Among the peoples who adopted the name *kalpak* for their corresponding headdress, special mention may be made of the Slav tribes of the Balkans (cf. Slav *klobuk*; Greek *κολβάκι*). Down to 1763 the *kalpak* was also the headdress of the Hungarian Hussars. The high felt cap made of the finest arctic furs and adorned with valuable jewelled clasps, which is still worn as part of the state-dress of Hungarian magnates and Rumanian boyars, is also called *kalpak* (Magyar *kalpag*, cf. also *kalap* = hat). The Hungarians may have adopted the headdress from the Ottomans in the beginning of the xviiith century. Cf. also J. Szendrei, *A magyar viselet történeti fejlődése*, Budapest 1905, s.v. Among the Hussars of the German army, where the *kalpak* was worn since the time of Frederick the Great, *kolpak* means the cloth tab above in the bearskin, the colour of which served to mark the regiment. Under the First Empire in France the *kalpak* (*colback*) was introduced into the French army as the headdress of certain arms; under the Second Empire the mounted chasseurs wore a cap called *talpack*.

Bibliography (in addition to the works quoted): cf. Ch. White, *Häusliches Leben und Sitten der Türken*, ii. (Berlin 1845), p. 299 sq.; d'Ohsson, *Tableau de l'Empire Ottoman*, ii. (Paris 1790), 137; *Magyar Nyelvőr*, iv. (Budapest 1875), 400 (G. Szarvas); also vi. 365. (FR. BABINGER)

KALYÜB, a fair sized town in Lower Egypt with a railway station, 10 miles north of the central station at Cairo on the Cairo-

Alexandria railway. The town proper lies about a mile west of the station and about 3 miles from the right bank of the Nile, on the Tur'at al-Sardūsiya. Down to the middle of last century Qalyūb was the capital of the Mudiriya al-Qalyūbiya. Under the Khedive Ismā'il the Dīwān of the Mudiriya was moved to Benha. Since that date Qalyūb has been a *markaz* (district-capital). Branch lines run to Zaḳāzīk and the Barrage du Nil. The majority of the inhabitants are Muslims. According to 'Alī Pasha Mubārak, Qalyūb possesses a Shari'a court (*maḥkama Shar'iya*) and a hospital. Cf. 'Alī Pasha Mubārak, *al-Khiṭaṭ al-djādida*, xiv. 114 sqq.; Baedeker, *Égypte*¹⁷ (1914), p. 34; Samibey, *Ḳāmūs al-A'lām*, Stambul 1314 (1896), v. 3693b, where (line 2—3) we should read *simālinde for ḡenūbinda*.

A Greek Καλλιόπη — not yet, however, found — is at the base of the name. In the *Scalae* it is found under the form Καλιωπε (Maspero-Wiet, *Matériaux pour servir à la géogr. de l'Égypte*, Series i. 151).

Historical: John of Nikius mentions Qalyūb in his *Chronicle*, Chap. 113 (ed. Zotenberg, p. 321, 509). 'Amr b. al-'Ās [q. v.] had a bridge thrown over the canal at this town to be able to conquer the other towns of the province of Miṣr (circa 20 = 641). In 549 = 1154/5 the Caliph al-Zāhir granted Qalyūb as a fief to his great favourite Naṣr b. 'Abbās. Usāma b. Munqidh so depreciated this present in the eyes of Naṣr and his father that it became one cause of the murder of the Caliph by Naṣr and 'Abbās (Ibn al-Athīr, *al-Kāmil*, ed. Tornberg, xi. 126; Usāma b. Munqidh, ed. Derenbourg, i. 245; Ibn Muyassar, ed. Massé, p. 93). In the fighting between Selim I and Tumān-Bey, Qalyūb did not escape the raids of the Arabs (Ibn Iyās, *Tārīkh Miṣr*, under Ṣafar 923 = March 10, 1517). For embassies etc. Qalyūb was the last stage before Cairo. Thus, for example, in Rabi' I 925 (= March 1519) 'Alī Pasha Mubārak wrongly gives R. I 25, 923 for R. I 23, 925). Khā'ir Bey had the Sulṭān's envoy received there with the greatest ceremony by the Kādī Barakāt b. Mūsa (Ibn Iyās, *op. cit.*, iii. 109). The town had again to suffer exceedingly from the extortions and plundering of the half-savage soldiers and Mamlūks in the years 1219 and 1220 (1804 and 1805); cf. al-Djabartī, *Adḡūb al-Aḥbār*, under the years quoted. Qalyūb, as a result of its situation close to the gates of Cairo, may not have escaped on other occasions the effects of the political happenings in the capital. Ibn Duḳmāk (809 = 1406) and al-Zāhirī (839 = 1434/5) report, that in their day Qalyūb was for the most part lying in ruins.

Economic: Almost all sources praise the wealth of Qalyūb in gardens and trees, among which the acacias (*sanṭ*) are mentioned as particularly valuable. In spite of the restrictive edicts of al-Malik al-Kāmil, the ground was very badly farmed, so that Qalyūb's prosperity suffered considerably (cf. 'Othmān b. Ibrāhīm al-Nābulusi — wrote 637—648 = 1240—1249; Brockelmann, *Gesch. d. arab. Litt.* i. 335 — who devotes a longish section to Qalyūb in his *Luma' al-Qawānīn al-Muḍ'ira fī Dawūwīn al-Diyār al-Miṣriya*; quoted in 'Alī Pasha Mubārak, *op. cit.*, 114 sq.). — In 1240 (1824/25) Muḥammad 'Alī built a cotton mill in Qalyūb and later barracks and a remount depot were established there. The al-Shawāribī

family deserves special mention for its share in the economic development of Qalyūb, where they also built a serai with a mosque.

There are six mosques in Qalyūb, in one of which the Friday service is held. Among these the "great Mosque", formerly called *Djāmi' al-Zainabi*, with its great *Manāra*, made a great impression on Ibn Djabair (578 = 1182/3 in Egypt; cf. Brockelmann, *op. cit.*, i. 478; 'Alī Pasha Mubārak, *op. cit.*, p. 114). According to the inscriptions on its minbar and above the door it was renovated in 1148 = 1735/6 by the Shaikh al-'Arab of Qalyūb, Aḥmad al-Shawāribī. Among the tombs of saints the most important is that of Sidi 'Awwād with popular amusements and horse-racing.

'Alī Pasha Mubārak gives a very full account of the above mentioned al-Shawāribī family as one of the most prominent in the town. Al-Malik al-Zāhir Baibars gave them charge of the new bridge over the Baḥr Abu'l Manadjdja (cf. also al-Ḳalkashandī, transl. Wüstenfeld, p. 28) and granted them large estates as fiefs and an annual pension (which lasted till 1275 = 1858/9). Muṣṭafā Pasha granted them the supervision of the whole province of al-Qalyūbiya. Various members of the family also filled important posts in the administration, besides the office of Shaikh al-'Arab of Qalyūb, which seems to have been hereditary with them. Sulaimān al-Shawāribī's patriotism cost him his life: in Radjab 1213 (Dec. 1798) he was beheaded by the French for his part in an attempted rising (cf. al-Djabartī, *op. cit.*, iv. 37 sq.).

According to Ibn Djabān (cf. 'Abd al-Latif, *al-Ifāda wa 'l-I'tibār* etc., French transl. by de Sacy entitled *Relation de l'Égypte* etc., p. 595) the province of al-Qalyūbiya comprised in his time (777 = 1375/76) 59 townships and yielded a revenue of 419,054 dinars (but on p. 599 a list of 61 townships is given). Ibn Duḳmāk gives 60 with a total revenue of 383,140 dinars. In the time of the French expedition the revenues of the province from the estates (*Descr. de l'Égypte*, i. 306 sqq.) amounted to: 1. for the payment of the *miri* 3,390,742 dinars; 2. for the *kushūfiya* 1,710,462 dinars; 3. for the *fā'iz* 15,119,199 dinars.

The Baḥr al-Sardūs — according to legend built by Pharaoh and enlarged by his 'vizier Ḥamān' (Ibn Duḳmāk, al-Ḳalkashandī) — was, according to the enthusiastic description in Ibn Duḳmāk (whom al-Ḳalkashandī follows), a large canal, apparently with water always in it. This is indicated also by two documents of the years 891 (1486) and 1061 (1650/1) (quoted by 'Alī Pasha Mubārak) in the possession of the al-Shawāribī family. Al-Ḳalkashandī notes that the canal in his time had disappeared and that its place had been taken by the Abu 'l-Manadjdja canal, (cf. Wüstenfeld, *op. cit.*, p. 25 sq.); Maspero-Wiet, *op. cit.*, p. 105). According to 'Alī Pasha Mubārak, there was only a small canal in his time: the Tur'at al-Sardūsiya. Ibn Khallikān, Buṭrus al-Bustānī and 'Alī Pasha Mubārak give several scholars, who have the *nisba* al-Qalyūbī. The best known of them is Shihāb al-Dīn al-Qalyūbī (see the following article).

(A. RICHTER)

AL-KALYŪBĪ, AḤMAD B. AḤMAD B. SALĀMA, SHIHĀB AL-DĪN, an Arab author, pupil of the celebrated Shāfi'ī Faḳīh Shams al-Dīn (al-Shams) al-Ramlī (d. 1004 = 1596), was regarded in his day as an unchallenged authority and died towards the end of Shawwāl 1069 (July 1659). He composed numerous works, of which 21 have survived, in the fields of Fiqh, geography, medicine, secret sciences and Adab. To the 17 works mentioned by Brockelmann, *op. cit.*, we have to add 1. a *Kit. al-Muḍjarrabāt* in Göttingen (see *Verzeichn. der Hss. im Preuss. Staate*, 1. Hannover, 3. Göttingen, iii. Berlin 1894, N^o. 100); 2. *Mī'rādī al-Nabī* in the Zāhiriya or 'Umūmiya in Damascus, see Ḥabīb al-Zaiyāt, *Khasū'in al-Kutub fī Dimashk wa-Ḥawālikā* (Cairo 1902), p. 74, N^o. 40; Houtsma, *Cat. d'une coll. de Mss. arabes et turcs* etc. (Leiden 1889), N^o. 241; 3. *Risāla fī Ma'rīfat Asmū' al-Bilād wa-Urūdḥā wa-Aṭwālḥā* in Princeton, see Littmann, *A list of Arabic Mss. in Princeton Univ. Library* (Princeton—Leipzig 1904), p. 9, N^o. 40; 4. a *Kit. Hikāyāt*, anecdotes of pious individuals, different from the *Kit. al-Nawādir* in the Brit. Mus., see Ellis and Edwards, *A Descr. List of the Arabic Mss. acquired ... since 1894* (London 1912), p. 62, Or. 7018. Of his works there have been printed: 1. *Hāshiya* to al-Maḥallī's (d. 864/1400) commentary on al-Nawawī's *Minḥādī al-Ṭālibin*, along with the *Hāshiya* of Shihāb al-Dīn al-Burullūsī, Cairo 1306, 1318, 4 vols.; 2. *K. al-Ṣalawāt*, Bulāk 1300; 3. *al-Tadhkira fī 'l-Ṭibb* on the margin of al-Suwaydī's *Tadhkira*, Cairo 1302, alone Cairo 1305; 4. *Hikāyāt Ḥarība wa-'Adjība* or *Hikāyāt wa-Ḥarā'ib wa-'Adjā'ib wa-Laṭā'if wa-Nawādir wa-Fawā'id wa-Nafā'is*, usually briefly quoted as *Nawādir al-Kalyūbī*, which was only published after his death; see *The Book of Anecdotes, Wonders, Marvels, Pleasantries, Rarities and Useful and Precious Extracts*, ed. by W. Nassau Lees and Mawlawī Kabīr al-Dīn, Calcutta 1856, 2nd ed. 1864, also in Cairo several times since 1274, last ed. 1323, 1328, the conclusion of which differs from the Calcutta edition.

Bibliography: al-Muḥibbī, *Khulāṣat al-Aḥār min A'yān al-Karn al-Hādī'ashar*, i. 175; after this 'Alī Bāshā Muḥarak, *al-Khiṭaṭ al-Djadida*, xiv. 118; Sanguinetti, *Journ. Asiat.*, 1865, ii. 351; Leclerc, *Hist. de la Médecine arabe* (Paris 1876), ii. 303; Brockelmann, *Gesch. der arab. Lit.*, ii. 364. (C. BROCKELMANN)

KAMĀL AL-DĪN ABU 'L-KĀSIM 'OMAR B. AḤMAD... B. ABĪ DJARĀDA B. AL-'ADĪM AL-'UḲĀLĪ, historian of Aleppo, a member of the highly esteemed family of notables, the Banū Djarāda, whose ancestor had migrated from Baṣra into Syria with other members of the tribe of 'Uḳail about 200 (815) on account of a pestilence and had settled as a merchant in Aleppo, born in Dhu 'l-Hijda 588 (Dec. 1192; in the *Fawāt* wrongly 586), the son of a Ḥanafī ḳāḍī, whose office had been hereditary in the family for four generations. After studying in his native city, in Jerusalem, to which his father took him in 603 (1206/7) and again in 608 (1211/12), Damascus, in the 'Irāk and in the Ḥidjāz, he became in 616 (1219) professor in the madrasa of Shādbakht in Aleppo. He later filled the office of ḳāḍī there and served the two last Aiyūbids, al-Malik al-'Azīz (613—634 = 1216—36) and al-Malik al-Nāṣir (634—658 = 1236—1260) as vizier and several times, by their command, acted as ambassador to Baghdād and Cairo. When his native city was captured and destroyed on Ṣafar 9, 658 (Jan. 26, 1260) by the Tatars, he fled with al-Malik al-Nāṣir to Egypt. Hūlāgū summoned him back to Syria as Chief ḳāḍī, but he died in Cairo on Djumāda I 29, 660 (April 21, 1262) before he could obey.

His principal work was an alphabetically arranged history of the famous men of his native city, on the model of those of Khaṭīb al-Baghdādī [q. v.] and Ibn 'Asākīr [q. v.] in ten (according to some in 40) volumes entitled *Bughyat al-Ṭalab fī Tārīkh Ḥalab*, which on account of its too great bulk was never completed in a fair copy and was therefore already scattered to all the winds before the Mongol invasion under Timūr, so that even Ibn al-Shiḥna (see below) only knew of one volume of it (see *Cat. Codd. Arab. Bibl. Acad. Lugd.-Bat.*, ii. 82); odd parts are preserved in Paris (Bibl. Nat., de Slane, *Cat.*, N^o. 2138), in London (*Cat. Codd. Mss. Or. in Mus. Brit.*, Pars ii., N^o. 1290) and perhaps in Constantinople, Aya Ṣofya, N^o. 3036 (see Horovitz, *Mitt. Sem. Or. Spr.*, Berlin, x. 60, N^o. 51). Out of this he made a synopsis arranged chronologically entitled *Zubdat al-Ḥalab fī Tārīkh Ḥalab* down to 641 (1243), but died before he had finished the fair copy of this work either. The Paris MS. (de Slane, N^o. 1666, another in St. Petersburg, which, however, is perhaps only a copy of the Paris one, see V. Rosen, *Not. sommaires des manusc. arabes du Musée Asiat.*, St. Pétersbourg 1881, p. 98, N^o. 160) has been utilised by G. W. Freytag, *Selecta ex historia Halebi*, Lutetiae Par. 1819; *Regnum Saahd-aldaulae in oppido Halebi*, Bonn 1820; *Historiens orientaux des Croisades*, iii. 691—732; H. Derenbourg, *Vie d'Ousāma* (Publ. de l'Éc. des Langues or. viv., 2nd series, xii./i.), 569—585; E. Blochet, *L'histoire d'Alep de Kamāladdīn*, French version after the Arabic text, in the *Rev. de l'Orient latin*, 1896, p. 509—565, 1897, p. 146—235, 1898, p. 37—107, 1899, p. 1—49. A further synopsis with continuation down to Rabī' II 6, 951 (June 28, 1544) was made by Muḥammad Ibn al-Hanbalī, d. 971 (1564), entitled *Durr al-Ḥabab fī Tārīkh A'yān Ḥalab* (see *Cat. Codd. Mss. Or. in Mus. Brit.*, N^o. 334; *Bibl. Bodl. Codd. Mss. Orient.*, i. N^o. 810, 836, cf. ii. 597; V. Rosen, *Not. sommaires*, N^o. 203).

The basic work, the *Bughya*, was twice continued in the ixth century: 1. by 'Alā' al-Dīn

Abu 'l-Ḥasan 'Alī b. Muḥammad b. Khaṭīb al-Nāṣiriya, d. 843 (1439) entitled *al-Durr al-Muntakhab fī Ta'rikh Ḥalab*; the work contains a description of the city of Aleppo followed by biographies of distinguished natives since 658; Horovitz details the MSS. in the *Mitt. Sem. Or. Spr.*, x, 60 sq.; 2. by Muḥibb al-Dīn Abu 'l-Faḍl Muḥammad b. al-Shiḥna al-Ḥalabī, d. 890 (1485), entitled *Nuzhat al-Nawāzīr fī Rawḍ al-Manāzīr*, MSS. in Berlin (Ahlwardt, *Verz.*, No. 9791); vol. i. in London (*Cat. Codd. Or. in Mus. Brit.*, No. 436, 2); vol. ii. in Gotha (Pertsch, *Verz.*, No. 1772); vol. iii. in Paris (de Slane, *Cat.*, No. 2139). From this one of the descendants of Ibn al-Shiḥna between 1014 and 1024 composed a synopsis with occasional notes down to his own time; MSS. of this synopsis are given by Pertsch, *Verz. d. arab. Hdss. zu Gotha*, No. 1724 and further in *Cat. Codd. Arab. Bibl. Lugd.-Bat.*, ii, 85, No. dcccclii. This synopsis was published as *al-Durr al-Muntakhab fī Ta'rikh Mamlakat Ḥalab* by Joseph Elias Sarkis, Bairūt 1909. Extracts from it were given by A. v. Kremer in the *Sitzungsber. d. Wien. Akad.*, phil.-hist. Kl., IV (1850), i, 125 sqq.

Of the history of his family al-Akhbār al-Mustafāda fī dhikr Banī Abī Djarāda, which he composed for Yāqūt, the latter gives extracts in his *Irshād*, vi, 18—35. Of his verses an elegy on the fall of Aleppo, of which Abu 'l-Fidā', *op. cit.*, gives specimens, is the most famous. In 610 (1213) he handed al-Malik at-Zāhir a congratulatory letter on the birthday of his son Malik al-'Azīz, entitled *al-Darārī fī dhikr al-Dharārī*, which is printed from the MS. Nūri 'Oṭhmāniye, No. 3790 in the *Madjmu'a*, Stambul 1298, as No. 2. Last he wrote under the title *al-Wuṣla ila 'l-Ḥabīb fī Waṣf al-Ṭayyibāt wa'l-Tib* a guide to make all sorts of perfumes; MS. in Berlin (Ahlwardt, *Verz.*, No. 5463), in the Brit. Mus. (Ellis and Edwards, *A descr. List of the Arab. Mss. acquired ... since 1894*, London 1912, p. 56, 62, Or. 6388, and in Bankipore (*Cat. of the Arab. and Pers. Mss. in the Orient. Publ. Libr.*, iv, 146, No. 96). Specimens of his hand-writing — he was one of the most famous calligraphers, according to Yāqūt — are in St. Petersburg (see *Cat. des Mss. et Xylographes orient. de la Bibl. Imp.*, No. 147).

Bibliography: Yāqūt, *Irshād al-Arib ilā Ma'rifat al-Adīb* (Gibb Mem. vi.), vi, 18—46; Ibn Shākir, *Fawāṭ al-Wafayāt* (Bulāk 1299), ii, 101; Abu 'l-Fidā', *Ta'rikh*, iv, 634; Ibn Kut-lūbughā, *Ṭabaqāt al-Ḥanafīya* (Abh. f. d. Kunde des Morgs., ii, Leipzig 1862), No. 143; Weijers, *Orientalia*, ii, 248; Wüstenfeld, *Geschichtsschreiber der Araber*, No. 345; Brockelmann, *Gesch. d. Arab. Lit.*, i, 332. (BROCKELMANN)

KAMĀL AL-DĪN AL-FARISĪ (Muḥammad b. al-Ḥasan, Abu 'l-Ḥasan) died about 720 = 1320. He was a scholar equal in calibre to Ibn al-Haitham [q. v.] and, indeed, perhaps surpassed him in originality. Kuṭb al-Dīn al-Shīrāzī had called his attention to the latter's *Optics*, which he procured and wrote an excellent commentary upon. He added a series of brilliant treatises to it. These deal more particularly with the refractions and reflections of a sphere, the rainbow, the halo, *camera obscura*, etc. As to the latter it should be noted that the first scholar whom we know to have used the *camera obscura* was Ibn al-Haitham. On the wall opposite the orifice, he showed the image

of the sun during an eclipse of the sun and explained the phenomenon. That he did not succeed in obtaining a representation of the crescent moon is due, not to some error in his assumptions, but to the fact that its tips are too faint. Kamāl al-Dīn gave a more perfect theory and tested it by brilliant experiments. He first made the orifice very small and placed opposite it a surface half red and half green. He then showed how one got the sharper images the smaller the opening and that the images were independent of the shape of the orifice. The larger the opening the less these principles applied. It was to be noted that the images were reversed. With this apparatus Kamāl al-Dīn also observed on the wall the clouds and their movements as well as a bird flying past. The movements in the image are in the contrary direction to real life. At a later

The figure, taken from a manuscript, shows the path of the rays, which start from *b* and undergo a second reflection in the interior of the sphere. They produce the secondary rainbow. The primary bow would be the result of the first reflection. Goethe and Boissérée at a later date observed the secondary rainbow.

period Levi ben Gerson (Levi de Balneolis, d. 1344) used the *camera obscura* in eclipses of the moon also.

KAMĀL KHODJANDĪ. [See KEMĀL KHODJANDĪ.]

KAMĀL PASHAZĀDE. [See KEMĀL PASHAZĀDE.]

AL-KAMAR, the moon, the satellite of the earth, considered in quite early times the principal heavenly body next to the sun, whose path lay on the sphere next to the earth (*falak al-kamar*). Pythagoras was the first to recognise it as a dark body illuminated by the sun, from whose relative position with regard to the sun its changes in illumination or phases were seen to result; the recurrence of the latter, when the sun and moon have again reached the same positions with regard to the earth, led to the conception of the synodic month (29½ days). The Muḥammadans calculate time by lunar years, each of twelve months. These are alternately "full" of 30 days and "empty" of 29 days. This gives a year of 354 days. The Iranian astronomer al-Birūnī [q. v.] in his *al-Kānūn al-Mas'ūdī* (Maḳāla iii. Ch. 7) makes the interesting suggestion that the number 360 may have been introduced for the division of the circle, because it is midway between the solar and lunar years.

But as the synodic month, to be quite accurate, is 29.5306 days, which means that the month as reckoned by the Muslims is .0306 and the lunar year .367 days too short, a number which in 30 years amounts to 11.01 days, in the Muḥammadan calendar an intercalary period of 30 years is in use. It is called *al-maḍimū'a* and the intercalary year itself *al-sana al-kabisa*. Within an intercalary period there are 11 intercalary years.

The Muḥammadan year begins (or rather should begin) with the sunset after which the crescent moon is seen for the first time (first day of Muḥarram). The beginning of this era was dated on the first Muḥarram of the year in which the Prophet migrated to Medina from Mecca (July 15, 622 of the Christian era = *al-Hiḍjra*).

The first appearance of the crescent moon (*ru'yat al-hilāl*) (cf. *Ziḍj* of Ḥabash al-Ḥāsib, Berlin MS., Ahlwardt, *Verz.*, No. 5750, f. 151^b) on the night of Sha'bān 29 is of special importance as the fast of Ramaḍān begins with this moment. It is necessary to be able to calculate this moment when the weather prevents the observation of the first appearance of the crescent moon. This is one of the most difficult tasks of Arab astronomy. H. Suter has illustrated this from the example: "to find whether on the night of Sha'bān 29 of the year 540 A.H. the moon is visible" (cf. *Die astronomischen Tafeln des Muḥ. b. Mūsā al-Khwarizmī*, Copenhagen 1914, p. 67 sqq.) and C. A. Nallino gives a formula for ascertaining the smallest phases of the moon (cf. *al-Battānī sive Albatēnī Opus Astronomicum*, Milan 1903, i. 269).

Even in the earliest lunar theory, as stated by Hipparchus and Ptolemy, the complicated and irregular movement of the moon during a month is apparent: it is in reality due to the double attraction of earth and sun to which the moon is subjected (the three body problem of modern astronomers). The determination of the longitude of the moon in its orbit is the main problem of lunar theory and, in order to solve it in some degree, Ptolemy was forced to substitute for the eccentric circle of the moon's orbit an auxiliary circle, the so-called epicycle, which the moon would traverse regularly in an anomalistic month (27 days, 13 hours, 18 minutes), while at the same time the centre of this epicycle moved uniformly round the earth on a second called the deferent circle in a nodical month (27 days, 5 hours, 5

minutes). In addition the plane of oscillation was, according to Ptolemy, inclined to the plane of the earth's motion (ecliptic) at 5° (to be more accurate 5° 9'), while he made the line of intersection of the paths of the earth and moon (nodal line) execute a retrograde movement and put the centre of the oscillation about 104¹/₁₀ nearer the apogee (distance from the earth).

The true longitude of the moon therefore consists of the four so-called great variables, equation of centre, evection, variation and annual equation. The first denotes the transition from circle to ellipse, the second the displacement of the centre of the deferent just mentioned, while the fourth was laid down by the astronomer Kepler. As to the variation, it is given by the following expression:

$$-2' = \sin(1-\lambda) + 39' 5'' \sin 2(1-\lambda)$$

in which l and λ are the mean longitudes of sun and moon. From this formula we find that the variation in the syzygies ($1-\lambda=0^\circ$) and in the quadratures ($1-\lambda=90^\circ$) i. e. $2(1-\lambda)=180^\circ$, quite disappears or is very small, but on the other hand is very marked in the octants. Ptolemy, in order to reconcile smaller differences between theory and observation, actually introduced a kind of variation of the line of apsides, the *πρόσνευσις*. After Tycho Brahe had long been regarded as the real discoverer of the variation, the orientalist and astronomer L. Am. Sédillot in his article *Sur un manuscrit arabe dans lequel la variation de la lune est signalée* (*Compt. Rend.*, 1836) asserted that it was evident from the *Almagest* of the mathematician and astronomer Abu 'l-Wafā' al-Būzḍjānī (328–388 = 940–998) that he was really the discoverer of the variation to which he gave the name *Ikhtilāf al-Muḥādḥāt*. A long dispute arose on the accuracy of Sédillot's interpretation of the text, which ran through many years of the *Comptes Rendus*; Sédillot, Mathieu, Chasles etc. formed the one party, Biot, Binet, Bertrand etc. the other, who held the contrary view that Abu 'l-Wafā' had discovered nothing new but only substituted his *Muḥādḥāt* for Ptolemy's *prosneusis*. In the end Carra de Vaux has been able to prove definitely the erroneousness of Sédillot's argument by a thorough analysis of the Arabic text in question and the citation of other Arabic and also Persian and Hebrew sources.

The Arab astronomers adopted the lunar theory of Ptolemy and developed it. They also recalculated several numerical values on which the study of the *Ziḍjāt* accessible to us, e.g. those of al-Khwarizmī, al-Farghānī, al-Battānī and al-Djaghminī gives the information we require.

In determining the parallax of the moon (*ikhtilāf manẓar al-kamar*) and ascertaining its distance from the earth, the Arabs did not go beyond Ptolemy. Al-Birūnī in chap. 8 of *maḳāla* iii. of his *Kānūn al-Mas'ūdī* makes an interesting observation on the shadow thrown by a gnomon (*mikyās*) in moonlight. As the size of the radius of the earth in relation to the distance of the moon from the earth is not infinitely small (as in the case of the sun), the staff at the same apparent altitude of the moon and of the sun throws longer shadows in the case of the moon. Al-Birūnī calculates the difference between the two shadows for an altitude of 45°.

The Arab astronomers devoted special attention to the exact calculation of the frequency of eclipses (*kusūf al-kamar*), as they made use of it to

ascertain the difference in longitude between two places on the earth. They worked out tables (based on Ptolemy) which gave the times of the beginning and ends of the eclipse for various parts of the earth as well as the area of the moon's disc covered. But it is impossible to calculate these with great accuracy from observation only. The difficulties (according to al-Bīrūnī) lie in ascertaining the point where the eclipse begins on the edge of the moon, in the indistinctness of the shadow, the lack of agreement between the astronomical instruments of the two observers, etc. The result was that the calculations of longitude from eclipses of the moon were often very inaccurate. It is true that in al-Khwarizmi's astronomical tables (H. Suter, *op. cit.*, p. 85) there is an example in which the period of commencement of the eclipse agrees perfectly with the previous calculation of it, but not every calculation was so accurate. The Fātimid astronomer Ibn Yūnus (d. 399 = 1009 in Cairo), who goes so far as to distinguish five phases in the course of an eclipse, gives in his *al-Zīj al-Kabīr al-Hakīmī* cases where the difference between calculation and observation amounted to as much as 23 minutes (cf. Caussin, *Le Livre de la Grande Table Hakīmīte observée par . . . Aboul-hassan Ali . . . ibn Iounis* in the *Not. et Extr.*, vii. 92).

Several studies on the moon, none of which are yet published, have been preserved to us from the pen of the exceedingly prolific Arab mathematician, physicist and astronomer Ibn al-Haitham (d. 430 = 1039). We may mention: 1) the great *Maḳāla fī Daw' al-Kamar* (India Office Catalogue, N^o. 734, ix.); 2) *Maḳāla fī Ikhtilāf manẓar al-Kamar* (ibid., N^o. 734, xix) dealing only with a special case of parallax ("when the altitude of the moon is less than 30° and is western, its latitude lies south of the ecliptic and the head of the constellation of Cancer is under the western horizon so that it does not reach the meridian from below, the latitude of Medina being taken at 30° or near this figure, the parallax of the moon is in longitude the opposite of the order of the signs of the zodiac . . ."); 3) *fī Mā'īya al-athr alladhī fī Wadīh al-Kamar*, Municipal Library (*maḳālis baladī*) of Alexandria ("If one carefully observes and examines these marks on the superficies, one finds them always the same in shape and never changing, either in configuration or in position or magnitude or as regards their dark character").

Bibliography: For all questions relating to the moon and its orbit, see: C. A. Nallino, *op. cit.*, i. 59—60, 76—84, 85—92, 96—113, 265 etc., and also: H. Suter, *op. cit.*, p. 81—94. Wiedemann, *Über die verschiedenen bei der Mondfinsternis auftretenden Farben nach Bīrūnī in the Jahrbuch f. Photographie und Reproduktionstechnik*, 1914, p. 1—9. (C. SCHOY)

AL-KĀMAR. Title of Sura liv. of the Qur'an, after the splitting of the moon which is mentioned in the first verse. Cf. *MU'JIZĀT*.

KAMARĀN, an islet in the Red Sea, on the coast of Tihāma, opposite Zabīd. The fortified town of Kamarān has always belonged to who-soever possessed Tihāma; it contained prisons of the King of Yemen, in al-Maḳdisi's times, and a spring of sweet water called al-'Akd. Taxes and customs duties were collected there.

The jurist Muhammad Ibn 'Abdūya, a disciple of Abū Ishāq al-Shīrāzī, author of works on *uṣūl al-fikh*, lived in Kamarān and is buried there. When there is a storm and ships are in danger, the natives throw dust from his grave into the sea, which is then supposed to subside.

In modern times Kamarān has become one of the quarantine-stations for pilgrims; cf. on this subject Snouck Hurgronje, *Mekka*, ii. 299, note 1; do., *Verspreide Geschriften* (Bonnen and Leipzig 1923 sqq.), iii. 27, 32.

Bibliography: al-Muḳaddasī (ed. de Goeje), *B. G. A.*, iii. 2 103; Yāqūt, *Mu'djam* (ed. Wüstenfeld), iii. 80. (V. VACCA)

KĀMIL, the fifth metre in the system of Arab prosody, is regularly composed of three *mutafā'ilun* in each hemistich: it has three 'arūd and nine qarib:

I	{	<i>mutafā'ilun</i>	■	n	..	n	n	<i>mutafā'ilun</i>
		<i>mutafā'ilun</i>		n	n	..	n	<i>mutafā'il</i>
II	{	n	n	n	..	n	n	<i>mutafā</i>
		n	n	<i>mutafā</i>	..	n	n	<i>mutafā</i>
III	{	n	■	<i>mutafā'ilun</i>	..	n	n	<i>mutafā'ilātun</i>
		n	n	n	..	n	n	<i>mutafā'ilān</i>
		n	n	n	..	n	n	<i>mutafā'ilun</i>
		n	n	n	..	n	n	<i>mutafā'il</i>

In all the feet except *mutafā* and *mutfā* one may suppress either the second vowel of the foot (*mutafā'ilun*), or the second consonant with its vowel (*ta*), or the second vowel and the prolongation of the third consonant (*mutfā'ilun*) which is exceedingly rare.

As a result of these suppressions the regular foot, *mutafā'ilun*, may become *mutfā'ilun* (= *mu'af'ilun*), *mufā'ilun* (= *mafā'ilun*), *mutfa'ilun* (= *mustā'ilun*); if this is done so that a piece does not contain a single whole foot in *mutafā'ilun*, it then belongs to the *radjās* metre.

(MOH. BEN CHENEB)

AL-MALIK AL-KĀMIL. [See AL-MALIK].

KĀMRĀN MIRZĀ, second son of Bābur, and half-brother of Humāyūn; his mother was Gulrukh Bēgam, and he was born in Kābul city about 1509. He was cleverer than Humāyūn and had a poetical turn, but he was cruel and vicious, and a restless schemer. He repeatedly rebelled against Humāyūn, who was at last compelled by his officers to make him innocuous by blinding him in the end of 1553. He went to Mecca in 1554 and died there in October 1557. The most interesting thing about him is the devotion of his wife, Māh Čitāk Bēgam Arghūn, daughter of Shāh Ḥasan of Sind. She insisted on going on board his vessel

and accompanying him to Mecca, in spite of her father's remonstrances, saying that he had given her to Kāmran in the days of his greatness (in 1546) and that she would not abandon him now in the time of his misery. She died at Mecca a few months after her husband.

Kāmran was put in charge of Kandahār by his father, and in the beginning of Humāyūn's reign he was governor of the Panjāb. During the interregnum, when Humāyūn was in Persia, Kāmran and his younger brother, 'Askari, ruled over Afghānistān. He left one son and three daughters. The son, Abu 'l-Kāsim, who inherited his father's poetical talents, was confined in Gwalior by Akbar in 1557, and was put to death some years later as a dangerous competitor. All three daughters were given in marriage; one of them, named Gulrukh, was a woman of a masculine spirit; she married Ibrāhīm Ḥusain Sulṭān, and she and her son were thorns in Akbar's side. (Firishta, lith. ed., p. 221, and Muḥammad Ḥusain, *Darbār-i-Akbarī*).

Denison Ross; Djawhar Aftābī, *Memoirs of the Emperor Humāyūn*, transl. by Major Stewart (O. T. F. 1832); Bābur's *Memoirs*; Erskine, *Memoirs of Baber*; Gulbadan Begam, *History of Humāyūn* (O. T. F.), London, 1902; Badā'ūnī, *Muntakhab al-Tawāriḫ*, i. 451 sqq.; Elliot-Dowson, iv. 498, v and vi. There is a copy of Kāmran's *Diwān* in the Oriental Public Library, Bankipore, Cat., ii. 145, and 215, where a biography of Kāmran is given. (H. BEVERIDGE)

KĀMRĀN SHĀH Durrānī, the last sovereign of the Sadozai family of Afghānistān who succeeded his father, Maḥmūd Shāh, in the limited sovereignty of Herāt in 1245 (1829) and reigned till 1258 (1842). In the civil wars between the sons of Taimūr Shāh, the princes Zamān, Shudjā' al-Mulk and Maḥmūd, the prince Kāmran proved himself a brave warrior and in 1221 (1806) he took Kāndahār from Shudjā' al-Mulk, but lost it soon afterwards. In 1232 (1816) he took a leading part in the events which led to the disruption of the Durrānī monarchy. In revenge for an insult offered to his sister by Dōst Muḥammad he blinded and beheaded Fath Khān, the Bārakzai Wazīr (Dōst Muḥammad's father), to whom Maḥmūd Shāh owed his kingdom. This led to the loss of the whole kingdom except the Herāt province. Kāmran was debauched and indolent in his later years, but maintained himself at Herāt through the efforts of his able and unscrupulous wazīr, Yār Muḥammad Alikozaī. The siege of Herāt by the Qādjār Shāh of Persia in 1837-39 was the principal event of his reign. The rivalry between England and Russia was one of the principal causes of this siege, the Persians being advised by Russian officers, while Lieut. E. Pottinger, a young English officer, was the main spirit in the defence. In 1258 (1842) Kāmran Shāh was assassinated by Yār Muḥammad, who was in league with the Persians and remained in possession of Herāt. Coins were struck at Herāt by Kāmran.

KĀMRŪP, a district in Assam, situated between 25° 43" and 26° 53" N. and 90° 39" and 92° 11" E.; the greater part consists of a wide plain, through the lower portion of which the Brahmaputra R. flows from east to west; but south of the river there are ridges of hills, thickly covered with jungle. Under the rule of the Kōē dynasty, the first attempt to bring this country under Muhammadan rule was made by Muḥammad Bakhtiyār Khaldjī [q. v.], but his victorious progress eastward was checked when he attempted to enter Assam, and successive rulers of Bengal after him made similar fruitless attempts. In 1256 Ikhtiyār al-Dīn Yūzbak Tughril Khān invaded Kāmrup and erected a mosque in commemoration of his victories, but disease broke out among his troops and the Assamese destroyed the general and most of his army. The thick jungles and moist, unhealthy climate of the Brahmaputra Valley proved to be effectual obstacles to the progress of the Muhammadan troops. It was not until 1638 that they succeeded in gaining a footing in Kāmrup and Gauhati became the capital of a Muslim governor, but 20 years later they were driven out of the country by the Ahoms, who took advantage of the confusion that resulted from the conflicts between the rival claimants to the throne of Shāh Djahān [q. v.]. In 1662 Mīr Djumla [q. v.] made a vigorous attempt to conquer the Assam valley, but though he was at first successful, the difficulty of military operations during the rainy season and the outbreak of disease among his soldiers compelled him to beat a retreat into Bengal, and Mīr Djumla himself did not survive the failure of his expedition. After intermittent struggles for some years, the last vestige of Muhammadan rule disappeared in 1681 from Kāmrup, and it formed part of the Ahom kingdom, until it was ceded to the British in 1826.

Beng., vol. xli., Part i. (1872), p. 49 sqq.); E. A. Gait, *The Koch Kings of Kāmarūpa* (Journ. As. Soc. Beng., vol. lxii., Part i. (1894), p. 279 sqq.); B. C. Allen, *Gazetteer of Kamrup* (Allahabad, 1905), p. 27 sqq. **KĀN**. [See **KHĀN**].

KĀN WA-KĀN, the name of one of the seven kinds of modern poetry (*funūn*), unknown to the classical authors. It was invented by the people of Baghdād and takes its name from the formula used by story-tellers at the beginning of their recitals: "There was once upon a time". Originally the *kān wa-kān* was a rhymed tale and it was only later that it was applied to other subjects, especially of moral tendency. In the spoken language it was always in vogue in the east only, especially in its place of origin. The *kān wa-kān* is a poem composed of strophes of two lines the metre of which is given by the prosodists as follows: *mustaf'ilun fa'ilātun, mustaf'ilun mustaf'ilān fa'tān*.

But, according to the 32 specimens that I have seen, the last foot of the first verse is *mustaf'ilun* and not *mustaf'ilān*; and therefore there is a rhyme only in the last hemistich of every second verse. The principal variations are the disappearance of *s* or *f* in *mustaf'ilun* and *fa'tān* is often changed to *fa'ilān*. Al-Ibshihī, *al-Mustafraf*, Būlāk

1292, ii. 273 sqq., Abu 'l-Fidā', *Ta'rikh*, Constantinople 1286, iv. 158, and especially Huraifish, *al-Rawḍ al-fā'ih*, Cairo 1311, p. 23, 26, 29, 33, 34, 42, 53, 55, 71, 74, 77, 80, 86, 135, 137, 144, 169, 181, 191, 204, 217 give specimens of *kān wa-kān*.

Bibliography: Besides the majority of the works indicated in the article 'ARŪP see al-Khafādī, *Shifā' al-Ghalīl*, Cairo 1325, p. 9; al-Muhibbī, *Khulāṣat al-aṥhar*, Cairo 1284, i. 109; al-Ibshīhī, *al-Mustaṭraf*, Būlāḳ 1292, ii. 252—277; Muḥammad Ṭal'at, *Ghāyat al-arab fī shifā' al-shī'r al-'Arab*, Cairo 1316, p. 92—110; Muḥammad Diyāb, *Ta'rikh ādāb al-lughat al-'Arabīya*, Cairo (not dated), i. 129—150; H. Gies, *al-Funūn al-sab'a. Ein Beitrag z. Kenntn. sieben neuer arab. Versarten*, diss. Leipzig 1879, p. 53—62. (MOH. BEN CHENEB)

KĀN'ĀN, the biblical Kēnā'an, is a personality, regarding whom the traditions, in spite of their sparsity, agree in hardly a single point. Al-Baiḍāwī (ed. Fleischer, i. 513) mentions him as the father of the famous Nimrūd (Numrūd according to the *Lisān* and the *Tādī*); he is also regarded as the ancestor of the Kanāniyūn (*Lisān*, x. 191) and of the Berbers (al-Dimashqī, *Nukhbat al-Dahr*, ed. Mehren, p. 266 and Ibn Khaldūn, *al-'Ibar*, vi. 93, 22 sqq., 97, 11 sqq.). — Very little is known about him. Many refer to him the story in Sūra xi. 44 sq., that a son of Nūḥ in spite of his pressing appeal refused to take refuge in the Ark with him and thus perished in the Flood with the unbelievers (al-Baiḍāwī, ad locum and al-Tha'labī, *Kiṣaṣ al-Anbiyā'*, Cairo 1324, p. 36 below). — Al-Ṭabarī (ed. de Goeje, i. 199) also knows of a son of Nūḥ called Kan'ān, who lost his life at the Flood, but refers the Qor'ān verse in question to Yām b. Nūḥ (see *Tafsīr*, ad Sūra 44 sq.), whom, however, he identifies with Kan'ān in i. 199, 6.

While Kan'ān appears here as the son of Nūḥ and Ibn al-Kalbī mentions Shālūm (i. e. Kan'ān) as Nūḥ's fourth son (in Yāqūt, *Mu'djam*, ed. Wüstenfeld, iv. 311) we find him in the parallel passage to Genesis, ix. 25 (in al-Ṭabarī, *op. cit.*, p. 212) as a son of Ḥām b. Nūḥ (see also al-Yā'qubī, i. 13, 8 sq., 16, 1; al-Mas'ūdī, iii. 240, 294). According to a third tradition (in Yāqūt, *op. cit.*) Kan'ān was a son of Sām b. Nūḥ and according to a fourth — not quite reliable — tradition, a son of Kūsh b. Ḥām (al-Dimashqī, *op. cit.*).

(B. JOEL)

KĀN'ĀN PASHA. [See KEN'ĀN PASHA].

KĀNĀT, plur. *kanawāt*, *kanan*, *kanī* and *akniya*, means in Arabic: (1) canal, aqueduct, (2) lance or stick (see *Lisān al-'Arab*, xx. 66; *Tādī al-Arūs*, x. 304; Dozy, *Supplément*, ii. 414). These two conceptions have developed from the original meaning of "reed". The word may be said with considerable certainty to be borrowed in the western Semitic languages from the Assyrian or Accadian, where *kanū* = reed, bulrush; cf. Zimmern, *Akkad. Fremdwörter*, Leipzig 1915, p. 56. Hence we have in Hebrew *kanū*, in Aramaic *kanūyā*; the word passed through the intermediary of the Aramaic into Arabic; there in the popular dialects of Syria and Egypt it is pronounced *kanāya*, *kanūyāt*. The Greeks and Romans took over the Semitic word as *κάννα*, *κάννυ* (*κάννυ*), *canna*; note the change of meaning — an exact analogy to the Arabic — of the Latin *canalis*, strictly an

adjective meaning "reed-shaped", then "channel, canal". In modern Persian also *kanāt* is in use but there it has the special meaning of subterranean channel or aqueduct. The true Persian word for this particular kind of canal is *kārēz*, earlier *kahrēz* (Vullers, *Lexic. Pers.-Lat.*, ii. 767, 927; in the older language we also find *āwghūn*; see Vullers, i. 58). This latter word has in turn entered Arabic as *shirḍī* (also *shuharḍī*), but there means "water-holder", "cistern"; cf. *Lisān al-'Arab*, iii. 136; Lane, *Lexicon*, p. 1738; cf. also Yāqūt, *Mu'djam*, ed. Wüstenfeld, iv. 276, 2. Only in Syria (according to Moritz, *Zur antiken Topographie der Palmyrene*, in the *Abh. Pr. Akad.*, 1889, iv. 12) do we find *kahriz*, *sharḍī*, vulgar *kahriz*, in the meaning of "subterranean aqueduct". It may here be pointed out that the other words in Arabic for aqueduct seem also to be borrowed (probably all from the Aramaic); cf. Fränkel, *Die aram. Fremdwörter im Arab.*, Leiden 1886, p. 23—25; take, for example, *kaṣāṭil* (Dozy, ii. 344; from the Aram. *kaṣat* = castellum; that is "any large building"; cf. the meaning of *kanṭara* = bridge, aqueduct, castle).

The plural *kanawāt* occurs in Syria as a place-name. It is, for example, the name of a town on the western slope of the Ḥawrān, fifty miles south of Damascus, which is so called on account of its wealth of water, and is certainly a very ancient settlement, although hardly identical with the Biblical Kenāt (*Numbers*, xxxii. 42; *I Chron.*, ii. 23), which Wetzstein would rather recognise in K'neia (diminutive of *kanāt*), a village near Kerak, four hours' journey east of Der'at in al-Nukra; see Wetzstein, *Das batanäische Giebelgebirge*, Leipzig 1884 (from Delitzsch's *Psalmekommentar*⁴, p. 26). *kanawāt's* (*Kanawa*, Canatha) period of greatest prosperity was in the early centuries of the Christian era; splendid ruins still exist dating from the Roman period. Mention is made of the building of a new canal in the reign of Trajan; this must certainly have been simply the restoration of an already existing canal of older date. The upper town still has a well preserved ancient aqueduct. On this Syrian *kanawāt* see Burckhardt, *Reisen in Syrien und Palästina*, Weimar 1823 sq., p. 157 sq.; Seetzen, *Reisen durch Syrien*, Berlin 1854—59, i. 79 sq., iv. 51—54; J. Porter, *Five years in Damascus*, London 1885, ii. 90 sq.; G. Le Strange, *Palestine under the Moslems*, London 1890, p. 586; M. v. Oppenheim, *Vom Mittelmeer zum persischen Golf*, i., Berlin 1899, p. 194; P. Thomsen, *Loca sancta*, Halle 1907, p. 76—77; Georgius Cyprius, ed. Selzer, Leipzig 1890, p. 206—207; Moritz in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, x. 1856; Baedeker, *Palästina und Syrien*⁷, Leipzig 1913, p. 153—155.

On the Syrian aqueducts, *kanṭarat Zainab* and *kanṭarīr Fir'awn*, see *KANṬARA*.

Subterranean aqueducts such as we get in Persia are only rarely found in Syria, e. g. at Qaryatēn on the ancient road from Damascus to Palmyra (according to Moritz, *Die antike Topographie der Palmyrene*, loc. cit.). The town of Damascus is supplied by a channel from the river Barrādā, the water of which is led into the dwelling-houses by subterranean pipes. For information on aqueducts in Syria and Arabia in general see also J. Berggren, *Guide français-arabe vulgaire*, Upsala 1844, p. 56—57, s. v. *aqueduc*.

Among the oldest aqueducts of the Muslim period is the aqueduct of Mekka, which was begun in the time of Mu'āwiya. Zubaida, wife of Hārūn al-Rashīd, earned special merit by providing for the water supply of the holy city; in 810 (1407) she had canals made which led the water from the district of Tā'if, the valley of Minā and from 'Arafāt to Mekka. The channels, much neglected in course of time and often only very negligently repaired, were restored by the Turkish Wālī 'Uthmān Pāshā (1882—86). For details see Snouck Hurgronje, *Mekka*, the Hague 1888, i. 6—10, where the Arabic sources are also cited.

In view of the dryness of Īrān, artificial irrigation by means of canals has always been a necessity of existence there (cf., for example, *Polybius*, x. 23), as river water is in many places not available in sufficient quantity and the rainfall is slight. Open canals continually lose large quantities of water through infiltration and evaporation and they are also not infrequently damaged by cloud-bursts and torrential floods. The subterranean *kanāt* or *kārēz* (*kahrīz*) system is therefore generally preferred in Persia. By this means water is brought often from great distances to the humus-covered plains. Wells are made in the higher lying parts of the valleys, especially at the foot of hills, and the water accumulates plentifully in them and is led first by subterranean tunnels, latterly by open trenches and furrows (*ājūz*), to the fields and gardens to be watered. These channels are often 50 or more feet below the surface of the ground, are vaulted and often lined with bricks and so high that a man can crawl through them. Every 30 or 40 paces a perpendicular shaft, often of masonwork, and covered at the top, leads down to the pipe. In the making of these channels the Persians reveal great skill. The searching for springs and the making of channels is a special industry, that of the *muḳannī* (see especially Bishop, *op. cit.*; see *Bibliography*). The making of a *kanāt* costs a great deal in proportion to the water it supplies and the annual cost of maintaining it is also not inconsiderable. It is also very important to see that the water is properly distributed, and much care is taken that the villages in turn have the use of it for the proper length of time. This business of water-distributing is perhaps the most important part of the administration of a Persian village. A special official, the *Mir-āb*, is entrusted with the duty. He has also to see to the maintenance of the pipes etc., especially to their being kept clean; cf. thereon Gordon, *op. cit.*; see *Bibliography*.

At the present day the Persian *kanāt* system is, unfortunately, much neglected; many channels are now quite dry; for example, the great network of channels which once supplied the thickly populated town of Ray near Tīhrān is now so much destroyed that it can barely supply the wants of the village of Shāh 'Abd al-'Azīm which is built on the ruins of Ray (Polak, *op. cit.*, ii. 118). Tīhrān is, according to Bishop, *loc. cit.*, still supplied by 35 canals.

This method of irrigating the fields by artificial channels is called in Persia the *ābī* system of agriculture, in contrast to the natural method, the *deīmī* or *bārāmī* system; cf. Polak, *op. cit.*, ii. 120; Stolze-Andreas (see *Bibl.*), p. 8.

Binning, *Journal of Two Years' Travel in Persia, Ceylon etc.*, London 1857, ii. 171—174; J. Ussher, *A Journey from London to Persepolis*, London 1865, p. 575; J. E. Polak, *Persien. Das Land und seine Bewohner*, Leipzig 1865, p. 116—118; F. Stolze and F. C. Andreas, *Die Handelsverhältnisse Persiens in Petermann's Geogr. Mitteil.*, Erg. H. 77, Gotha 1885, p. 8—9; Mrs. Bishop (J. L. Bird), *Journeys in Persia and Kurdistan*, London 1891, i. 241 sq.; Sir Thomas E. Gordon, *Persia Revisited*, London 1896, i. 64—68.

A great network of canals cuts up Central Asia. The planning of this system is ascribed to Tīmūr; but they are certainly much older and their origin may be dated at least as far back as the early middle ages. To make them, the water from springs in the oases miles apart was collected, great rivers diverted, and water led by tunnels through ranges of hills and by aqueducts over the valleys. A great many of these canals are, however, now decayed, as in Persia. There the canal is called *arik* and the canal manager *arik-aksakal*. A thorough account of this Central Asian system of irrigation is given by A. Th. v. Midden-dorf in his article *Einblicke in das Ferghana-Thal* in *Mém. de l'Acad. imp. des Sciences de St. Petersburg*, 1881, Series 7, vol. xxix. (M. STRECK)

KANAWDJ or **KANŌDJ**, Skr. Kanyākubdjā, (known to the Arab authors as Kānawdj or Kīnawdj) was the capital of a powerful kingdom before the Muslim invasions. It is now a small town in the Farrukhābād district of the United Provinces on the R. Ganges (27° 2' 30" N. 79° 58' E.). It has been supposed to be identical with Ptolemy's Kanagora or Kanagoza (see McCrindle, *Ptolemy*, p. 134; Beal, *Travels of Buddhist Pilgrims*, p. 70). V. Smith disputes this on the ground that the existence of Kanawdj at the time of Ptolemy (140 A. D.) is doubtful. The identification is however not improbable. The first undoubted mention is found in the travels of Fa-hsien (405 A. D.), when it was a place of no great importance under the Gupta kings. At the time of Yuan Chwang's visit (circa 641 A. D.) under the rule of Harshavardhana it had grown into an important capital and a centre of Buddhism. It may be noted that this traveller gives the Chinese transcription (Kano-kü-she) of the Sanskrit-name Kanyākubdjā, while the earlier traveller Fa-hsien gives Ka-no-yi, answering to the Prakrit and modern form. The country of which it was the capital was known as Pančāla. After a period of anarchy and short lived monarchies it became the capital of the Gurdjara Pratihāra kings, who founded a dynasty which lasted for two hundred years. The most powerful king of this race was Bhōdja (A. D. 480—90) under whom Kanawdj became the capital of an extensive empire, which may be stated to have included all the plain of northern India from the Satlādj to Bihār and southwards to Gūdjārāt and Saurāshtra. On the west it was bounded by the territories of Sind now under Muslim rule.

Al-Mas'ūdī writing in A.H. 332 (943—4) says that the king of Kānawdj ruled over the country bordering on Multān and Sind and southwards on al-Mānkīr, the country of the Ballahrā (i. e. the Vallabhi kings), and al-Birūnī [q. v.], says that Muḥammad b. al-Kāsim b. al-Munabbih, who had entered Sind from Sijīstān, penetrated India as far as Kānawdj, but the date of this invasion is not given. Probably this invader is identical with Muḥammad b. al-Kāsim b. Muḥammad, the conqueror of Sind who, according to the *Čač-nāma*, made war on the chief of Kānawdj. But, if any such expedition took place, it could not have been directed against Kānawdj itself, but only against its territories bordering on Sind. There is no ground for supposing that any Muḥammadan invader penetrated as far as Kānawdj before Maḥmūd of Ghaznī. His conquest overthrew the Pratihāra rule, which had already been weakened by the attacks of the Rāshtrakūṭas. At the time of Maḥmūd's invasion, after his conquest of Djaipāl, the Shāhi of Gandhāra, Kānawdj was under Rādjayapāla, who abandoned the city and fell back on Bāri, east of the Ganges, which became the capital. After Maḥmūd's departure the Čandēls seized on Kānawdj and Rādjayapāla was killed. Maḥmūd returned next year and defeated the Čandēls, and the Kānawdj kingdom continued as a small state until it fell into the hands of the Gaharwār Rādjpūts.

In 589 (1193) the final destruction of the Hindū kingdom was brought about by the invasion of Mu'izz al-Dīn Muḥammad b. Sām, the Ghōrī king of Ghaznī, and Kānawdj ceased to be a place of importance. It probably never really recovered from its destruction by Maḥmūd, as al-Birūnī, writing as a contemporary, says that it was mostly in ruins after the transfer of the capital to Bāri. Mu'izz al-Dīn adopted the style of the coins or Kānawdj in some of his issues with Sanskrit legends, and these were probably struck at Kānawdj after the conquest. There are not many important events in its later history.

In 948 (1540) the emperor Humāyūn was defeated here by Shēr Khān, and in the eighteenth century it was included in the territories of the Bangash Nawwābs of Farrukhābād and afterwards in Awadh. During the mutiny of 1857 the Nawwāb of Farrukhābād was defeated by the British army here.

Kānawdj was made a mint by Shēr Shāh after his victory over Humāyūn, and on the Surī coins it appears and "Kānawdj urf Shērgarh". Shērgarh was changed to Shāhgarh in Akbar's reign. Under Muḥammad Shāh and his successors, Aḥmad Shāh, 'Ālamgir II, Shāh Dīhān III, and Shāh 'Ālam II, the name of the mint was Shāhābād Kānawdj.

From Kanawdj are derived the names of the Kanawdjia section of the Brāhman caste and the Kanudjia dialect of Western Hindi. The only important modern industry is cloth-printing.

(M. LONGWORTH DAMES)

KANDĀBĪL, a city in the territory of the Budha (Budhiya, var. Nudha) which corresponds to the modern Kačhī or Kač Gandāva in Balōčistān. It is probably the modern town of Gandāwa, which is not now important. Kandābīl was taken by the Arab invaders in the time of al-Ḥadīdjādī probably before the invasion of Sind by Muḥammad b. al-Kāsim [q. v.] in 89 (707). The *Čač-nāma*, a legendary history of Sindh and its capture by the Muslims, mentions Kandābīl as having been taken by the legendary King Čač, who advanced through Armābēl (Las Bēla) and Turān (the hill-country of Kuṣṣār) into a desert, and took the fort situated on the river Sinī (which should doubtless be read Sibī, as a branch of the Nārī flowed through Sibī towards Gandāva). In the reign of Yazīd II (101—105 = 720—724) it was chosen by Yazīd b. al-Muḥallab as a place of refuge for his family when he rebelled. Al-Iṣṭakhri and Ibn Ḥawkal mention it as the principal emporium of the Budha. In the time of the Caliph al-Manṣūr (136—158 = 754—775) it is stated by al-Balādhuri that Hishām b. 'Amr al-Taghlibī attacked a body of Arab rebels at Kandābīl, and 'Imrān b. Mūsā in the reign of al-Mu'taṣim (218—227 = 833—842) conquered Muḥammad b. Khallī there and carried the inhabitants off to Kuṣṣār. The name of Kandābēl or Kandā'il is not met with in more recent times.

Its identification with Gandāwa is doubted by Raverty on the ground that the *Masālik wa'l-Mamālik* (cf. Iṣṭakhri, p. 179 g) states that it is but five farsangs distant from Kuṣṣār, but this is not in accordance with its position as shown in al-Iṣṭakhri's and Ibn Ḥawkal's map (see *Journ. As. Soc. Beng.* 1892. Plate XI) which shows it to the west of the Mīhrān and a long distance North of Kuṣṣār. There is in reality no other place with which it can reasonably be identified. Cf. also J. Marquart, *Erānsāhr* (*Abh. K. Ges. Wiss. Göttingen*, Phil.-hist. kl., new series III, N^o. 2, Berlin 1901), p. 187 *sq.*, 190. Gandāwa remained an important centre as is shown by the Balōč ballads of the commencement of the xvth century, and it is probable that the *k* of the Arab writers represented a vernacular g, as in Kandahār for Gandhāra and other cases. It is an ancient walled town standing on a mound, and was long the capital of the province of Kačhī, which from it obtained the name of Kačh Gandāva. The disappearance of the name Kandābēl from history may be therefore accounted for by the decay of the Arab rule and the revival of indigenous government which naturally gave the chief town its original vernacular name.

(M. LONGWORTH DAMES)

ḲANDAHĀR. 1. The name given by the Arab historians to the Indian Kingdom of Gandhāra, situated in the valley of the Kābul river as far as its junction with the Indus. Its capital was Waihind or Ohind as noted by al-Bīrūnī (Sachau i. 206); and at an earlier period al-Mas'ūdī speaks of Ḳandahār as the country of the Rādjipūts (Rahbūt) and as situated on the river of Kābul which flows into the Indus (Sprenger p. 381). It was from this Ḳandahār that the name was carried to the settlement of the Gandhārians on the banks of the Arghasān, which afterwards became famous as the modern Ḳandahār.

(M. LONGWORTH DAMES)

ḲANDAHĀR. 2. A city in Afghānistān (which also gives its name to a province) situated 31° 27' N. and 65° 43' E. at an elevation of 3,462 ft. between the Tarnak and Arghantab rivers. It is an important centre of trade and administration, with a population estimated at 31,000. The province, now the principal territory of the great Durrānī tribe of Afghāns, is identified with the Haran-wati of the Achaemenians, the classical Arachosia, and the mediaeval Zamīn-dāwar and Zābul, and historians have generally assumed that the town was founded by Alexander and named Alexandria Arachosia, but this does not rest on good evidence, and it is very improbable that the name Ḳandahār can be derived from Alexandria. Its identity with the name Gandhāra, the ancient Indian Kingdom occupying the valley of the Lower Kābul River, on the other hand, appears to be well established. Ḳandahār was the form used by the Arab chroniclers for Gandhāra; the Ḳandahār of Mas'ūdī, for instance, has nothing to do with modern Ḳandahār. There seems some ground for accepting Bellew's theory that the name was brought to Arachosia by emigrants from Gandhāra. The most probable period for such an emigration is the fifth century, when the Ephthalites conquered Gandhāra, as related by the Chinese pilgrim Sung-yun, who visited Gandhāra about A. D. 520. Buddha's begging-bowl, still preserved in the Shrine of Sulṭān Wais outside Ḳandahār, was probably brought there by refugee Buddhist monks. It was not however till the 12th or 13th century that the new Ḳandahār began to be famous. It is not mentioned by the Arab historians in their record of the conquest of Arachosia (al-Rukhādī): the capital was then Bust which was taken by 'Abd al-Rahmān, and the same place was a mint-town of the Ṣaffārids. It was not until after the destruction of Bust by 'Alā al-Dīn Djahān-sōz in 545 (1150) that Ḳandahār began to rise into

importance. Shams al-Dīn II, the Kart ruler of Herāt, is stated by Khwāndamīr to have besieged Ḳandahār, and as his reign began in 676 (1278) it may be held that by that period Ḳandahār had become the capital, and henceforward it plays a prominent part in history. It was conquered by Timūr and formed part of the province bestowed on his grandson, Pir Muḡammad. At the close of the 15th century it formed part of the Kingdom of Ḥusain Bāikarā of Herāt, and the name Ḳandahār first appears as a mint on his coins. Under Ḥusain, the Arghūn Chief, Dhu 'l-Nūn Beg, obtained the government of Zamīndāwar in addition to other provinces and made Ḳandahār his capital. After his death in the wars with Shaibānī the emperor Bābur drove his son Shāh Beg Arghūn out of Ḳandahār in 913 (1507), but Shāh Beg soon recovered the town with the aid of Shaibānī and held it for several years, but Bābur finally took it in 928 (1522) and it remained part of the territories of the Mughal Empire of India, although always regarded by the Ṣafawī Shāhs of Persia as properly belonging to Khorāsān. Kām-rān succeeded Bābur in the possession of Kābul and Ḳandahār, and held them even when his brother Humāyūn was expelled from India. A Persian attack on Ḳandahār in 941 (1535) failed. In the disputes between the brothers which followed Humāyūn's exile, Humāyūn besieged Ḳandahār with the aid of a Persian army and after its fall made it over to the Persians, but re-took it from them afterwards. In the early part of Akbar's reign Ṭahmāsp Shāh succeeded in taking Ḳandahār 965 (1556) and Akbar did not recover it till the latter part of his reign, 1003 (1594). Persians again took it from the Emperor Djahāngir in 1031 (1621), but Shāh Djahān's army occupied it in 1047 (1637). The last transfer was in 1058 (1648) when Shāh 'Abbās II took it, and the Mughal Emperors were never again able to conquer this province.

Ḳandahār remained under the Ṣafawī Monarchy until the rising of the Ghalzai tribe to power under Mir Wais (v. GHALZAI). The success of the Ghalzai rebellion in driving the Persians out of Ḳandahār emboldened them to invade Persia itself, and Maḡmūd became Shāh of Persia. Ḳandahār itself came into his brother's power, and the Ghalzais maintained their hold on it until Nādir Shāh took it after a year's siege in 1151 (1738). During the siege he built a new town outside the old city and named it Nādirābād. The Ghalzais were driven away from the neighbourhood, and the Abdālīs, who had been removed to the Herāt province, were allowed to return. They are still the most important element in the province. Aḡmad Shāh, one of their leaders who had held high command under Nādir Shāh, obtained possession of Ḳandahār without difficulty after the latter's death, and made it the capital of the Durrānī Kingdom which he founded (v. AḡMAD SHĀH, ABDĀLĪ, DURRĀNĪ, AFGHĀNISTĀN). He built a new town and gave it the name of Aḡmad-shāhī with the epithet of *aḡhrāf al-bilād*, "most illustrious of cities", which appears on all coins struck there during the Durrānī rule, but has been replaced under the Bārakzais by the old name Ḳandahar. The vicissitudes of Ḳandahār were not at an end; it passed rapidly from one pretender to another in the course of the wars between Zamān Shāh and his brothers, Maḡmūd and Shudjā

'al-Mulk, and, after Dōst Muḥammad Bārakzai had obtained the principal power, the inevitable rivalry set in and Kandahār was held for long by his brothers. Kohandil and Furdil. In 1839 it was occupied by a British Indian army in support of Shāh Shujā 'al-Mulk, and held till 1842 when the British left Afghānistān. After Dōst Muḥammad's death Kandahār again passed from one to another during the civil wars between his sons (*see* 'ABD AL-RAḤMĀN KHĀN). In the war of 1879—80 after the deposition of Yatqūb Khān, Kandahār was for a time erected into a separate state under the Wālī Shēr 'Alī, but after Aiyūb Khān's invasion and his final defeat by Roberts at Kandahār the British Government decided to put the whole country under 'Abd al-Raḥmān as Amir, and the separate state of Kandahār came to an end. Since then it has remained peacefully under him and his successors.

The changes in the political relations of Kandahār are reflected in its coinage. It first appears under Ḥusain Bāikarā of Herāt; then under Humāyūn. Then for a long season only a few copper coins of Persian origin are known. Rupees were struck by Djahāngīr and Shāh Djahān. These are followed by a long series of anonymous copper coins of Persian origin bearing figures of antelopes, peacocks, the hand of Fātima or the sword, *Dhu 'l-fikār*. Mahmūd the Ghazai struck rupees, and Nādir Shāh also, both in the names of Kandahār and Nādirābād. Then follows a full series of all the Durrānī Kings, followed by anonymous coins in the name of the "Ṣāhib-i-Zamān", or "Amir-i-Kullamīr". Last of all come the coins of the Bārakzai dynasty, and even the temporary Wālī, Shēr 'Alī, is represented.

The site of Kandahār has been several times altered. The town taken by Nādir Shāh appears to have been on hilly ground; it was no doubt the Ḥusainābād built under the Ghazais and named after the Persian King Ḥusain Shāh, afterwards dethroned by Maḥmūd. Nādirābād seems to have been some distance away on the open plain, while Aḥmadshāhī, the modern Kandahār, was nearer to the old city, according to Elphinstone. Masson about 1830 describes the ruins of the old town dismantled by Nādir Shāh as on the slope of a hill about two miles distant from the walled town of his days. The tomb of Aḥmad Shāh is in Kandahār.

(M. LONGWORTH DAMES)

KANDAHĀR. 3. A fort in the Dekkhan, 77° E. 19° E. which gives its name to a talūka in the dominions of the Nizam of Ḥaidarābād. This place appears to be the mint-town of some rupees of Kandahār struck in the reign of the Mughal Emperor Muḥammad Shāh from 1157 to 1159 (1744-45). As the city of Kandahār in Afghānistān had been separated from the Mughal Empire since 1058 (1648) and was at this period in Nādir Shāh's possession, it is impossible that these rupees should have been struck there.

KANDŪRĪ. The Persian word *kandūra* or *kandūrī* means a leather or linen tablecloth; in Hindūstānī this word means also a religious feast held in honour of a venerated person like Fātima. In this latter meaning the word has been imported, apparently, from India into the Indonesian archipelago. In Acheen the word is unchanged, in Java it is slightly altered into *kepūduri* or *kepūduren*; it may be noted that nowadays the more usual term in Java is: *seḍekah* or *sidekah*, from the Arabic *ṣadaqa*, *slametan*, from the Arabic *salāmat*, or *ḥādījat*, a well known Arabic word, meaning need, want of a man's presence at a feast, and hence the festival itself. In general it is a feast given with a religious purpose, or at least in conformity with religious law, just like the *walīma* in the books of *fiḥh*. The occasions which give rise to it are numerous, for instance: days of commemoration, domestic events, especially circumcision, the completion of teaching the Qur'ān, certain periods, such as pregnancy, sowing and harvest, and sundry reasons like setting out on a journey, occupying a new house and other enterprises, the averting of epidemics and calamities, etc. According to the Law each *kandūrī* should have a religious character; the poor must be invited, forbidden things should be avoided, but the strong local *ādāt* is always prone to look for means of effecting a compromise. Every complete *kandūrī*, especially those in commemoration of deceased relatives and those given on the anniversary of a saint, is sanctified by means of recitation of the Qur'ān, *dhikr*'s or prayers; popular superstition, however, regards such *kandūrī*'s as consisting of actual offerings of food to the deceased. Almost every *kandūrī* is opened by a prayer, the commemorative ones by the *do'a kubur*. In Acheen some months are called *kandūrī* with a second word indicating the food the sacred meal consists in.

(PH. S. v. RONKEL)

KANEM, a country in the Central Sūdān, east and north-east of Lake Tchad. Until recent years Kanem was only known from the accounts of Barth, who visited a part of it in 1851, and Nachtigal, who crossed it in 1871 on his way to Borku. But from 1900 onwards, the work of French scientific missions, as well as the explorations of officers and officials entrusted with the administration of the "territoire militaire du Tchad", have made it possible to rectify and complete the data furnished by these two travellers.

The name Kanem, taken in the widest acceptance, is applied, according to Nachtigal, to a region bounded on the north by the caravan route from Kavar to Lake Tchad, in the south by the Baḥr al-Ghazal [q.v.], in the east by the depression of the Eguei, in the west by the Lake, and lies between 14°—16° N. Lat. and 12°—14° E. Long. (Greenwich). The surface may be estimated at 27,000 to 30,000 square miles. Kanem, in the stricter sense, only occupies about a quarter of this huge area, between Lake Tchad on the west, Baḥr al-Ghazal on the south and the mountainous massif of the Manga, which separates it from the Eguei, on the east.

The most characteristic topographical feature of Kanem is the existence of numerous sand dunes

running N. W. by S. E., separated from one another by hollows several hundred yards broad and sometimes four or five miles long. Dunes and depressions are specially marked in the northern part. The hollows, which are given the name of wāds, are dry except during the rainy season, when ponds are formed in the deepest parts; their bottoms consist of soil impregnated with natron. Below this, to a depth of 3 to 30 feet, lies a vast water-bearing stratum; wells therefore are dug into the beds of the wāds. The existence of this subterranean water supply has suggested that the present Kanem is simply an ancient lagoon formerly fed by the waters of the Bahr al-Ghazal and now dried up. The wāds themselves would be the beds of the ancient exits or *baḥr* of the Tchad. The shore itself is in process of transformation. It is bordered by elongated islets lying S. S. E. by N. N. W. and separated from one another by narrow channels. The islets, which number 300, of which 80 are inhabited, lie from two to three miles from the shore. They are divided into two groups, the Kūri archipelago in the south and the Buddūma archipelago in the north. The gradual desiccation of the south-east part of Lake Tchad has added a certain number of islands to the mainland. Peninsulas and bays, which cut into the shore, have thus been formed and force sailors to make numerous detours.

The climate of Kanem is that of tropical regions. Two seasons are distinguished, the rainy season from July to September, and the dry season from February to June. The intermediate period, from October to January, corresponds to winter and is marked by a perceptible drop in the temperature; in the bottoms of the wāds the thermometer goes sometimes down to zero Centigrade ($\approx 32^\circ$ Fahrenheit). The rains themselves are unequally distributed and diminish from south to north. The very luxurious vegetation of the southern part becomes less and less rich as one ascends northwards. It flourishes on the slopes of the wāds, the bottoms of which remain barren. The date-palm grows wild in many of these wāds. It even forms a regular oasis at Mao, in the centre of Kanem, but disappears in the northern part, which is of prairie character. Cultivation is limited to the area around the villages, built on the slopes of the dunes close to the wooded zone. The commonest crop is the millet, to which may be added beans and cotton in the *baḥr* of the Tchad. The rearing of horses, cattle, sheep and camels is also a very important source of income for the inhabitants. Fishing around the lake and hunting in the interior also contribute to the support of the inhabitants. The fauna is very rich and varied. The elephant is becoming scarce, but the rhinoceros, the hippopotamus, lion, buffalo and panther abound in Kanem proper and the ostrich, antelope, gazelle and giraffe on the northern steppes.

The number of inhabitants is difficult to estimate. It is certainly not above 80,000 to 100,000 or about two to the square mile. The population is settled, with a few nomads. The principal settlements are in the south Ngūri, in the S. E. Mondo, in the centre Mao, "a junction of roads, a centre of gravity and of confluence of races... the first oasis in the date country, still rich in millet, suited both for the rearing of camels and cattle". (Largeau).

The population is far from being homogeneous.

The diverse elements which compose it belong some to the negro group and some to the Arab group, more or less altered. To the first belong the Kanembū, the Buddūma, the Kūri; to the second the Ūlād-Slimān and the Shoa; the Tundjur and Tabu are classed between the two.

The Kanembū, descendants of the first settlers in Kanem, constitute the basis of the population, upon whom they have imposed their language. They are dark grey (*asrak*) in colour and tall in stature. Industrious and peace-loving, they are settled and devote themselves to agriculture. They profess Islām and are fairly strict Muslims. In their midst live groups of individuals called Ḥaddād (in Kanembū *dogoa*) who, although differing from the Kanembū neither in language nor in physical type, are considered as belonging to an inferior race and are despised. These natives are distinguished from the others by their weapons and by their mode of life. They use bows and arrows, while the Kanembū use spears, and live chiefly by hunting. Very warlike in disposition, they have played an active part in the civil wars which desolated the country in the course of last century.

The Buddūma and the Kūri inhabit the islands of Lake Tchad, to which they retired when they abandoned the mainland. The Buddūma, who occupy the northern archipelago, live by fishing, cattle-raising and the cultivation of millet. Before the French occupation, they practised piracy to the detriment of their neighbours of Kanem and even at the expense of the natives of Bornū [q. v.]. They have, for the most part, remained fetish-worshippers, although they have adopted some Muslim customs. The Kūri, on the other hand, while leading the same sort of life as the Buddūma, are completely islamised.

The Ūlād Slimān and the Shoa represent the Arab element in Kanem. The first, who came from Tripolitania and Fezzān [q. v.] in the middle of the nineteenth century, have preserved the Semitic type quite pure. They have light complexions, speak the Arab dialect of Tripolitania and dress like the Arabs of the north. Nomads and robbers, possessing, thanks to their rifles, an incontestable superiority over the negro tribes, their sole means of existence was the slave trade and brigandage. Since the French occupation, some sections of them have taken service with Europeans, while others have left the country and entered the service of the Sanūsīya.

Of Arab origin, like the Ūlād-Slimān, the Shoa have been long established in the Sūdān. But if they have retained the use of the Arab language, which they speak quite purely, their physical type has been markedly altered by mixture with the black population. The Islām which they profess is fairly strict among the tribes of the north, where many of them are affiliated to the Tidjāniya brotherhood; among the tribes of the south, however, their faith has been contaminated by fetishist practices and the orthodox regard them as *kirdi*, i. e. idolaters. The Shoa live almost entirely by cattle-rearing; nomads in the dry regions near the desert, they become settled in the moister southern regions. They are represented in Kanem by the Ūlād Serrar, the Bantu Wail and the Dagana of the Bahr al-Ghazal.

The Tabu or Teda, who came originally from Tibesti, are fairly numerous in Kanem. But, as

a result of contact with negroes, they have lost some of their distinctive features, notably the slimness of the body and elasticity of gait. They are also much less fanatical than their kinsmen who have remained among the mountains. Lastly, while the Tabu, strictly so-called, are nomads and live almost entirely by brigandage, the Tabu of Kanem or Damagadā Konumā are for the most part settled. They follow agricultural pursuits, for which they are not fitted, without great success. The principal bodies of them are the Gadoš, the Warabba, the Dogorda and the Yorūmma, related to the Kasherda of the Baḥr al-Ghazal. Their language is connected with the Kanuri spoken in Bornū.

The Tundjur are the descendants of Hilālī Arab tribes, who, after sojourning around Tunis, migrated to Dār Fūr at the end of the fifteenth century. There they passed to Wāḍai and finally settled themselves in Kanem towards the middle of the seventeenth century. Much mixed with negroes since then, they form a group intermediary between the Arabs, the Kanembū and the Tabu. Arabic is their proper language, but they also speak Tabu and Kanembū. They are found especially in the region of Mondo and acknowledge the authority of a chief called *fagḥa*.

History. According to the Arabic sources studied by Marquart, who modifies on this point the data of Barth (cf. BORNŪ), the kingdom of Kanem seems to have been founded by the Zoghāwa, whose territory extended in the ninth and tenth centuries A. D. from Dār Fūr to Lake Tchad and Kavar. Al-Bakrī mentions the inhabitants of Kanem as idolators and al-Idrīsī seems also to consider them as such. Some time after the tenth, but not later than the twelfth century, Kanem was occupied by the Tabu (Teda) who came from Borku and Tibesti, conquered the Zoghāwa and introduced Islām. This occupation seems to coincide with the accession to the throne of the Yazanīs, who claimed to be descendants from Saif b. Dhi Yazan [q. v.] and became the disseminators of Islām, which had been introduced by al-Hādī al-ʿUḡmānī, the predecessor of the Yazanīs. The *Kītib al-Istīḡḥār* (ed. von Kremer, Vienna 1852, p. 32, transl. Fagnan, p. 61) places the conversion to Islām of Kanem about 500 = 1106/7. According to a Hausa legend, Abū Zaid al-Fāzānī (end of the xiith and beginning of the xiiith century) preached Islām in Kanem and Borku. Another tradition refers the introduction of Islām to the beginning of the twelfth century, in the reign of King Oumé. In any case this religion was solidly established in Kanem in the thirteenth century. Some Muslims from Kanem founded a Maliki school in Cairo between 640 and 650 (1242—1252). The soi-disant descendants of Saif remained in power, as long as the kingdom existed. They preserved their complexion "fair like the Arabs" down to Selmaʿa, son of Bikora, who was the first negro king of the country. This dynasty considerably extended the kingdom of Kanem, the boundaries of which were carried by Dunama I, Selmaʿa and Dunama II up to the frontiers of Egypt. The Sultāns of Kanem maintained friendly relations with the Hafsids. A rapid decline followed this period of prosperity. The Būlala, a Kanembū tribe which at the beginning of the xivth century A. D. had withdrawn to the S. E. of Lake Tchad, attacked the Sultāns of

Kanem and after a century of incessant fighting ended by conquering the country. Ngjimi, capital of Kanem, was taken by the invaders. Sultān ʿOmar b. Idrīs (796—800 = 1394—1398) had to retire to the country west of Lake Tchad, where one of his successors founded the kingdom of Bornū [q. v.]. In the sixteenth century the sovereigns of the new state in their turn took the offensive against the Būlala in order to re-conquer Kanem. This end was achieved by Idrīs Katḡ-karmabi (1504—1506 A. D.). The conquered Būlala had to pay tribute and Kanem became a province of Bornū. The submission of the Būlala remained, however, somewhat precarious. During the xvth century the Sultāns of Bornū found themselves forced to resort to force in order to oblige their neighbours to respect the treaties that had been made. Thus we find Idrīs Alaoma (1571—1603) sending five expeditions against the Būlala, who were supported by the Tabu. The Sultān of Bornū was victorious over his adversaries but his authority and that of his successors were hardly recognised except by the people around the shores of the Lake; the interior of the country slipped from them. Very soon the weakening of Bornū enabled the Būlala to recover their independence. But towards the middle of the xviiith century they were in their turn conquered by the Tundjur from Wāḍai. They then left Kanem and went to settle in the west of Baḥr al-Ghazal, then in Fitūi, where their descendants still are to-day. The Tundjur imposed their authority on the various peoples of Kanem but had to endure the attacks of the Bornūans who drove them into the region of Mondo and reduced them to the state of tributaries. The Bornūan troops, commanded by a Hausa slave named Dalafna, settled permanently in Kanem, where their descendants are known as Dalatua. Their chief (*aiīfa*) settled at Mao and became the representative of the Sultān of Bornū, to whom he paid an annual tribute. This restoration of the Bornūan suzerainty was of short duration. From the beginning of the sixteenth century Kanem was attacked by new enemies, the Wāḍaians, who claimed the country as a former possession of the Būlala settled in Wāḍai. The Sultāns ʿAbd al-Karīm Sabūn (1805—1819) and Muḥammad Sharif occupied parts of the south almost without striking a blow. Bornū, invaded by the Fulbe, was unable to intervene, and Kanem occupied with the feuds of the Tundjur and Dalatua was in a state of complete anarchy. The Dalatua ended by triumphing over their rivals but recognised the suzerainty of Wāḍai. Their chief, the *aiīfa* of Mao, received the title of *agwīd al-baḥr*, and became the representative of the Sultān of Wāḍai, in the name of whom he gave investiture to the Kanembū and Ḥaddād chiefs. The natives who would not submit to the Wāḍaians took refuge in the islands of Lake Tchad. The arrival of the ʿUḡd Slimān (1846) provoked new disorders. Driven out of Fezzān by the Turks these nomads reached the country north of Lake Tchad and began to plunder it. Severely defeated by the Tuaregs in 1850 they moved on to Bornū. The Sultān then took into his service the remains of the tribe and entrusted the ʿUḡd Slimān with the defence of the frontier against the Wāḍaians. The ʿUḡd Slimān took advantage of this to reconstitute themselves and to plunder friends and enemies without distinction.

At the period of Nachtigal's visit to Kanem

1871) they were the real masters of the country. The Tundjur of Mondo tried to resist them but being decisively beaten in 1883, they were reduced to slavery. The Haddād of Ngumo alone succeeded in keeping in check these nomads, who dreaded their poisoned arrows.

The situation was none the less much disturbed. The Kanembū and the Haddād were fighting between themselves while the Wādaian made frequent inroads. Finally, after the death of Shaiḫ 'Abd al-Djālil, the various factions of the Ūlād Slimān began to fight with one another.

The French occupation put an end to this anarchy. Kanem was included in the zone of French influence, as determined by the Anglo-French agreement of March 21, 1899. After being visited by the Joalland and Foureau-Lamy missions (1900) it was effectively occupied between 1901 and 1905. Accepted without opposition by the Kanembū, European domination met with an obstacle in the hostility of the Santūsiya, who in 1900 established a zāwiya at Bi'r Alālī, in the north of Kanem. Muḥammad al-Barrānī, the deputy for the grand master of the brotherhood, at the head of bands of Arabs from Tripolitania, Tuaregs and Ūlād Slimān, endeavoured to arrest the advance of the French. The evacuation of the zāwiya in 1902 determined a number of the Ūlād Slimān to abandon the struggle. The malcontents, who had been joined by Tubu brigands, continued hostilities down to January 1905, when their chief, Shaiḫ Aḥmad, finally made his submission.

KIANGHRI (also written KANKRI, with the subsidiary form Čangri), capital of the liwā (administrative district) of the same name in the

wilāyet (province) of Kaṣtamūni, on the Adjī Šu, a tributary of the Kızıl İrmak (Haly), the ancient Gangra, famous even in ancient times as a stronghold, was sometimes used by the Byzantines as a place of banishment and later in the wars with the Arabs and the Dānišmand-Oghlu again became important on account of its almost impregnable citadel. On their campaigns against the Byzantines the Umayyads repeatedly penetrated as far as Khandjara (variant Djandjara), e.g. in the year 93 = 711/12 (al-Ṭabarī, ed. de Goeje, ii. 1236 = Ibn al-Aṭṭir, ed. Tornberg, iii. 457; al-Ya'qūbi, ii. 350, who calls the town Ḥiṣn al-Ḥadid), in the year 109 = 727/28 (al-Ya'qūbi, ii. 395) and in the year 114 = 731/32 (Bar-Hebraeus, *Kitāb al-Makrībānūt Zabnē*, ed. Bruns and Kirsch, ii. 125; cf. al-Ṭabarī, ii. 1561, and Theophanes under the year 6224). When as a result of the defeat at Mangikert in 1071 the eastern frontier provinces were abandoned by the Byzantines, the Saldjuks and the Dānišmand-Oghlu shared the spoil: the former established themselves in Konya, while the latter spread through the northern half of Asia Minor from Amasia to Kaṣtamūni; among the conquests of the first Dānišmand-Oghlu in 468 (1075/6) we find Kianghri mentioned; cf. *Ta'rikhi Ali Dānišmend* in Amāsiali Ḥusain Ḥusām al-Dīn, *Anāsia Tārikhi*, Sтамбул 1322, ii. 286 sqq.; Hezārfenn, *Tanḫih al-Tawārikhi* in the *Z. D. M. G.*, xxx. 470. In the year 1101 an army of Crusaders left Constantinople for the land of the Dānišmand-Oghlu, in order to liberate Boemund of Antioch, who had been captured by them at Malātya and imprisoned in Niksār, conquered Angora and reached Kianghri (= praesidium Gangara), but the attack on the fortress failed and soon afterwards the army was completely wiped out by the allied Saldjuks and Dānišmand-Oghlu at Amāsia (Albertus Aquisensis, liber viii. caput 8; Ibn al-Aṭṭir, ed. Tornberg, x. 203; cf. *Z. D. M. G.*, xxx. 476; Chalandon, *Les Comnène*, i. 224 sqq.). The emperor John Comnenus captured Kianghri in 1134 with the help of his heavy siege artillery, after having stormed it in vain a year before (*Chronicle* of Niketas, i. ch. 6 and especially also Joannes Prodromos; see Chalandon, *op. cit.*, ii. 84 sqq.); but very soon after the departure of the emperor the fortress was retaken by the Dānišmand-Oghlu and never again passed into the hands of the Byzantines. In the period following we find Kianghri in possession of the Saldjuks of Konya (see Chalandon, *op. cit.*, passim). After the decline of the Saldjuk empire Kianghri belonged to the territory of the Isfandiār-Oghlu of Kaṣtamūni, was taken from them in 795 = 1392/3 (so Neshri) or 797 = 1394/5 (so 'Ashik-pashazāde and the anonymous Ottoman chronicles) by Bayazid I with the greater part of their lands, but restored to them by Timūr in 804 (1401) and finally in 822 (1419) definitely annexed by Meḥmed I ('Ashik-pashazāde, *Tārikhi*, p. 88 sq.; Leunclavius, *Historiae Musulmanae Turcorum*, Frankfurt 1591, col. 475; the statements of von Hammer, *Gesch. des Osman. Reiches*, i. 70, 248 and ii. 176 are due to a misunderstanding). In the period of peace that now followed under Ottoman rule, Kianghri falls completely into the background: it is scarcely mentioned by the historians; we have, however, full descriptions of the town from Ewliya, *Siyāhetname*, iii. 250 sq., and Ḥādjdji Khalifa, *Dihānnumā*, p. 645. Among European

travellers we find it first mentioned in 1553—55 by Dernschwam in his *Tagebuch einer Reise nach Konstantinopel und Kleinasien*, ed. Babinger, Munich 1923, p. 196; nearly 300 years later Ainsworth was the first European to describe it from his own observations and in our own time it has been occasionally visited and described by German explorers in Asia Minor. The castle, in its day stormed by Arabs, Dānīshmand-Oghlu, Byzantines and Crusaders, lies in ruins; the tomb still survives of Karategin, who captured the town for the first Dānīshmand prince and is now revered as a saint. The system of cisterns, which dates from pre-historic times, on the castle hill, which Ewliyā and Ḥādīdī Khalifa fully described, has not yet been closely examined, nor has the "Medjid Tash" (Tash Masjdīd), i. e. the monastery of the Mewlewī dervishes, with its inscriptions, which, as Ainsworth was told, are said to date from the Arab Caliphs. Of the 27 large and small mosques some are said to date from the Byzantine period (see Cuinet); the principal mosque was built by Sulaimān I in 966 (1558/9).

The extensive deposits of rock-salt at Maghāra, two hours south-east of Kianghrī (Cuinet, iv. 427 and Märcker) are famous; their product was known even to the Byzantines under the name *ῥαγγρηδὺν ἕλας* (Nikolaos Myrepsos, end of the xiiith century, in Du Cange, *Glossar. ad scriptores med. et inf. Graec.*, s. v.). The severe earthquakes, which have repeatedly shaken the town in modern times, are mentioned in the mediaeval ages also; al-Kazwīnī, *Athār al-Bilād*, ed. Wüstenfeld, p. 368, gives a full account of one of these catastrophes, which destroyed the town in Aug., 1050.

The number of inhabitants may be approximately estimated at 30,000 in 5,000 houses; among them were about 150 Greek and 50 Armenian families, who may now have left it as a result of the Great War.

Erdkunde*, 1899, xxxiv. 368 sq. and 373; R. Leonhard, *Paphlagonia*, Berlin 1915, p. 66 and 120 (with view). (J. H. MORDTMANN)

KĀNĪ, ABŪ BAKR, a notable Ottoman poet and prose stylist of the old school. Born in 1124 (1712) in Tokād in Asia Minor, while still a young man he attained a great reputation in his native town as a stylist and poet. He belonged to the Mewlewī order and was allotted to the *Shāikh* of the Mewlewī monastery in Tokād to serve him. An important landmark in his career was the passing of Ḥakīm Oghlu 'Alī Pasha through Tokād in 1168 (1754/5); he had been summoned from Trebizond to Constantinople to fill the office of Grand Vizier for the third time. Kānī presented him with a *ḡaṣīda* of welcome and a chronogram which made such an impression on the aged statesman that with the permission of the *Shāikh* of his order he at once took him to Constantinople and procured him a position in

the imperial *Dīwān*. The way to the highest offices of state was thus opened to Kānī; but ambition was foreign to his nature. The careless and somewhat unrestrained life that he had been leading in his native town — he was only a lukewarm Muslim and only at the end of his long life returned again to the devout life of the order — seemed to him more desirable; so he took advantage of the fall of his patron, which took place after only two months of office, to give up his position in Constantinople. Henceforth his activities lay mainly in the provinces: — in Silistria, in Wallachia and in Bucharest. He acted for a considerable time as *Dīwān* secretary to the voivod Alexander; there is a picture of them together in the Museum of Sinaya. Finally Yegen Mehmed Pasha, who had previously been a close friend of his, summoned him to Constantinople, when he became Grand Vizier (1196 = 1782). But this brought nothing but misfortune to Kānī. Kānī showed himself indifferent to all ceremony and conducted himself towards the Grand Vizier with as little politeness as in the old days when there was no difference of rank between them. He also chattered about matters that should have been kept secret. Yegen Pasha enraged at this had him condemned to death and it was only with difficulty that the punishment was reduced to banishment to Lemnos. All his property was confiscated, so that he had to struggle with poverty. He died in Rab' II, 1206 (Jan.-Feb., 1792) and was buried in Aiyūb. Surūrī and Sümbül-Zāde Wehbī composed chronograms on his death.

Kānī is one of the most remarkable figures in Ottoman literature of the post-classical romantic period during which Persian influence died down and was replaced by a more national spirit. As a poet Kānī was not specially distinguished; he even lacks one of the principal features of most Ottoman poets: smoothness and polish of language. In his poems there are many inequalities and harsh passages: this is closely connected with his manner of working and his habit of extemporising verses on any stimulus or on any occasion. Kānī himself, it should be added, never collected and arranged his poems nor put the finishing touch to his *Dīwān*. Only at the instigation of the Re'isü'l-Kuttāb Mehmed Rāshīd Efendi were the poems which could still be found in existence collected by Nūrī and the *Dīwān* published. A portion of the poems have been lost. He wrote poems in Arabic and Persian in addition to Turkish.

His poetical works consist of numerous hymns, *naẓīra*'s and *takḥmīs*, *ḡaṣīda*'s, chronograms and some hundreds of *ghazels*. What distinguishes his poems from those of other poets is his fondness for wit and humour, his humorous phraseology, while otherwise humour is entirely lacking in the old Ottoman poets.

A much higher estimate must be placed on Kānī as a prose-writer in his *Munsha'āt* and we have the very high opinion expressed by Abu 'l-Ziyā Tawfīk that, as regards his style, a nation produces not more than five or six of his rank. In his letters Kānī gives rein to his humorous mood and produces the most peculiar and unexpected flowers of speech. He might be compared with Rabelais. Many witty sayings and anecdotes of him are recorded. His happy disposition and his humour made him thoroughly

popular and gave his hearers and readers that attraction to him, his letters (of which about 120 exist) and his poems, which is only partly intelligible to our taste and ideas. His works are especially important for the phraseology, as he often uses popular expressions not found in the literary language and says most unusual and unexpected things.

(TH. MENZEL)

KANĪSA (plural *kanā'is*), synagogue, church, the arabicised form of the Aramaic *kenishā* "meeting (place), school, synagogue" (cf. J. Levy, *Neuhebr. und Chald. Wörterbuch*, ii. 359 sq.). The Syriac form *kenūshā* in the Peshittā on the New Testament is a rendering of *συναγωγὴ* and sometimes also of *ἐκκλησία* (cf. Payne Smith, *Thesaurus Syr.*, i. col. 1773), whereas the form *kenishā* in Christian Western Aramaic represents *συναγωγὴ* as well as *ἐκκλησία* (cf. Schulthess, *Lex. Syropal.*, Berlin 1903, p. 95). The latter term is nearly always rendered by *'idā* in the Peshittā. The *Lisān al-'Arab*, viii. 83, 2 sq. is nearly right in so far as it derives *kanisa* from *kunishā*; al-Khafādjī (*Shifā al-Ghalīl*, Cairo 1282, p. 195), however, rejects this view and expresses the opinion that the word denotes an especially Christian institution and goes back to *kalisa*, an abbreviated form of *kalisiyā* (*ἐκκλησία*). Al-Bustānī also considers the word as being the arabicised *ἐκκλησία* (*Muḥit al-Muḥit*, Beyrouth 1286, p. 1847a).

In Arabic *kanisa* denotes the Jewish as well as the Christian place of worship; this appears also from the various statements of the lexica; some refer to churches, others to synagogues exclusively (cf. al-Djawahiri, *Ṣaḥāḥ*, Bulāḳ 1282, i. 473 ult.; al-Zamakhshari, *Asās al-Baiṭāgha*, Cairo 1299, ii. 212, 20; *Lisān al-'Arab*, loc. cit.; Yāqūt, *Mu'djam*, ed. Wüstenfeld, iv. 314, 7). According to al-Firuzābādī, al-Kāmūs, Bulāḳ 1272, i. 549 1, *kanisa* denotes the place of worship (*muta'abbad*) of the Jews, the Christians or the Kāfir's; cf. also *Tādj al-'Arūs*, iv. 235 *infra*.

In early literature *kanisa* is often found in the meaning of "church". Two documents on papyrus of the year 88 (707) mention the church of a monastery called (*Munyat*) *Kanisat Marya* in Egypt (*Papyri Schott-Reinhardt*, i., ed. C. H. Becker, Heidelberg 1906, p. 111, g, line 4, p. 112, i, line 4). In a satirical verse Djārīr speaks of the churches of Taghlib (al-Mubarrad, *al-Kamil*, ed. Wright, p. 485, 5). The treaties which 'Umar or his generals are said to have concluded with the inhabitants of several towns usually contain stipulations concerning the *kanā'is* (al-Balādhuri, *Futūḥ al-Buldān*, ed. de Goeje, p. 173; al-Ya'qūbī, *Tārīkh*, ed. Houtsma, ii. 167, 18; al-Ṭabarī,

i. 2405, 8 sq., 2588, 7; Eutychius, ed. Cheikhō, ii. 17, 7; Ibn 'Asākir, *al-Tārīkh al-kabīr*, Damascus 1329 sqq., i. 178; cf. also Abū Yūsuf, *Kit. al-Kharāj*, Bulāḳ 1302, p. 80). In the Ḥadīth it is related how Umm Ḥabiba and Umm Salama told the Prophet of a church in Abyssinia adorned with images (al-Bukhārī, *Ṣalāt*, bāb 48, 54; *Djānā'iz*, bāb 70; *Manāḥib al-Anṣār*, bāb 37).

Kanisa further occurs with a following noun in the genitive, e.g. *Kanisat Ḥanas* (in Alexandria, Yāqūt, *op. cit.*, i. 257, 32), K. al-Ḡhurāb (on Cape St. Vincent in South Portugal, Yāqūt, *op. cit.*, i. 377, 19; al-Idrisi, *Nuzhat al-Mushitāk*, partly ed. by Dozy and de Goeje, text, p. 180; transl., p. 218), K. al-Kaff (in Egypt, with an impression of Jesus' hand, Yāqūt, ii. 22, 2 sq.), K. Yuḥannā and K. Maryam (in Damascus, Yāqūt, ii. 591, 10, 596, 23); K. al-Kumāma (Church of the dust heap, an intentional corruption of K. al-Kiyāma, Church of the Resurrection, in Jerusalem, al-Mas'ūdī, *Murūdj al-Dhahab*, Paris 1861—77, i. 111; iii. 405; cf. also G. Le Strange, *Palestine under the Moslems*, London 1890, p. 141 sq., 202 sqq.), K. al-Bāghūta (al-Bā'ūtha?; in al-Hīra, al-Hamdānī, *Ṣifat Djazīrat al-'Arab*, ed. D. H. Müller, p. 127, 2), etc.

Al-Makrizī denotes synagogues as well as churches by the word *kanisa* (*al-Khiṭat*, Bulāḳ 1270, ii. 464 sqq., 510 sqq.).

In Spain and in the Maghrib the Form *Kanisiya* (perhaps influenced by *iglesia*) was in use; it is still current in Morocco and Tunisia (vgl. Dozy, *Supplément*, ii. 493).

In the modern language *kanisa* denotes a church, *kanis* a synagogue (al-Bustānī, *loc. cit.*). For the Egyptian dialect cf. S. Spiro Bey, *Arabic-English Dictionary*, 2nd ed., Cairo 1923, s. v.).

Al-Kanisa or al-Kanisa al-Sawda' was a town with a stronghold in the frontier province of Northern Syria, which Hārūn al-Rashīd restored from its ruins (Yāqūt, iv. 314; cf. i. 927, 20; al-Iṣṭakhri, *BGA*, i. 63, 7; 68, 3; vgl. Le Strange, *op. cit.*, p. 477 sq.). — Al-Mukaddasi, *BGA*, iii. 2, 453, 9) mentions a place K. al-Madjuṣ at a day's journey from Arradjan. — A harbour in Yemen on the Red Sea in the neighbourhood of Zabīd also bore the name of al-Kanisa (al-Firuzābādī, *loc. cit.*; *Tādj al-'Arūs*, *loc. cit.*). — According to *Tādj al-'Arūs*, *loc. cit.*, Kunaisiya occurs in several names of places in Egypt.

On the rules for churches laid down by the Muslims cf. the art. NAṢARĀ.

KANO (in Hausa KANU), a town in the Central Sudān 300 miles west of Kūka and 290 E. S. E. of Sokoto, 1200 feet above sea-level, situated in 12° 27' N. Lat. and 8° 20' E. Long. (Greenw.). Kano lies in the middle of a marshy plain dominated by the isolated rocky hills of Goron Duchi and Dala. The town is surrounded by a fortified wall (*birni*) 20 to 25 feet high and measuring, according to Barth, nearly 20 miles in circumference. A portion of the area thus mapped out is occupied by tilled fields especially in the West and North-west. The houses are grouped in the South between Dala and the wall. The town divided into two by a marshy pond called Djakara (Robinson: Jakhara) is formed of mud

houses. Only the houses of great personages or of Arab traders or rich Hausa merchants are provided with an upper story. The number of inhabitants, estimated by Barth at 30,000, would, according to Monteil, amount to 50,000 or 60,000, according to Robinson, to 100,000, according to the reports of the English officials in Nigeria, to 200,000. This population comprises very diverse elements, Hausa, Fulah, Kanūri and Arab; of whom 2/3 (Robinson) or 4/5 (Monteil) are slaves. In addition to the fixed population there is a very large floating one, reaching, according to Monteil, the figure of two million individuals a year.

This accession is explained by the economic role of Kano, the commercial metropolis of the whole of the Sūdān and at the same time a much frequented stage on the pilgrim route to Mekka. Representatives of all the negro races from the mouth of the Niger and Senegambia to Bornū and Wadai meet there with Tuaregs and Arabs from Ghadāmes and Tripolitania. Every day a market is held there attended by over 30,000 people. Business is done through the intermediary of brokers, and owing to the scarcity of currency settlements are made most often with cowries; some transactions are carried through by simple barter. The principal articles of commerce are clothes and garments of local manufacture, leather, salt brought from Bilma, natron and above all the *kola* nut from the Western Sūdān, which is perhaps the most important element in the commerce of Kano. To these we must add sugar from Egypt, gunpowder, paper, iron-mongery, cotton goods of European origin, ostrich feathers and ivory to a small extent and finally slaves. The articles sent to or brought from Ghadāmes or Tripolitania are carried by Arabs settled in Kano to the number of 400 or 500. But the Sūdānese trade, which makes up 4/5 of the total transactions, is entirely in the hands of Hausa merchants.

Kano is not only a great centre of commerce; it is also a centre of native industries. Weaving and dyeing flourish there. The manufacture of cotton goods is so active that the town has been given the name of the "Manchester of the Sūdān." Robes (*tobe*) dyed black are much esteemed and exported to all the neighbouring lands. Metal work occupies numerous smiths, who make hunting spears and stirrups as well as ornaments in copper and silver. The leather dyed yellow and red called morocco is very much esteemed and exported as far as Morocco and the markets of Tunisia and Tripolitania. The same is the case with the leather sacks indispensable for caravans.

The province of Kano is very fertile. As early as the xvth century we find Leo Africanus remarking the abundance of cattle, the richness of the soil, the extent of the fields of rice, cereals and cotton. The observations of modern travellers coincide with those of this early writer. The province of Kano, says Barth, includes 27 walled towns with 300,000 inhabitants and an equal number of slaves. "All the ground", says Monteil, "is cultivated for a distance of 60 miles round the town." Robinson notes the large number of separate farm places surrounded by plantations of tobacco, indigo, cotton and dura (*sorghum vulgare*).

A tradition noted by Robinson attributes the foundation of Kano to a group of refugees from Daura, a place three days' journey to the North, led by a certain Kano, son of Bawo. The latter, it

is said, built a new town at the foot of the rocks of Goron Duchi and Dala, on the top of which two villages had long been planted. According to Barth, Kano was the son of Biran and brother of Daura. He would thus be one of the seven "legitimate Hausas" (see HAUSA, ii. 291b). Another tradition to the effect that Kano had been appointed by his father *Sarikin baba*, i.e. chief of the dyers, attests the antiquity of this industry in the town. The date of the foundation is uncertain but it seems that by then Kano was already of some importance. In the second half of the xvth century A. D. education was held in honour in the town. Scholars had settled there on returning from the pilgrimage and were teaching theology and Maliki law. The celebrated 'Abd al-Qādir al-Marhili taught there. At the beginning of the following century, Leo mentions Kano as a town filled with rich merchants and artisans. These facts seem to invalidate Barth's statement that at this date Kano could only have been a citadel built on the rock of Dala. The king of Kano had subjected to his authority the kings of Zegzeg and Katsena, but he was in his turn conquered by the Sulṭān of Timbuktu, Muḥammad Askia, and was reduced to the state of a tributary. Later the kings of Kano had to endure incessant fighting against the Sulṭāns of Bornū, who even annexed Kano to their empire. The Bornūan governor, however, was driven out by king Korafa and Kano regained its independence. The invasion of the Fulah at the beginning of the nineteenth century increased the commercial importance of Kano, as the merchants of Katsena sought refuge there after the capture of the latter town by 'Oḥmān Dan Fodio in 1814. Kano was, however, not long in falling in its turn. On the dismemberment of the Fulah empire, the town was included in the kingdom of Sokoto. The country was administered by a governor (*serki*), who paid the Sulṭān of Sokoto an annual tribute (100 horses, 15,000 robes and other garments, 10,000 turbans etc. in the time of Barth). The Anglo-French agreements of Aug. 5, 1890 and June 14, 1898 having placed Sokoto within the zone of British influence, British representatives attempted to settle in Kano. These first attempts were unfortunate. Rev. C. H. Robinson (1893) and Wallis, a British official of Nigeria, were able to visit the town where the French traveller Monteil had already spent three months (1891—1892) in his journey from St. Louis to Lake Tchad, but Bishop Tugwell's mission was badly received and he had to withdraw. The effective occupation of Kano only took place in 1908 after a military expedition led by Sir Frederick Lugard.

(G. YVER)

KANSU, a frontier province in the north-west of China proper; it is bounded on the south and east by the provinces of Sze-chuan, Shensi and Shansi, in the west and north by the territory of Kukuror, Chinese Turkestan (formerly included in Kansu, but since 1884 the separate province of Sin-Kiang) and Mongolia. With its present area of 5910 geogr. sq. m. = 125,483 sq. miles, Kansu is the third largest province of China but as regards density of population it is lower than all the other provinces of China with the exception of Kuangsi. The province first formed under the Emperor Kūbilāi in 1282 A. D. is said to have received its name from two towns in the extreme north-west, Kančou-fu and Sučou; both towns are already mentioned in the *Khudūd al-'Ālam* and in Gardizi (cf. W. Barthold, *Oliet o počezke v Irednyuyu Aziyu*, p. 92), the former in the form *Khāmū* (in the Mongol period Kamčū or Kamčē), the second as *Sakhčū* (later *Shukū* or *Sūkčī*).

Down till the xliith century A. D. this territory was for the most part under the rule of foreign peoples of Turkish (Uigur) or Tibetan (Tangut) origin; immediately before the Mongol conquest there was a Tangut kingdom here under the rule of the Hia (or Si-hia) dynasty (1032—1227) with its capital in Ning-hia. Rashīd al-Dīn (ed. Blochet, p. 484 sqq.) in giving a list of the twelve provinces (*shink*, chin. *shin*) reckons two with capitals Kīncānfū (now Sian-fu, capital of Shensi) and Kamčū (Kančou) respectively to Tangut (Tangkūt). In reality Kančou was at this time the capital of Kansu: Kansu and Shensi then as now combined in one governorship, the only difference being that the residence of the governor was in the capital of Shensi and not, as now, in the capital of Kansu. The boundary between Kansu and Shensi was formed by the Hoang-ho, so that the present capital of Kansu, Lančou-fu, then belonged to Shensi. In connection with Kīncānfū Marco-Polo (ed. Yule and Cordier, ii. 24) mentions prince Mangalai (d. 1280; called Mingālā by Rashīd al-Dīn), Kūbilāi's third son, as ruler of Tangut, while Rashīd al-Dīn (p. 495 sq.) gives his son Ananda; Rashīd al-Dīn says that Ananda was the founder of the dominance of Islām in this region. He was born about 1270 (in the early years of the viiith [xivth] century, he was 30 years of age, *ibid.*, p. 603, 6) and was brought up by Muhammadan foster-parents (*ibid.*, p. 599 sq.); but it was only after the conversion of Sultān Ghāzān in Persia (i. e. about 1295; cf. GHĀZĀN, ii. 1149 sq.) that he openly professed Islām (Rashīd al-Dīn, p. 602). The greater part of his army, said to have numbered 150,000 men, was converted to Islām (*ibid.*, p. 600); the people of Tangut, except the peasants, likewise adopted Islām (*ibid.*, p. 599). Taken to task by his cousin, Kūbilāi's

successor Tīmūr (1294—1307), for his conversion, Ananda remained faithful to Islām and after a period of interruption was restored to his dominion. In 1307 a party wished to raise him to the throne; he was therefore killed after the success of another claimant, Tīmūr's nephew Khaishān (1307—1311) (d'Ohsnon, *Histoire des Mongols*, ii. 525 sqq.). Not till 1323 was Ananda's son Ūrukīmūr again appointed prince of Tangut (Blochet, in Rashīd al-Dīn, p. 362, note c).

As Marco Polo (ed. Yule and Cordier i., 203 and 219) shows, there were already Muslims in Kansu before Ananda's day; on the other hand he says nothing about the dissemination of Islām south of the Hoang-ho (cf. the erroneous statement in the article CHINA, i. 851, following *Mission d'Ollone*, p. 435, that Marco Polo mentions "the presence of Muslims in the province of Yün-nan only"). The Turkī speaking Salar (cf. CHINA, i. 850), who live at the present day on the south bank of the Hoang-ho, are mentioned as living there as early as the Ming dynasty (1368—1644) and described as unruly subjects (W. W. Rockhill, *The Land of the Lamas*, London 1891, p. 40), although no Muhammadan risings are mentioned for this period. The story which reached Tīmūr's lands about 1398 to the effect that the founder of the Ming dynasty had had about 100,000 Muslims slaughtered and had completely rooted Islām out of his kingdom (Nizām al-Dīn Shā'mī and 'Abd al-Razzāk al-Samarqandī in Barthold, *Uluglek*, Petrograd 1918, p. 42 sq., note 6) finds no confirmation in any Chinese source. Under Manchu rule (from 1644) risings of the Muslims of Kansu are mentioned by 1646 and 1648 and have been several times repeated in the xviiith and xixth centuries.

In Kansu those who profess Islām are at the present day certainly more numerous than in the other provinces (the figures are very variously estimated; cf. the article CHINA, i. 847). The most important centre of Muslim life and culture was until quite recently Iločou (south-west of the capital Lančou-fu), "the Chinese Mekka". Iločou was at an earlier date considered a purely Muslim city (about 30,000 inhabitants); in the year 1884 the traveller G. Potanin (*Tangutsko-Tibetskaya Okraine Kitaya*, St. Petersburg 1893, i. 169) was told that there were no longer any Muslims at all there; later the Muslims were only allowed to live in a separate suburb there (*Mission d'Ollone*, p. 235). The Muhammadan area in Kansu is divided into two separate tracts, Iločou-Sining in the south-west and Ninghia-Kintsip'u in the north-east; in the intervening area the Chinese have built hill-forts (*ibid.*, p. 253). Kintsip'u, sometimes called "the Chinese Medina", was first founded by the religious reformer and leader of a rebellion, Ma Hua-lung (cf. CHINA, i. 849).

In the xviiith century there still seem to have been more Muslims in Shensi than in Kansu (Dabry de Thiersant, *Le Mahométisme en Chine*, i. 41 and 156); their language and dress were also different from those of the Chinese (*ibid.*, p. 155). This suggests that the modern Dungsans or Tungans (cf. CHINA, i. 850) did not adopt the Chinese language until a later date.

The rebellions were usually local movements, not general risings under the banner of Islām. During the great rebellion in Kansu, which began in 1871, there was perfect quiet in Shensi (Dabry,

op. cit., i. 159). The rebellion which had begun in 1861 or 1862 in Shensi was only spread to Kansu by the expulsion of the rebels from Shensi. The fighting was carried on with even greater bitterness in Kansu than in Shensi and had the most disastrous effects on the Muslim population as well as on the economic prosperity of the province generally. Just as at an earlier period the number of Muslims in Shensi had been considerably reduced by the expulsion of the rebels into Kansu, so now (since 1872) a considerable part of the Muslim population of Kansu has migrated westwards under the leadership of the valiant Boyan-akhūn. The birthplace of Boyan-akhūn (also written in Chinese Bo-yan-hu or Pai Yen-hu; his Muslim name was Muḥammad Ayyub) is variously given; he had lived for a long time in Peking and only moved to Kansu shortly before the rising. In December, 1877, Boyan-akhūn with the remainder of his army crossed the Russian frontier into Semirečye; the Chinese authorities demanded (of course without success) that he should be handed over to them. After his death in 1883, he was celebrated in songs as a national hero by the Dungans settled in Semirečye; whether his memory is still revered in Kansu also, does not seem to have been ascertained. The last rising (1895/1896) was started by the Salar and is said to have been provoked by the proclamation of their Chinese governor ordering that in future one Chinese should be regarded as equal in value to ten Muslims. There seems to have been no activity in Kansu against the present Republican government.

KANŠÜH, AL-MALIK AL-AŠRAF SAIF AL-DĪN min Baiberdi (i.e. Baiberdi's Mamlūk) AL-GHŪRĪ (originally pronounced in Eastern Persian with ō and later there and in Egypt with u), of the "al-Ghūr" division of Mamlūks from Afghānistān, which was specially instructed in the Korān and theological subjects. He served for a long time as a *khāṣṣkī* (lifeguard) and *Djāmaār* and only when he was about 40, he became governor of the province of al-Baḥriya [see BAHRĪYA], and in 893 (1490) *Hādīb* [q. v.] al-*Hudūdīyāb* (president

of the military court) in Aleppo, where he gave proof of his great energy in the suppression of a rising. In 903 (1497) he became *Muḥaddam al-wāṣ* (commander of a thousand Mamlūks) and two years later *Ra's nawab al-Nuwab* (commander of the Mamlūk officers) under Sulṭān Džānbalāt [q. v.]. The latter's rival and successor Ṭīmānbāi I during his brief reign in 906 (1500) appointed him Grand Dawādār [see DAWĀDĀR] and, as often happened in the last period of the Mamlūk dynasty, at the same time Grand Ustādār (Grand Chamberlain), visier and *Kāshif al-Kuṣūf* (chief inspector of domains). The choice of the Mamlūks therefore, as a result of his high position, naturally fell upon him, when after a few months they were discontented with Ṭīmānbāi; after considerable hesitation he accepted, as he was now over sixty. By inflicting heavy taxes and levies and issuing a depreciated currency he ruthlessly raised the money to pay the old Mamlūks and to buy new ones in order to create a following. In his financial measures he did not even respect the privileges of the pious foundations and by depreciating the currency injured commerce and trade, and extorted money from merchants, women, eunuchs and from his own court-officials down to the very door-keeper. All this is made a very grave reproach against him by his contemporaries; it was even cast up against him in the Friday sermon. The chroniclers number him among the "bad Sulṭāns". He hurried on the financial ruin of his country by over-heavy taxes on the sales of goods and by oppressive customs duties, even although he made good use of a great part of the money by strengthening fortresses (notably Aleppo), making roads and wells in the Hīdžaz and in providing water by good aqueducts (e.g. the aqueduct in Cairo). One great source of revenue in these days was the harbour and customs dues on Indian goods, which then had to be brought to Europe via Egypt (Aden, Djidda, Suez, Alexandria) or Syria (Hormūz, Baṣra, Aleppo). To avoid these oppressive dues, the Portuguese staked everything on finding the sea route to India, which Vasco de Gama finally succeeded in doing. The Portuguese then gradually established themselves on the coasts of India and brought their great quantities of goods directly to Europe by the Cape of Good Hope. In this way the excessively high costs of passing through Egyptian ports as well as the cost of overland transit were avoided and the profits went to the Portuguese. These losses in revenue could not be tolerated by the Sulṭān al-Ghūrī; besides, he felt it his duty as first ruler in Islām, as plenipotentiary of the Caliph and as a servant of the holy places of Mekka and Medina to come to the help of the oppressed Muslims in India. The first encounter with the Portuguese took place in 909 (1503) when the latter robbed an Egyptian ship coming from India of its cargo and sent it to the bottom. Sulṭān al-Ghūrī tried at first to get redress by peaceful means by sending the Grand Prior of the Sinai monastery to the Pope with a letter of complaint, threatening to destroy the holy places in Jerusalem if King Manuel of Portugal did not cease from oppressing Muslims in India and from conducting hostilities against his merchant-ships. The mission failed in its object as King Manuel knew quite well that the Sulṭān's interest in the great profits derived from Christian pilgrimages would prevent him from going to extremes. Sulṭān al-Ghūrī had

therefore to make up his mind to equip a considerable fleet, especially as 17 Arab ships were destroyed in 910 (1504) in the Indian harbour of Panane. The Sulṭān was interrupted even in the building of his fleet by the fact that the Knights of St. John in Rhodos captured a consignment of wood intended for Egypt. To secure a base for his naval war against the Portuguese, the Sulṭān dispatched several expeditions to keep the coast of Arabia under his control; his able general Ḥusain fortified Djidda with walls and towers and made the harbour a base for the fleet. The first encounter in the Indian harbour of Shaḥl between Ḥusain and Lorenzo, son of the Portuguese viceroy, in 914 (1508) ended in favour of the Egyptians, who were supported by the fleet of the Muslim governor of Diu. Lorenzo perished and the Admiral's ship was burned. But the very next year the Admiral avenged his son's death, destroyed a part of the Egyptian fleet (the Indian ships kept aloof) and forced Ḥusain to a hurried retreat into the Red Sea. Hostilities between the Portuguese and Egyptians continued in the following years, a strong Portuguese fleet even attacked Aden but without any lasting success. A new fleet was then sent to India by the Sulṭān. But when it reached Djidda, the political situation in Egypt had changed. In 922 (1517) the Ottoman Sulṭān Selīm I seized Cairo and thereby became protector of the Holy Cities as well as master of the western coast of Arabia. Sulṭān Selīm, who cared little about expansion towards India, as his interests lay in the direction of Asia Minor and the Balkan lands, at the request of the Mekkans, recalled Ḥusain, in spite of his successes, along with his subordinates, who held other parts of Arabia, and had him executed on account of his numerous acts of cruelty to the people of Arabia. The Egyptian fleet had to return. The Portuguese on their side were content with the successes they had won, as they had succeeded in diverting commerce from the route through the Red Sea. After the appearance of the Portuguese in the East and the alteration of the trade-route the most important source of revenue for Egypt gradually dried up so that Sulṭān al-Ḡhūrī, for want of an intelligent system of taxation, had to fall back on extortion and the oppression of his subjects as he could do nothing else in view of the disorganisation of the finances. Thus it was not possible for him to pay his Mamlūks well so that his rule now lacked a firm support. His foreign policy also was unsuccessful. From fear of the powerful Selīm, he made an alliance with the latter's most bitter enemy Ismā'il [q. v.], the ruler of Persia. In 922 (spring of 1516) Sulṭān Selīm entered Asia Minor, ostensibly to fight against Shāh Ismā'il. Sulṭān al-Ḡhūrī went to Aleppo under the pretext of acting as intermediary between the two rulers. To show his peaceful intentions he had brought with him the Caliph and the chief kādīs but had in secret promised Ismā'il his support. Selīm learned of this through spies and was not deceived by the friendly reception accorded his envoys by Sulṭān al-Ḡhūrī. To make war inevitable, he maltreated al-Ḡhūrī's envoy, had his attendants killed and sent him back ignominiously on a mule, with a declaration of war. Sulṭān al-Ḡhūrī's cause was hopeless from the first as he was not sure of his generals. He could neither protect his subjects from the extortions and acts of cruelty of his governors nor could he rely

on their fidelity. Although several times warned, he entrusted the command of the left wing to the governor of Aleppo, Khā'irbek; but at the first charge the latter left the battle with his troops and soon after the beginning of the battle the aged Sulṭān fell from his horse, struck with apoplexy. According to his biographer, his body was never found; others say that a Mamlūk cut off the head from the body and took it to Sulṭān Selīm. On the rapid occupation of Syria and Egypt and the last desperate battle of the Mamlūks see the articles SELİM and TŪMĀNBĀI II. Although Sulṭān al-Ḡhūrī had tackled his task with energy, he could neither make friends nor bring order into the chaos of the finances. His attention was always directed only to immediate profit and to making ends meet somehow, while he was not sure of his Mamlūks and Amirs. He had no sense of justice nor a proper appreciation of relative strengths. Besides there was his aversion to the new arms, artillery and rifles, due to a certain disdain of using long range weapons, which it did not require personal bravery to carry. The rapid victory of the Turks and the superiority of the Portuguese was certainly to some extent due to the objection of Sulṭān al-Ḡhūrī and his knights to proper training with fire-arms, as is specially mentioned by Ibn Iyās.

[In the Kur'an in the Sulṭāniya Library, Cairo, written for him, his name is spelt Kānsawh Ghawri, see E. Denison Ross in *Bulletin of the School of Oriental Studies*, ii. 334 (London 1922). Red.]

Bibliography: Weil, *Geschichte der Chaldäer*, v. 384—416; v. Hammer, *Gesch. des Osmanischen Reiches*, Pest 1827 sqq., ii. 462 sqq. (in both, the principal Oriental manuscript sources as well as the contemporary chronicles and consular reports of the west are given). Ibn Iyās deals with the reign of Sulṭān al-Ḡhūrī in the *Badā'i' al-Zuhūr* [see IBN IYĀS]; but only the end is printed in the Cairo edition, the years 906—922 are contained in the Paris manuscript, *Bibl. Nat., de Slane, Cat.*, No. 1824 (years 906—913) and in the St. Petersburg manuscript, Rosen, *Les manuscrits arabes de l'Inst. des Langues orient.*, No. 46 (the years 913—922). The full biography by Ibn al-Hanbalī has not previously been utilised; see Ibn al-Hanbalī's *Durr al-Habab fī Ta'rīkh A'yān Halab*, MS. Vienna, Flügel, *Die arab. Handschr. der Hofbibl.*, ii. No. 1184 (cf. Brockelmann, *Gesch. d. arab. Litt.*, ii. 368), f. 176b sqq.; J. J. Marcel, *Hist. de l'Égypte depuis la conquête des Arabes*, etc., Paris 1834, p. 407—11; W. Muir, *The Mameluke Slave Dynasty*, London 1896, p. 187—201. On his building operations or detailed particulars will be given in the coming work on inscriptions in Aleppo in the sections "citadels and city-wall"; on his buildings in Damascus see M. Sobernheim, *Die Inschriften der Zitadelle von Damaskus*, No. 24—26 in *Der Islam*, xii. (1921); on commerce in his time see B. Moritz, *Ein Firman des Sultans Selim in the Festschr. Ed. Sachau.... gewidmet*, Berlin 1915, p. 425—27. On his wars with Portugal see S. Ruge, *Gesch. des Zeitalters der Entdeckungen* (Samml. Oncken, ii. 9) and H. Schäfer, *Gesch. Portugals*, iii., Hamburg 1850, p. 200 sqq.; R. S. Whiteway, *Rise of Portuguese Power in India*, London 1899. For his coins see *Or. Coins*, of in the *Cat. Brit. Mus.* iv. 214—216. (M. SOBERNHEIM)

KANTARA, plur. *kanāṭir*, means in Arabic (1) bridge, particularly a bridge of masonry or stone; also (2) aqueduct (especially in the plural), dam, and finally (3) high building, castle (similarly *kasātil* = aqueduct from *kastal* = castellum; see *KANĀT*); cf. *Tāḍī al-ʿArūs*, iii. 509; Dozy, *Supplément*, ii. 412; de Goeje, *B.G.A.*, iv. 334; and particularly R. Geyer in the *S.B. Ak. Wien*, 1905, vol. cxlix. No. 6, p. 114—119. The original meaning of the word, "arch", is found in the earliest Arabic lexicographers; cf. Dozy-de Goeje, *Description de l'Afrique et de l'Espagne par Edrisi*, p. 369. *Djisir*, a bridge of wood or boats, is the opposite of *kanṭara*, which is of stone; in time, however, the two words came to be used as synonyms (see Dozy, *op. cit.*, i. 194).

No satisfactory explanation has yet been given of the origin of the word. The oldest reference is found in a verse of Tarafa (iv. 22; see *The Divans of the Six Ancient Arabic Poets*, ed. Ahlwardt, 1870, p. 55). On account of this early occurrence of the word, Yāḳūt (*Muʿdjam*, ed. Wüstenfeld, iv. 187) considers the word to be genuine Arabic. But we may with considerable certainty regard it as a loan-word. Vollers and Geyer thought it borrowed from Latin or Greek. The former connected (*Z.D.M.G.*, li. 376; *Z.A.*, viii. 100 sq.) *kanṭara* with the mediaeval Latin word *cintrun* (French *cintre*, arch, vault), while Geyer (*op. cit.*, p. 118—119) sought the original either in *καμβίλος* = basket, *cantherius* = wickerwork used in the making of roofs and buildings, or in *κάμπτρα*, *κάμπτριον* = depository (cf. also *καμπτής* = rounding), from which Vollers, *Z.D.M.G.*, li. 302, derived Egypto-Arab. *kimṭar*. But all these explanations had best be rejected, because there are phonetic objections to them and they partly rely for the meanings of the words cited on obsolete, far-fetched glosses; cf., on the other hand, Fränkel in the *Z.A.*, xix. 270 sq., and Nöldeke, *op. cit.*, p. 408. *Kanṭara* is most probably to be derived from the Aramaic and, as Nöldeke, *op. cit.*, thinks, in the first place from *keṭārā* = bond, arch (see Payne-Smith, *Thesaur. Syriac.*, col. 3591; note specially *keṭārā* in Bar Bahlūl, *Lexic.*, col. 1768). The above mentioned word *djisir* also comes from the Aramaic (Fränkel, *Die aram. Fremdwörter im Arab.*, Leiden 1886, p. 285 and D. H. Müller in the *W.Z.K.M.*, i. 31), but can actually be traced back to the Assyrian or Accadian; cf. Meissner in the *Z.A.*, ix. 269, and Zimmern, *Akkadische Fremdwörter*, Leipzig 1915, p. 31.

Al-*Kanṭara* has survived in Spanish in the diminutives *alcantarilla* = little bridge, gutter and *alcantarillado* = arched aqueduct; see Dozy-Engelmann, *Glossaire des mots espagnols et portugais dérivés de l'arabe*², Leiden 1869, p. 47; *Diccionario de la Lengua Castellana por la Real Academia Española*¹³, Madrid 1899, s. v.

Al-*Kanṭara* and al-*Kanāṭir* are frequently found — sometimes with descriptive additions e.g. *Kanāṭir Firʿawn* — as names for places like quarters of a city (notably in Baghdad) in areas where Arabic was, or is, spoken in the mediaeval or modern East. In his geographical dictionary (*Muʿdjam*, ed. Wüstenfeld, iv. 180, 187—192, vi. 179—180) Yāḳūt gives a dozen places named al-*Kanṭara* and four called *Kanāṭir*; cf. also, for example, the indices to al-Tabarī, ed. de Goeje, p. 759—760, and Ibn al-Aṭṭir, *al-Kāmil*, ed. Tornberg, xiii. 790. For the numerous districts of Baghdad named

after particular bridges under the Caliphate see the index to Guy le Strange, *Baghdad during the Abbasid Caliphate*, London 1909, p. 368.

Of the places named al-*Kanṭara*, the following are worthy of special mention:

1. An oasis on the southern slopes of the Atlas in Algeria at the exit of a narrow pass through which run the road and railway from Constantine to the desert regions; it is a station on the Constantine-Biskra line, 35 miles north of the latter. This, the most northern oasis in Africa, consists of three villages with about 3,500 inhabitants and possesses a very dense date grove. From its situation it was an important military station and, as Roman inscriptions found there show, settled in ancient times. It is presumably identical with the station *Ad Calcem Herculis* of the Roman itineraries; see Dessau in Pauly-Wissowa, *Realencyklop. der klassischen Altert.-Wissensch.*, iii. 1345. The name al-*Kanṭara* is derived from the Roman bridge, restored in 1862 by the French, which spans in one huge arch the ravine, the 150 feet wide Fumm al-*Ṣahārā* = the mouth of the *Ṣahārā* (so-called by the natives), through which flows the Wād al-*Kanṭara*; cf., for example, Vivien de St. Martin, *Diction. de Géographie Universelle*, Paris 1879, i. 66 and Kobelt, *Reiseerinnerungen aus Algerien und Tunis*, 1883, p. 322.

2. *Alcántara*, a little town of great antiquity in the province of Cáceres (district of Estremadura) in Spain, near the Portuguese frontier, with 3,200 inhabitants. It receives its name from an imposing granite bridge, built in 105 A. D., which crosses the Tagus in six great arches to the north-west of the town. The place is also famous for the order of knighthood founded there in 1176 to defend the frontier against the Moors, which became called the Alcántara Order after its headquarters were moved to this town in 1213; see Baedeker's *Spain and Portugal*⁴, Leipzig 1913, p. 459.

3. A small town with a mosque in Egypt, on the Asiatic side of the Suez canal, half-way between Port *Ṣaʿīd* and *Ismaʿīliya*, a station on the railway connecting these two towns. It lies on a low narrow tongue of rising ground, which runs out between the large Menzaleh lake in the north and the little Balāḥ lake in the south. But it hardly takes its name from this "land bridge", but from a bridge which already existed here probably in the early Middle Ages.

The Arab geographer Ibn Faḳl Allāh al-ʿUmāri, who wrote about 741 (1340), mentions the arch of a bridge, called *Kanṭarat al-Djisir*, near the old caravan station of al-ʿAḳūla, under which the superfluous water flowed into the desert at the time of the Nile's inundation. There was still a bridge here at the beginning of the nineteenth century, built over a canal connecting the two lakes already mentioned. The modern al-*Kanṭara* has only arisen on its present site since the making of the Suez Canal. The old settlement was a short half-hour's journey to the east and is marked by the mound of ruins Tell Abū Sēfe (on the maps also called Tell al-Aḥmar). This place may be regarded as the key to Egypt, for it has always been used by conquerors as the gateway to the Nile valley. Its strategical importance led to its being occupied in remote antiquity. Tell Abū Sēfe (with ruins of a temple of Rameses II and remains of the Ptolemaic and Roman period)

marks the site of the ancient Egyptian town of Zaru (*T'rw*), the capital of the fourteenth district of Lower Egypt, which was already a fortress in the time of the Middle Kingdom. In the later classical and Byzantine literature it appears as Sile, Sele (Selle); according to a Latin inscription found here, it had a Roman garrison in 288 and was later also the see of a bishop. In the Middle Ages it was called al-ʿAḳūla (on the name al-ʿAḳūla = "the bend" see above s.v. DAIR al-ʿAḳŪL), a name which was temporarily supplanted by that of the castle of al-Ḳuṣair during the Mamlūk period. In the World War (1914—1918) al-Ḳaṇṭara played an important part in the struggle for the Suez Canal. From November, 1914, to March, 1916, there were frequent encounters there between English and Turkish troops; cf. thereon, for example, Baer, *Der Völkerkrieg. Eine Chronik der Ereignisse seit dem 1. Juli 1914*, Stuttgart 1914 sq., iv. 220—24, viii. 367, xi. 318, xvii. 47 sq., 128, 130, 132.

In remote antiquity as well as in the late Middle Ages and modern times, al-Ḳaṇṭara was the point of departure for the caravan road from Egypt to Syria. Since the World War the new railway line to Syria has branched off here from the Port Ṣaʿīd-Suez line, and runs from al-Ḳaṇṭara via Ḳaṭya, al-ʿArish and Ḡazza to Ludd, where it links up with the line from Yāfā to Jerusalem.

Bibliography: Baedeker, *Palästina und Syrien*¹ (1913), p. 177, 171; C. Kūthmann, *Die Ostgrenze Ägyptens*, Berliner Dissert., 1911, p. 38—49; R. Hartmann in the *Z. D. M. G.*, lxiv. 688, 691, 696; lxx. 486 sq., 511 and in *Petermann's Geogr. Mitteil.*, 1916, lxii. 373—377; Alt in the *Palästinajahrbruch des deutsch. evangel. Instituts*, x., Berlin 1914, p. 60—63 and Dalman, *loc. cit.*, xx., 1924, p. 44—46. On excavations and finds in the region of al-Ḳaṇṭara see Clédat in the *Recueil de travaux relatifs à l'archéol. égyptienne et assyrienne*, Paris 1915, xxxvii. 38 sq. and 1919, xxxviii. 1 sq., 70 sq.

4. A sanctuary among the ruins of the ancient Petra on the Sinai Peninsula; cf. Savignac, *Le Sanctuaire d'el Kantara in the Rev. Biblique*, New series, 1906, iii. 391 sq.

5. Ḳaṇṭarat Zainab in the valley of the Nahr Bairūt in Syria, an ancient Roman aqueduct of which considerable remains exist at the present day; according to Arab legend, it was built by Queen Zenobia (Zainab); cf. Fr. Müller, *Studien über Zenobia and Palmyra*, Diss. Königsberg 1902, p. 14 sq.

6. Ḳaṇāṭir Firʿawn ("Pharaoh's aqueduct"), a great aqueduct in the south of Syria, which, beginning at Dillī, at the western foot of the lava plateau of Ledjā (west of Ḥawrān), runs in a south-western direction for some sixty miles as far as Mukēs (Gadara), providing many villages with the necessary drinking-water in the summer months. It is identified by Wetzstein — probably rightly — with the Ḳaṇāṭir mentioned by Ḥamza al-Isfahānī (*Annales*, ed. Gottwaldt, p. 117). But the Ḡhassānid Djabala b. al-Ḥārith, who reigned about 500 A. D., can hardly, as Ḥamza says, be the builder of this marvellous piece of work; see Nöldeke, *Die ghassan. Fürsten* . . . in the *Abh. Pr. Akad.*, 1887, iv. 50; it certainly dates back to ancient times. For further information see Wetzstein,

Reisebericht über Hauran und die Trachonen, Berlin 1860, p. 123—125.

The diminutive Ḳunāṭira (popularly Ḳunētra or Kenētri) is occasionally used as a place name, e.g. a village in the district of Djawlān (Eastern Jordan); see Baedeker's *Palestine and Syria*⁵, 1912, p. 268. (M. STRECK)

KĀNŪN, the name of a month, which is found as early as in inscriptions from Palmyra (see S. A. Cook, *A Glossary of the Aramaic Inscriptions*, s. v.) and corresponds to Marḥeshwān. It later appears among the Syriac names of the months (see Payne Smith, *Thesaurus Syr.*, s. v.) as *K. ḡedem* or *ḡadmayā* and *K. ḡrāy* or *ḡrāyā*. Here the two *K.* are the ninth and tenth months respectively. Al-Bīrūnī, *Kitāb al-Āthār al-bākiya*, ed. Sachau, p. 60, transcribes the Syriac forms exactly as *K. ḡadīm* and *K. ḡrāy*. In Arabic terminology they are called *K. al-awwal* and *K. al-ākhir*. In the Ḥadīth the former appears in a remarkable connection. In Muslim, *Ashribā*, Trad. 99, a reason is added for the regulation, often mentioned elsewhere, that vessels should be kept covered: "for there is a night in the year in which the *wabā* passes no uncovered vessel". In another version of the same tradition it is added: "foreigners (*aʿāḍim*) among us used to fear this in *Kānūn al-awwal*". (A. J. WENSINCK)

KĀNŪN, a musical instrument, consisting of a flat thin quadrilateral box strung with wire chords, which is laid on the knees and played with a key of metal fixed on the forefinger, like the zither (Lane, *Modern Egyptians*, ii. 70, 72; Salvador Daniel, *Musique Arabe*, p. 37).

KĀNŪN (from the Greek κανών), canon, custom, law. The development of the Muslim empire, its vast conquests which brought it into contact with peoples of very different characters, who for the most part had laws already codified, the rise of commerce and industries and the institution of regular troops forced the governors to establish alongside of the *shariʿa* or religious law a series of special enactments by the application of the principle of *ʿurf, lex principis*. It is these edicts that are called *kānūn* (plur. *ḡawānīn*). The Berbers give this name to their own statutes, their customary law; see Hanoteau et Letourneur, *La Kabylie et les coutumes Kabyles*, Paris 1873, ii. and iii.; Morand, *Les Kanouns du Mzab in the Études de droit musulman algérien*, Algiers 1910; Masqueray, *Formation des cités chez les populations arabes sédentaires*, Paris 1886, p. 74 sqq.; *Archives berbères*, i. and ii.; *Le droit Kabyle*, 2nd ed., Paris 1917; Henri Basset, *Essai sur la littérature des Berbères*, Algiers 1919, chapter v.: *La littérature juridique des Kanouns*. (CL. HUART)

KĀNŪN-I EṢĀSĪ, "fundamental law", the name given to the constitution of the Ottoman empire dated *Dhu 'l-Ḥijja* 7, 1293 (Dec. 24, 1876), promulgated by a *ḡaḡṭ-i sharīf* of the same date addressed to the Grand Vizier Midḡat Paṣha. It maintains the order of succession of the family of ʿOthmān and explicitly gives the Sultān the title of *Ḳhalīfa* (art. 3), protector of the Muslim religion (art. 4). It confirms his sacred and non-responsible character (art. 5). It enumerates the rights of Ottoman subjects (art. 8—26), the duties and responsibilities of the ministers (art. 27—38) and other officials (art. 29—41); establishes a parliament (*medjlis-i ʿumūmī*), consisting of two chambers, the Senate (*Heyʿet-i aʿyān*) and the

Chamber of Deputies (*Hey'et-i me'vūhān*); the first is to consist of members nominated directly by the Sultān and its numbers must not exceed a third of the second (art. 60), which is elected by the people on a ratio of one deputy for every 50,000 Turkish subjects (art. 65). It establishes the permanency of the magistracy (art. 81). No tax can be levied if it is not passed by a law, *kānūn* (art. 86). The administration of the provinces is based on the principles of decentralisation (*tewsi-i me'dhūniyet*) and the separation of powers (*tefrīk-i vezā'if*); it is based on elected municipal councils (art. 108—112). In case of trouble, the state has the right to proclaim an autocratic government, *idāre-i urfiyē*; it is the state of siege which is meant by this name (art. 113); banishment on the Sultān's decision is provided for those who stir up trouble. The principle of compulsory elementary education is laid down (art. 114). In spite of the formal terms in art. 115, according to which not a single article of the constitution could be suppressed or not put into operation for any reason or under any pretext, the fundamental law of the empire, although continuing to figure at the head of the *Sālnāmē* (official annuals), was actually suspended after the fall of Midhāt Pasha and only re-established by the military revolution which marked the close of the reign of 'Abd al-Hamīd II.

The same name was given to the Persian constitution proclaimed by a *firmān* (royal proclamation) dated Djum. II 14, 1324 (Aug. 5, 1906) and promulgated on Dhu 'l-Kāda 14, 1324 (Dec. 30, 1906) in the reign of Muẓaffar al-Dīn Shāh. It deals only with the formation and activities of the national assembly; it was granted in reply to the demand of the refugees in the English legation. A supplementary constitution, promulgated by Muḥammad 'Alī, successor to Muẓaffar al-Dīn, on Shābān 29, 1325 (Oct. 7, 1907), laid the foundation for constitutional law in Persia. It laid down more especially that Shī'ī Islām is the official religion of the State, that Tīhrān is the capital, that the national flag is green, white and red (in three horizontal stripes) with the emblem of the Lion and Sun. It provided for the equality of citizens of Persia before the law, the protection of life and property: arrests could not take place without a written order from the President of the Tribunal of Justice. It recognises the freedom of the press, except for heretical publications or those hurtful to religion, as well as the right of association and assembly. Legislative power is divided between two chambers. The ministers must be Muslims, they are responsible to the two chambers; lastly it provides for the establishment of provincial and departmental councils (*andjuman*).

(CL. HUART)

KĀNŪN-NĀMA, the name given to the fundamental law of the Ottoman Empire promulgated by Sultān Muḥammad II on the advice of his Grand Vizier, Muḥammad of Caramania. It is divided into three sections called *bāb* (chapter), which treat respectively of the great dignitaries of the Empire, of customs and ceremonies and lastly of the fines for crimes and revenues set aside for special appropriations.

Sultān Sulaimān completed these ordinances by issuing several *Kānūn-nāmē*'s. The one reorganised the administration of the military fiefs (*zi'āmet*, *timār*) established by Murād I; the second codified the administration of the farms in Egypt; the third laid down the rights and duties of the *rafāyā*, "subjects" Muslim and non-Muslim in respect of feudatories; the fourth dealt solely with the police regulations and the penal laws.

(CL. HUART)

KAPLĀN GIRĀY, the name of two Khāns of the Crimea in the eighteenth century.

1. KAPLĀN GIRĀY I reigned three times: 1119—1120 (1707—1708), 1125—1128 (1713—1716) and 1143—1149 (1730—36). He died on the island of Chios in Shābān, 1151 (Nov.-Dec., 1738). Immediately after the death of his father Salīm I, in Shābān, 1116 (Nov.-Dec., 1704), he set up as a claimant to the throne but was not proclaimed Khān till after the death of his brother Ghāzī III. His own three depositions were on each occasion the result of the unfortunate course of military operations; the first (according to Smirnow, 9 months before the battle of Poltawa, i. e. Oct. 1708) after an unsuccessful campaign against the (then not yet completely islamised) Circassians, the second as a result of his arriving too late on the scene of operations on the Danube, the third (when he was now enfeebled by old age and illness) after his campaign to Persia, by which without even reaching the frontiers of Persia he exposed his own country to the invasion of the Russians. He was generally regarded as a skilful politician but an unfortunate general.

2. KAPLĀN GIRĀY II, grandson of Kaplān Girāy I and son of Khān Salīm II, only reigned for a short period: 1183—1184 (1770). He fought unsuccessfully against the Russians in the Dobrudja, was falsely accused of having had dealings with the enemy and deposed on Shābān 4, 1184 (Nov. 23, 1770). He died in Rabi' II, 1185 (July-Aug., 1771) of the plague at the age of 32.

Bibliography: W. Smirnow, *Krimskoje chanstvo pod verchovenstvom Ottomanskoi Porti v XVIII. stoljetii*, Odessa 1889, p. 6, 8—14, 25—30, 51—58, 116—127; O. Retowski, *Die Münzen der Girei*, Moscow 1905, p. 165 sq., 170 sq., 184 sq., 230 sq. (W. BARTHOLD)

KAPLAN MUŞTAFĀ PASHA, a native of Merzifon, an Ottoman general and statesman of the time of Sultān Mehmed IV (1648—87), one of the ablest and most successful collaborators of the Grand Vizier Köprülü Aḥmad Fāzil (Fādil) Pasha and therefore closely involved in Turkey's struggle under the Köprülü's to regain her old position of power.

He was brought up in the court service, was Silihdār of the Sultān and in 1650 was appointed Wāzīr and Wālī of Baghdād. He spent a number of years as Wālī of important provinces, in Wān, Ḳonya and Damascus, until the Hungarian campaign gave him an opportunity to distinguish

himself, notably before Neuhausl in 1663, at Kanischa and elsewhere. The Grand Vizier gave him his sister in marriage in order to ally him closely to him. Ahmad Fāzil Pasha cleverly managed to transfer the most important affairs to his brothers-in-law. In 1660 Kaplan was appointed Grand Admiral (*Kapudan-i Deryā*) ("a tiger on land and a crocodile at sea", as Rāshid describes him à propos of his appointment in allusion to his name) (Kaplan = panther). He filled this important post for six years, commanded the Ottoman fleet with vigour and caution during the heavy fighting of the time and cooperated with special distinction in the conquest of Crete. He then took part in the campaign against Poland and conquered Lemberg along with the Khān of the Crimea. He then became Wālī of Aleppo in 1672, of Diyār-bakr in 1675, of Baghdad for a second time in 1676 and in 1677 of Diyār-bakr again. After the death of the Grand Vizier Ahmad Fāzil Pasha his frank nature still enabled him to maintain his position against the new Grand Vizier Kara Muştafā, who was not inclined in his favour. Even the severe defeat which he suffered in 1678 in the Ukraine in the swamps between the fortress of Tschechirin and Romodanowski, where he lost the whole of his army and equipment, brought him only temporary dismissal and disgrace. Soon afterwards he became Grand Admiral for a second time. He died in November, 1680, in Smyrna, which he happened to have entered with the fleet, and was buried there. In Baghdad he had restored the mosque and *türbe* of Shaikh Muhammad Kudūri.

(TH. MENZEL)

KAPU, gate, the Ottoman Porte, properly the palace of the Sultān or of the Grand Vizier. The name (by synecdoche, cf. "court") may be of Central Asian origin; it recalls names like the Japanese mi kado, for example, literally "exalted gate", etc. (cf. J. Six in *Acta Orientalia*, ii. 205 sq.). Among the Ottomans *Kapu* has been long in use in the above sense and used alternately with the Arabic *bāb* or the Persian *der*. The name may have passed from Turkish into Arabic about the Mamlūk period, as, for example, the passage i. 469, 2 from below, in Ibn Khaldūn, *Histoire des Berbères*, transl. de Slane, Algiers 1847, where *bāb* = palace, shows. — *Kapu Kūli* "gate-slaves" (the meaning of this expression is explained and a list of the troops concerned given in Ahmed Djewdet, *Tārīkh*, xii., Stambul 1301, p. 214, 7 from below; cf., on the other hand, J. von Hammer-Purgstall, *Gesch. des Osm. Reiches*, iv. 566). — The name "lofty gate" for the office of the Grand Vizier (*Pasha Kapusu*, *Bāb-i ʿālī*, "Sublime Porte, Fulgida Porta") probably did not come into use before 1654, when the Grand Vizier Derwish Mehmed Pasha was given a building near the Serai for an office by Sultān Mehmed IV.

KAPUÇI, gate keeper, porter (Ar. *bawwāb*, Pers. *derbān*), formerly the lowest grade and outermost guard of the Imperial Serai chosen from the Yanıçars, who guarded its gates, 50 at each gate. By day they carried a rod of bamboo, by night they were armed with sword and dagger. They were used as messengers to carry to the grandes of the Empire and foreign princes invitations to court festivities or documents of state. Some performed the duties of eunuchs. They wore white helmet-like caps (*uskuş*, *scuffia*). Their number and pay varied. While they numbered 300 at the beginning of the sixteenth century (cf. T. Spandugino, *Commentari dell' origine de' principi Turchi* (Florence 1551, p. 130; in Schefer's edition, Paris 1896, p. 116 sqq.) and each *Kapuçi* received up to 7 aspers a day, their pay had risen to 20–50 aspers daily about 1511 (cf. the Bailo Andrea Foscolo report of March 6, 1511, quoting Marino Sanuto, in J. v. Hammer, *Gesch. des Osm. Reiches*, ii. 627; cf. ii. 234 as well as Spandugino, ed. Schefer, p. lix.); under Sultān Murād III in 982 (1574) their number was 356 (cf. *Z.D.M.G.*, 1861, xv. 283) and under Sultān Mehmed IV (1648–1687), according to Husein Hezārfenn's (d. 1103 = 1691) *Kānūnnāme* (written in 1080 = 1669; cf. F. Pétis de la Croix, *État général de l'Empire Othoman, par un solitaire turc*, Paris 1695, and J. von Hammer, *Staatsverfassung des Osman. Reiches*, ii. 44 sq.), they had risen to 1962, who received 5,785,004 aspers a year. The *Kapuçiler* were divided into 45 companies, each of which was under its own company-commander (*buluk bashī*), who held a fief in place of salary. The commander of the gatekeepers was the *Kapuçiler Bashī*, a kind of chamberlain. According to the evidences of Menavino, Navagero and Spandugino, the number of *kapuçiler bashī*'s in the first half of the xvth century was only four. Above them was the *kapuçiler kuyası*, head-chamberlain. (FRANZ BABINGER)

KAPUDAN PASHA, formerly the title of the supreme commander of all the Ottoman fleets, who had also unlimited control of the imperial arsenal. The origin of this rank dates back to the beginnings of Ottoman sea power under Sultān Mehmed II. The first naval captain (*Kapudan-i Deryā*; the word *Kapudan* comes from the Greek *Καπαδάνης*) was Balta-Oğlu Suleimān Beg, probably of Bulgarian origin, the Παιτδγληγ or Παντδγληγ or Πατδγληγ of the Byzantine chroniclers (Chalcocondylas, p. 390, 519; Kritoboulos, i. 22, 28, 33, 37, 39, 41; Dukas, p. 270, 5; cf. ʿĀlī, *Kūnh ūl-Akhbār*, v. 168, 174). Till 1533 the Sandjakbeg of Gallipoli was at the same time *Kapudan Pasha* (cf. [Ramberti], *Cose de' Turchi*, Venice 1543, p. 142^a; T. Spandugino, *Commentari dell' origine de' principi Turchi*, Firenze 1551, p. 146, 164; Nic. de Nicolai, *Navigations et pèlerinages orientales*, Lyon 1567, p. 77; N. Barozzi and G. Berchet, *Le relazioni degli ambasciatori Veneti*, p. 356: capitano dell' armata di Gallipoli; cf. Feridūn Bey, *Münshīʿat-Selāṭīn*², i. 464: *Gelibolu Kapudanı*). With the increasing sea power of the Ottomans and the foundation of an arsenal of their own, especially under Sulaimān the Great when the dreaded Khair al-Dīn Barbarossa

for so long commanded the fleet, the headquarters of the High Admiral were removed from Gallipoli to Constantinople. While the office of Kapudan Pasha, who had the 10th wilāyet of the Empire as well as 13 sandjaks under him and disposed of an income of 885,000 aspers (cf. Sir P. Ricaut, *The Present State of the Ottoman Empire*, London 1687, p. 102 sq.), was already one of prestige, with the increasing size of the Ottoman navy it soon became one of the first in the Empire. As long as the Sandjak-beg of Gallipoli was at the head of naval affairs, his jurisdiction only extended to Pera and Nicomedia and in larger naval enterprises a special Pasha was appointed beside him, who acted in supreme command as admiral (Spandugino, *Commentari*, Firenze 1551, p. 165). Later, especially from the time of Barbarossa, the Kapudan Pasha was one of the regular and active members of the Diwān and was not only one of the most powerful but also one of the best paid dignitaries in Turkey. In rank he was equal to the *Ser Asker*, directly below the Grand Vizier and the *Shaikh al-Islām*. On account of the revenues attached to the post it was always an object of ambition in the Turkish official world and was granted by the Sultān as a mark of special favour without regard to practical or theoretical training and fitness. Down to about 1780 the Kapudan Pasha was also given the governor-generalship of the islands subject to the Porte in the Aegean Sea, some of the sea-provinces of Asia Minor and the controller-ship of the arsenal on the north shore of the Golden Horn in Galata, where he had his residence among the wharves. In the sixth century the title was abolished under Sultān 'Abd al-'Aziz and replaced by that of *Bahriye Nāzirī*, Director of the Arsenal. All naval establishments were under him, the Minister of Marine; a naval council (*Shūrā-i Bahriye*) assisted him and advised on technical matters and affairs of administration. In June, 1876 under Murād V, the title was revived but only for a short time; it was then definitely replaced by that of Minister of Marine.

A list of all *Kapudanān-i Deryā* is given in J. v. Hammer-Purgstall's *Geschichte d. Osmanischen Reiches* (at the end of each volume) and in the work — which first appeared as a feuilleton of the newspaper *Djerride-i Hawādith* — by Rāmiz Pasha-Zāde Mehmed Efendi, *Kharīṭa-i Kapudanān-i Deryā* (of 761—1258 [= Chronogram of the title]; 220 pp., 12°, Stambul 1285 = 1868/69) and in Mehmed Rā'if, *Mir'āt-i Istambul*, Stambul 1314, p. 481—497.

KARA, the Turkish word for black or dark colour in general. It is commonly used with this meaning as the first component of geographical names, for example Kara Āmid (on account of the black basalt of which this fortress is built), Kara Dağ (on account of its dark forests), etc. Beside Kara we find in place-names the form *Karadja*. In personal names it refers to the black or dark brown colour of hair or to a dark complexion. It has, however, at the same time also the meaning "strong, powerful" and has

to be interpreted in this sense in the name Kara Osmān or in names like Kara Arslān. In this connection also we have the name Kara Khān, which was assumed by the Karakhānids in Eastern Turkestan.

KARA ARSLAN IBN DĀ'UD with the *laqab* FAKHR AL-DĪN, third Amir of the line of the Ortokids [q. v.] of Ḥiṣn Kaifā and great-grandson of the founder of this dynasty.

Statements differ regarding the year in which he succeeded his father Dā'ud b. Suḡmān. According to Abū 'l-Faraj Barhebraeus (*Chronicon*, ed. Bedjan, Paris 1890, p. 305), Dā'ud died in the Greek year 1455 (1143—44). The Arabic sources do not give the year; in any case Stanley Lane-Poole, who bases his view that Dā'ud did not die till about 543 (1148) on a mistaken interpretation of Ibn al-Athīr (*Kāmil*, xi. 73) (*Coins of the Urtuqi Turkomāns in Numismata Orientalia*, Part ii., London 1876, p. 6), puts the date too late. Münedjdjīm Bashī (iii. 577) gives 540 (1145). Even before his father's death we find Karā Arslān at war with the Crusaders. When in Ramaḡān, 532 (May, 1138) the Byzantine Emperor John, in alliance with the Franks against the Atabek Zangī of Mawṣil, besieged the fortress of Shaizar near Antioch, he retired when he heard that Karā Arslān had crossed the Euphrates with 50,000 men to come to the help of the town (Kamāl al-Dīn al-'Adīm, *Tārīkh Ḥalab*, in the *Recueil des Historiens des Croisades, Documents Orientaux*, iii. 677). Karā Arslān does not, however, seem to have had at all a friendly reception from Zangī on his arrival; the Atabek, indeed, ordered him to go back to his father. His relations with Zangī continued to be strained, as is shown in the account in Kamāl al-Dīn (p. 684) that a battle was fought between the two in 536 (1141—1142) at Bahmard, in which Karā Arslān was defeated. Peace was restored next year again. According to Abū 'l-Faraj's account of his accession (see above), Zangī went so far as to attempt to secure the succession of Karā Arslān's elder brother Toghmish, who had escaped to Mawṣil. Sultān Mas'ūd of Konya, however, gave help to Karā Arslān and Zangī had to abandon his plan.

However strained may have been Karā Arslān's relations with Zangī, his alliance with the latter's son Nūr al-Dīn of Aleppo was a most faithful one. In 544 (1149—1150) he accompanied the latter on an expedition against the town of Sindjar, which, however, was later again restored to Nūr al-Dīn's brother Kuṭb al-Dīn. In 559 (1164) he again assisted him, along with Naḡm al-Dīn of Mārdīn and other princes, at the capture of the fortress of Ḥāram, where many Frankish knights were taken prisoner (Ibn al-Athīr, xi. 92, 185). For the rest Karā Arslān does not seem to have been of a particularly warlike disposition. He would have preferred to keep out of the last named expedition, if the fear of his own subjects, whose fanaticism had been aroused by Nūr al-Dīn (and apparently also the fear of Nūr al-Dīn himself), had not compelled him to take part. Very little else is chronicled of his activities; for example, the capture of the Kurdish stronghold of Shātān (Ibn al-Athīr, xi. 185) in 546 A. H. and the unsuccessful

siege of 'Amīd on a campaign against the Danishmandid Yaghī Arslān in 1163 A. D. (Abu 'l-Faraj, *op. cit.*, p. 329).

The Arabic and Syriac sources are unanimous in giving the year 562 (1166—67) as the year of his death. Ibn al-Athīr (xi. 217) tells how before his death he commended his son and successor Nūr al-Dīn Muḥammad to the protection of his powerful ally Nūr al-Dīn of Aleppo. The latter kept the trust and prevented his own brother Kuṭb al-Dīn from seizing Karā Arslān's territory. Stanley Lane-Poole, on the other hand, relying on coins of the year 570 A. H. of Karā Arslān, places his death in 570 or even not till 571 (*op. cit.*, p. 16).

Hiṣn Kaifā [q. v.] seems to have been his usual residence. There still exist here the remains of the great bridge of one arch over the Tigris which, according to Ibn Ḥawqāl (*B. G. A.*, ii. 152), he had restored. Abu 'l-Faraj, however, calls him, like his father, lord of Hiṣn Ziyād (i. e. Khartabirt) (Kharput). It is very possible that this town belonged to Karā Arslān's territory, for in 1122 it was in the hands of the Ortoqid Balak and Karā Arslān's son 'Imād al-Dīn later (581) founded there a collateral line of the Ortokids. But the town of 'Amīd most probably never belonged to his possessions; it was only presented to his successor by Saladin in 579 (Ibn al-Athīr, xi. 324). At his death he is, however, described as ruler over Hiṣn Kaifā and the greater part of Diyār Bakr (Ibn al-Athīr, xi. 217).

Bibliography (besides works already mentioned): F. Wilken, *Geschichte der Kreuzzüge*, ii, iii, Leipzig 1813, 1817; *Recueil des Historiens des Croisades, Documents Arméniens*, Paris 1869, p. 155, 357, and *Historiens Orientaux* (besides Kamāl al-Dīn also Abu 'l-Fidā' and Abū Shāma). On Karā Arslān's coins (remarkable, like the coins of other Ortokid and Atabeg lines, for their pictorial types) see Stanley Lane-Poole, *op. cit.*, and his *Catalogue of Oriental Coins in the British Museum*, iii. (1877), 118. On inscriptions with the name of Karā Arslān cf. M. v. Oppenheim, *Inscriften aus Syrien, Mesopotamien und Kleinasien*, i.; *Arabische Inscriften* by M. v. Berchem, Leipzig 1909, p. 83, 85. (J. H. KRAMERS)

KARABĀDHĪN. [See AKRABĀDHĪN].

KARĀ-BĀGH (Turkish-Persian: 'black garden', because of the black and fertile soil of its high valleys), the present-day name of the mountainous part of Arrān [q. v.] forming a province of Transcaucasia bounded by the Kurr, the Aras and the district of Eriwān; area about 6,750 sq. miles and 250,000 inhabitants (half Ādharbaidjāni and half Armenians); capital Shūsha; mountains: Kāmish (12,480 feet) and Kapudjik (12,360 feet). Its horses are famous for their swiftness, and reptiles, scorpions and tarantulas are found there. It is in this province that Faṭḥ 'Alī Ākhondzāde [q. v.] lays the scene of his comedy: *Monsieur Jourdan, botaniste parisien*.

At the beginning of the reign of Shāh 'Abbās I, in 996 (1588), the Ottoman general Farhād Pasha, in alliance with the governor of Shirwān, Dja'far Pasha, invaded Karā-bāgh and seized Gandja (v. Hammer, *Hist. de l'Empire Ottoman*, vii. 221; Sykes, *History of Persia*, ii. 257—258). This province was at that time the hereditary fief of the Turkish clan of Djewānshir, the family of Sariča-lu, a descendant of Avshār or Afshār, eldest

son of Yulduz, third son of Oghuz (Abu 'l-Ghāzī, ed. Desmays, St. Petersburg 1871—74, p. 27). This clan emigrated from Turkeṣtān with Hūlāgū and was brought back from Asia Minor by Timūr and scattered over Turkeṣtān, Persia and Afghānistān, especially around Kābul and Kāndahār. Its chiefs were called from father to son alternately Panāh and Ibrāhīm Khalil; it was Panāh III who built Shūsha in 1165 (1752) and gave it the name of Panāh-ābād, whence the name *panāh-ābādī* given to the coins which he struck there. His son Ibrāhīm Khalil Khān, having succeeded him, found himself attacked by the Persians; after two fruitless sieges, Āghā Muḥammad Khān (later Shāh) Kādjār captured Shūsha but was assassinated there on the morning of Dhu 'l-Qa'da 21, 1211 (June 18, 1797), five days after entering the town, by three of his servants who feared his vengeance. Ibrāhīm, who had fled, came back two months later; he submitted to the Russian general, a Georgian by origin, Prince Sisianoff (Zizishwili), after the capture of Gandja in 1219 (1804) and agreed to pay a tribute of 6,000 ducats; he received the rank of lieutenant-general and a Russian garrison occupied his capital. His eldest son, Abu 'l-Faṭḥ Khān, was the brother-in-law of Faṭḥ 'Alī Shāh and had remained faithful to the Persian alliance; he brought his father back to the Kādjār party and the latter attempted to liberate his capital, but Dja'far Qulī Khān, son of Muḥammad Ḥasan Khān and grandson of Ibrāhīm, warned the Russians of the Persian advance. 600 Russian soldiers left the citadel and in the middle of the night of Rabī' I 23, 1221 (June 10, 1806) attacked the camp of Ibrāhīm Khalil, who was killed with his family in the fighting. The Russian major commanding the garrison installed another of his sons in his place, Mahdī Qulī Khān, who reigned till 1238 (1822) when he fled to Persia. The Kādjārs had, however, renounced all claim to Karā-bāgh by the treaty of Gulistān (Oct. 12, 1813).

(CL. HUART)

AL-KARĀBISĪ, the cloth-merchant, the *nisba* of several Arab authors; viz.:

1. the mathematician AḤMAD B. 'UMAR, the date of whose death is not known and among whose works, a commentary on the translation of Euclid is specially celebrated; see *Fihrist*, p. 265, 25, 282, 3; Ibn al-Kifī, *Ta'rikh al-Ḥukamā'*, Cairo 1326, p. 57, 5.

Only one of his works has come down to us, viz. his *Kitāb Misāhat al-halaḳ* (Oxford and Cairo; cf. *Bibl. Bodl.*, *Codd. Mss. Or.*, i. N^o. 913; and *Fihrist al-Kutub al-'arabiya fi 'l-Kutubkhāne al-Kheda'iwiya*, v. 204).

2. the traditionist and faḳīh ABŪ 'ALĪ AL-

HUSAIN B. 'ALĪ B. YAZĪD AL-MUHALLABĪ, who had at first belonged to the Ahl al-Ra'y, but after the arrival of al-Shāfi'ī at Baghdād attached himself to him; at the same time he remained an absolute supporter of the belief in predestination (*djabr*); nothing has survived of his writings on criticism of traditionists and fiqh. He died in 245 (859), according to others in 248 (862).

Reiske-Adler, ii. 204; Ibn Taghribirdī, ed. Juynboll, i. 753, 763.

3. the Ḥanafī faḳīh AS'AD B. MUḤAMMAD (d. 570 = 1174), whose *Kitāb al-Furūḳ fi 'l-Furūḳ*, which Ḥādjdī Khalīfa, *Kashf al-Zunūn*, ed. Flügel, iv. 419, N^o. 9041 confuses with the *Talkhīṣ al-Uḳūl* of al-Maḥbūbī (Brockelmann, *G.A.L.*, i. 380, N^o. 34), is preserved in Cairo; see *Fihrist al-Kutub al-'Arabiya fi 'l-Kutub-khāne al-Khednwiya*, iii. 96.

(C. BROCKELMANN)

KARĀ-CELEBĪ-ZĀDE, epithet of the Ottoman historian, jurist and *Shaiḫh* al-Islām, 'ABD AL-'AZĪZ EFENDI. Born in the year 1000 = 1591/92 at Stambul, the son of the then military judge of Rumelia, Ḥusām al-Dīn Ḥusain b. Muḥammad b. Ḥusām al-Dīn Efendi (d. in Muḥarram, 1007 = Aug., 1598 at Brussa and buried there; cf. al-Saiyid Ismā'il Beligh Brüsewī, *Tārīkh-i Brūsa*, Brussa 1302, p. 314—316; Ewliyā, *Siyāhat-nāme*, Constantinople 1314—1318, ii. 53; he bore the *makhlas* Karā-Celebi-Zāde which passed to all his descendants and caused frequent confusion), he enjoyed the tuition of his older brother, the chief district judge Muḥammad Efendi (cf. M. Thuraiyā, *Sidḡill-i 'Othmānī*, iv. 155; Ewliyā, *op. cit.*, i. 407; J. von Hammer, *Constantinopolis*, ii. 25; M. E. died *Dhu 'l-Hijja* 6, 1042 = June 14, 1633 and is buried at Aiyub in Stambul) and studied also under the Mufti Ṣan' Allāh Efendi. He then filled a series of offices: in August, 1612 he became Mūderris at the medrese of *Khair al-Dīn Pasha*, in April, 1615 at the new medrese of 'Alī Pasha, in April, 1616 at the medrese of Piri Pasha, in April, 1617 at the medrese of *Qalender Khāne*, in December, 1619 so-called "eighth" (*ṣaḥn-i ṥamīn*) at the mosque of Muḥammad the Conqueror; in Jan., 1621 he was transferred to the Sulaimāniya at Brussa, but by October of the same year appointed to the Sulaimāniya in Adrianople and in May, 1623 summoned to the same institution in Stambul. In June, 1623 he was involved in a mutiny of the 'Ulemā at the mosque of the Conqueror and sent as a punishment to Brussa to the medrese of Molla *Khusrav* but pardoned on the accession of Murād IV and in Jan., 1624 recalled to Stambul to the Sulaimāniye. In March of the same year he became judge of Yenī Shehir, was dismissed in December, appointed judge of Mekka in February, 1626 and dismissed once more in December, 1627; returning to Stambul, after a short stay in Adrianople, he was appointed city-judge of Stambul in Jan., 1634. In this capacity he had to take measures for the

security of the city during the preparations for the Polish campaign; cf. J. v. Hammer, *Gesch. des Osm. Reiches*, v. 178). But when in July of the same year the shortage of grease provoked discontent among the people of Stambul and brought down the wrath of Murād IV upon the judge responsible for the regulation of the market (cf. *Z.D.M.G.*, xviii. 722) he was dismissed from his office and sentenced to death by drowning. A letter in the Sulṭān's hand ordered the Superintendent of the Imperial Gardens (*Bustāndār Bāshī*), Dudge Efendi, afterwards governor of Bosnia, to take the disgraced magistrate in a boat and to supervise the execution of the sentence on one of the Princes' Islands. The boat was just reaching Prinkipo, where the sentence was to be carried out, when fortunately for Karā-Celebi-Zāde, a second letter, procured by his patron, the Grand Vizier Bairam Pasha (d. 1638), brother-in-law of the Sulṭān, arrived which altered the drowning to banishment to Cyprus and at the last moment prevented the execution of the death sentence (cf. Na'imā, *Tārīkh* Stambul 1147, i. 577). Pardoned by December, 1634, he was appointed military judge of Rumelia. During the rebellion which cost Sulṭān Ibrahim his throne and life in the summer of 1648 Karā-Celebi-Zāde distinguished himself by such shamelessness that even the frank Na'imā (ii. 166; J. v. Hammer, *op. cit.*, v. 449) has not the courage to repeat his utterances. After Ibrahim had been disposed of, he gained the favour of the youthful Muḥammad IV, who again appointed him military judge in Aug., 1648. The real object of his ambition, which he pursued by every means in his power, was the office of *Shaiḫh* al-Islām. After he had first been granted the title of a *Shaiḫh* al-Islām (Na'imā, ii. 231), a case probably unique in Ottoman history, he was removed in October, 1649 from his position as military judge and appointed *Shaiḫh* al-Islām in place of Behā'i Muḥammad Efendi, dismissed on May 2, 1651 ("Balios Müftisi; cf. von Hammer, *op. cit.*, v. 531—535). On the fatal Sept. 2, 1651 he once more fell into the imperial disfavour and was banished to Chios. Two years later he was given permission to go to Brussa and in 1655 for the barley-money (*arpa'nak*; see i. 460) which he had so far enjoyed he received the revenues of Chios and the office of judge of Mudania, which he exchanged in March, 1657 for that of Gallipoli. On the evening of Jan. 11, 1658, death finally ended Karā-Celebi-Zāde's eventful career. He was buried at Brussa in the cemetery of *Shaiḫh* Muḥammad Dewedji; his tomb may still be seen there.

Karā-Celebi-Zāde is not a very pleasing figure in Ottoman history, as he was a ruthless, selfish and intriguing man. His prestige as a scholar is therefore all the more marked. He was the author of a series of historical works, of which two have so far been printed. With the *Mir'āt al-Ṣafā* his chief production is the *Rawḍat al-Abrār*, a historical work in four parts dedicated to Sulṭān Ibrahim I, which covers the period from Adam down to 1056 (1646/47). The book, of which there are several good manuscripts in Europe (cf. G. Flügel, *Die arab., pers. u. türk. Hss. . . . zu Wien*, ii. 96, N^o. 865; Tornberg, *Codices . . . Bibl. Reg. Univ. Upsaliensis*, p. 193, N^o. 277 and p. 197, N^o. 286, which appears not to be complete), was printed in Muḥarram, 1248 (1832/33) at Bülāk

(large 4°, six parts, 637 pp.; on p. 637 full title). His *Sulaimān-nāme* has also been printed (Bulāḡ 1248, large 8°, 230 pp.); it is the epic of the legislator Sulaimān in which he describes his glorious reign to his death (1520—1566) in a pleasing flowery style (a MS. in Vienna; cf. Flügel, *op. cit.*, ii. 230). He extended his historical work from 1056 to 1068 (1646—58) by a supplement (*Dhail*) of which there are copies in the Vienna National Library (cf. Flügel, *op. cit.*, ii. 262), in the Johanneum of Graz and in the possession of Dr. J. H. Mordtmann. Several other smaller historical works from his pen exist in manuscript, e. g. an account of the conquest of Eriwān (1635) and Baghdād (1638) entitled *Ta'rikh-i Fatḥ-i Riwān wa-Baghdād* (cf. Flügel, *op. cit.*, ii. 262). Kara-Celebi-Zāde's translations from the Persian and Arabic as well as other writings are detailed by Hādjī Khalifa, ed. Flügel, ii. 113, v. 233. He also dabbled in poetry under the name 'Azizī. A poem entitled *Gülshen-i Niyāz*, written in 1634 on the occasion of his banishment, exists in MS. in the Prussian State Library in Berlin (cf. Pertsch, *Verz. d. Türk. Hss.*, p. 415 sq.) and in the British Museum (cf. Rieu, *Cat. of the Turk. MSS.*, p. 191a; see also Hādjī Khalifa, *op. cit.*, v. 233, No. 10,840).

Bibliography: cf. besides the already mentioned sources the biography in Na'imā under the year 1068; Hādjī Khalifa, *Fedleke*, ii. 152 (biography); the best sketch of his life with all details is given by Ismā'il Beligh Brūsewī, *Güldeste-i Ziyā-i 'Irfān*, Brussa 1308, p. 317—322; *Siğill-i 'Oḥmānī*, iii. 339; Mustakim-Zāde, *Dawḥat al-Mashāyikh al-Kibār*, Vienna MS., Mxt. 153 (Flügel, ii. 409 sq.); Rif'at Efendi, *Dawḥat al-Mashāyikh*, Stambul n. d., p. 58—62; *İlmīye Sātnāmesi*, Stambul 1334, p. 461 sqq. (with reproduction of K.'s signature); J. v. Hammer, *Gesch. der Osm. Dichtkunst*, iii. 426 sqq.; do., *Gesch. des Osm. Reiches*, v. 178, 184. — K.'s collection of manuscripts is still preserved in the library of the Shāhzāde mosque in Stambul. A catalogue of the books (16 pp., 4°, Stambul n. d.) has been printed. — On the family, of which several members achieved fame, cf. especially Hādjī Khalifa, *Takwīm al-Tawārikh*, p. 191; also Ismā'il Beligh, *op. cit.*, p. 315, where the ancestors of Kara-Celebi-Zāde are dealt with; cf. also Wüstenfeld, *Die Gelehrtenfamilie Muhiḥbi*, p. 48).

(FRANZ BABINGER)

KARĀČĪ (KURRACHEE). 1. An important city and seaport on the coast of Sindh situated 24° 51' N. 67° 4'. E. Population (1901) 116, 663. The administrative centre of the province of Sindh at the present day, and gives its name to a district.

The name does not appear to be of great antiquity, and is probably due to the settlement of a Dodāi Balōḥ tribe called Kulāči, originally Rādjipūt (see *Glossary of Panjab Castes*, Lahore 1911), from whom the town of Kulāči (in the Dēra 'Ismā'il Khān District of the N. W. Frontier) also took its name. Following a common practice in the Sindhi language the *l* has become *r*. (Cf. Kōlī in the Panjāb and Kōtrī in Sindh).

The harbour of Karāči was naturally a good one, although when first surveyed by English sailors it was impeded, as Pottinger tells us (1808), by a bar, which prevented vessels drawing more

than 16 ft. from entering. The population was at that time only 9000, but it had already become the principal port of Sindh. The *Imperial Gazetteer of India* (Bombay, Vol. II) asserts that Karāči began to be known as a port about 1729, and that its rise was due first to the silting up of Khārak and afterwards of Shāhbandar, a statement which is not easy to understand. Khārak (an island in the Persian Gulf occupied by the Dutch from 1748 to 1765) could have had no influence on Karāči, and Shāhbandar is too far to the Eastern side of the Indus Delta to have affected it. The real cause was the gradual deterioration of the two ports of Dēwal and Sindi (often spoken of jointly as Diul-Sindi) which were situated on the two sides of the west mouth of the Indus. These were still in use in Thevenot's time (*Travels in India*, published 1687) and Manucci visited Sindi on his way to India in 1655. During the 18th century the advance of the land cut off these ports from the sea, but Karāči, lying outside the Delta to the west, was not liable to such rapid silting. It also took the place of Tatta as the principal city of S. W. Sindh. Under the Kalhōra rulers of Sindh it was made over to the Khān of Kilāt, and under his suzerainty was held for a time by the Djam of Las, but after the fall of the Kalhōras the Talpur Amīr, Fatḥ 'Alī Khān, took Karāči in 1795 and erected a fort on Manora point to protect the harbour. Henceforward the trade grew considerably. Pottinger's account in 1808 has been alluded to above. Burnes found the population in 1831 to be 15,000.

Sir Charles Napier made it his landing place in 1841 and after the annexation of Sindh in 1843 he undertook its development with the object of making it the military and civil centre of the administration and also an important port equipped to deal with the trade of the Panjāb as well as of Sindh. Through his judgment and foresight he was able to lay the foundations of the progress made in more recent times. Sir Bartle Frere improved the harbour in 1854 by the construction of the Napier Mole which connects Kiāmāri Island with the mainland. The Manora breakwater was constructed in 1869—73, and the harbour has gradually been restricted in area, and at the same time deepened and otherwise improved. In 1883, a good supply of water from the Malir R. was brought in. General Haig in his work on the Indus Delta identifies the harbour of Karāči with Alexander's Haven which Nearchus reached by sailing westwards from the western mouth of the Indus. As the coast here has not changed so much as in the actual Delta, it is possible to identify some of the places mentioned. The Island of Bibakta appears to be Manōra point, and Eiros seems to be the high ground east of the harbour now known as Clifton. In spite of this identification, however, Karāči as a town has no ancient or mediæval history, although the harbour must always have been of use as a haven of refuge. Its enormous development in modern times is due to the opening up of the trade of N. W. India by railways. It is the outlet for the wheat, cotton, oilseeds and hides of the Indus valley.

2. Karāči District. A modern administrative district taking its name from the town of Karāči, lying between 23° 35' and 26° 21' N. and 66° 42' and 68° 48' E. with an area of 11,970 sq. m., and a population in 1901 of 607,

828. Its boundaries are on the N. the District of Iārkāna, on the E the R. Indus and the Haidarābād District on the S. the sea, and on the W. the Kirthār Mts. and the Habb River. Besides Karāčī the most important town is Tatta, the ancient capital of S. Sindh, which first rose to importance about the beginning of the 16th century, and was an important centre of trade and government in the 17th century, and still a large and flourishing town in Nādir Shāh's time (1742). It was an important mint of the Mughal emperors from the time of Akbar till that of Muḥammad Shāh, when Sindh ceased to form part of the empire. Nādir Shāh and the Durrānis both used this mint; their other mints in Sind were Bhakkar and Ilāidarābād which latter mint probably also issued the coins of Nādir and the Durrānis bearing the name Sindh alone. Tatta, which is now far inland was in the 16th century accessible to seagoing ships and was visited by a Portuguese fleet in 964 (1556). The Portuguese had apparently been called in by the Tarkhān chief 'Isā Tarkhān, who had obtained possession of Tatta after the death of Shāh Ḥusain Arghūn, but, finding the city unprotected in the absence of 'Isā at the siege of Bhakkar, they turned their arms on their ally and plundered Tatta unmercifully. The port alluded to by the Portuguese as Bandel, which was also plundered on this occasion, was probably Shāhbandar. (See Sayyid Djamāl's *Tarkhān-nāma* in Elliot and Dowson, *Hist. of India*, I, 324 and Danvers, *Portuguese in India*, I, 408). The town of Tatta quickly recovered from this disaster, and its final decay was due no doubt to natural changes in the Indus Delta.

KARADAGH. [See MONTENEGRO].

KARA DENİZ, the Turkish name for the Black Sea, the Pontus Euxinus (abbreviated to Pontus) of ancient and Byzantine geography. The Arab geographers took over the Greek names Pontus and Maeotis (Sea of Azov) in the forms *Buntus* and *Ma'ūfis*, which early became *Nīfash* and *Mānīfash* in Arabic writing and language (Juynboll on *Marāṣid al-Iḥṭilā'*, iv. 194) and in these corrupt forms have survived down to the latest works of Oriental geography. Other names were also used, for example Sea of Trebizond (*Baḥr Tarābazuṇda*), Sea of the Crimea (*Baḥr Kırım*), Russian Sea (*Baḥr al-Rūs*; cf. *mer de Rossia* in Villehardouin, ed. Wailly, § 226), which are explained by the commerce of the Muslim East with Trebizond and the coast lands of South Russia (Yākūt, *Mu'djam*, ed. Wüstenfeld, i. 499; al-Dimashqī, *Nukhbat al-Dahr*, ed. Mehren, passim; Abu 'l-Fidā', *Takwīm al-Buldān*, ed. Reinaud, passim; al-Mas'ūdī, *Murūdj al-Dihāb*, ed. Paris, i. 260 sq.; cf. Marquart, *Osteuropäische u. ostasiatische Streifzüge*, p. 162, 333); on the other hand, in the passages where *Baḥr al-Rūm* — which otherwise means the Mediterranean Sea

only — refers to the Black Sea (e. g. Gardizi in Marquart, *op. cit.*, p. 161; al-Dimashqī, *op. cit.*, p. 138, 18, 259, 4 sq.) *Baḥr al-Rūm* should be emended to *Baḥr al-Rūs*. The name *Baḥr al-Khasar*, which originally meant the Caspian Sea, was, on the other hand, transferred to the Black Sea (Ibn Khordādhbeh, *B. G. A.*, vi. passim; Qudāma, *B. G. A.*, vi. passim; al-Mas'ūdī, *Kit. al-Tunbih*, *B. G. A.*, viii. passim), as al-Mas'ūdī (p. 67) thinks, because a connection was erroneously thought to exist between the two seas; as at the same time the name Ma'ūfis (Mānīfash) was extended to the Black Sea (al-Mas'ūdī, *Kit. al-Tunbih*, p. 138, 140; *Murūdj*, i. 272 sq.; al-Dimashqī, *op. cit.*, p. 138, 18, 143, 13, 228, 17), the name Sea of the Khazars may have been at first limited to the Sea of Azov and only by a mistaken use have come to include the Black Sea.

All these names were driven out of use by the name KARA DENİZ, evidence of which is first found in the xiiith century and which is no doubt the name given to the Black Sea by the Turco-Tatar inhabitants of its shores in Southern Russia; it was understood by the western authors of the time to mean "Great Sea" (locus classicus, Rubruquis, ed. Bergeron, p. 2: en la mer du Pont que les Bulgares appellent la grande mer; Mare Majus in Haytho, Vincentius Bellovacensis, Marco Polo, chap. 1; Mar Majour in Ghillebert de Lannoy and Bertrand de la Broquière; mer mayor in Clavijo; the Grete See in Chaucer, *Prologue*, l. 59), more rarely as Black Sea (Schiltberger, who, however, also writes "Grosses Meer"; mare nigrum, quoted for the year 1338 in Yule, *Cathay* etc., new ed. by H. Cordier, iii., London 1914, p. 81; il mar nero in a document of 1473 in Berchet, *La Repubblica di Venezia e la Persia*, Venezia 1865, p. 11), by the Arabs as "Black Sea", *al-Baḥr al-Aswad* (Abu 'l-Fidā', *Takwīm al-Buldān*, p. 31, 34; al-Dimashqī, *op. cit.*, p. 139, 143, 145, 220; *al-Baḥr al-A'zam* in Ibn Khordādhbeh, p. 110 is to be explained otherwise); among the Greeks we find only *mavri thalassa* and this only for the first time in the treaty with Venice concluded in 1265 (*Fontes Rerum Austr.*, part II, xiv. 62); in literature from the xvth century (see Leunclavius, *Pandectes Hist. Turc.*, Ch. 148). The Italians and French used Mare Maggiore, Mer Majour down to the first half of the xviith century: henceforth we find the name Black Sea throughout geographical literature. The older reproduction of KARA DENİZ by "Great Sea" shows that KARA in this connection does not refer to the colour but means, as often in proper names, "great, powerful, terrible" (cf. KARA), in keeping with the dangers of the voyage, particularly in bad weather, upon this sea so liable to storms and of such extent. All other attempts to explain the meaning, especially those which seek to find the name "Black Sea" among the Greeks and Byzantines, or, like L. de Saussure in his brilliant essay *L'origine des noms de Mer Rouge, Mer Blanche et Mer Noire* (*Le Globe*, xliii. 23 sqq.), to trace it to the cosmographic conceptions of the Far East, are to be rejected; nor should one quote in support of "black" Sea the fact that the Turks called the Mediterranean Ak Deniz (White Sea), as if by contrast, any more than we could justify the mediaeval nigromantia (a corruption of nekromantia) by saying that white magic was invented as a pendant to it. — The name "Sea

of the *Khazars*" has survived into modern times in corrupt form *Bahr-i Hazez* (the result of transposition of the diacritical points) as a name of the Sea of Azov.

After the Black Sea had been treated as a *mare clausum* during the centuries under Byzantine rulers, in the latter half of the Middle Ages it was opened up under the Komnenoi and Palaiologoi to the Genoese and Venetians and thus to European trade with the Near and Far East; in Kaffa [see KAFKA], Tana, Amaşra and Samsûn there arose autonomous Frankish colonies and smaller settlements in Sinope and Trebizond. After the fall of Constantinople Mehmed the Conqueror closed the Black Sea to foreign shipping by barring the Straits; the destruction of Amaşra (1459), Sinope and Trebizond (1461) and Kaffa (1475) completed the ruin of Frankish commerce and the Black Sea became a Turkish inland sea, a Πόντος Ἀξενός, on which only the Turkish flag was allowed to wave. It was only with the advance of the Russian empire to the north coast of the Black Sea that the latter was opened first to Russian commercial navigation by art. X of the treaty of Küçük Kainardja in 1774, and ten years later, in 1784, to Austrian and in 1799 to British commerce; in the thirteenth century the other European powers obtained liberty of access to the Black Sea: France in 1802 and following her the smaller seafaring nations; the last treaties on this matter were concluded in 1827. Down to quite recently foreign warships were not allowed to pass through the Straits and into the Black Sea.

Bibliography: The history of the various appellations of the Black Sea has not yet been written. The main work on commerce at the close of the Middle Ages is W. Heyd, *Histoire du Commerce du Levant*, Leipzig 1885—1886; reprint 1924; for commerce under Turkish rule: Ch. Peyssonel, *Traité sur le commerce de la Mer Noire*, Paris 1787; for the later period: Hommaire de Hell, *Les steppes de la Mer Caspienne*, Paris and Strasburg 1843—1845. — The political and diplomatic events which led to the opening of the Black Sea in the xviiith century are fully discussed in [P. Hadji Mischef], *La Mer Noire et les Détroits de Constantinople*, Paris 1899; cf. thereon the notes in Djewdet, *Ta'rikh*, ii. 284 and vii. 485 sqq.; the documents concerned are given by Nora-dounghian, *Recueil des traités internationaux de l'Empire Ottoman*, vol. i. and ii., Paris and Leipzig 1897—1900. (J. H. MORDTMANN).

KARAFERIYA, a small town in Macedonia, situated about 40 miles to the S. W. of Selânik, on the Ana Dere, a tributary of the Indje Kara Şu, in the neighbourhood of the Gulf of Salonica. The ancient Greek name is Βέροια, in modern Greek Véria (Slav. Ber), to which form the Turks have added the adjective Kara. According to the Byzantine authors the town was sacked as early as 1331 by Turkish pirates belonging to the country of Karasî. They landed with 70 ships and laid waste the region of Véria and Trajanopolis, but they were finally driven back by the emperor Andronicus. Karafériya was an important military point; in 1347 it was occupied by the Servians and in 775 A.H. (1373/4) it was conquered for the first time by the Ottoman Turks. From the reign of Murâd II, from whom dates the conquest of Selânik (1430) down to the

Balkan war, Karafériya belonged to the Ottoman Empire. In November, 1912 Karafériya was one of the last Turkish supports in the defence of Selânik, which was at last taken on November 8 of that year by the Greeks; since the peace of Athens (Nov. 14, 1913) it has belonged to Greece.

Karafériya is situated at the foot of the richly wooded Aghostos Dagħ in a fertile region which produces all kinds of crops and vegetables and is famed for its tobacco and especially its vineyards on the mountain slopes. The silk-growing has given rise to a rather important weaving-industry in the town. In the neighbourhood are still ruins of the ancient Βέροια. In the last period of Turkish domination the number of its inhabitants was a little less than 10,000 of whom about one fourth Muslims, the rest being composed of Greeks, Bulgarians and Wallachians. It was the chief place of a Kaḏā of the same name in the wilayet of Selânik.

(J. H. KRAMERS)

KARAGÖZ, principal character in the Turkish shadow-play. The shadow-play has been known to the Muhammadan peoples since about the xith century of our era. Its origin is perhaps to be sought, as Jacob suggests, in Eastern Asia, but, as regards the matter of the plays, there seem to be connections with the Hellenistic mime (Horovitz, Reich). The modern Turkish shadow-players attribute the invention of their art to the patron saint of their gild, *Shaikh Küshteri* (i. e. Tustari, the man from Tustar [Shūshṭar] in Persia), after whom they call their shadow-stage *Shaikh Küshteri Maidânî* "Shaikh-Küşteri place". According to the Turkish biographers a certain *Shaikh* Mehmed Küshteri migrated from Persia to Asia Minor in the xivth century and was buried in Brussa. On the various legendary accounts of the origin of the shadow-play see Ritter, *Karagöz*, i. 5. The shadow-players talk among themselves a kind of professional language, in which gipsy elements predominate. Another circumstance in favour of a connection with the wandering gipsies is the fact that the principal figure, Karagöz, is represented as a gipsy. The shadow-play is a favourite image of the transitoriness and worthlessness of all that is mortal with poets, especially those who are fond of mysticism. The idea often expressed by the mystics that all things in the world have only a shadow-existence and only owe their being to the light permeating things from the Primeval One, who alone possesses reality and substance, found in the shadow-play a symbolical application. The shadow-players are fond of calling attention to this edifying aspect of their performance in the so-called stage-ghazel (*perde ghazeli*).

The external apparatus of the shadow-play consists of a stand like that of the European marionette theatre, only that in place of the open stage a canvas is stretched across and illuminated by an oil-lamp. Against this canvas (*perde*) the

shadow-player presses coloured figures about a foot high made of dried skin; this is done by means of guiding rods which are put into the figures through holes provided with links. All the figures that appear are controlled by one player. Two musicians are his only assistants. The performances usually take place in the early hours of the nights of Ramaḍān but are also given as entertainments at domestic festivals, such as circumcisions.

The following is the course of the typical performance of the Turkish shadow-play: an introductory picture (*gösterme*) is shown on the canvas before the beginning of the performance. This is removed during introductory music on a reed-pipe and one of the two principal characters, Hacıwād, comes on the scene singing a song. At the end of the song Hacıwād calls out *Hai Haḡḡ*, "O God", as the introductory religious formula of the play, recites the stage-ghazel, praises God and curses Satan and then proceeds to pay a tribute of homage to the Sultān. After a conventional introduction he begins to express in rhymed prose his longing for his companion Karagöz and to sing to him before the door of his house — where the scene is supposed to be laid — in languishing tones. Karagöz rushes out in anger and a fight ensues between the two at the end of which Hacıwād usually disappears to return after an interval. The prologue proper then begins, consisting of a dialogue (*muḥāwvere*) between Hacıwād and Karagöz, and this is followed after a stereotyped transition-formula by the piece proper, the dramatic part (*faṣl*). The piece again concludes with unvarying turns: Karagöz gives Hacıwād a box on the ear and the latter goes to tell the "master of the curtain" that Karagöz has torn the curtain down and destroyed it. Karagöz then asks for indulgence to the defects of the play and goes off after threatening to punch Hacıwād still harder the next time — here the piece is announced for the next evening.

The principal characters are always Hacıwād and Karagöz. The former is a cultivated elderly gentleman somewhat given to opium eating who is wellknown to all the characters who appear and often acts as their confidant. Karagöz is an uneducated, rough gipsy, the type of simple, natural vivacity contrasted with the decrepit representative of prudence and deliberation. Like his relatives in the European marionette theatre he is the real favourite with the public. He is bald and sometimes still appears with the phallus, both features which indicate a certain connection with the ancient mime. Both characters wear special caps, peculiar to the shadow-play.

The humour of the dialogue between Hacıwād and Karagöz depends for the most part on countless puns and plays on words which are always brought about by Karagöz misunderstanding the learned words of his friend and giving them humorous interpretations. The preludes are not limited to any particular piece (*faṣl*) but are chosen for presentation at will according to the length of the following play. The substance of the dialogue has almost always the same object, to attain humorous effects by the contrast between Hacıwād's learning and Karagöz's stupidity. Hacıwād, for example, gives Karagöz lessons in spelling, proposes games which he does not understand, goes with him as a singing Ramaḍān-night

watchman round the streets, when Karagöz sings all the songs out of tune and misunderstands them, or gives him sentences to be said rapidly, or plays games with him which necessarily end in a fight, etc.

The production of the dramatic part (*faṣl*) which follows the prelude shows certain peculiarities in scenic technique which are the natural result of the paraphernalia of the shadow-stage. The white surface of the canvas, only rarely relieved by a few figures in the wings, always represents the Kūshteri square in front of Karagöz's house, which latter is, as it were, represented by the frame of the canvas. As Karagöz has continually to accompany the action with comments from the window of his house, there are often several scenes of action in one, one quite remote, the real scene of action, and the square before Karagöz's house. The possibility of mixing up the characters into crowds with the conducting-rod is used to present remarkable scenes of recognition.

The players have a fixed stock of pieces, which is practically the same with all companies and, except for a few modern pieces, is considered to have "been handed down from olden times." The pieces are sometimes dramatic versions of popular books (*Ferhād and Shirin*, *Tāhir and Zühre*, *Meḡnūn* and *Lailā* etc.), in which case Hacıwād appears as trusted adviser and Karagöz as servant of the heroes concerned, or suchlike; sometimes they are pictures of everyday life in Stambul. In the latter we are given a series of Stambul types, among which one recognises pathological (the drowsy opium-eater, the pugnacious drunkard, the lame beggar, the dwarf, the crazy man) and racial types (the young Stambul Efendi, the Persian, the Armenian, the Jew, the rough woodcutter from Kaṣtamuni, the Kaışarlı, the Lase, etc.). The effect is very often attained by the formation of a series of incidents. A whole series of characters, differing as much as possible from one another, is brought successively into the same comical embarrassing situation, or they bring Karagöz, around whom the action then usually develops, into some such situation so that the tension increases with each successive character until it is finally relieved by a character superior to the situation.

Pieces of this kind are, for example: *Yalowa Şafaslı*, "The pleasure-excursion to Jalowa". A young Efendi, usually called Çelebi, wishes to take a trip with his sweetheart to the seaside resort of Yalowa and buys a bag and a jug in which to put provisions for the journey. While he is away to make the final preparations, Karagöz appears and teases the young woman, who has remained behind with the sack and jug, with stupid stories about a fatal accident that has overtaken her lover, that he has set the sea on fire with a match he had thrown away and has been burnt or that he has been swallowed by an eater of *lokma*, and so on. Then a series of typical characters appear all of whom wish to go to Yalowa with the young woman and are hidden one after the other by the obliging girl in the sack and jug, in which a new fight begins for the little room available with every new-comer. After 5 or 6 people have disappeared in the narrow jug, Çelebi returns and pulls out all the stowaways again. — Another piece of the same kind is *Kanaḡ Nigar* "Bloody Nigar". The young Efendi is stopped in the street by two

ladies of his acquaintance, each of whom assert they have a good right to him and try to pull him with her. As neither will abandon him, women-neighbours are called in to decide which is worthy of the pretty young man. But when the neighbours decide in their own favour, the two women (one is called "Bloody Nigar") drag the young man into their house, undress him, thresh him and throw him out on to the street to punish him for his infidelity. A series of characters then come up who see the young man sitting naked and volunteer in turn to fetch his clothes out of the women's house; first comes Karagöz, then Hacıwad, then the drunkard, then a negro and next a dwarf. In the attempt to get the young man's clothes, they all meet in turn with the same fate. They are likewise undressed and thrown naked upon the street so that naked figures keep accumulating round the door of the house. In the end the problem is solved by the robber captain Şarî Efe from Brussa, whom the women respect, and the naked forms receive their clothes again. — Another is *Mandıra*: — Karagöz finds himself malevolently abandoned by his wife and enters into relations with a lady who meets him on the street and takes her to his house. To his question whether she also has no lover she replies: "apart from him who comes afterwards, no one". Then various lovers of the woman come in turn, ask for Karagöz's new house-mate and send all kinds of love-verses to her through him which the latter delivers to her in quite a distorted fashion, and ask her to take a trip with them to Mandıra. But they are always driven away by Karagöz and to his repeated question whether there is still any one coming the woman only answers with the above phrase. This goes on for a considerable time until finally Karagöz is turned out of his own house by the drunkard and then collects the admirers he has driven away in order to recapture his own house. In the *mêlée* which follows all take to their heels. — In the "Singer's competition" (*Karagözün Şahîrliliyi*) Karagöz as a strolling singer (*aşyk*) disposes of a number of droll singers who have assembled for a competition. In the "writer-play" (*yazıldıl oyunu*) he appears as a public letter-writer who writes letters which are absolute nonsense for his clients. — In the "Boat-play" (*kayık oyunu*) he acts in his particular way as a ferry-man assisted by Hacıwad. In the "Swing-play" (*şallındjak oyunu*) he lets a swing to the most varied customers, lastly to a Jew who apparently dies on it and is buried by his co-religionists in the most ludicrous fashion and is then brought to life again. Another time we find Karagöz as a rich gentleman (*Karagözün Aghâligli*) and in this capacity he has to deal with a series of people who wish to get positions in his service and with a beggar.

The series of incidents is often made up of vain attempts by Karagöz to gain admittance to a house or a garden, for example in the "Garden-play" (*Bağçe Oyunu*), in the "Bath" (*Hamman*), the "Surprise" (*Başkır*), or of his unsuccessful attempts to ascertain something about his wife's doings by questioning the neighbours, who in turn misunderstand his questions and give the stupidest answers (*"The Well Çeşme"*).

Pieces in which we do not have this succession of incidents are, for example, "The Poplar" (*Kanlı Kawağ*), in which an amusing act is spun round a brief touching episode: the

singer Hasan's son is stolen by the spirit of the poplar but restored on the poetic appeal of his father. Karagöz is first of all bewitched by the spirit of the poplar, then released by Hacıwad and, when he wants to cut down the poplar as a punishment, he is seized by two Albanian foresters and punished with the bastinado, which is made the more severe in a comical way as the foresters continually go wrong in counting the blows and have to begin all over again. — In the "Circumcision" (*sünnet*) Karagöz is circumcised when a full grown man and the usual games are played which are used to distract a boy from the pain. A shadow-player appears, for example, so that we have here a play within a play, also an *orta oyunu*-player, two jugglers, etc. — A kind of competition in magic between two witches, in which the young Efendi and his sweetheart and then Karagöz and Hacıwad are turned into animals, is the "Witch-play" (*Djâzûlar*). — In the "Lunatic asylum" (*timârkhâne*) Karagöz is infected by some lunatics escaped from an institution and chained by Hacıwad in an asylum and treated by a Frank doctor. — In the "Wrong Bride" (*Sakhte Gelin*) Karagöz is brought as bride to the drunkard, in order to cure him of his craving. — Lastly the play the "Bar" (*Maikhâne*) shows the doings of a famous sot named Bekri in a bar. The pieces so far mentioned substantially form with several other less important and less well-known pieces (*Tahmîşdijiler*, "The broken ones", *Kırghınlar*, "The coffee-crushers", *Balıç Oyunu*, "The fish-play", *Djânâzlar*, "The rope-dancers", *Edjâkhâne*, "The chemist's shop") the usual repertoire of the shadow-players.

Very few of these plays have so far been published and translated and those usually in an abbreviated form. The texts printed in the east are almost all bad and defective. For further particulars see the *Bibliography*.

(H. RITTER)

KARAGÖZLÜ ("Black-eyed"), a Turkish people around Hamadān, to which they pay their tribute (Curzon, *Persia and the Persian Question*, London 1892, ii. 270 and 472). The Karagözlü are several times mentioned in the history of the domestic troubles in Persia in the second half of the xviiith century; cf. J. v. Hammer, *Geschichte des Osmanischen Reiches*², Pest 1836, iv. 475; *Ta'rikh-i Zandiya*, ed. Beer, Leiden 1888, p. 33, 42 and 93. In the first half of the xixth century the Karagözlü are said to have numbered some 12,000 souls (C. Ritter, *Erdkunde*, viii. 404 and ix. 78). Karagözlü is also the name of a small Turkish clan in Fārs, which belongs to the 'Inānlū group of the tribal confederacy İläti Khamsa (Tumanskiy, *Ot Kaspiyskago meria k Khormusskomu profiru i obratno*, St. Petersburg 1896, p. 78). A Tatar village in what was formerly the gouvernement of Yelisawetpol in the district of Djevanshir is also called Karagözlü.

(W. BARTHOLD)

KARA HIŞAR, "Black Castle", the name of several places in Asia Minor, which, although distinguished by epithets, are often confused with one another; lists of them, none of which is complete, are given in a later addition to Yakūt's *Mu'jam*, ed. Wüstenfeld, iv. 44, then by Ewliya, *Siyāhanāme*, Constantinople 1314—18, ii. 384 = *Narrative of Travels by Ewliya Efendi*, O.T.F., London 1850, ii. 205 (cf. J. v. Hammer, *Gesch. d. Osm. Reiches*, Pest 1827—35, iv. 619), in Ahmad Wafik's *Lehje-i 'Othmāni*, Constantinople 1293, p. 911, and in 'Alī Djawād, *Turikhi wa-Djoghrafiya Lughati*, Constantinople 1313, i. 599. They are alike in being situated on heights, sometimes difficult of access and fortified; the majority date probably from the middle ages only and were mainly built as places of refuge for the inhabitants of the surrounding country during inroads which were continually made in the wars of the Byzantines with the Arabs and Saldjūks and later in the wars between the small states that arose in Asia Minor; many were later abandoned under the peaceful rule of the Ottomans and disappeared from our maps.

The most important places of this name are:

1. Kara Hişar-i Şāhib (in Nashri, *Z.D.M.G.*, xiii. 193 = Leunclavius, *Hist. Musulm.*, Frankfurt 1591, col. 140, Şāhibiā Kara Hişari; Saibcarascar in Caterino Zeno, *Commentarii del Viaggio in Per-*

sia, Venice 1558, fol. 14^b), also called Añūn Kara Hişari ("the opium K. H."). The former name is derived from a notable man of the last period of the Saldjūks of Konya, Şāhib Aṭā Fakhr al-Dīn 'Alī Beg (d. 687 = 1288/9), who had retired there with his treasures before the Karamānians and Mongols and whose successors ruled the town and district under the protection of the Germiyan-Oghlu of Kütābha (Hoatsma, *Recueil de textes rel. à l'hist. des Seldjucides*, iv. 308, 323, 327, 334, where K. Dewele means this K.; Ibn Faḍl Allāh, *Masālik al-Aḥqār*, transl. by Quatremère in the *N.H.*, xiii. 359, 357; Aḥmad Tawḥid in the *Revue Historique publiée par l'Institut d'Histoire Ottomane*, first series, p. 563 sq.). The popular name Añūn Kara Hişar later became generally used in place of K. H. Şāhib, which is still the official name. Añūn K. takes its name from the extensive cultivation of opium in the neighbourhood which is mentioned as early as Belon, *Les observations de plusieurs singularités et choses mémorables*, Paris 1555, fol. 183^r; cf. Blan in the *Z.D.M.G.*, xxiii. 250.

Kara Hişar-i Şāhib is now identified with the Byzantine fortress Akroinós, Akroinoi, in the vicinity of which the legendary Saiyid Baḡḡāl in 739 perished with his followers on a campaign against the Byzantines (Theophanes, *Chronogr.*, ed. de Boor, i. 390, 411) and where the Comnenas Alexius I negotiated with the Saldjūk Sultān in 796 (Anna Comnena, *Alexius*, ed. Reifferscheid, ii. 285); in the course of the xiiith century it must have been taken from the Byzantines by the Germiyan-Oghlu. Khidr Pasha (d. 750 = 1349), son of Sulaimānshāh of Germiyan, and other members of this dynasty are mentioned as presidents (*Calabi*) of the Mewlewī settlements in K. (cf. Ghālib Dede, *Tadhkirat-i Sūfī 'arū-i Mewlewīye*, MS., No. 1257 of the Vienna Nat. Libr., fol. 54^r and 90^r = 'Alī Enwer, *Sims'khāne-i Eski*, Stambul 1309, p. 48 sq. and 102). During the invasion of Asia Minor by Timūr after the battle of Angora (1401) K. also was visited by the victor's raiding parties (Sharaf al-Dīn 'Alī Yazdī, *Zafarnāme*, Bibl. Ind., Calcutta 1887—88, ii. 446, 457, 484, 492 = *Histoire de Timur-Bec* etc., Fr. transl. by Pétis de la Croix, Del(l) 1723, iv. 21, 31, 69, 68; Dukas, *Hist.*, ed. Bonna, p. 77). In 832 (1428/9) the kingdom of the Germiyan-Oghlu passed to the Ottomans and K. with its lands became incorporated in a sandjak of the eyālet of Anadolu (cf. *Dihānnūma*, p. 641). As a stronghold near the Karamānian frontier it remained of military importance so long as Karamān was still independent; at the beginning of the war with Uzun Hasan in 877 (1472/3) prince Mustafā fell back on its defences and made raids from it upon the Karamān-Oghlu who were allied to the Persians ('Ashk Pasha Zāde, *Turikhi*, Istanbul 1332, p. 177; Sa'd al-Dīn, *Tadh al-Tawārikh*, i. 524; Caterino Zeno, *op. cit.*) and in 895 (1489/90) K. formed the base of the operations of the Hersek-Oghlu Aḥmad Pasha against the Egyptians who had invaded Karamānia (Sa'd al-Dīn, *op. cit.*, ii. 65). But K. became still more important as a junction of the caravan routes leading from Smyrna to trading centres of the interior, like Angora, Kaşariya, Tokat, etc. In recent years the Smyrna-Cassaba railway there joins the Anatolian railway system which starts in Stambul. On the dissolution of the old eyālet of Anadolu the sandjak of K. was attached to the

province of Brussa; the town of K. is the residence of the *mutesarrif*; its population was estimated at 25,000 in 5,000 houses (20,000 Muslims, 5,000 Armenians, some 300 Greeks), but later figures are not available.

Of the few relics of classical antiquity the majority must have been brought here from ruined sites in the neighbourhood, like Seidler (Prymnessus), İsdje Karahışar (Docimaeon) and Çifut Kaşabasi (Synnada); the monuments of the time of the Germiyan-Oghlū, e.g. the Ulu Djāmi' of Khodja Beg and the tomb of Sültan Diwānī, and the older buildings of the Ottomans have not yet been thoroughly investigated.

The feature of the town, the steep cone of trachyte which rises 650 feet above the level of the town which lies around it, with the late Byzantine defences renovated by the Germiyan-Oghlu, still bore in Niebuhr's time the name *İlek Baran Kal'esi*, ("the fortress which affords shelter to the Beg"); this citadel was probably never really a permanent settlement and is now left to fall to pieces, although it has been from time to time used for the internment of political prisoners ('Ashik Pasha Zāde, *Tārikh*, p. 243—4), the last occasion being in 1802 when French prisoners of war from Egypt were kept there. The "Arabic" foundation inscription at the entrance, which Niebuhr and Oberhummer saw, has not yet been copied.

Some 15 miles or 5 hours north of Kara Hişar-ı Şāhib lies:

2. İsdje Karahışar — the correct name, not Eski K., as in Hamilton, *op. cit.*, i. 461, 467, de Laborde, *op. cit.*, p. 68 sq., Texier, *Description de l'Asie Mineure*, i. 145—152, and following them C. Ritter, *Kleinasien*, i. 605, 642 sq., nor Itchki or İstya (Ramsay, *Mitt. Dtsch. Arch. Inst. in Athen*, vii. 132 sqq., x. 348), nor again İschtschi (Körte, *op. cit.*, i. 88 sqq.) or Ishite K. (v. Diest, map in *Petermann's Mitteilungen*, Erg.-Heft No. 125 —, a village of 251 houses near the quarries of the ancient Docimaeon, from which the marble of Synnada came; the quarries have again been worked in modern times by European enterprise (*Sālnāme Brūsa*, 1325 A.H., p. 125).

3. Kara Hişar-ı Sharķī, also called Şābin (or Shebin, Shēb) Kara Hişar, or Karahışar-ı Şābhkhāne, from the alum-mines in the neighbourhood which were worked in ancient times and still more in the middle ages and produced a particularly esteemed kind of this mineral.

As was first pointed out by Blau in 1865 on the authority of a Byzantine inscription the town is the ancient and mediaeval Colonia and bore this name down into modern times. After the reforms of Justinian it belonged to Armenia Prima; in the *Notitiae Episcopatum* it appears as the see of the bishop of Armenia Secunda. In 162 (778) the town was captured by Yazīd b. Usaid al-Sulamī in a raid on the Pontus (Ghé-vond, *Hist. des Guerres des Arabes en Arménie*, p. 106, quoted by Blau; cf. al-Tabarī, ed. de Goeje, iii. 493; cf. Ibn Khordādhbeh, *B. G. A.*, vi. 108). On the other hand the Kalūniya which, according to Eutychius, ed. Selden and Pococke, p. 383, was taken by the Sāsānid Shāpūr with Cappadocia and the Kalūniya, which the Hāmdānid Saif al-Dawla captured in 335 (946/7) (*Z.D.M.G.*, x. 467; Yāqūt, *Mu'djam*, ix. 168) are almost undoubtedly identical with Colonia Cappadociae, which, according to Niketas (p. 72 and 689), is the later Ak-sarai. This strong fortress must have been lost to the Byzantines after the battle of Manzikert. The Dānishmand-Oghlu first established themselves there (Anna Comnena, *Alexias*, ed. Reifferscheid, ii. 164); later we find the Saltūkids of Erzerūm in possession (Niketas Chon., *Ann.*, ed. Bonn, p. 185, 294) who were dispossessed in 598 (1201/2) by the Saldjūks of Konya; they in turn were succeeded by the Mangūdids, vassals of Konya. After the fall of the Sūltānate of Konya, the descendants of Eretnā ruled there and various princes of the house of the Ak-Koyunlu and Kara-Koyunlu (cf. Sa'd al-Din, i. 287 = 'Ali, *Kunh al-Akhbār*, v. 178 = Leunclavius, *Hist. Musulm.*, col. 474, 14 sqq.); in 1473 after the battle of Terdjān the town was taken by Mehemmed the Conqueror and incorporated in the Ottoman empire ('Ashik Pasha Zāde, *Tārikh*, p. 378 and 181, who describes the town as the Kara Hişar of Kamākh, and Sa'd al-Din, i. 541 and 542; Leunclavius, *Hist. Mus.*, col. 589, 42 sqq.). Kara Hişar-ı Sharķī formed a sandjak of the eyalet Erzerūm (Ewliyā, *Travels*, ii. 205; Hādjdjī Khalifa, *Djihan-nūmā*, p. 422, 424); this district now belongs to the wilāyet of Siwās and the seat of government is in the town of the same name.

The old name Colonia was taken over by the Saldjūks in the Armenian form Kughūniya, which we find in Ibn Bibi's chronicle (Houtsma, *Recueil*, iii. 291—295, iv. 151, 152, 319) and on the coins of Eretnā (Ahmad Tawhīd, *Meshkāt-i Kadime-i Islāmīye*, iv. 439). If, as seems almost certain, the Mavro-Kastran mentioned by Michael Astaliota, ed. Bonn, p. 125, and Skylitzes, p. 679, "on a high hill difficult of access in Armenia", is identical with Colonia, Kara-Hişar seems to have already been in use alongside of Colonia; among the Greeks of the xviiith century we again find the form Garasaris, corrupted out of Kara Hişar, in use as well as Colonia.

The imaginative description of the town in Ewliyā Çelebi and scanty references in the *Djihan-nūmā*, both of the second half of the xviiith century, are corrected and supplemented by the descriptions of modern travellers. The town, built on

the slopes of a hill below the ancient fortifications possessed—according to Cuinet, with whom travellers agree—12–13,000 inhabitants (7500 Muslims, 3000 Armenians and over 1500 Greeks) and was the residence of the *mutesarrif* and of an Armenian Bishop and of the Greek Metropolis of Nicopolis; there is no more modern information available. The citadel surrounded by a ring of walls, in which old well-shafts suggest a pre-Hellenic settlement, is no longer inhabited; within this fortress on the summit of the hill lies a small fortified redoubt with an octagonal watch-tower. The defences date from the Byzantines and were further developed by the Muslim rulers.

Schiltberger (*Reisebuch*, ed. Langmantel, p. 57) calls Karassere "ein fruchtpars lant an weinwachs" (a land rich in vine-yards); more famous than the vine-yards which still exist were the rich alum-mines in the adjoining village of *Shābkhāne*, in which were obtained the valued "alume de rocca di Colonna" (i. e. Colonia) (Pegolotti in Heyd, *Histoire du Commerce du Levant*, ii. 565); these are the *aluminis minera iuxta Sebastiam quae valet unam argentariam* of Vincentius Bellocensis, xxxi. col. 143; they were also mentioned by Rubruquis (ed. Bergeron, p. 147). Mehmed the Conqueror took possession of them for the state treasury (Sa'd al-Din, i. 542) and from the rent they yielded when farmed out the garrison of the fortress was later paid (*Djihānnumū*, p. 424).

Bibliography: Ewliyā, *Siyāhatnāme*, ii. 384 sqq. = *Travels*, ii. 204 sqq.; C. Ritter, *Kleinasien*, i. 208 sqq.; H. Barth, *Reise von Trapezunt nach Scutari*, Supplement to *Petermann's Geogr. Mitteilungen*, Gotha 1860, p. 14 sqq. (with plan of the town), thereon A. D. Mordtmann's additions in *Ausland*, 1863, p. 406 sq., 414 sq.; O. Blau in *Petermann's Geogr. Mitteilungen*, 1865 p. 252; Taylor in the *Journal of the R. Geogr. Soc.*, 1868, xvii. 293 sqq.; P. Triantaphyllides, *Ἡ ἐν Πόντῳ Ἑλληνικὴ Φυλὴ*, Athens 1866, p. 113 sqq.; X. A. Sideropoulos in the Arch. Suppl. to vol. xviii. of the publications of the Greek Syllogos at Constantinople; F. and E. Cumont, *Studia Pontica* ii.; *Voyage d'Exploration archéologique dans le Pont*, p. 296 sqq. (with pictures).

4. Kara Hişār-i Behrāmshāh (Bairāmshāh) is first mentioned by Hamdullāh Mustawfī, *Nushat al-Kutub*, p. 97; Sidi Re'is (xvth century) visited the place on his journey from Siwās to Bozak and Kırşehir (*Mir'at al-Mamālik*, Stambul 1312, p. 96). In K'ātib Çelebi's time (xvth century) it was a *kaẓā* of the eyālet Siwās (*Djihānnumū*, p. 622); it is now the residence of the *Mudir* of the nāhiye of the same name of the *kaẓā* of Ma'den in the sandjak Yozghad in the wilāyet of Angora, of day's journey east of Yozghad. The place is not marked on our maps.

5. Kara Hişār-i Demirdji, a village in the *kaẓā* Çorum of the wilāyet of Angora, a few hours north of the famous ruined site of Üyük, given in the *Djihānnumū*, p. 625, among the *kaẓā*'s of the sandjak of Çorum. W. Hamilton in 1838 was the first European to visit and describe it (*Researches* etc., i. 379, 381, 403; following him Ritter, *Kleinasien*, i. 147, 149 sqq.); next came in 1859 H. Barth (*Reise von Trapezunt nach Scutari*, p. 42) and A. D. Mordtmann (in *Ausland*, 1863, p. 785; *Sitzungsber. Bayr. Ak.*, 1861, p. 191 sq.). The ruined

site of Kaṭā Sarāy which belongs to it is mentioned under this name in the *Djihānnumū* also. On our maps this Kara Hişār appears without an epithet; it may be identical with the Kara Hişār which the older Ottoman chroniclers mention in connection with the fightings of prince Muḥammad with the Yürük chief Gözleroghlu about 805 A. H. (Leunclavius, *Hist. Musulm.*, col. 386; Sa'd al-Din, i. 200).

6. Kara Hişār-i Teke (*Djihānnumū*, p. 638; Aḥmad Wafik, 'Alī Djawād, *loc. cit.*) also called Kara Hişār-i Adalia (Ewliyā, *Travels* etc., ii. 705), is mentioned by Yāqūt, *Mu'djam*, iv. 44 as a village a day's journey from Antākiya (or rather Antāliya). In the time of Ibn Faḍl Allāh a certain Zakariyā, a former Mamlūk of the lord of Adalia, had made himself independent there and ruled a small territory which included 3 towns and 12 strongholds (*N. E.*, xiii. 372 sq.). The place is still mentioned in the surveys of Mehmed the Conqueror (*Revue Historique publ. par l'Institut d'histoire Turque*, part ii. 76) and as a *kaẓā* of the sandjak of Adalia in the *Djihānnumū*, *loc. cit.* According to Aḥmad Wafik, K. is the capital of a nāhiye of the *kaẓā* of Sirik in Adalia, in the wilāyet of Konya; the *Sālnāme* of this wilāyet, however, only knows the place-name Sirik, nor is the older name found on our maps. Sirik, a miserable village on a tributary of the Köprü Şu (Eurymedon), is the ancient Selge (Ritter, *Kleinasien*, ii. 515 sqq., 653; G. Hirschfeld, *Reise im südwestlichen Kleinasien* in the *S. B. Pr. Ak. W.*, 1875, p. 134). The similarity of names is accidental because Sirik is originally the name of a Yürük clan.

Besides these towns of the name Kara Hişār and Dewele K. dealt with separately (see above, i. 952) the following are also given:

Kara Hişār in the land of Osman (Yāqūt, *op. cit.*); this may refer to Karadja Hişār, also called Karadja Shehir near İnözü in the ancestral lands of the Ottoman Sultans for which even in the older historians Kara Hişār is often written.

Kara Hişār in the land of Ibn Torghut (Ibn Faḍl Allāh, *op. cit.*, p. 350); no other reference is known, unless it is an older name for Torghudlu Kaşabasi near Mānisa.

Kara Hişār, capital of the *kaẓā* of Na'llukhān, wilāyet of Angora (Aḥmad Wafik, *op. cit.*), not given in the *Sālnāme* nor marked on the maps.

Hamām Kara Hişār-i, village of the nāhiye of Günyünzi, *kaẓā* of Siwri Hişār, wilāyet of Angora (*Sālnāme*); also on the maps.

Wān Kara Hişār-i (Ewliyā, *op. cit.*); no other reference known. (J. H. MORDTMANN)

KARAK. [See KERAK.]

KARAKALPAK ("black caps"), a Turkish people in Central Asia. In the Russian annals a people of this name (Černii Klobutzi) is mentioned as early as the twelfth century; whether these "black caps" are identical with the modern Karakalpak cannot be definitely ascertained. It is not till the end of the xvth century that we find records of the Karakalpak in Central Asia. According to the embassy report of Skibin and Troshin (1694), they then lived on the Sir Daryā, 10 days' journey below the town of Turkestan. There they are again mentioned in the xviii century as neighbours of the land of the Khāns of Khiva; about 1722 a treaty was concluded by the ambassador Vershinin between Peter the Great and the Khān of the Kara kalpak, Abu 'l-Muẓaffar Sa'ādat 'Ināyat Muḥammad

Bahādur (*Polnoye Sobraniye Zakonov*, 1722, No. 4101). The eastern part of the lands of the Volga Kalmūcks between the Ural mountains and the Volga used to be raided by the Қарақалпақ. Even then the Қарақалпақ lived not only by their herds and by their raids but also by agriculture — with artificial irrigation of their fields — and by fishing (on Lake Aral). They are said to have migrated to Central Asia from the Volga region. About the middle of the xviiith century the winter quarters of a body of the Қарақалпақ were on the central course of the Sir at Khawās (north of Ura-Tūbe); the prince (*tura*) of these Қарақалпақ entered into an alliance in 1755 with the *Atalik* of Bukhārā, Muḥammad Raḥīm; 3,000 families of the Қарақалпақ were settled at Samarḳand and received from there 400 ass-loads (*kharwār*) of corn; the son of the *tura* joined the army of the *Atalik* (Muh. Waḥā Karīmnaḡi, MS of the Asiatic Museum, c. 581 b, f. 148^b). Radloff (*Aus Siberien*, Leipzig 1893, i. 228) visited in 1868 north-east of Samarḳand some settlements of the Қарақалпақ, who had immigrated "from the Amū-Daryā not long ago". A considerable number (about 20,000) still live in Farḡhāna at the present day. The Қарақалпақ are said to have been driven out of the lower valley of the Sir Daryā by the Qazaḡ towards the end of the xviiith century; they are still mentioned in the xixth century a little farther south on the (now dried up) Yeni Daryā à propos of the campaigns of Muḥammad Raḥīm, Khān of Kḥiwa, against the land of Kungrat (1807—1811). The Қарақалпақ were then subject to the Khān of Kungrat and lived, in part, on the lower course of the Amū Daryā, especially on the arm of the river known as the "Qazaḡ"; there they succeeded in holding their own even at a later date against the Qazaḡ. After the union of Kungrat with Kḥiwa (1811) the Қарақалпақ also had to submit to the Khān of Kḥiwa, but made frequent attempts to throw off this yoke; in 1827 the town of Kungrat was even captured by them for a time; after the suppression of this rising a part of the Қарақалпақ migrated to Farḡhāna (*History of Kḥiwa*, MS. of the Asiatic Museum, 590 ob, f. 300^b—305^b). In 1855 the leader of the rebel Қарақалпақ, Ir-Nazar-bi, adopted the title of Khān (*ibid.*, f. 516a); the fortress built by him near where the Qazaḡ flows into Lake Aral, the ruins of which still bear his name, did not fall till the following year, and then through treachery, into the hands of the Kḥiwans. After the Russian conquest of Kḥiwa in 1873, when the Khān had to cede to Russia all his possessions east of the main arm of the Amū and the most north-western arm of its delta (Tallīk or Taldīk), the land of the Қарақалпақ also became Russian. The area, then separated from Kḥiwa, was first administered as a separate circle (*otdyel*), later as part of the gouvernement of Sir Daryā; after the revolution it was constituted a separate territory (*oblast'*). The Қарақалпақ form about half the population there, according to the latest census over 110,000 souls. In addition there are about 20,000 Қарақалпақ in Kḥiwa and as many in Farḡhāna.

The dialect of the Қарақалпақ was first investigated in 1903 by S. Byelyayew; some of the texts then written down were later published (1917) in the *Protokol'i Zakaspiyskago Kruḡka lyubiteley Arkheologii* etc., parts 3 and 4. Information on the Қарақалпақ is given in all books on Turkestan

and its population; e.g. Fr. v. Schwartz, *Turkestan*, p. 17; Kostenko, *Turkestanskiy Kray*, St. Petersburg 1880, i. 329 sq.; Masal'skiy, *Turkestanskiy Kray*, St. Petersburg 1913, p. 390 sq.; *Aziatskaya Rossiya*, St. Petersburg 1914, an official publication, i. 163 sq.; Vambéry, *Das Türkenvolk in seinen ethnologischen und ethnographischen Beziehungen*, Leipzig 1885, p. 373 sq. No special monograph has so far been devoted to the study of the Қарақалпақ people.

(W. BARTHOLD)

ҚАРА КХАЛІЛ. [See ÇENDERELİ.]

ҚАРА КХИТАЙ (or ҚАРА КХИТАЙ), the usual name since the viii (xith) century in Muḥammadan sources for the Kitai people, mentioned by the Chinese from the eighth century A. D. onwards, who were probably Tunguz (according to another view Mongol). In the Turkish Orkhon inscriptions the Kitai are several times mentioned as enemies of the Turks in the extreme east of the area visited by the Turks in their campaigns; according to Chinese sources, they lived in the southern part of Manchuria. From the beginning of the tenth century the Kitai carried on a campaign of conquest, conquered the northern part of China and founded a dynasty which as a Chinese ruling house was called Liao (916). Even the founder of the dynasty, Apaoki, was able to subdue Northern Mongolia, which had been conquered by the Kirghiz about 840; Apaoki himself visited Qarakorum in 924 and is said to have received an Arab, i. e. Muḥammadan, embassy there (Bretschneider, *Mediaeval Researches from Eastern Asiatic Sources*, London 1910, i. 265), the first record of the appearance of Muslims in this region; it was probably only a trading caravan (Mongolia, of course, lay outside the usual range of Arabic geographical literature, for which the Kirghiz were the extreme north-eastern people). The house of Liao succeeded in holding its ground against the national Sung dynasty which had arisen in South China since 960; not till about 1125 were the Kitai driven from China and Eastern Asia by another Tunguz people, the Djurdjen.

Even before settling in China the Kitai had adopted Chinese civilization to a greater extent than other nomadic peoples; in contrast to the cult of the rising sun predominant among the other nomads of the East, they had borrowed from the Chinese the cult of the South; with this fact is no doubt connected the spread of this cult among the Mongols, and throughout the Mongol Empire in Central Asia generally (see W. Barthold's essay in the *Zapiski vost. otd. arkḥ., obshch.*, xxxv. 55 sq.). As the Djurdjen did later, the Kitai formed a system of writing of their own based on the Chinese hieroglyphic system (about 920 A. D. with some 1000 characters). A statement in the official "History of the Liao" (*Liao-shi*) where, according to de Groot's translation, there is mentioned an alphabet prepared for the Kitai ("small characters, few in number and all arranged in rows") by the foreign wise man, Tiet-ts'ik (according to F. W. K. Müller, perhaps *tarsā* = Christian), is explained by Marquart to mean that about this time (the statement refers to the reign of Apaoki) the sounds of the language were reproduced in an alphabet of western origin (perhaps modelled on the Uighur) (*Sitzungsber. d. Preuss. Akad.*, 1912, p. 500 sq.); documents or inscriptions in this alphabet have so far not been found. On the other hand we have specimens of Kitai writing in the alphabet

modelled on the Chinese. Quite recently P. Pelliot (*Journ. Asiat.*, Ser. II, iv. 174) mentions a Chinese "maigre vocabulaire" of the language of the Kitai.

As early as the first quarter of the eleventh century (according to some 403 = 1012/3, according to others 408 = 1017/8) an attack was made by the Khitai or Kitai (not yet called Kara Khitai) against Muslim lands; they are said to have advanced within 8 days' journey of Balasaghun [q. v.] and were only driven back from there by the İlek Khans [q. v.]. In what connection this campaign stands with events in Eastern Asia is not known; Marquart's attempt (*Osttürkische Dialektstudien*, Berlin 1914, *Abh. der Kön. Ges. der Wiss. in Göttingen, phil.-hist. Klasse*, New Series, vol. xiii., No. 1, p. 194 sq.) to find with the help of de Groot some reference in the *Liao-shi* which might be connected with this campaign has not been successful. On the campaign itself see Ibn al-Athir, ed. Tornberg, ix. 209 sq.; Marquart, *Osttürk. Dialektst.*, p. 54; Barthold, *Turkestan* etc., ii. 294.

More important for the Muslim world was the western movement of the Kitai after the destruction of their empire in China by the Djurdjen (in Muslim sources later called Čurčit) about 1125. It was not the migration of a whole people; a part of the Kitai remained in China under the rule of the Djurdjen and at a later date, in the time of Čingiz Khān [q. v.], took the opportunity to rebel against the dynasty and to restore the kingdom of the Kitai as a Mongol vassal state. Kitai is, of course, still the usual name for China among Mongols and Russians; in Muhammadan sources the Kitai who remained in China as well as those who migrated westwards are called Kara Khitai. The Chinese historians continue to regard the Kitai dynasty expelled from China as a Chinese imperial dynasty under the name "Western Liao", with posthumous titles, reign periods, etc. — probably the only example of the members of a dynasty of foreign origin being regarded as Chinese emperors even after their expulsion from China. But the statements of the Chinese annals regarding the Western Liao are very inaccurate as regards chronology and in other respects also very meagre. The Chinese can only report one march of the Kitai through the modern Chinese Turkestan; from Muhammadan sources we know that it was not this migration that led to the formation of a Kitai kingdom in the West; on the contrary, these Kitai were completely defeated by Arslan Khān Ahmad b. Hasan, prince of Kāshghar, a few days' journey beyond this town. Ibn al-Athir (cf. the account in his *Chronicle*, xi. 55) places this battle in the year 522 (1128); perhaps it took place a few years later, as it is mentioned as a very recent event in the letter sent in name of Sulṭān Sandjar to the Caliph's vizier in Ramaḍān, 527 (July 6—Aug. 4, 1133) (Barthold, *Turkestan* etc., i. 35 and 37). Presumably another branch of the migration of the Kitai by a more northern route met with more success; we get the fullest account of it from Djuwaini (*Ta'rikh-i Djahān-Kushāi*, ed. Mirza Muḥ. Kazwini, ii. 86 sq.; translation in d'Ohsson, *Hist. des Mongols*, i. 441 sq. and following him in Bretschneider, *Mediaeval Researches* etc., i. 225 sq.). According to this account, the Kara Khitai advanced through the land of the Kirghiz (on the Yenisei), then south-westwards to the region of the modern Cugačak, where they built the town

of İmil. From there as a base they occupied without opposition the town of Balasaghun [q. v.], whither the Muslim ruler of this region of the İlek Khān dynasty had summoned them against his enemies; it was only from here, i. e. from the North, that they conquered Kāshghar and Khotan and later Mā-warā'-al-Nahr and Khwārizm; the king of this land, Atsız (1128—1156), had to bind himself to pay a yearly tribute of 30,000 dinārs. On the fighting in Mā-warā'-al-Nahr and Khwārizm we are particularly well informed by Ibn al-Athir as well as by a few earlier sources like 'Imād al-Dīn (Houtsma, *Recueil de textes rel. à l'hist. des Seljoukides*, vol. ii.) and Rāwandī (*Rāhat al-Šudūr*, ed. Muḥ. İkbāl, esp. p. 172 sq.); the material is utilised in Barthold's *Turkestan* etc. and in Marquart's *Osttürkische Dialektstudien*. In Ramaḍān, 531 (May-June, 1137) the Khān of Samarkand, Maḥmūd, was defeated at Khodjand and on Šafar 5, 536 (Sept. 9, 1141) his powerful overlord, Sulṭān Sandjar, in the desert of Kaṭwān north of Samarkand. After this the kingdom of the Kara Khitai stretched from the land of the Kirghiz (on the Yenisei) in the north for a time as far as Balkh in the south, from Khwārizm in the west to the land of the Uighurs (see BISHBALIK) in the east, with its ruler's residence on the Cū [q. v.] at Balasaghun. The ruler bore the title *Gurkhān*, which is explained by Djuwaini (ii. 86 below) as "Khān of Khāns" (*Khān-i Khānān*); the word *Gur* is perhaps reproduced by the Chinese Ye-lu (family name of the Liao emperors). Unlike the other nomad empires no fiefs were granted either to the relatives of the *Gurkhān* or to other persons of high rank; the first *Gurkhān* is said to have allowed no one command of more than 100 men. On the other hand almost everywhere (Balasaghun perhaps formed the only exception) the native dynasties continued to exist as vassals of the *Gurkhān*; these vassal states probably formed the greater part of the empire. The level of taxation was, as in China, fixed by the number of houses; a dinār was levied on every house. The language of the government seems to have been Chinese. The son-in-law of the *Gurkhān* is called *fūmā* (Chinese "son-in-law") in Djuwaini (thus Defrémery in his note on Mirkhond, *Hist. des Sultans du Kharezm*, Paris 1882, p. 124; in the edition by Muḥ. Kazwini, ii. 17, 18 and 20, *farmā*); in the account of the Khitai in 'Awfi (*Lubāb al-Albāb*, ed. Browne, ii. 385) we appear to find the well-known Chinese word *paiza* (so to be read for *bā nayza*), later also adopted by the Mongols. Even under the rule of the pagan Kara Khitai the Muslims appear, however, to have retained their leading positions; the wealthy merchant prince, Maḥmūd Bāi, is mentioned by Djuwaini (ii. 89) as vizier of the last *Gurkhān*. In Kāshghar about this time we find a Christian bishop (Assemani, *Bibl. Orient.*, III, part ii. 502); to the same period also belong the oldest Christian inscriptions on the Čū (*Zapiski vost. otd. arkh. obšč.*, viii. 26; W. Barthold, *Zur Geschichte des Christentums* etc., Tübingen 1901, p. 58); but Islām also seems to have made progress during this period. In the story of the conquests of the Kara Khitai, the country of the princes of Balasaghun appears as the frontier land of the Muslim world; in the beginning of the xiiith century two Muhammadan principalities are mentioned north of the Ili [q. v.] (one in the northern part of the

modern Semiryeçye and one at Kuldja). After the destruction of the kingdom of the Qarā Khitai and of that of the Naiman prince Küclük, which succeeded it although over a much smaller area, the last Qarā Khitai, as is apparent from the account of the journey of the Chinese envoy Wu-ku-sun (1220—1221), had to adopt Muslim customs and Muslim garments (Bretschneider, *Mediaeval Researches* etc., i. 29). All this says little in favour of Marquart's (*Osttürkische Dialektstudien*, p. 209) idea of the civilization of the Qarā Khitai, which, according to him, stood "brilliantly out from its miserable surroundings".

The first *Gürkhan* died, according to Ibn al-Athir, xi. 57, in Radjab, 537 (Jan. 20—Febr. 18, 1142); he was followed by his widow "and his son Muḥammad". Marquart wants to read *ibnatu 'ammih* for *ibnuhu Muḥammad* (*Osttürk. Dialektst.*, p. 237); but it is nowhere stated that the wife of the *Gürkhan* was also his cousin; moreover, according to Chinese sources, she was only regent for her son who was still a minor. The latter, of course, cannot have been called Muḥammad; but how the text is to be emended must remain unsettled (the reading *wa-ibnuhu Muḥammad* is also found in the Bülāḡ edition, xi. 36). In the Muḥammadan sources we find no complete list of the *Gürkhan*s with particulars of their dates; the only references to these are scanty and contradictory. Djuwaini in his chapter on the Qarā Khitai (ii. 88 sq.) only mentions the widow and the brother of the first *Gürkhan*; in another passage (ii. 17) he also mentions, as do the Chinese annals, the rule of the daughter of the first *Gürkhan*; the same queen is mentioned by Rāwandī (*Rāhat al-Sudūr*, p. 174), but he makes her reign down to his time, i. e. to the beginning of the thirteenth century, which cannot be correct. A more accurate list of the *Gürkhan*s is given by the Chinese annals, but their tradition also is obviously inaccurate, especially in its chronological data. Marquart's endeavour (*loc. cit.*) to bring the Muḥammadan and Chinese sources into agreement and thus to date the reigns of the different rulers seems in general to be successful. According to him, the widow of the *Gürkhan* reigned till 1150, his son till 1163, his daughter till 1178 and his grandson till 1211. The latter is mentioned in the Chinese annals and, according to the usual pronunciation of the characters concerned, was called Či-lu-ku; Marquart (following De Groot) reads Tirgu.

Under this ruler took place the fall of the Khitai kingdom, brought about partly by the activities of the Muslim rulers in the west and partly by the Mongol inundation, then just breaking; cf. the accounts thereon in Barthold and Marquart and also the articles BURHĀN, BUKHĀRĀ, ČINGİZ KHĀN and MUḤAMMAD B. TAKĀSH. As happened elsewhere also, it was here not always the conflict of religions that was the deciding factor. The Khwārizmshāh Muḥammad, afterwards leader of the Muḥammadan movement, relied in the early years of his reign for assistance against his Muslim enemies on the pagan Qarā Khitai, as well as the spiritual rulers (*sudūr*) of Bukhārā. The rising of ʿOṭmān, prince of Samarḳand, against the Qarā Khitai is explained by Djuwaini (ii. 91) as due to the refusal of the *Gürkhan* to give his daughter in marriage to this prince. Later, under the influence of the estrangement between ʿOṭmān

and his Muḥammadan liberator and father-in-law Muḥammad, this matrimonial alliance nevertheless took place (*ibid.*, ii. 124); the rising of the Muḥammadan population of Mā-warā'-al-Nahr against their liberator had to be put down with ruthless vigour and bloodshed (609=1212). In contradiction to the view of these happenings given by Djuwaini, the *Gürkhan* was in reality deprived of his power a year earlier, in 1211, by Küclük, prince of the Naiman. The attitude of this originally Christian, later pagan (probably Buddhist) ruler to the Muslim population did not always remain uniform; he appears as an ally of the Muslim enemies of the *Gürkhan* and as an ally of the prince of Kāshghar (cf. the text of Djamāl al-Qurashī in Barthold's *Turkestan* etc., i. 133). He afterwards became a most bitter enemy of Islām. In his reign took place the first and only persecution of Islām in Central Asia; public Muslim worship was suppressed, the Muslims forced either to adopt Christianity or the religion of the pagans or at least to adopt the clothing of the Qarā Khitai. Those who resisted were, like the Protestants under Louis XIV, punished by having soldiers billeted on them. The only source on this point is Djuwaini (i. 49 sq.). By Čingiz Khān's victory over Küclük the religious persecution was ended; the former Muslim subjects of the Qarā Khitai, who had as early as 1211 been in negotiation with Čingiz Khān, received complete freedom of religion under Mongol rule. The Muslim dress was now adopted (cf. above) by the remaining Qarā Khitai, which was the very reverse of Küclük's law. Neither inscriptions nor buildings nor any other trace whatever of the rule of the Qarā Khitai have survived in Central Asia.

On the rule of a former "Amir" of the *Gürkhan* and his descendants in Kirmān see BURĀḠ, HĀDJIB and KIRMĀN. (W. BARTHOLD)

QARA KIRGIZ. [See KIRGIZ].

KARAKOL, KARAGHUL. [See QARAUL].

QARAQORUM (QARAKORAM), a chain of mountains in the centre of Asia lying north of and almost parallel to the Himalayas. The range extends westwards as far as 73° of Long.; it has not yet been definitely ascertained how far it runs eastwards. At one time the eastern limit was thought to be the pass of the Qaraqorum, but, according to the views of several famous geographers, the range runs much farther into Tibet and the Tang-la should, they think, be regarded as a part of the Qaraqorum. This idea was first put forward by Klaproth in 1836 and is now held by Burrard, Sven Hedin and others who further regard the Trans-Himalaya as belonging to the Qaraqorum system. If this is accurate, the whole system would be about 1250 miles long.

The highest elevations are found in the part west of the pass of Qaraqorum. There we find several peaks over 26,500 feet high and countless summits over 23,000 feet. The highest peak — probably the second highest in the world — is Mount Godwin Austen, indicated on the *Survey of India* maps as K 2, but which seems to have been long known as Chogo-ri among the natives. This giant attains a height of 28,265 feet.

This western part of the Qaraqorum possesses a wild and imposing natural beauty; it is covered with eternal snows over a considerable extent. The snow line runs from 15,500 feet north of the principal chain to 17,000 in the south.

If we exclude the polar regions the largest glaciers in the world are found in this part of the Karakorum. The Siachen glacier is 45 miles long and covers a surface of about 1,000 square miles. The Baltoro, Hispara and Biafo glaciers are only a little less than the Siachen. The plateau out of which rises the Karakorum has an average height of 10,000 feet. The whole region is excessively dry because the rain (snow, hail) falls almost exclusively on the high mountains. The vegetation in the valleys is very slight and is confined to the vicinity of torrents and streams. At the terminations of the glaciers we find — very often on a little plain — a very beautiful alpine flora.

The Karakorum is the most important watershed in Central Asia, dividing the rivers which running northwards empty their waters into the deserts of this part of the world, and running southwards into the Indian Ocean.

The principal pass is the *col* of Karakorum (18,550 feet), through which runs the important trade route between Chinese Turkestan and Kashmir. It is difficult and dangerous. In their long journey countless beasts of burden perish of exhaustion or in the avalanches. The mountains take their name from the pass. But, as Karakorum means "black debris", the name is not very appropriate. It is found for the first time in a map by Elphinstone published in 1815. On this map the range in question is indicated by the name Moor Taugh or Karrakoorrum Mountains.

The first traveller to write on the mountains now called Karakorum was Mirzā Haidar, a prince of Chinese Turkestan, à propos of his journey from Yarkand to Leh, capital of Ladak, in 1533. The exploration proper of the Karakorum only began in 1808 when Elphinstone visited these regions. The more systematic and detailed exploration of the high mountains proper was only begun in 1892 by Sir Martin Conway's expedition, which has been followed by several others.

(PH. C. VISSER)

KARAKÖRUM, a town in Mongolia on the Orkhon, in the thirteenth century for a short time (about 1230—1260) the capital of the Mongol Emperors, now in ruins. The fullest accounts of the town are given among European travellers by Rubruk (Latin edition in *Recueil de Voyages et de Mémoires*, 1839, iv. 345 sq.; transl. by W. W. Rockhill, Hakluyt Society, 2nd series, especially p. 220 with the translator's notes) and among Muslim historians by Djuwaini [q. v.], *Ta'rikh-i Djihān Gushāi*, ed. Mirzā Muhammad Kazwini, especially i. 169 sq. and 192. The fullest account of the ruins (by the members of the Orkhon expedition of 1891) is in *Sbornik Trudov Orkhonskoy Ekspeditsii*, part i. (1892); in Radloff's *Atlas der Alterthümer der Mongolei* is a plan of the ruins (Pl. xxxvi.) and a squeeze of a large (not completely preserved) Persian inscription (Pl. xlviii.); on the latter see E. Blochet in *T'oung Pao*, 1897, viii. 309 sqq. As Djuwaini rightly remarks, a little below Karakorum there were the ruins of the old (viiith—ixth century) Uighur capital Ordu-balīk ("court-town") which, from being in ruins, was then called Mo-balīk ("bad town") and is now known as Khara-Balgasun ("black town"). The city built by the Mongol Emperor Üdegei (1229—1241) was also at first officially known as Ordu-balīk; the name Karakorum was a popular one. On linguistic grounds Karakorum cannot, as Rockhill supposes, be a corruption of *Kara Kūren* ("black camp") but means "black debris" (cf. Radloff, *Versuch eines Wörterbuchs* etc., s. v. *Korum*), a name still frequently found in mountainous regions. As Djuwaini expressly remarks, this was the original name of the mountain region round the sources of the Orkhon. The statement ascribed by Rockhill (following d'Ohsson) to Djuwaini that the town was half a farsakh long does not seem to be found in the printed text of the *Ta'rikh-i Djihān Gushāi* nor in manuscripts. Rubruk describes Karakorum as a small town not larger than the faubourg St. Denys in Paris; the monastery of St. Denys far surpassed in size the palace of the Mongol emperor. The ruins of the Mongol Karakorum indeed indicate a town of very moderate size; the Uighur Ordu-balīk was considerably larger. On the other hand there was much building in Karakorum during the city's brief period of splendour; Rubruk as well as Djuwaini give full descriptions of the imperial palaces built in the city and around it, some by Chinese and others by Muhammadan architects; according to Rubruk, Russian and Western European architects also shared in the building operations at a later date. Two farsakh east of Karakorum lay, according to Djuwaini, the palace of Targhū-balīk ("city of precious stuffs, brought as presents").

After the Mongol Emperors had removed their residence to China, Karakorum was only the seat of the governor of Mongolia; according to Marco Polo (transl. Yule-Cordier, London 1903, i. 226), who was not himself in Karakorum, the palace of the governor was in the citadel. After the Mongol dynasty was driven out of China (1368) the Emperors returned to Karakorum; after the dissolution of the dynasty in the xvth century the city lost all importance; at the present day the great Buddhist monastery of Erdeni-Tsu is there. (W. BARTHOLD)

KA-RA-KOYUN-LU (Turkish "those of the Black Sheep"), a Turkoman dynasty which reigned in Persia and Mesopotamia from 777 (1375) to 873 (1468). In the reign of the Djālirid Sultān Uwais, Bairām Khwādja, chief of the family of the Behārlu, had obtained an important position at the court of the Sultān through his valour; at the latter's death he seized al-Mawṣil, Sindjār and Ardjish. When he died in 782 = 1380, his son KA-RA MUĞAMMAD TÜRUSH, who was in the service of Sultān Aḥmad, son of Uwais, came back to succeed him and fell in a battle in Syria (792 = 1390). The son of this KA-RA MUĞAMMAD, KA-RA YUSUF, proclaimed himself independent and chose Tabriz as his capital. He made war on Timūr, took refuge with Bāyazīd Yildirim and took advantage of the conqueror's campaign in Asia Minor to seize Irāk 'Arabi, but he could not defend Baghdād against Mirzā Abū Bakr, sent against him by Timūr, and retired to Egypt to the Mamlūk Sultāns, who kept him prisoner for some time. On Timūr's death he was released, collected the thousand men who had accompanied him, took Diār Bakr after overcoming a thousand difficulties, defeated Mirzā Abū Bakr in the vicinity of Nakhcewān (809 = 1406), recaptured Tabriz and settled himself there. The following year he again defeated this prince, accompanied by his father Mirān Shāh, who fell on the field of battle. He took as colleague on the throne his son Pir Budaq, who had been adopted by Sultān Aḥmad. He took Diār Bakr from KA-RA OTHMĀN Bayandir, put Sultān Aḥmad to death after his defeat and capture not far from Tabriz, seized Irāk 'Arabi (813 = 1410) and made peace with KA-RA OTHMĀN after defeating him. He destroyed the army sent against him by Shāikh Ibrāhīm, king of Shirwān, and Kustendil, king of Georgia. In 822 (1419) he captured al-Sultāniya, Kazwin and Sāwa, towns of Irāk 'Adjami. Shāh Rukh, son and successor of Timūr, was leading a vast army against him when he fell ill and died in Dhu 'l-Hidjja of the same year (December) in the town of Udjan, at the age of 65, after reigning 14 years. His body was despoiled by the Turkomans and lay for two days without burial; then he was buried at Ardjish beside his grandfather Bairām Khwādja.

His eldest son Amir Iskandar, having reunited the scattered members of his tribe, took the field against Shāh Rukh and was defeated after a battle lasting two days (824 = 1421); but he seized the opportunity of his opponent's return to Khorāsān to regain Adharbaidjān. He defeated and slew Shams al-Dīn, Sultān of Akhlāt (828), Sultān Aḥmad, chief of the Kurds, and Izz al-Dīn Shīr (830 = 1426). He recaptured Shirwān and al-Sultāniya. He fought again with Shāh Rukh in 832 (1429) and, despite the bravery of his brother Djahān Shāh, he lost the battle and fled into Asia Minor; then, taking advantage of the fact that the Timūrid sovereign had placed on his throne his other brother Abū Sa'īd, he returned to the charge, captured his brother and put him to death. On the complaint of the people of Shirwān, who had been ruined by the plundering, Shāh Rukh sent a new army in 838 (1434) with which Djahān Shāh and Shāh 'Alī, his nephew, joined forces. Not being able to make a stand, Iskandar fled and came back again when Djahān Shāh had been installed by the Timūrid, but he was de-

feated and shut himself up in the castle of Alendjak, where he was murdered by his son Kobād at the instigation of one of his wives, who had fallen in love with the young man (841 = 1437). He had reigned for sixteen years.

Mirzā Djahān Shāh, appointed by Shāh Rukh (839 = 1435), engaged in the reorganisation of Adharbaidjān and added to it new provinces, Irāk 'Adjami (856 = 1452), Isfahān, in which the inhabitants were massacred, Fārs, Kirmān and Khorāsān (862 = 1458), where he established his capital in the town of Herāt. He was obliged to make peace with the Timūrid Sultān Abū Sa'īd, who took the field against him, by giving up the latter province to him because his son Hasan had escaped from his prison and had succeeded in taking Adharbaidjān. After an exceedingly swift march, on which he laid the country passed through waste and many beasts of burden perished, he captured his son and banished him from the country. Another of his sons, Pir Budaq, whom he had deprived of his office as governor of Fārs because of his evil conduct and relegated to Baghdād, rebelled in 869 (1465) and sustained a siege for a year. He then obtained by a ruse the submission of Pir Budaq, put him to death and replaced him by his other son Muhammad Mirzā. He reigned undisputed over the whole of Adharbaidjān, the two Irāks and Kirmān as well as over the coast of Omān. Winter prevented him from putting into operation his plans against Diār Bakr (871 = 1466). On his return, while out hunting, he was surprised by his enemy Ūzūn Ḥasan Bayandir and killed while trying to escape, at the age of 70 after a reign of 32 years (on the 12th of Rabi' II = Nov. 21).

Hasan 'Alī, his exiled son, whom Ūzūn Ḥasan had welcomed, and whose brain was affected by his 25 years in prison, gathered together a body of bad characters and marched on Tabriz where his brother Ḥusain 'Alī, the dervish, who had been crowned king in spite of himself, had just been murdered as a result of feminine intrigues. He ascended the throne, distributed his wealth to the mob and avenged his brother. Abandoned by the army leaders who went over to the camp of Ūzūn Ḥasan, he tried to raise the people of Hamadhān but was captured and put to death in 873 (1468). This was the end of the main branch of the family.

The branch which reigned at Baghdād consists of the following succession of princes: 1. Shāh Muḥammad, son of KA-RA YUSUF (died 837 = 1433), had been entrusted by his father with the administration of this province, but he was deprived of it after 23 years by 2. his brother Espān, who reigned 12 years and died in 848 (1444). 3. His son Fulād succeeded him; it was in his reign that Djahān Shāh took Baghdād and thus put an end to this line.

KARAĞUM (Turkish "black sand"), a desert in Russian Turkestan, between the Amu Daryā, the Ust Urt and the ranges of hills on the Caspian, contrasted with Kizil-Kum ("red sand"),

the desert between the Sir Daryā and the Amū Daryā. The Karākum (area 148,000 sq. miles) is a still more dreary waste and possesses even fewer fertile areas than the Kizil-kum. The sandy stretches north of the Sir as far as Lake Balkar are called "little Karākum"; cf. Franz Mahatschek, *Landeskunde von Russisch-Turkestan*, Stuttgart 1921, p. 15 sq., 285 and Index. The Karākum mentioned by Djawaini in the *Ta'rikh-i Džihān Gushāi* is, in the opinion of the editor, probably identical with the little Karākum (the readings of the MSS. are not certain; cf. edition by Mirzā Muḥ. Kazwini, Gibb Mem. Series, vol. xvi., part i. 69 sq., ii. 101 sq.).

(W. BARTHOLO)

KARAKŪSH, BAḤĀ' AL-DIN IBN 'ABD ALLAH (i.e. son of an unknown father) AL-ASADĪ (mamlūk of Asad al-Din Shīrkūh) AL-RŪMĪ (born in Asia Minor) AL-MAIKĪ AL-NĀSIRĪ, officer of Malik al-Nāṣir Yūsuf (i.e. Saladin), a eunuch, received his liberty from Shīrkūh and was appointed an Amīr. By the time of Shīrkūh's death (564 = 1169) he was already playing an influential part; it is said that it was due to him and the Qāḍī 'Isā al-Ḥakkārī that the Caliph al-Āḍid appointed Saladin vizier. After the suppression of the rebellion fomented after al-Āḍid's death by his Chamberlain, the eunuch Mu'taman al-Khillāṣ, Karākūsh was appointed Chamberlain. In this capacity he had the surveillance of the family of the late Caliph and is said to have administered his office with great strictness. To prevent the family of the Caliph increasing, he separated men and women. Saladin gave him the task of building the citadel of Cairo and extending the city walls to include Cairo and Fustāt; later he was asked to fortify and defend 'Akkā. When the town fell in 587 (1191) after eighteen months' fighting he was taken prisoner; Saladin ransomed him a few months later for the high sum of 20,000 dinārs. After the death of Saladin in 589 (1193) he entered the service of his son al-Malik al-'Aziz 'Uthmān and was trusted to represent the Sultān when the latter was out of Egypt. When the Sultān felt his end approaching (595 = 1199) he designated his son al-Malik al-Manṣūr his successor and Karākūsh his regent. In keeping with this wish, the young ruler appointed him Atābeg although Karākūsh was now very old. He only held his post for a very short time as most of the Amīrs and the head of the chancellery, Ibn Mammātī, declared him incapable of ruling, presumably on account of his great age. His supporters, who considered him the most worthy, consulted Saladin's adviser, al-Qāḍī al-Fāḍil [q. v.], but the latter, who had retired from political life, would not be drawn into the question. Finally the Amīrs asked al-Manṣūr's uncle, al-Malik al-Aḥḍal, to take over the regency. After this we find only one mention of Karākūsh, when Sultān al-Āḍil, who had seized the throne in 596 (1200), had two of his nephews taken to the house of Karākūsh as prisoners. He died a year later. Contemporary historians, like Imād al-Din al-Kātib al-Iṣḥānī, bestow the highest praise upon him, as do later writers, like al-Maḥrizī and Ibn Taghribirdī, and describe him as the ablest man of his day. They give him particular credit for his activity as a builder. Besides the buildings already mentioned, his house, his hippodrome and the bridge at Gizeh, which he built out of stones from the Pyramids at Memphis, are mentioned.

In the same period a "Karākūsh" became notorious as a type of stupidity. A series of ah and verdicts are related in a work entitled *Kitāb al-Faṣḥāh* [? *Al-Ḥikm al-Faṣḥāh*], "the book of the stupidity in the judgments of Karākūsh". According to Ḥajjājī Khalīfa, the above mentioned Ibn Mammātī was the author of this book. Casanova (see *Bibl.*) in his elaborate study on Karākūsh quotes three manuscripts: 1) a Cairo manuscript which contains a brief selection from the *Kitāb al-Faṣḥāh*; the author is there given as Ibn Mammātī; 2) a Paris manuscript the author of which is given as al-Sūyūṭī, certainly wrongly as in the introduction Ibn Taghribirdī is wrongly quoted and given a wrong praenomen, which one can hardly credit of al-Sūyūṭī; 3) a Cairo manuscript which is a later version, in which Karākūsh is called a Sultān and the number of his "verdicts" is increased, by 'Abd al-Salām al-Laḥnī of the year 1200 (1786). These "verdicts" have nothing to do with state-craft but are court verdicts; they are typical, well known anecdotes, current among other nations also. A special investigation has not yet been made of the problem. Casanova endeavours to show that the work is a pamphlet against Karākūsh, whom, he says, Ibn Mammātī hated as an exceedingly severe man. It is not known whether Ibn Mammātī collected and published these anecdotes in the life-time of Karākūsh. Ibn Khallikān rightly points out that it is impossible that a man such as is described in the anecdotes could have held high offices of state. Nor is anything known of a particular feud between Ibn Mammātī and Karākūsh except that Ibn Mammātī had protested in 595 (1199) against the appointment of this then very old man; Karākūsh is described by the Frankish chroniclers as advanced in years even in 585 (1189) at the siege of 'Akkā; he is said even to have known Godfrey de Bouillon. One thing is clear from Ibn Khallikān's observation: the anecdotes given by Ibn Mammātī were referred to our Karākūsh.

KARAM (BANU 'I-), a dynasty of 'Adn, from 476—533 (1083—1138) conducted an Ismā'īlī condominium — at first as viceroys of the Sulāhidids of San'a — in two branches, the Banū Mas'ūd and the Banū 'Abbās Abi 'I-Zurā'i; from 533—569 (1138—1173) the latter alone — the Zurā'idis, also called Banu 'I-Dhī'b (sons of the wolf) — held the now independent sultanate, only recognising the Caliphate of the Fāṭimids.

The Banu 'I-Karam belonged to the Djuṣham clan of the tribe of Yām in the Hamḍān group and were closely related to the Sulāhidids [q. v.]. They were therefore the principal supporters of

the founder of this dynasty, the Ismā'īlī Fāṭimī *dā'i* 'Alī b. Muḥammad and of his son and successor al-Mukarram. When the Banū Ma'n, whom the *Dā'i* had allowed to remain as vassals after the conquest of 'Aden in 439 (1047), rebelled, al-Mukarram and his wife, the Sultāna Saiyida Ḥurra, to whom 'Aden belonged as her dowry, transferred the governorship to the two brothers Mas'ūd and 'Abbās, sons of al-Karam, in 476 (1083); the former received the castle of al-Khaḍrā' and the revenues of the coast-lands while the latter got the revenues of the landward part of the country and the castle of al-Ta'kir at the gateway to the interior (not to be confused with the stronghold of the same name above Djubla, not far from the road from Djanad to Yarim). Their joint annual tribute amounted to 100,000 dinārs. Mas'ūd and al-Zurāi', son and successor of 'Abbās, fell before the gates of Zabīd, performing their feudal duty under the command of the major-domo of the Saiyida, al-Mufaḍḍal Abi 'l-Barakāt. The division of the territory into two parts was for the time being maintained. Mas'ūd was followed in succession by his son b. 'Abu 'l-Gharāt and the latter's sons Muḥammad and 'Alī; al-Zurāi's heir was his son Abu Su'ūd and the latter's son Sabā. But the manner of division of the country afforded the latter line an advantage from the first in view of greater facilities for expansion into the interior and the easier defence of the strongholds won by the two families there. It was the mountains in the north of the al-Ma'āfir district that were specially concerned. It proved to be of importance that al-Zurāi' had taken possession of Dumluwa in 480 (1087), a fortress in the Djabal al-Šilw above the bend where the road from Djanad has to curve round the mountain and is at its farthest east point. Under the vigorous Sabā, if not earlier, not only had their lands there been considerably increased but even Dhubbān about 100 miles W. N. W. of 'Aden on the road to Mokhā and Zabīd had been occupied. Sabā's father, along with Abu 'l-Gharāt, had succeeded in getting the tribute reduced to half and then to a quarter by successfully refusing to pay more to the Saiyida. Sabā was able to stop it altogether when the difficulties of the widow increased. The changed conditions attracted attention in Cairo: the eleventh Fāṭimid, al-Ḥāfiẓ 'Abd al-Madjid, soon after his accession received Sabā into the Ismā'īlī hierarchy as *dā'i* in 525 (1131). Dumluwa remained the royal residence. A two years' war in the Wādī Laḥdj brought about a decision between the families of the two brothers. 'Alī b. Abi 'l-Gharāt began by purchasing the support of numerous warriors. When he had shot his bolt, Sabā gained the upper hand by throwing his great wealth into the conflict and 300,000 borrowed dinārs in addition. He was finally victorious on the same day, it is said, as his ally in 'Aden, Bilāl b. Djarīr, stormed the castle of al-Khaḍrā'.

Henceforth the ZURAI'D'S ruled alone. But Sabā died six months after his entry into 'Aden in 533 (1138). He is buried there at the foot of al-Ta'kir. By the next year his son and successor 'Alī al-A'azz had died of consumption. He had designated as his successors his infant sons, who were in Dumluwa under the guardianship of their tutor Anīs and the minister Yahyā b. 'Alī. But Bilāl, whom he had dismissed and menaced, was

now in 'Aden and gave the crown to another son of his former patron Sabā, namely Muḥammad who had taken refuge from 'Alī al-A'azz on his father's death with Maṣṣūr, son of the above mentioned major-domo al-Mufaḍḍal. The reign of this Muḥammad b. Sabā from 534 to 548 or 550 (1139 to 1153 or 1155) marks the zenith of Zurāi'd power. He put to death the last prince of the line of Mas'ūd in 545 (1150/1), 'Alī b. Abi 'l-Gharāt, who had still held out after his defeat with some members of his family and a few faithful followers in a few mountain strongholds, for example in the Djabal Munif, north of Laḥdj. In 547 (1152/3) he purchased from his former protector Maṣṣūr, the heir of Saiyida, 28 towns and strongholds including al-Ta'kir with Djubla and Ibb in the north-east and Dhū Ashraḥ in the south-east. He had received the rank of *dā'i* immediately after his accession, for the Qādī sent from Cairo to invest 'Alī al-A'azz found Muḥammad already in actual power. It is to this ruler that we are mainly indebted for our knowledge of the history of the Zurāi'ds. For, with some men not so fully interviewed, like Anīs and Bilāl already mentioned, he is the main authority for the section on the dynasty in the *Ta'rikh al-Yaman* of 'Umāra, who visited him personally and on 'Umāra are based e. g. al-Djanādī, al-Khazraḍjī and Ibn Khaldūn. 'Umāra praises Muḥammad very highly, notably as a Maecenas. But one cannot help thinking that he — himself an enthusiastic Ismā'īlī — was biased in favour of his royal co-religionists. Whether Muḥammad for the rest interpreted his duties as *dā'i* in a religious sense, we do not know nor can we tell whether the request of the founder of the Mahdī dynasty, 'Alī b. al-Mahdī, who had asked Muḥammad in the presence of 'Umāra in an audience shortly before his death for help against Zabīd, was rejected for purely political and military reasons or for religious reasons as well. In his son and successor 'Imrān the religious interest predominated. The real power passed into the hands of the vizier family of Bilāl. The latter himself, who had already had the share in the government in the reign of Muḥammad, which was due him for his help in securing the throne, had died not long before — or very shortly after — the change in the throne, leaving a vast estate. He was succeeded in office first by his son Muḍāfi' and after the latter's early death by his other son Yāsir who ruled quite independently. When 'Imrān died in 560 (1164/5) and in keeping with his wishes was buried in Mekka, Yāsir had his 3 sons, who were still minors, imprisoned in Dumluwa in charge of the eunuch Abu 'l-Durr Djawhar al-Mu'azzamī. But the Zurāi'ds were to be spared the fate of being definitely dethroned by their own people. The last blow came from without: in 569 (1173/4) Saladin's brother Tūrānshāh conquered 'Aden along with the rest of Yemen. In the following year Djawhar surrendered him Dumluwa by treaty and a year later Tūrānshāh had Yāsir, whose hiding-place was betrayed, beheaded.

(R. STROTHMANN)

KARĀMA is strictly the infinitive of *karuma* (to be *karīm* "generous" in the widest sense); but in usage it is a noun of similar meaning to *ikrām* and *takrīm*, to show one's self *karīm* to any one (*Lisān*, xv. 456, 3 sqq.). It does not occur in the *Qur'ān* although *karīm* is very frequently used of Allāh and his workings (al-Rāghib al-Isfahānī, *al-Mufradāt*, *sub voce*). It has come, therefore, in the devotional language of Islām, to mean the exhibition by Allāh of his generosity, favour, protection, help towards any one, e.g. al-Baidāwī on *Qur.* x. 63 (ed. Fleischer, i. 419, *ult.*), a *locus classicus* on the *walīs*; and *karāmāt* mean individual cases of this generosity. In a special sense, the *karāmāt* then come to mean the miraculous gifts and graces with which Allāh surrounds, protects and aids his Saints (*al-awliyā*). A *Qur'ānic* basis for these was sought in the story (*Qur.* iii. 32) of the food which came miraculously to Maryam in the locked *mīhrāb* and in the transporting in a moment from Yemen of the throne of Bilkīs by a unnamed companion of Solomon (*Qur.* xxvii. 40). As neither Maryam nor the unnamed companion was a prophet these could not be evidentiary miracles (*mu'djizāt*). See the whole discussion in al-Taftazānī on al-Nasafī's 'Aḳā'id, Cairo 1321, pp. 134 sqq. But the real basis lay in the innumerable narratives of *karāmāt* in the lives of the *walīs*, exaggerated and distorted reflections of indubitable facts in the ecstatic religious life. The fact of these all orthodox Islām admits, even so philosophical an historian as Ibn Khaldūn (ed. Quatremère, i. 169, 199; transl. de Slane, i. 190, 227) and a peripatetic philosopher like Ibn Sīnā (*Ishārāt*, ed. Forget, pp. 209, 219, 221 sqq.). These were evidently driven by the pressure of facts to fall back on the hypothesis of still unsolved mysteries in nature; cf. Goldziher, *Die Richtungen der islamischen Koranauslegung*, Leiden 1920, p. 139, note 3. Only the Mu'tazilites, who were certain that nature held no mysteries for them and that they need only apply reason to their theological positions, protested and found, even in the *Qur'ān*, basis for their protest. See al-Zamakhsharī on *Qur.* lxxii. 26, 27 (*al-Kashshāf*, ed. Nassau Lees, ii. 1539) and on the whole development Goldziher, *op. cit.*, pp. 144 sqq. The coincidence in sound, in derivation and in meaning between these *karāmāt* and the *χαρίσματα* of the early Christian Church (1 Cor. xii.) is most striking and can hardly be accidental. The religious phenomena behind both are the same; but the verbal link is not clear; the Syriac Church called the *χαρίσματα* simply "gifts", *mauḥabāt*, in Arabic, *mawāhib*, which indeed occurs in this sense; it is possible that the Greek word taken over into Syriac may have suggested to users of Arabic their own *karāmāt*. Technically, such a *karāma* is one of the *khawāriḳ al-āda*, "the breakers of usage"; for there is no Nature in orthodox Islām, only, and at best, a custom which Allāh has established (Goldziher, *Vorlesungen*, p. 130). It differs from the *mu'djiza* or "evidentiary miracle" in that it is not worked by Allāh for a prophet in proof of his mission and is not accompanied by a *da'wā nubūwa* or a *taḥaddī*, a claim of prophetship or a challenge to the unbeliever. It differs from the

ma'ūna, "help", in that while the recipient of the *ma'ūna* is a Muslim he has had no special religious experience; and from the *irhās*, an anticipatory miracle worked for a prophet before his call. It differs from the *istidrāj* and *iḥāna* as these are wrought at the instance of unbelievers to lead them astray and bring them to shame (*Dict. of Techn. Terms*, i. 444 sqq.; al-Nasafī, 'Aḳā'id, *loc. cit.* with accomp. commentaries). A *walī* should conceal his wonders, while a prophet must display them; a *walī* may not know about them, while a prophet cannot help knowing. Yet the *karāma* of a *walī* may be regarded as a *mu'djiza* for the prophet whose follower he is. Finally, a *walī* should disregard them as much as possible and should look on them as tests rather than as privileges.

KARAMĀN is the name — derived from the Turkoman dynasty of the Karamān-Oghlu [q.v.] — 1) of a district in Asia Minor, 2) of a town in Turkey, capital of a *qaḍā* of the same name.

The boundaries of the district of Karamān (Karamān-ili, Caramania) have varied. All the lands which were permanently under the Karamānids are occasionally so called, that is Lycaonia, the Cilician Taurus and the whole southern Anatolian coast territory as far as Adalia. When the Karamānids were finally overthrown, their lands became one Ottoman province (*wilāyet*) with Konya as the residence of the Pasha. The sandjak of İč-ili [q.v.] was afterwards separated from the Pashalik; the northern larger portion was called Khāridj, probably in contrast to İč-ili (Hādjdjī Khalifa, *Djihān-numā*, p. 615 sq.; cf. also Ewliyā Čelebi, *Siyāhat-nāma*, Constantinople 1314—18, iii. 20), and comprised in the xviii century the sandjaks of Aḳsarāi, Aḳ-shehir, Konya, Kır-Shehir, Kaışariya, Nigde. After the administrative reforms of 1861, the name of the province was changed to Konya [q.v.]. The population of Caramania is overwhelmingly Turkish (picture of a Muslim of Caramania in d'Ohsson, *Tableau de l'Empire Ottoman*, Paris 1786—1820, ii., opposite p. 137); even the Greeks, or at least those inhabitants who belong to the orthodox Greek church, speak Turkish. They are known as Karamānlı and write Turkish in Greek letters; in Constantinople they have their newspaper *Nea Anatoli* printed in this way. During the nationalist fighting in 1919 and 1920, the Karamānlı under the protection of the nationalist government cast off the Oecumenian Patriarch and for a time chose a patriarch of their own. They are very probably not Greeks at all by origin but descendants of the ancient Lycaonians. In the mountains of Caramania live Yürüks and Turkomans. The name Caramania for the coastlands from Mersina to Adalia seems to have become

obsolete. In 1812 it was described by Fr. Beaufort in his book *Karamania* (second edition, London 1818).

2. The town of Karamān is the ancient Lāranda (Τὰ Λάρανδα; cf. Pauly-Wissowa, *Realenz. d. class. Altertumswiss.* xii.¹ col. 793). It lies 35 miles S. E. of Konya in the plain at the foot of the Taurus, on one of the great roads which lead from the coast (Selefke) across the Taurus into the interior of Anatolia. It is not known when it fell into the hands of the Saldjūks for the first time; as was the case in the rest of Anatolia, the process of islamisation probably was rapidly completed here. Lāranda also belonged to the Dānishmandids from whom Kılıdġ Arslan retook it in 1165 (Michael Syrus in the *Rec. des Hist. des Crois., Doc. Arm.*, i. 360). In 1190 Frederick I Barbarossa entered Lāranda on his way to Cilicia and in 1210 it again fell into the hands of the Christians when Leon II, King of Armenia, conquered it for the Knights-Hospitaller. In 1216 it had, however, again to be surrendered to Sultān 'Izz al-Dīn Kaika'ūs (*Rec. etc., Doc. Arm.*, i. 644). Shortly afterwards (about 1230) Lāranda was among the towns which were abandoned to the invading Khwārizmis (Ibn Bibī in Houtsma, *Recueil de Textes rel. aux Seldjucides*, iv. 191). In connection with this event Bahā' al-Dīn Walad, father of Djalāl al-Dīn al-Rūmī, migrated about this time from Khorāsān to Lāranda where Djalāl al-Dīn al-Rūmī married in 623 (1226) and where Sultān Walad was born (*Les Saints des Derviches Tourneurs*, transl. by Huart, i., Paris 1918, p. 19, 26, 268).

The town attained great importance through the dynasty of the Karamān-Oghlu [q. v.] who made it their capital in the beginning of the xivth century, when they did not yet feel secure in Konya. Several princes of this dynasty lived there even at a later period. They embellished the town with fine buildings and fortified the citadel. During this period the town was often under Egyptian suzerainty (Ibn Baṭṭūta, ed. Paris, ii. 284; Ibn Faḍl Allāh, *Maṣālik al-Aṣṣār*, in the *N. E.*, xii. 342 sq.). In the wars with the Ottomans, Lāranda was repeatedly occupied by the latter and the Karamānid ruler was forced to take refuge in the mountains. Finally in 1467 it was captured under Mehmed II and totally incorporated in the Ottoman Empire in 1486 by Bāyazīd II. Henceforth Lāranda was known as Karamān, although the old name has always been retained in official language.

The modern Karamān is a town of about 5,000 inhabitants (according to Banse, p. 106; *Kāmūs al-A'lām* gives 7,500, 'Alī Djawād 10,000). It lies on a low hill on the southern edge of the Lycaonian plain about 4,000 feet above sea-level. The highest part of the hill (about 300 feet higher) has on it the citadel now falling to pieces; it consisted of round and square towers linked by walls; the outer wall is built from stones from older buildings with Arabic inscriptions. Among the most important buildings of the Karamānid period is the Emīr Mūsā Medresesi where several princes of the dynasty are buried. The dome has fallen in; pillars of it are still standing which once belonged to Roman buildings. There is also the Khātūniye Medresesi, one of the finest buildings of the Karamānid period (pictures in van Berchem, *op. cit.*, p. 118 and 126, and

Woermann, *Gesch. d. Kunst*, ii. 446). According to the inscription (*Tārīkh-i 'Othmānī Endjūmeni Maḍmū'as*? [also entitled *Revue historique publ. par l'Institut d'histoire ottomane*], N^o. 11, p. 711), it was built in 783 (1381) by the daughter of Murād I, who married the Karamān-Oghlu 'Alā' al-Dīn (or 'Alī); there is now very little left of it. Mention may also be made of the *sāwiya* built by the same 'Alā' al-Dīn in 772 (1370), where Djalāl al-Dīn al-Rūmī's mother is reputed to be buried (now called Agha Tekke; cf. van Berchem, *op. cit.*, p. 116), and of the *türbe* where the Karamānid Ibrāhīm Beg and two of his sons are buried. The inscriptions in it are now destroyed (*T.O.E.M.*, N^o. 13, p. 831). The *türbe* is situated near the Karamān-Oghlu mosque or 'Imāret Djamī'i which was founded by this same Ibrāhīm Beg in 836 (1432) (picture in van Berchem, *op. cit.*, p. 127) and has a finely ornamented gateway and is richly adorned with tiles in the interior.

The houses of the town are built of clay (*toprak*); the inhabitants are reputed to be very dirty and the climate with its great variations in temperature here is said to be very unhealthy. There are a number of looms (*kelim*'s and *soḡdġāda*'s) in Karamān and tanneries. The town is on the Anatolian Railway between Konya and Ereğli; it has always been an important station on the trade route to Cilicia.

The Kaḍā of the same name, the capital of which is Karamān, belongs to the sandjak of Konya. It has about 30,000 inhabitants (according to Cuinet 21, 417) of whom the great majority are Muḥammadans. The Taurus in the south is here called Ālā Dagħ and in the north rises the Kāra Dagħ. As the chalk soil is as a rule well watered by the streams from the Taurus there are good crops. Most of the farmers in the plains are Muhādġirs (settlers from Rumelia). The mountain valleys are tilled by Turkomans who have settled there. The produce of the soil consists of different cereals, vegetables, fruit (raisins), cotton and opium. Salt is also produced. The wool for the carpet factories is yielded by the many sheep reared there.

(J. H. KRAMERS)

KARAMĀNĪ MEHMET PASHA, an Ottoman Grand Vizier and historian. He first saw the light, probably in Karamania, as son of a certain 'Arif Çelebi and was a descendant of the great mystic Djalāl al-Dīn al-Rūmī [q. v.]. He seems to have come when quite young to Sтамbul where he made the acquaintance of the celebrated

Grand Vizier Mahmūd Pasha-i Weli [q.v., executed 1474] and through his influence was educated in a medrese founded by him (cf. J. v. Hammer, *Gesch. des Osm. Reiches*, ii. 123 sq.). At an early age — in 869 (1464), it is said — he became secretary of state to the signet (*nishāndji*) with the rank of vizier. But in 862 (1454—5) i. e. soon after the capture of Constantinople he must already have been in high office, as is shown by the epithets *al-Amir al-khaṭir wa'l-wazir al-kabir* in his Arabic grant of foundation (*waḳfiya*), dated Dhu'l-Ka'da 4, 862 (= Sept. 13, 1458), in the Pruss. Nat. Library in Berlin (cf. W. Ahlwardt, *Katalog der Ar. Hss.*, iv. 227, N^o. 4763, fol. 74 sqq.).

He attracted the attention of Mehmed II, the Conqueror, more and more, became his adviser in the organisation of the offices of state and in the making of new laws. The celebrated *Kanūn-nāme* (cf. *Mitt. zur osm. Gesch.*, i. 131 sqq., Vienna 1921) is probably for the most part his work. When in May, 1478 the Grand Vizier Aḥmad Gedik Pasha was dismissed, Mehmed II summoned the unwarlike but intellectually distinguished Mehmed Pasha to be Grand Vizier. As such he achieved fame by composing a dispatch to Uzun Ḥasan, praised alike for style and matter (cf. Feridūn Bey, *Munshi'āt al-Salāṭin*², Stambul 1274, ..). On Rabi' I 5, 886 = May 4, 1481, on the day after Mehmed's death he was most cruelly murdered by mutinous janissaries in Stambul in the Takht al-Qal'a (Um Ḳapan) quarter (cf. M. Guazzo, *Historie ove se contengono le guerre di Mahometto*, Venice 1545, p. 282; cf. also Andrea Navagero in Muratori, *Rerum italic. script.*, xxiii. 1167, Milan 1733). He is buried in Stambul near the Kum Kapu in the new Nishāndji mosque called after him (cf. Ḥāfiẓ Ḥusain, *Ḥadiqat al-Djāwāmi'*, Stambul 1281, i. 209; J. v. Hammer, *Gesch. des osman. Reiches*, ix. 90, N^o. 449; do., *Constantinopolis*, Pest 1822, i. 430; (Sehri's statement, *op. cit.*, p. 23, 10, is incorrect). Mehmed Pasha also dabbled in poetry and published his verses under the *makhlas* Nishāni. He is more important as a historian. He wrote a treatise (*risāla*) in two parts (*ḥisn*) on the history of the Ottoman Empire; the first part covers the period from 'Othmān to Mehmed II (1451), the second from 1451 to 1480 (885) i. e. to shortly before the deaths of Mehmed II and himself. Specimens of the work, which is written in Arabic, were published in Turkish by Mukrimin Khalil in the *Revue Historique*, vol. xiv., Stambul 1924, part 2 and 3, from the MS. in the Aya Sofia, N^o. 3204 (*Defter*, p. 192). The historian Rūḥi Edrenevī [q.v.] follows him.

Ḳ. M. P. had two wives, through whom he became connected with famous and wealthy families viz.: Shāh Khatun, daughter of the celebrated author 'Alā' al-Din 'Alī al-Bistāmi (called Muṣannifek, cf. i. 734; he was also a politician, cf. Kritoboulos, ed. C. Müller, p. 146: Σάμιος 'Αλῆ and Chalkokondylas, ed. I. Bekker, p. 526, 17) and Sitti Sultān Khatun, daughter of the wellknown chief of 'Alā'iya, Luṭfi Beg, cf. Miklosich-Müller, *Acta et Diplomata*, iii. 284 sqq. and L. de Mas Latrie, *Histoire de l'île de Chypre*, iii. 64—68, Paris 1861, and 'Ashikpashazāde, *Tārikh*, Stambul 1332, p. 174 and 192). By his first marriage he had a son, Zein al-'Ābidin 'Alī Ćelebi, from the second a daughter, Rukaiye Khatun. His marriage with the daughter of the Beg 'Alā'iya (q. v. in-

corporated in the Ottoman Empire in 1471) apparently brought him considerable wealth, which he used for splendid endowments in Constantinople and Adrianople. This explains the hitherto obscure spiteful passage in the history of 'Ashikpashazāde, *Tārikh*, p. 192, where all sorts of wicked things are said about the "*nishāndji pasha*", which must be due to personal quarrels (probably the withdrawal of *waḳf*-states in Elwān Ćelebi).

A grandson of Karamāni Muṣtafā Pashā, son of the above Zein al-'Ābidin 'Alī Ćelebi, was the Molla Muṣtafā (d. 966, 1558, cf. 'Aṭā'i, *Dhail* to the *Shakā'ik al-Nu'māniya*, Stambul 1288, p. 15 sq.); the statement that the family of Kara Ćelebi-zāde goes back to Ḳ. M. P. (*Sidjill-i 'Othmāni*, ii. 111) is probably based on confusion with the vizier Rūmī Mehmed Pasha (cf. Ismā'il Beligh Brūsewi, *Güldeste-i Riyāḍ-i 'Irfān*, Brussa 1302, p. 314 sqq.; J. v. Hammer, *G. O. R.*, ix. 129, N^o. 754; Ḥāfiẓ Ḥusain, *Ḥadiqat al-Djāwāmi'*, ii. 195).

Bibliography: Sehri, *Tedhkir*, Stambul 1235, p. 23; Latifi, *Tedhkir*, Stambul 1314, p. 334 (Nishān); Ewliya i. 335 (Nishān); Sa'd al-Din Tādj al-Pashawārikh, Stambul 1279, ii. 2; 'Alī, *Kunh al-Akhbār*, under the Viziers of Mehmed II (unprinted part of the work); Ḥādjdi Khaalifa, *Takwīm al-Tawārikh*, Stambul 1164, p. 175; 'Othmānzāde Aḥmed Tā'ib, *Ḥadiqat al-Wuzarā'*, Stambul 1271, p. 14 sq.; *Sidjill-i 'Othmāni*, iv. 105; J. v. Hammer, *Gesch. des Osm. Reiches*, ii. 246 sq. (the statement there made that Ḥādjdi Baba [i. e. Ibrāhīm b. 'Abd al-Karīm al-Tusi, cf. Tashköprüzāde, *Shakā'ik al-Nu'māniya*, Stambul 1269, p. 226] was Mehmed P.'s father is due to a mistake); J. v. Hammer, *Gesch. des osm. Reiches*, i. 281 (Nishān), 40 (error regarding Ḥādjdi Baba repeated).

(FRANZ BABINGER)

KARAMANLI, a family who ruled Tripolitania in almost complete independence from 1711 to 1835. The founder of the dynasty, Aḥmad Karamanli, seems to have been a Kulughli. In 1123 (1711) he took advantage of the absence of the Pasha Muḥammad Abū Ammis to have himself proclaimed by the people, conquered and killed at Zuwāgha Khalil Pasha who was sent to overthrow him, bribed Muḥammad Pasha who commanded a new expedition (1124 = 1712) and purchased from Sultān Aḥmad III a *firmān* confirming him in authority with the title of *beylerbey*. He put down insurrections at Tādjūrā and Maslāta and that of 'Alī al-Ṣanhādjī, gave the government of Barḳa and of Benghazi to his brother al-Ḥādjdi Shābān Bey, who was killed ten years later in a rebellion suppressed by the Pasha. He also rebuilt the fortifications of Tripoli, notably the Burdj al-Mandrik, and built near the gate of Manshiya the mosque which bears his name and the madrasa adjoining it. In his reign a French squadron bombarded Tripoli in 1728 (1141—1142) and a treaty was concluded which lasted till 1766 (1180—1181).

He was succeeded in 1158 (1745—46) by his son Muḥammad Pasha under whom piracy developed and who concluded a treaty with England. He died in 1167 (1753—1754) leaving the power to his son 'Alī Pasha. In his reign the reins of authority became more and more loose and thefts and murders made life in Tripoli miserable; the troops were no longer paid regularly, the people

thought of appealing to the Porte. Matters were made worse by divisions in the family of the Pasha. His third son, Yūsuf, had his eldest brother Ḥasan assassinated on his authority in the arms of his mother (1790 = 1205—1206), then, supported by the Shaikh Khalifa b. Maḥmūd, chief of the Djabal Nafūsa, he rallied under his flag the Arab and Berber population hostile to the Turks, openly raised the standard of revolt against his father and besieged Tripoli. On these events, an adventurer named 'Alī Pasha Burghūl, a former official of the Odjak of Algiers, succeeded in obtaining a *firmān* from the Porte and seized Tripoli. In face of a common enemy, the Karamanli were reconciled and asked help from the Bey of Tunis, Ḥamda Pasha, who was also threatened by the return offensive of the Turks against their former Barbary possessions. With a Tunisian army they retook Djerba commanded by an ally of the usurper, Kara Muḥammad al-Turkī, and Tripoli in which 'Alī Burghūl had made himself detested by both Arab and Jew (Djumādā II 25, 1209 = Jan. 16, 1795). The latter fled to the East and in 1803 he succeeded in getting himself appointed Pasha of Egypt but was assassinated by a Mamlūk as soon as he arrived.

'Alī Pasha's rule was transitory; his son Aḥmad II Bey was next proclaimed. But taking advantage of his absence in Tādjūrā, his brother Yūsuf Bey had himself proclaimed (1210 = 1795—1796) and received a *firmān* from Sulṭān Selīm confirming him in his dignity. Aḥmad resided at Derneh with the title of Bey.

Yūsuf was the most important ruler of the Karamanli dynasty. He completed the fortifications of Tripoli, built a navy with which he forced Sweden to pay tribute to him (1213 = 1798—1799) and in secret agreement with Napoleon resisted Portugal whose fleet commanded by the English captain Campbell bombarded Tripoli. This expedition was celebrated in a Latin poem (*Carmen heroicum de rebus a Lusitanis ad Tripolim gestis*, Lisbon 1800; 2nd edition with French transl., Paris 1846, *La guerre de Tripoli*). Yūsuf had to sustain a more serious fight with the United States (1217 = 1801—3). An expedition commanded by Commodore Morris and another under Commodore Barron forced Yūsuf to accept a treaty which abolished the enslaving of Christians (Rabī I 4, 1220 = June 4, 1805). The Americans had tried to use the help of the Bey of Derneh, Aḥmad, brother of the Pasha; they deported him to Egypt after the peace. In 1232 (1815) the cruiser Decatur confirmed the advantages previously obtained; on the relations of Tripolitania with the United States see E. Dupuy, *Américains et Barbaresques*, Paris 1910, p. 132—297; Lane-Poole, *The Barbary Corsairs*, London 1890, p. 274—291. A little later all the countries of Europe, even the weakest, supported by the strongest, finally succeeded in disposing of the last attempts at piracy (on the relations of Tripoli with France see E. de la Primaudaie, *Le littoral de la Tripolitaine*, Paris 1866, p. 182—195, and with England see the references given by Playfair, *The Bibliography of the Barbary States*, i. *Tripoli*, London non dated, p. 49—52).

In addition to these difficulties, Yūsuf had to suppress revolts in the interior of the country; those of Gharyān in 1218 (1803—1804), of Ghadāmes in 1221—1225 (1806—1810), of Maḥmūd Sharīf, governor of Fezzān, in 1227 (1812), of the

Djabal Nafūsain in 1231—1236 (1815—1821) and of his own eldest son Muḥammad in the east of the regency in 1237 (1821—1822) (cf. Della Cella, *Viaggio da Tripoli alla frontiera occidentale dell'Egitto*, Geneva 1819, p. 19—23), without reckoning the intertribal wars such as that between the B. Bishr and the B. Saif al-Naṣr (cf. Muḥammad al-Tūnisi, *Voyage au Ouadāi*, French transl., Paris 1891, p. 564—565) or that of the Sort and the Abufela. Fezzān, to add to his troubles, made itself independent under 'Abd al-Djalil b. Ghāith of the Saif al-Naṣr, whom Yūsuf had sent to suppress a rising of the Bornu (1242—1246 = 1826—1830). Deprived of the resources supplied him by piracy, Yūsuf sought to procure supplies by imposing extraordinary super-taxes on the Jews whom he had at first protected, then by altering the value of the coins and finally by imposing a tax on gardens. The revolt became general; the insurgents meeting together at Manṣhiya proclaimed the dethronement of Yūsuf and replaced him by one of his grandsons, Muḥammad (according to others Aḥmad), and came to besiege Tripoli. An army led by the two sons of the Pasha was forced to retreat; not having succeeded in getting the help of the Bey of Tunis Yūsuf decided to abdicate. He did this in favour of his son 'Alī but this step only increased the troubles. If the European Consuls, 'Abd al-Djalil, master of Fezzān, Ghūma, chief of the Djabal Nafūsa, recognised 'Alī, the rest of the country remained faithful to Muḥammad. The Ottoman Porte took advantage of the occasion with the secret support of England; after having sent a *firmān* to 'Alī, Turkey sent out under the command of Naḍjib Pasha a fleet which took Tripoli without striking a blow (Muḥarram, 1251 = May, 1835) and reestablished the authority of the Porte in Tripolitania. Yūsuf remained till his death a prisoner in his own house, 'Alī was deported to Constantinople, Muḥammad committed suicide and his brother Aḥmad fled to Malta.

(RENÉ BASSET)

KARAMĀN-OGHLU, the most important of the various Turkoman dynasties, which arose in Asia Minor after the break up of the Saldjūk empire at the end of the viith (xiiith) century. They were for a time the most serious rivals of the Ottomans. The name goes back in the first place to the Turkoman chief Karamān, who attained a certain degree of independence during the Mongol troubles in the middle of the viith (xiiith) century and was granted by the Sultan Rukn al-Dīn a territory, from which he himself had come, in Cilicia. His native district was then known as Kāmar al-Dīn-Ili (now Iḷ-Ili) after the Amir Kāmar al-Dīn, who had been appointed commander of the conquered Armenian fortresses after the war between 'Alā' al-Dīn Kaiḳobād I and Lesser Armenia (625 = 1223; Ibn Bibī in Houtsma, *Recueil*, iii. 329). Munadjdjim Bāshī (iii. 24) derives the name Karamān from Kāmar al-Dīn, following Ibn Bibī's statement. This explanation of the name is hardly more than a popular etymology. The derivation from a geographical or ethnic name is nevertheless very probable as similar derivations are found among other Asia Minor dynasties and elsewhere (cf. Izmir-Oghlu, Germiyan-Oghlu [q. v.]). It is most probable, that the Karamānids originated in the subdivision of the Turkoman tribe of Sālūr [q. v.] called Karamān. That the town of Lāranda and the surrounding country later became called Karamān [q. v.] and that even the whole southern coast territory of Anatolia is called Karamania, is however due to the name of the dynasty itself. Among the older Ottoman chroniclers the general name Karamān-Oghlu is used almost regularly for every reigning Beg of the dynasty and the European authors of the xvth century also speak of the "Grand Karaman". The Byzantine authors have never had a clear idea of the identity of the Karamān-Oghlu. They confuse them with the Geruiyān-Oghlu and sometimes call the princes of Kōnya Ἀλιδέρσιος Ἀλιζούριος etc. which goes back to the Germiyan-Oghlu 'Alī Shīr.

There are two kinds of sources for the earliest history of the Karamānids. The one is hostile to them; it belongs to the school of Saldjūk historians and is represented by Ibn Bibī and the later Ottoman chroniclers; the other group is only represented by Shikārī, whose *Karamān Tārikhi* is a Turkish prose translation of a Persian poem in the style of the *Shāhnāma*. Shikārī sings the praises of the Karamānids, but unfortunately gives no facts (on the MS. of Shikārī cf. Khalil Edhem in the *T. O. E. M.*, No. 11, p. 597; Munadjdjim Bāshī also used Shikārī). Al-Djannābī occupies a position midway between the two traditions. An extremely important addition to our knowledge is formed by the inscriptions of the Karamānids edited by Khalil Edhem.

The ancestral home and the later regular place of refuge of the Karamān-Oghlu is the almost inaccessible mountainous country in the north-western Taurus on the frontier between Cilicia and Lycaonia, where the town of Ermenek [q. v.], the ancient Germanicopolis, lies. Karamān, according to Ibn Bibī (Houtsma, *Recueil*, iv. 321), was a Turkoman charcoal-burner, who used to sell his

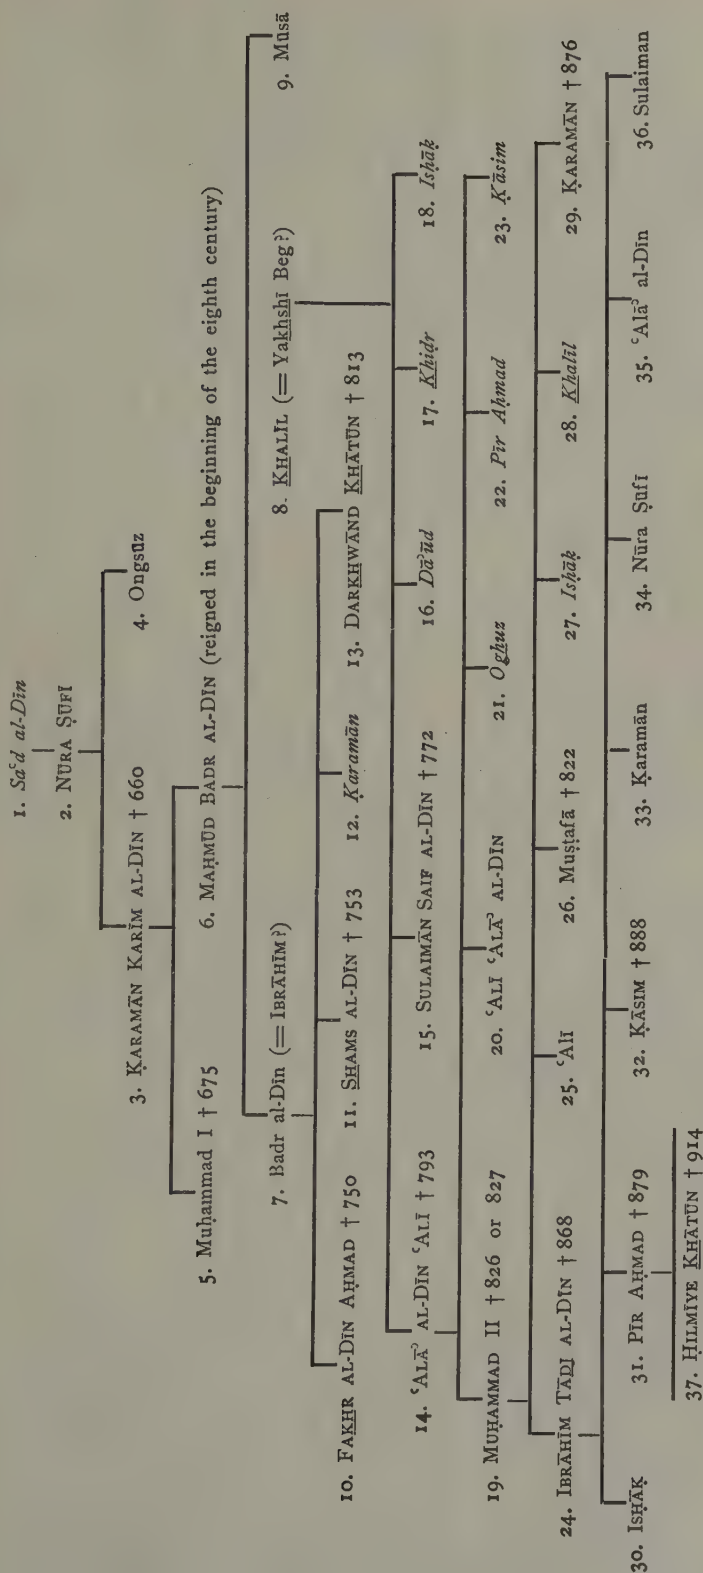

charcoal in Lāranda, but this statement is biased; in Djannābī (p. 213) and Shikārī, Karamān's father, is called Nūra Šūfī (son of Sa'd al-Dīn in Shikārī), who was a mystic *Shaikh* held in great esteem by the Sulṭān of Kōnya. Djannābī calls this Nūra Šūfī an Armenian but this statement is probably suggested by the name Ermenek. Besides it is improbable that Ermenek had anything at all to do with Armenia; it never belonged to Lesser Armenia (*Rec. Hist. des Crois. Doc. Arm.*, i. p. xxiii), and there is no obstacle to the derivation of the name from Germanicopolis. The name Nūra (نور) for

the father of Karamān is further guaranteed by an inscription given by Khalil [Edhem from the *türbe* of Karamān (Karīm al-Dīn Karamān b. Nūra) in Bālkāsūn in the sandjak of Ermenek; Nūra Šūfī's *türbe* is said to be at Deyirmenlik in the ḳadā of Mūt [one of the sons of Ibrāhīm Beg (see below) was also called Nūra Šūfī]. The Karamān-Oghlu thus have their beginnings in Šūfī circles, just as now seems to be probable for the Ottomans (Giese, *Ztschr. f. Semistik*, 1924, p. 246 sq.) and for the Šafawids (cf. Babinger, *Z. D. M. G.*, 1922, p. 132). Djannābī's statement that Nūra Šūfī was a follower of Bābā Ilyās needs only the correction that the latter was not the instigator of the Bābā'ī rising in Amasia (this was Bābā Iṣḥāk) but a Khorāsānī Šūfī who strongly influenced the whole religious development of Asia Minor (cf. Koprülü Zāde Fu'ād, *Ilk Mütesawwifler*, p. 232, 233). It is in any case significant that Ibn Bibī calls the Karamānids *Khawāridj*, which name was also given to the Bābā'īs, cf. also Khair Allāh, *Tārikh*, Constantinople 1292, ii. 58, where it is said that Nūr al-Dīn Šūfī (sic) was *Khalifa* of Bābā Ilyās for Iḷ-Ili.

Nūra Šūfī is said (according to Djannābī) to have taken the fortress of Selekfe by treachery and his son Karīm al-Dīn Karamān was granted this fortress as a fief by the Sulṭān; according to other sources, he received the beglik of Ermenek (Munadjdjim Bāshī) and the Sulṭān Rukn al-Dīn hoped therefore to regain the fealty of himself and his brother Ongsūz, who had been made *Mirāḥor* of the Sulṭān, after they had begun to stir up unrest in this region. After Karamān's death, which is placed in 660 (1261) (by Munadjdjim Bāshī; Shikārī makes him be poisoned by the Sulṭān), his sons and his brother were imprisoned in the fortress of Kāwala (كاولا; Ibn Bibī, *Recueil*, ix. 322; After the death of the Sulṭān (661 = 1267) they were released by the vizier Mu'in al-Dīn Parwāna.

Soon afterwards Karamān's son Muḥammad began his activity. He came to an arrangement with the rulers of Syria, who were then at war with the Saldjūks, and the vizier Parwāna found it impossible to bring him to obedience again, among his mountains. Then, when the Saldjūks and their overlords, the Mongols, were engaged in Mesopotamia with the wars against the Mamlūks, the Ermenek Turkomans began to covet the plain of Kōnya. Muḥammad Beg made use of Djāmri, the false claimant to the throne, who gave himself out to be a son of the Saldjūk 'Izz al-Dīn who escaped to the Crimea. In the name of this false Sulṭān, Muḥammad seized Kōnya which was poorly defended and Djāmri entered its citadel as Sulṭān (Thursday, June 7, 1275 = Dhu 'l-Hijda

GENEALOGICAL TABLE OF THE KARAMĀN-OGHLU

This genealogical list is reconstructed and somewhat different from that of Khalil Edhem Bey (*T.O.E.M.*, No. 14, p. 880). The table in v. Hammer, i. 682, is obsolete. The names written in capitals are found on coins and inscriptions, those in italics only in Shikārī. — 4. in Ibn Bibī, *Revue*, iv. 322, is called Būnsūz. — 7. The Badr al-Dīn of Shikārī and Ibn Baṭṭūta is here tentatively identified with the Ibrāhīm mentioned in the epitaphs of 10 and 11 as their father. — 8. This Khalīl would be the Yakḥshī Beg of Munadidjīm Bashī. According to Shikārī he reigned for 17 years. — 9. Inscription of the year 740 at Ermenek. — 13. Tomb inscription of the year 813 at Ermenek. — 14. is the Abu 'l-Faṭḥ 'Alā' al-Dīn Khalīl of the inscriptions (see the text), identified with Shikārī's 'Alā' al-Dīn Ibn Khalīl and with 'Alī, the husband of Nafise. — 15. is buried in the Khātūniya Medrese at Lāranda, according to the inscription of 772. — According to Shikārī, he was appointed by his brother (14) regent of Lāranda and poisoned at the instigation of Artēna-Oghlu. — 19 and 21 are, according to Shikārī, sons of the Ottoman princess. — 24. On a coin of Rukn al-Dīn; according to Shikārī, he was the son of a Saldjuk princess. — 26. Killed in the battle of Kaşariya (822) against the Mamluks. — 29. Epitaph at Adrianople 876. — 30. Coin of 880. — 32. Epitaph at Lāranda of 888 (according to Anonymus, ed Giese, p. 117, he died in Muḥarram, 887). — 31—36. are according to the Ottoman chroniclers, sons of the sister of Murād II who married Ibrāhīm. Shikārī in part has other names. — 37. Epitaph of 924 at Lāranda. (J. H. KRAMERS).

10, 674, if we read 674 instead of 676 in Ibn Bibi). Muḥammad Karamān-Oghlu administered the conquered territory for him as vizier and married the daughter of Sulṭān Rukn al-Dīn. An important administrative enactment of his was that he replaced Persian by Turkish as the official language for the first time and introduced a kind of mixed book-keeping which also became a model for the Ottomans (cf. thereon v. Hammer, *Gesch. d. Osm. Reiches*, i. 35). At first Muḥammad and Djamrī (who had taken the name Siyawush) successfully held their own against the Saldjūk troops and extended their territory. Finally the Mongol Khān Abāka [q. v.] sent his son Oghuz against Konya. On hearing of this Muḥammad and Djamrī hurried out of Konya, carrying with them the vast booty which they had taken at the capture of the city. After the withdrawal of the Mongol army, they again tried to reach the town but the inhabitants under the leadership of the Qāḍī Maḥmūd al-Urmawī refused them admittance and the Turkomans retired to their mountains, burning and plundering as they went. Soon afterwards Muḥammad and two of his brothers were killed in a fight with Mongol and Saldjūk troops. Djamrī escaped to the north-west; in an encounter between his troops and those of the Sulṭān in the neighbourhood of the Sakaria he was taken prisoner and afterwards executed. This last battle, according to Ibn Bibi, took place in Muḥarram, 676 (June, 1277). It is therefore probable that Muḥammad's death took place in 675 (1276), which is made the more probable by various epitaphs in Konya (*T. O. E. M.*, p. 702). Shikārī has a somewhat different account (cf. also von Hammer, *Gesch. d. Ilchane*, p. 297, who gives Muḥammad the *laḡab* Shams al-Dīn). No inscriptions are known of Muḥammad; he was, of course, not a reigning prince but acknowledged the Egyptian Sulṭān Baibars as his overlord.

Some years later the power of the Karamānids revived under Maḥmūd Beg, whose *laḡab*, according to Khair Allāh, was Badr al-Dīn. In his inscription of the year 802 (1399—1400) he is called the son of Karamān, which agrees with Shikārī, who says that Maḥmūd had previously taken part in many of his brother's enterprises; Munadjjim Bashī's statement that he was the son of Muḥammad may therefore be considered to be wrong. Maḥmūd's principal residence was probably Ermenek, where he founded a mosque (702=1302). According to Munadjjim Bashī, he recaptured Konya and in 708 (1308) became completely independent. Driven out of Konya in 719 (1319) by the Amir Čubān, general of the Mongol Sulṭān of Persia, he retired again to Ermenek. According to Ibn Faḍl Allāh (*Masālik al-Abṣār* in the *N. E.*, xiii. 342 sq.), however, the Karamānids were not entirely independent at the beginning of this period; they called themselves Amir and frequently placed themselves under the protection of the Egyptian Sulṭāns while they on the other hand endeavoured to live on good terms with the Mongols. They were at that time bitter enemies of the Armenians against whom they felt themselves powerful through the protection of the Egyptian Sulṭāns.

The statements of the historians regarding the succession of the princes after Maḥmūd and their names are contradictory and the inscriptions throw little light on the question. According to Shikārī, Maḥmūd had three sons: Badr al-Dīn, Khalil and ā, of whom Badr al-Dīn reigned first, being

followed on his abdication by Khalil, then came Badr al-Dīn for a second time. Fakhr al-Dīn, his son succeeded him after his death; he was killed through the intrigues of Artena, Beg of Kaişariya, and succeeded by Shams al-Dīn's second son, also called Shams al-Dīn, who was poisoned by his brother Karamān after reigning 14 months. The above mentioned Mūsā b. Maḥmūd then ascended the throne to be replaced four years later by Khalil's son 'Alā' al-Dīn, passing over the brief reign of Badr al-Dīn's third son Karamān. According to Shikārī, this 'Alā' al-Dīn was one of the greatest of the Karamānids and is called by him Abu 'l-Faṭḥ. In agreement with the statements of Shikārī is Ibn Battūta (ii. 281, 284), who visited a Sulṭān Badr al-Dīn in Lāranda in 733 (1332), to whose territory Konya also belonged. But his brother Mūsā had, it is said, already reigned in Lāranda before him but had ceded the town to the Mamlūks from whom it later had been reconquered by Badr al-Dīn; that Mūsā had very close relations with Egypt is confirmed by Ibn Faḍl Allāh also (*Masālik al-Abṣār*, in *N. E.*, xiii. 347). We must therefore assume that the brothers reigned in different parts of Karamānia at the same time. Two epitaphs in the Emīr Mūsā Medresesi in Lāranda prove that Fakhr al-Dīn Aḥmad b. Ibrāhīm b. Maḥmūd died in 750 (1349/50) and Shams al-Dīn b. Ibrāhīm b. Maḥmūd in 753 (1352). They must certainly be the two sons of Badr al-Dīn (who, in that case, may perhaps have borne the name Ibrāhīm) mentioned by Shikārī.

It is more difficult to ascertain the identity of 'Alā' al-Dīn. An inscription of 772 (1370/1) on the gate of the *zāwiya* in Lāranda, where Djalāl al-Dīn Rūmī's mother is said to be buried, records that the *zāwiya* was built by Sulṭān Abu 'l-Faṭḥ 'Alā' al-Dīn Khalil b. Maḥmūd b. Karamān and that Saif al-Dīn Sulaimān b. Khalil (who, according to Shikārī, was a brother of 'Alā' al-Dīn) is buried there. Munadjjim Bashī (iii. 26) also knows an 'Alā' al-Dīn, son of Yakhshī Beg, son of Maḥmūd; as there is no documentary evidence for the existence of this Yakhshī Beg, he may perhaps be identified with Shikārī's Khalil (as Khalil Edhem Bey in the *T. O. E. M.* has already done; Yakhshī is probably not a proper name at all here; cf. Ibn Battūta, ii. 316). Shikārī makes his 'Alā' al-Dīn marry the daughter of the Ottoman Sulṭān Murād II, while according to Munadjjim Bashī it was 'Alā' al-Dīn's son 'Alī Beg who made this marriage. The contract of marriage between Murād II's daughter Nefise and Karamān-Oghlu 'Alī Beg is, indeed, still preserved in Feridūn's *Munshi'āt*, i. 105 sq.) (in the printed text, p. 107, the date is 788=1386, but Khalil Edhem Bey has shown that 783=1381/2 is more probably correct). There is an inscription of this Ottoman princess in the Khātūniye Medrese at Lāranda of the year 783, in which the reigning prince is called Amir 'Alā' al-Dīn Khalil b. Maḥmūd, i. e. the same name as in the above mentioned inscription of 772, but without the title of Sulṭān. The difficulty now is whether the 'Alā' al-Dīn Khalil of the inscriptions is identical with Shikārī's 'Alā' al-Dīn Ibn Khalil and with 'Alī, the husband of the princess Nefise. Very strongly in favour of this identity is a *wakf-nāme* of 'Alā' al-Dīn's grandson Ibrāhīm of the year 859=1454/5 (given by Khalil Edhem Bey in the *T. O. E. M.*, No. 13, p. 831), where this Ibrāhīm is called: b. Muḥammad b. 'Alā' al-Dīn b. Khalil b. Maḥmūd b. Karamān

(cf. on the question van Berchem, *Inscripfen* etc., p. 118—125 in addition to Khalil Edhem Bey). Probably throughout the whole period different Ḳaramānians ruled in different places (like Lāranda, Ḳonya, Ermenek, Aḳshehir, Akserāi). [Ibn Baṭṭūṭa, ii. 258, mentions a Yūsuf b. Ḳaramān as lord of 'Alā'iyā]. The extent of their territory varied considerably during this period. Lāranda was probably the principal royal residence Ḳonya, which had been conquered by "Yakhshī Beg" (Munadjjim Baṣhī), did not always belong to them. They had to fight with the Arteni-Oghlu at Ḳaīṣariya, who were vassals of the Mongols and, according to Shikāri, once took Ḳonya and Lāranda, with the Mamlūks of Syria, the Armenians, the Franks of Cyprus and with the other Turkoman rulers of Asia Minor, at whose expense they extended their territory considerably; they even advanced as far as Brūsa. Finally in 788 (1385) they came into conflict with Sulṭān Murād I (battle of Ḳonya) and in 793 (1390) the battle of Aḳ Çai in Kermiyan was fought against Bāyazid I Yıldırım, in which 'Alā' al-Dīn (or 'Alī) was captured and put to death by Timūr Tāsh Pasha, while his kingdom was annexed and his two sons taken to Brūsa as prisoners. (Most of the Ottoman writers mention these events; Shikāri's account differs considerably).

The crushing defeat of the Ottomans by Timūr gave the Ḳaramān-Oghlu again an opportunity to revive and a third period of struggle ending in final overthrow begins. 'Alā' al-Dīn's son Muḥammad was liberated from imprisonment in Brūsa by Timūr's grandson Mirzā Muḥammad (according to another story, he fled to Timūr) and was given a portion of his territory by Timūr again (about 805 = 1403). There are coins of his struck in Timūr's name. Ḳonya is said to have become his again in 816 (1413/14) (Munadjjim Baṣhī). He began to fight the Ottoman pretenders and occasionally supported Djunaid [q.v.], the Izmīr-Oghlu. With the Ottoman Sulṭān Mehmed I he had concluded a treaty before the latter's ultimate success, by which he is said to have ceded half of his lands to the Sulṭān (*Tādī al-Tawārikh*, etc., also Chalcocondylas), but in the same year we find Muḥammad attacking Brūsa on a pretext of avenging his father's death. After 34 days' siege of the citadel and the destruction of the town he withdrew. The lands of the Germiyan-Oghlu were under his rule for 2½ years at this time (inscription at Kutahiya; cf. *T. O. E. M.*, N^o. 2, p. 110 *sq.*). There were new campaigns against the Ottomans in 817 (1414) and 818 (1415). Muḥammad was on one occasion captured by Bāyazid Pasha but again released.

The Turkish chronicles tell us nothing of the years 818—824 (1415—1421). The Egyptian historians (al-'Aīnī, al-Maḳrīzī, Abu 'l-Maḥāsīn), however, fill the gap. After Muḥammad had sought help from the Egyptian Sulṭān for his war against the Ottomans and had even recognised him as his overlord (as is evidenced by his coins also) hostilities began, in which the Ramaḍān-Oghlu [q.v.] was also involved and during which Muḥammad's brother 'Alī fled to Egypt. This produced an Egyptian expedition against Muḥammad in 822 (1419). Ḳaīṣariya and Ḳonya were captured and 'Alī installed in his brother's place in Ḳonya. Muḥammad took refuge in the mountains at first but was later captured in an encounter near Ḳaīṣariya and sent to Cairo.

In 824 (1421) he received permission to return and again ascended the throne. He met his death at the siege of the Ottoman fortress of Adalia, which is fully described by the chroniclers (probably 826 or 827). His son 'Alī went over to the Ottomans, who gave him the sandjaḳ of Sofia, while his son and successor Ibrāhīm returned to his native mountains with his father's body. Of the second Muḥammad various inscriptions exist in Ḳonya. There are also inscriptions of his brother 'Alī in Nigde, where he held sway before and after the Egyptian period. After his brother's death he endeavoured to make himself independent again but when Murād V supported his nephew Ibrāhīm he did not succeed. In this period the power of the Ḳaramān-Oghlu was considerable; Sanudo estimates the size of his army at 30,000 men on a war footing and 60,000 on a peace footing (Murat, *Inscr. Ital.*, xxii. col. 962).

Ibrāhīm b. Muḥammad Tādī al-Dīn reigned from about 827 (1425) to 868 (1463) (coins of the years 827 onwards) and is the last great member of the dynasty, which after the extinction of the Germiyan-Oghlu was now the only dangerous rival of the Ottomans. Ibrāhīm had married the sister of Murād II and was at peace and war alternately with the Ottomans. The fact that he was the Sulṭān's brother-in-law often saved him from destruction. He had also an alliance with the Emperor Sigismund; the early Ottoman chroniclers bitterly reproach him for his dealings with the unbelievers as well as for his repeatedly breaking faith after solemnly concluded treaties (Anon., ed. Giese, p. 63, 64, 68). Murād II had made up his mind to exterminate the Ḳaramānids and for this purpose he made an alliance with the Turkomans of the Dhu 'l-Ḳadr dynasty. The latter about 840 (1436/7) took Ḳaīṣariya and the surrounding country from the Ḳaramānids; Ibrāhīm lost Aḳshehir and Beyshehri among other possessions to Murād II. An attempt to regain the lost territory after Murād's death (855 = 1451) failed. Mehmed II is said to have acted in this campaign as friend and protector of the Christians (Ducas, p. 233). Ibrāhīm was more successful in the south; in 1443 he took the fortress of Gorigos in Cilicia from the Cypriotes (*Rec. Hist. des Crois.*, *Doc. Arm.*, i. 638). Before his death Ibrāhīm wished to abdicate in favour of his son Ishāk. But Ishāk was the son of a slave and the other six sons whose mother was Murād's sister besieged Ibrāhīm and Ishāk in Ḳonya; both had to take to flight and Ibrāhīm died in the fortress of Kāwala (or Guwāle; 868 = 1463).

His successor was his son Pīr Aḥmad whose side Mehmed II had taken. Ishāk fled to Uzun Ḥasan, prince of the Aḳ-Ḳoyunlu. The confusion that followed in the struggle for the throne finally brought about the end of the dynasty. With the help of the Ottomans Pīr Aḥmad defeated his brother in the battle of Ermenek (869 = 1465) and henceforth regarded himself as the vassal of Mehmed II (inscription of 870 = 1466 at Ḳaīṣariye). But he soon came into conflict with his overlord because he had come to an arrangement with the Venetians. In 872 (1467) the Ottomans permanently occupied Ḳonya where the Ottoman prince Muṣṭafā became wālī; a part of the Ḳaramānian population was transferred to Stambul. Pīr Aḥmad retired to Lāranda and Nigde, where he fought the Ottomans and his brothers alternately. He made

an alliance with his brother Kāsim for a time (inscription of the two at Nigde of the year 874 = 1469/70). But they could not stand against Gedik Aḥmad Paṣha and lost Lāranda. After Ermenek and Minan had also been taken by the Ottomans, where Pir Aḥmad's family and treasures fell into their hands, the latter threw himself from a cliff but did not kill himself. He was still able to go to Tarsus where he died about 879 (1474), according to the *Tādī al-Tawārikh*. Ishāk had withdrawn to Selefke, where his widow continued to hold out for some time after his death.

Kāsim b. Ibrāhīm then maintained himself till his death (Muḥarram, 887 = Febr.-March, 1482), according to Anonymus, ed. Giese, p. 117; his epitaph at Lāranda is dated 888). He also sought the assistance of Uzun Hasan but could not recapture Lāranda. Then in 887 (1482) he joined the pretender Sulṭān Djem [q. v.] who had at one time governed Konya in succession to his brother Muṣṭafā and on other occasions also had been served by Karamānian troops. Kāsim was afterwards pardoned by Bāyazid II but with his death the rule of the Karamānids ended. His other brothers had already gone over to the Ottomans.

After Kāsim's death his generals placed Torghut-Oghlu Muḥammad, who belonged to the Karamān nobility, on the throne, but he also came into conflict with the Ottomans and had to flee to Aleppo in 892 (1487).

It was to their geographical situation that the Karamānids owed the great power they held for a time. Their mountains formed a refuge which it was almost impossible to capture, from which they could make successful descents into the plains of Konya and Cilicia again and again. The possession of the various Cilician passes and other routes over the Taurus brought them a considerable revenue from the tolls which they levied on the Genoese and Cypriote merchants, who carried on a busy trade by these routes with Asia Minor, while their revenue from the customs in the coast towns ruled by them (Scandolor, Manavgat, Anemur, Selefke, Lamos) must have been considerable. Their wealth put them in a still stronger position; their buildings in Lāranda, Konya and Nigde are evidence of this wealth, especially the ruins of the Khātūniye Medrese in Lāranda or Karamān [q. v.]. Karamānian art is a continuation of Seldjūk art in contrast to Ottoman art which rather follows Byzantine models (Woermann, *Gesch. d. Kunst*, Leipzig and Vienna 1915, ii. 445). Of importance in the history of civilization is their encouraging the use of Turkish instead of Persian, as has been already mentioned. The contrast between the Karamānians and the Ottomans seems, however, to have been very marked (Ducas, p. 195, says: ἦσαν γὰρ ἕει ἐξῆρωδῶς διακείμενοι οἱ τοῦ Καραμάν μετὰ τοῦ Ὀθμάν).

Bibliography. The most important monograph on the Karamānid is Khalil Edhem Bey's work on the inscriptions of the Karamān-Oghlu, *Karamān-oghullary haḳkynda welhā'ik-i makkūke* in Nos. 11—14 (Dec., 1911 to Jan., 1912) of the *Revue Historique publiée par l'Institut d'Histoire Ottomane* (*Tārikh-i 'Othmānī Endjūmeni Medj-mū'asī* = T.O.E.M.); he is the only author who has used Shikārī. Of the earlier historians there are Ibn Bibī (vol. iv. of Houtsma's *Recueil de Textes relatifs à l'Histoire des Seldjoucides*, Leiden 1902); Aṣhīk Paṣha Zāde, Constantinople 1332; F. Giese, *Die Alt-Osmanischen Chroniken*, Breslau

1922; Sa'd al-Dīn, *Tādī al-Tawārikh*, Constantinople 1279; Munadjjim Bashī, *Ṣaḥā'if al-Aḥbār*, Constantinople 1285; Ḥādījī Khalifa, *Taḳwīm al-Tawārikh*; al-Djannābī's *Tārikh*; the Egyptian historians mentioned in the text. See also Ibn Baṭṭūṭa, *Tuhfat al-Nuẓẓār*, ed. DeFrémery and Sanguinetti, Paris 1853—1859, ii.; Feridūn Bey, *Münshē'atī Salāfin*, i., Constantinople 1274; the Byzantine Chalcocondylas (ed. Becker, Bonn 1843) and Ducas (ed. Becker, Bonn 1834). — We may also mention: Aḥmed Tewhīd, *Meskūkāt-i Kadime-i Islāmiye*; Ismā'il Ḥalīb, *Meskūkāt-i Islāmiye Taḳwīmī*, Istanbul 1328; Cl. Huart, *Epigraphie de l'Asie Mineure* in *Revue Sémitique*, 1895, p. 346 sq., 355 sq., 371; Max van Berchem's edition of the Arabic inscriptions in the *Inscriften aus Syrien, Mesopotamien und Kleinasien*, collected by Max von Oppenheim, Leipzig 1909, p. 119—125; J. H. Löytved, *Konia; Inscriften der Seldjukischen Bauten*, Berlin 1907, p. 79—84; J. v. Hammer, *Geschichte des Osmanischen Reiches*, Pest 1827, i. and ii.; *Recueil des Historiens des Croisades, Documents Arméniens*, Paris 1869, i.; J. von Hammer-Purgstall, *Geschichte der Ilchane*, Darmstadt 1842, i. 297.

(J. H. KRAMERS)

KARĀMAT 'ALĪ, born (date uncertain, early in the sixteenth century?) at Djawnpūr [q. v.], of a Shaikh family, which had held the office of *khaṭīb* under Muhammadan rule; his father was *sarīshādūr* in the Djawnpūr Collectorate. He studied theology and other Muslim sciences under various celebrated teachers of the time, esp. Shāh 'Abd al-'Azīz, *muhaddith* of Dihli, who was also the teacher and afterwards follower of Saiyid Aḥmad of Barēli. Between 1820 and 1824, Saiyid Aḥmad made a tour through Bengal and Northern India, collecting a band of disciples, and Karāmat 'Alī was one of the most devoted of the younger men who followed him, but he does not appear to have taken part in the *djihād*, which Saiyid Aḥmad waged against the Sikhs [q. v.], or to have ever been in the Afghān borderland, where Saiyid Aḥmad was slain in battle in 1831. The Saiyid's old master, Shāh 'Abd al-'Azīz, now became his *khalifa*, and an active propaganda for the revival of Islām was organised in Bihār and Bengal. With this peaceful propaganda Karāmat 'Alī was identified, and he may be regarded as its most successful apostle, as he was certainly its most brilliant exponent. During the early decades of the 19th cent., there were several minor reform movements in Eastern Bengal, led by men with more zeal than learning, notably by Ḥādījī Sharf'at Allāh [v. FARĀ'ID], ii. 57), who in 1252 (= 1836-7) met Karāmat 'Alī in Calcutta. By 1855 the two schools had made some progress towards a rapprochement, and in the meeting then held at Barisal, Karāmat 'Alī was able to agree on several points with the representative of the other movement, Mawlawī 'Abd al-Djabbar, though on the question of the lawfulness of *Djum'a* and 'Id prayers in British India, he could not overcome the stubborn opposition of 'Abd al-Djabbar, and he had to appeal to the humour of 'Abd al-Djabbar's followers by pointing out that their leader mistook grasshoppers (which were unlawful food) for locusts (which were lawful [*Ḥudūdāt-i-kāfi'a*, p. 29-32]).

Karāmat 'Alī's life was a double struggle; first, he combated the Hindu customs and superstitions

which had crept into the practise of Islām in Eastern Bengal, against which he wrote a book, entitled *Radd al-Bid'a*, besides inveighing against them throughout his writings; and secondly, he tried to bring back into the fold of orthodoxy the new heterodox schools against which he waged a successful war; to this subject, also, he devoted a special book, *Ḥidāyat al-Rāfiḍīn*, besides constant references to "the ignorant" in his voluminous writings. He kept in touch with the Musalmāns of Bengal, and distributed to the needy all the presents that he received. He was a trained *ḳārī* and an expert calligraphist.

Garcin de Tassy (*op. cit.*, ii. 162) says that he competed for the prize offered by Sir Charles Trevelyan for the best Hindustani essay on the influence of the Greeks and Arabs on the Renaissance in Europe, but that his essay was not accepted for want of an English translation, which according to the rules should have accompanied the essay. He was thus interested, unlike the majority of contemporary Indian Mawlawīs, in the relation of Islām to the wider questions of the world at large. He died on the 3rd of Rabi' II, 1290 (= 30th May, 1873) and was buried in Rangpūr (*Tad̲j̲allī-i-Nūr*, ii. 136), in the province in which he had laboured for the regeneration of Islām all his life. He was succeeded in his work by his son, Mawlawī Ḥāfiẓ Aḥmad (ob. 1898), and his nephew, Muḥammad Muḥsin. His following was so large that there was hardly a Bengal village without his disciples and he still exerts a living influence in certain districts of that province.

He wrote chiefly in Urdū. Raḥmān 'Alī (*op. cit.*, p. 171—2) gives a list of 46 of his works, without claiming that it is exhaustive. One of his works, *Miftāḥ al-Djannat*, has run through numerous editions and is accepted in India as a correct statement of Islamic principles. His writings may be divided into four classes: 1) general works, like *Miftāḥ al-Djannat*; 2) works on the reading and verbal interpretation of the Qur'ān, and formal prayers and ablutions; 3) works on the doctrine of spiritual preceptorship (*Pirī Murīdī*), the cornerstone of orthodox Islām in India; in accepting this doctrine, Karāmat 'Alī stands in sharp opposition to the Wahhābī sect and merges insensibly in the *Taṣawwuf* schools, which he brings into relation with the traditional religious orders; 4) polemics against *Shari'at* Allāh, Dūda Miyān, the Wahhābīs, etc.

The common conception that Karāmat 'Alī was a Wahhābī is refuted by the detailed exposition of his own views as set forth in his *Mukāshafat-i-Raḥmat*; he had not seen any Wahhābī books, but had made verbal enquiries and found that they were so fanatical (*ḳidḳī*) that they called all who did not agree with them *mushrik* (p. 38-9); he and his school carefully distinguished between *shirk*, which was the negation of Islām, and *bid'a*, which was only an error in doctrine (p. 39). In his *Ḥudūd-i-ḳāṭi'a* he draws a clear distinction between a *fāsiḳ* (sinner) and a *kāfir* (infidel) and inveighs against those who would deny funeral prayers to those who did not pray but repeated the *kalima* (p. 21); if non-Muslims conquer Muslim lands, the *Djūn'a* prayer and the two *'Id* [q. v.] prayers were not only lawful but obligatory (p. 13 *bis*). He laid great stress on authority, successively handed down by living teachers, and based his doctrine on the orthodox Sunni

books of the Hanafi school (*Mukāshafat-i-Raḥmat*, p. 37). He accepted the six orthodox books of tradition (*Ṣiḥāḥ sitta*), the commentaries (*tafāsīr*), the principles of ceremonial law as interpreted by the masters (*uṣūl-i-fikḥ*), and the doctrines of *taṣawwuf* and *pirī murīdī* (pp. 38, 35), even basing the mission of Saiyid Aḥmad on a ḥadīth from Abū Huraira (p. 32): in every century a teacher is born to revivify the faith: Saiyid Aḥmad was such a teacher for the xiii.th cent. and should be followed until another teacher arise for the xiv.th cent. (p. 34). All this was in direct antithesis to Wahhābī teaching and the "reform" amounted merely to the abolition of Hindū rites and ceremonies or those introduced through ignorance (p. 36), or to a revival of Islām according to the accepted orthodox schools (p. 50). The political effects of Saiyid Aḥmad's life brought his followers into conflict with the authorities, but the writings of the school show that there was no connection, political or doctrinal, with the sect founded by Muḥammad b. 'Abd al-Wahhāb in Arabia.

Bibliography: The European accounts of Karāmat 'Alī are unsatisfactory, being based on secondary information and failing to distinguish between this school of reform and Wahhābism, and in some places there is confusion between the subject of this article and Mawlawī Saiyid Karāmat 'Alī of D̲j̲awnpūr (1796—1876), who represented the British Government at the court of Dōst Muḥammad Khān at Kābul, 1832—1835, and was superintendent (*mutawallī*) of the Hughli Imāmbāra, 1837—1876 (v. *Nineteenth Century*, May, 1905, pp. 780—782; Sir W. W. Hunter, *The Indian Musalmans*, p. 114; C. E. Buckland, *Dictionary of Indian Biography*, p. 229; Nūr al-Din Zaidī, *Tad̲j̲allī-i-Nūr*, ii. 139); *Census of India*, 1901, vol. vi. part i. (Bengal, p. 174 (Calcutta, 1902); *Journ. As. Soc. of Bengal*, vol. lxiii., part iii., pp. 54-6 (Calcutta, 1894); Garcin de Tassy, *Hist. de la Littérature Hindoue et Hindoustanie*, ii. 162 (Paris, 1870). (It is doubtful whether the *Mu'jizāt-i-rashk-i-Masīha*, Dihli, 1868, mentioned there, was a work by the subject of this article); Saiyid Nūr al-Din Zaidī, *Tad̲j̲allī-i-Nūr* (biographies of the famous men of D̲j̲awnpūr), pp. 135-6 (D̲j̲awnpūr, 1900).

A correct appreciation of Karāmat 'Alī's doctrines can only be gained by a study of his own writings, the most important of which are the following: *Miftāḥ al-Djannat* (Calcutta, 1243) (frequently reprinted); *Kawkab-i-durrī* (? Calcutta 1253) (translates passages from the Qur'ān for the benefit of those who know only a little Arabic); *Ba'at-i-Tarwa* (Calcutta, 1254) (defends the legality of repentance at the hands of a *pir*, and other practices of the religious orders); *Zināt al-ḳārī* (Calcutta, 1264), (on the correct principles for the reading aloud of the Qur'ān); *Faid-i-'annam* (Calcutta, 1282), (a tract on speculative theology, expounding the doctrines of Shaikh Aḥmad Sarhindi); *Ḥudūd-i-ḳāṭi'a* (Calcutta, 1282), (a polemical tract against the school of *Shari'at* Allāh and his son Dūda Miyān, whose name (commonly spelt Dūdha Myān) Karāmat 'Alī always writes in this way); *Nūr al-Hudā*, (Calcutta, 1286), on the doctrines of *taṣawwuf*, of the *muḳaddidiya* school, apparently the new school of Saiyid Aḥmad of

Barēli); *Mukāshafāt-i Rahmat* (? Calcutta, 1286), (gives an account of the life and work of Saiyid Aḥmad of Barēli, and discusses and disowns the Wahhābis); *Zinat al-Muṣallī* (Calcutta, 1259), (instructions for ablutions and prayers, etc.); *Zād al-Taḳwū* (Calcutta, 1287, reprint), (treats of the beliefs and practices of Islām, and *taṣawwuf*; accepts the Naḳṣhibandiya teaching). A list (not complete) of Karāmat 'Alī's works is given in Rahmān 'Alī's *Tadhkira-i 'Ulamā-i Hind*, p. 171 (Lucknow, 1894); 46 separate works are mentioned.

(A. YUSUF ALI)

KARA MUŞTAFĀ PASHA, the name of two Ottoman Grand Viziers.

I. Kara [Kemānkeṣh (i. e. archer)] Muṣṭafā Pasha, an Arnaut by origin, taken from the Janissaries became first *kyaya* and was then dismissed; in 1043 (began July 8, 1633) he was appointed *Segban bashi* (general of the Janissaries) and became successively Agha of the Janissaries in Shawwāl, 1044 (began March 9, 1635), Grand Admiral (*Kapudan-i Derya*) on Djumādā I 5, 1045 (= Oct. 17, 1635) and Grand Vizier in Sha'bān, 1047 (began Dec. 19, 1637). During his period of office which lasted till his execution by order of Sulṭān Ibrāhīm I on Muḥarram 1, 1053 = March 22, 1643 (cf. J. v. Hammer, *Gesch. d. Osman. Reiches*, v. 326 sqq.) he distinguished himself by economy and a talent for administration, which all the historians recognise with admiration. Husein Wadjihī, the author of a history of the Ottoman Empire covering the period between 1048 (1638) and 1070 (1659), was K. K. Muṣṭafā Pasha's keeper of seals. A number of buildings owe their origin or restoration to him; he founded mosques, built bridges and planned settlements (for example Ortuḳābād near Siwās). The best verdict on him is that of the contemporary Ism. Bullialdus in *Ducæ Historia Byzantina*, Paris 1649, p. 263 infra: *vir, quamvis ineruditissimus, ut qui nec legere, nec scribere sciebat, in rebus gerendis negotiisque expediendis solertissimus ac promptissimus*. Kara Muṣṭafā Pasha is buried in Stambul at Parmak Kapu on the Diwān Yolu in the madrasa built by him (Na'ima, *Ta'riḳh*, ii. 30 sq.).

Reiches*, Pest 1827—35, v. 329 sqq.; Mehmed Thüreyyā, *Sidjill-i 'Othmānī*, Constantinople 1313—1315, iv. 390; 'Othmānzāde Aḥmed Ta'ib, *Haaiḳat al-Wuzarā'*, Stambul 1281 sqq., p. 71; Na'ima, *Ta'riḳh*, Constantinople 1147, ii. 25, 30, 31; Husein Wadjihī, *Ta'riḳh*, Vienna MS. (Flügel), *Katalog*, ii. 271; J. v. Hammer, *G. O. R.*, ix. 206, N^o. 83, vol. 25; Ramiz Pashazāde Mehmed Efendi, *Khariṭa-i Kapudanan-i Derya*, Stambul 1285, p. 50 sq.

II. Kara Muṣṭafā Pasha, the besieger of Vienna. He belonged to Merzifün where he was born in 1044 (began July 27, 1634), according to other stories about 1620 (cf. Barozzi-Berchet, *Relazioni degli anbasciatori e baili veneti a Constantinopoli*, Venice 1879, ii. 207, according to whom he was 52 about 1677), the son of a *Sipahi* captain named Urudj (according to other sources Ḥasan Agha) who fell before Baghdād. His father was a friend of Köprülü Mehmed Pasha who had the boy educated. His first rank was Silihdār, next Talkhiṣdji (master of oratory), in Dhu 'l-Hiǧdja, 1068 (began Aug. 30, 1658) *Mirakhor* (chief marshall) and in Mu-

ḥarram, 1070 (began Sept. 18, 1659) he became Beylerbey of Silistria with the rank of vizier (cf. Barozzi-Berchet, ii. 134 sq. and *Voyages du Sieur A. de la Motraye*, the Hague 1727, i. 439); in Ramaḍān, 1070 (began May 11, 1660) he was appointed governor of Diyārbakr, in Radjab, 1072 (began April 20, 1662) Grand Admiral (*Kapudan-i Derya*), in Ramaḍān, 1073 (began March 9, 1663) *Rikiāb Kāmmaḳāmi* (deputy for the Grand Vizier *a latere*) and two years later dismissed from the office of Grand Admiral; in 1672 he was *Kā'im-maḳām* at Adrianople (d'Arvieux, *o. c.*, Knolles-Ricaud, *o. c.*, ii. 263, 277). In 1086 (began March 28, 1675) he was betrothed to the Sulṭān's daughter Küçük Sulṭāne. In Sha'bān, 1087 (began Oct. 9, 1676) he was appointed Grand Vizier. His policy as Grand Vizier was that of his great predecessors and may be summed up in the one word, war: — war, for the sake of domestic peace, war, to please the Sulṭān, war, for the glory of the Ottoman Empire, and more particularly for his own prestige. Ambition and avarice are said to have been the motives of his actions (cf. Barozzi, *op. cit.*, ii. 207; Rycaut, *The Present State of the Ottoman Empire*, p. 89 sq.) and contemporary western chroniclers generally describe him as unjust, cruel and avaricious (cf. Barozzi, *op. cit.*, ii. 207: *venale, crudele ed ingiusto*). In his boundless ambition and avarice he allowed himself to be tempted in the late summer and autumn of 1683 to a campaign against Austria and the siege of Vienna, although he had no ability as a general. He had already conducted an unsuccessful war against Russia in the spring of 1677 and had been forced to consent to an armistice (at Radžin on Feb. 11, 1681) disadvantageous to the Porte and the campaign which he began in 1683 against the Emperor Leopold V brought about his ruin. After he had given Tököly, the chief rebel in Hungary, the Hungarian crown, he advanced into Austria laying the country waste as he went along. On July 14, he began the siege of Vienna with 200,000 men; the city was heroically defended by Count Starhemberg with 10,000 men. The city was near its fall when the German-Polish army of relief appeared and on Sept. 12, 1683, completely defeated the arrogant foe. Muṣṭafā Pasha escaped with the remnants of his force to Hungary. On Dec. 25, 1683, he was executed by the Sulṭān's orders. His body was buried in Belgrade in the mosque erected by him before setting out for Vienna and his skull brought to Adrianople to Sulṭān Mehmed IV and buried in the mosque of Saridja Pasha (epitaph in J. v. Hammer, *Gesch. d. Osm. Reiches*, vol. ix., p. xxxiv.). The statement, made by J. v. Hammer, *Gesch.*, vi. 519 and 740 and in *Wiens erste aufgehobene türkische Belagerung*, Vienna 1829, p. 119 sqq., supported with documents of Cardinal Leopold von Coliowiz (of Sept. 17, 1696) and adopted by V. v. Renner, *Wien im Jahre 1683*, Vienna 1883, p. 465, that the Turk's skull preserved in the armory of the Historical Museum of the City of Vienna, the former arsenal, is Kara Muṣṭafā's is wrong. The question of the talismanic shirt ('*abā*') also preserved there and of the skein of silk is more uncertain. Cf. A. Camesina in the *Berichte und Mitteilungen des Allertumsvereines zu Wien*, viii., Vienna 1865, Appendix, p. xlix. sqq. and also J. v. Karabaček in the *Katalog der Historischen Ausstellung der Stadt Wien 1883*, Vienna 1883, N^o. 541. —

Kağā Muştafā Pasha was exceedingly rich and left a vast estate. According to Sieur A. de la Motraye (*op. cit.*, p. 349), he possessed over 1500 odalisques, the same number of slave-girls, 600—700 black eunuchs and fabulous treasures, all of which passed to the state. He is said to have left 12,000,000 ducats (cf. Franz Wagner, *Historia Leopoldi Magni*, Augsburg 1719, i. 631). Besides several madrasas (cf. J. v. Hammer, *Gesch.*, ix. 158, No. 188, 189) he founded a number of mosques, — in Stambul, at Galata, at Adrianople, Belgrade, Djidda and in his native place. His palace (Tirnakdji Yalısı at Kuru Çeshme near Constantinople) was sumptuously furnished (cf. J. v. Hammer, *Gesch.*, vii. 362); his splendid tomb in Stambul was destroyed by the mob (Barozzi, *op. cit.*, p. 334). His son was Kağnak Muştafā Pasha; on his descendants see *Sidjill-i Othmāni*, iv. 402, 5 sqq. from below. A sister was married to Kaplan Pasha (d. 1091 = 1680 at Smyrna; Magni, *Viaggi per la Turchia*, Parma 1679, p. 488). — Kağā Muştafā Pasha has been repeatedly made the hero of dramas and romances; cf., for example, *Cara Mustapha Grand Vésir*, *Histoire contenant son élévation, ses amours dans le sérail, ses divers emplois, le vrai sujet qui lui a fait entreprendre le siège de Vienne et les particularités de sa mort*, Paris 1684, 12°, and Pierre Martino, *L'Orient dans la littérature française au XVII^e et au XVIII^e siècle*, Paris 1906.

KAĞA OSMAN OĞLU. [See DEREBEYS].

KAĞAPAPAKH ("Black-caps", so called from their head-dress of black lamb-skin), a Turkish people formerly living on the river Borçala or Debeda in the eastern part of the gouvernement of Tiflis, who migrated about 1828 partly to Turkish territory (to the vicinity of Kars) and partly to Persian territory (district of Suldüz, south of Lake Urmia). In the district of Kars they form about 15% of the population; about 1883 they numbered 21,652 of whom 11,721 were Sunnīs and 9,931 Shī'īs (K. Sadovskiy, *Kratkaya zameetka o Karskoj oblasti in the Sbor. Mater. etc. Kavkaza*, iii. 315—350); about 1893, 28,366 (N. Aristow, *Zameetki ob etničeskom sostavie tyurkskikh plemen etc.*, St. Petersburg 1897, p. 139 sq., quoting *Prav. Vestnik*, 1896, No. 74; according to the census of 1897, 29,879. In the "Caucasus Calendar" (*Kavkazskiy Kalendar*) for 1910, 99 villages of the territory of Kars are given as inhabited by the Kağapapakh, of which 63 are in the district of Kars, 29 in that of Ardahan (Russ. Ardagan) and 7 in that of Kağızman; the number of the Kağapapakh is given as 39,000 (*ibid.*, p. 546, article by A. Dirr).

A small village of Kağapapakh, inhabited by Tatars, is also mentioned in the gouvernement of Yelisawetpol, in the district of Kazakh (which bounds on the gouvernement of Tiflis). On the Kağapapakh in the district of Suldüz cf. C. Ritter, *Erdkunde*, ix. 939, 1018 and 1032, following Fraser and Rawlinson (up to 1838), and more recently V. Minorsky (member of the Commission for the Rectification of the Turco-Persian frontier, 1911—1914) in *Materiali po izučeniyu Vostoka*, v. 2, Petrograd 1915 (see Index).

These Kağapapakh, who are all Shī'īs, were at one time in Russian service and still preserve the certificates given to their ancestors by Russian generals in recognition of their services. After their transfer (it is said there were only 800 families under the leadership of Mahdī Khān affected) to Persian service the district of Suldüz was allotted to them as *tiyūl* (fief) by 'Abbās Mirzā [q. v., i. 13] in return for which they were to furnish 400 horsemen. As landowners the chiefs (Khān, Aghā) of the Kağapapakh attained considerable prosperity under Persian rule. After the occupation of the district by the Turks (1905) their situation became much less pleasant, because the Turkish authorities favoured the peasants at the expense of the landowners. In a petition sent on Rādjāb 15, 1329 (July 12, 1911) to the Russian and English delegates of the commission, the Kağapapakh expressed the wish that Persian rule should be restored to their land or that they should be given the opportunity of migrating to the interior of Persia. Suldüz was thereupon adjudicated to Persia (protocol of Nov. 4/17, 1913). The Turkish troops had already been withdrawn during the Balkan war (1912). How the situation has developed since the world-war I do not know.

(W. BARTHOLD)

KAĞASĪ, 1) the name of the founder of a Turkoman dynasty in Asia Minor in the viith century A. H. (thirteenth A. D.), the dynasty which was the first to succumb to the Ottomans; 2) the name of the territory ruled by this dynasty, now a sandjak of Turkey.

1. Karasî is said to be a contraction of *Kara Tsā* or *Kara Ese*, the name of a Turkoman chief, a vassal of the Saldjūk Sulṭān Ghīyāth al-Dīn Mas'ūd, who conquered the province of Mysia for him from the Byzantines in the reign of Andronikos II Palaiologos (Ducas, p. 13). The name of the father of Karasî is also given by the Byzantine historians (Nicephoros Gregoras, i. 214) as *Karānuç*, which Mordtmann identifies with the *Λαρίων* or *Λαριών* of Pachymeres (ii. 316, 389), which name perhaps conceals 'Ālamshāh or Kalamshāh (cf. Ibn Baṭṭūṭa, ii. 281).

Although Karasî did not conquer the whole of Mysia at once (Edremid and Assos remained Greek down to the xvth century) he must have had considerable power not least on account of the fleet which he created and with which he conducted raids on Rumelia. His territory became a refuge for the inhabitants of Eastern Anatolia, fleeing before the Mongols, as well as for the Turks when they were driven back after conquering the Dobruča under Şāry Sālyṭḡ Ghāzī [q. v.]. How long Karasî reigned is not known. About 1330 we find two other rulers in the land, namely Yakhshī Khān in Bergama and Demir Khān in Balıkesri. They are mentioned by Ibn Baṭṭūṭa (ii. 316, 317) and in the *Masālik al-Absār* (*Notes et Extraits*, xiii. 339, 366; the

مرحان mentioned on p. 339 is probably a corruption for Demir Khān), with which authorities the Byzantine writers agree, except that they (Kantacuzenos, i. 339) make Γαζή the father of Ταμπαχάνης, while the *Masālik al-Absār* makes the two brothers and sons of Karasî.

The account given by the Ottoman historians, who all follow 'Ashīkpāshāzāde (p. 43—45 of the Sтамbul edition of 1332), is different. They only deal with the dynasty in connection with the annexation of its land by Orkhān. According to them, Ili 'Adjlān Beg ruled in Karasî and maintained friendly relations with Orkhān; he even sent his youngest son Tursun to be educated at Orkhān's court. After 'Adjlān's death his eldest son (whose name the chroniclers do not give) succeeded him. He made himself so hated by his subjects that his vizier Hādjdji Ilbeki went to Orkhān to seek help against the tyrant. The younger brother Tursun thereupon promised Orkhān the towns of Bergama, Balıkesri and Edremid, if he would in return leave him in possession of Kızıldja Tuzla and Maḥram (Assos). In keeping with this agreement Orkhān conquered from the Greeks Ulubād (Lopadion) and several other fortresses which still lay as Greek enclaves between the Ottoman lands and Karasî. He then advanced on Balıkesri whence 'Adjlān's son fled to Bergama. At Orkhān's instigation, negotiations for peace were opened between the two brothers; Tursun, however, was killed by his brother on the walls of Bergama during the discussion of terms. The latter was then completely overthrown by Orkhān. He had also to leave Bergama and died two years later in Brusa of the plague. Hādjdji Ilbeki was given the administration of Karasî Ili and the Timariots were left in their fiefs. These events are put by the Ottoman historians to 735 or 737 (1434 or 1436).

If we compare this with the statements first given, we could equate the elder son of 'Adjlān with Ibn Baṭṭūṭa's Demir Khān (as Aḥmad Tawhīd does); for the latter traveller gives a very

unfavourable account of Demir Khān. Yakhshī Khān would then be the same as 'Adjlān; Ibn Baṭṭūṭa himself says that Yakhshī Khān only means the "good Khān" (ii. 316) so that his real name might have been 'Adjlān. It is more important that, as Mordtmann makes probable, the Karasî dynasty existed somewhat longer than the Ottomans say. The Byzantines as late as 1343 still mention a Sulaimān, a descendant of Karasî (Nik. Greg., p. 741; Kantacuzenos, ii. 476, 507), who was married to a daughter of Ventatzes. This is in keeping with the fact that in Orkhān's letter of Muḥarram 1, 741 (June 27, 1340) in which he tells the prince of Djanik of the conquest of Ulubād nothing is said about the land of Karasî (Feridiūn, *Münsha'āt*, i. 76). Mordtmann therefore supposes that the country did not finally pass to the Ottomans till a few years later (about 1345) and that the chroniclers have mixed up two events. In any case the Karasî-oghlu dynasty did not arise again later under Timūr, as was the case with most other Turkoman dynasties.

There are neither inscriptions nor coins of the Karasî princes; a small mosque at Balıkesri is presumably of the pre-Ottoman period.

With the conquest of Karasî Ili a number of able statesmen and soldiers passed into the Ottoman service, such as Ādja Khalil, who had led the Muhādjdīs out of the Dobruča, Hādjdji Ilbeki already mentioned, Faḍil Beg and the celebrated Ghāzī Ewrenos Beg [q. v.].

The lands ruled by the Karasî Oghlu are given in detail by Müneddjim Bashi, iii. 36.

2. The sandjak of Karasî belongs to the wilāyet of Khudāwendigyar; towards the end of last century it formed for a short time a separate wilāyet along with the sandjak of Bighā [q. v.].

Karasî coincides with the ancient Mysia. The rivers Simaw and Şu Sighirli divide the land into a western and eastern half. The eastern half is very inaccessible owing to the irregular form of its thickly wooded mountains and it has no towns of any size; the mountainous centre of the west, also thickly wooded, gives place to flat country as it approaches the coast. The most populous and easily accessible parts are in the region along the railway from Banderma to Smyrna; the capital Balıkesri [q. v.] is here. In the south-west is

Bergama [q. v.] the most important town; in this region besides the citadel-crowned rock of Pergamon we have several isolated hills (the Ḳazaḳ Daḡh in the north and the Ḳara Daḡh in the west). The Pergamene plain is very fertile and thickly populated; besides the Turks there are many immigrant Greeks and Muḥādġir settlers and Yürüks. The Greek element greatly preponderates in the little towns on the coast, especially in Edremid. The Muslim element increases as we go eastwards, but the Greeks in the interior speak Turkish. According to Sāmī, the total number of inhabitants of the sandġaḵ is 340,000, of whom half are Turks.

Ḳarasī comprises the following qaḍā's: Balakesrī, Aiwalıḵ, Kemer Edremid, Edremid Erdek, Banderma, Kūnān, Bighadıḥ and Sandirġhī. The exports of the sandġaḵ are considerable owing to the fertility of its soil, its wealth in minerals and its cattle-rearing; according to Sāmī, the exports are six times the value of the imports.

(J. H. KRAMERS)

AL-ḲARASTŪN (ḲARISTŪN), means the steel-yard or Roman balance, while the common balance is usually called *al-mizān* (for other names in place of ḲarastŪn see below). The general observations that follow here apply to both kinds of balances.

In the systematisation of the sciences a science of weights, balances, etc. is included, for example by al-Fārābī in his *Iḥṣā' al-'Ulūm* and by Ibn Sīnā in the *Risāla fī Aḡṣām al-'Ulūm al-aḳliya*. Ḥādġdġi Ḳhalifa says (i. 493) that there are works, both short and long, on this subject but unfortunately he gives no titles. The references in the *Iḳhwān al-Safā'* should be compared (Bombay ed., i/ii. 118; Dieterici, *Logik*, p. 55). In the *Iḳhwān al-Safā'* it is said that every science and art has a "balance" with which to measure; astronomy the astrolabe, geometry the straight line, circle and angle. At the same time a magnitude with which one measures is called a "balance", for example in mensuration the ell, rope, etc. In the science of the weighing-machine that of centres of gravity (*Marāḳib al-thiqāl*) has also to be considered, as al-Aḳfānī specially mentions (*Beitr.*, iv. 105).

The balances used in ancient and mediaeval times were all steel-yards and consist of a beam (*'amūd*, in al-Djawbari also *ḳaṣaba*) turning on a horizontal fulcrum (*miḡwar*), a lever the centre of gravity of which is below the fulcrum. On the one arm of the beam is hung the article to be weighed and on the other the weights which are to weigh it, usually in scales. The arms may or may not be of equal length; we have equal armed and unequal armed balances accordingly. In standards with arms of equal length, in which to ensure accuracy in weighing a movable running weight (*rummāna*) is used, we have a combination of the two forms. The points, to which the running weight is moved and which are often marked with numerals, are called *arḳām*, *markaz*, *niḳra*, *sha'ira*.

When the beam is horizontal, the balance is known to be in equilibrium. This may be seen approximately with the unaided eye. Sometimes

an equilateral triangle is placed below in the centre of the beam, the altitude *h* of which is marked; from the centre of the beam hangs a pointer (*shāḳūl*); if the pointer coincides with the line *h*, the beam is horizontal. Sometimes, as in our balances, a scissors-shaped fork (*fayārān*) is used above the balance and one watches when the tongue (*lisān*) standing up in the middle of the beam lies between the arms of the fork; or sometimes a pointer is attached to the fork above pointing downwards and one watches when the end of this pointer is exactly opposite the tongue below. Finally the tongue may be placed below and the fork hung downwards, turning on the fulcrum of the balance. If there is not equilibrium the tongue falls outside the fork which is always perpendicular. Of technical expressions we might further mention *al-wazn*, the weight as measure of heaviness (*al-thiqāl*) and lightness (*al-khaffa*), the scale (*al-kaffa*), the threads to which the scales are attached (*al-khaṭṭ*), the hook on which the scales or the weights are hung (*al-aḳrab*), the arrangement for suspension (*al-'ilāḳa*).

Almost the only weights used in scientific works are the *dirham* and the *mithḳāl* (7 *mithḳāl* = 10 *dirham* and one *mithḳāl* = 4—4.5 grammes). The absolute value is usually of no importance in the cases we are concerned with, as it is only a question of relations of the weights. Further, 1 *mithḳāl* = 6 *dūnaḳ* = 24 *tassūdġi* = 96 *arḑā*. The normal weight, the standard, with which the other weights are to be compared, is called *sandġi* or *sandġa*. Weights etc. have been discussed and studied by H. Sauvaire (see the *Bibl.*).

In the theoretical discussion of the balance the first point to be considered is the definition of heavy and light body, the establishment of the centre of gravity, that of stable and unstable equilibrium, which is given by the relative positions of centre of gravity and centre of balance, the investigation of the question if it matters whether the weights are attached directly to the beam or to rods attached to it which are perpendicular or inclining to it.

By a fortunate chance there has been preserved to us the very important work "The Balance of Wisdom", *Mizān al-Ḥikma*, by Abū Maṣṣūr Abū 'l-Faṭḥ 'Abd al-Raḥmān al-Ḳhāzini (c. 1100 A.D.). That he was really the author is certain from a passage in al-Baiḥaqī (see *Beitr.*, xx. 73). All the above questions as well as the theory of the definition of specific gravities and some special applications of the balance for measuring time and for levelling are fully discussed by him.

In the general part he carefully considers the achievements of earlier workers in this field, for example the classical writers like Archimedes, Aristotle, Euclid, Menelaus and Pappus. He used the pseudepigraphic work of Aristotle — without, however, mentioning his name —, the *μηχανικὰ προβλήματα* (cf. Th. Ibel, *op. cit.*, p. 123). M. Steinschneider's statement that there is a translation of the work in the British Museum is wrong, as Mr. E. Edwards informs me. The work is, however, mentioned among those of Aristotle by Ibn al-Ḳiṣṭī, p. 43, 19. Among Muslim writers Thābit b. Ḳurra, Ibn al-Haiṭḥam and Abū Sahl al-Ḳuḥī were specially used by al-Ḳhāzini. He also deals with a series of balances which have been made by different students (see below). For specific gravities he relied mainly on al-Birūnī's work *Maḳāla fī*

'*l-Nisab allatī baina al-filazzūt wa 'l-Djawāhir fi 'l-Haḍīm*, on the relation between metals and jewels as regards volume.

A popular discussion of the theoretical considerations involved would take us too far and would have only subordinate interest for Orientalists (cf. the works by Th. Ibel and E. Wiedemann, mentioned below).

The steelyard or Roman balance (*al-ḡarastūn*) is a lever with two arms of unequal length, the centre of gravity of which lies below the centrum of balance. The object to be weighed G_1 , is placed on the shorter arm at a distance l_1 from the fulcrum, the travelling poise G_2 (*al-rummāna*) is movable along the longer arm. If equilibrium exists at a distance l_2 , $G_1 l_1 = G_2 l_2$ or $G_1 : G_2 = l_2 : l_1$, i. e. the weights G_1 and G_2 are at equilibrium in inverse proportion to the distance $l_1 : l_2$ (see further below). This principle of the lever is used by different writers as an example of inverse proportion (*takāfu'*). The principle seems to be first laid down by Archimedes (*Opera omnia*, ed. Heiberg, ii. 152); Arabic references are to be found in Aḥmad b. Yūsuf Abū Dja'far al-Miṣrī's work (about 850; Suter, N^o. 78) on proportion and relationship (*Fi 'l-Nisba wa 'l-Tanāsūb*), in an anonymous work in Gotha, N^o. 1158, 12, in the *Ikhwān al-Ṣafā'* (E. Wiedemann in the *Beitr.*, lviii.), al-Khāzinī (do. in the *Beiträge*, xlviii.). But the *ḡarastūn* is also used as an example for direct proportion in which the greater the weight the greater the distance of the running poise from the fulcrum; so, for example, in al-Miṣrī.

The steelyard is usually called *al-ḡarastūn*. A form frequently occurring, due to a slip in writing, is *al-farastūn* (on *ḡarastūn* cf., for the rest, Dozy, *Supplément*, ii. 327). The origin of the word has been much discussed. According to P. Duhem, who is followed by H. Diels, with better grounds, *ḡarastūn* is the Greek *χαρστίων* which name Simplicius gives to the *σταθμιστικὸν ὄργανον* of Archimedes and which means the beam of the balance, and received this name from its inventor Chariston. Cf. H. Buchner, *op. cit.*, and E. Wiedemann, in the *Beitr.*, lxiv. 218 at the end.

Instead of *al-ḡarastūn* the word *ḡabbān* or *ḡaffān* is frequently used and at the most different periods. The word comes from the Persian *ḡappān* and perhaps from the Latin *campāna* (steelyard). In Egypt a man who has to do with the steelyard is called *ḡabbānī*; there was *al-Diḡwān al-ḡabbānī* at which contracts to purchase were concluded. The usual pound was called *al-raṭl al-ḡabbānī*. In his *Fihḡ al-Luḡḡā* (Bairut 1885, p. 318) al-Tha'ālabi gives the word among those taken over from the Greek and equates *al-ḡarastūn* to *al-ḡabbān* and *al-ḡustās = al-mizān*. (On the etymology of various words for scales and weights cf. S. Fränkel, *Die aramäischen Lehnworte im Arabischen*, Leiden 1886, p. 198). According to Prüfer (information by letter) our modern steelyards are now called *al-mizān al-maskūbī* ("the Russian balance") in Egypt.

Al-Djāhīz mentions the *ḡarastūn* among the things which the Muslims had received from the Greeks (*Kitāb al-Hayawān*, Cairo 1323, i. 41); he further talks of the *ḡarastūn* as a means to keep 300 *raṭl* in equilibrium with 30 *raṭl* (*Kitāb al-Tarbī' wa 'l-Tadwīr*), "work on the quadrilateral and round figure", ed. van Vloten, p. 114.

As the two arms of the beam were of different lengths the superior weight of the longer had to be balanced either by a suitable form of the beam or by a special weight attached to the shorter arm. Thābit b. Ḳurra's work on the *ḡarastūn*, which is preserved in Arabic and in Latin translations (cf. Buchner, *op. cit.*), is devoted to this problem.

To increase the steelyard's capacity for weighing, several large running-weights are used (see fig. 1); but attachments can also be fixed to the shorter arm of the lever at two distances from the fulcrum, but in this case compensatory weights must be used. If the spaces are in the relation of 1:2, the weights of the articles on it are as 2:1, when the position of the running poise is the same; two divisions are marked on the longer arm. It is the same when different running-weights are used; a corresponding number of these divisions is called *bāb*.

In order to be able to weigh the *dirham* and the *mithḡāl* with the same divisions, 'Omar al-Khāyāmī puts the scale for the *dirham* (silver) at a greater distance from the fulcrum than for the *mithḡāl* (gold). If the lever is in equilibrium for the *dirham*, a compensatory weight (*mīyār al-ta'dīl*) must be added to the shorter arm for the *mithḡāl*.

The beam of the balance may also have divisions marked on the upper and on the lower side and be so arranged that either side may be turned upwards, so that one can weigh with two quite different systems of weights.

In many steelyards, for example those in use in Egypt at the present day, the scale hangs on to the *luḡma* (the "bit"), a piece of metal shaped like . The running poise is a cylinder of brass the interior (*ḡalb*) of which is filled with lead. Attached to it is the hook; the pointed part that moves along the divisions is called *mirāya* (index). The whole apparatus, about five feet long, rests on a wooden support, *shālīsh*; the rod itself is called *badan*.

In the work by Eliyā (mentioned below) methods are given for ascertaining and correcting errors. These may arise from the balance and its attachments having false weights, from the poise being wrong, the beam bent or crooked or the divisions being wrongly marked.

Al-Khāzinī gives two pictures of older standards, one of the generally known (*mashḡūr*) *ḡabbān* (fig. 2) and another (fig. 1) of the *ḡustās al-mustakīm* of the great mathematician 'Omar b. Ibrāhīm al-Khāyāmī, author of the celebrated quatrains. The illustration shows the different divisions, the running poises, the different places for the attachments and the marginal notes of the text.

A place in Fez was called *al-ḡarastūn*, probably because a *ḡarastūn* was placed there (see Dozy, *op. cit.*, s. v.).

The following are Arabic works on weights and balances besides those of al-Khāzinī:

Treatises of Euclid on the balance (*mizān*), ed. Wöpcke in the *J. A.*, Ser. iv., vol. xviii (1851), p. 27. According to Wöpcke, it comes from the Banū Mūsā, according to M. Curtze and L. Heiberg from Euclid (cf. Th. Ibel, p. 35). The work ascribed to Euclid on "Light and Heavy" is preserved in Arabic and often mentioned.

Works with the title "On the *ḡarastūn*" were written by the Banū Mūsā (about 950), Thābit b. Ḳurra (826—901), Ḳustā b. Lūḡā (864—923) and Ibn al-Haitham (965—1036).

Important information on balances, especially the *karastūn*, is also contained in the work on masses and weights by Eliyā bar Shin-nāyā (975 to a year later than 1049), Archbishop of Nisibis, which is perhaps based on a work by Kuṣṭā b. Luḳā, *Kitāb fi 'l-Awzān wa 'l-Makāyil*. Part of it was dealt with by H. Sauvaire in the *J. R. A. S.*, 1877, vol. ix. 291, and 1880, vol. xii. 110; much information is also contained in the work by Ḥasan b. Ibrāhīm al-Djabartī (1698—1774) entitled: *al-'Ikd al-thamīn fīmā yata'allaku bi 'l-Mawāzīn*, or as it is also called: *al-Durr (al-'Ikd) al-thamīn fi 'līm al-Mawāzīn*.

According to his son 'Abd al-Rahīm al-Djabartī, weighing machines in Egypt etc. had fallen into great confusion about 1758, which was

completely cleared up by his father, who may therefore be regarded as the reformer of Egypt in this respect. In the composition of this work he was assisted by the Shaikh al-Qabbān, 'Alī b. Khalīl.

Other authors and their works are:

Abu 'l-'Abbās Nadjm al-Dīn al-Khazardjī (1247—1310), *al-'Iqd wa 'l-Tihyān fi Ma'rifat al-Mikyāl wa 'l-Mizān*, "science of mass and weights"; Ibn Abi 'l-Faṭḥ al-Sūfī al-Misrī (about 1494): Two treatises on the steelyard (*Risālat al-Qabbān*). A number of MSS. on the subject in the Viceroyal (now Egyptian) library in Cairo is given by H. Suter in his translation of the math.-astron. part of the catalogue in the *Zeitschr. für Mathematik und Physik*, hist.-litter. Abteil., year xxxviii.

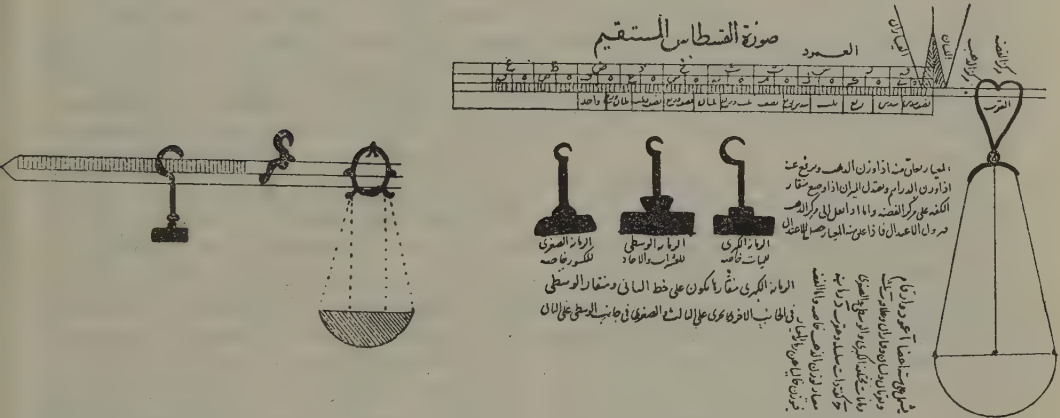

Fig. 1.

Above the beam of the balance is written *al-'Amūd*, to the right of it *al-fayārān*, markaz (mark) for gold, for silver. Below are the hook (*al-'akrab*). Below the weights is written: the large, middle and small *rummāna* (running poises) for the hundreds, tens and units, for the fractions. Partly below again is information relating in part to the separate running poises. Above on the left of the scale instructions are given for putting on the running poises. Above this the six parts of the balance are given: 1) the beam with the indicator etc.; 2—4) the three *rummāna*'s etc; 5) the scale etc.; 6) the compensatory weight. The illustration is taken from "The Balance of Wisdom".

(1893): Ya'īsh b. Ibrāhīm b. Yūsuf b. Yatmāk al-Amawī al-Andalusī etc.

Bibliography: As the steelyard (*al-karastūn*) and the common balance (*al-mizān*) are very often treated together in the same works, I give the whole literature here together. Very full references are also given in the works of Buchner, Ibel, Bauerreiss and Wiedemann: N. v. Khanikoff, *Analysis and extracts of the Book of the Balance of Wisdom written by al-Khāzinī* in the *J. A. O. S.*, vi. (1859), 1—123; H. Sauvaire, *On a Treatise on Weights and Measures by Eliā, Archbishop of Nisibis* in the *J. R. A. S.*, x. (1878), p. 253—284 and xii. (1880), p. 110—125. Besides the imperfect manuscript in Paris used by Sauvaire there is a complete one in Gotha, N^o. 1331; P. Duhem, *Les origines de la statique*, part i., Paris 1900; Th. Ibel, *Die Wage im Altertum und Mittelalter* (Dissertation, Erlangen 1906); E. Wiedemann, *Die Schrift über den Karastūn* in the *Bibl. Math.*, third series, vol. xii. (1912), p. 21—39;

H. Bauerreiss, *Zur Geschichte der spezifischen Gewichte im Altertum und Mittelalter* (Dissertation, Erlangen 1914); E. Buchner, *Die Schrift über den Karastūn von Thābit b. Qurra*, in the *Sitzungsber. der med.-phys. Sozietät Erlangen*, part lii. sq. (1920/21), p. 141—188; Carra de Vaux, *Notes de l'histoire des sciences* in the *J. A.*, 1917, series II, vol. x. 453.

In the following, the works of E. Wiedemann are collected from the *Beiträgen (B.) zur Geschichte der Naturwissenschaften in den Sitzungsberichte der med.-phys. Sozietät (S.B.) zu Erlangen*. When the whole part deals with the subject only its number is given. 1) *Wagen bei den Arabern (gefälschte)*: B., iv., S. B., xxvii. 388—392; 2) *Über die Lehre von Schwerpunkten*: B., v., S. B., xxxvii. 405 and 427; 3) *Zur Mechanik bei den Arabern*: B., vi., S. B., xxviii. 7—10; 4) *Auszüge aus der Schrift des Archimedes über die schwimmenden Körper*, B., vii., S. B., xxviii. 152—162; *Über al-Fārābī's Aufzählung der Wissenschaften*: B., xi., S. B., xxxix.

96; 6) *Lehre vom Schwimmen, Hebelgesetze, Konstruktion des Karastūn*: B., xvi., S.B., xl. 133—159; 7) *Über Verfälschung von Drogen usw. nach Ibn Bassām und al-Nabārāwī* (only section iii. need be consulted: references in al-Nabārāwī and Ibn Bassām on balances, weights and measures), B., xl., S.B., 201—206; 8) *Über die Wege des Wechsels von al-Khāzinī und über die Lehre von den Proportionen von al-Birūnī*: B., xlviii., S.B., xlviii. 1—15.

Among the metrological works are: H. Sauvaire, *Matériaux pour servir à l'histoire de la numismatique et de la métrologie des musulmans* . . . part 2: *Poids*, in the *J. A.*, series 8, vol. iii. 368—445; iv. 270—321; v. 498—506; part 8: *Mesures de la capacité*, *ib.*, vol. vii. 124—177, 394—468; viii. 272—297. Part 4: *Mesures de longueur et de superficie*: viii. 479—536; *Mesures de capacité et de poids dans les ouvrages de médecine arabe*, vi. 80; J. A. Decourdemanche, *Étude métrologique et numismatique sur les misgals et les dirhams arabes*, Paris 1906, and *Traité pratique des poids et mesures des peuples anciens et des Arabes*, Paris 1909.

The following works deal particularly with specific gravities etc.: Clément Mullet, *Essais sur la minéralogie arabe. Tableau des densités des pierres précieuses* in the *J. A.*, series 6, vol. xi. (1888), p. 250—253; E. Wiedemann, 1) *Zu al-Birūnī's Schrift: Ueber das Verhältnis, das zwischen den Metallen und den Edelsteinen im Volumen besteht*, B., viii., S.B., xxxviii. 163—166; 2) *Bestimmung der spezifischen Gewichte*, B., viii., S.B., xxxvi. 166—180; a) *Abū Maṣṣūr al-Nairīzī* (not the commentator on Euclid): *Bestimmung der Zusammensetzung gemischter Körper*; b) Notes by 'Omar al-Khayyāmī: *Bestimmung des Gehaltes von Legierungen zweier Metalle an diesen*; c) An essay on specific gravities ascribed to Plato; 3) *Bestimmung der Zusammensetzung von Legierungen nach al-Khāzinī* (contains a collection of the passages publ. down to 1908 from al-Khāzinī's work, B., xv., S.B., lx. 105—159; 4) *Verbreitung der Bestimmungen der spezifischen Gewichte nach al-Birūnī*, B., xxxvi., S.B., xlv. 33—34; 5) *Ueber die Gewichte der Kubikelle u. s. w. verschiedener Substanzen nach arabischen Schriftstellern*, B., xxxiv., S.B., xlv. 168—173; 6) *Ueber das al-Birūnische Gefäß zur spez. Gewichtsbestimmung* in the *Verhandl. der deutschen Physik. Gesellschaft*, x. 339—343.

(E. WIEDEMANN)

ḲARASU. [See AL-FURĀT].

ḲARASU-BĀZĀR, a small town in the Crimea, east of Simferopol, in 45° 10' N. Lat. and 34° 36' E. Long. of Greenwich. In 1736 after the destruction of Bāghċe Sarāy [q. v.] by the Russians, Ḳarasu-Bāzār was for a short time the residence of the Khān; but this town was also taken by the Russians under General Douglas in 1737. The town has preserved its oriental aspect down to the present day: there are many *khān*'s there with warehouses and coffeehouses. The large Tāsh Khān, said to have been built as a fortress in the seventeenth century, now serves the same purpose. The town was several times pillaged by the Don Cossacks in the seventeenth century. Cf. Veliāminof Zernof, *Matériaux pour servir à l'histoire du Khanat de Crimée*, St. Petersburg 1864, Index.

(W. BARTHOLD)

ḲARATEGIN, a district on the Wakhsh or Surkhāb (Turk. Kizil Sū), one of the rivers which form the Āmū Daryā, called Rāsh̄t by the Arab geographers [cf. i. 339]. The principal place (or "the fortress", *al-Ḳal'a*, *al-Iṣṭakhri*, p. 340) of Rāsh̄t corresponded as regards its situation perfectly with the modern Garm, the only town in Ḳarategin. Rāsh̄t then formed one of the frontier lands of Islām and was defended on the east against the inroads of the Turks by a wall built by Faql b. Barmak [on him cf. i. 665, ii. 37]. In ancient times there ran through this region the road from Western to Eastern Asia described by Ptolemy. Ḳarategin is frequently connected with the "highlands of the Komeds" Κομῆδων ὄρεσιν (e. g. as recently as Chavannes, *Documents sur les Turcs Occidentaux*, p. 164, on the authority of Sewertzow in the *Bull. de la Soc. de Géogr.*, part iii. for 1890, p. 420—431); but in the middle ages the name (Arabic Kumidh or Kumādh, Chinese Kiu-mi-t'o) was borne by the country below Rāsh̄t. In the middle ages and later the valley of the Wakhsh seems to have had no great importance for trade; as far as has been so far ascertained, only the embassy sent by Shāh Rukh to China (1419—22) used on its return journey the road between Farghāna and Balkh described by Ptolemy.

Like all the highlands on the upper course of the Āmū Daryā Ḳarategin also was under its own rulers down to quite modern times; in the pre-Mongol period only one Amīr of Rāsh̄t, Dja'far b. Shamānikū (Gardīzi in Barthold, *Turkestan* etc., i. 9, under date 337 = 948/949) is mentioned. Under Timūr and later the name of the country Ḳayir Tegin (or Tigīn) is found, in the printed edition of the *Zafar-nāma*, i. 189, erroneously Tir Tegin; when and how the present form arose is unknown. In the manuscripts of the *Bābur-nāma* (ed. Beveridge, f. 33^b and f. 63^b Ḳarātigin, f. 69^b and f. 81 Ḳayirtigin) and of the *Tārīkh-i Rashīdī* (transl. Ross, especially p. 241) both forms are found. Ḳarategin is popularly explained as a Turkish word for "blackthorn" (cf. Radloff, *Wörterbuch*, ii. 135, Ottoman *Ḳara dikān*) or as the name of the two first Kirghiz tillers of the soil (I. Minayew, *Swyedeniya o stranakh po verkhoviyam Amu Daryi*, p. 241, following Arendarenko). As is narrated in the *Baḥr al-Asrār* of Maḥmūd b. Walī (India Office MS., *Éthé, Cat.*, No. 575, f. 277^a, in Radjab, 1045 (Dec., 1635—Jan., 1636) 12,000 families of Kirghiz, then still pagans, went through Ḳarategin to Hīṣār. At the present day the Kirghīz (Ḳara Kirghiz) form a part of the population of Ḳarategin along with the Tādjik (and a small number of Özbegs).

In the nineteenth century the princes of Ḳarategin, like the princes of Badakhshān [cf. i. 552 sqq.], claimed descent from Alexander the Great. Ḳarategin was then under the suzerainty of the Khāns of Khōkand; their subjection is said to have taken place under Muḥammad 'Alī Khān (1822—42) in 1250 (1834) (Nalivkin, *Kratkaya istoria Kok. Khanstva*, p. 134 sq.); but already under 'Alim Khān (beginning of the nineteenth century) we find men from Ḳarategin forming a considerable part of the standing army founded by this Khān (*Tārīkh-i Shāhrukhi*, ed. Pantusov, p. 42 sq.). A campaign from Khōkand against Ḳarategin in 1275 (1858) under Malla Khān (1858—62) is also mentioned (Nalivkin, *op. cit.*, p. 190); the ruler of Ḳarategin was at this time Muẓaffar Khān

(later also called Muẓaffar Shāh). When in the year 1869 Hīṣār had to submit to the Amīr of Bukhārā, Qarategin also was occupied by the troops of the Amīr and Muẓaffar Khān taken as prisoner to Bukhārā; the conflict thus engendered between Bukhārā and Khōkand was only settled by the verdict of the Russian governor-general (K. v. Kaufmann) and Muẓaffar Khān again restored to his principality; but after his death Qarategin was definitely incorporated in Bukhārā. Qarategin also became involved in the last fighting in Farḡhāna before the final subjection of this country by the Russians (1874—1876); the Beg Muḥammad Raḥīm Shāh advanced to resist the insurgents with force, although they had been favoured by his brother Muẓaffar Shāh (apparently not identical with the prince already mentioned). The frontier between Farḡhāna and Qarategin (on the heights east of the valley of Kiçik Karamuk Su) was defined by a treaty concluded between Skobelew and another brother of the Beg, Ṣūfi Khān on August 28 (Sept. 9), 1876.

It was not till 1878 that Qarategin was for the first time visited by a European (W. Oshanin). In the following decade the governor Khudāi Naẓār Atālik and his successor Almās Beg had a mountain road, one of the best in Central Asia, built through Qarategin on the right bank of the Wakḥsh, which made Qarategin much more accessible, but in winter Qarategin is completely cut off from neighbouring lands. Oshanin and later travellers describe Qarategin as a fertile country with numerous villages and orchards, and as one of the most prosperous provinces in the kingdom of the Amīr of Bukhārā. It is said (Logofet, p. 322 sq.) that in Qarategin all the inhabitants without exception make a living by agriculture (including gardening), and that there is no landless proletariat there; anyone who neglects his piece of land for three years loses any right to it. On the other hand Rickmers (p. 340) says that many peasants go from Qarategin to Farḡhāna, work there as day-labourers and servants and bring their savings home, so that Russian money is taken more readily there than Bukharian. The only town is Garm; as regards the number of inhabitants, estimates, as usual in the east, are very contradictory: according to Oshanin 2,300 houses, to Masalskiy 4,000 people, to Logofet 15,000. Information regarding administration, taxes, etc. is given in particular by A. Semenow (Journey of 1898). The question: "When will the White Czar (*pādīshāh-i safīd*) take us to himself?" was frequently asked Semenow by the people embittered by the arbitrary conduct of the tax-collectors.

bridge 1913, p. 325 sq. (journey of 1906); cf. W. Masalskiy, *Turk. Kray*, p. 735 sq.

(W. BARTHOLD)

QARAUL (QARAVUL, QARAGHUL), an Eastern Turkī word meaning guardian, watcher, guard, sentinel (borrowed by the Russian in the last sense); a hunter who watches game from a distance; the chief of a body of these hunters is called *qaraul-begi*. In Ottoman Turkish *qaraḳoi* means a police-station. The word is connected with the root *qara-*, *qarala-*, to observe, watch or guard. — At the present day in Bukhārā, the rank of *qaraul-begi* corresponds to that of lieutenant (P. Kouznetsov, *Lutte des civilisations et des langues*, Paris 1912, p. 83).

In Persia the name *qaraul-khāna* is given to the watch towers erected on the mountain tops, commanding the surrounding country (Chodzko, *Specimens of the Popular Poetry of Persia*, Or. Transl. Fund, p. 228, note).

(CL. HUART)

QARA YAZIDJI, leader of a serious rebellion in Asia Minor from 1599 to 1602. His proper name was 'Abd al-Ḥalīm and he was chief of the corporation of Segbāns (*Segbān bölük bashi*). His followers consisted of Kurds, Turkomans and a large body of soldiers who had fled from the army in Hungary, chiefly on account of the Grand Vizier Cighāla's harsh and cruel treatment of them. They are therefore called *Firāris*; another name is *Djalālīs*; their rebellion is known as the *Khurūdj-i djalālīyān*. Qara Yazidji's first act was the occupation of Ruhā or Urfa (= Edessa) in 1008 A.H. The former Beglerbeg of Abyssinia, Ḥusein Pasha, who had been sent as an inspector to Anatolia in the previous year and had also rebelled against the Sulṭān, took refuge with Yazidji on hearing that Sinān Pasha Zāde Mehmed Pasha had arrived at Konya in order to bring him to book. They sustained together a siege in Ruhā in which they were finally compelled to cast bullets from silver coins, but in the end Qara Yazidji made terms with the government troops by handing over Ḥusein Pasha to them. The latter was sent to Constantinople and put cruelly to death. Qara Yazidji was then appointed governor of Amasia. In this town he again began a reign of terror; as Ewliya Çelebi tells (ed. Constantinople 1314, ii. 184), the inhabitants hid themselves and their possessions in the mountain caves. Mehmed Pasha again succeeded in driving him into the mountains round Siwās and, after passing the winter in Diyār Bakr, marched a second time against him. But Mahmūd Pasha, Beglerbeg of Siwās, and other notables went to Constantinople and convinced the authorities that Qara Yazidji had abandoned his evil ways. Accordingly the latter was given the sandjak of Çorum, on condition that he would swear fealty. But, with his brother Deli Hasan (in Na'ima, i. 128 the name is once written Ḥusein) he continued his propaganda, so that Ibrahim Pasha, former governor of Damascus, and Ḥasan Pasha, former governor of Baghdād,

were sent against them; these two Pashas were utterly defeated at Kaīsarīye on the 11th of Shawwāl, 1008 (April 25, 1600) by 20,000 rebels. After this victory Kara YazidjĪ regarded himself as an independent sovereign over the regions which he had taken from the Ottoman power. Finally he was defeated on the 12th of Shawwāl, 1010 (April 5, 1602) by the vizier Ḥasan Sokolli, at Sepealī. The rebels fled to the mountains of Djanik; here Kara YazidjĪ died in Ramaqān of the same year (according to *Sajjill-i 'Uthmānī*, Constantinople 1311, iii. 301 sqq., his death took place already in 1009). He was succeeded by his brother Deli Ḥasan and three chieftains called Shāhwerdī, Yular Kapdī and Tawil; his body was cut by them into several pieces which were buried in different spots in order that the 'Othmānī's might not have it in their power to burn the corpse. The new chiefs afterwards waged war successfully against the already mentioned Ḥasan Pasha, who was killed by them in Tokāt.

The inner history of this rebellion, which continued until its bloody suppression by Murād Pasha in 1605, has not yet been sufficiently studied. It does not seem unreasonable to seek religious pro-Shī'a motives behind it (cf. Babinger in the *Z. D. M. G.*, lxxvi. 143), as a name like Shāhwerdī suggests. On the other hand the moment was very favourable for a rebellion, the bulk of the 'Othmānī power being then occupied in Hungary at the siege of Kaniža. On the name Djalālī cf. Babinger, *Isl.*, xi. 14, note 3.

KĀRĪP. [See KĪRĀ'A, KŌR'ĀN].

KĀRĪB, the name of a modern metre used by the Turks and Persians and called *al-munsarid* by the Arabs. Its measure is in each hemistich: *mafā'ilun, mafā'ilun, fa'ilātun*.

The principal variations are: *mafā'ilun* by *habd* [q. v.], *mafā'ilu* by *kaff* [q. v.], *fa'ilātun* by *khabn* [q. v.], *fa'ilāt* = *fa'ilān* by *kaṣr* [q. v.] and lastly *fa'ilā* (= *fa'ilun*) by *haddf* [q. v.].

In Persian, it should be added, *mafā'ilun* may become *fa'ilun* (= *mafā'lun*) by *kharm* [q. v.].

Bibliography: See the article 'ARŪP.

(MOH. BEN CHENER)

KARIBĪYA. [See KURĀIBĪYA].

KARĪM, of persons: generous, benignant, liberal, honourable, noble, high-born; of things: bounteous, plentiful, honourable, noble, splendid. *Al-Karīm* is one of the ninety-nine attributes or "excellent names" (Sūra vii. 179) of God, but in the twenty-seven passages in which the word occurs in the Qur'ān it is only twice applied to Him. It is applied to Muḥammad, to an angel, and, ironically, to misbelievers, but it more frequently qualifies things, e. g. the recompense and provision awaiting the faithful, the Qur'ān, the letter sent to Bilkis, queen of Saba' [q. v.], the entry of the faithful into paradise, plants, cornfields, dwellings, the mode of addressing parents, etc. In Ḥadīth the term is often applied to Yūsuf, who is called *al-Karīm ibn al-Karīm* (al-Bukhārī, Manāqib, bāb 13; *Tafsir*, Sūra 12, bāb 1). *Al-Karīmātān* denotes the eyes (Aḥmad b. Ḥanbal, *Musnad*, iii. 283).

Bibliography: The lexica, s. v.

(T. W. HAIG)

KARĪM KHĀN ZEND (MUḤAMMAD), a member of a family of no special distinction belonging to a tribe of the Lūr, was in reality king of Persia at the end of the xviiith century without having the title, as he always retained the surname of *Wakil* (plenipotentiary), under which his name has remained popular. He was at first one of the lieutenants of the Bakhtiārī general 'Alī Mardān Khān who, taking advantage of the anarchy that followed the assassination of Nādir Shāh Afshār, seized Isfahān and placed on the throne the last scion of the Ṣafawī dynasty, Shāh Ismā'il III, aged eight (1164 = 1757). The murder of 'Alī Mardān, the defeat of the governor of Ādharbaidjān and of Muḥammad Ḥusain Khān, lord of Māzandarān, gave him possession of the whole of western Irān. Attacked in Shirāz by Muḥammad Ḥasan, son of Fath 'Alī Khān Kādjar, who had just seized Isfahān, he saw the army of his adversary melt away; a year later, the Kādjar prince was killed in a battle against Karīm Khān's lieutenants. Khorāsān, however, eluded Karīm Khān; this province remained in the hands of the blind Shāh Rūkh, a descendant of Nādir Shāh. Karīm's two generals were his two brothers Šādīk and Zakī of whom the latter afterwards made himself notorious for his cruelties. The former directed a campaign against the Ottomans: the town of Bašra, besieged for 13 months (1189 = 1775), surrendered to the Persians and remained in their hands till the death of the Wakil. He busied himself in restoring peace to the country and in developing agriculture and commerce; although not in any degree educated, he attracted scholars to his court and proclaimed himself their protector. His usual residence was Shirāz which he adorned with a number of buildings still standing to-day (mosque, caravanserai and baths); the tomb of the poet Sa'dī was restored by his orders; the tomb of the poet Ḥāfiz in beautiful Tabriz marble on which were inscribed two odes by the celebrated poet; the *Heftten* (seven bodies) was consecrated to the memory of the pious dervishes who inhabited it; it is a pleasure house the interior of which is adorned with paintings of Biblical scenes or imaginary portraits of Sa'dī and Ḥāfiz; not far from it is the garden of the Wakil, better known as the *Djahānnumā* (mirror of the world), the name given it by Fath 'Alī Shāh; the garden called Bāgh-i Dilgošā (garden which rejoices the heart), now occupied by kitchen-gardens.

He died at the age of 74 on the 23rd of Šafar, 1193 (March 13, 1779) — the date corrected according to Olivier. After his death, Persia fell back into a state of anarchy from which it was only raised by the coming of the Kādjar dynasty.

ḲARĪN means a companion of any kind (*muṣāḥib* in the *Ṣiḥāḥ* and the *Lisān*, xvii. 214 sq.; *khidn* in al-Baiḍāwī on Ḳurʾān, xli. 24); thus Abū Bakr and Ṭālḥa and Abū Bakr and ʿUmar are called "the two *Ḳarīn*'s." It is plain, too, that for Muḥammad and pre-Muslim Arabia the word also suggested a spirit-companion. That is the overwhelming usage of the Ḳurʾān. In theology, every human being has, as a *ḳarīn*, a *ṣḥaiṭān* and also an angel appointed to accompany him and, respectively, to tempt him to evil or to incite him to good (*Lisān*, loc. cit.). The *ṣḥaiṭān* is sometimes called a *djinnī* and will be cast into the Fire at the Judgment along with his human comrade whom he has led astray. These two *ḳarīn*'s are therefore different from the recording angels which accompany each human being (Ḳurʾān, lxxxii. 10—12). The basis of this is both Ḳurʾān and Ḥadīth. The word occurs in the Ḳurʾān eight times; in Ḳurʾān, xxxvii. 49, a human companion is evidently meant (*djalīs fi 'l-dunyā*, al-Baiḍāwī); in Ḳurʾān, iv. 42 (bis), the *ṣḥaiṭān* is a *ḳarīn*; in Ḳurʾān, xli. 24, the plural *ḳuranā* is used, but the context and especially the word *ḳayyada* (see al-Baiḍāwī on this) shows that tempting spirits are meant; closely parallel is Ḳurʾān, xliii. 35, 37, where a *ṣḥaiṭān* is "ordained" (*ḳayyada*) by Allāh as a *ḳarīr*; on Ḳurʾān, l. 22 al-Baiḍāwī is in doubt whether by *ḳarīn* a *ṣḥaiṭān* or an angel is meant, but on v. 26 he is certain that it is a *ṣḥaiṭān*. In this he follows the oldest exegetical tradition on the whole subject given in al-Ṭabarī's *Tafsīr*, xxvi. 93 sq. Even the prophets have such a *ṣḥaiṭān*, but that of Muḥammad was converted by him to Islām; a great many traditions bearing on this are given in the *Ākān al-marājīn* of Muḥammad ʿAbdallāh al-Shiblī, bāb x., p. 26 sq. (ed. 1326). A very suggestive and full ethical-theological treatment of the whole subject is in the *Ilhāṣ* of al-Ḡhazālī, *Kitāb ʿadḳāʾib al-ḳalb*, ed. with comm. *Ilhāṣ al-sāda*, vii. 264 sq., where the traditions are given in detail; cf. D. B. Macdonald, *Religious Attitude in Islam*, p. 274 sq. At the other extreme is the folkloristic development in popular Islām; for it see S. M. Zwemer, *Influence of Animism on Islam*, chap. vi. Much of this, too, may easily have been in the mind of Muḥammad and his world.

Another use of *ḳarīn* in old Arabia was for the *djinnī* who accompanied a poet and brought to him his verses. This use has been transferred in Islām to the angel who consorted with the Prophet and brought him his revelations (*Lisān*, loc. cit.; Goldziher, *Abhandlungen zur arab. Philologie*, i. 5 sq.; D. B. Macdonald, *op. cit.*, p. 19 sq.).

Bibliography has been given above; add traditions in Aḥmad b. Ḥanbal, *Musnad*, i. 385, 397 sq., 401, 460; cf. ii. 323; al-Dārimī, *Musnad*, *Riḳāʿ*, bāb 25; Muslim, *Ṣaḥīḥ*, *Ṣiḥāṭ al-Munāḥḳīn*, Trad. 69 (ed. with al-Nawawī's commentary, Cairo 1283, v. 362; Constantinople 1334, viii. 138). (D. B. MACDONALD)

KARKARALI, a Cossack village and the capital of a district in the territory of Semipalatinsk, 49° 2' N. lat., 76° 7' E. Long. (Greenw.); it has about 3000 inhabitants of whom two-thirds are Muḥammadans. (W. BARTHOLD)

AL-KARKH, the name of an important quarter of old Baghdād. The word Karkh, which comes from the Aramaic (*Karkā*), is found in Greek and Roman writers as Carcha, Charcha and Charase (see Pauly-Wissowa, *Realenzykl. d.*

klass. Altertumswiss., Suppl. i. 275, 283) and means town; cf. Yāḳūt, *Muʿdjam*, ed. Wüstenfeld, iv. 252, 18; Streck, *op. cit.* (see *Bibl.*), p. 92, 186; G. Le Strange, *Baghdād*, p. 63). There was still in the Muslim period a whole series of places or parts of towns called al-Karkh within the area of influence of Aramaic culture, in the ʿIrāk, *Khūzistān* and al-Djazīra; they were distinguished from one another by the addition of a geographical name (like Maisān, Sāmarrā). Yāḳūt, iv. 252—257, gives 9 such places; see also al-Ṭabarī (ed. de Goeje), Indices, p. 762. Our Karkh is often more exactly defined as Karkh Baghdād.

As the Aramaic name shows, the al-Karkh quarter was already in existence before the foundation of Baghdād by al-Manṣūr (145 = 762), as a small independent township said to have been founded by the Sāsānian Ṣhāpūr II (309—379 A.D.), which, like the other earlier settlements on the site of the future capital of the Caliphs, was no doubt mainly inhabited by Aramaic Christians (cf. above, i. 564). This pre-Muslim Karkh was selected by the Caliph al-Manṣūr to be the mercantile centre and it soon became the busiest quarter of Baghdād owing to its commercial character. Al-Karkh was at first quite separate, south-east of the so-called round city of al-Manṣūr and a fair distance from it; but as new roads and squares grew up all around it, it soon became merged in the sea of houses of the great capital.

Al-Karkh was watered by the Nahr ʿIsā, the most northerly large canal of the Euphrates in the ʿIrāk, as well as by its branches, the Nahr Sarāt and the Nahr Karkhāyā. The latter is the "Karkhian Canal" (Karkhāyā = כַּרְכִּיָּא; see Fränkel, *Die aram. Fremdw. im Arab.*, Leiden 1886, p. xx) which left the Nahr ʿIsā below the small town of al-Muḥawwal near the village of al-Barāthā (see above, i. 655) and supplied the southern part of the western half of Baghdād, i. e. the mercantile quarter and its neighbourhood, with its branch channels, which in places ran underground. Numerous bridges carried the busy traffic over it. On the Nahr Karkhāyā and its canal system see Ibn Serapion, ed. G. Le Strange in the *J. R. A. S.*, 1895, p. 24, 17—26; p. 286—8, 292—3; al-Khaṭīb al-Baghdādī, ed. Salmon (see the *Bibl.*), p. 66—68, 154—5; Yāḳūt, iv. 252; Streck, *op. cit.*, p. 85—90; G. Le Strange, *Baghdād*, p. 52—56, 63—80; Herzfeld in Sarre-Herzfeld (see the *Bibl.*), ii. 110.

In the civic history of Baghdād, especially during the Būyid period (xth—xith century), al-Karkh, which was regarded as a *Shiʿa* stronghold, is frequently mentioned (cf. above, i. 567). Under the Būyids who had ʿAlid sympathies the already frequent encounters and frictions between the Sunnis and *Shiʿis* of the capital became more and more serious. Sanguinary street fighting between the two hostile sects often accompanied by pillaging and incendiarism was the order of the day. Al-Karkh was usually in the very centre of this civil strife; its inhabitants were always at daggers drawn with the Sunnis of the adjoining quarters (Bāb al-Baṣra etc.). Sulṭān Djalāl al-Dawla (416—435 = 1024—1044) under whom the situation had become unusually serious was even on one occasion, in 422 (1031), reduced to take refuge with his *Shiʿi* co-religionists in al-Karkh. In 445 (1053) a considerable part of al-Karkh was laid in ashes as a result of these feuds. A great fire had previously devastated al-Karkh under the Caliph al-

Waṭṭik (227—232 = 842—7); but the destruction was very soon made good.

In course of time numerous mosques and tombs arose in the area of al-Karkh in the wider sense, by which the whole southern half of Baghdād west of the Tigris was often meant. The most celebrated is the tomb-mosque of the local saint Ma'rūf b. al-Faizurān al-Karkhī (d. 200 = 816) and the alleged tomb of Zubaida, the wife of Ḥarūn al-Rashīd, barely 300 yards south of it. Both mausoleums (see also I, 569) still exist and are important starting points for studying the topography of old Baghdād. In their present form they were renovated by the Caliph al-Nāṣir (575—622 = 1180—1225); but they have been frequently restored since then. On the tomb of al-Karkhī, which as early as the ixth century was one of the most popular places of pilgrimage in Baghdād and which lies in the middle of an impressive cemetery as in the 'Abbāsīd period, cf. Streck, *op. cit.*, p. 159; G. Le Strange, *op. cit.*, p. 98—100, 350; Massignon, *op. cit.* (see the *Bibl.*), p. 49, 108; Herzfeld, *op. cit.*, ii. 172—3. For the so-called grave of Zubaida see G. Le Strange, *op. cit.*, p. 100, 161 sq., 350 sq.; Massignon, *op. cit.*, p. 108 sq.; Herzfeld, *op. cit.*, p. 173. On other mosques and tombs in the west side of Baghdād see Massignon, *op. cit.*, p. 64 sq. or 94 sq.

Al-Karkh was not only the largest but also the most long-lived quarter of the western half of Baghdād. When the quarters around it had gradually fallen into ruins, it stood quite isolated — as early as Yāqūt's day for example (beginning of the xiiith cent.) — like a separate town, as it had been in the earliest period after the foundation of Baghdād. It was a mile distant from the then still inhabited quarter of Bāb al-Baṣra (in the south-east of the old round city of al-Manṣūr). In the later middle ages (cf., for example, Ibn Baṭṭūṭa in the xivth century) the name of the Bāb al-Baṣra quarter was not infrequently extended to all the quarters of western Baghdād still standing i.e. even to include al-Karkh; cf. G. Le Strange, *op. cit.*, p. 336; Herzfeld, *op. cit.*, ii. 114 sq. We may here point out that the topography of al-Karkh and its vicinity in Yāqūt is not quite in agreement with the other sources. It appears that the local knowledge of the author of the *Geographical Dictionary* at the time of writing was no longer quite reliable. Cf. G. Le Strange, p. 84, 159.

Al-Karkh is also known as a rare mint; there are coins of the reigns of the Caliphs al-Muqtadir, al-Qāhir and al-Rāḍī, dated in the years 308, 315, 318, 321, 325; cf. *Numismatische Zeitschrift*, Vienna 1893, vol. xxxiv. 321; Lavoix, *Cat. des Monn. Mus. de la Bibl. Nat.*, i. 285; *Numismatic Chronicle*, 1902, p. 272; 1919, p. 197. The wine of al-Karkh was highly esteemed; in poems of the older 'Abbāsīd period (e.g. in Abū Nuwās, Ibn Mu'tazz) it is often mentioned; cf. G. Jacob in *Oriental. Studien*, Th. Nöldeke ... gewidmet, Giessen 1906, p. 1065.

At the present day the part of Baghdād on the right bank of the Tigris, which barely makes up a third of the area of the city, is called Qarshiaka, properly (Turkish) Qarshy Yākā = the other side (lying opposite the city proper on the east bank), a reproduction of the popular Arabic *Hādak al-Djānīb*. This name has therefore no connection with al-Karkh (the contrary view is held by Le Strange, *op. cit.*, p. 66). Qarshiaka was for long

merely an insignificant suburb; but in recent years it has increased somewhat in importance and will certainly continue to do as the railway station of Baghdād is there. Since the second half of the xviiith century Arabs of the tribe of 'Ukail ('Ogēl, 'Agēl) have settled here, who with other caravan people form at the present day a considerable part of the inhabitants of this western town. Cf. thereon Černik's expedition in *Petermanns Geograph. Mitteil.*, supplement. part 44, Gotha 1875, p. 28, 30; v. Oppenheim, *Vom Mittelmeer zum persischen Golf*, Berlin 1900, ii. 74, 238; Cl. Huart, *Hist. de Bagdad dans les temps modernes*, Paris 1901, p. xi. sq., 188 sq.; Massignon, *op. cit.*, p. 99.

Reise im Euphrat- und Tigrisgebiet*, ii., Berlin 1920, p. 105, 110, 112, 114 sq. — Cf. the plans of Baghdād in G. Le Strange, *Baghdad*, plan iii. and vii. and in Herzfeld, who (probably rightly) differs somewhat from G. Le Strange on the exact localisation of al-Karkh; see also the plan of modern Baghdād (scale 1 : 10,000), prepared by the cartographical section of the deputy General Staff of the German Army in 1917.

(M. STRECK)

KARKHA. [See KERKHA].

AL-KARKHĪ, ABŪ BAKR MUḤAMMAD B. AL-ḤASAN (or AL-ḤUSAIN), was one of the most important mathematicians of the Arabs; he also calls himself AL-ḤASIB (the arithmetician). He lived in Baghdād in the time of Abū Ḥalīb Muḥammad b. Khalaf Fakhr al-Mulk, vizier of the Būyid Bahā' al-Dawla [q. v.] and his son Sulṭān al-Dawla Abū Shudjā'. The date of his death is not known but it may lie between 410 and 420 (1019—1029). The two of his mathematical works that still exist are entitled *al-Kāfi fi 'l-Hisāb* (the requisite for arithmetic) and *al-Fakhrī* (i.e. the book dedicated to the vizier Fakhr al-Mulk). The first exists in a unique manuscript in Gotha, the second in Paris, Oxford and Cairo. The Arabic text of neither of these works has yet been published but there is a German translation of the former by A. Hochheim, *Kāfi fil Hisāb des Abu Bekr Muh. b. Alhussin Alkarkhi*, in 3 parts, Halle a/S. 1878—80, and a synopsis of the second in French by F. Woepcke, *Extrait du Fakhrī*, Paris 1853. The second work is the most important next to the *Algebra* of al-Khāyāmī that has come down to us on this branch of mathematics. In it al-Karkhī closely follows the Greek mathematician Diophantus of Alexandria; for the first time among the Arabs indeterminate equations appear in this work and they are solved after the fashion of the Greek mathematicians;

whether al-Karkhī deliberately took no notice of the Indian methods or was not acquainted with them cannot be decided. In his book on arithmetic, like almost all Eastern Arab mathematicians (except 'Alī b. Aḥmad al-Nasawī, about 980—1040), he does not use Indian numerals but writes out all the figures in words.

Bibliography: There is not a separate article on al-Karkhī in any of the Arab biographical works so far published; he is only occasionally mentioned in Ibn Khallikān, ed. Cairo 1310, ii. 65; transl. by de Slane, iii. 279. Cf. also M. Cantor, *Vorlesungen über Gesch. d. Mathem.*², i. 718—729; H. Suter in the *Abhandl. z. Gesch. d. mathem. Wissensch.*, x. 84. (H. SUTER)

KARKĪSIYĀ (also KARKĪSIYĀ), a town in al-Djazīra on the left bank of the Euphrates, close to the confluence of the Khābūr, a little above 35° N. Lat. Karkīsiyā is simply an Arabic reproduction of the Graeco-Roman name (τὸ Κιρκήσιον, (τὸ) Κιρκήσιον κάστρον or Κιρκήσιον (Κιρκήσια in the *Notit. episcop.*, ed. Parthey, p. 87), Circesium, Syriac Kerkusion, Latin = castrum Circense, "the castle with the circus"; cf. Nöldeke, *op. cit.* (see *Bibl.*), p. 3. Ḥamza al-Isfahānī in Yāqūt, iv. 65, 21 sq., still knew the etymology of the place-name (Karkīsiyā, arabicised from Kirkīsiyā, from *kirkis* = arab. *ḥalba*, Hippodrome). The name Circesium for the place at the mouth of the Khābūr in any case first appeared, when a Roman military station was built there. This perhaps may have been even before Diocletian. It was, however, this Emperor who first made the place of great importance by making it a powerful fortress on the extreme frontier of the Roman Empire in Southern Mesopotamia. From this it seems quite impossible that Circesium could have been a latinisation of the Aramaic *Karkā* = town (see the article AL-KARKH), as Moritz, *op. cit.* (see *Bibl.*), p. 37, supposed; see Streck's arguments in the *Z. A.*, xxvii. 259.

A situation so favoured by nature as the mouth of the Khābūr must certainly have been already inhabited in remote antiquity. But the names of the settlements there have — as frequently happens in the East — changed several times in the course of centuries.

The old native name of the place was perhaps the Nabagath mentioned by Isidor of Charace (cf. Herzfeld, *op. cit.*, i. 174). Another name is perhaps preserved in Chabora i. e. the town on the Khābūr; see Streck in Pauly-Wissowa, *op. cit.* (see the *Bibl.*). In the inscriptions of the Assyrian kings of the ninth century (Tukulti-Ninurta II, Assurnasirpal) we find mention of a place named Sirku (Sirki) which, according to the itinerary of Tukulti-Ninurta, was the last western stage along the Euphrates on the road to the mouth of the Khābūr. Following Maspero (*De Carchemis oppidi situ*, Paris 1872, p. 13), this Sirku has been connected with Circesium and the latter name actually derived from the Assyrian one; see for example Sayce in the *Proceed. of the Society of Biblical Archaeology*, xviii. 174; S. Schiffer, *Die Aramäer*, Leipzig 1911, p. 20 and 22, and Meissner, *Babylonien und Assyrien*, i., Heidelberg 1920, p. 344; it is queried by Scheil, *Annales de Tukulti Ninip*, ii., Paris 1909, p. 48. This identification is untenable; see against it Streck in the *Z. A.*, xxvii. 289 sq. and Horn in the *Z. A.*, xxxiv. 150 sq. The site of Sirku is besides to be sought on

the right bank of the Euphrates; on the probable situation cf. Forrer, *Die Provinzial-einteilung des Assyrischen Reiches*, Leipzig 1920, p. 15. According to the above mentioned itinerary of Tukulti-Ninurta, Rummunina (on the reading see Horn, *op. cit.*, p. 151) must probably be located in the region of the junction of the Khābūr with the Euphrates.

Simply on account of the similarity of names, Circesium used to be identified with Carchemish, the great Hittite city, for example in the older Biblical commentaries, by the Jewish traveller Benjamin of Tudela, also by Ritter, *op. cit.*, x. 15 and by Chesney, *op. cit.* (see the *Bibl.*), p. 250. The lack of foundation for this identification was shown notably by Maspero in the above mentioned work and by Nöldeke, *op. cit.*, p. 1 sq. Besides, the site of Carchemish has been identified for several decades beyond all doubt in the ruins of Djirbās or Djarābis on the right bank of the middle Euphrates, a few hours' journey below Bīredjik.

In the fourth century A. D. Circesium passed into the hands of the Persians by the shameful treaty made by the Emperor Jovian (363). The Arabs next captured it in the conquest of al-Djazīra. The occupation by the Muslims, which took place, apparently without fighting, under the commander Ḥabīb b. Maslama who was sent by 'Iyād b. Ḡhannm, probably happened in the year 19 (640), not 16 (637), as many sources say. Cf. thereon al-Balādhurī, *Kitāb al-Futūḥ* (ed. de Goeje), p. 176, 2 (and cf. p. 111, 175, 178, 179); al-Tabarī (ed. de Goeje), i. 2478; Ibn al-Aṭṭir, *al-Kāmil* (ed. Tornberg), ii. 409 sq.; Yāqūt, *Muḍjam* (ed. Wüstenfeld), iv. 65 sq.; Weil, *Gesch. der Chalifen*, i. 82; Caetani, *Annali dell' Islam*, II/iii. 402, III/ii. 732, 755 sq., 799. Karkīsiyā became the capital of the district of Khābūr in the province of Diyār Bakr. On account of its very characteristic situation, Karkīsiyā is mentioned by all the Arab geographers in their descriptions of the river-courses and roads, but no detailed account of it is given. The place probably did not attain any great size in the Islāmic period either. The high percentage of Jews (500 families) found by Benjamin of Tudela in the second half of the xiith century there is remarkable; see the Hebrew text of his travels edited and translated by Grünhut and Adler (Jerusalem 1903, Frankfurt a/M. 1904), i. 49, 21 sq. and ii. 47.

In the history of the wars of mediaeval Islām we find Karkīsiyā often mentioned. When 'Abd al-Malik was engaged in his campaign against Muṣ'ab, governor of the 'Irāk and brother of the anti-Caliph 'Abdallāh b. al-Zubair, he had to devote his attention to Karkīsiyā in 71 (690), where the Kaisi Zufar b. al-Ḥārith was ruling independently and had successfully resisted the governor of Ḥimṣ, who had been sent against him. After a siege of some length, Zufar had to submit to the Caliph's army; cf. the account in Ibn al-Aṭṭir (ed. Tornberg), iv. 275 sq.; Weil, *Gesch. der Chalifen*, i. 431; J. Wellhausen, *Das Arabische Reich und sein Sturz*, Berlin 1902, p. 115—116, 119—120, 126. In the wars fought in the ivth (xth) century on Mesopotamian soil in the Ḥamdānīd epoch, we find Karkīsiyā playing a part along with al-Raḥba, a day's journey down the Euphrates from it; cf. Freytag in the *Z. D. M. G.*, x. 451—2. The rulers of Egypt repeatedly extended their power as far as Karkīsiyā, for example the Ṭulūnid Aḥmad, from

whom, however, the Caliph al-Mu'tamid's vigorous brother al-Muwaffaq was able to retake it in 268 (881); see Wüstenfeld, *Die Statthalter von Ägypten zur Zeit der Chalifen*, Abh. G. G. W., (1876), vol. xxi., part iii. 20. Several centuries later the Egyptian Sultān Baibars again advanced his frontier up to the Khābūr, when he took Karkīsiyā from the Mongols in 663 (1264); cf. Weil, *Gesch. der Chalifen*, iv. 96.

At the present day the site of Karkīsiyā is marked by a miserable village of 30–40 houses and hovels of clay and an extensive ruined site adjoining it. It is now called Busaira (Besēra; wrongly written Busaira by the Turks); older travellers give the form Abū Serai etc. Busaira is probably a corruption of Abū Serai (as, along with other authors, Moritz, *op. cit.*, p. 37, thinks); it has been with less probability taken as a derivative from Basir, the older name — recorded by Abu 'l-Fidā' for 732 (1331) — of the present Dēr ez-Zōr (see Herzfeld, *op. cit.*). According to Herzfeld, the old name Karkīsiyā still survives locally in the form Karkīsa.

Busaira lies on an irregularly shaped tongue of land formed by the Khābūr at its junction with the Euphrates and is about half an hour's journey distant from its mouth. Communication with the hinterland is broken by a ditch so that we have a well-marked peninsula. The plan of the old fortress can still be easily recognised; it forms a rectangle, the longer side of which runs along the Khābūr, while the shorter faces the Euphrates from which it is now about 1000 yards distant. Four more or less well preserved towers and a fort-like building (praetorium, serai) can still be seen, from which Moritz (*op. cit.*) suggests that the modern name Abū Serai (Busaira) may be derived. The fairly extensive town lay to the north-east of the fortress and is still marked by numerous walls of earth. Descriptions of the modern ruins are given by Sachau, Moritz and Herzfeld; plans of them are in Sachau and Herzfeld (see *Bibl.*).

The important part once played by Karkīsiyā as a trading centre as a result of the important roads which meet here — from Syria to Babylonia, Mōsul to Syria — has in modern times been to a great extent regained by the town of Dēr ez-Zōr on the Euphrates (see above, i. 936) above mentioned, a few hours' journey above the mouth of the Khābūr.

KARLOWITZ. [See CARLOWICZ].

KARLUK (KARLUGH), in early Arabic sources KHARLUKH, in Persian KHALLUKH, in Chinese KO-LO-LU, name of a Turkish people, who are mentioned in the Turkish Orkhon inscriptions and in the Chinese *T'ang Shu*; cf. E. Chavannes, *Documents sur les Tou-kiue (Turcs) occidentaux*, St. Petersburg 1903, Index. The Karluk attained some political importance after 766, when, after the decline of the empire of the Western Turkish Khāḡāns, they occupied the valley of the Ču [q.v.]. Their princes did not assume the title of Khāḡān (Kaghan) but only that of Yabghu (Arabic Djabghūya) al-Tabarī mentions a Djabghūya of the Karluks in Tōkhāristān on the upper Āmū Daryā as early as the year 119/737. With the Djabghūya al-Kharluḡhī (*op. cit.*, ii. 1612, 16) corresponds the Djabghūya al-Tukhārī (ii. 1604, 3 and 1612, 9). At the present day an affluent of the Surkhan is still called Qalluk or Karluk; cf. W. Barthold, *Die alttürkischen Inschriften und die arabischen Quellen*, St. Petersburg 1899, with reference to W. Radloff, *Die alttürkischen Inschriften der Mongolei*, second series, p. 27, note 1. According to al-Yā'qūbī, *Ta'rikh*, ed. Houtsma, ii. 479, the Djabghūya of the Karluks adopted Islām in the year 162 (778/779); cf. J. Marquart, *Chronologie der alttürkischen Inschriften*, Leipzig 1898, p. 25; it should however be observed that the same fact at the same date is narrated concerning many other rulers, which makes it suspicious. al-Gardīzī (in Barthold, *Turkestan w. epokhu mongolskago nashestwiya*, ii., St. Petersburg 1900, p. 207) mentions an invasion of the Djabghūya in Farghāna in the year 792/3. In the reports of the Arab geographers of the 10th/11th century the Karluks are still infidels. According to Ibn Ḥawkal (*B.G.A.*, i. 11, 17 sq.) their territory extended 30 days' journey from the frontier of Farghāna. According to the Persian sources, however, their territory was not so extensive (cf. especially the still unpublished *Hudūa al-'Ālam*; al-Gardīzī in Barthold, *Otket w. poadke w. Srednyuyu Aziyu*, St. Petersburg 1897, text, p. 81 sq., transl. p. 104 sq. and 'Awfi in Barthold, *Turkestan*, i. 99 sq.; Marquart, *Osttürkische Dialektstudien in der Abh. G. W. Göttingen*, new series, xiii./i., p. 40 sq.). In so far as they were the nearest neighbours of the Muḥammadan territory, the Karluks, more than the other Turks, were influenced by Persian civilization. They even differed in their features from the usual Turkish type. Maḥmūd al-Kashgharī, *Diwān Lughāt al-Turk*, Constantinople 1915–1917, comprises the Karluks and the Ghuzz under the common name of Turkomans.

It cannot be ascertained with certainty what was the relation between the dynasty of the Illek Khāḡāns [q.v.] and the Karluks. At any rate the Karluks are often mentioned in the history of this empire, especially in Samarkand, as unruly Praetorians just like the Ghuzz in the Saldjūq empire. In al-Djuwainī's report (*Ta'rikh-i Djahān Gushā*, ed. Mirzā Muḥ.

al-*Kazwīnī*, Gibb Memorial Series, 1912—16, ii. 87) concerning the conquest of Central Asia by the *Kara Khitāi* [q. v.], the latter appear as the allies of the *Khān* of *Balāsaghun* [q. v.] against the *Qarluqs*; the *Kara Khitāi* of *Samarkand*, on the other hand, are the allies of the *Qarluqs* against *Sultān Sandjar* (cf. especially al-*Rāwandī*, ed. Muḥ. Ikbāl, Gibb Memorial Series, new series, ii., p. 172). Later the *Kara Khitāi* induced the *Qarluqs* in *Samarkand* to abandon their warlike life and to take to agriculture. According to Ibn al-*Athīr*, this took place in 559 (1163/64) (*Kāmil*, ed. Tornberg, xi. 205), but this date seems to late; cf. W. Barthold, *Turkestan*, ii. 358. In the second half of the xiith century the *Qarluqs* are mentioned for the last time (by al-*Kātib al-Samarkandī*; cf. the text as edited by Barthold, *Turkestan*, i. 71 sq.) as enemies of the *Khān* of *Samarkand*; in the history of the xiiith century they no longer appear. A *Qarluq* state N. of the *Ili* with the capital *Qayālīgh* is however still mentioned; cf. especially *Ta'rikh-i Djahān Gushā*, i. 56 sq.; other reports in Barthold, *Turkestan*, ii. 433 sq., 477. The son of the *Qarluq* prince Arslān *Khān*, who had submitted to the *Mongols* and taken part in the expedition against the *Khwarizmshāh* *Muhammad*, was given in fief *Ūzgand* in *Farghāna* by the Great *Khān* *Mangu* (1251—1259; cf. *Ta'rikh-i Djahān Gushā*, i. 58); there is no later mention of this dynasty. To the same division of the *Qarluqs* perhaps belonged the dynasty of the princes of *Almalīgh* (cf. the art. *KULĎJA*). The name *Qarluq* seems later to denote an *Özbeq* family only.

(W. BARTHOLD)

ҚАРМАТИАНС (ҚАРМАТИ, plur. ҚАРМАТИА: Carmathians). In the strict application of the word, the name was given to the rebel federations of Arabs and "Nabataeans", which were organised in Lower Mesopotamia after the servile war of the *Zandj* [q. v.] from 264 (877) and based on a system of communism into which initiation was necessary; active propaganda extended this secret society among the masses, peasants and artisans; — in al-*Aḥsā*, where they founded a state independent of the Caliph of *Baghdād*; — in *Khurāsān*, in *Syria* and in *Yemen*, where they formed lasting hotbeds of discontent.

In the broader sense, the name *Qarmāṭian* means the great movement for social reform and justice based on equality, which swept through the Muslim world from the ninth to the twelfth centuries of our era; this movement, captured and controlled by an ambitious family, the *Ismā'īlī* dynasty (cf. *ISMĀ'ILĬYA*, *SABĬYA*), who founded the *Fāṭimid* anti-caliphate in 297/910, became abortive and finally succumbed with this dynasty before the counterstroke of the *Crusades*.

The movement was characterised, from the point of view of knowledge, by the adaptation of the Arabic language to certain technical achievements of foreign origin, especially *Hellenistic* (Neo-Platonic, pseudo-Hermetic and "Sabaeen" writings); from the political point of view, by the exploitation of the 'Alid legitimist tradition on behalf of a conspiracy, carried on in a strict secrecy, in which the name of the supreme leader was never pronounced; from the point of view of worship, by the use of an allegorical and methodical catechism, *Qor'ānic* in origin, adapted to all creeds, to all races and all castes. The movement was based on reason,

tolerance and equality, with a system of graduated initiation and the ritual of a gild which — encouraging the rise of the trade gild movement (see the art. *ŞİNF*) and universities — seems to have reached the West and to have influenced the formation of European gilds and freemasonry.

I. Etymology and early history.

The etymology of the word *qarmāṭ* (not *kirmūt*) is disputed. It appears as a descriptive adjective in the name of the first leader of the insurrection, *Ḥamdān Qarmāṭ* (cf. 'Alī b. *Qarmāṭ*, a heretic quoted by the *Nuṣairī* author *Maimūn Ṭabarānī*). *Vollers* has connected it with the Greek γράμματα, but it is more probable that we should see in it a borrowing from the local Aramaic dialect of *Wāṣīt*, where *qurmatā* to this day means *mudallīs* (Arabo-Aramaic dialect of the *Midān*, cf. *Anastase*, in *Machriq*, x. 18, p. 857). From the year 255 (868) we find mentioned in the same region, along with the *Furātīya*, a corps of *Qurmāṭiya* among the rebellious troops of the *Zandj* (al-*Ṭabarī*, iii. 1757; cf. iii. 1749: *Rāshid Qurmāṭī*).

The name *Qarmāṭ* in palaeography means a particular kind of *naskhī*; in addition there is a special secret *Qarmāṭian* alphabet used in the *Yemenī* texts recently studied by *Griffini*.

The *Qarmāṭian* insurrection was begun by *Ḥamdān* in the neighbourhood of *Wāṣīt*; in 277/890 he founded a *dār al-hidjra* (an entrenched place of retreat) east of *Kūfa* for his partisans, whose various voluntary contributions supported the common chest: these contributions were alms at breaking the fast (*ṣakāt al-fiṭr*), for the right to use the place of refuge, a fifth of all income (*khums*), right of all participation in the agapes (*bulgha*; cf. the art. *NUṢAIRĬ*); community of all objects of general utility (*ulfa*) was prescribed. These details, which we know from *Sunnī* sources, are perhaps accurate; at the agapes they ate "bread of Paradise"; this detail which we find in the contemporary trial of al-*Hallādī* is perhaps simply a transference of the consecrated bread (*pehta*) used among the *Mandaeans* of *Wāṣīt* (*mughtasila* = *nāṣṣrāyā*; cf. al-*Ṭabarī*, year 278 (891), on the *Qarmāṭian* *Faradj* b. 'Oḥmān of *Naṣrāna*; or to be pointed *Naṣrāyā*).

We find along with *Ḥamdān* his brother-in-law 'Abdān (d. 286/899), author of a manual of initiation for the seven degrees (*balāghāt ṣab'a*). Both seem to have been dependent on leaders whose identity remained a secret, living outside of *Sawād*, the *Ṣāhib al-Zuhūr*, who is said to have invested *Ḥamdān*, and the *Ṣāhib al-Nāqa*, who had dismissed 'Abdān and put in his place *Dhikrawaih al-Dindānī*. *Dhikrawaih* in 288/900 gave the signal in the desert of *Syria* among the *Banū 'Ulaīs* for the general *Qarmāṭian* rising — so long prepared (expected in *Khurāsān* for the year 290/902) — and proclaimed as leader the *Ṣāhib al-Nāqa*, under the *Ismā'īlī* regnal name *Abū 'Abd Allāh Muḥammad*, with the dynastic name of 'Fāṭimid'. He was killed in 289 (901) at the siege of *Damascus* and his place was taken by his brother the "Ṣāhib al-Khāl", who as ruler took the name *Abū 'Abdallāh Aḥmad*, and who was captured and executed at *Baghdād* in 291 (903). The *Qarmāṭian* movement in Lower Mesopotamia, drowned in blood, ceased to be an active factor in politics in 294 (906) with the death of *Dhikrawaih*.

In time the movement regained strength in

al-Aḥsā, where the *Ṣāhib al-Nāqa* had sent as his representative Abū Saʿīd Ḥasan b. Bahrām al-Djannābī in 281 (894); with the support of the Rabīʿī tribe of the ʿAbd al-Kāis, al-Djannābī seized the whole of al-Aḥsā (286 = 899) and made it an independent state, the bulwark of Ḳarmaṭian power and the terror of the Caliphate of Baghdad. His son and successor Abū Ṭāhir Sulaimān (301—332 = 914—943) began to lay waste Lower Mesopotamia, cut the pilgrim routes and finally seized (Mekka on the 8th of Dhu 'l-Hijja, 317 = Jan. 12, 930), from which he carried off the Black Stone six days later to take it to al-Aḥsā. Abū Ṭāhir, like his father, was only the emissary of a secret organisation, its "commissary for foreign affairs" for al-Aḥsā; while waiting the opportunity to enthroned the expected Imām there, he appointed a representative council over it, the *Sāda* (i.e. the elders of the tribe) for the political administration of home affairs. This organisation was still in existence in 422 (1030) after the decline of the military power of the Ḳarmaṭians; it seems to have maintained local autonomy down to the xviiith century, when the revival of propaganda took the form of a new Ismāʿīlī dynasty (Makramis). The capital was al-Muʿminiya (new name given to Ḥaḍjar; on the site of the present Hufuf).

In Yemen, Ḳarmaṭian propaganda, directed from 266 (879) by Maṣṣūr al-Yaman (title of Ibn Ḥawshab) with the *dar al-hidjra* near ʿAdanāʿa, failed against the resistance of the local Zaidī chiefs and could only found some little principalities, the Sulaiḥis of Ṣanʿā and the Makramis of Naḍīrān (texts studied by Griffini).

In Ḳhurāsān the movement began in 260 (873) at Raiy with Khalaf; then it spread to Marw al-Rūdh and Ṭalākān in Džūzdžān, where the Amīr became a Ḳarmaṭian adept. Dailam which was to become a bulwark of the Ismāʿīlī dynasty (see the art. ALAMŪT, ASSASSINS), was next taken for the cause, finally Muḥammad al-Nasafī al-Baraḍhāʿī (d. 331 = 942) undertook the conversion of the Sāmānid rulers. His execution destroyed the political hopes of the party: the small Ḳarmaṭian centres of eastern Ḳhorāsān — if we except the works of Naṣīr-i Ḳhusraw — only produced a moderate literary activity (texts studied by Iwanow).

In Syria the centre seems to have been Salamiya; but, except for some biased Sunni records, we do not know what happened there after the insurrection of 288 (901), nor the part played in it by the future ʿUbaid Allāh, the first Fāṭimid Caliph. Syrian Ḳarmaṭianism is still dormant, without showing any signs of activity nor of contact with the Druzes, who are its distant brethren.

The small local bodies, among which Ḳarmaṭian manuscripts have survived down to our days (for a list of them see the art. ISMĀʿILĪYA, ii, 549 sqq.), have not been the scene of any serious doctrinal activity apart from the writings of the Syrian Rashīd al-Dīn Sinān (xivth cent.), the *Dābistān* of the Indian Maḥmūd Fānī (Mobed *Shāh*) (xviith cent.) and the Turkish and Persian texts of the Ḥurūfis (xvth—xviith cent.).

II. The position of the Ḳarmaṭians relative to the Fāṭimids.

The general tendency of Ḳarmaṭian doctrine was to consider ʿAlid legitimism as a means rather than an end. The Imāmate, the supreme authority, is not a hereditary monopoly transmitted in a dynasty; it is an intellectual characteristic, a divine

investiture, an imperative mandate (*ṣūrat al-amr*) conferred (*tafwīd*) on the new holder of the title from among the initiates by a sudden illumination of his intellect, which makes him "substituted" or "spiritual son" of his predecessor. Such is the justification, given in the formula of initiation in the Druze books, for these alleged "usurpations" of genealogy, which are the rule in the annals of the Ḳarmaṭians from ʿAbd Allāh b. Maimūn down to Ḥasan ʿalā dhikrihi 'l-salām. And this is the meaning of the definitions of the imāmate given by adepts like Ibn Masarra, Ruʿīnī, Ibn Hānī and the *Ikhwān al-Ṣafāʿ*. Indeed, when the *Ṣāhib al-Nāqa* in 288 (900), and ʿUbaid Allāh in 297 (909) had assumed a Fāṭimid dynastic title, neither the one nor the other plainly indicated their genealogical connection with the ʿAlid Ismāʿīlī line (cf. al-Makrizī, *Ittīʿāz*, ed. Bunz., p. 7—11). And if this claim was of importance with respect to the public, in the opinion of their enemies, it seems that it hardly interested those initiated into the true doctrine, who expected above all else a chief, possessing a special divine appointment, of the "intellectual order", whether he was ʿAlid or not.

The official version of the ancestry of the family of ʿUbaid Allāh compiled by his Ḳāḍī, the Māliki al-Nuʿmān b. Abī Ḥanīfa al-Tamīmī (born 259, d. 363 aged 104), is a laudatory and lying composition specially written in reply to a Buwaihid attack. The versions of two Sunni anti-Ḳarmaṭian pamphlets by Muḥammad b. Rizām al-Ṭāʿī, president of the "Maẓālim" in Baghdad in 329 A. H., and by Muḥammad Aḥḥ Muḥassin Ibn al-ʿAbid, an ʿAlid of Damascus, who died about 375 A. H., are hardly of any more value. S. de Sacy, Guyard and de Goeje thought they could rely on them as Ibn al-Nadīm, al-Nuwairi and al-Makrizi had done. But a result of a comparison with the statements contained in the biographical collections (*ṭabaqāt*) of orthodox Imāmi *muḥaddithūn*, in which the early Ḳarmaṭian propagandists have a prominent place, shows that there are serious errors in the exposé by these two opponents. Maimūn Qaddāh (d. about 180 A. H. at latest) was not a "Bardesanian"; he was a client of the Maḥzūmī clan (Ḳuraish), a native of Mekka, a well-known theologian, the official *rāwī* of the fifth and sixth Imāms, Baḳīr and Sādiq. His son ʿAbd Allāh, who was official *rāwī* of Sādiq (which provoked the irony of the poet Abū 'l-ʿAlāʾ al-Maʿarri), did not die in 250 A. H. but in 210 at latest, "in prison in Kūfa under al-Maʿmūn"; Dīndān (and not Zaidān) is the soubriquet of a known Imāmi author, Aḥmad b. al-Ḥusain al-Ahwāzī, who died about 250—270 A. H., etc. In these circumstances the statements made in the two Sunni sources mentioned regarding the assassination of ʿAbdān, the illegitimacy of ʿUbaid Allāh and the usurpation of the soi-disant "son" of Dhikrawaih in 288—291 A. H. have to be received with caution.

After the proclamation of the Fāṭimid Caliphate in the Maghrib the general attitude of the Ḳarmaṭians in al-Aḥsā as in Yemen and in Ḳhurāsān was one of expectancy, which the assassination of the *Ṣāhib al-baḍīr* (267 = 909) by ʿUbaid Allāh amply justified. Let us take al-Aḥsā for example: Abū Saʿīd had from the first paid the fifth to the *Ṣāhib al-Nāqa*; after various evasions, which the intrigues of the court of Baghdad do not quite explain, Abū Ṭāhir sent it to al-Kāʿim; but with so little conviction of his legitimacy, that he welcomed and enthroned in 319 (931) as the

expected Imām a madman, Abu 'l-Faḍl al-Zakari al-Ṭammānī (a kind of Heliogabalus, soon put to death). The Black Stone was restored to the Meccans in 340 (951) by order of the Fāṭimid Caliph al-Manṣūr; but in 360 (970) the Ḳarmaṭian chief Ḥasan b. Aḥmad thought it no breach of his oath of initiation to give his Buwaihīd allies a document, which was solemnly read at Damascus, testifying to usurpation of civil authority by the first Fāṭimid Caliph. In 422 (1030) the Druze writer Muḫtana^c in vain urged the Ḳarmaṭian *Sāda* of al-Aḥsā to rally to the cult of Fāṭimid Ḥakim.

On the other hand there are abundant proofs of the adoption of Ḳarmaṭian doctrine by the Fāṭimid dynasty. It was at the *dār al-ḥijra* of the Maghrib, Iḳīdjīn (or Guedjal) founded by the Ḳarmaṭian *Ṣāḥib al-baḍr*, that 'Ubaid Allāh took refuge before his proclamation as Caliph. The oraisons of Mu'izz (publ. by Guyard) are pure Ḳarmaṭian in style as well as the ritual of the lodge of initiation (*maḥwil*; the present masonic term is *maḥfil*) which he founded in Cairo. The Druze religion is simply a Ḳarmaṭian heresy. The introduction by 'Ubaid Allāh of the *Ṣalāt 'ala 'l-Nabī* at the end of the *adhān* (Ibn Ḥammād, in the *J. A.* of 1855, p. 542) is to be traced to the part of *nāṭīk*, recognised in the Prophet by the Ḳarmaṭians.

III. The Ḳarmaṭian Doctrine.

It is no longer possible to rely, as used to be done, on the accounts of Ḳarmaṭian doctrine given by the Sunnī anti-Ḳarmaṭian writers on heresies; al-Mas'ūdī has judiciously said of the latter that they contradict one another and that the Ḳarmaṭians themselves recognise nothing of their doctrines in them. Except for a few lines that are accurate in the *Tanbīh* of al-Malaṭī (d. 377 = 987) we have to come down to the xiith century of our era to find a conscientious author, al-Shahrastānī, able to give us authentic Ḳarmaṭian fragments, some quite old (of Maimūn Ḳaddāḥ and Aḥmad Kaiyāl) from original sources, which he does not mention, but which Fakhr Rāzī (*Masā'il 'aṣḥr*) has identified with the *Fuṣūl arba'a* of Ḥasan Sabbāḥ (on Sabaeism: ii. 47—155 of the Cairo edition of 1317) and the *Sunwān al-Ḥikma* of Abū Dja'far Sidjī b. Būya († 370/980) (on Hellenism: ii. 155—193, of the Cairo edition of 1317).

To deal with the problem more minutely one must search the polemical literature of the Imāmis and particularly the apologetic treatises in which the various extremist sects endeavour to convert one another, starting from their common technical terms. Lastly the encyclopaedic collection of the *Iḫwān al-Ṣafā*, which has not yet been thoroughly studied since Dieterici, is invaluable for the synthetic understanding of Ḳarmaṭian thought.

According to them, the world is a sum total of phenomena which repeat themselves in cycles, playing and replaying the same drama to us time after time: — this spectacle, presented to intelligences (invariable in number) so that they may be illuminated, is the gradual disappearance of the material veil, perceptible by our senses, a multi-form and transitory mirage; then the intelligences are born (*ḫalq ṭhānī*) by gaining consciousness of a pure intellectual evidence of a unique and impersonal thought, which is divinity itself.

The divine essence, in fact, outside of which nothing exists, is only the evidence of a single idea, an authentication of indifferentiated intelligibility and devoid of all content; the *via remotionis*

(*tanẓīh*) of the Ḳarmaṭians, still more rigorous than the *taṭīl* of the Dījahmiya, denies all divine attributes and postulates an absolute monism of fundamental intellectualism.

True worship consists in knowing how to recognise — as the result of a graduated initiation — what have been the stages of the creative evolution of the universe outside of God; what exactly leads the initiated by a process of inverse gnostic involution to forget these stages and to become absorbed in God.

a) Creative evolution: — the divine essence or supreme light (*nūr 'ulwī*), alone in the beginning and in the end, gives forth first of all the *nūr shā-shā'ānī*, "glistening" and "victorious (*kāḥir*) light" which then engenders the universal intelligence (*'aql kullī*) and the soul of the world (*nafs*); the latter under various modes produce human intelligences (those of the prophets, imāms and elect; the others are only phantoms of nothingness). The *nūr shā-shā'ānī* in the second degree gives forth the *nūr ḡulāmī* "tenebrous light"; that is matter, passive, "vincible" (*maḥḥūr*), destined to disappear; it appears in various modes as stars at the skies (*aflāk*), as perishable bodies on earth.

b) Gnostic involution: — the intelligences of the prophets, imāms and their adepts are sparks of "sparkling light" suddenly illuminated in the midst of the tenebrous light, blind and unreal matter like reflections in mirrors, following the cyclic intermittances of the initiatory illumination; these sparks shine, on becoming conscious of their divine identity, in a liberating intuition, in which, losing all individuation, they find themselves "delivered from the five tyrants": — the sky, which makes day alternate with night, nature, which gives desires and regrets, law, which commands and forbids, the state, which controls and punishes, necessity, which forces one to daily labour."

c) The immaterial succession of initiatory investitures (*nukla, tafwid*). Initiatory illumination makes the separated intelligences cohere, divine sparks individualised for a moment, following two convergent hierarchic series; decreasing, of the initiators (*nāṭīk, ṣāmit, bāb*); and increasing, of the initiated (*dā'ir, ḥudjja, imām*). Historically the list of their titulars was classed in cycles of limited number; the intelligences, in invariable number, "transmigrate" from cycle to cycle (without "finding" again "their" personality, since they have only the appearance of individuality).

d) Planetary denominations of the cycles of transmigration (*akwār, adwār, ḳirānāt*). The cycles just mentioned are named from their material veils, i.e. from the planetary revolutions, periods and conjunctions. This is a very fine point which must be appreciated. The Ḳarmaṭians are nominalists; they do not believe that the name determines the thing and they unanimously assert that the planetary bodies have no directing influence on the intelligences; but the divine volition (*kun*) which regulates the intermittances of the initiatory illumination makes them coincide inevitably with the astral periods which form the tracing, the shadow cast by these cycles of illumination, and provides the horoscope of intelligences which form part of it (change of cults, *milal*, every 960 years, of empires every 240 years, of sovereigns every 20 years, of epidemics every year, of genethliac subjects every

month and every day). When the moment comes for the final cassation of every action (*bikār* = *daidjūr* of the Hadīth, *ṣaiḥūr*) cycles and periods will cease together.

e) The degrees of individual initiation. Initiatory illumination is transmitted to the adept by degrees as in the ancient initiations (Greek, Manichaean) and in modern freemasonries. It emanates from the divine volition following a method of irrefutable and infallible authority (*ta'lim*, whence the name *ta'limiyya* given by al-Ghazālī to the Karmaṭians). The adept submits himself for it (in the fourth degree) by a declaration — a solemn contract with a clause (*ṭalāk mu'allak*) of triple repudiation of his favourite wife if he should reveal the secrets (*ifshā' al-sirr*, which constitutes Karmaṭian adultery, *zinā*). Its formula has been studied by Goldziher (cf. the art. SURAIḌIYYA). We find it first used during the revolt of the Zandj (al-Tabarī, iii. 1750) and Usāma alludes to it in his *Memoirs*. The Sunnī heresiographers record 3, 5, 7 ('Abdān and Ibn Hamdān) or 9 degrees; but the names which 'Abd al-Kāhir al-Baghdādī gives them are doubtful: *tafarrus*, diagnostic of the future adept, described as "fertile" or "sterile" earth, *ta'nīs* (taming), *tashkik* (apprenticeship to methodic doubt), *ta'lik* (taking of the oath), *raḥṭ*, *tadlis*, *ta'sīs*, *khaṭ'* and *salkh*. The programme for the five high grades (secret) is little known. The "letter of 'Ubaid Allāh to Abū Ṭāhir", an apocryphal curiosity (recalling certain modern anti-masonic productions), analysed by al-Baghdādī, puts in various maxims of cynical impiety, among others the mediaeval parable *De Tribus Impostoribus* (the earliest reference to it; cf. *R.H.R.*, 1920). Al-Makrizī's reference to the *maḥwīl* of Cairo (transl. by de Sacy and Casanova) shows that initiation simply amounted to showing that the exterior rites (*ṣāḥir*) of all the revealed cults conceal under equivalent and inadequate allegories the same hidden meaning (*bāṭin* whence the name *Bāṭiniyya* of the Karmaṭians), purely negative and without mystery; initiation being reduced to teaching of the use of wholly speculative philosophical reasoning, which propounds without practical differentiation the antithesis, opposite conceptions like "law" and "breach of law", "*tawḥīd*" and *talḥīd*"; cf. DRUZES). But this is only, as we have seen, one aspect of the fundamental intellectual monism of the Karmaṭians.

IV. Its Imāmī technical vocabulary; its criticism of the other extremist Shī'ī sects (*Ghulāt*).

Terrified by the wide and rapid spread of Karmaṭian doctrines in the most cultivated centres of the Muslim world the Sunnī heresiographers strove to discover and denounce an anti-Muslim offensive in it, originating in a foreign religion — Mazdeism, Mazdakism (*Khurramiyya*), Manichaeism —, in racial hatred, setting Iranian against Arab, the tribe of Rabī'a against that of Muḍar (*Shu'ubīya*). They quoted parallelisms which are not very convincing.

The hypothesis of the Sabaeen origin of the Karmaṭians, which is also found among them, is more attractive. It seems to have been put forward by the Karmaṭians themselves with a view to gaining citizenship in the Sunnī Muslim state, presenting their syncretism as the heritage of Abraham (*ḥabliyya*) from these mysterious "Sabaeans" mentioned by the Qur'ān. Such is probably the leading idea in the Sabaeen tale developed

among others by al-Shahraṣṭānī in some pages borrowed without acknowledgment from the Karmaṭian Ḥasan Ṣabbāḥ. The documents hardly permit us to connect effectively the Karmaṭians with the pseudo-"Sabaeans" of Ḥarrān or Wāsiṭ.

In reality an examination of the Karmaṭian technical terms shows that this doctrine was formed before the end of the second century A.H. in the Imāmī circles of Kūfa. The Karmaṭians retained, embedded in their system, various series of Imāmī special terms, which we find again among other extremist sects, Ishāḳiyya, Sharīfiyya, Namīriyya (Nuṣairiyya), Khasakiyya, Hallāḍiyya; e.g.: *nūrānī*, *nafsānī*, *ruhānī*, *djismānī*, *sha'sha'ānī*, *wahādānī*, *nāmūs*, *lahūt*, *nāsūt*, *djabrūt*; *faiḍ*, *ḥulūl*, *zuḥūr*, *djawiṭān*; *talḥwīn*, *talḥwīḥ*, *ta'yīd*; the mystic sense of the 28 letters according to the *djāfr*. The last orthodox Imāmī Muḥaddithūn received into the Karmaṭian *isnād*'s are Mufaddal b. 'Omar and Muḥammad b. Sinān al-Zāhirī (also admitted by the Nuṣairis).

The first clearly Karmaṭian author is Abu 'l-Khaṭṭāb Muḥammad b. Abī Zaynab al-Asādī al-Kāhilī (d. 167 = 783 at Kūfa); he substituted in place of the "personifying" Korānic exegesis of the early Shī'is an abstract allegorical exegesis; in cosmogony he replaced the use of letters (cf. Mughīra) by their corresponding numerical values (mystic meanings of *djāfr*); it was he also who seems to have invented the pledge guaranteeing the secret of initiation: for the Khaṭṭābiyya, his adepts, are the only Imāmī sect whom al-Shāfi'ī (*Kitāb al-Shahādāt*) will not allow to take the oath on the ground that they make of the *taḳiyya* (negative practice of secrecy) a positive precept justifying false testimony (to keep a secret).

After him, Abū Shākir Maimūn al-Qaddāh al-Makḥzūmī (d. towards 180 = 796) gave definite dogmatic form to the Karmaṭian doctrine of emanation; he substituted the abstract first principles for the five *aitām* (deified historical personages), demiurges of the first *Ghulāt*. He denies that the divine essence has any attributes and defines the "eternal Qur'ān" as a pure divine illumination in intelligences.

If one compares Karmaṭian dogma with the preceding Imāmī systems, their naively "materialising" (*tadjiīm*) and "personifying" (*tashakḥḥuṣ*) notions and their idolatry of 'Alī and his descendants, we see at once after the connection a transposition: here they are intellectualised, objectified in abstractions. Finally the Karmaṭians, considering only rank and the external role played, restore to Muḥammad priority over 'Alī. Not that they in turn deify Muḥammad — it is simply his predestined role of pre-eternally foreseen messenger or herald (*nāṭīk*) that they look at. They are (to use the exact term) not *Muḥammadiyya* but *Mīmīyya* (the letter *mīm* means in *djāfr* the name, *ism*: that is to say the mission of onomaturge, *nāṭīk*, devolved on the prophet), in opposition to the *'Ainiyya* (the letter *'ain* in *djāfr* means the original sense, *ma'nā*, whence: the hidden meaning, the "silent" (*ṣāmit*) role of "tacitly designated" chief, devolved on 'Alī), like Dūsī and Nakḥa'ī.

During the polemics that went on in Kūfa between Imāmī writers down to the third century A.H. the Karmaṭian authors, Abu 'l-Khaṭṭāb, Faiyād and Nahikī, were "Mīmīyya"; they place Muḥammad (*nāṭīk* = *'aḳl* = *ḳā'im* = *naḥī*) above 'Alī (*ṣāmit* = *nafs* = *walī* = *waṣī*). The Nuṣairī Kha-

sibi, modifying the doctrine of the 'Ainiya to suit the exigencies of controversy, maintains 'Alī (*mānā* = *imām*) above Muḥammad (*ḥidjāb* = *ḥudjja*) and Salmān (*ism* = *bāb*). To the Nuṣairi arguments that Muḥammad is the "veil" uncovering the divine appearance called 'Alī, the Druzes reply with good Karmaṭian logic that a "veil" only covers and that Muḥammad has given more perfect evidence of God by his words than 'Alī by his silence. Internal sanctity is set aside in favour of the gift of prophecy and sinlessness neglected for infallibility.

It is the same polemical attitude which dictates to Maimūn Qaddāh the order in which he associates his two first principles (followed in that by Kaiyāl, Baradhaṭ, the Druzes and Ḥasan Šabbāḥ); first the intellect ('*akl* = *nafs nūṭika* = *awwal* = *sābiḳ*) and secondly the soul (*nafs* = *nafs ḥaiwānī* = *thānī* = *tālī* = *lāḥiḳ*). Then comes the "fiat" (*kun, djad*), the central sign of divine intervention, before the second pair of principles, simply reduplication of the first among the Druzes ('*akl* and *nafs*) and in Ḥasan Šabbāḥ (*fath* and *khayāl*). The identification of the five Karmaṭian first principles with those of the Hellenistic philosophers, like the physician Rāzī (intellect, soul, matter, space and time) does not seem to be primitive and represents a later effort at syncretic conciliation.

In psychology the Karmaṭians deprive each human individuality of all definitive reality; his body being removed *a priori* like an unreal veil, there only remains a momentary principle of individuation to which they refuse any name implying internal finality, like *rūḥ, nūr, ma'nā* (employed by the early Imāmīs); they substitute for it the term '*akl* "intelligence", indicating a simple causation on the part of God, "ab extra", a role of an observer who takes no actual part in what he sees.

They criticise the gross materialism of the first Ghulat (and of the Nuṣairis) who believe that souls are fallen stellar bodies, fallen from the higher heaven (of which the sun or the moon is the threshold) and destined to return there by that same predestined attraction which caused them to adore the divine apparitions imperfectly seen in the course of the cycles of bodily transmigration (*tanāsukh*). For the Karmaṭians there is no corporeal transmigration even for the damned (they have only been phantoms) in the bodies of animals and we cannot even speak of true spiritual "transmigration" for the elect, since the immortality of the intelligence is only impersonal whether it assumes modes as "sparks" or not.

Contrary to the Nuṣairis, who refuse initiation (and immortality) to women, the Karmaṭians admit them (*risālat al-nisā'* in the Druze canon).

The Karmaṭians profess an integral nominalism; the letters of the alphabet are only intellectual symbols; the name is the mask of the thing, not its manifestation (Nuṣairi view); each symbol ought to be destroyed to permit access (*taḥṣīl*) to the pure Idea. The obligatory duties of religion etc. are only supererogatory counsels leaving free play to all human faculties (*ibāḥa*).

V. Its connections with Hellenistic philosophy.

Karmaṭianism preserved from its place of origin an old stock of primitive Islāmic terms, Ḳorānic and others, in which it retained the archaic special meanings they had before the third century A. H.

(e.g. *amr, ṭūl, 'ard, kun, sam', shāhid, balāgh, ghāya, yaḳīn, istiḳāma, ikhlāṣ, riḍā, taslīm*). From the same period it retained an ignorance of certain problems, which were only put forward later, among the Imāmīs after Ibn al-Ḥakam, among the Sunnis after Naẓẓām, such as the perception of sensation, the conceptual process, the modality of a harmony between the movements of the limbs and the intentions of the heart which accompany them. The Karmaṭians on these three points profess a kind of fatalism, a blind occasionalism, something like that of Djahm.

They, however, like the Mu'tazilis in another field, marked the very first awakening of Muslim philosophic reflection at its contact with Hellenistic science: by the systematic employment of the word '*akl*, intelligence, to designate the principle of individuation which constitutes man. This brought them not only to the abstract allegorical exegesis analysed above, in which dialectic gives place to logic, but also to the direct acceptance of scientific bases, of natural constants — viz. consideration of arithmetical properties (numbers 3, 5, 7, 9, etc.) permitting the calculation of the astronomical calendar (new-moon festivals: against the Sunnis) —, of the four elements and the "humours" (*ṭabā'ī'*), specific remedies (*ʿaḳāḳīr*), the foundation of medicine.

Without going further or assimilating the whole corpus of Hellenistic philosophy, as the *Ikhwān al-Šafā'* attempted to do, Karmaṭianism prepared many minds to understand it; it presented to them as divine prophets the ancient philosophers of Greece: Pythagoras, Empedocles and Plato, the masters of hermetism (Agathodaemon, etc.), stimulating in consequence its adepts to read works coming from these foreigners as freely as the Ḳur'ān.

The same licence was to a less degree allowed for certain Persian sources (books of Djāmāsp; the "amshapands", being regarded as prophets) and much later for Hindu sources also.

VI. The role of Karmaṭianism in the evolution of the Islām.

The influence of Karmaṭian authors, especially of the encyclopaedia of the "Faithful Friends" (*Rasā'il Ikhwān al-Šafā'*), on diverse Muslim thinkers belonging to the Sunna or to orthodox Imāmism has been considerable.

In philosophy, it inspired the political theory of idealistic imāmism (*istiḍād lil-nubuwwa*) of al-Fārābī and Ibn Sīnā (Rāzī had polemics on this subject with Kaiyāl), the emanation theory of the ten '*uḳūl* (Ibn Sīnā). The famous parable of the self-taught (Ḥaiy b. Yaḳẓān) would also be of Karmaṭian origin (cf. the art. DRUZES).

There were in the same way various infiltrations into dogmatic theology: abstract allegorical exegesis of the Ḳur'ān, *tanāsukh* of Ibn Ḥaṭīṭ and Ibn Yanūsh, and the *nūr Muḥammadi*.

In mysticism, it is still clearer from Sahl al-Tustarī [q.v.] to Suhrawardī of Aleppo (*nūr kāhir*). The mystics who attack Karmaṭianism use its vocabulary (al-Ḥallājī, al-Tawḥīdī, al-Ghazālī; [q.v.]). Ibn Taimiyya rightly pointed out the adoption of Karmaṭian theses in works of the Andalusian school of Sunni mystics, Ibn Barradjān, Ibn Ḳasīr, down to their pupil, the great mystic Ibn al-ʿArabi [q.v.]. When he defined the five periods of creative evolution and of gnostic involution (same number in al-Farghānī; three times in 'Abd al-Ḳarīm Djili) and when he identified the spirit (*rūḥ*) with in-

telligence (*ʿaql*) in his monist descriptions of the fundamental unity of being (*waḥdat al-wuḍūd*) in reference to the Korānic themes of the covenant (*mīthāq*) and the Nocturnal Ascension (*kāb kaw-sain*), — Ibn al-ʿArabī only took up Karmaṭian exegesis again in a more moderate form.

The remarkable organisation of trades and Muslim gilds goes back to the Karmaṭians (cf. the art. *SINF*).

KARMISĪN. [See KIRMĀNŠAH].

KARNĀK. [See AL-UḤṢUR].

KARNĀL (1). A town of 23,559 inhabitants (1901); situated a few miles W. of the Djamnā R. in 29° 41' N. 76° 59' E. The town is the administrative centre of a district of the Panjāb, but historically and ethnologically it belongs to Hindustān rather than the Panjāb. The language commonly used by the inhabitants is a dialect of Western Hindi. It is no doubt a place of great antiquity, and the name is traditionally derived from Karna of the *Mahābhārata* (Karnālaya = Abode of Karna). But it was not of great importance in early times, and is not mentioned in the accounts of the invasions of India by Maḥmūd Ghaznawī and Mu'izz al-Dīn. Its prosperity seems to have commenced with the construction of the canal from the Djamnā by Fērōz Shāh Tughlak (see Shams-i-Sirāḍj, *Tarikh-i Firōz Shāhi*, Elliot and Dowson, *Hist. of India*, iii. 300). The country became productive and rich, and being on the direct road to Dihli from the north became an object of attention to invaders and rebels. Thus in 980 (1573), while Akbar was engaged in Gudjarāt, Karnāl, Pānīpat, and Sōnpat were plundered by Ibrāhīm Ḥusain Mirzā. Djahāngir halted at Karnāl in 1013 during his pursuit of his rebellious son, Khusraw (Elliot and Dowson, *o.c.*, VI, 296, also Beveridge's trans., *Fahangir's Memoirs*, Vol. i.). In 1120 (1708) during the reign of Bahādur Shāh, Karnāl was attacked and plundered by the Sikh rebels (Elliot and Dowson, *o.c.*, vii. 419). But the most noteworthy event in its history was the great victory of Nādir Shāh over Muḥammad Shāh 1152 (1739) which was fought just outside the walls of the town. The imperial army was before the battle encamped on the banks of the canal, where it was re-enforced by the 30,000 cavalry of Burhān al-Mulk, Nāzim of Awadh (Oudh). But Nādir Shāh's army was under better discipline and provided with abundant artillery, and the

defeat of Muḥammad Shāh's forces was sudden and complete. After the break-up of the Mughal empire following on this invasion (and those of Aḥmad Shāh Durrāni and the Mahrāttas), Karnāl and the surrounding district again became a prey to the Sikhs. Gadḥpat Singh of Dḥind took possession of it in 1763 after the battle of Sirhind but Nadjaf Khān recovered it in 1775. After this the Sikhs and Mahrāttas contended for its possession with varying results. The intrepid adventurer, George Thomas, drove out the Sikhs in 1798, but only held it for a short time. Gurḍit Singh, the Sikh chief of Lādwa, then held it for a space until driven out by a British force under Skinner in 1803, after Lake's defeat of the Mahrāttas at Dihli.

After these events Karnāl became the headquarters of a British district and was for several years the most advanced military post towards the north-west. Partly on account of its unhealthiness and partly owing to the advance of the British frontier to the Satlaj it was given up as a military post in 1841, but remained the centre of a civil district. When the mutiny of 1857 broke out, Karnāl was held by the British with the assistance of the Sikh Rāḍjā of Dḥind and the Musulmān Nawwāb of Karnāl, and remained an important link in the chain of communications between the Panjāb and Dihli. Its later history is uneventful. The canal originally constructed by Fērōz Shāh and afterwards extended by 'Alī Mardān (whose name it bore) in the reign of Shāh Djahān I, was entirely remodelled by British engineers and now irrigates a very extensive tract. The only building of importance is the tomb of the Saint Bū 'Alī Qalandar, locally said to have been built by Ghīyāth al-Dīn (probably Tughlak), but the architecture shows it to be a much more modern building. Bū 'Alī Qalandar died in 725 (1323) and Ghīyāth al-Dīn died the following year, so the tradition as to the original foundation of the tomb is probably correct. Both Pānīpat and Karnāl claim to have this saint's tomb.

2. A district in the province of the Panjāb lying between 29° 11' and 30° 15' N. and 76° 11' and 77° 17' E. Area 3153 sq. m. Population (1901) 883,225 of which 241,412 are Muslims. Its eastern boundary is the R. Djamnā, the District of Dihli lies to the S., that of Ambāla to the N., and the territory of Paltāla and other Sikh States to the W. In addition to the Djamnā, the small rivers called Čitāng and Saraswati flowing from N.E. to S.W. traverse part of the district. The first named is absorbed in the Western Djamnā canal system. The Saraswati joins the Ghaghar and the joint stream is lost in the Rāḍjputāna desert although, when the Saraswati held a greater supply of water, it was a famous river, and the stream probably joined the old course of the Satlaj, otherwise called the Hakra. It gave its name to the town of Sarsutī or Sirsa. The territory in the N. of the Karnāl district was the Kurukshētra of the *Mahābhārata* still locally called Kulchētar. Stānēśwara (now Thānēsar) was the principal town. Towards the end of the 6th cent. it became the centre of a powerful kingdom to which Harshavardhana succeeded in 606 A. D. He spread his rule over Northern India from the Bay of Bengal to the Satlaj and Gudjarāt and was an enthusiastic supporter of Buddhism. He was visited by Yüan Čwang at his camp at Kanawḍj in 635

A. D. who also visited the capital Shānēswara before his reception by Harsha. After Harsha's death his empire rapidly broke up and Thānēsar lost its importance. It was sacked by Maḥmūd Ghaznawī, and traversed by Mu'izz al-Dīn Muḥammad b. Sam whose defeat and subsequent victory over Prithwī-Rādj took place at Tirāori, a small town farther to the south near Karnāl in 588 (1192). This place is called Tarān and Talāwarī by the chroniclers, but Tirāori is the actual name in use at the present day. At this place there is a fine serāi of the Mughal period converted into a fort by the Sikhs in the 18th cent. A few miles from Karnāl is also the small town of Kundjipura founded by Nidjābat Khān, an Afghān claiming Ghorghushti descent, in the time of Muḥammad Shāh. It was a fort in a marsh, and was called by its founder Kundjipura, or the Crane's town; hence the family takes its present name of Kundjipuria. Nidjābat Khān afterwards took the side of Nādir Shāh but fought against Aḥmad Shāh Durrānī. All the sovereign powers of the Nawwābs were taken from them in 1849. Nawwāb Muḥammad 'Alī Khān upheld the authority of the British Government during the mutiny of 1857. The family, though reduced through family feuds, still holds a good position. The Mandal family of Karnāl also has the title of Nawwāb. It claims Afghān origin, but is probably in reality Djaṭ [q. v.]. The Nawwāb Aḥmad 'Alī Khān did good service to the British Government in 1857, and received substantial *djāgirs*. The family still continues prosperous.

In the South part of the district the principal place is Pānīpat [q. v.].

The Muslim families of Pānīpat are of a good stamp. Among them is a branch of the Sayyids of Bārḥā. The Nawwāb of Pānīpat is the head of the local Anṣārīs descended from Khwādja 'Abd Allāh of Herāt, whose son settled at Pānīpat in the reign of 'Alā' al-Dīn Mas'ūd Shāh 639 (1241). Nawwāb Bakr Allāh Khān in the early part of the 19th cent, and his son N. Amān-Allāh Khān, both did good service to the British Government, and the present Nawwāb holds large estates.

The other principal Muslims of the district of Karnāl are Rādjputīs of the Čawhān, Mandhār, Ghōrēwāha and Juriwar clans. Some of these clans have sections which still retain the Hindū religion. The conversion to Islām is generally asserted to have taken place in the reign of Firōz Shāh Tughlak.

KARNĀTAK. [See CARNATIC].

KARRĀMIYA, sect, called after Abū 'Abdallāh Muḥammad b. Karrām (or Karām or Kirām; see *Mizān al-Fīdāl*, iii. 127, and for further ancestors Ibn al-Aṭṭar, *Kāmil*, vii. 149). Of this person, who

is called al-Sidjistānī, a fairly full biography is given by al-Sam'ānī in the *Ansāb*, 476^b, 477^a. According to this, he was of the Banū Nizār, was born in a village of Zarandj, was brought up in Sidjistān, and afterwards went to Khorāsān, where he attended the courses of Aḥmad b. Harb, the Ascetic (d. 234); at Balkh he heard Ibrāhīm b. Yūsuf al-Mākiyānī (d. 257), in Merw 'Alī b. Iḥdjar (d. 244), and in Herāt 'Abdallāh b. Mālik b. Sulaimān; and he recited many traditions on the authority of Aḥmad b. 'Abdallāh Djaḡybarī (d. 247) and Muḥammad b. Tamīm Faryānānī: "had he known these two, he would have left them alone", both being notorious fabricators. After spending five years in Mekka he returned to Sidjistān, where he sold all his possessions. He proceeded to Nisābūr, where he was imprisoned by the governor Muḥammad b. Ṭāhir b. 'Abdallāh (according to the *Tādj al-'Arūs* on two occasions); after his release in 251 he left Nisābūr and proceeded to Jerusalem, where he ended his days in 255. The sanctuary of his followers there, called Khānikāh, is mentioned by Muṭahhar b. Ṭāhir (*Livre de la Création*, ed. Huart, v. 149) a hundred years later, as also by al-Muḥaddasi.

2. Doctrines. The opinions of this person were set forth in a work called *Adḡāb al-Kābir* "The Torment of the Tomb", of which some citations are given in the *Fark bain al-Firāk*, pp. 202—214, where there is the fullest account of the sect, with some of whose members the author held debates. His chief theological doctrine, which caused the inclusion of his sect among the Muḡabbihā, was that the Divine Being is a Substance (*Djāwhar*), for which some of his followers substituted Body (*Djism*), though without human members, and in contact (*munāssa*, for which the euphemism *mulāḡat* was substituted) with the Throne, which is located in space. This was apparently a deduction from the Qur'ānic 'ala 'l-'arshī 'stawā, and, indeed, the rest of his theology would seem to have been an endeavour to work the Qur'ānic texts into certain parts of the Aristotelian philosophy, notably the distinction between Substance and Accident, and that between *dynamis* and *energeia*. Thus his followers could maintain that God was "speaking" before He spoke, and could be worshipped before there were any worshippers. The doctrine of the eternity of the world was reconciled with the Qur'ānic creation by some subtle expedients; God, he held, was subject to certain Accidents, such as willing, perceiving, speaking, coming in contact; over such accidents He has power, but not over the world and the objects therein, which were created not by His will, but by the word *kun*. Thus, it would seem, the tense in *kun fayakūnu* could have its proper meaning.

Another doctrine to which allusion is often made in *kalām* works is that faith (*imān*) is constituted by a single utterance of the two *shahāda's*, and involves neither conviction nor works. This view, through similar to the chief thesis of the Murdji'a, is said to have been held by no one before him (Ibn Taimiya, *Kitāb al-Imān*, Cairo 1325, p. 57, who refutes it at length). The rest of his opinions, as recorded in the *Fark*, seem to have been in the direction of moderation. Thus the infallibility of Prophets was confined within certain limits, and a reason was found (somewhat in the style of Ibn Ṭufail) why those

whom no prophetic message had reached ought to believe in prophetic missions; he held that there might be two *Imām*'s simultaneously, and that each would have a right to his followers' allegiance, even when the two were at variance. His innovations in the *furū'* were such as to render the law more flexible.

3. History of the Sect. It would seem that the Karrāmī doctrine spread chiefly in Khorāsān, and in 370 the author of the *Farḡ* debated with a member of the sect in the presence of the Sāmānid commander Muḥammad b. Ibrāhīm b. Sīmdjūr. It was favoured by Sabuktakīn of Ghazna out of respect for the asceticism of Abū Bakr Ishāḡ b. Maḥmashādh (d. 383), the chief of the Karrāmīs in his time, who is said to have converted some 5,000 *dhimmīs*. This person's son Muḥammad encouraged Maḥmūd b. Sabuktakīn in a violent persecution of the Bāṭinīs; of this there seems to be an echo in the Life of the Ṣūfī Abū Sa'īd (357—440; ed. Jhukovski, 1899, i. 84—91), where Ishāḡ b. Maḥmashādh makes common cause with the *qāḍī* Sa'īd (a Ḥanafite) against the saint; the numbers of the Karrāmīs in Nisābūr at the time are given as 20,000. In 403, however, this *qāḍī*, who had made the pilgrimage, and been favoured by the Caliph Qādir, complained of the Karrāmī heresy before Maḥmūd at Ghazna; Muḥammad b. Ishāḡ thereupon repudiated the doctrine, while those who openly adhered to it were penalized. Many, however, continued to hold it at Nisābūr; Ibn al-Athīr in 488 records a civil war in that city between the Karrāmīs and the joint forces of the Ḥanafīs and Shāfi'īs, the leaders of the first and second of these being descendants of the leaders in Maḥmūd's time. Yāqūt (s. v. Bidjīstān) mentions a Karrāmī preacher who acquired popularity at Nisābūr in the middle of the sixth century; and 'Abd al-Qādir Dīlānī (d. 561; *Ghunya*, Cairo 1288, i. 81) speaks of them as still numerous in Khorāsān. Fakhr al-Dīn Rāzī (d. 606; *Asās al-Taḥdīs*, Cairo 1328, pp. 96—98) apparently thinks of them as still existing. It is probable, however, that the sect was practically exterminated when the lieutenants of Činghiz Khān massacred the inhabitants of Khorāsān; and when writers of a later time allude to its doctrines (e.g. Ibn Taimiya and the author of the *Mawāḳif*) they probably derive their knowledge from earlier works.

4. Literature of the Sect. In the *Farḡ* it is stated that the sect was subdivided into three minor sects, which, however, were mutually tolerant; these were called Ḥaḡḡaḡiyya (?), Tarā-iḡiyya (?), and Ishāḡiyya. Shahrastānī mentions twelve minor sects, of which he enumerates six: Ishāḡiyya (as above), 'Abidiyya, Nūniyya, Zaribiyya, Waḥidiyya, and Haiṣamiyya. On these the first was doubtless named after that Ishāḡ who was mentioned above; whereas the last was named after one Muḥammad b. al-Haiṣam, who is called their *Mutakallim* in the *Mizān*. The works wherein the founders of these minor sects put forth their views seem to have obtained little notoriety; the author of the *Bayān al-Adyān* (485; Schefer, *Chrestomathie Persane*, i. 152 text), though living at Ghazna, just knows the name of the main sect; and 'Abd al-Qādir (*loc. cit.*) in giving the names of Karrāmī authorities is in error in each case. The work of the founder 'Adḡāb al-Qabr seems to be known only from the citations in the *Farḡ*.

(D. S. MARGOLIOUTH)

KARS, a town in Armenia, called Զար in Ibn al-Athīr, Զար in Yāqūt and Ḥamd Allāh al-Kāzwīnī, Զար in Sharaf al-Dīn 'Alī Yazdī and later. According to a doubtful etymology, the name comes from the Georgian *kari* "gate"; *kari*-*kalaki* is said to mean "town at the gate" (from its situation on the frontier between Armenia and Georgia). The town (τὸ Κάρε) is first mentioned by Constantine Porphyrogenetes (*De administr. imperio*, ch. 44) as the capital of the chief of the Armenian princes (ἀρχὴν τῶν ἀρχόντων). From 961 Mushegh, a brother of the king of Ānī, Ashot III (cf. above, i. 355^a), ruled in Kars, and his successors. A manuscript of the Gospels found in Jerusalem with miniatures of importance for the history of culture dates from the last of these princes, Gagik (1028—1064). The king, queen and their daughter are represented seated in Oriental fashion and wearing Oriental costume; Kars, although it did not then belong to the Caliph's empire, was apparently under the influence of its culture. Gagik continued to hold his principality even after Ānī had been incorporated in the Byzantine empire (1044). It was only when danger threatened from the Turks that he was induced to renounce his rights voluntarily in favour of the Emperor Constantine X Ducas (1059—1067) and received in return a town in the Cilician Taurus. But even the Byzantines could not avert the danger, for in the very same year Ānī and Kars were both conquered by the Turks. Kars remained a Muḥammadan town till 603 (1206—1207), when it was taken by the Georgians (Ibn al-Athīr (ed. Tornberg, xii. 169). It was besieged in vain by the Khwārizmshāh Djalāl al-Dīn (cf. above, i. 1004) in 623 (1226) and taken by the Mongols in 1239 and, according to Ḥamd Allāh al-Kāzwīnī (*Nuzhat al-Kulūb*, ed. Le Strange, p. 93), it belonged at a later period with Ānī to the province of Georgia (Gurdjīstān wa-Abkḡaz) in the kingdom of the Ilkhāns (cf. above, ii. 465 sq.) and later again apparently to the kingdom of the Djalāir (cf. above, i. 1003^a). Unlike Ānī, Kars was never a Muslim mint. In 1386 Kars was captured by Tīmūr; it is said to have been levelled to the ground (*Zafar-Nāme*, i. 400). The town was then in the possession of a prince named Krūz-Bakht, who does not appear to be mentioned elsewhere. It was not till the year 1579 (according to Ḥādjdī Khalifa, *Djīhān-numā*, p. 407, however, 988 = 1580) that Sulṭān Murād III (1574—1595) had Kars rebuilt as an Ottoman fortress by Lālā Muṣṭafā Pasha; during the operations a marble slab is said to have been found with an inscription recording an earlier erection of the time of Sulṭān 'Izz al-Dīn (probably Kīlīdj Arslān II, 1156—1188). Kars was raised to be the capital of an eyālet of six sandjaks under Ottoman rule and also became a place of pilgrimage; the tomb of the Ṣūfī Abū 'l-Ḥasan al-Kharakānī (d. at the beginning of 425 = Nov., 1033) was shown there (cf. Sam'ānī, ed. Margoliouth, fol. 194 b), but he can never have been in Kars. The tomb is said to have been revealed by the saint himself in a dream — a story often told of other places. The

first Friday mosque was built by Lālā Pasha over the tomb of the saint.

Kars was conquered by *Shāh 'Abbās* in 1604 and in 1616 rebuilt by the Turks, attacked in vain in 1628 and 1744 by the Persians and captured for the first time by the Russians on June 23 (July 5), 1828. On Nov. 16 (28), 1855, Kars had to surrender to the Russians after a long defence under General Williams (later Sir Fenwick Williams of Kars). In the war of 1877—1878 Kars was stormed in the night of 6/18 Nov., 1877, and ceded to Russia by the peace of 1878; in 1918 it was returned to the Turks by the treaty of Brest-Litowsk; this cession remained in force even after the treaty of Brest-Litowsk became void.

The number of inhabitants of Kars about 1860 was 12,300 (*Ritter's Geogr.-statistisches Lexikon* 5, s.v.), in 1878 only 8,672 (according to the *Encyclopaedia Britannica*). Under Russian rule the number seems to have fallen considerably at first and then to have risen again rapidly (1889 only 3,941, in 1897 20,805, in 1908 18,397, mostly Armenians). The old Armenian church which had become a mosque (probably the Kīzīl Kilisa monastery mentioned by Ewliyā Çelebi; as a mosque called *Hüsain Katghudā Djāmī'i*) now became a Greek Orthodox church. There were, in addition, two Armenian churches and three mosques (two Sunni and one *Shī'i*). No accurate information is available in Russia regarding conditions since the restoration of Turkish rule; this fact is said to have been fateful for the Armenian population.

(W. BARTHOLD)

KARSHĪ, an Uighur word for "castle, palace", probably borrowed from a native language of Eastern Turkestan and later adopted by the Mongols. The town of *Nakhshab* or *Nasaf* [q.v.] has taken its modern name of *Karshī* from a palace built for the *Khān Kabak* (1318—1326; see the art. *ÇAGHATAI KHĀN*), 2 farsakh from the town, all trace of which has long since disappeared. Cf. *Sharaf ad-Dīn Yazdī, Zafar Nāme*, ed. Muḥ. Ilāhdād, Calcutta 1887—1888, i. 111; G. Le Strange, *The Lands of the Eastern Caliphate*, Cambridge 1905, p. 470 sq.

(W. BARTHOLD)

KARSHŪNĪ is the name, the origin of which has not yet been explained, for the Syriac alphabet adapted to suit the Arabic language. Yūsuf Daryān, Archbishop of Tarsūs, wrote recently on the name in the *Mashriq*, 1904, vii. 785—790, but his suggested derivation of the name from an unknown Syriac *karkūnā*, diminutive of *karkā*, which would describe the alphabet as the "small", "round", is quite improbable. Just as the Jews used their alphabet to reproduce the language of the countries that afforded them hospitality, not only for the sake of secrecy but also as a sign of nationality, so also the Syrians must have written the language of their conquerors in their own alphabet soon after they had adopted Arabic

for everyday use. The letters lacking in the Syriac alphabet were supplied by pointing those already in existence, but in doing this more attention was paid to the sound than the shape of the Arabic letters. *Khā* and *ghain*, for example, are usually reproduced by Syriac *kāf* and *gāmal* with *rukkākhā*, *qīm* by the Jacobites usually by a point inserted in the letter, by the Nestorians by a hook below it. *Zā* and *qād* are written by the Nestorians after the Arabic fashion with points over *fēth* and *qādai*, but among the Jacobites often by a point in the *fēth*, because they had come to be identical in pronunciation. The feminine ending is usually represented by *hē* with two points above it in the Arabic fashion. Vowels are placed, sometimes in the Syriac, and sometimes in the Arabic way, but *ū* and *ī* are almost always represented by *qanma* and *kasra*. Whether there were different roles in different periods and localities can only be ascertained after an accurate examination of manuscripts but nothing of the kind has so far been attempted. (C. BROCKELMANN)

KART, the name of a dynasty which ruled Herāt from 1245 to 1389 A.D. It was founded by *Shams al-Dīn Muḥammad I*, Kart, who was descended from the *Shansabānī* house of *Çhūr*, the family to which the brothers *Çhiyāth al-Dīn Muḥammad* and *Mu'izz al-Dīn Muḥammad* B. Sām belonged. As Herāt recovered from the devastating raids of the armies of *Çingiz Khān*, *Shams al-Dīn* gradually gained power, and by 1245 had established himself as ruler of the state, and used the title of *Malik*, borne by his descendants. In 1251 *Mangū*, the Great *Khān*, when reorganizing the administration of his empire, confirmed *Shams al-Dīn Kart* as governor of Herāt, *Sistān*, *Balkh* and the country lying between those provinces and the Indian frontier. During the latter part of *Shams al-Dīn's* reign his son *Rukn al-Dīn* acted as his coadjutor, but predeceased him, dying in 1283, and when *Shams al-Dīn* himself died, in 1285, he was succeeded by *Rukn al-Dīn's* son, *Fakhr al-Dīn*. As the power of the *Mongol Īl-Khāns* of Persia declined, that of the *Kart Malik*s of Herāt increased, and *Fakhr al-Dīn* befriended the powerful *Amir Çübān*, who had been regent of Persia during the minority of *Abū Sa'īd Bahādur Khān*, the fourteenth *Īl-Khān*. When *Abū Sa'īd Bahādur*, apprehensive of the growing power of this family, attacked it, *Amir Çübān* sought an asylum with *Çhiyāth al-Dīn*, who received him but in 1327 treacherously put both him and his son *Djalaw Khān* to death. *Çhiyāth al-Dīn* himself died in 1328 and his two elder sons, *Shams al-Dīn II* and *Hāfiz*, who succeeded him in turn, died in 1329 and 1331. The historian *Hamd Allāh Mustawfī* attributes their deaths, following one another at such short intervals, to the divine displeasure incurred by *Çhiyāth al-Dīn's* treachery towards *Amir Çübān*.

Hāfiz was succeeded by a third brother, *Mu'izz al-Dīn*, who sent an army to the assistance of *Malik Kuṭb al-Dīn* of *Kirmān*, driven from his capital by the *Amir Mubārīz al-Dīn*. This army was defeated and a second army sent to the aid of *Kuṭb al-Dīn* was shut up in *Kirmān* and compelled, at the end of 1340, to capitulate. *Mu'izz al-Dīn*, who died in 1370, left two sons, *Muḥammad*, who held the government of *Sarakhs*, which he retained after his father's death, and *Çhiyāth al-Dīn Pīr 'Alī*, who succeeded him in Herāt. In 1380 the *Amir Timūr* sent an envoy to Herāt, to claim the

allegiance of its ruler and his presence, with a contingent, at the forthcoming muster of his army, but Ghiyāth al-Dīn Pir 'Alī detained him on various pretexts while he provisioned the city and completed its defences. The envoy was obliged to return to Samarkand and report the failure of his mission, and in the spring of 1381 Tīmūr marched to Herāt and captured the city, its ruler and his eldest son, Pir Muḥammad, after a few days' siege. Some of its leading citizens were deported to Shahr-i Sabz and its defences were dismantled, but the Malik and his two sons, the younger of whom had been induced to surrender the strong fort of Ishkalā, were pardoned, and Ghiyāth al-Dīn Pir 'Alī was permitted to retain Herāt as a vassal of Tīmūr until 1389, when the dynasty was extinguished.

KARTĀS. [See KIRTĀS].

KĀRŪN, the largest river in Southern Persia. It rises in the north-eastern part of the district of 'Arabistān (earlier called Khūzistān), a little above 32° N. Lat. on the Zardeh-Kūh (Kūh-i Zard, mentioned as early as the xvth century by Ḥamd Allāh Mustawfī; see the *Bibliography*), which belongs to the Bakhtiyārī mountain system, to be more accurate on one of the range named Kūh-i Rang, one of the highest mountains in S. W. Persia (estimated at 13,000 feet). The actual source of the river, according to Sawyer (*Bibl.*; *op. cit.*, p. 486, with a picture), is about 10 miles above the place called Ser-i Česhme-i Kurang "main source of the Kurang (Kuran)". The Zā'indeh or Zēndeh-Rūd, also called Iṣfahān-Rūd, likewise rises on the Zardeh-Kūh and flows eastwards towards Iṣfahān (on it see Ritter, *op. cit.*, ix. 22; G. Le Strange, *op. cit.*, p. 207; cf. also ii. 529a and the article ZĒNDE-RŪD). As the source of the Kārūn is only about 100 miles from Iṣfahān, Shāh 'Abbās I, the Great, thought of leading the Kārūn into the Zēndeh-Rūd by a tunnel through the mountains. The work although almost finished at his death, was not continued by his successors, however; the remains of it may still be seen at the present day; cf. Layard, *op. cit.*, p. 50 sq.

The valley of the Kārūn is not yet sufficiently known, particularly in its upper course; among those who have explored it are Kinneir, Rawlinson, Selby, Ainsworth, Layard, Chesney, Loftus, Houtum-Schindler, Mackenzie, Lynch, Bateman Champain, Wells, Sawyer and Graadt van Roggen. We may call the upper part its course down to its exit from the mountains at Shuster, the middle course from Shuster to Ahwāz or Naṣriye, where it breaks through the spurs of the Djabal Ḥamrin; its lower course runs through the alluvial plain formed by the Kārūn system. As a result of the great windings, which the river takes in its course, it covers about 500 miles from its source to its mouth in the Shaṭṭ al-'Arab, while a straight line between the two points is only about 150 miles. In its upper course the Kārūn makes two great loops in about 32° N. Lat. Shuster which is a little

above this line and only a little south of the source of the river is in a straight line only a third of the distance the river has covered from the source. The course of the Kārūn is at first a south-easterly one; it then runs from east to west, while the next section runs north-west to Susan where the second smaller loop is formed towards the south-west and then the river runs north-west again. This direction is maintained till Chamani Yorga (20 miles as the crow flies N. E. of Shuster) is reached. From there to its the mouth the Kārūn runs S. W., although at times it describes very wide curves.

At Shuster, a little above the town, the Kārūn divides into two navigable arms which unite again about thirty miles away at the village of Band-i Kīr (near the mediaeval 'Askar Mukram; see above, i. 488b) and thus form an island. The western arm is the main stream, the Kārūn proper; it is now called Āb-i Shaṭait' (popular for Shaṭait' = little river; cf. i. 970a for the same name for a bed of the Tigris) and further down also Āb-i Buzurg Shuster (= great water of Shuster). The east arm is artificial in origin and is now called Āb-i Gerger; the Arab geographers of the middle ages know it by the name of Masruḳān (Mashruḳān, Musruḳān) which is explained as a corruption of the Persian Ardashīr-Kān (= Ardashīr's trench). The form Ardakshīragān is noteworthy: it occurs in a Syriac chronicle edited by Guidi in the *Actes du 8e Congrès des Orientalistes*, Leiden 1891, p. 32, and cf. thereon Nöldeke in the *Sitz.-Ber. Ak. Wien*, 1893, cxxviii., Abh. ix. 42). The first Sāsānian king is said to have been the maker of this water-course. The Persian geographers of the xvth century call the western water-arm, which carries the bulk of the water, Čahar Dānikah (= 4/6), the eastern Dū Dānikah (= 2/6); cf. Le Strange, *op. cit.*, p. 236. These names are still known locally, according to Layard (*op. cit.*, p. 27). It may further be noted that in the xth century, according to Arabic sources, the Masruḳān canal did not enter the main stream, the Kārūn proper, at 'Askar Mukram, but ran parallel to it and reached the Persian Gulf by a course of its own.

The Kārūn delta begins a little above the village of Sābla. Three channels break off from the main arm, which continues its course till its junction with the Shaṭṭ al-'Arab at Muḥammara; these all run S.-E. to the Persian Gulf and finally end their course in estuaries (*Khawr*, *khōr*) which are at times swamps. Their names are:

1. The Shaṭṭ (or Rūd) al-Ḳadīmī (= the old stream) which leaves the Kārūn about an hour's journey above Sābla and broadens out into the Khōr Mūsā (also called Khōr Mōi Allāh; *mōi* in 'Irāk Arabic = water). In it we have probably the oldest course of the Kārūn.

2. The Shaṭṭ al-Amāya (as it is usually written on maps) or al-A'mā (= the blind stream), probably so called because its bed is usually choked with mud. In Ritter (ix. 159, 166, following Renouard) the name is wrongly explained as "wanderer" (the form *al-Amara* in Ritter, xi. 1028, 1030, is certainly wrong). The same name is also given to an arm of the Shaṭṭ al-Hai, below Kūt al-Amāra (see Ritter, x. 169; Ainsworth, *op. cit.*, ii. 259, and the maps). Cf. also the analogous name Diḍjla al-'Awra for the present lower course of the Tigris; see above, i. 970b, as well as

Islām, xiv. 22 (a different explanation of ʿAwrā is proposed by Reinaud, *Journal asiatique*, 1861, xviii. 208). It is also called *Shatt Kōbān* (Gobān) from the district of Kōbān (Gobān) which lies on its right bank; Portuguese writers of the xviith century reproduced the name as Rio de Gabão (cf. Tomaschek, *op. cit.*, p. 75 sq.). This second arm begins at Sābla and finally expands into the *Khōr Silidj* (Seluge in Kinneir, *op. cit.*, p. 292); it is perhaps the second oldest arm of the Kārūn.

3. The *Shatt Bamishir* (Bahmishir, Behemshir) which leaves the Kārūn 6 miles below Sābla and expands into the *Khōr Bamishir* before entering the sea. This third branch from the Kārūn is considerably wider and holds more water than the other two. According to the *Persian Gulf Pilot*, p. 284; see the *Bibl.*) it is 54 miles long (40 as the crow flies). This may now be regarded as the natural mouth of the Kārūn. Bamishir is a corruption of Bahman-Ardashir, the name of the first Sāsānian king, to whom is ascribed the making of a whole series of canals in southern ʿIrāk. The most southern district of this province, on the coast, was called Bahman-Ardashir after him, as was a town opposite Ubulā (east of Baṣra) on the left bank of the *Didjla al-ʿAwra* (*Shatt al-ʿArab*; cf. Yāqūt, *Muʿdjam*, ed. Wüstenfeld, i. 770, 20, where the arabicised form Bahmanshir is also given). It appears as if in the middle ages Bahmanshir was regarded as the Persian equivalent of *Didjla al-ʿAwra*. Different scholars (like Rawlinson, Ainsworth, Le Strange) have made the further deduction that the *Shatt Bamishir* is to be identified as the old mouth of the Euphrates or Tigris (before the formation of the modern *Shatt al-ʿArab*). But it is very easy to suppose that the name Bahmanshir (Bamishir) was at a later date transferred from the *Didjla al-ʿAwra* (*Shatt al-ʿArab*) to its eastern neighbour, the third branch of the Kārūn. For Bahman-Ardashir and *Didjla al-ʿAwra* cf. especially Reinaud, *op. cit.*, p. 207 sq.; Tomaschek, *op. cit.*, p. 78; Ainsworth, *op. cit.*, ii. 173, 182; G. Le Strange in the *J. R. A. S.*, 1895, p. 300 and *op. cit.*, p. 43.

The two western branches of the Kārūn, the *Shatt al-Aʿmā* and the *Bamishir*, form two long islands with the *Shatt al-ʿArab* which runs parallel to them, the main Kārūn in the north and the Persian Gulf in the south. The eastern one, bordered by the *Shatt al-Aʿmā* (Kōbān) and the *Bamishir* is called *Kōbān* (Gobān, Gobban); the western between the *Bamishir* and the *Shatt al-ʿArab* is now usually called *Djazira ʿAbbādān*, a name it already had in the middle ages, from the town of ʿAbbādān (see above, i. 7a) which probably lay at the mouth of the delta originally. The latter island is also called *Djazirat al-Khidr* after the prophet al-Khidr [q. v.] highly revered in Muslim popular belief especially in the ʿIrāk as a patron of water, who had or still has a sanctuary near ʿAbbādān (Chodder Abbādan in Niebuhr, *Reisebeschreibung nach Arabien* etc., ii., Copenhagen 1778, p. 206) which is mentioned as early as the xiiith and xvth centuries by al-Dimashki (*Nukhbāt al-Dahr*, ed. Mehren, p. 97, 18) and Ibn Battūta (ed. Defrémery and Sanguinetti, ii. 19, 3). With ʿAbbādān the most important place in it in the middle ages seems to have been al-Muḥriza (Muḥriẓa) and the island seems to be occasionally called after it; in Portuguese sources of the xviith century the island is therefore called ʿylha Murzique; cf. Tomaschek, *op. cit.*, p. 76; for Muḥriza see Yāqūt,

i. 502, 13; 712, 13; iii. 598, 9; iv. 709, 5; al-Dimashki, p. 97, 6; al-Ḳazwīnī, *Āthār al-Bilād*, ed. Wüstenfeld, p. 280, 14. The Persians gave this island the name Miyān Rudān (= between the rivers, *Μεσσηνορῳπία*); see e.g. Yāqūt, iv. 708, 23, and Le Strange, *op. cit.*, p. 48.

It has already been pointed out that the Kārūn at an earlier period probably entered the sea through the *Shatt al-Aʿmā* — apart from the river-bed represented by the *Shatt al-Qadimi*, which is perhaps the oldest bed. According to the Arab geographers of the middle ages, the different branches and tributaries of the *Dudjail* (Kārūn) united at a place called *Hiṣn al-Mahdi*. Whether the *Nahr Sidra* (= Lotus-river) which also enters there must be considered the main arm of the Kārūn from Ahwāz onwards, is doubtful: cf. Le Strange, *op. cit.*, p. 237; Schwarz, *op. cit.*, p. 306. The reunited Kārūn called *Nahr Hiṣn al-Mahdi* (see Schwarz, *op. cit.*) then enters its estuary (*Faḍl Dudjail*) which ends at *Sulaimānān* on the coast. On *Hiṣn al-Mahdi* and *Sulaimānān* cf. Le Strange, *op. cit.*, p. 48, 243, and in the *J. R. A. S.*, 1895, p. 302; Schwarz, *op. cit.*, p. 306, 329—330, 400). *Hiṣn al-Mahdi* perhaps lay in the neighbourhood of the present Sābla; *Sulaimānān* is perhaps to be located somewhere in the region of the *Khōr Silidj*; the end of the course of the Kārūn in the middle ages would thus coincide practically with the modern *Shatt al-Aʿmā*. In the middle ages there must have been several other separate smaller mouths of the Kārūn. In these topographical investigations it should not be forgotten that southern ʿIrāk and *Khūzistān*, the delta of the great rivers, has undergone far-reaching changes in its hydrographic structure in the course of thousands of years. In ancient times the Persian Gulf extended much farther into the mainland, so that the Kārūn, *Kerkhā*, Euphrates and Tigris had all separate mouths; cf. above, i. 675 sq., and Andreas in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, i. 1394, 2811. During the middle ages and in modern times the coast-line had been steadily advancing southwards.

The bed of the Kārūn from Sābla to Muḥammara seems to be the work of human hands. In the tenth century the *Būyid ʿAḍud al-Dawla* (see above, i. 143) had a canal made, which was called ʿAḍudī after him, to secure direct communication between the Tigris and Kārūn (= Baṣra and Ahwāz). As in those days apparently the Kārūn flowed into the Persian Gulf through the *Shatt al-Aʿmā*, the ʿAḍudī in its main lines probably corresponded with the present course of the Kārūn between Sābla and Muḥammara. It is very doubtful if the work of the *Būyid Sultān* was something quite new; it is more likely that he undertook the restoration of an older channel which had fallen into neglect and become silted up. A century earlier we have evidence from the Arab geographers of the existence of a canal called *Nahr al-Djadi* (= New Canal) which led from *Hiṣn al-Mahdi* (near Sābla?) to the Tigris and may well have coincided with the ʿAḍudī. From a still earlier period we have the *Bayān* canal (see above, i. 970b); considering its course it may wholly or in part have coincided with the ʿAḍudī or *Nahr al-Djadi*. Whether there was in ancient times — about the period of Alexander — an artificial channel connecting the Kārūn and Tigris following the same direction cannot be ascertained with certainty; on this question cf. Andreas in Pauly-Wissowa, *op.*

cit., i. 1394. In modern times the name Ḥaffār (usually written Ḥafar in books of travel and in maps) has come into use for the stretch of the Kārūn between Sābla and Muḥammara, which suggests that here we have a work of human hands, not a natural bed dug out by the river itself. At the present day, however, this name is limited to the short stretch, only about an hour's journey long, from the beginning of the *Shatt* Bamishir (the mouth proper of the Kārūn at the present day) to Muḥammara. This lower Ḥaffār is (according to Stolze-Andreas, *op. cit.*, p. 48) about 600 yards broad and 20–25 feet deep, while the Kārūn above Sābla before the beginning of the delta is a mile broad and 25–30 feet deep. It should also be noted that in the second half of the xviiith century Sulaimān, the powerful Shaikh of the tribe of Ka'b (on him see below) destroyed the connection between the Kārūn and the *Shatt* al-'Arab by placing a dam (*band*) across the Ḥaffār at Sābla and led the water into the *Shatt* al-A'mā. The district of Kōbān was thereby soon raised to great prosperity. But at Karīm Khān's [q. v.] second invasion the dam in the Ḥaffār was destroyed (cf. Kinneir, *op. cit.*, p. 90). On the communication between the Kārūn and Tigris by the 'Aḡdī, Nahr al-Djādid, Bayān and Ḥaffār canals see Kinneir, *op. cit.*, p. 90, 293–294; Layard, *op. cit.*, p. 55–56; Tomaschek, *op. cit.*, p. 76–77; Ainsworth, *op. cit.*, i. 174, 184; *Persian Gulf Pilot*, p. 296; Le Strange, *op. cit.*, p. 48, and in the *J. R. A. S.*, 1895, p. 308–309; Schwarz, *op. cit.*, p. 309, 311, 390.

While still in the mountains the Kārūn receives a number of abundant tributaries, for example above Sūsan the Āb-i Bāzuft on the right and the Āb-i Bars (Bors) on the left. A little above Chamani Yorgha the Talak joins it. But the most important tributary is the river of Dizfūl [q. v., i. 983 sq.], the Dizfūl-Rūd or Āb-i Diz. This has no name of its own at the present day; it was the same in the middle ages as it figures in the Arabic sources simply as the "river of Djundai-Sābūr". On Djundai-Sābūr, which must have lain to the S. E. of Dizfūl, see i. 983 sq. and more recently Schwarz, *op. cit.*, p. 346 sq. The Dizfūl-Rūd, which, like the Kārūn, has a very winding course, rises out of the confluence of two little streams in the district of Burūdjird in Little Lūristān (cf. von Bode, *op. cit.*, ii. 274). It joins the Kārūn at Band-i Kīr; in earlier times the confluence seems to have been a little further south (cf. Le Strange, *op. cit.*, p. 239); it may have at one time flowed into the Kerkhā [q. v.], as modern tradition still says (see Layard, *op. cit.*, p. 65). As to the Kerkhā, which now loses itself in the marshes below Hawīza [q. v., ii. 294^b], it must be assumed from the statements of the Arab authors and the ancient river-bed, which can still be traced, that the bulk of its waters joined the Kārūn a few hours' journey below the town of Ahwāz (on this see also Billerbeck, *op. cit.*, p. 30). Another arm of the Kerkhā but hardly the main stream (contrary to Rawlinson; cf. Andreas in Pauly-Wissowa, *op. cit.*, i. 1394) may have at one time entered the *Shatt* al-'Arab in the region of Kurna.

The Dizfūl-Rūd, the upper course of which still requires more thorough geographical exploration, has as its principal tributary the Bālā-Rūd which enters it about 7 miles S.W. of Dizfūl. Another important tributary of the Dizfūl-Rūd is the *Shāwūr*

(*Shāpūr*, also written Shaur, Shover), a narrow but deep water-course which rises a few miles above the ruins of Sūs [q. v.] and falls into the Dizfūl-Rūd about 15 miles (as the crow flies) west of Band-i Kīr. In the middle ages the *Shāwūr*, like the Kerkhā, was called the "river of Sūs" because it flowed past this town — which, it may be noted, is at the point where the Kerkhā, Dizfūl-Rūd and Kārūn are nearest one another. The *Shāwūr* and the Dizfūl-Rūd were at one time and in part still are connected with the Kerkhā and the Kārūn by canals. On the Dizfūl-Rūd and *Shāwūr* cf. Ḥamd Allāh Mustawfī, *Nuzhat al-Kulūb*, ed. Le Strange, p. 215, 11; 218, 13, 15; G. Le Strange, *op. cit.*, p. 233, 239, and in the *J. R. A. S.*, 1895, p. 312; Schwarz, *op. cit.*, p. 303–305; Ritter, ix. 193 sq.; Layard, *op. cit.*, p. 56 sq.; v. Bode, *op. cit.*, ii. 193; Loftus, *op. cit.*, p. 329, 342, 346; J. Dieulafoy, *op. cit.* (see the *Bibliography*), passim; Sawyer, *op. cit.*, p. 490 sq.

The Kārūn is not only connected with the Tigris and Kerkhā in the west but in the east it is linked up with the *Djerrāhī* or Kurdistān-Rūd or Āb-i Kurdistān (the *Tab* of the Arab geographers; see Le Strange, *op. cit.*, p. 270; Schwarz, *op. cit.*, p. 5 sq.; see also the article ARRADIJĀN, above, i. 460). At Sābla a canal navigable by boats leaves the *Shatt* al-A'mā and runs to Dawrak (Dōrak)-Fellāhiye (see the art. DAWRAK) on the *Djerrāhī*.

The more important towns on the Kārūn in mediaeval as in modern times lay on its central course between Shuster and Ahwāz. At the two termini of this stretch stood the two capitals of the mediaeval province of Khūzistān, Ahwāz and Tustar (*Shuster*). Ahwāz, formerly the capital proper of this district, has a very important situation. This is at the gateway of the Kārūn where the river breaking through its last barrier, the *Djabal Ḥamrīn* range, enters the plain and henceforth offers no impediment to navigation to the sea. The later place of this name is built near the ruins of the old city; a mile south is the modern town of Naṣriye, which is growing rapidly (cf. Herzfeld, *op. cit.*, p. 77). Cf. on Ahwāz above, i. 208, and Schwarz, *op. cit.*, p. 315 sq., and Graadt van Roggen, *op. cit.*, p. 202 sq. (with plans); for Tustar see the article SHUSTER and on the site (particularly the bifurcation which begins there) Graadt van Roggen, *op. cit.*, p. 174 sq.

Places worth mentioning between Shuster and Ahwāz are: the large village of Wā'is, where a dead arm of the Kārūn runs to the east, and Band-i Kīr (usually pronounced Kīl), a place of considerable importance owing to its situation at the junction of the two arms of the Kārūn and the mouth of the Dizfūl-Rūd. Band-i Kīr is the successor of the mediaeval 'Askar Mukram, the ruins of which (called *Lashkar*; *Lashkar* is the Persian equivalent of the Arabic 'Askar) lie 3 miles north of it. On 'Askar Mukram see above i. 488^b, and Schwarz, *op. cit.*, p. 377 sq.

The lower course of the Kārūn from Ahwāz to Muḥammara has no places of great importance on its banks. Among them are Ismā'īliya and Sābla, remarkable for its situation at the beginning of the bifurcations of the delta; it has the ruins of a castle which was at one time the favourite resort of Sulaimān, the influential Shaikh of the Ka'b already mentioned (cf. Kinneir, *op. cit.*, p. 87). Muḥammara [q. v.] at the junction of the Kārūn and the *Shatt* al-'Arab is, however, a place of unusual

importance. It is undoubtedly the best harbour in Persia, easily accessible at any time, and is destined to have a still greater future. The fact is noteworthy that all the places of any importance that we have mentioned on the central and lower Kārūn lie on its east bank.

In the mountainous upper course there are no longer any towns of importance. In late antiquity and in the middle ages the most prominent were Sūsan (also called ʿArūdī or ʿArūh and Djabālīk; see the art. SŪSAN) on the right bank and Idhḥadī or Māl-Amīr [q. v.] opposite on the left bank. Both are famous for the very fine remains dating from the Elamites and Sāsānians. Along the upper course in parts runs a road protected by many forts, now mostly in ruins. The Kārūn in general is one of the most historically interesting rivers in Persia owing to the numerous ruins from ancient times which are everywhere found on its banks.

The dwellers on the Kārūn in its upper course and on its middle course to beyond Shuster are the Bakhtiyāris [q. v., i. 603a], one of the three principal tribes of the Great Lūrs. In the lower half of its central course and the whole of the lower stretch the powerful Arab tribe of Kaʿb (popularly pronounced Tshaʿb, Shaʿb, Shaʿab) are predominant; their Shaikh lives in Dawrak-Fellāhiye. On this tribe which has only become important in these regions since the xviiith century see Kinneir, *op. cit.*, p. 85—87, 91; Buckingham, *Travels in Assyria, Media and Persia*, London 1830, ii. 195 sq.; Selby, *op. cit.*, p. 214; Layard, *op. cit.*, p. 36 sq.; v. Bode, *op. cit.*, ii. 110—120; Loftus, *op. cit.*, p. 285 sq.; Ainsworth, *op. cit.*, ii. 205—218; Ritter, *op. cit.*, ix. 159—160, xi. 1038, 1063—1064. From Ahwāz to Muḥammara we find also Bawī and Idrīs tribes who are subject to the Kaʿb (cf. Selby, *op. cit.*).

In the military history of the middle ages the Kārūn basin only occasionally occurs as the scene of fighting; cf. thereon Schwarz, *op. cit.*, p. 299—300. During the World War of 1914—1918 the possession of this territory became very important on account of its oil-fields; cf. thereon Schweer, *op. cit.*, p. 140—144, and the section relating to the ʿIrāk and southern Persian fronts in books on the war.

As early as the Sāsānians powerful dams (*shadhrawān's*) with the necessary sluices had been erected at various places to enable the water thus dammed back to be led by numerous small canals to fields on a higher level, especially on the central stretch of the Kārūn. During the whole of the middle ages this irrigation system was kept in excellent repair and transformed the land it watered into flourishing gardens. Since then, however, most of these works have fallen more and more into ruins as a result of neglect and great stretches of once fertile country have become desert again. The most celebrated was the gigantic dam at Shuster, which was regarded in the east as one of the wonders of the world. Its erection is ascribed to the Sāsānian king Sapor I (241—272 A.D.). It is very probable that the tradition is correct which says that Roman prisoners of war were forced to build it for him; the modern name, Band-i Kaīsar = Caesar-dam, also points to its Roman origin. On this great system of dam and sluices here, which after considerable restoration is still partly in use to-day, see Ritter, *op. cit.*, ix. 186 sq.; Nöldeke, *Geschichte der Araber und Perser zur Zeit der Sāsāniden*, Leiden 1879, p. 33; Justi in the *Grundriss der*

iran. Philologie, ii., Strassburg 1896 sq., p. 318; Le Strange, *The Lands of the Eastern Caliphate*, p. 235; Schwarz, *Iran im Mittelalter* etc., p. 296. At Wā'is, a few hours' journey below Band-i Kīr, the ruins of a great dam may still be seen (cf. Herzfeld, *op. cit.*, p. 76). In Ahwāz, at the rapids there, considerable remains of a triple ancient system of dams still exist. Band-i Kīr (= Bitumen-dam) has got its name from the ancient dam coated with bitumen. At the beginning of this century the Persian government thought of restoring the province of ʿArabistān to its former high degree of prosperity by restoring the old system of canals with dams and sluices. It was intended to begin with the island formed by the Āb-i Shaṭait-Kārūn and the Āb-i Gerger between Shuster and the Band-i Kīr and the Dutch engineer Graadt van Roggen was appointed to make a survey. He published the valuable results of his investigations in an important treatise illustrated with numerous plans and sketch-maps (*Notices sur les anciens travaux hydrauliques en Susiane* in the *Mém. de la Délégation en Perse*, vii., Paris 1905, p. 167—207); he also went fully into the old irrigation systems of Shuster and Ahwāz. Unfortunately political jealousies have prevented the execution of this most useful project of the Persian government.

The Kārūn is the only river of Persia that admits of navigation. Communication is maintained with the Persian Gulf through the Shaṭṭ al-ʿArab and the Shaṭṭ Bamishir. There is evidence as early as the Umayyad period that there was regular traffic up the river as far as Ahwāz (cf. Schwarz, *op. cit.*, p. 300). The Kārūn is navigable as far as Shuster. The only obstacle is the rapids caused by the gypsum rocks below Ahwāz (see the very full description by Wells, *op. cit.*, p. 156 sq.) which make unloading and reshipment necessary; in 1891 a little railway was put in use for this purpose. The Āb-i Gerger is also navigable; but in it also reshipment is necessary at Shilili (6 miles below Shuster). One can sail up the Dizfūl-Rūd as far as the vicinity of Dizfūl (cf. *Persian Gulf Pilot*, p. 298). The first to show that steamers could ascend the Kārūn as far as Shuster was Selby in 1842, accompanied by Layard, although in 1836 Major Estcourt, accompanied by Ainsworth, had previously reached Ahwāz in a steamer of smaller size. In 1888 the Kārūn was opened to international navigation. At the present day there ply on it boats of the firm of Lynch who have long had a concession, the Persian Nāshiri company founded in 1889 and a Persian government steamer. If the bed of the river received a certain amount of regulation and the caravan roads from Shuster to Isfahān were improved, we should have an important route for traffic, which would shorten by about half the journey from the Persian Gulf to Isfahān, the centre of Persian commerce, which now mainly follows the difficult road from Bushir via Shirāz. Steamers of an average size can go as far as Ahwāz; from there to Shuster only small boats of shallow draught.

The shipping on the Kārūn has in the last few years become specially important for the transport of the petroleum obtained in Southern Persia. The Kārūn valley possesses a series of oil-wells, e.g. at Ahwāz. The oil-fields of Maidān-i Naftūn (east of Shuster) are particularly productive, perhaps the richest in all Persia. The exploitation and

development of the Persian oil-fields is now in the hands of the Anglo-Persian Oil Company. The yield of the oil-fields, where the most modern methods are now in use, has grown to such an extent that the transport of oil down the Kārūn in tank-ships is now no longer sufficient and two special pipes have had to be laid in addition. On the oil industry in the Kārūn valley the best authority is Schweer, *op. cit.*, p. 22 sq., 110 sq., 177 sq.

We conclude by dealing with the names of the Kārūn; in its upper course it is called Āb-i Kurang = "water of the Kurang". Kurang (cf. Wells, *op. cit.*, p. 146; Le Strange, *op. cit.*, p. 232) is said to be a corruption of Kūb-i Rāng = "variegated hill", the name of the mountain already mentioned in which the river rises. Whether this explanation is correct, need not be discussed here. Kurang, or Kuran, seems to have become Kārūn in the mouths of the Arabs. Among the Portuguese historians of the xvth century we find the name as Rio Caron; cf. Tomaschek, *op. cit.*, p. 53. They presumably only refer to the lower course of the river, which alone is called Kārūn at the present day. This name is quite unknown to the Arab and Persian writers of the middle ages. They give the river various names. It is usually called Dūdžail (= little Tigris) by the Arabs, apparently because it was near the larger river. As the name Dūdžail was also found elsewhere (for example a Tigris canal above Sāmarrā; cf. i. 9708; a water-course near Kūfa, see Schwarz, *op. cit.*, p. 292, note 6) it was more accurately specified as Dūdžail al-Ahwāz = the Dūdžail of Ahwāz (Khūzistān or its capital; see the art. AHWĀZ, i. 208). According to Ḥamza al-Isfahāni in Yāqūt (ii. 555, 22), Dūdžail represents the translation of the Pahlavi *Dādā Kāwānāh*. The Kārūn was also called "river of Khūzistān or of Ahwāz" (Āb-i Ahwāz is still usual for the stretch near the town of Ahwāz; see above, i. 208). It was also called "river of Tustar" (Shuster) after the second principal town of the medieval Khūzistān; in Ibn Baṭṭūṭa (ii. 24, 1) we find the name Nahr al-Azraq = "the blue river", from the blue colour of its mountain water which was generally esteemed for its remarkable freshness. We have already discussed above local names for particular parts or arms of the river, for example in the bifurcation between Shuster and Bād-i Kīr and in the delta. Brief reference may be made to the cuneiform names Ulai (also in O. T.), Iddē, Hadhud and to the names found in Greek and Roman literature: Aduna, Eulaeus, Hedyphon, Koprates, Pasitigris, which were used not only for the Kārūn itself, but also for its tributaries, like the Dīfūl-Rūd with the Shāwūr. For the cuneiform inscriptions cf. Streck, *Assurbanipal*, Leipzig 1916, p. cccxxxix, 26, 787, 788, 813; for the classical references cf. Pauly-Wissowa, i. 435-436, 1393, v. 2450, vi. 1661-1663, vii. 2594, xi. 1363.

(M. STRECK)

KĀRŪN occurs in Kur'an xxviii. 76-82; xxix. 38; xl. 25. In the second and third passages he, with Hāmān, is an unbelieving minister of Fir'aawn in oppressing the Israelites; he behaves proudly towards Mūsā and says that he is an enchanter and a liar. In Kur. xxviii. he is the Biblical Korah (Num. xvi.) and he behaves proudly towards the people of Mūsā but it is because of his immense wealth which he believes to have been given to him on account of his knowledge (*ʿata ilmāʾ indī*). He makes a great public display

of his wealth and is swallowed up by the earth with his palace (*dār*). He is thus an example of those who prefer the fleeting wealth of this world to gaining by alms and humility and righteousness the abiding riches given by Allāh in the world to come. This is apparently a moralized echo of a story heard and remembered vaguely by Muḥammad. To this the commentators and the compilers of prophetic *ḵiṣāṣ* have added a long and involved legend derived in whole or in part from rabbinic literature. For this, on the rabbinic side, see the *Jewish Encyclopedia*, vii. 556 *sqq.* and, on the Muslim side, the notes in Sale's translation of the *Ḳurʾān* and al-Thaʿlabī, *Ḳiṣāṣ*, Cairo 1314, p. 120 *sqq.* It is plain that Haman has become a minister of Pharaoh because he is bracketed with Korah in rabbinic literature for rapacious wealth. The legend of Ḳārūn has had two special developments. 1. From his wealth and knowledge (above and *Ḳur.* xxviii. 78) he has become one of the founders of alchemy. See the preliminary statement of the *Fihrist* on alchemy (p. 352, l. 1); and al-Masʿūdī alludes to this (*Murūdj al-Dhahab*, viii. 177). 2. He is associated in Egypt with lakes. Thus what is left of Lake Moeris in the Faiyūm bears his name (Baedeker, *Ägypten*⁶, p. 184; Joanne, *Égypte*, p. 611; Herodotus, ii. 149). Also, beside the Birket al-Fil to the south of Cairo, near the Mosque of Ibn Tūlūn, there was formerly a Birket Ḳārūn which had evidently associations of supernatural legend. Al-Maḳrīzī describes it (*al-Khiṭaṭ*, ed. 1325, iii. 261 *sq.*) and tells that Ḳāfur who buildt beside it was said to have been driven from his house by *djinn*. It figures also in the Story of Djadar the Fisherman in Zotenberg's (cf. *Not. et Extr.*, xxviii, i. 167 *sqq.*) Egyptian Recension of "The 1001 Nights" (Nights 606—624) as a place where spirits take refuge from magicians. Von Hammer suggested in a note to his transl. of this story (*Der Tausend und Einen Nacht noch nicht übersetzte Märchen*, etc., trans. Zinslerling, ii. 32; trans. Trébutien, i. 291) that Ḳārūn had here become combined with the Egyptian Charon.

(D. B. MACDONALD)

ḲARWĀN (older former *kar-bān*, "He who protects trade") the original of the word caravan, means in Persian a number of merchants who organise themselves into a body to defend themselves against robbers and brigands (Ar. *ḵaṣṣa*). The beasts of burden are camels, horses and mules: the camels are usually arranged in files of seven animals (*ḵatār*): the camel-driver rides on an ass at the head of the procession. The caravan drivers are slow and do not hurry, but their work is hard and trying; a man has often ten or twelve camels to watch and guide: sometimes thirty or forty are managed by three men. The men have to unload their beasts on reaching a stage and feed and tend them: it is only when this has been done that they can think of themselves. In the middle ages the signal for departure was given by beating kettledrums (*ḵāṣ*).

In desert regions, the caravan camps under the tents that it carries with it; but sovereigns and

generous benefactors have had built from stage to stage and at the resting-places, buildings called *ḵarwānsarāy* "caravan-houses". Their plan is always practically the same; — a square courtyard surrounded by walls with no windows looking outwards, upon which abut a series of rooms each with a door and window or sometimes little huts without a roof, intended to serve as a lodging for the night for the merchant and his goods. The beasts of burden remain hobbled in the courtyard. These caravanserais are as far as possible supplied with running water or at least a well. In Persia the bulk of these buildings still standing date from the Ṣafawid dynasty and are traditionally attributed to Shāh ʿAbbās the Great. There is nothing there but the four bare walls; the travellers carry everything that is necessary with them, beds, carpets, cooking utensils, etc. In the towns especially, however, there is to be found near the caravanserais a caterer who has always ready the dishes loved by Orientals.

The Shīʿis consider it a work of piety to be interred near the mausoleum of ʿAlī at Nedjef (Meshhed ʿAlī) and of Ḥusain at Kerbelā (Meshhed Ḥusain), both places situated in Ottoman territory. For this purpose corpse-caravans have been organised, which carry from the remotest corners of Persia dead bodies by thousands. The bodies placed in wooden coffins or rolled in mats or carpets are tied in twos, threes or fours to the back of a horse. At every stage the corpses are loaded and unloaded like packages. As the journey lasts several weeks, these caravans give out an unbearable stench and never camp at less than three or four miles from the villages they pass.

ḲARWĀSH B. AL-MUḲALLAD ABU ʿL-MANĪʿ, MUʿTAMID AL-DAWLĀ, an ʿUḳailid. After the murder of al-Muḳallad in 391 (1000/1) he was succeeded as Amīr by his eldest son, Ḳarwāsh. In 392 (1001/2) the latter sent an army against al-Madāʾin, which then owed allegiance to the Būyids. The ʿUḳailids, however, had soon to retreat and when they made an alliance with the Banū Asad under Abu ʿl-Ḥasan ʿAlī b. Mazyad, Bahāʾ al-Dawla's [q. v.] deputy, Abū Djaʿfar al-Ḥadīdjādī, at once took the field against them and summoned the Banū Ḳhaḫādja to help him. In Ramaḍān of the same year (July—August, 1002) the armies met; Abū Djaʿfar was defeated but gathered his forces together again and soon inflicted a heavy defeat on the ʿUḳailids near Kūfa. In the year 397 (1006/7) Ḳarwāsh undertook an expedition against Kūfa but was defeated. A few years later (401 = 1010/11) he abandoned the ʿAbbāsids and had the *ḵuṭba* read for the Fātimid caliph, al-Ḥākim bi-Amrī ʾllāh, but on the approach of an army under Bahāʾ al-Dawla's general, Ḥasan b. Ustādī Hormuz, at once returned to his allegiance. In 411 (1020/1) Ḳarwāsh was attacked and defeated by the Mazyadis and the Caliph's troops and was only allowed to retain his position by the Caliph's grace. But peace did not last long. The Banū Ḳhaḫādja invaded Ḳarwāsh's lands and when he took the field against them they made an alliance with Dubais b. ʿAlī b. Mazyad (417 = 1026/7). An army from Baghdād also joined the

allies. The vanguards met near Kūfa; Ḳarwāsh took to flight and the allies for the time being occupied the town of al-Anbār. Internal feuds then broke out. Two 'Ukailids, Naḍīdat al-Dawla Kāmil b. Ḳurād and Rāfi' b. al-Ḥusain, who were joined by Badrān, a brother of Ḳarwāsh and lord of Naṣībīn, made an alliance, advanced against Ḳarwāsh with a strong army and the two forces soon met. In the midst of a desperate conflict, however, a reconciliation was effected on the battlefield and Badrān was allowed to retain Naṣībīn. In the meanwhile Manīf b. Ḥassān, commander of the Banū Khafādja, plundered the town of al-Djāmi'ain, which belonged to the Mazyadis, whereupon Dubais made peace with Ḳarwāsh. After Manīf had twice burned down the town of al-Anbār, he submitted to the Būyid Abū Kālidjār [q. v.], while Ḳarwāsh assisted the people of al-Anbār to fortify their town. In the struggle between the Turkish prince Barstoghan and the Būyid Djalāl al-Dawla [q. v.] Ḳarwāsh was on the side of the latter. In the year 432 (1040/1) they quarrelled for various reasons, but friendship was soon restored after Djalāl al-Dawla had sent an army against al-Anbār and Ḳarwāsh had to pledge himself to obedience. In the years 432 and 433 Mesopotamia was invaded by the Ghuzz [q. v.] (cf. the article MARWĀNIDS); on Ramaḍān 20, 435 (April 21, 1044), however, they were defeated by Ḳarwāsh in combination with the other 'Ukailids and Dubais at Ra's al-Aiyil and had to retire to Diyār Bakr and Adharbaidjān. Ḳarwāsh had also to wage war on his brother Abū Kāmil Baraka. Their good relations were interrupted by 440 (1048/9); their nephew, Ḳuraish b. Badrān, joined his uncle Ḳarwāsh and put Abū Kāmil to flight. In Muḥarram, 441 (June, 1049) it came to fighting between the two brothers; but as several of the followers of Ḳarwāsh went over to Abū Kāmil, the latter had little difficulty in taking him prisoner and bringing him to al-Mawṣil. Although Ḳarwāsh continued to be nominally recognised as suzerain, he no longer played an active part in politics, and as Abū Kāmil found him too independent, Ḳarwāsh was deprived of his freedom in 442 (1050/1), although he was still treated with respect. After the death of Abū Kāmil in 443 (1052) his nephew Ḳuraish was recognised as Amīr. Ḳarwāsh died on Radjab 1, 444 (Oct. 27, 1052) in the fortress of al-Djar-rāhiya near al-Mawṣil. According to one story, Ḳuraish had him assassinated.

Bibliography: Ibn al-Athīr, ed. Tornberg, ix. 94—403; Ibn Ḳhallikān, ed. Wüstenfeld, N^o. 745, transl. by de Slane, iii. 415 sqq.; Ibn Shākir al-Kutubi, *Fawāt al-Wafayāt*, ii. 131 sq.; Ibn Ḳhaldūn, *al-'Ibar*, iv. 257—264; al-Hilāl al-Ṣābi, *Kitāb al-Wuzarā'*, ed. KARYA, a village or small town (*balad*). It is not now used of a large town or city (*madīna*) unless it is qualified by an epithet denoting greatness; but in the Ḳur'ān, where the word is of frequent occurrence, it is applied without a qualifying epithet to cities of whatever size, including Mekka and Jerusalem. It is now used chiefly of such villages and small towns as are in India styled *mawḍi'*, that is to say fiscal units which are not the chief town of any district or local area.

Bibliography: The *lexica* s. v.

(T. W. HAIG)

AL-KAṢĀB, a town in South Arabia in the Wādī Baiḥān. The town comprises 12 strong castle-like buildings and 400 houses — the Jewish quarter 50 houses — and is surrounded by palm-groves. It has four main streets with shops in which a busy trade is carried on. The goods come mainly from 'Aden and are brought via Bal-Ḥāf. Cotton, which is much grown here, is used for the manufacture of excellent cloths which are much sought after in South Arabia. Indigo is also much cultivated and a number of dyeworks produce the well-known blue-coloured material which is in great demand throughout the south. There are also seven sesame-mills in the town. In addition to cotton and indigo, the fertile soil yields wheat, barley, millet, the red variety (*pennisetum spicatum* Körn.), and summer-millet, dates, grapes and vegetables. The Jews of al-Kaṣāb, the capital of Baiḥān, are, as almost everywhere in South Arabia, mainly silversmiths and leather workers.

Bibliography: C. Landberg, *Arabica*, v., Leiden 1898, p. 30—34. (A. GROHMANN)

KAṢĀBA means primarily the interior part of a country or town and hence a fortified castle, such as is occupied by a commander and his forces, and the town in which such a castle stands, the chief town of a district. It is also applied to a new well. In India, where it is locally pronounced *kaṣba*, it is applied to the chief town of a *pargana* or *maḥall*, which is the smallest subdivision of a fiscal district, and is distinct from the *mawḍi'*, the village or small town which is a complete fiscal unit, and from the *mazra'* or hamlet, which is included in the area and in the fiscal accounts of the *mawḍi'* of which it is an off-shoot.

Bibliography. Besides the *lexica*: *The Imperial Gazetteer of India*, Oxford.

(T. W. HAIG)

In the Muslim East, the name is especially applied to the citadel in fortified towns in opposition to the rest of the town. It is the centre of defence and also the governor's residence. Sometimes it is a town beside the town. It is not uncommon to find the two parts of the city taking opposite sides and having violent quarrels. The history of Fez, Tara or Rabat give numerous examples of this. The *kaṣba* developed in the Maghrib especially after the Almohad period (twelfth century); the great ornamental gateways (usually single and simply swung, differing from the outer, more complicated of towns), which were built at this time between a town and its *kaṣba* (a dialectal form of the word) are among the most beautiful monuments that survive from this brilliant period (e.g. the gate of the *Kaṣba* of the Udaiya at Rabat, Bab Agnaw at Marrākush).

Under the Sherifi dynasties of Morocco (from the xvth century) and especially under the 'Alawids (xvith century to the present day) the word was commonly used to designate little forts of very simple plan, built here and there in the country where the sovereign maintained small garrisons to watch the country; the name is also given near the towns to the different cantonments supplied by particular tribes liable for military service (*Kaṣba* of the Filāla, *Ḳ.* of the *Shirārda* at Fez &c.).

Europeans extend the word more or less legi-

timately in the country to the dwellings of important *ka'id*s or to large fortified towns in the Atlas — and in certain towns (Algiers, for example) to the native quarter. (H. BASSÉT)

KASAM (A.) (verb *aḵsama*), is with *yamin* the general term for oath. As *kasama* means "to divide", we seem to have here the usual transition between the meanings "to cut" and "to decide" so that *kasam* would be the deciding, strong word (cf. *قَطَعَ*), while *hilf* (verb *ḥalafa*), which also

means swearing, would be used in special circumstances (see the art. *HILF*).

The oath plays a great part in the social life of the Arabs and is mentioned by Zuhair (*Diwān*, i. 40) as the principal means of ascertaining the truth, along with interrogation by a person in authority and absolute clearness. The oath is the word into which the person taking it puts his whole strength. As the tribe forms a moral unit with joint responsibility, the oath in important matters becomes a tribal oath. This, called *ḥasāma*, consists in 50 men of the tribe swearing to their being right; this may be the oath of an accuser (*Ḥamāsa*, ed. Freytag, p. 25; Abu Hishām, ed. Wüstenfeld, p. 777 sq. etc.) or an oath of purification (Zaid b. 'Alī, ed. Griffini, p. 230, 9 sqq.; al-Bukhārī, *Manāḥib al-Anṣār*, bāb 27). Those participating swear not as witnesses — on the contrary, they need not have been present at the deed — but as responsible persons. That the swearer stakes his whole soul on his word is often expressly stated in the wording of the oath. He swears upon his soul or upon his life (*binafsi*, *biḥayātī*, *la-'amrī* or simply *'amrī*), upon his honour and strength or upon particular things with which honour is associated, for example the forelock or the lance (*Ḥamāsa*, p. 441, verse 5); this oath is exactly the same as that by the tribe or by kinship (Sūra iv. 1; Ṭarafa, *Diwān*, N^o. 4, verse 72, in Ahlwardt, *The Diwans of the six ancient Arabic Poets*, etc.) or the very common oath by the fathers (*wa-abī*, *wa-djaddika* etc.) and by the god who supports the life of the swearer, in the *Ḥidjāz* especially by Manāt, al-'Uzzā and al-Lāt (Wellhausen, *Reste arab. Heid.* 2, p. 26, 34; Ibn al-Kalbī, *Kitāb al-Aṣṇām*, ed. Aḥmad Zakī Bāshā, Cairo 1332 [1914], p. 14, 16 sq., 19); among Muslims one also swears by the faith. The man taking the oath puts all that he values on his word. It is assumed that falsehood and injustice are negative forces so that a false oath imperils the soul and all that is precious to it. The oath is a pledge to God ('*aḥdu 'Ulāhi*, *mithāku 'Ulāhi*, *dhimmatu 'Ulāhi*) and if the person taking it lies or does not keep his promise (*waḥāḥ*) he imperils his own soul and offends the divine being. The oath therefore has often the form of a hypothetical surrender of (*barā'a*) the things the swearer values most, e. g. *anā barī'un min ḥawli 'Ulāhi wa-kuwwatiki in fa'altu kaḥḥā* (cf. al-Ṭabarī, iii. 618, 10; 622, 5, 9 sq.; al-Mas'ūdī, ed. Paris, vi. 296; al-Ya'qūbī, ed. Houtsma, i. 505 sq., 509 sq.). Formulae of this kind are common in the official oath taken by different ranks in the Mamlūk kingdom (al-'Umārī, *al-Ta'rif bi 'l-Mustalah al-Sharif*, Cairo 1312, p. 146—164; al-Kalkashandī, *Ṣubḥ al-A'ṣhā*, xlii., Cairo 1337 [1918], p. 205 sqq.). The *barā'a* oath is connected with another kind of oath, invoking a curse upon oneself in certain contingencies. This is a formula like the fol-

lowing: "May Allāh slay me if I do not kill thee"; "I will eat blood if I do not do such and such a thing". Of frequent occurrence is this formula: "May my hand waste away if I do this (or do not do it)" e. g. al-Nābigha, v. 39; Ibn Hishām, p. 830, 18). Ibn al-Fārīd, for example, swears with the exclamation *ḥādhi yadī* "this hand of mine!" (line 264 of his *al-Ta'ziyat al-kubrā*, ed. Kairo 1319). The Prophet said on one occasion: "May I be wretched and despised if I am not just" (al-Bukhārī, ii. 306, 8; cf. al-Kaṣṭallānī, vi. 57). This form of oath is used in the *li'an* ceremony when married people take oaths in giving evidence against one another in cases of alleged adultery (Sūra xxiv. 6—9; cf. Juynboll, *Handbuch des islamischen Gesetzes*, p. 192). A curse can also have a positive value and be used to strengthen an assertion, as in *ḡatalahu 'Ulāhu mā asḡidahu*, i. e. "May Allāh slay him. How brave he is". The curse is here used *li-'l-ta'adjjib*, as in Sūra lxxiv. 19, 20 (see al-Baidāwī on the passage). The expression already mentioned "May my hand waste away" is often used in this way.

The taking of a vow is connected with the invocation of a curse upon oneself under certain conditions. It is especially common as an oath of vengeance among the Arabs; thus Imru'ū 'l-Qais says he will neither eat meat nor drink wine nor anoint himself with oil nor touch a woman nor wash the *djanāba* off his head until he has taken vengeance (*Aghānī*, viii. 68, 17 sq.; cf. 68, 2; ix. 149, 2; xiii. 69, 8; Ibn Hishām, p. 980, 3 sq.; 543, 5 sq. etc.). To take this vow (*nadhīr*) is called *nadhāra*. The man concerned dedicates himself thereby and takes an increased obligation (*'ahd*) upon himself. Such oaths are as a rule taken before a battle (*Ḥamāsa*, p. 301; 'Antara, xxi. 84 etc.). Vice versa, one may give force to one's word by taking a special obligation upon oneself in case of breaking it. This pledge, of course, must be inviolable in character and usually takes one of three forms: giving of camels to be sacrificed, releasing of slaves (male or female) or divorce from a wife. These pledges may be made more or less severe; thus one can promise to divorce or release present and future wives and slaves (e. g. al-Ya'qūbī, p. 505 sq., 509 sq., and in the oaths taken by officials of the Mamlūks), a kind of oath which was banned by al-Shāfi'ī but nevertheless often occurs (cf. "he swore by his wife", Zaid b. 'Alī, ed. Griffini, p. 205, 10 sq.). In taking the oath one must endeavour to remember its character as a serious, sacred expression. It is best to swear at sacred places, in ancient times at the holy stone or idol (*Aghānī*, ix. 9 sq.). In pre-Islāmic days and later the Ka'ba was a particularly favourite place for taking an oath (Ibn Hishām, p. 317, 18; Ibn al-Kalbī, p. 19; al-Ṭabarī, iii. 861, 4 sqq.), especially by al-Ḥafīm (al-Ṭabarī, i. 3464, 10); this oath is still considered a very strong one (Snouck Hurgronje, *Mekka*, ii. 306; al-Batanūnī, *al-Riḥlat al-Ḥidjāziya*, Cairo 1329, p. 127). One swears by the tombs of saints at the same time laying a hand on the tomb (see e. g. Jaussen, *Coutumes des Arabes au pays de Moab*, p. 311; Musil, *Arabia Petrea*, iii. 338, 342), just as a hand is laid on the northern window of the tomb of the Prophet in Medina, in taking an oath (*Shibūk al-Tawla*, see e. g. al-Batanūnī, *op. cit.*, p. 246). Oaths are taken in the mosque, for example, especially on the *minbar* (e. g. al-Ṭabarī, ii. 92, 18 sq.). Special seasons make the oath more serious,

notably the period after the *ṣalāt al-ʿaṣr* (see Goldziher in the *Archiv für Religionswiss.*, ix. 297 sq.). There is evidence of oaths in connection with sacrifice from the pre-Islamic period (Zuhair, i. 50; *Ḥamāsa*, p. 423, 10). Swearing by the sacrificial animals is common, still more frequent by the lord of the sacrificial animals (e.g. *Ḥamāsa*, 715, verse 6). Among the traditional forms of oath is the *hūla*. According to al-Djāwharī, *Ṣiḥāḥ*, s. v., it consists in taking the oath by the fire of the tribe into which salt is thrown. This ceremony, referred to by al-Kumait (*al-Hāshimiyāt*, ed. Horowitz, N^o. 4, verse 36), still survives (Landberg, *Arabica*, v. 133 sq.).

The magic circle is often used at the present day; this, which is sometimes divided by lines at right angles, often has something put in it, such as dung, ashes or a piece of cloth. One solemn oath consists in sticking a sword in the ground in the centre of the circle and placing ants beside it; this is the *šemle wa-nemle* oath. Sometimes one takes a piece of wood in the hand and swears "by the life of this wood"; this is the *dīn al-ʿūd*. Other popular customs could be mentioned, such as laying a hand on the tent-pole, taking bread and coffee in the hand, turning towards the *qibla* etc. (see the works of Musil, Jausen, Landberg, Burckhardt and Doughty). Increasing the gravity of the oath by various procedures is acknowledged in official Islām and called *taghlīz al-yamīn* or *taʿzīm al-yamīn*; for example, the *Qurʾān* or al-Bukhārī's *Ṣaḥīḥ* is placed in the bosom while the oath is being taken (cf. Goldziher, *Die Zāhiriten*, p. 115; Lane, *Manners and Customs* 3, i. 168, 470). Great oaths are called *Aimān bāligha* (*Sūra* lxviii. 39; cf. *Djahd aimānīhim*, *Sūra* v. 58; vi. 109; xvi. 40).

The oath formulae give the substance of the oath. Apart from special kinds of oaths such as the curse and the vow, the usual formula is for that by which one swears to be introduced by a particle. The most common particles in this connection are *bi*, *ta* and *wa*, which are all used in solemn oaths (*wallāhi*, *wa-bi-llāhi wa-tallāhi*); the two last mentioned are not so freely used as *bi*. The particle *bi* is the common preposition "in combination with"; *ta* is probably the termination as in *amānata* or *ḥayāta*; *wa* is an intensive particle like *la*, which is used particularly in the formula *la-ʿamri*, *la-ʿamruka* "by my (thy) life", etc.

Other demonstrative particles occur in oaths such as *a*, *hū*, or sometimes the simple accusative is used; abbreviations of *aimunūn* like *aimu*, *imu*, *um*, *mu* etc. are also sometimes used as particles in oaths. There are several linguistic peculiarities associated with oath formulae; for example, a negative can be omitted after the oath; vice versa, we find occasionally in the *Qurʾān* a negative *lā* before the oath, which is apparently intended to give it particular emphasis. A further intensification of the oath is expressed by prefixing *la* to the following verb (on the grammatical point cf. *al-Mufaṣṣal*, ed. Broch, p. 163 sq.; Ibn Yaʿīsh, ed. Jahn, p. 289 sq.).

Just as an oath is taken at a holy place or at a sacrifice, so we find oaths taken by the place or by the sacrifice (or by its lord). The Kaʿba and all that belongs to it as well as the pilgrimage are used in oaths in continually changing phrases. The old Arabs swore specially by their gods and fathers. The *kāhīn*'s often swore by natural phenomena (Ibn Hishām, II, 4). It is in keeping with the character of the oath that in Islām swearing

by Allāh is alone permitted, but that, on the other hand, swearing by fathers, saints and especially by the Prophet (by the tomb of the Prophet, *Aghānī*, vi. 91, 13) is found in everyday life. Swearing by one's father was particularly forbidden by the Prophet (al-Bukhārī, iv. 263) but it is sometimes used by ʿUmar and Abū Bakr (al-Bukhārī, ii. 444, 6) and even by the Prophet himself (Muslim, commentary of al-Nawawī, iv. 99). It is a good Muslim oath to swear "by the Lord of my father" (al-Bukhārī, ii. 203, 15) or "by the Lord of the Kaʿba, of the sacrificial animals" etc.). The Prophet also swears by his honour (Zaid b. ʿAlī, ed. Griffini, p. 104, 4). The formula may call God to witness, as, for example, "God knows that I am not lying", "God is witness that I am saying this", etc. God is often referred to by some descriptive phrase; for example, "by Him Who sent Muḥammad with truth", while a Jew says "Mūsā" for "Muḥammad". The oath can also be adapted to particular situations; many have their favourite oaths; the Prophet, for example: "by Him in Whose hand my soul is", etc. The oath is intensified by repeating the formula three or more times.

One is freed from an oath to fulfil a vow, when one has performed it (*abarra* or *ḥallala yamīnan*). "Discharge from the oath" (*taḥillat al-kaṣam*) may mean a small quantity or a short period of time, literally: sufficient for release from the vow (cf. al-Bukhārī, i. 316, 11; iv. 265, 12, with *Sūra* xix. 72; Unaiya b. Abi l-Ṣalt, ed. Schulthess, xxiii. 14). The man, to whom someone has vowed to do something, may, however, release the latter from his oath. The latter is allowed to disregard his oath if higher considerations demand it. There is evidence from the Muslim as well as the pre-Muslim period that such a solemn promise was accompanied by the taking off or rending of certain articles of clothing (al-Wāḳidī, transl. by Wellhausen, p. 197; al-Ṭabarī, iii. 862, 14 sq.). Release from a vow is obtained among the modern Beduins by a sacrifice. One may bind others with an oath if one conjures them. The formula is often of this kind: "I call (*naṣḥada*) God to thee" or "I mention (*dhakkara*) God to thee". But it is an oath of the speaker and it depends upon the relation between the latter and the person adjured whether the latter will fulfil the vow; in such forms of oath appeal is often made to mutual friendship or relationship (e.g. *Lisān*, vi. 428, 7 sq.; *Ḥamāsa*, p. 254 middle). One can also appeal to God. "A servant of God is one whose oath God redeems when he appeals to him" (al-Bukhārī, ii. 168, 19, 204, 2). God is more pressingly conjured, if the appeal is made through one of His favourites, like the Prophet (*taʿwassul bi-l-Nabī*). Maʾrūf al-Karkhī is said to have advised a disciple to call upon God through him (al-Ḳuṣhairī, *Risāla*, Cairo 1330, p. 9, 23).

Between the popular use of the oath among the ancient Arabs and in Islām there is no essential difference, as is clear from what we have already said. But there are special rules regarding the oath in Islām. In the *Qurʾān*, especially in the older *Sūra*'s, the oaths taken by the *kāhīn*s by natural phenomena are usual (*Sūra* lvi. 74; lxxi. 15—18; lxxvi. 1; lxxxix. 1—3; xci. 1—7 etc.); we also have instances of swearing by the *Qurʾān* (xxxvi. 1; xxxviii. 21; xlv. 1; l. 1), by the angels (xxxvii. 1), by the Last Day (lxxvii. 1) etc. Iblis swears by

God's majesty (xxxviii. 23) and we have evidence (Zaid b. 'Ali, ed. Griffini, p. 286, 7 sq.) that God swears by His majesty and grandeur (cf. for the oaths in the Qur'an Ibn al-Kayyim, *Kitāb Aḥsām al-Kur'an*, Mekka 1321). Two passages in the Qur'an are of special importance for the use of the oath. In Sūra v. 91 and ii. 224 sq. it is said that inconsidered expressions (*laghw*) in oaths can be (broken and) expiated. The context in both passages makes it probable that the references are to vows of abstinence, sometimes from food, sometimes from women. Vows of the last mentioned kind, called *ilā'*, are limited to four months (ii. 226), in connection with ii. 224 sq., after which time they must be expiated or the man must divorce the wife. A particular vow of this kind (*ḡihār*) in which the husband says "Thou art henceforth as the back of my mother to me (*ka-ḡahrī ummī*)" is especially condemned in Sūra xxxiii. 4; lviii. 2, 4 sq. (see Juynboll, *Handbuch des islamischen Gesetzes*, Leiden and Leipzig 1910, p. 224 sqq.; Sachau, *Muh. Recht*, 1897, p. 13, 68 sqq.).

The practice of atonement for such oaths after repenting of having taken them seems to be taken from the Jews (cf. *Mishna*, *Nedarim*, and *Lev.*, v. 4 sq.). In Sūra lxvi. 2 we read "God hath prescribed you the dissolution of your oaths" and this prescription is applied to a case in which the Prophet had sworn to his wife Ḥafsa not to touch the slave-girl Māriya, which he later regretted (cf. al-Ṭabarī, *Tafsir*, xxviii. 90 sqq.).

Among ḥadīths first place must be given to a saying of the Prophet: "I never take a vow without being prepared to expiate it if I see that another is better and adopting the better". In this and similar sayings, which are collected by al-Bukhārī, Muslim and other traditionists (see *Kitāb al-Aimān wa-l-Nudhūr*), the expiation of vows is recommended in cases other than vows of abstinence. On the other hand it is insisted that one should keep one's oath (Sūra xvi. 93, 96; cf. iii. 71; lviii. 15, 17, 19 etc.) and carrying out what one has sworn to do (*ibṛār al-muḡsam*) is mentioned by al-Bukhārī, ii. 99, 3, among the seven principal requirements. It is only in Paradise that there are no such pledges, for these vows are fulfilled and oaths disposed of (Umaiya b. Abi 'l-Ṣalt, ed. Schulthess, xli. 23). But an oath must always give place to a higher consideration. It is therefore recommended not to take an oath without adding the *istiḡnā'* (the formula "if God so will") (al-Bukhārī, iv. 280; Muslim, comment. of al-Nawawī, iv. 106; Zaid b. 'Ali, ed. Griffini, p. 463).

These statements in the Qur'an and in the *Sunna* form the foundation of the Fikḥ system on the subject. According to this, the person taking the oath must be *mukallaḡ*, he must be acting deliberately as a free agent and intend the oath. He must not take an oath to commit a sin; views are divided on the question whether such an oath is valid at all. One can only swear by God, either by His existence or by one of His names or attributes. The oath by the Prophet is recognised by some Ḥanbalis but in general is not considered a binding oath. The *barā'a* oath already mentioned is not recognised by the Fikḥ. The breaking of a vow (*ḡinṡ*) is considered a duty in certain cases, when one has sworn to commit a sin. The *ilā'* already referred to must be broken within four months if the man does not divorce his wife; after the *ḡihār* the wife

must at once be divorced or the vow must be expiated.

Expiation (*kaffāra*) consists, according to Sūra v. 91, in setting free a slave, feeding ten poor men or clothing the same number; for those who cannot afford this, three days' fasting is equivalent. The things to be done are described in detail in the Fikḥ books. In the *ilā'* the expiation is the same as in other oaths while in the *ḡihār* it consists in releasing a slave who is a believer or fasting for two months or feeding 60 poor people (Sūra lviii. 4—5). The Muslim law recognises the oath of affirmation as well as the vow to perform. The former only occurs in law-suits. A special case is formed by the *kašama* already mentioned which was taken over from the ancient Arabs. It is limited in Islām to trial for murder and consists of 50 oaths which can be sworn by one or more individuals. The oath is imposed on the accuser but only in connection with certain indications (*lawṡh*) which must be regularly ascertained. If the accuser refuses to take the oath, the 50 oaths are applied to the accused; if he refuses they apply again to the accuser. In other cases the principle in Islām is that the onus of proof is on the accuser and the accused has to take the oath. Witnesses as a rule do not take an oath; witnesses to the will of a testator who has died in a foreign country are an exception (Sūra v. 105). If the plaintiff has only one of the two necessary witnesses, the oath of one of the parties may take the place of the second witness (al-Bukhārī, ii. 158 sq.). When the plaintiff has not valid proofs, the oath is put to the defendant; if he declines to take it, it is put to the plaintiff (*yamīn al-radd*). Perjury on account of some crime is called *yamīn al-ḡhamūs* by Muslim scholars, an expression which originally meant a peculiarly binding oath. Such oaths can be expiated in the above fashion, according to the Shāfi'ī school, if they are false, according to other views they cannot. The latter hold that expiation only applies to vows.

The formalism of the legal system opens the way for all kinds of artifices by which an oath can be broken, yet formally kept. There thus arose a whole literature regarding such subterfuges; the best known work is al-Khaṣṣāf's *Kitāb al-Ḥiyāl wa-l-makhāridj* (ed. by Joseph Schacht [autogr.], Hannover 1923; printed Cairo 1314).

AL-KAŠAŠ "the story", title of Sūra xxviii. of the Qur'an, taken from vs. 25. See further KIŠŠA.

KASB. The root occurs a large number of times in the Qur'an with the meanings, "seek", "attain", "earn", "work" (good and evil); see C. C. Torrey, *The Commercial Theological Terms in the Koran* (Leiden 1892), p. 27 sqq. and Nöldeke's note there. Stems i. and viii are used synonymously although al-Baidāwī on Qur'an ii. 286 (Fleischer's ed., i. 143, 21), following al-

Zamakhshari on the same passage, tries to show that there is more personal, reflexive force (*ʿitīmāl*) in viii. Hence *kasb* and *iktisāb* mean much the same. There are two technical usages. I. It is equivalent to the *iktisāb* of the Ashʿarites. "The action of a creature is created, originated, produced by Allāh but it is 'acquired' (*maksūb*) by the creature, by which is meant its being brought into connection with his power and will without there resulting any effect from him in it or any introduction to its existence, only that he is a locus (*maḥall*) for it" (al-Djurdjānī on *al-Mawāḳif* of al-Idjī, Bulāḳ 1266, p. 515). Al-Ghazālī, perhaps desiring to emphasize the personal acceptance, apparently preferred *iktisāb*; see his statement in the *Iḥyāʾ* (ed. with comm. of al-Murtaḍā al-Zabidī, ii. 165 sqq.) and the elaborate commentaries thereon. Al-Rāzī on *Qurʾān* ii. 286 (ed. Cairo 1308, ii. 388) states the different views as to the two terms. Al-Sanūsī in his *Muḳaddima* (ed. Luciani, p. 68 sqq., also note p. 237) uses *iktisāb* only twice and evidently in the same sense as *kasb*; his statement is an extension of that of al-Djurdjānī. This is the most subtle question in all Muslim *Kalām* (*adaḳḳ min kasb al-Ashʿarī*) but it may be guessed that al-Ashʿarī wished only to explain our consciousness of freedom to choose and that his explanation was that this consciousness is a separate creation by Allāh in the mind; man for him was an automaton with consciousness as part of the machinery. The later mutakallims, especially under the influence of the more ethical Māturidite system, turned it otherwise; cf. e. g. al-Taftāzānī in his commentary on the *ʿAḳāʾid* of al-Nasafī (a Māturidite), Cairo 1321, p. 98 sqq. II. *Kasb* and *iktisāb* are applied to that knowledge (*ʿilm*) which belongs to created things and is attained by the voluntary (*ikhtiyārī*) application of secondary causes (*asbāb*), (a) like reason and consideration of premises in deduction and (b) like listening and turning the eye in sense perception. They are thus wider than *istidlāl* which applies only to reasoning. *Darūrī*, "necessary", is sometimes opposed to *iktisābī* and sometimes to *istidlālī*. Others arrange thus: knowledge in a created being is of two kinds, (a) *darūrī* and (b) *iktisābī*; in the acquisition of (b) the *asbāb* are of three kinds, the healthy senses, reliable narrative, rational consideration (*nazar*); *nazar* is of two kinds, immediate intuition (*baḍiḥa*) and *istidlāl*, deduction (al-Taftāzānī on the *ʿAḳāʾid* of al-Nasafī, p. 39 sq.; also al-Djurdjānī on *al-Mawāḳif*, p. 16, 21).

Bibliography: Is given above; add for both uses, *Dict. of Techn. Terms*, p. 1243 sq. (D. B. MACDONALD.)

KASF. [See KHUSŪF].

KASH, the modern **SHAHR-I SABZ** ("green town", on account of the fertility of its surroundings) a town in Bukhārā on what was once the great trade route between Samarḳand and Balkh. According to Chinese authorities, Kash (Chinese transcription K'ia-sha or Kié-shuang-na, also K'iu-sha, as a town Ki'-she) was founded at the beginning of the seventh century A. D.; cf. J. Marquart, *Chronologie der alttürkischen Inschriften*, Leipzig 1898, p. 57; *Ērānshahr* etc., Berlin 1901, p. 304; E. Chavannes, *Documents sur les Toukine (Turcs) occidentaux*, St. Petersburg 1903, p. 146. Yāḳūt's statement (*Muʿdjam*, ed. Wüstenfeld, iv. 274) on the authority of Ibn Makūlā, who died in 473 (1080/1), that in Mā warāʾ

al-Nahr the name was everywhere pronounced *Kiss* is very doubtful; for the later period the pronunciation *Kesh* is proved by the frequently recurring expression *Kesh-i Dilkes*. The accounts of the Arab conquest are discussed by Marquart in particular (*Ērānshahr*, see Index). The *Kesh* of the Sāmānid period is described very fully by the Arab geographers (*Bibl. Geogr. Arab.*, ed. de Goeje, i., al-Iṣṭakhṛī, p. 324; ii., Ibn Hawḳal, p. 375 sq.; iii., al-Muḳaddasī, p. 282). The town in those days was a third of a *farsakh* (about a mile) in length and breadth; the old city (*madīna*, Persian *shahristān*) as well as the citadel (*ḳuhandiz*) were already deserted, only the outer town (*rabaḳ*) was inhabited; in the vicinity of the earlier Kash a new town was arising. This suggests that the modern town has a site different from that of the Kash which existed before the Muslim conquest. Nothing is known of other transferences of the site. Kash is never mentioned in the history of the Mongol conquest, so that it must have submitted to the Mongols (617 = 1220) without resistance. The name *Shahr-i Sabz* first appears — on coins also — about the middle of the eighth (fourteenth) century. Many buildings were erected in Kash by Timūr, who belonged to the district of Kash, and his contemporaries; thereon cf. W. Barthold in *Zapiski vost. otd. arkh. obsh.*, xxiii. 1 sq. Especially famous is the palace Aḳ Sarāy built at the end of 782 (beginning of 1380) by builders from Khwārizm; cf. Sharaf al-Din Yazdī, *Zafar Nāme*, Calcutta 1887—8, i. 301 sq., and the notices by Nizām al-Din Shāmi and ʿAbd al-Razzāk Samarḳandī in W. Barthold, *Ulugbeg i ego vremya*, Petrograd 1918, p. 23; very little survives of this palace; on the inscriptions cf. N. Sitnyakowskiy in *Protokolli Turk. Kruzhka Lyub. Arkh.*, v. 114 sq. As late as the tenth (sixteenth) century Kash or *Shahr-i Sabz* is described by Ḥāfiẓ-i Tānīsh (*ʿAbd Allāh Nāme*, MS. of the Asiat. Museum, 574 age, f. 87b) as an important town usually governed by a prince of the ruling house, while the administration of Nasaf or *Ḳarshī* [q. v.] could be left to a military official (*Darughā*). At the present day the situation is reversed and *Shahr-i Sabz* is an unimportant town in comparison with *Ḳarshī*, the result of the political changes in the twelfth (eighteenth) century. The district of *Shahr-i Sabz* is surrounded by hills on north, south and east, so that it can hardly be expected that this region will be soon linked up with the railway system, while *Ḳarshī* is already connected by railway with Bukhārā and Termedh; the town of *Shahr-i Sabz* has therefore little prospect of renewing its prosperity.

BARTHOLD)

KĀSHĀN (in Arab authors often *Kāshān*), a town in Irāk ʿAdjamī (al-Djibāl, Media) three days' journey from Isfahān and twelve *farsakh*'s from Ḳumm. It is an ancient town which is said to have been rebuilt by Zubaida, wife of Ḥārūn al-Rashid. The heat there is excessive in summer, but the winter is very mild. Water, which is scarce, is brought by an aqueduct from the spring at the castle of Fīn outside the town, to which

the inhabitants go on pilgrimage once a year. The melons and figs of this locality are esteemed. Large numbers of big, black and very dangerous scorpions are found there. The natives are all Shī'is and were already noted for their devotion to the twelve Imāms at a time when this part of the world was still Sunnī. In expectation of the return of the hidden Imām, they used to go out every morning with great ceremony to be ready to meet him; after a long wait they returned home disappointed but not discouraged. Almost the same thing was done at Hilla (Cl. Huart, *Histoire des Arabes*, ii. 324—5).

The town was destroyed by an earthquake in the reign of the Wakil Karīm Khān Zand, who had it rebuilt. Situated in the centre of a fertile plain, it was surrounded by walls flanked with towers, with a deep ditch running all round; it had six gates. Although not very important (15,000 inhabitants of whom 300 were Jews at the beginning of the nineteenth century), it is one of the prettiest towns in Persia; its streets are clean and paved. According to A. Williams Jackson, *Persia Past and Present*, New-York 1906, p. 410, it has now about 20,000 inhabitants. Its manufactures are cauldrons, silks embroidered with gold and silver flowers, plain stuffs with strips of colour and a kind of velours. Gold, silver and steel are worked there. It has become especially famous for the plaques of faience called *Kāshī* [q.v.], of which there was no longer any trace as early as 1808.

(CL. HUART)

KĀSHĀNĪ. [See 'ABD AL-RAZZĀK].

KĀSHĀNĪ, ḤĀDJJĪ MIRZĀ DJĀNĪ, the Bābī historian, was a merchant of Kāshān who, with two of his three brothers, ḤĀDJJĪ MIRZĀ ISMĀ'IL DABĪH and ḤĀDJJĪ MIRZĀ AḤMAD, was among the earliest disciples of Mirzā 'Alī Muḥammad, the Bāb. When the Bāb, in 1847, was being conducted from Iṣfahān to his prison at Mākū the brothers bribed his escort to allow him to be their guest for two days and two nights at Kāshān. In the following year Kāshānī, with Bahā' Allāh, Ṣubḥ-i Azal and other prominent disciples, attempted to join the Bābī insurgents of Shaikh Ṭabarsī near Bārfurūsh in Māzandarān but was captured by the royal troops and imprisoned for some time at Āmul, until ransomed by two merchants of Kāshān. "We find him always impelled, as it would appear, by religious zeal, now at Bārfurūsh, now at Mashhad, now at Tīhrān." The Bāb was put to death on July 9, 1850, and Kāshānī occupied the next two

years in writing his history of the movement, for which task he was qualified by personal acquaintance not only with the Bāb, but with Ṣubḥ-i Azal, Bahā' Allāh and almost all the early apostles of the Bābī religion and by detailed and accurate information of every event connected with the movement during the first eight years of its existence. His history (which, for some mystical reason not readily comprehensible he styled *Nuḣḣat al-Kāf* "the Point of Kāf"), is accurate, but is disfigured by fulsome and almost idolatrous adulation of his hero and by coarse abuse of his persecutors. When Nāṣir al-Dīn Shāh resolved to strike a blow at the adherents of the new religion, Kāshānī was forcibly removed from the shrine of Shāh 'Abd al-Azīm, about six miles south of Tīhrān, where he had taken sanctuary, and thrown into prison, where he shared the cell of Bahā' Allāh. On Sept. 15, 1852, he was put to death at Tīhrān in company with twenty-seven of his co-religionists. As an act of policy, in order to divert vengeance from himself and his minister, the Shāh handed the heretics over to various communities for execution and Kāshānī was delivered to Ākā Mahdī, Malik al-Tudjdjār ("chief of the merchants"). According to one account he suffered death by the bowstring, and according to another the merchants and shopkeepers of the city inflicted wounds on him until he perished.

Of his brothers Ismā'īl died at Tīhrān and Aḥmad, who, after the death of the Bāb, recognised Ṣubḥ-i Azal as his successor, was slain at Baghdād by some Bahā'īs, followers of Bahā' Allāh.

(T. W. HAIG)

KASHF, "uncover", has two technical uses. I. In prosody it is the elision of the seventh vowelised letter in the foot *maf'ūlātu*, changing it to *maf'ūlā* and farther to *maf'ūlātun* — a combination of *wāḳf* and *kāff*. This is often called *kāshf*, "cut", which is more probable; but that root has unlucky associations (Freytag, *Darstellung der arabischen Verskunst*, p. 87; De Sacy, *Grammaire arabe*², ii. — *Traité de la Prosodie*, Tab. iii.; Garcin de Tassy, *Rhétorique et Prosodie*, p. 241; al-Djurdjānī, *al-Ta'rīfāt*, under *kāshf*). — II. In the emotional religious life (*taṣawwuf*) it is the broadest term for the unveiling of the mystic. When this is analyzed more carefully it is commonly divided into three: (i.) *muḥāḍara* in which reason (*aḳl*) is the means by proof (*burhān*); (ii.) *muḳāshafa* in which taught knowledge (*'ilm*) is the means by explanation (*bayān*); (iii.) *muṣhāhada* by means of immediate, personal experience (*ma'rifa*). By (i.) *'ilm al-yāqīn* is reached by the *arḥāb al-ukūl*; this is still in the realm of reason and is not really *kāshf*. By (ii.) *'ain al-yāqīn* is reached by the *aṣḥāb al-utīm* and by (iii.) *ḥaḳḳ al-yāqīn* is reached by the *aṣḥāb al-ma'ārif*; the last is the immediate Vision of God and is sometimes called *mu'ayana* (al-Ḳushairī, *al-Risāla*, ed. with commentaries of Zakariyā al-Anṣārī and al-'Arūsī, Būlāk 1290, ii. p. 79 sqq.; on this cf. K. Hartmann, *al-Ḳushairīs Darstellung des Sūfismus* (*Türk. Bibl.*,

xviii.), p. 72 sqq.; Hudjwiri, *Kashf al-Mahdżub*, transl. Nicholson, p. 373 sqq. and by index.

Bibliography: Is given above; add for both uses *Dict. of Techn. Terms*, ii. 1254.

(D. B. MACDONALD)

KĀSHGHAR, a town in Chinese Turkestan, called Su-le in the oldest Chinese sources; the same name is still used in Chinese official documents. The name Kāshghar first appears in Chinese transcription (K'iu-cha) in the *T'ang-shu*; cf. E. Chavannes, *Documents sur les Tou-Kiue (Turcs) occidentaux*, St. Petersburg 1903, p. 121 sq. On the pre-Muhammadan Kāshghar and the ruins of Buddhist buildings in the vicinity see A. Stein, *Ancient Khotan*, Oxford 1907, i. 52 sq.; do., *Serindia*, Oxford 1921, p. 80 sq. Arab armies did not reach Kāshghar; the story of Kūtaiba's campaign in 96 (715) is, as H. A. R. Gibb (*Bulletin of the School of Oriental Studies*, ii. 467 sq.) has shown, a mere legend. On the flight of a prince of Farghāna to Kāshghar in the time of the Caliph al-Manṣūr (755-775) see the article FARGHĀNA. In the Sāmānid period a *Dihkān* of Kāshghar with the name or title Tughān Tegin is mentioned (Ibn al-Athīr, ed. Tornberg, viii. 37), with whom the rebel prince Ilyās b. Ishāk took refuge; whether this *Dihkān* had already adopted Islām is not mentioned. At a later date Satuk Boghrā Khān is mentioned as the first Muslim Khān of Kāshghar; in the oldest reference to him that we have (*Djamāl Kūrashī* in Barthold, *Turkestan w epokhu mongolskago nashestiwiya*, i., St. Petersburg 1898, p. 130 sq.) the date of his death is given as 344 (955). This story already contains features which are certainly legendary; in the story of the building of the first mosque we have the well-known folklore motif of the cutting of an ox-skin into strips. The later legend, reproduced by F. Grenard (*Journ. As.*, Ser. 9, vol. xv. 1 sq.), has not this feature but contains many other legendary traits and absolutely false dates. The year 344 A.H. is perhaps too early as probably the story of the adoption of Islām by a numerous Turkish people (200,000 tents) in 349 (960) must be referred to the Turks of Kāshghar; this story is found not only in Ibn al-Athīr (viii. 396) but also in Ibn Miskawayh (*The Eclipse of the Abbasid Caliphate*, ed. Margoliouth and Amedroz, Oxford 1921, text ii. 181, translation v. 196); the original source is probably Thābit b. Sinān al-Ṣābi' (cf. Ibn al-Athīr, viii. 476 and 491; *The Eclipse etc.*, *Index*). The tomb of Satuk Boghrā Khān is in Artūc (now pronounced Artush) north of Kāshghar, where it is still shown.

Under the rule of the İlek-Khāns [q. v.] Kāshghar was politically the most important town in what is now Chinese Turkestan; perhaps it was also the most important from the point of view of culture. In the fifth (eleventh) century there was already in existence a work in Arabic on the history of the town, composed by Abū 'l-Futūḥ 'Abd al-Ghāfir (or 'Abd al-Ghaffār) b. Ḥusain al-Alma'i al-Kādighari (sic!); the author's father, who survived his son (according to al-Sam'āni by about ten years), died in 486 (1093). On father and son and the works of the latter see al-Sam'āni, *Kitāb al-Ansāb*, ed. Margoliouth, Leiden-London 1912, f. 470a and 472a; *Djamāl Kūrashī* in Barthold, *Turkestan etc.*, i. 123 sq. The rulers were buried in a special mausoleum (Arabic *al-djunbadha al-khākāniya*) on the bank of the Tūmen;

the first prince buried there died in Muḥarram, 424 (Dec. 7, 1032—Jan. 5, 1033) and the last in Radjab, 601 (Feb. 22—March 23, 1205). During Mongol rule a madrasa was built in Kāshghar by Mas'ūd Beg (cf. the art. BUKHARĀ); in its library was the copy of the *Shāh* of al-Djawhari used by *Djamāl Kūrashī* for his translation (E. Sachau and Éthé, *Cat. of the Persian . . . Manuscripts of the Bodleian Library*, Oxford 1889, col. 983). Kāshghar was later under the rule of the Dughlāt Amirs [see the article *Dughlāt*]; the last of them, Abū Bakr, reigned till 920 (1514), according to the statement of his relative Haidar Mirzā [q. v.] forty-eight years (*Ta'rikh-i Rashidi*, English translation, London 1895, p. 253 and 326); but this is contradicted by the author himself, who says that Kāshghar was not conquered by Abū Bakr till 885 (1480/1). Abū Bakr is the founder of the modern town. He destroyed the old fortress and in the last years of his reign rebuilt it on a new site, on the other side of the Tūmen on the tongue of land between this river and the Kizil Śu (*ibid.*, p. 286 sq. and 295).

Under the rule of the "Mongol" Khāns (cf. the *Bibliography* to the art. ČAGHATAI-KHĀN) and later under that of the Kalmūcks and Chinese the capital of the district was no longer Kāshghar but Yärkand; it is only quite recently, since the reconquest of the country by the Chinese in 1877, that Kāshghar has again attained considerable importance as the residence of the Tao-T'ai, who is over the western and southern part of Chinese Turkestan as far as the oasis of Čerčen, and the residence of the Russian and English consuls. On Kāshghar in 1873 see H. W. Bellew in Sir T. D. Fonsyth, *Mission to Yarkand in 1873*, London 1875. On modern conditions see especially Kornilow, *Kashghariya*, Tashkent 1903 (review by W. Barthold in *Zapiski vost. otd. arkh. obsch.*, xv. 131 sq.) with plan of Kāshghar on p. 268, and M. Hartmann, *Chinesisch-Turkestan*, Halle a/S. 1908, especially p. 45 sq., 89 sq., with plan of the town from Kornilow. The most important building in Kāshghar and vicinity is Ḥadrat Apāk, the tomb of the famous saint of the eleventh (seventeenth century). Kāshghar is now also of greater importance than Yärkand for its intellectual life; Yärkand, "which, down to the conquest of Kaschgaria by the Chinese, was the political capital and also the principal centre of learning and sanctity, has now fallen behind Kāschgar. Its day is over" (M. Hartmann, *op. cit.*, p. 49). The number of its inhabitants is said to be about 50,000.

(W. BARTHOLD)

KĀSHĪ (in Yakūt: KĀSHĀNĪ, KĀSHĪ; in Ibn Baṭṭūṭa: KĀSHĀNĪ), the name derived from that of the town of Kāshān [q. v.] in Persia, given to square, sometimes hexagonal, plaques of faience used in the exterior decoration of buildings or of interior walls.

It is one of the most ancient arts of nearer Asia (already known to the Assyrians and then to the Achaemenids) which survived in Persia in the middle ages, and more especially, it appears, in the town of Kāshān. The monuments of modern Persia from the time of the Ṣafawids to our day (those that are older are in ruins) are covered with these plaques of faience decorated with conventional flowers (*kāshī-kārī*), in which the predominant colours are indigo blue, turquoise blue, green, less frequently red and yellow. Those

with figures in relief are the rarest and the most esteemed.

When this industry was brought to the town of Damascus by Persian artisans — perhaps Christians (some plaques bear inscriptions in Syriac) — the Syrians called these plaques *kishānī* (from the Arabic orthography *Kāshān*). The art disappeared perhaps over a century ago; the ruins of the factory which made them are still shown outside the *Bāb Sharḥī*. These faïences were imitated in Turkey at Iznik and Kutāhiya. Recently an attempt has been made to revive this last factory, but the modern work is far from equalling the beauty of the ancient pieces; it is the same in Persia where the beautiful models of past ages are clumsily imitated at the present day.

Langlès, *Relation de Dourry-Effendi*, Paris 1810, p. 134; Morier, *Deuxième voyage*, p. 250; A. von Kremer, *Topographie von Damascus*, ii. (*Denkschr. d. K. Akad. d. Wiss.*, Vienna 1855, vi. 9). (CL. HUART)

AL-KĀSHĪ, DJAMSHĪD B. MASʿUD B. MAḤMŪD, GHĪYĀTH AL-DĪN, a Persian, was the first superintendent of Ulūgh-Beg's observatory in Samarḳand and a collaborator with this prince in the preparation of his astronomical tables. Besides his astronomical and mathematical researches he also studied medicine; he must have died about the year 840 (= 1436/7). Of his works there have survived: (1) *Zidj-i Khākānī* (the *Khākānī* tables), in Persian, in a manuscript in Constantinople (Aya Ṣofya), a supplement to the *Ilkhānī* tables (of Naṣīr al-Dīn al-Ṭūsī); (2) *Miftāḥ al-Hisāb* (key to arithmetic), in Berlin, Leiden, British Museum, India Office, etc.; the preface to it was translated by F. Woepcke (see *Bibliography*); (3) *al-Risāla al-Kamālīya*, also called *Sullam al-Samāʾ* (the ladder of heaven), on the magnitudes and distances of the heavenly bodies, in Oxford, Leiden, India Office; (4) *Risāla fī Istikhrāj al-Djaib daradja wāhida*, etc. (an essay on the calculation of the sine of a degree), in Cairo; in this *al-Kāshī* solves an equation of the third degree by an interesting process of approximation (cf. below Hankel's work).

Bibliography: Preface to the *Miftāḥ al-Hisāb*, MS. Berlin; cf. Ahlwardt, *Verzeichn.*, v. 344; H. Hankel, *Zur Gesch. der Mathematik im Altertum u. Mittelalter*, Leipzig 1874, p. 289 sqq.; F. Woepcke, *Passages relat. à des sommes de séries de cubes*, Rome 1864; H. Suter in the *Abhandl. z. Gesch. der mathem. Wissensch.*, x. 173. (H. SUTER)

KĀSHIF, MUḤAMMAD SHARĪF B. SHAMS AL-DĪN, with the *takhalluṣ* KĀSHIF-I KUMAIT, a Persian man of letters of the xith (xviith) century. What is known of his life comes mainly from the *Khātima* of his *Khazān u Bahār*. The author's father, Shams al-Dīn Muḥammad, also known as Shamsā-i Shīrāzī, was living at Karbalā when his son Muḥammad was born and left it for Isfahān in 1006 (1597/98) to escape persecution from the Sunnis. Muḥammad, the son, was then three years old so that he was born in 1003 (1594/95). In 1008 (1599—1600) Shams al-Dīn went to Mashhad and returned seven months later to Isfahān. These dates are given by the Brit. Mus. MS., according

to Rieu's *Catalogue*; from Rosen's description of the St. Petersburg MS. it seems to make the author five years old in 1006 and to put the journey to Mashhad in 1010 (1601/2). After a stay of 23 years in Isfahān the family moved to Ray where the father died in 1035 (1625/26). Muḥammad Sharīf himself was Kādī of Ray for 15 years.

In the *Tadhkira-i Naṣrābādī* (synopsis in Sprenger, *Catal. of the manuscripts of the Libraries of the King of Oudh*, i. 88 sqq.) there is a notice of Kāshif and his two brothers, Ismāʿīl Muṣṣif and Muḳīmā. The date of our author's death is unknown but must be after 1063 (1652/53). This date is given by the chronogram at the end of the *Khazān u Bahār* in the London MS. as the date of completion of the work; he mentions his other works in the *Khātima* as already written so that the *Khazān* is the last.

Works. Kāshif, who, as he himself tells us, had a literary training and devoted a considerable period to study, wrote both prose and poetry. He composed three epics, two of which (the *Lailā Madjūnūn* and the *Haft Paikar*), like very many epic poems of the later period, deal with subjects very popular since Nizāmī's time. The third was called *Abbās-nāma*, probably a panegyric on the Ṣafawid 'Abbās II (?). Then there are his shorter poems, *qaṣīda's*, *rubāʿī's* etc. His prose works are: *Sīrādī al-Munīr*, a work inspired by Sa'dī's *Gulistan*, composed in an ornate style with verses interspersed. The text is divided into 20 sections (*lam'a*) and deals with the different virtues and moral qualities which are illustrated by anecdotes. The London MS. gives 1030 (1620/21) as the date of completion of this work, but it is probable that this date refers to the time of copying the MS. and the work itself is a few years older. *Khazān u Bahār*, his last book, is a collection, also in ornate prose, of tales which his young brother Muṣṣif urged him to compile. Most of the stories are taken from the earlier *al-Farādī ba'd al-Shidda* of Ḥusain al-Dihistānī, but he details, for example, also an incident that happened to his father Shams al-Dīn. The work consists of a preface (*muḥaddama*), fourteen sections (*asās*) and a conclusion (*khātima*) (lithogr. Tabriz 1294). Two other prose works from his pen are recorded, namely *Durr-i Maknūn* and *Hawāss-i Bāṭin*.

Bibliography: Rieu, *Catalogue of the Persian Manuscripts in the British Museum*, p. 861; Supplement, p. 250 sq; Rosen, *Les manuscrits persans de l'Institut des langues orientales*, p. 285 sq; Ethé in the *Grundr. der Ir. Phil.*, ii. 246, 248, 330. (V. F. BÜCHNER)

KĀSHIFĪ, ḤUSAIN WĀʿIZ, a prolific writer, who flourished in Hirāt (during the reign of Sulṭān Ḥusain Mirzā [q. v.] and died in 910 (= 1505). Among the best known of his writings are (i.) a work on ethics, entitled *Akhḫlāq-i Muḥṣinī*, dedicated to Abu 'l-Muḥsin, a son of Sulṭān Ḥusain Mirzā, and completed in 900 (= 1495); it was printed for the first time in Calcutta, 1809, and frequently since; (ii.) a modernised version of Naṣr Allāh b. Muḥammad b. al-Ḥamīd's [q. v.] earlier Persian translation of *Kalīlah wa-Dimnah* [q. v.]; he undertook this task at the suggestion of Nizām al-Dīn Amīr Shaikh Aḥmad al-Suhailī (ob. 907 or 908 = 1501—1503) and entitled it *Anwār-i Suhailī*; it is written in a very artificial style, overladen with rhetorical ornament, and has on this account been much admired in the East;

MSS. are common, and it has been printed several times, for the first time in Calcutta, 1804. His other works comprise *Djāwāhir al-tafsīr li-tuhfat al-amīr*, a Persian commentary on the *Kurʾān*, compiled at the request of Mir ʿAlī Shīr in 899, but he only completed one out of the four volumes he had planned, and broke off this work to compile for his patron a shorter commentary, entitled *Mawāhib-i-ʿaliya*, but usually styled *Tafsīr-i-Ḥusaini*; — *Rawdat al-Shuhadā*, a history of the martyrdom of ʿAlī and his family (abridgements exist under the titles, *Dah Maʿjils* and *Muntakhab-i-Rawdat al-Shuhadā*); — *Badāʾiʿ al-Afkar fi Šanāʾiʿ al-Ashʿār*, a treatise on figures of speech and poetic artifices, as well as faults in poetic composition; — *Maḥṣan al-inshāʾ* (compiled in 907 and dedicated to Ḥusain Mirzā) and (later) *Šahīfa-i-Šihāhī*, two works containing models of epistolary composition; — *Ḫiṣṣa-ʾAthār-i-Ḥātim Tāʾi* (or, *Risāla-i-Ḥātimīya*), completed in 891, giving the story of Ḥātim Tāʾi [q. v.]; — *Tuhfat al-šalawāt*; — *Risāla al-ʿaliya fi ʾl-ahādīth al-nabawiya*; — selections from *Djālāl al-Dīn Rūmī's Mathnawī*, entitled *Lubāb-i-mathnawī*, from which shorter extracts were made, entitled *Lubb-i-Lubāb*. Several of the above works have been translated into Turkish, and the first two into English.

Bibliography: Schefer, *Chrest. pers.*, i. 190 sqq.; Ethé, *Grundriss d. Iranischen Philologie*, v. Index s.v. Ḥusain Vāʾiz; id., *Cat. Pers. MSS.*, *India Office*, Nos. 2188, 2680. (T. W. ARNOLD)

KASHISH-DAGH (in Turkish "mountain of the priests"), a name given by the Ottomans to Olympus in Mysia, at the foot of which is built on the north the town of Brussa [q. v.]. Its slopes are covered with forests now much diminished; its summit is covered with snow which only melts in summer (height 6,200 feet). Its massif is formed of granite, marble and felspar. At the time of the Ottoman conquest, Olympus was covered with convents and hermits' cells whence its Turkish name. The Christian monks were replaced by dervishes. The poet Lāmīʿi has described the two monasteries Geikli Baba and Doğlu Baba. At the foot of the mountain in a quarter of the town of Brussa is the tomb of Shaikh Shams al-Dīn Muḥammad b. ʿAlī of Bukhārā, better known by the name Sultān Amir Walī: a mosque is built over the tomb.

(CL. HUART)

KASHKĀL, a Turkish people in Persia. The name is said to be the Turkish *kaškā* "horse with a white spot on its forehead" (W. Radloff, *Versuch eines Wörterbuches der türk. Dialecte*, ii. 395). The *Kashkāi* are said to be descended from the Turkish *Khaladji* (cf. also *B.G.A.*, i. 158: *Khaladji*) mentioned by al-Iṣṭakhrī (*B.G.A.*, vol. i.) and later writers in the country between India and Sistān. The *Khaladji* are said to have migrated first to the Persian ʾIrāk where a district near Sāwa is still called *Khaladjistān*; there is still said to be a Turkish speaking people there

(private information from V. Minorskiy). The *Kashkāi* are said to have come from the ʾIrāk to Fārs where they lead a nomadic life at the present day. Their winter quarters are in the southern part of this province, especially around Fīrūsābād, where the chief of their tribe (*Ilkhānī*) is regarded *ex officio* as governor; the stronghold of Parwīza was built there by the *Ilkhānī* Šawlat al-Dawla (from 1324/5 = 1906/7). In summer they wander as far as Kumīsha and Gandemūn in the southern part of the province of Isfahān. According to Curzon (*Persia and the Persian Question*, London 1892, ii. 112 sqq.), the *Kashkāi* were a numerous people down to about 1870 (60,000 families; in case of war about 120,000 horsemen) but they suffered greatly from the famine of 1871 and 1872; at the time of Curzon's journey (1889) the number of families was said to be 25,000, while he put it at really some 10—12,000. The number 12,000 is also given by Tumanskiy (1894) for the tents of the *Kashkāi* proper, but he says the number of all the nomads for whom the *Ilkhānī* of the *Kashkāi* paid the taxes was double (24,000). Larger figures are given by later travellers: 35,000 (1906) and 55,000 (1914). In 1914 the *Kashkāi* formed a well armed division of an army of about 20,000 men and took part in the world-war on Germany's side against England. All the *Kashkāi* are fanatical Shīʿis. The men are engaged in horse-breeding (the breed is related to the Arab); the women weave carpets. A few *Kashkāi* have gone over to a settled life in the south at Dārāb and in the north at Kumīshe. According to Curzon, the *Kashkāi*, in spite of their Turkish descent, were considered to belong to the Lūr family; in their customs also they differ little from the Bakhtiyārī and Kūgelū (the Turkish tribe of the Aghācerī also belongs to this Lūr tribe); but the language of the *Kashkāi*, as the songs written down in 1914 by A. Romaskevič show, is a Southern Turki dialect closely related to the Turkoman and Aḡharbaidjānī.

(W. BARTHOLO)

KASHKŪL (P.), an oval bowl of metal, wood or coconut (calabash), worn suspended by a chain from the shoulder, in which the dervishes put the alms they receive and the food which is given them. The etymology of this word is obscure; a popular one is given by the Persians: *kašk* "draw" (imperative) and *kūl* "shoulder", "what one draws over the shoulder"; but as we find a form *kaškūl* attested in the older poets (Anwārī, Saif Isfarangi), this explanation can hardly be accepted. The dictionaries give as the first sense "beggar" and then "beggar's bowl". We are not able to say whether they are right.

In literature the word means an album, a collection of different pieces from different sources, and is applied particularly to the *Kitāb al-Kashkūl*

of Bahā al-Din al-Āmili [cf. above s.v. AL-ĀMILĪ].

(CL. HUART)

KASHMĪR (1). The name Kashmīr (in Arabic works also *Ḳashmīr*) has from early times been employed to denote the valley situated in North-west Himalaya between 33° 30' and 34° 40' N. Lat. and 74° and 75° 30' E. Long. This valley has a length from N. W. to S. E. of about 84 miles and a breadth from N. E. to S. W. of 20 to 25 m. The area is about 1900 sq. miles. It is separated from the outer hills of *Djammū*, *Rādjāwari* and *Pūnč* by the lofty *Pir Pandjāl* Range of which several peaks are more than 15,000 feet in height. On the North-west side ranges which come nearest to the valley rise to greater heights, the principal peaks being *Gwash-brārī* (17,800 ft.), *Amarnāth* (17,321 ft.) and *Haramukh* (16,903 ft.). Beyond these is an extensive mountainous district through which the passes connecting the valley with *Ladākh*, the Upper Indus valley, and Central Asia are few and difficult. The *Zādji* Pass (11,300 ft.) is the principal means of communication with *Ladākh*, and the *Burzil* Pass (13,500 ft.) with *Astōr* and *Skardū*. With the plains of India the most direct pass is via *Bhimbar* over the *Pir Pandjāl* (11,400 ft.), but the easiest and only route open throughout the year is that by *Bāramulla* where the R. *Djehlam* or *Bēhat* leaves the valley. This may be approached now most easily by the good road from *Rāwal Pindī* via *Marri*, which follows the gorge of the *Djehlam*, but the *Abbottābād* route which joins the other at *Muzaffarābād* (the confluence of the *Kishangangā* with the *Djehlam*) has more natural facilities and was most used in early days. The geography and geology of this isolated valley are fully described by *Drew*, *Lydekker* and *Oestreich*, and the historical geography has been elucidated by *Cunningham* and *Stein*.

The valley is shown to be a lacustrine basin formed by the *Djehlam* R. and its tributaries, of which the *Sind* and *Lidar* are the principal. The drying up of the lake which filled the valley is due to the removal of the rocky barrier which must have closed the exit at *Bāramulla*, and no doubt the general progressive dessiccation of this part of Asia contributed to the result. The *Wular* Lake is the principal remaining sheet of water, and the smaller *Mānasbal* Lake and the *Srinagar* Dal also deserve mention.

The surface of the valley lies between 5000 and 6000 ft. above sea level, it is nearly level and of great fertility, and seems to have attained prosperity at an early period, although its remoteness and inaccessibility protected it from many of the storms of invasion which have swept over Northern India. The people of Kashmīr, although of fine physique, have generally been stigmatized by travellers and rulers alike, from *Yuan Čwang* to *Abu 'l-Faḍl* [q. v.] and *Gulāb Singh*, as an unwarlike, cowardly and cunning race, but, as *Lawrence* has pointed out, these defects have been exaggerated by persistent oppression. It is evident that a race which maintained its independence for so many

centuries could not, even though assisted by the great natural difficulties of approaching the country, have been altogether destitute of a manly character.

Although historical information does not go back to a very early period, yet for the last two thousand years Kashmīr is exceptionally well supplied with sources of historical information. The principal of these is *Kalhana's Rādjataranginī*, a metrical chronicle composed in the xiith century, which is almost unique in India, and which as edited, translated, and annotated by *Stein* is the main source of our knowledge. Other authorities are the Chinese pilgrim, *Yuan Čwang*, who visited Kashmīr in the viith century, the chronicle of *al-Birūnī* [q. v.] in the xiith century, the *Ā'in-i Akbarī* of *Abu 'l-Faḍl*, the diary of the Emperor *Djahāngir*, and the accounts of many modern travellers, beginning with the French physician *Bernier*, who accompanied the Emperor *Awrangzēb* [q. v.] on his visit to the valley. There is also a very complete series of coins illustrating the history of Kashmīr from the 6th century till the present day through the period of the *Epthalites*, the *Hindu* kings, the *Muslimān* sultāns, the *Mughal* Emperors, the *Durrānis* of *Afghanistan*, the *Sikhs* and the present rule of the *Hindū Dogras* of *Djammū*, under British suzerainty.

The most noticeable point in the history is the immunity of the valley from the great historic conquerors. *Alexander* did not touch it, and it repelled the attack of *Maḥmūd* of *Ghaznī*. *Čingiz Khān* [q. v.] and *Timūr* passed it by as did *Bābur* [v. *BĀBER*]. It fell easily into the possession of *Akbar* after he had consolidated his power over the whole of Northern India, and it was unmolested by *Nādir Shāh* even when the *Mughal* power had crumbled away under his attacks. Yet the disorganised country succumbed at once to the attacks of the mountainbred *Afghāns* of *Aḥmad Shāh Durrānī*, and the later *Durrānis*, divided among themselves, were easily defeated by the *Sikhs*. In these cases the people of the valley, regarded simply as subjects for extortion, had no ground for preferring one set of conquerors to another, and they took no part in these later struggles.

No information about Kashmīr can be derived from classical sources before the time of *Ptolemy*, as the Greek historians or *Alexander* do not even mention it. *Ptolemy* (in the middle of the 2nd cent. A. D.) describes it as a very powerful state extending far beyond the limits of the valley, and it is evident that it formed part of the great kingdom of the *Kushāns* which spread over Northern India at that time. He calls it *Kaspeiria*, and states that it lies below the sources of the *Bidaspes*, the *Sandabal* and the *Adris*, i. e. the *Vitastā* (*Vēhat*, *Bēhat* or *Djehlam*), the *Čandra-bhāga* (*Cināb*) and the *Airawati* (*Rāvi*), a very accurate description.

Before this time however, although there is no contemporary information, there is good ground for believing that Kashmīr formed part of the dominions of *Aśōka* about 250 B. C. The defeat of *Seleukos* by *Čandragupta* had enabled the *Maurya* monarchs to extend their power northward, and the spread of *Buddhism* made it easy for *Aśōka* to extend his influence into Kashmīr when he adopted that creed. No inscription of his edicts has been found in the valley, but that at *Man-sēhra* was situated close to the most obvious route

to Bāramulla through the Pakli plain forming part of Urasā (Hazara), and Yuan Čwang tells us that he erected four stūpas in the valley.

This is confirmed by the *Rājataranginī* (i. 104), which shows the tradition still existing in Kalhapa's time. It represents Aśoka as a king who built numerous stūpas, and founded the city of Srinagari, the name of which is preserved in the modern capital Srinagar, although its actual site is marked by the temple of Pāndrēthan (i. e. Purañādhsthāna "ancient capital"), three miles away. The chronicle again embodies an actual tradition when it comes to the kings Kanishka, Djushka, and Hushka, who correspond very closely to the Kushāns Kanishka. Vāsishka, and Huwīshka, known from coins and inscriptions. We know from the Chinese and other Buddhist records that Kanishka called together the second great Buddhist council in Kashmir, and it seems probable that this took place, if the Buddhist tradition is correct, 400 years after Buddha's death, viz. the last half of the 1st century B. C. Even if the theory identifying Kanishka's date with the Śāka era should prove correct, this council cannot be dated later than the first cent. After the decay of the great Kushān kingdom it is probable that Kashmir remained under the rule of minor chiefs of that race who were overthrown by the Ephthalites or White Huns in the early part of the vith century.

All through this early period the name Kashmir or some similar form seems to have been in use. Stein shows that Ptolemy's Kaspeiria corresponds with a Prakrit form Kaśvira, which is preserved in the modern Kashmiri form Kaśhīr, while the older Sanskrit form Kaśmīra has survived almost unaltered in India and Persia as the appellation of the country. The derivation from a supposed Kasyapa-pura advocated by Wilson and Lassen is not now generally accepted, and the Kaspatyros of Herodotos certainly does not refer to Kashmir but to some place bordering on the Indus. He places it in the province of Paktyikē which must have been the later Pakhlī, the hilly district lying between the Indus and the Djehlam which gave its name to a *sarkār* of the Mughal empire under Akbar). Hekataios also mentions Kaspatyros as a city of the Gandarians. In the vith cent. the Chinese pilgrims adopted the name Ki-pūi for Kashmir, but Yuan Čwang also uses the form Ka-si-mi-lo.

The Ephthalite occupation of Kashmir does not seem to have formed part of the direct invasion of India, which came from the west. Their king Mihira-gula seems to have been established at Sākala (Siyāl-kōt) in 520 A. D., when the Chinese pilgrim Sung-yun found him making war on Kashmir. How far he succeeded is not clear, but after his defeat in Central India in 528 A. D. he appears to have retired into Kashmir, and seems to have gradually obtained possession of the country, whence he attacked his brother who had usurped his throne in Gandhāra. Yaśōdharman, his Indian conqueror, appears to have followed him into Kashmir and struck coins there, but probably Mihira-gula remained in possession, as coins in the Kashmir style are found in the names of his successors, Khingila and Tōramāna. Yuan Čwang, who visited Kashmir early in the next century, states that Mihira-gula was a tyrant and oppressor of Buddhists. He was favourably received by the king then reigning, whose name he does not give, probably

Durlabha the founder of the Kārkoṭaka dynasty and found 100 Buddhist monasteries still existing. Shortly afterwards king Harsha of Kanawdj [q. v.] extorted from Kashmir the tooth-relic of Buddha, but did not invade the country. Relations with China were frequent during the viiith century. An embassy from China arrived in 713 A. D. After 720 A. D. the kings of Kashmir were recognized by the Chinese emperors. The last recorded embassy from China was in 759 A. D. The Kārkoṭaka dynasty was then in possession, and the embassy in 713 A. D. seems to have been due to an application by the king Candrapīḍa for assistance against the Arabs, who now appear for the first time. Muḥammad b. Qāsim after the conquest of Sindh had advanced to the foot of the Himalaya, but no further advance was made. The regular coinage of Kashmir reproducing that of the later Kushāns (with gradual degradation of designs) begins with the Kārkoṭakas and continues till the supersession of the Hindū by the Musalmān kings in the xivth century. The earlier kings of this race had possessions extending far beyond the limits of Kashmir including Pakhlī, Punč, Rājapuri, Taxila and the Salt Range.

The extension of the Kashmir style of architecture, which is found almost unaltered in the ancient temples of the Salt Range, may probably be referred to this period. Hindūism and Buddhism flourished side by side in Kashmir, as we learn from Yuan Čwang, and even as late as the xiith century when Kalhapa wrote; and the style of architecture used for the Hindū temples was probably identical with that of the Buddhist *vihāra*'s. Foucher (*L'Art Gréco-Bouddhique*, p. 136—145) has proved its derivation from the Gandhāra architecture of the ist and iind centuries. The double pyramidal roof, its distinguishing feature, has been perpetuated in Muḥammadan mosques up to the present day. The mosque of Shāh Hamadān in Srinagar shows this feature.

It is also in his account of this period that references to the Shāhīs of Gandhāra begin to appear in Kalhapa's chronicle, and (as was the case with China) the growth of Islām appears to be the cause of the alliance between Gandhāra and Kashmir. In addition to the progress made in Sindh attacks were being made on the Gandhāra border towards Kābul. Al-Tabarī tells us that as early as A. H. 23 'Asim b. 'Amr reached Kandahār (Gandhāra) and the Indian frontier, and under al-Manṣūr, 136—158 (754—775), according to al-Balādhurī, Hishām b. 'Amr al-Taghlibi, governor of Sind "conquered Kashmir and Multān . . . then he came in boats to al-Kandahār and conquered it", and al-Ya'kūbī confirms this. The territories of Kashmir which were conquered were no doubt outlying portions of the dominions between the Indus and Djehlam, and not the valley. It was no more than a raid without permanent effect on Kashmir, where the Hindū kings continued to rule undisturbed for some centuries. The most remarkable of these kings was Avantivarman (A. D. 855—883), founder of Avantipur, where the ruins of his temples still exist. He also carried out extensive works to regulate the floods of the Djehlam. The alliance with the Shāhīs is again met with in his son's time, and becomes closer as time goes on. Gopāla-varman (902—904) helped Toramāna or Kamaluka, the Kamalūā of al-Bīrūnī, to recover his capital from a rebel,

and Kshēma-gupta (950—958) married Diddā, grand-daughter on her mother's side of Bhīma, successor of Kamaluka. Diddā exercised great influence in successive reigns, and ultimately became queen herself. She was a member of the ruling family of Lohara in Pūnc, and through her influence this dynasty became rulers of Kashmir. In 404 (1013) Maḥmūd of Ghazni destroyed the Shāhi kingdom. The last king, Triločan-pāl, assisted by a Kashmir force, was defeated and put to flight, but Maḥmūd's attempt to penetrate into Kashmir itself was brought to a stop at the hill-fort of Lōhara, the Lawhūr of al-Birūnī which he describes as the strongest place he had ever seen. Even after the destruction of the Shāhi kingdom princes of that family continued to exercise influence in Kashmir. The Lōhara dynasty reign throughout the Ghaznavi period. The half mad king Harsha (1089—1101), according to Kalhana, was under Musalmān influence, employed Turkish soldiers and destroyed Hindū and Buddhist images. The employment of 'Turushka' or Turkish troops is attributed partly to the incapacity of the Kashmiris. It is evident that the country was distracted at this period by frequent plots and rebellions caused by misgovernment, and it is probable that foreign troops were employed quite as much on this account as for the reason alleged. Kalhana's chronicle comes to an end in 1149, and it is evident from the continuation by Djonarādja that the condition of affairs became worse, and also that a gradual conversion of the people to Islām was in progress. An invasion from the north by Tātars under Dhu 'l-Qadr Khān (Zulzū) took place in 706 (1305), and it is stated that after plundering Kashmir, this army perished in the snows while returning northwards. This perhaps made the way easier for the next Musalmān adventurer, Shāh-Mir Swāti (probably an Afghān), who seized the crown and brought in Muḥammadan rule under the title of Shams al-A'ẓam in 735 (1334). The change seems to have been accepted by the bulk of the nation, and the Hindūs, mainly Brahmans, who retained their religion were treated with toleration, still continuing to hold official posts. In the reign of Sikandar Shāh, 788—813 (1386—1410), a change took place, and this fanatical ruler commenced a violent persecution and reduced the ancient temples to the ruined state in which they still remain. His nickname Butshikan (Iconoclast) commemorates these deeds. Zain al-'Ābidin, who reigned 820—872 (1417—1467) reverted to the policy of toleration, and was an excellent ruler in every respect. His reign is looked back upon by Kashmiris of every class as a golden age in which justice prevailed. He constructed roads, canals, and bridges and in every way promoted the prosperity of the country. Under his successors misrule again prevailed. The Shī'ah Čaks who, according to Lawrence, probably came from Dardistān, obtained great power, and ultimately displaced the later kings of the legitimate line. Ghāzī Khān Čak was king in all but name, and Ḥusain Shāh, Muḥammad 'Alī, and Yūsuf, as shown by their coins, took the title of Bādshāh in rivalry of the Mughal emperors, and not that of Sultān used by the former kings.

After Bābur's conquest of northern India the emperors turned their eyes on Kashmir, which offered great attractions to a race accustomed to a cool climate, running streams, and gardens. Bābur

himself sent a small expedition into the country which met with no success. In 947 (1540), the year in which Humāyūn was driven from power by Shēr Shāh's rising, his cousin, Haidar Shāh Dughlāt, a member of the family ruling at Kāshghar [see DUGHĪLĀT], a man of great ability and famous as a historian [see HĀIDAR MĪRZĀ] persuaded Humāyūn to attempt the conquest of Kashmir, and thus to obtain a safe refuge from his opponents. Humāyūn, however, found himself unable to carry out the project, but Haidar Mīrzā went on with the expedition, and receiving much local support established himself as ruler in Humāyūn's name. He maintained himself till 958 (1551) when he was killed in an outbreak. This was probably organized by the Sūrī kings as a coin of Islām Shāh struck in Kashmir in 957 is known. The Čaks continued to rule until Akbar invaded the valley. In spite of the determined opposition of Ya'qūb Khān, son of Yūsuf Shāh, all resistance was overcome in 995 (1586) when Kashmir became part of the Mughal empire. It became one of the favourite resorts of the Emperors.

Akbar's first personal visit was in 997 (1589) by the Pir Pandjāl Pass, the next in 1000-1001 (1572) when he was accompanied by Nizām al-Dīn, author of the *Ṭabaqāt-i Akbarī*. On his third visit he had a land-settlement carried out by his financier, Todar Mal, and fortified the hill at Srinagar on which now stands the fort of Hari Parbat. A full description of Kashmir under Akbar is given by Abū 'l-Faḍl in the *Ā'in-i Akbarī*. Djahāngir as a prince accompanied his father to Kashmir, and indulged his fondness for the country to the full after he became emperor. He erected numerous summer palaces and laid out gardens, of which the Nishāt Bagh on the shores of the Dal, Achibal where the springs of one branch of the Djeḥlam gush from the rocks, and Vērṇāg are the best known. To please his consort, Nūr Djahān, he is said to have introduced the *chinar* or plane-tree from Persia, her native country, and the fine groves and avenues of this tree are still one of the beauties of Kashmir.

His successor Shāh Djahān also laid out many gardens, and under his reign 'Alī Mardān Khān built serais along the Pir Pandjāl road. His son, Dārā Shikōh [q. v.], built the Pari-Maḥall or Fairy Palace of which the ruins still stand on the mountain side above the Dal. Here as elsewhere the intolerant policy of Awrangzēb brought in trouble. He only visited the valley once, and some mosques erected by him still exist. The outward splendour of the empire was still undiminished, and the condition of Kashmir is vividly described by Bernier who accompanied the emperor on his visit.

Under the later emperors the administration became very bad. Nadir Shāh's invasion, although he did not touch the valley, brought in anarchy. Its *subaqaar*'s became practically independent. About 1752 Aḥmad Shāh Durrānī [q. v.] took possession and in 1756 he appointed Buland Khān Sadozai to be *subadar* of Kashmir. Coinage however continued in the name of the emperor 'Ālamgir II till 1174 (1760) and Aḥmad Shāh's first Kashmir coinage is dated 1176. (The coin of 1162 mentioned by Rodgers is shown by Whitehead to belong to the Mughal Emperor Aḥmad Shāh and not to Aḥmad Shāh Durrānī).

The condition of Kashmīr under the Durrānīs was thoroughly bad. They were barbarous and uncivilized rulers, and their governors looked on Kashmīr simply as a field for plunder and extortion. The internal wars between claimants to the throne, especially between Maḥmūd Shāh and Shudjā' al-Mulk, are faithfully reflected in the coinage. From the time 1227 (1814) when Faṭḥ-khān Bārakzai obtained possession of Kashmīr by the help of Randjit Singh, the Sikh ruler of the Paṇḍjāb, the nominal rulers were Maḥmūd Shāh and afterwards Aiyūb Shāh, but the real power was in the hands of the Bārakzai chiefs, especially Muḥammad A'zam Shāh, by whom the coins in the name of Muḥammad (1227—32) were probably struck. In 1223—1225 the anarchy prevailing is shown by the issue of coins in the name of the popular local saint, Nūr al-Dīn, instead of any nominal king. This state of affairs was brought to a close by the invasion of Randjit Singh in 1234 (1819), who annexed Kashmīr to the Sikh kingdom. The Sikh rule also was harsh and oppressive but firmer and better than that of the Durrānīs. Hari Singh was a governor noted for his severity, and Miyaṇ Singh was the most just and efficient. Moorcroft, the traveller, visited Kashmīr during this period and gives an unfavourable account of the condition of the people under Sikh rule.

Under Randjit Singh a Dōgra family of Djamṃū consisting of three brothers, Dhiyaṇ Singh, Gulāb Singh, and Suṭēt Singh, had risen into notice. They were not Sikhs but orthodox Hindūs. The Dōgras are a Rāḍpūt race of the outer hills, but not of the Kashmīr Valley. Dhiyaṇ Singh, became one of the chief officials of the Sikh state, while Gulāb Singh was invested with the Djamṃū Rāḍj, which had been confiscated by Randjit Singh about 1820. In Randjit Singh's name he annexed one hill-state after another, increasing thereby his own power, and his influence in Kashmīr itself. In this way he added Kishtwār and Ladākh to the Sikh dominions. After Randjit Singh's death in 1839 and the dissensions which followed it, Dhiyaṇ Singh's position was for a time a very powerful one, and through his help Gulāb Singh was able to consolidate his power in the mountain country. After the murder of Dhiyaṇ Singh with Maḥārāḍjā Shēr Singh, by the Sindānwāli's (1844), Gulāb Singh after a time withdrew to his mountain possessions, but previous to this he had been sent into Kashmīr to put down a mutiny in which Miyaṇ Singh, the governor, had been killed (1842). This he did successfully, but the country had again fallen into anarchy, and the rebellious Bomba tribe defied the Sikh army. In 1845, when the Khālsa army plunged into war with the British government, Gulāb Singh took no part in it, and after the war he acted as representative of the young Maḥārāḍjā Dalip Singh in the negotiations which followed. Ultimately, on the advice of Major H. Lawrence (Sir Henry Lawrence), Kashmīr and the adjoining territories between the Indus and the Rāvi were separated from the Paṇḍjāb and formed into a separate state of which Gulāb Singh became Maḥārāḍjā on payment of a subsidy and recognition of British suzerainty. The treaty in which these terms were embodied was signed in 1846. From this date begins the modern state of Djamṃū and Kashmīr.

Gulāb Singh did not obtain peaceful possession

of his new dominions. The governor Imām al-Dīn allied himself with the turbulent Bombās. Gulāb Singh's troops were defeated, and he was able to assert his authority only after a British force had entered Djamṃū. The Bombās continued to resist for several years. Ultimately all the rebellious tribes submitted. These movements had not had any hold on the agricultural population whose only desire is to live quietly and escape excessive demands from officials. Gulāb Singh's rule was on the whole firm and just, and the condition of the country gradually improved. He died in 1857 and was succeeded by his third son Ranbir Singh, a good and well meaning ruler, but lacking the strong character of Gulāb Singh. The famine of 1877—79 caused great misery in the country and the earthquake of 1885 enormous losses. Ranbir Singh was succeeded in 1885 by his eldest son, the present Maḥārāḍjā Partāb Singh, who is a pious and conservative ruler. In 1893 the famine and earthquake were followed by one of the most disastrous floods in record. In spite of these catastrophes the preservation of peace and an orderly administration has caused an enormous increase in prosperity. One of the principal contributory causes has been the establishment of a regular system of land revenue administration under the settlement made by Mr. Wingate and Mr. W. Lawrence in 1887—92, after the model of the settlements in British India. These have been since improved and developed by Mr. W. S. Talbot, settlement commissioner. The development of communications by the construction of a good road through the Djeḥlam Valley to Bāramulla and more recently the cart road from Bāramulla to the capital has been a great benefit to the country.

Kashmīr is divided for administrative purposes into the districts of South Kashmīr, North Kashmīr and Muẓaffarābād. The first two comprise the valley with the smaller river valleys and mountain slopes immediately adjoining it. The third consists of the narrow valley of the Djeḥlam below Bāramulla and that of the Kishn-gangā which joins it at Muẓaffarābād. This tract has from time immemorial been treated as part of Kashmīr. North Kashmīr was formerly known by the name of Kāmraḍj, and South Kashmīr as Marāḍj. The Kashmīrī language extends down the Djeḥlam some distance below Bāramulla, but not to Muẓaffarābād or the Kishn-gangā valley where the dialect spoken is a form of Lahndā or Western Paṇḍjābī.

The population was 1,295,201 in 1911. It consists of about 94 per cent of Musalmāns and 6 per cent of Hindūs, including a small number of Sikhs. The Hindūs are mainly Brahmans, commonly called Paṇḍits, whatever their occupation may be. The aboriginal agricultural population has become Musalmān, there has been little or no admixture of foreign races, and the original castes survive among them, but intermarriage between them is permitted, and family names (*krām*), often nicknames in their origin, have to a considerable extent superseded caste-names.

There is a great deal of artistic talent, and a natural gift for craftsmanship among the Kashmīrīs. The old established industry of shawl-weaving for which Kashmīr was once famous, has died down to very small dimensions, plain *pashmina* woven from the *pashm* or wool of the Tibetan goat has to some extent taken the place of

the shawls of the same material. Other industries have however sprung up, carpets, embroidered fells and tablecloths are made in considerable quantities, while the products of the wood carving, lacquered and painted wood and papier-maché, silverwork, and copperwork all find a good market in Europe and among tourists.

A considerable class, the Hāndjīs or boatmen, live entirely on boats on the rivers and lakes, and form a very distinct element in the population.

Kashmīr has always had an attraction for visitors, and the improvement of communications has increased the number of visitors. It has become one of the principal summer resorts for European residents in India as well as for tourists from all parts of the world, who travel about the country in camps or house boats on the rivers or settle in the upland valley of Gulmār, 8000 ft. above sea-level. Game large and small in the mountain valleys formerly attracted many sportsmen, but it is no longer abundant, and seekers after trophies now seldom visit Kashmīr.

The language of Kashmīr known as Kashmīrī or Kāshur is a Prakritic tongue differing much from the dialects of the Panjāb, and showing so much affinity in some respects with the Shīnā language of Dardistān that it is classed by Grierson with the Pisācha group of languages.

The principal travels in Kashmīr which may be consulted in addition to the earlier authorities prior to the 17th century which have been mentioned above are those of Francisco Xavier (who accompanied Akbar to Kashmīr), François Bernier (who accompanied Awrangzēb in 1664), George Forster in 1783 (during the reign of Timūr Shāh, Durrānī), William Moorcroft and George Trebeck (through Ladākḥ and thence into Kashmīr in Rāndjīt Singh's time 1819—25), Victor Jacquemont (1831), Von Hügel (1835), and Vigne (1835). For more modern time the best general descriptions are those of Drew and Lawrence and for ancient history the works of Stein.

(2). A name frequently given to Srinagar, the capital of the country of Kashmīr. It was the name applied to the mint-town under the Muḥammadan Sultāns, the Mughal emperors, the Durrānī Shāh's, and even as late as 1835 von Hügel speaks of the City of Kashmīr. The ancient name of Srinagar which, according to Kalhana, was given by Aśoka, has been revived by the Hindū rulers in modern times and is now in general use.

(3). The extensive dominions of the Mahārājās of Džammū and Kashmīr are now frequently included under the name Kashmīr in atlases and official publications such as the *Census of India*. These include vast tracts not only in the outer hills, southwest of the Pir Panjāl Mts., including Džammū and Rājāwārī, but in the inner Himalayas comprising the conquests made in the name of Rāndjīt Singh and those made by the Mahārājās of Kashmīr in more recent times. This region extends 32° to 37° 30' N. Lat. and from 73° to 80° E. Long and has an area of 84,432 sq. miles and a population of 3,158,126 in 1911. Of this population however 2,895,061 is comprised within the narrow limits of Kashmīr and Džammū, while the outer enormous area, the greater part of which consists of mountains, contains only 265,060. The countries of Ladākḥ, Skārdū (Baltistān [q. v.], Čilās, Gilgit

[q. v.], Hunza-Nagar [q. v.], and Yāsīn are comprised in this region and will be found described under their own names, the connection with Kashmīr being purely modern.

(M. LONGWORTH DAMES)

KAṢĪDA, not infrequently also *Ḳaṣīd*, is the name given to a form of Arabic (also Persian, Turkish etc.) poem of some length. The name is derived from the Arabic root *ḳaṣada* with the meaning "to aim", because in the earlier times it contained the praise of the poet's tribe and attacks upon its adversaries, later the praise of a person or family by a poet who expects and openly asks for presents for his eulogies. From the earliest times the elegy (*marṭhiya*) does not appear to be included under the same designation, but poems of insult (*hidya*) are frequently by older poets called a *ḳaṣida*, though the latter probably had frequently not the characteristics which come into the scheme of a proper *ḳaṣida*. We can form the best opinion by taking as the basis for investigation the poems of the authors who lived in the first century of the *Ḥijra*, instead of beginning with the poems preserved from the time of Paganism, though the latter formed the model of the former. A perfect *ḳaṣida* should contain three essential parts. First the *nasīb* or erotic introduction in which the poet describes his visit to the erstwhile abode of his lady and his yearnings at finding the place forsaken. Secondly follows a description of his ride to the persons whom he intends to praise. This gives him ample scope for describing the terrors of the desert and the comparison of his camel with various animals of the deserts. At last comes the chief portion of the poem containing praise, or abuse of the person or tribe aimed at. Some poets, when so inclined, finish up with some moral reflection.

An Arabic (or Persian etc.) *ḳaṣida* is a very artificial composition; the same rhyme has to run through the whole of the verses, however long the poem may be. In addition the composition is bound by a metre which the poet has to guard most scrupulously through the whole course of the poem. The result is that we cannot expect very much beautiful poetry; the description of the desert and its animals and terrors may have a certain charm at first, but when the same descriptions recur in endless poems expressed in the same manner, only with different words, the monotony becomes nauseous. The difficulty was keenly realised by the poets themselves and accounts for the fragmentary character of most poems, which required much time in their composition. The poet *Dhu 'l-Rumma* stated that for a long time he could get no further than the first verse of his now celebrated poem (No. 1 of his *Diwān*) and that it was only when he visited *Iṣfahān* that the remaining verses (128 in the edition) came to him with ease (*Asās al-Balāgha*, s. v. *s-t-l*). The poet *Djarir*, though stirred to his soul by the attacks of *Djandal*, the son of al-Rāfi, composed at first only about 80 lines of his reply, though rhyme and metre are the easiest possible in the Arabic language, and completed the remainder at a later time (*Nakā'id*, ed. Bevan, p. 430). We can likewise be sure that al-Ṭirimmāḥ composed only a portion of his renowned poem against the tribe *Tamīm* and al-Farazdaq and that the additional

verses sometimes included in the poem are by the poet himself and not interpolations by others. When a poet had composed a *ḳaṣida* he would recite it whenever an occasion offered and it is quite natural that he should add or cancel verses himself, especially if a reply to his poem opened fresh avenues of attack. Many poets certainly never rose to composition of a poem containing all the essential portions of a *ḳaṣida*, and it is foolishness to assume in each case that part of a poem has been lost if only a certain part is recorded. Such a poem was sent into the world before the poet had time to complete it and it is equally certain that lampoons in particular did not lend themselves easily to the complete scheme. Very early poets also composed poems which, though called *ḳaṣida*, did not contain the essential portion, the praise or insult. As such we must take e.g. the poems of 'Umar b. Abī Rabi'a and some poems of al-Ṭirimmāḥ. Some of the latter's compositions were made to display the art of description and were never intended to be *ḳaṣīd* in the proper sense of the word. The Arabic *ḳaṣida* was naturally imitated by poets who wrote in other languages and the Persian poets Anwarī and *Khakānī* are celebrated as masters of this style. The form of the *ḳaṣida* has survived to modern times and I have specimens by poets still living where we find the absurdity of a description of a desert-ride by persons who live in Cairo and travel by railway and steamer.

The *ḳaṣida* by its references to persons and events is also a source of historical information. This, however, must be handled with the utmost care, as false statements, by design or through ignorance, are frequent and the mention of a battle-day does not necessarily imply that the poet was present. As an example I mention only that the Asadī poets 'Abid and Bishr b. Abī Khāzim, probably a century distant from one another, both boast that their tribe was victorious at al-Nisār and al-Djifār. (F. KRENKOW)

ḲĀSIM, the name given by the Ottoman Turks to St. Demetrius whose festival falls on Oct. 26 of the Julian calendar. It was formerly the beginning of the winter semester, during which the fleet took up its winter-quarters at the Golden Horn.

AL-ḲĀSIM B. 'ISĀ AL-'IDJLĪ, usually called Abū Dulaf, a Muslim general. When in 195 (811) the Caliph al-Amin sent an army under 'Alī b. 'Isā b. Māhān against al-Ma'mūn's general Ṭāhir b. al-Ḥusain, Abū Dulaf went with him. When Ibn Māhān had fallen, Abū Dulaf came back to the neighbourhood of Hamadhān and, although he declined to pay homage to al-Ma'mūn, Ṭāhir left him in peace in al-Karadj. In 214 (829/830), when al-Ma'mūn came to Raiy, he sent for him. His friends advised him not to go, but he went and the Caliph received him with the greatest goodwill. In al-Mu'taṣim's reign, Abū Dulaf was arrested by al-Afshīn [q.v.] who was jealous of his bravery and eloquence. Al-Afshīn accused him of murder

and treason and on the evidence of false witnesses he was condemned to death but reprieved at the last minute by the intervention of the chief *kāfi* Ḥmad b. Abī Dū'ād [q. v.]. As soon as the latter heard of the danger threatening Abū Dulaḥ he hurried to al-Aḫṣīn and said the Caliph had ordered him to spare Abū Dulaḥ. When the latter had been released, Ḥmad went to the Caliph and told him that he made up the story to save the life of the innocent accused, whereupon al-Mu'taṣim forgave him and pardoned Abū Dulaḥ. The latter died in 225 (839/840) or 226 (840/841) in Baghdad. He left several works. He was also famed as an exceedingly ardent devotee of the Caliph 'Alī. On his descendants see the article DULAFIDS.

AL-ḲAṢĪM, a district in Central Arabia, on the high plateau of the Arabian desert. It owes its fertility to the Wādī Rumma', which runs to the north-east and whose course is barred by a series of parallel sand-dunes and hills from 1600—2000 feet high, which run from north-west to south-east. The water, richly provided by the spring and summer rains, sinks into the valleys and even in dry periods is preserved for years at a little depth under the red or yellow sandy soil and this supplies the essential requisite for a rich vegetation. The plateau is therefore covered in spring and summer with a rich crop of grass and affords excellent pasture for the great herds of camels and cattle and the numerous smaller animals. The sand-hills are covered with tamarisks (*afhl*, *tamarī nilotica Ehrh.*) and varieties of acacia indigenous to Arabia (*karaz*, *acacia Arabica W.*, *ḳaṭād*, *acacia Senegal W.*). Millet, maize, wheat, vetches, etc. grow in the fields. Fruit-trees of all kinds yield plentiful crops. So early a writer as Yāqūt makes special mention of the figs, peaches, grapes and pomegranates. The most important and most cultivated fruit-tree is, as elsewhere, the date-palm, which is represented in al-Ḳaṣīm by a particularly fine variety.

Among plants of economic importance may be mentioned the cotton-tree, which supplies local requirements. In the western part of al-Ḳaṣīm rock-salt is found. This mineral, so important for the cattle-breeders, is sold in the towns, especially in Boreida and 'Aneiza.

Al-Ḳaṣīm plays an important part in the caravan traffic of Arabia on account of its wealth in camels and its enterprising population. Of the population, estimated by Palgrave at 25—30,000 souls, at least a third devote themselves to caravan traffic either hiring out animals or acting as attendants or as small merchants. The caravan business takes them through the Wādī Dawāsir and Wādī Nadīrān to the Yemen, from which the best coffee is exported, to Ḳuwait, al-Baṣra, Baghdad and Djebel Shammar, to Mekka and Syria via Khaibar. It is in the nature of things that many natives of al-Ḳaṣīm settle in the frontier districts or in one of the towns just mentioned and many have attained prosperity and wealth. Al-Ḳaṣīm also plays an important part in the trade in race-horses. Al-Djarad,

also called Djarad al-Ḳaṣīm, in olden times the chief town of al-Ḳaṣīm, a day's march from 'Aneiza on the road to al-Baṣra, has been identified by A. Sprenger with the *Popda* of Ptolemy. The ancient settlements of this area which al-Ḥamdānī includes in al-Yamāma are all in ruins; the modern larger towns date from the late middle ages.

The district which lies in the centre of Arabia has had a lively history. One of the battle-“days” of the Arabs is called after it. Zuhair, Akḥṭal, 'Aws b. Ḥadjar and other poets know and mention al-Ḳaṣīm. The young faith of Islām found al-Ḳaṣīm at first on the side of the anti-prophet Musailima, but in the decisive encounter between the Muslims and the followers of the Prophet of al-Yamāma we find al-Ḳaṣīm on the side of Ḳhalīd, the “Sword of Allāh”; in the struggle for the Caliphate, Nadīd and al-Ḳaṣīm were on the side of 'Alī but the victory of the Umayyads brought the whole of Central Arabia under their sway and there was no change with the 'Abbāsids. It was not until the revolutionary movement led by the Ḳarmāṭians that Nadīd was lost to the 'Abbāsids. In the eleventh century, Dārim, a native of al-Rass in al-Ḳaṣīm, was able to conquer a large part of Nadīd and Yemen and unite it with al-Ḳaṣīm. His kingdom was inherited by his sons and successors but the increasing power of the chiefs of al-Yamāma and 'Arid conquered Dārim's kingdom bit by bit, till finally it was again reduced to al-Ḳaṣīm. Al-Ḳaṣīm was from the first somewhat hostile to the Wahhābī movement; but 'Abd al-'Azīz b. Sa'ūd of al-Darī'ya succeeded in gaining possession of Boreida, al-Rass and Tennūne. The other villages then rose and in 1772 slew all the Wahhābīs they could capture. In 1780 a new rising broke out against Ibn Sa'ūd, which he was only able to put down after much fighting with varied fortunes. Ibn Sa'ūd's kingdom soon found itself faced with an extremely dangerous opponent: Mehmed 'Alī of Egypt had been commissioned by the Sublime Porte to take measures against the Wahhābīs and sent his son Ṭūsūn to Arabia, where in a rapid succession of victories he conquered the whole of the west coast (1811—1813).

After the death of Ibn Sa'ūd (1814) the Egyptians extended their intrigues against Ibn Sa'ūd's kingdom to the interior of Arabia, and in 1815 Ṭūsūn marched into Central Arabia and captured the fortress of al-Rass in al-Ḳaṣīm after gaining over the greater part of the country by bribery. The peace concluded between Ṭūsūn and 'Abd Allāh b. Sa'ūd was, however, not confirmed by Mehmed 'Alī, who ordered Ibrāhīm to conquer Arabia; in 1817 he took al-Rass, Boreida and 'Aneiza and thus became master of al-Ḳaṣīm. 'Abd Allāh b. Sa'ūd had to retire to Darī'ya, was taken prisoner and in 1818 beheaded in Constantinople. Al-Ḳaṣīm was now under Egyptian suzerainty and formed a strong base for Mehmed 'Alī. But by 1822 the Arabs of Central Arabia had begun their war of liberation from the Egyptian occupation which ended in 1841 in the Egyptian-Turkish troops being driven out. Al-Ḳaṣīm was now for a time under the protection of the Grand Sharīf of Mekka; in 1855 Zāmal Āl Salīm, who resided at 'Aneiza, was recognised by Ibn Sa'ūd as independent ruler of al-Ḳaṣīm, but in 1861 the district was again paying tribute to Ibn Sa'ūd. After six years al-Ḳaṣīm was again able to attain its independence and in 1879 Ibn Sa'ūd surrendered his claim to suzerainty over al-Ḳaṣīm in favour of Ibn Rashīd,

lord of Ḥā'il. A rising against Muḥammad b. Rashīd in 1891 ended in disaster and Zāmal Āl Salīm lost his life in battle. The Turks then took advantage of the fierce feud between Ibn Sa'ūd and Ibn Rashīd to gain a firm footing in al-Kāşīm again, all the more easily as the people of al-Kāşīm were weary of the long struggle and anxious for peace, and even Ibn Rashīd would rather have the Turks in al-Kāşīm than the governors of his enemy Ibn Sa'ūd. Aḥmad Faizī Pasha therefore invaded Central Arabia in 1905 and occupied al-Kāşīm also. Soon the position of the Turks became untenable, especially as Ibn Rashīd now sided against them; the Turkish troops had to evacuate al-Kāşīm and Aḥmad Faizī Pasha's successor, Sāmi Pasha, was no more able to restore Turkish authority. In 1906 al-Kāşīm belonged to Ibn Sa'ūd; in 1911/12 there were again attacks on Ibn Sa'ūd, especially by the Grand Sharīf of Mekka, but since 1913 al-Kāşīm has formed a province in the wide kingdom of Ibn Sa'ūd.

KĀSIM AGHA, called **QODJA** (the old), an Ottoman court architect. He was appointed court architect in 1032 (began Nov. 5, 1622) in succession to the distinguished architect Mehmed Agha, who built the Aḥmad mosque in Sтамbul (on him cf. the *Risāla-i mi'māriye* [in MS.] of Dja'far Agha), relieved of his duties in 1053 (began March 22, 1642; cf. J. von Hammer, *G. O. R.*, v. 335) and his office given to Muṣṭafā Agha, known as *Merammetdji*, lit. "mender". But after a few months only he was restored to the office as the result of a low estimate (cf. Na'imā, *Tārīkh*, ii. 46; J. von Hammer, *op. cit.*, v. 338 sq.). His manly intervention on behalf of Köprülü Mehmed Pasha, afterwards Grand Vizier, cost him his office and dignities very soon after the Sultāna-mother Mah-Peiker (Kösem Wālide, q. v.) had appointed him to manage her affairs (*kāya*) in October, 1651, on account of his honesty. He was imprisoned in the Seven Towers and soon afterwards banished to Cyprus (Na'imā, *op. cit.*, ii. 333 sq.). He was later released and after being unsuccessful several times finally succeeded in the summer of 1655 (Na'imā, *op. cit.*, ii. 551) in getting for Mehmed Pasha the Grand Vizierate. He died, apparently at a great age, in 1070 (began Nov. 18, 1660). None of his buildings seem to have been of great importance. His work did not apparently extend to public buildings. It is only known that he was engaged in building the Ye'ni Wālide Djamī^c but hardly as the chief

architect. The part which he played as a politician in Ottoman history is more important and the historian of the empire, Na'imā, in particular, deals very fully with it.

KĀSIM-I ANWĀR, MU'IN AL-DĪN 'ALĪ, called KĀSIM-I ANWĀR, a Persian mystic and man of letters, born in 757 (1356) in Sarāb near Tabriz. For Sarāb (in Yāqūt Sarāw) Dawlatshāh, *Tadhkira*, p. 346, gives *Surkhāb*; this name is not found in Yāqūt, but Dawlatshāh has three times the phrase *Surkhāb-i Tabriz*; the name is once found in a play on words (in a *rubā'i* of Kamāl-i Khudjandī in Dawlatshāh, *op. cit.*, p. 326). According to the Persian lexicographers, *Surkhāb* is a hill near Tabriz (Vullers, *Lexicon Pers.-Lat.*, s. v., N^o. 7). Kāsim's family came from Ādhar-baidjān. His religious teachers were Šadr al-Dīn-i Ardabil (an ancestor of the Šafawids) and Šadr al-Dīn 'Alī-i Yamānī, who was a pupil of Awhād al-Dīn-i Kirmānī. As Djamī (*Nafahāt al-Uns*, p. 690) tells us, mention was made of Yamānī but not of Ardabili in a work on Kāsim's *Irādāt*, which came from the circle of his intimates. This circumstance might suggest that Kāsim did not think so highly of Ardabili's instruction. The facts given in Browne, *Hist. of Pers. Lit. under Tartar Dominion*, p. 473, contradict this, however. Among Kāsim's own *murīd*'s there must have been several free-thinkers, as Djamī, *op. cit.*, p. 690, mentions that the teacher himself was, however, free from this imputation. The truth is that he — although it cannot absolutely be proved that he was a Hurūfī — strongly sympathised with this sect (Browne, *op. cit.*, p. 479). He travelled a great deal; he first of all lived in Gilān: Gilānī expressions are several times found in his poetry. From Gilān he migrated to Khurāsān where he lived first in Nishābūr and later in Herāt. He was expelled from the latter town when the king, Shāh-Rukh, was murdered by a Hurūfī in 830 (1426/27). It was assumed that Kāsim was connected with the murderer, had harboured him and knew of the attempt beforehand. A singular story is given by Dawlatshāh, *op. cit.*, p. 346 sq., according to which he had already been expelled from Herāt once previously: some individuals had complained to the king that the *murshid* was gathering many young pupils around him, which aroused misgivings among them on moral grounds. Shāh-Rukh, according to the story, then intervened and banished Kāsim. The latter then travelled to Balkh and Samarkand but returned later to Herāt. This story is not very probable but it is evidence at any rate of the great popularity of the teacher in Herāt. Whether the libellous reason given for his expulsion is true cannot be proved either, but it must be confessed that at that time also there were great rascals among the Šūfis. It seems to be certain that Kāsim found a protector after the banishment in 830 in Ulugh Beg in Samarkand. As we also find Samarkand mentioned in the story in Dawlatshāh, it may be suggested that the story in Dawlatshāh is an invention duplicating the story of his actual banishment.

Ḳāsim later returned to Khurāsān again and settled in Khardjird in the district of Djām. There through the support of well-to-do friends he was able to lead a life of freedom from care down to his death in 837 (1433/34). Dawlatshāh, *op. cit.*, p. 348, makes him die in 835, differing from the other authorities. In addition to what Rieu says (*Catalogue*, p. 636) on the date of Ḳāsim's death see also Rosen, *Les Manuscrits persans de l'Institut*, p. 121, where a chronogram on his death is quoted from a St. Petersburg MS.

Ḳāsim was buried in Khardjird; Dawlatshāh says that in his time 'Alī Shīr began to embellish the site of the tomb with buildings. The same authority tells us that Ḳāsim in his youth practised asceticism to such an extent that he injured his health. But in later years he altered his views — for example he said to someone who could not help expressing surprise at his prosperous appearance that he was no longer 'ashik but ma'shuk; he had once been a beggar but now he was a king.

Works: The author, who, according to Dawlatshāh, *op. cit.*, p. 303, was a great admirer of the poetry of Ḥāfiz, left a *Diwān* behind him containing ghazal's, kit'ā's, rubā'ī's, elegies on mystics and mathnawīs. Some pieces are composed in Gilānī and Turkish. His other works, *Anīs al-'Arifin* and *Anīs al-'Ashiqin* (also called *Risālat al-Amāna*) are treatises on mysticism in prose and verse. Finally we may mention his extracts from Sa'dī's *Bustān* entitled *Khulāṣa-i Bustān*.

These writings are unpublished; judging from the not very extensive specimens in Browne and the few pieces in Dawlatshāh (Bland's *Century* where ten of Ḳāsim's ghazal's are published I have not seen) we can agree with Browne when he says "the poetry of Qāsimu 'l-Anwār, so far as a foreigner may venture to judge it, is only of average merit". One cannot deny his ability to write pleasing Persian verse but we look in vain for anything out of the way which would give him a claim to a place among the great names of Persian literature. A just verdict on his literary activity, however, will only be possible when his works have been published.

Phil.*, ii. 295, 299, 301; Browne, *History of Persian Literature under Tartar Dominion*, p. 352, 366, 438, 473—486; Rieu, *Catalogue*, p. 635—637; Sprenger, *Catalogue of the . . . manuscripts of the libraries of the King of Oudh.*, p. 532 sq.; *Catalogue Bankipore*, ii. 14 sqq. (V. F. BÜCHNER)

ḲĀSİM PASHA, usually called Güzeldje Ḳāsim Pasha, an Ottoman statesman. The son of Christian parents (*Is* [i.e. Ayās Pasha and Ḳāsim Pasha] *sont tous venus de chrestiens*, in C. D. Schepper, *Tagebuch*, in *Missions diplomatiques de Corn. Dpl. de Schepper, dit Scepperus, de 1523 à 1555*, par le Brn. de St.-Génois et G. A. Yssel de Schepper, in vol. xxx. of the *Mémoires de l'Académie de Belgique*, Brussels 1861, p. 169 infra), he was born in the reign of Bāyazid II and brought up in the Imperial Serāi (Ewliyā, i. 169). He attained the rank of a *rikiāb aghasi* ("stirrup-agma"), accompanied Selim I on his campaign to Egypt, was appointed governor of Hamā on its capture in August, 1516 (sandjakbeyi) (cf. L. Forrer, *Die osm. Chronik des Rustem Pascha*, Leipzig 1923,

p. 55; not in Halil Edhem, *Tagebuch der ägypt. Expedition des Sultans Selim I., aus Feriduns Sammlung der Staatsschriften*, Weimar 1916, p. 15), and soon afterwards governor of Adana. A few years afterwards, he became Beylerbeyi of Anatolia and Rumelia, probably as early as the first year of Sultān Suleimān. Appointed second vizier in 927 (began December 12, 1520) Ḳāsim Pasha held a command in the expedition against Rhodes (*Chronik des Rustem Pascha*, p. 62 at the top). When on Radjab 12, 929 (May 27, 1523) the Egyptian governor Muṣṭafā Pasha was dismissed, Ḳāsim succeeded him but lost the office with 34 days (on Sha'bān 16, 929 = June 30, 1523) (cf. J. von Hammer, *G. O. R.*, iii. 35). A few months later, when in Rabī' II (February, 1525) the traitor (khā'in) Aḥmed Pasha, his successor, was slain in a rising, he went to Cairo as governor for a second time but was again dismissed by March, 1525. Down to 935 (beginning September 15, 1528), when he once more became second vizier, he seems to have held a governorship ("Budin", i.e. Ofen [?], according to some sources, but which could only have been a temporary appointment). In May, 1533, the Fleming C. D. Schepper, envoy of the Hungarian royal widow Maria, saw him in Stambul as vizier along with the Grand Vizier Ibrāhīm Pasha [q.v.] and Ayās Pasha (d. July 13, 1539): *Cassim Bassa a la face plus grande et rouge et n'est si grand que le dict Ayas* (*op. cit.*, p. 169). In 1537 he was governing the Morea and sandjakbeyi at Modon; in the summer of this year he attacked unsuccessfully the two last bulwarks of Venetian rule in the Morea, Napoli di Romania and Malvasia (cf. Zinkeisen, *G. O. R.*, ii. 771, 783). He may have then fallen into disgrace and lived in exile. The date of his death is uncertain. In 959 (began December 29, 1551), however, he seems to have lived in the Morea in non-activity; cf. Aṭā'ī, *Dhail* on the *Shakā'ik al-Nu'māniya*, p. 23. In 944 (began June 10, 1537) he had a madrasa built for the poet Surūrī [q.v.] in the garden of the *tūrbe* of Mehmed Yazidji Oghlu [q.v.] which is now burnt down (cf. Aṭā'ī, *op. cit.*, p. 27); he cannot have, therefore, died in 939 (1532). It is certain, however, that he was buried in Gallipoli.

Ḳāsim Pasha earned lasting fame from a series of pious foundations and by building a mosque, a madrasa and a bath in Stambul. To this day one of the most important quarters in Constantinople, the Byzantine "Suburb of the Spring" (*krenides* or *pegai*) is called after him *Ḳāsim Pasha mehallesi* (cf. J. v. Hammer, *Constantinopolis und der Bosphorus*, Pest 1822, p. 55 sqq.; Ewliyā, *Siyāhet-nāme*, i. 169, 416 sqq.; *The Travels of Ewliyā*, transl. by J. v. Hammer, London 1834, i.; Ḥāfiz Ḥusain, *Ḥadiqat al-Djauāmī*, ii. 2 sqq.; J. v. Hammer, *Geschichte des osmanischen Reiches*, ix. 106 sqq.). His daughter Nefise Khātun also endowed a school and is buried in it; cf. *Ḥadiqat al-Djauāmī*, ii. 4, 3).

Bibliography: In addition to the works quoted above: *Sidjill-i othmānī*, iv. 46 sqq. (defective and inaccurate); Geoffroy, *L'Estat de la Court du grand Turc*, Paris 1542, fol. 10 v; Guil. Postel, *La tierce Partie des orientales Histoires*, Poitiers 1560, p. 61 sq. (*Cassim Bassa du temps qu'il estoit Bassa, avoit 20 mille ducats, il en peut avoir autant, de Sangeacy de Morea. Maintenant en son lieu est Moustapha Bassa*).

(FRANZ BABINGER)

KASIMOV, in Russian originally GORODEZ or GORODOK MESHČERSKIY, in Tatar KHĀN KARMĀN, formerly the capital of the Tatar princes subordinate to the Czar of Moscow and now a district capital in the gouvernement of Ryazan. It took its name from Kāsim, son of the founder of the kingdom of Qazān, Ūlū Muḥammad. In the war between the brothers that followed the assassination of Ūlū Muḥammad (1446), Kāsim was induced to enter the service of the Russian Grand Duke. The town, which bears his name, was granted him about 1452 (not later than 1456); there he built a mosque (of which only the minaret still exists) and a palace of stone (no longer standing; it was seen as late as 1768 by Pallas). After his death about 1469, his son Dāniyār reigned till about 1486. Kasimov was next under the rule of prince Nūr Dawlat of the Girāy dynasty and his sons Satilghan and Djanay. About 1512 Shaikh Awliyār (grandson of Khān Kūtūk Muḥammad), descended from another branch of the descendants of Djuṭi, is mentioned as prince of Kasimov. In 1516 his minor son Shāh 'Alī (he is so called in his epitaph, but is usually known as Shaikh 'Alī, Russian Shigaley Shigawliyarovič) was reigning (nominally). After a life of vicissitudes (he was repeatedly appointed Khān of Qazān by the Czar and then deprived of all his dignities and condemned to the severest imprisonment, then pardoned and again restored to his principality), Shāh 'Alī died childless, aged sixty-one, on Monday, Shawwāl 10, 974 (April 21, 1567). The *takya* built by him in Ramaḍān, 962 (July–August, 1555), in which are his tomb and the tombs of several of his relatives, has been several times described, first by Pallas in the year 1768, most recently by Welyaminov Zernov in 1863. During his rule in Qazān, his brother Djan 'Alī represented him in Kasimov and later ruled for a short time (1532–35) in Qazān also until he was murdered during a rising there.

The "Czar" Shāh 'Alī was succeeded in Kasimov by his distant relative Sayin Bulat, great-grandson of the Khān of the Golden Horde Aḥmad. In 1573 he adopted Christianity, received the name of Simeon, moved to Moscow and was there given by Ivan the Terrible the title of "Czar of all the Russians". He died in 1616 as the monk Stephen. It was not till 1585 that a successor to him was appointed in Kasimov, Muṣṭafā 'Alī, whose father, 'Abd Allāh b. Ak-Kubak, also a great-grandson of Khān Aḥmad, died in 1570 and was buried in Kasimov. About 1600 we find mentioned as prince of Kasimov Uraz Muḥammad of the family of Khāns of the Kirgiz Kazak, who afterwards took part in the fighting during the civil war in Russia and was killed in 1610. The last rulers of Kasimov were Arslān (grandson of the last Siberian Khān Kučum) and his son Saiyid Burhān, descended from the house of Siberian rulers; the latter, first mentioned as ruler in 1627, was baptised between 1653 and 1655 (he received the name Wasiliy) and yet remained prince of Kasimov till his death soon after 1678. To this period belongs the forcible conversion of a part of the Tatars by Misayil, Archbishop of Ryazan (1651–56); in one of these attempts at conversion the Archbishop was killed by the enraged populace. The verse from the Qur'ān (iii. 52), constantly quoted in epitaphs in Kasimov, seems to have been placed there in antagonism to the zeal of the Christian missionaries.

Even under Wasiliy the administration of Kasimov was in the hands of a Russian woyewoda; the Tatar prince exercised only nominal rule. The mother of Wasiliy, Faṭīma Sultān, was recognised as ruler in the years following Wasiliy's death on these terms; she is last mentioned in 1681. After this there was no "Czar" or "Czarevitch" (sometimes one, sometimes the other title is used) of Kasimov any longer. In the modern district capital of Kasimov the Tatars only form a comparatively small part of the population, according to the census of 1897, 13,545 souls (according to Reclus, as many as 14,100 in 1870), including 1,539 Tatars, in 1909, 17,075, including 2,000 Tatars. The Bulghar industries (tanning and shoemaking; cf. above, i. 789a), introduced to the Russians through Tatar intermediary, are especially followed in Kasimov.

Bibliography: The most thorough and still indispensable, although several new documents have since been made available, is Wilyaminov Zernov's great work "*Istoriya Kasimowskiikh Zarey si zarevichey*" (4 vols., *Trudi Vost. Otd. Imp. R. Arch. Obsch.*, ix.–xii.), on which is based almost all that has been written about the princes of Kasimov elsewhere, especially Howorth, *History of the Mongols*, ii. 429 sqq. Cf. more recently N. Lileyew, *Simeon Bekbulatowich*, Trier 1891, review by D. K(obe)ko in the *Zap. Vost. Otd.*, viii. 335 sq.; N. Shishkin, *Istoriya giroda Kasimowa*, 1889; review by V. R(osen), *ibid.*, v. 122 sq. (W. BARTHOLD).

KĀSIYŪN, a bare and rocky massif — the summit is over 4,000 feet high — commanding in the north-east the Ghūṭa [q.v.] and dominating Ṣālihiya, the suburb of Damascus. It lies between the valley of the Baradā [q.v.] and that of the Ḥalbūn. The Nahr Yazid which flows out of the Baradā runs along the foot of Kāsiyūn. "There they venerate the birthplace of Abraham on the slope adjoining the village of Barza. This mountain has been famous since remote antiquity as a place of ascension and retreat of prophets" (Ibn Djubair). Adam is said to have stayed there, Cain killed Abel there, whose body was buried on this "sacred and most venerated mountain" (Yāqūt), which is covered with sanctuaries. The encyclopaedists and the historians of Damascus associate with it several thousands of martyrs and prophets buried between the Bāb al-Farādis and the slopes of Kāsiyūn.

Bibliography: Yāqūt, *Mu'djam*, ed. Wüstenfeld, i. 557, ii. 588, iii. 363, iv. 13–15; Ibn 'Asākir, *Ta'rikh*, ed. 'Abd al-Qādir Badrān, i., Damascus 1329, p. 231–237; Ibn Djubair, ed. Wright-de Goeje, p. 273, 274.

(H. LAMMENS)

KASKAR, the name of a town in the 'Irāq. When al-Ḥajjīdjādī [q.v.], the governor of the 'Irāq appointed by the Caliph 'Abd al-Malik, had put down the rebellion there, he began in 83–86 (702–705) to build a new town which was called Wāsiṭ ("centre") because it was midway between the two older Arab capitals of this province, Kūfa in the north and Baṣra in the south. For the site of the town he chose the vicinity of the town of Kaskar on the Tigris, which had played a not unimportant part in the Sāssānian period. The new Muslim town was built on the east bank of the Tigris, while Kaskar lay opposite it on the west side; a bridge of boats linked the two halves of the city. Neither Wāsiṭ nor Kaskar

exist at the present day and until quite recently their exact situation was uncertain. In looking for the site we must not think of the modern course of the Tigris in Central and Southern Babylonia; in the days of the Caliphs this river ran much farther to the west; its course in those days probably corresponded for a good part to that of the *Shatt al-Haiy* (cf. i. 677^a, 970^a). Kaskar-Wāsiṭ certainly lay somewhere in the neighbourhood of the modern *Kut al-Haiy* (cf. i. 677^a, 970^a). According to the results of an archaeological journey by Count Aymar de Liedekerke-Beaufort (see *Babylonica*, vii., Paris 1922, p. 115) the now insignificant ruins of Wāsiṭ lie almost 25 miles west of Haiy on the dry Tigris bed of *Shatt al-Khōrder*. On the other hand the map of Mesopotamia (Sheet Baghdād, 5 d) published by the General Staff in Berlin in 1917, puts Wāsiṭ about 15 miles N. E., as the crow flies, of *Kut al-Haiy*. On the modern ruins of Wāsiṭ see also the notes by Massignon based on information given by a native of the district in his *al-Hallaj, Martyr mystique de l'Islam*, Paris 1922, p. 23. For further information on Wāsiṭ, see the article.

As to Kaskar, it probably dates back into the Assyrian period. It may be recalled that we seem to have a Babylonian town Ka-as-ka-ri mentioned in a fragment of an inscription probably of the time of Assur-banipal, in the British Museum ([18] 82:3—23:128; see Bezold, *Catalogue*, p. 1824); cf. Streck, *Assurbanipal*, Leipzig 1916, p. lxxxviii. and 790. The place is perhaps also mentioned in the Babylonian Talmud (*Yōmā*, fol. 10^a, where *Bashkar* has probably to be corrected into *Kashkar*); see Marquart, *Ērānsahr, Abh. G.W. Gött.*, New Series, iii., N^o 2, Berlin 1901, p. 164. In any case Kaskar called *Kashkar* in Syriac and Christian Arabic sources, is one of the oldest Christian towns in Babylonia. It frequently appears in the ecclesiastical history of this region. The episcopal diocese of this name was considered second in importance within the Nestorian church. Its occupant was the right arm of the patriarch of Seleucia — Ktesiphon (see *MADĀ'IN*) and his representative when the office was vacant.

Among the signatories to the acts of the Syriac councils we find bishops of *Kashkar* from the period 410—790 (Guidi in *Z.D.M.G.*, xliii. 411 and Chabot in the *N. E.*, xxxvii., Paris 1902, p. 675). According to the Syriac "chronicle of Arbela" there was a bishop in *Kashkar* as early as the first half of the third century A.D. The Christian Arabic "Chronicle of Seert" also mentions an occupant of the episcopal see there of the period before 410 A.D. On the bishopric of *Kashkar* and a list of its occupants see J. Labourt, *Le Christianisme dans l'empire Perse sous la Dynastie Sassanide*, Paris 1904, passim (s. the Index s. v.); Sachau, *Die Chronik von Arbela* (= *Abh. Pr. Ak. Wiss.*, 1915, N^o 6), p. 21; Sachau, *Zur Ausbeutung der Christentums in Asien* (= *Abh. Pr. Ak. Wiss.*, 1919, N^o 1), p. 30—31.

The town of *Kashkar*, like the bishopric which bore its name, was the home of many founders of monasteries, as may be seen from the work compiled in the eighth century by Jeshūdēnah, entitled *Keṭābā de Nakhpūtā* (ed. Chabot in *Mélang d'archéol. et d'histoire de l'Ecole Française de Rome*), xvi., Paris 1896), p. 225 sq.; the Great Abraham (d. 588) was especially famous, s. Jeshūdēnah N^o. 14; Labourt, *op. cit.*, p. 315;

A. Baumstark, *Gesch. der syrisch. Literatur*, Bonn 1922, p. 130. One of the most influential personalities at the court of the Sāsānian King Khusraw II Parwēz (590—628) was Abā of *Kashkar*; on him see Baumstark, *op. cit.*, p. 123. On other Syriac writers who belonged to *Kashkar* ('Abdī-shō', Grighō, Eliyā) see Baumstark, *op. cit.*, p. 30, 128, 420. For the Syriac sources on *Kathkar* see also the indices in Wright, *Catalogue of the Syriac Manuscripts in the British Museum* (London 1870) and Wright, *Catal. of the Syriac manuscr. in Cambridge* (Cambridge 1901), p. 1284, also in Sachau, *Katalog der syrisch. Handschr. in Berlin* (Berlin 1899), p. 923.

In the Arsakid period there seems to have been a little kingdom of *Kaskar*, which was destroyed by the first Sāsānian Ardashīr I; cf. Nöldeke, *Gesch. d. Arab. und Perser zur Zeit der Sasaniden*, (Leiden 1879) p. 13 note 5. In the Sāsānian division of the 'Irāk, *Kaskar* is mentioned as one of the 72 administrative districts; see Streck, *op. cit.*, (see *Bibl.*) p. 15, 18. It probably — as later under the Muslims — comprised roughly the district east of the Tigris, from the modern *Kut al-Amāra* in the north to the region of the mouth of the Tigris. Sometimes it is mentioned as equivalent to the district of Maisān [q.v.]. On this cf. Schaefer in *Islam*, xiv. (1924) p. 17 sq. The bishopric of *Kashkar* must have coincided pretty much with the Sāsānian district of the same name; cf. the map in Sachau, *Die Chronik von Arbela*, p. 16.

Kaskar is also given as the name of the capital of Dailam, which was usually called *Dūlāb*; cf. G. Le Strange, *The Lands of the East*, Cal., p. 174; de Morgan, *Miss. scientif. en Perse*, i. (Paris 1894), p. 276.

Bibliography: *B.S.A.*, passim; al-Balādhuri (ed. de Goeje), p. 582; Yūkut, *Mu'djam* (ed. Wüstenfeld), iv. 274; al-Kazwini, *Athār al-Bilāa* (ed. Wüstenfeld), ii. 299; Hamd Allāh Mustawfi, *Nuzhat al-Kulūb* (Gibb Mem. Ser., xxiii./i. p. 162, 6; G. Le Strange, *The Lands of the Eastern Caliphate* (Cambridge 1905), p. 39, 43, 80 and do. in *J. R. A. S.*, 1895, p. 44 sqq.; Streck, *Babylonien nach den arab. Geograph.*, ii. (Leiden 1902), p. 318 sq., 321 sq.; Ritter, *Erkunde*, x. 191. (M. STRECK)

KASR. [See **KASRA**].

KASR, fraction, a mathematical term which is used in Arab mathematics for the relation of two indefinite numbers as well as for that of distances, surfaces etc. In geometry, however, the term *al-kasr* is very rarely used; usually one says *nisbat a ilā b ka-nisbat c ilā d* ($\frac{a}{b} = \frac{c}{d}$).

While in the Arab astronomers the sine of the angle is referred to the radii of the circle which contain 12 or 60 parts, al-Bērūnī gives the radius the value 1 and the values of the sine thus appear as actual fractions in his work. In his *Kānūn Mas'ūdī* we read: "..... wa-yakūmu maḳām al-kisār allatī maḳhāridjūhā min al-iṭhnainī ila 'l-asharati wa-li-dhālīka sanmaw tilka 'l-awtār ummahāt ka-mā sammaw hādhihi 'l-kusūr ru'ūsan" (and the fractions follow in regular series which start with the [numbers] 2 to 10 and therefore they [the mathematicians] call those chords "mothers" just as they call these fractions "heads" (see Berl. Arab. MS., Okt. 275, p. 63b).

Kasr is more frequent in Algebra. The so called "expressible" fractions are the fractions with

the denominators 3 to 10, i.e. *ḥuṭṭh* ($\frac{1}{3}$), *rubʿ* ($\frac{1}{4}$), *ḥums* ($\frac{1}{5}$), *suds* ($\frac{1}{6}$) etc. In other cases, e.g. instead of $\frac{5}{11}$, one writes "five out of eleven parts". If the denominators can be broken up into factors, the following formula is used: $\frac{1}{18} =$ one sixth of one eighth. The fraction $\frac{1}{2}$ is expressed by *niṣf* (half).

(C. SCHÖV)

ḲAṢR, a palace, castle, mansion or pavilion, in which sense it is synonymous with the Turkish *küşk*. The word occurs in the *Qurʾān* three times, once in the singular and twice in the plural (*ḥuṣūr*), and is applied twice to castles on earth and once to the abodes of the faithful in Paradise. It is the common word for the palace of a king in his capital or of a governor in the chief city of a province, e.g. *Ḳaṣr-i Ḳādjār*, the Palace of the *Qājārs*, near *Tihrān*. The word, with the article, has been naturalized in Spanish as *alcazar* and is applied to old Moorish castles, such as the alcazar of Segovia and the alcazar of Seville.

Bibliography: E. W. Lane, *An Arabic-English Lexicon*, s.v.; Stanley Lane-Poole, *The Moors in Spain*, London 1887.

(T. W. HAIG)

ḲAṢR FIRʿAWN is the name given by the Moors to the ruins of the Roman city of Volubilis, which lie in a little valley of the *Djabal Zarhūn* about 20 miles N. of the present *Meknès*. Volubilis, at the entrance to the fertile plain of the *Wādī Rōm* in a district where the olive-tree flourishes, was the principal Roman centre of the interior, although it lay almost on the southern edge of the zone effectively occupied by the Romans. It was still a flourishing town in the fourth century A. D. In the fifth the Vandals, without establishing themselves there, put an end to Roman power in Morocco. The Byzantines, when they reconquered the country in the seventh century, had no effective authority outside of the north coast. There is reason to believe, however, that Volubilis left to itself was not depopulated but there grew up there, as in other parts of North Africa, a kind of state, comprising the remnants of the urban population, romanised Berbers for the most part, and the surrounding tribes under the authority of a native chief. Little by little, in the course of these two centuries this region became the centre of the great Berber confederation of the *Brāneṣ*, the dominant tribe of which at that time was the *Awrāba* (Warba) and the chief, at the time of the Muslim conquest, *Kosaila* (whose capital some authors have tried to locate in the *Awrās*, which is untenable). When the Berbers, who under the leadership of this chief, had overcome *ʿOḳba b. Nāfiʿ* and succeeded in driving the Arabs out of the whole of Africa Minor (63 = 683), had to abandon *Ḳairawān* again five years later, the Warba contingents having lost their chief and having been severely punished, returned to *Walili* (*Ulili* = Volubilis (68 = 688). These events much diminished the power of the Warba. Henceforth they lived quietly, taking no part in the great *Khārījī* risings which began in 122/740, but recuperating their strength, until the day when, after the battle of *Fakhkh*, *Idris b. ʿAbd Allāh b. al-Ḥasan b. ʿAlī* (cf. the art. *IDRĪS I*, above, ii. 450) settled in *Ulili*, where he was received by *Ishāḳ b. Muḥammad*, chief of the Warba (172 = 788/9). He

was soon recognised as sovereign by the Warba and ultimately by all the surrounding tribes either voluntarily or under compulsion. *Ulili* became the capital of a state stretching from the Atlantic to the region of *Tlemcen*, the first Muslim empire in Morocco and the centre of intense missionary activity among the heretical tribes and those which had remained Jews, Christians or pagans. It was there that *Idris* died in 177 (793), poisoned, it is said, at the instigation of *Harūn al-Raṣhīd*. His son *Idris II* [q.v.] continued his policy of conquest and conversion, but in 192 (808) abandoned *Ulili* for *Fās* which he had just founded, no doubt in order to escape from the tutelage of the Warba, whose chief *Ishāḳ b. Muḥammad* he had killed. When he himself died in 213 (823) he was buried beside his father in *Ulili*, according to most of the early authorities. But in 841 (1437) his tomb or at least a tomb reputed to be his was discovered, conveniently for political reasons, in the *Djāmiʿ al-Shurafaʿ* in *Fās*; and this tomb has become the most popular sanctuary in the town founded by him.

After the building of *Fās*, *Ulili* lost all political importance. The *Zarhūn* remained a much visited place of pilgrimage. Around the sanctuary of *Idris* rebuilt two centuries ago by *Sulṭān Mūlay Ismāʿīl*, two miles from the ruins of Volubilis in a very picturesque situation on two mounds commanded by higher hills, stands the town of *Mūlay Idris* of the *Zarhūn* with about 9,000 inhabitants, the majority *Idrisī* *sharīf*'s.

The *Idrisīd* town of *Ulili*, of which no remains seem to survive, probably lay on the site of the present town, a remarkable natural fortress. Excavations systematically conducted since 1915 in the Roman town have already yielded interesting results, bringing to light inscriptions very important for the history of the settlements of the Romans in this region and works of art of the first rank.

(HENRI BASSET)

AL-ḲAṢR AL-KABİR (*ḲṢAR AL-KEBİR*), a town in Northern Morocco, about 50 miles south of *Tangier* on the right bank of the *Wādī Lukkos*, which at one time ran through it, but the course of the stream was diverted to prevent inundations. Lying in a vast plain commanded on the east by heights it is divided into two parts, *al-Sharīʿa* in the north and *Bāb al-Wād* on the south, between which lies the *sūḳ* or market-place. The only buildings of any importance are the great mosque which is pre-Almohad, the mosque of *Sīdī al-Azmīrī* and the *Djāmiʿ al-Saida*, finished in 1689. Within and around the town are many *ḥubba*'s dedicated to local saints. The most venerated marabouts are *Abu ʿl-Ḥasan al-Ḳurshī* (*Ḳurashī*), a native of Spain who came towards the end of his life to teach in *al-Ḳaṣr* where he died in 568 or 573 (1172—73 or 1177—78), *Sīdī Ben Aḥmed*, *Sīdī ʿAlī b. Khlef b. Ghālīb*, usually called *Mūlay ʿAlī Bū Ghālem* and regarded as the patron saint of the town, and lastly *Sīdī Bel-ʿAbbās*, who is really a Jewish rabbi, *Yūda Yabalay*.

The population numbers about 9,000 belonging for the most part to the *Khlot*, *Tlik* and *Djabala*. It also includes Rifans, a few families originally from Tetwan and Fās as well as Algerians who left Tlemcen and Oran as a result of the French occupation. The Jews number 2,000. Many of them have settled in the town quite recently in such numbers that the *Mellāh* was too small for them and they had to live among the other inhabitants. They speak Arabic and Spanish but Muslims use only the former language. Industry at one time flourishing is now limited to the manufacture of cloths for local needs. Agriculture, on the other hand, is prosperous in the country around as a result of the system of combination between townsmen and tribesmen. Al-Ḳaṣr is thus a busy market for corn, barley, beans and flax.

History. The site of al-Ḳaṣr perhaps corresponds to that of a Roman town (*Oppidum novum*?) which had already disappeared by the time of the first Muslim invasions. In the second century A.H. a fortress was built in these regions by the *Danhādja*, a branch of the *Ketāma*. According to al-Ziyānī, it was built in 102 (720—721) by the Amīr ‘Abd al-Karīm al-Ketamī whence the name Ḳaṣr ‘Abd al-Karīm (al-Idrīsī, *Description de l’Afrique*, ed. Dozy and de Goeje, text p. 78; transl. p. 89; *Kitāb al-Istibṣār*, ed. von Kremer, Vienna 1852, p. 78; transl. Fagnan, Constantine 1900, p. 140; as well as Ibn Khaldūn, *Hist. des Berbères*, ed. de Slane, i. 401; transl. ii. 323) or Ḳaṣr Ketāma which the town kept for several centuries. Al-Bakrī, however, makes a distinction between *Sūk Ketāma* “a large and magnificent town situated on the river Lukkos with a *djāmi‘* and a very busy market” and Ḳaṣr *Danhādja* “a castle built on a hill and commanding a large river”. Ibn Khaldūn, on the other hand (*op. cit.*, text i. 188, transl. ii. 291), connects Ḳaṣr Ketamī with the *Danhādja* (cf. also *Kitāb al-Istibṣār*). *Sūk Ketāma* was the capital of the state governed by Idris b. al-Ḳāsim b. Ibrāhīm. Al-Muḳaddasī (*Bibl. Geogr. Arab.*, iii. 219, 7) mentions *Sūk al-Ketamī* among the towns dependent on Fās. Although eclipsed by the rapid development of Fās, al-Ḳaṣr seems to have retained a certain amount of commercial importance. Al-Idrīsī (*loc. cit.*) mentions its very busy bazaars. But it was only under the Almohads that the town rose out of the semi-obscurity in which it was vegetating. Yaḳūb al-Manṣūr surrounded it with a fortified wall and made a hunting-ground and a hospital called *Hārat al-Mudjārīn*. This is perhaps why he was regarded by Leo Africanus and Marmol as the actual founder of al-Ḳaṣr. Under the Marīnid dynasty, the town was given a madrasa by Abū ‘Inān which attracted many students and was still frequented in the xth (xvth) century. Al-Ḳaṣr recognised the authority of the Marīnids from 620 (1223—1224). In 687 (1288—1289) the latter appointed as its governor the Ra’īs Abu ‘l-Ḥasan b. Aṣḥkilūla, whose descendants for long remained lords of the town. The memory of this local dynasty, whose members, in alliance with the Banu ‘l-Aḥmar of Granada, distinguished themselves in the holy war, is still alive to-day.

The period following the disappearance of the Banū Aṣḥkilūla was one of calamities. The Portuguese, established on the coast, threatened the town. The inhabitants did not dare to cultivate the soil more than six miles from the walls. In

1503 the governor of Aḳila, Don Juan de Menecez, attempted to take it but without success. In the century following, al-Ḳaṣr became the most advanced post of the “volunteers of faith” (*Mudjāhidīn*) who harassed the Christians settled on the coast. During the period of anarchy that preceded the establishment of the *Filālī* dynasty, the town became the residence of the *Kā’id Ghilān*, who had gained possession of all *Gharb*. Driven from his capital by *Mulāy al-Rashīd* in 1078 (1668) *Ghilān* was able to return to it on the death of this prince. He held out there till 1084 (1673) when he was defeated and killed by *Mulāy Ismā’īl*. Al-Ḳaṣr fell again, this time finally, into the hands of the *Sharīf*, who dismantled its walls.

AL-ḲAṢR AL-ṢAGHĪR, a town in Morocco, now in ruins. It lay on the south bank of the Straits of Gibraltar, 14 miles W. of Ceuta, 23 miles E. of Tangier, at the head of a bay sheltered by a spur of the *Djebel Ghomāri* at the mouth of a navigable river.

In ancient times this site was perhaps occupied by a Phoenician factory and then by a Roman town (*Lissa* or *Exilissa* of Ptolemy). A fortress was erected there quite early in the period of Muslim occupation, in 90 (708/9), according to al-Ziyānī, *Archives Marocaines*, vi. 494, on the territory of the *Maṣmūda* whence the name of Ḳaṣr *Maṣmūda* (cf. Ibn Khaldūn, *Hist. des Berbères*, ed. de Slane, i. 280, 13, transl. ii. 134) which is given it by the author of the *Kitāb al-Istibṣār* and by al-Idrīsī. Al-Bakrī calls it al-Ḳaṣr al-Awwal to distinguish it from al-Ḳaṣr al-Kabir [q. v.]. According to him, it was inhabited by the Banū Ṭarīf and surrounded by great plantations. Under the Almohads it took the place of *Marsā Mūsā* as the port of embarkation for Spain. Many authors call it therefore Ḳaṣr al-Madja (*Geogr. d’Aboul-Féda*, transl. Reinaud, II/i. 185; Ibn Khaldūn, *loc. cit.*), or Ḳaṣr al-Djāwā “Castle of the crossing” (Ibn Abī Zar’, *Rawḍ al-Kirṭās*, ed. Tornberg, p. 138, 143, 146). The Almohads erected important buildings in it and established naval dockyards there. But the prosperity of the town declined in proportion as the rulers of the Maghrib lost their hold on Spain. Deprived of the income which the transport of the armies had assured them, the inhabitants turned to piracy. Al-Ḳaṣr therefore became one of the first towns that the Portuguese sought to capture. In 1458 King Alfonso V attacked it with a fleet of 80 ships and an army of 17,000 men; after repelling

two assaults, the Muslims, overwhelmed by the Christian artillery, capitulated. They were, however, granted permission to retreat with their arms and baggage. Alfonso V entered the town on Oct. 19, 1458. The great mosque was turned into a church, the fortifications were strengthened and a garrison installed under the command of Don E. de Mínecez. Two attempts made by the Sulṭān of Fās in 1458 and 1459 to recapture the town did not succeed. In 1463 the tribes of Andjera recognised the suzerainty of Portugal and in 1471 Sulṭān Mūlay Saīd signed a treaty by which he ceded al-Ḳaṣr to the king of Portugal.

Al-Ḳaṣr remained in Christian hands till 1540 but during this period it was continually being attacked by the Moors. John III therefore decided to evacuate it after previously dismantling it. Some years later (1559) a French prince, Antoine de Bourbon, king of Navarre, obtained al-Ḳaṣr in exchange for the men-at-arms that he was to supply to the Sharif of Fās but the intrigues of the king of Spain, Philip II, prevented the treaty from being carried out. Since that date no attempt has been made to rebuild the town. The inhabitants abandoned it and the harbour became silted up and no longer used except by smugglers. The site is marked by the ruins, still imposing, of the Portuguese fortress, by ditches, the remains of the wall and the ruins of the gate through which the citadel communicated with the town proper.

(G. YVER)

ḲAṢR-I SHĪRĪN, a town in the south-western part of the district of Ardīlān or Persian Kurdistan (cf. ARDILĀN) in 34° 30' N. Lat. and 45° 30' E. Long. (Greenwich) on the right bank of the Hulwān-rūd or, as the Kurds call it, the Ālwān or Ālwānd. This river alters its course, hitherto east to west, at Ḳaṣr-i Shīrīn to a southerly one and enters the Diyālā [q. v.] at Zengābād. To the west and south-west of Ḳaṣr-i Shīrīn lies the great range of Agh-Dagh; in the S. E. also on the left bank of the river run imposing mountain chains. Ḳaṣr-i Shīrīn was an important caravan station from the earliest times. The most important route through it is the very old road from Baghdād to the Īrānīan highlands — the *Tarīk Khurāsān* of the Arabs of the middle ages (cf. above, i. 926a). Ḳaṣr-i Shīrīn lies about halfway between the two stations of Khānikīn [q. v.] in the south-west and Sar-i-pul (in mediaeval times Hulwān, S. of Sar-i-pul; see

SARPUL-I ZOHĀB) in the east. Less important roads also branch off here to north, north-west and south-east.

The modern Ḳaṣr-i Shīrīn (1600 feet above sea-level) is an insignificant town surrounded by a wall of earth and stone. Outside the walls on the east is a commodious caravanserai; to the west is a fort of modern style which, according to Aubin (*op. cit.*; see the *Bibl.*), Djowān Mir built at the beginning of the sixteenth century and plundered passing pilgrims to Kerbelā and merchants from it until he was captured and killed. The population of the town, which de Morgan estimated at 3,000—6,000, is Kurdish. Shāh 'Abbās I (1587—1628) transplanted to the region of Ḳaṣr-i Shīrīn to guard the Turco-Persian frontier 900 families of the Kurdish tribe of Sandjābī (on which see Rawlinson in the *J. R. G. S.*, ix. 33; for a Lur branch of this tribe cf. Rabino, *Les Tribus de Louristan*, Paris 1916, p. 17). A Kurd chief acts as Persian governor of Ḳaṣr-i Shīrīn. Since the beginning of the sixteenth century there has been a small customs house here. Opposite the town on the left bank of the river lies the Bāgh-i Shāh = "King's Gardens", a park laid out with date palms, orange and pomegranate trees by Naṣr al-Dīn Shāh on the occasion of his pilgrimage to Kerbelā.

The most remarkable feature at Ḳaṣr-i Shīrīn, which makes it one of the most interesting places in Persia to the historian or archaeologist, is the extensive system of ruins dating from the Sāsānīan period in its vicinity. The name Ḳaṣr-i Shīrīn, "Shīrīn's Palace", dates from the later period of the Sāsānīan empire. Shīrīn, a Christian, was the favourite wife of Khusrāw II Parwēz (560—628) who called the great palace built by him as a summer residence after her. Ḳaṣr-i Shīrīn and the neighbourhood was the scene of the unhappy love-story of Shīrīn and the royal architect Farhād, which plays a great part in the romantic poetry of Persia; cf. above, ii. 67, and Justi, *Iranisches Namenbuch*, Marburg 1895, p. 102b. A rock tomb south of Ḳaṣr-i Shīrīn, for example, is popularly known as Ūtāk-i Farhād = "Farhād's chamber"; see Sarre and Herzfeld, *Iranische Felsreliefs*, p. 10. The famous lute-player, Bārbud (on him see Vullers, *Lexic. Persico-Lat.*, i. 168, and Justi, *op. cit.*, p. 63) also spent some time at the imperial court at Ḳaṣr-i Shīrīn; he also plays an important part in the cycle of legends which centre round Khusrāw Parwēz. Among the 30 melodies or songs which he composed for the king (see the list of them in Vullers, *op. cit.*, ii. 369) there is one (N^o. 4 in Vullers) entitled *Bāgh-i Shīrīn* = "Shīrīn's Garden"; another (N^o. 30 and cf. also Vullers, ii. 1299b) is entitled *Nakhk-īsgānī* = "Hunting Song", probably the *Bāgh-Nakhkīrgān* in Yākūt, iv. 113, 12. Both songs obviously refer to Ḳaṣr-i Shīrīn, the summer-residence and hunting-palace of the Sassanian ruler.

The period of Ḳaṣr-i Shīrīn's glory was only a brief one. Ten years after the death of Khusrāw II the Sāsānīan empire collapsed before the onrush of the Arabs and in the Muslim period the palaces of Ḳaṣr-i Shīrīn seem to have been no longer inhabited. They fell quickly into ruins, mainly as the result of the poor quality of the building-material used. Al-Ya'qūbī (*B. G. A.*, vii. 270) as early as 278 (891) talks of the ruins. Ibn al-Athīr (ed. Tornberg, viii. 388) mentions

that as a result of an earthquake in 345 (956) the walls of Kaşr-i Shirin cracked. The Arab and Persian authors, like Ibn Rosteh, Yāqūt, al-Kazwini and Ḥamd Allāh Mustawfi, emphasize the great scale of Kaşr-i Shirin with its halls, hermitages, treasure houses etc. and the splendid gardens containing very rare animals roaming at large in them, but give no detailed descriptions. Yāqūt and al-Kazwini give especially the story of the origin of the palace, which the former (*Mu'djam*, iv. 113) actually regarded as one of the wonders of the world.

We owe the most accurate description of the modern ruins to the French expedition of J. de Morgan. The main ruins lie on a broad plateau N. E. of the modern town. Near the latter is the quadrangular citadel of Khusraw flanked by 6 round towers (called Kal'a or Kaşr-i Khusraw, also Kal'a-i Khusrawi) surrounded by a ditch. Built as barracks for the ruler's troops, we have preserved in it one of the rare perfect examples of the military architecture of the Sāsānians. North of the Kal'a are further mounds of ruins the object of which we do not know. About 500 yards to the N. E. we reach the wall of a gigantic park in shape a not quite regular oblong, enclosing the summer-residence proper of the king, measuring, according to de Morgan, 300 acres. The wall round it which also served as an aqueduct, the highest part of which reaches 20 feet, is about 6,000 paces in extent. Another aqueduct-wall divides the park into two parts. The requisite water for the irrigation of the gardens was brought from the Hulwān-Rūd and, as already observed, led farther along the top of the miles' long surrounding wall; the aqueduct can still be traced in the Hulwān-Rūd valley until it is lost in the maze of ruins of Hawsh Kuri. In the centre of the whole scheme is the main palace, now called 'Amārat-i Khusraw (= house of Khusraw) or Hādjdjī Kal'e-sy (= pilgrim palace). It is a vast building lying east to west (1080 feet long, 625 feet broad) with vaulted rooms and a long terrace in front which is still most imposing with its huge dimensions and colonnades. Before the palace still exists a 600 yards long stretch of the aqueduct flanked by two kiosks. West of the 'Amārat-i Khusraw stands a smaller similar vaulted building with 4 doors and a square principal chamber. It is now called *Čuār Kapu* or (pure Persian) *Čār Dārwarā* = "Four Doors", or *Kal'a-i Čuār Kapu* = "Palace of the 4 Gates". The object of this building (perhaps for audiences?) is obscure.

About 3 miles E. of Kaşr-i Shirin is another late Sāsānian ruined palace, called *Hawsh Kuri* = "House of the Horses" (so the name is explained: *kur* = probably Pers. *kurrāh*, *kurāh* = colt; Rich gives the name *Hawsh Kerek*), because it is popularly believed to contain the stables of the horses belonging to the palace of Kaşr-i Shirin. These ruins which consist of a palace 600 feet long with annexes and another mound of ruins are the latest of all the palaces of Parwēz so far known.

Kaşr-i Shirin is, of course, a town of much greater antiquity than the time of this Sāsānian king. A site so favoured by nature must always have invited settlement. So far it has not been ascertained what ancient city — which must have practically occupied the site of the present town — stood here. It was still thought — e.g. by

Malcolm, Kinneir, Ker Porter — that Dastadjird was here, but this is certainly to be located in the ruins of Eski Baghdad (cf. above, i. 926). This erroneous identification was previously attacked by Buckingham, Rich (see *Bibl.*) and Ritter, ix. 484, 509. The ancient Artemita, a town of Apolloniatis, has also been suggested — e.g. by Kinneir (see *Bibl.*) —; but this is much better located in the region of the later Dastadjird [q. v.]; and Herzfeld in Sarre-Herzfeld, *Archaeol. Reise im Euphrat- u. Tigrisgebiet*, ii., Berlin 1919, p. 78. Herzfeld, *op. cit.*, ii. 329, suggests with all reserve an identification of Kaşr-i Shirin with the station Danas of the *Tabula Peutingeriana*; but see against this view my article DANAS in Pauly-Wissowa, *Realenzykl. der klass. Altertumswiss.*, Suppl., i. 337. Kaşr-i Shirin has not the slightest connection with Kinkiwār or Kaşr al-Luṣūṣ, although there was a great palace built by Khusraw Parwēz there also (cf. on this G. Le Strange, *op. cit.*, p. 188; Schwarz, *Iran im Mittelalter*, p. 494 sq.); the latter place lay much farther east between Kirmān-Shāh and Hamadḥān. This corrects Caetani, *Annali dell' Islām*, v. 17, vi. 144 (where Kaşr-i Shirin and Kinkiwār are regarded as one and the same).

There is a village 12 miles north of Kaşr-i Shirin called Kend-i Shirin. A short hour's journey above it are some oil-wells, not, however, very rich, which form part of the Anglo-Persian Oil Company's concession. On them see de Morgan, *op. cit.*, ii. 81 sq., and Schweer, *Das türkisch-persische Erdöl-vorkommen*, Hamburg 1919, p. 21, 46, 110, 112, 143—144.

Down to the Great War the Turco-Persian frontier, which was not minutely defined, ran about two hours' journey S. W. of Kaşr-i Shirin. On the Persian side the frontier was guarded by the fort of Kal'e-i Sebzi where a detachment of Sandjābi cavalry was stationed (cf. Aubin, *op. cit.*). On the place see also Rich, *op. cit.*, ii. 263 (where it is wrongly called Kalai Selzi; Buckingham calls it Khallet el-Subzey). An hour's journey beyond it is the Turkish frontier-station Kal'e Redifiye.

(M. STRECK)

KASRA, lit. "break"; name of the sign of the vowel i; the vowel itself is called *kasr*.

AL-KASTALLĀNĪ, ABU 'L-^{AS}ABBĀS AḤMAD B. MUḤAMMAD B. ABĪ BAKR AL-KHAṬĪB SHIHĀB AL-DĪN AL-SHĀRĪF, an authority on tradition and theologian, born on Dhu 'l-Ḳa'da 12, 851 (January 20, 1448) in Cairo where he spent his life as a preacher — apart from two stays of some duration in Mekka — and died on Friday, Muḥarram 7, 923 (January 31, 1517). He owes his literary fame mainly to his exhaustive commentary on the *Ṣaḥīḥ* of al-Bukhārī entitled *Irshād al-Sārī fī Sharḥ al-Bukhārī*, which exists in numerous MSS. and printed copies; of these latter the earliest may be that of Būlāḳ of 1267 and next the Lucknow edition of 1869 (others in Brockelmann, *Geschichte der arabischen Litteratur*, i. 159). The Cairo edition in 1325/6 gives the glosses of Yaḥyā al-Anṣārī and the Cairo edition of 1279 those of Ḥasan al-'Idwī (d. 1203 = 1887). In the field of Ḥādīth he wrote a *Muḥaddima* which was printed at Cairo (n. d.) with the commentary of 'Abd al-Ḥādī al-Abyārī (d. 1305 = 1883). Great popularity is enjoyed in the Muslim world by his history of the Prophet entitled *al-Mawāḥib al-laduniya fī 'l-Minal al-Muḥammadiya*, which he completed on Sha'bān 15, 899 (May 22, 1494) and which caused him to be accused of plagiarism by al-Suyūṭī. It exists in numerous MSS. and has also been printed several times, e.g. Cairo 1281, several times commented on, e.g. by al-Zurkānī (d. 1122 = 1710), printed in 8 vols. Būlāḳ 1278, 1291, and translated by 'Abd al-Bakī into Turkish, printed Stambul 1261. Not long ago al-Nabḥānī, the President of the Court of Justice in Bairūt, prepared a synopsis of it entitled *Al-Anwār al-Muḥammadiya min al-Mawāḥib al-Laduniya*, Bairūt 1310—1312. Finally in the same field he prepared a commentary on the *Kitāb al-Shamā'il* of al-Tirmidhī (*Geschichte der arab. Litt.*, i. 162). Besides studying the science of tradition he worked also at the readings of the Qur'ān. His principal work on the subject is entitled *Latā'if al-Ishārāt li-Funūn al-Ḳirā'āt*. He also wrote a biography of the teacher of Qur'ān reading, Abu 'l-Ḳasim al-Shāṭibī (*G. A. L.*, i. 409), and a commentary on the *Muḥaddima* of al-Djazarī on *Tadwīd* (op. cit., ii. 202). Finally he also wrote on mysticism and personal piety; among his works in this sphere are his *Maḳāmāt al-'Arifin*, *Masālik al-Ḥunafā'* ilā *Mashāriḥ al-Ṣalāt 'ala 'l-Nabī al-muṣṭafā'*, and his commentary on the *Burda* of al-Buṣrī (*G. A. L.*, i. 265).

KAŞTALLĀNĪ (KESTELİ), MUŞLIḤ AL-DİN MUŞTAFĀ, Ottoman theologian and Ḥanafī

jurist. Mewlānā Muşliḥ al-Din was a native of Kestel (from Latin *Castellum*), a village not far from Brussa, where in after life he built a mosque. From his native place he took the name of Kesteli or, more impressive, Kaştallānī. In his youth he attended in Brussa the lectures of the celebrated theologian Khidr Beg and on the conclusion of his theological and legal studies was appointed teacher in various medreses, for example in Mudurnu, Demotica (medrese of Urudj Pasha), and finally "guardian". Next he was for some time kaḍī of Brussa, Adrianople and in 886 (began March 2, 1481) of Stambul, but in the same year was appointed military judge of Rumelia with the rank of a fourth vizier. He was the first to hold this office separately: it had previously been combined with that of military judge of Anatolia (cf. the art. KĀZĪ-ASKER). At the same time Ḥādjđji Ḥasanzāde Mehmed Efendi was appointed the first independent military judge of Anatolia (cf. J. von Hammer, *G. O. R.*, ii. 246). In 891 (1486) he was deprived of his office. He died in 901 (1495—1496) in Stambul where he was buried in the cemetery of Eiyub. — The Ḥanafī Kaştallānī composed a number of legal works in Arabic including highly esteemed marginal glosses on the commentary of al-Taftāzānī on the *'Aḳā'id* of al-Nasafī (cf. Ḥādjđji Khalifa, *Kaṣḥ al-Zunūn*, iv. 226, as well as Brockelmann, *G. A. L.*, i. 427, which, however, belongs to ii. 196; MSS. in Berlin, N^o. 1973, and Leiden, N^o. 1998) as well as an essay on seven doubtful matters (*Ashḳāl*) in al-Djurdjānī's commentary on al-Idjī's *Kitāb al-Mawāḳif fī 'Ilm al-Kalām* (Ḥādjđji Khalifa, vi. 240), also a work *Tanfiḍ al-Ma'ālīm* (Ḥādjđji Khalifa, ii. 442), an essay on the orientation of the Kibla (*Risāla fī Djiḥat al-Kibla*; cf. Ḥādjđji Khalifa, iii. 387) and lastly a work called *Yaḳaḳa Dhawi 'l-'Iṭibār* (cf. Ḥādjđji Khalifa, vi. 511).

Bibliography: Tashköprüzade, *Shakā'ik al-Nu'māniya*, Turkish ed. by Medjdi, p. 161 sqq., Stambul 1269; *Sidjill-i 'Othmāniye*, iv. 491 sq.; 'Ashikpashazade, *Tārīkh*, p. 224, Stambul 1332.

(FRANZ BABINGER)

KAŞTAMUNİ (in the Arab geographers — Abu 'l-Fida', al-Dimashḳī, Ibn Baṭṭūta —, Ibn Bibī and on the coins Kaştamūniya with variants; al-Idrisī, ed. Jaubert, ii. 312: Kaştamūnī; *ibid.*, p. 393: Tāmūnī; the *Κασταμών* of the Byzantines, in Chalcocondylas, corresponding to the oriental form, *Κασταμώνν*, *Κασταμωνί*; corrupted in various ways by Western writers: Albertus Aquensis: *civitas Constamines*; Clavijo: *Castamea*; Benedetto Dei: *Chastarmina*, *Casstimana*; Menavino: *Castemol*; with modern Greeks and Europeans: *Kastamboli*; cf. Leunclavius, *Hist. Musulm.*, col. 313, 40), a town in N. W. Asia Minor, capital of the wilāyet of the same name, which corresponds to the ancient Paphlagonia. The town is not mentioned in classical literature although the rock tombs there show that the place was settled in historical times. In the middle ages Kaştamūnī was famous as the family stronghold of the Comnenoi, who waged a desperate warfare with the Dānīshmand-oghlu and the Saldjūks for its possession until it was finally lost to the Byzantines about the middle of the xith century A. D. The town then passed, along with the other possessions of the Dānīshmand-oghlu, under the sway of the Saldjūks of Kōnya and formed a beylerbeylik, which was hereditary in the family of Ḥusām al-Din Čöbān. On the break-up of the Saldjūks

empire, the Turkoman Isfandiār-oghlu of Aflani seized the region of Kaştamüni and made the town their capital. It was taken from them by Bāyazid I in 795 = 1392/3 but restored to them by Timūr after the battle of Angora (804 = 1401/2) and remained in their possession till they were ousted by Mehemmed II (864 = 1459/60). Henceforth Kaştamüni formed a sandjak of the eyalet of Anadolu, in more recent times a wilāyet, which besides the so-called *merkez sandjak* included the sandjak's of Boli, Kiāghri and Sinüb (Sinope). The Kaştamüni of the early Isfandiār-oghlu is described by Ibn Baṭṭūta (ed. Paris, ii. 341 sqq.); Chalcocondyles (xvth century) calls it a "flourishing and strongly fortified town" (p. 260, Bonn edition); the description in Ḥādīdī Khalifa's *Ḍiḥān-numā* (p. 648 of the first edition) dates from the beginning of the xviiith century. Kaştamüni was first visited by European travellers in the beginning of the xixth century, first of all by Kinneir in 1814.

The erstwhile family stronghold of the Comnenoi with its Byzantine and Saldjuk fortifications was abandoned and left to fall into ruins after the Turks had maintained a garrison and artillery in it down to a century ago. There are no antiquities in existence that date from the classical period but numerous buildings survive from the times of the Saldjuks and Isfandiār-oghlu. The town contains no less than 62 large or small mosques (*ḍjāmi'* and *masājid*), 16 medreses, 12 dervish monasteries, 4 libraries and 30 tombs of saints. The oldest dated building is the tekiye of the Rifa'i (called Yılanli Tekiye) of the year 671 = 1272/3; from the same period dates a mosque built in 672. The following are also worthy of special mention: — the Ḍjāmi' of Ghāzī Atābeg with medrese, of Ḥādīdī Naṣr (of the year 754 = 1353/54), that of Khwādja Ṣalāḥ al-Dīn (of the year 806 = 1403/1404), and of the last Isfandiār-oghlu, Ismā'il Beg, dated 855 = 1451/52, but these monuments have not yet been scientifically examined. They bear witness to the way in which the former lords of the land fostered Muslim culture; Ismā'il Beg himself, after his dispossession, composed a much esteemed theological work, the *Ḥulūwīyāt-i Sultānī* (cf. Rieu, *Cat. Turk. MSS.*, p. 12 sqq.). Laṭīfī [q. v.], the biographer of poets, belonged to Kaştamüni. Ḥādīdī Khalifa calls Kaştamüni the "lofty citadel" (*kā'ida*) of the Turkomans and the dialect of Turkish spoken there still survives. The population of the town was estimated at about 30,000 including 1500 Turkish speaking Greeks and 500 Armenians but the latter may have emigrated since the war.

(J. H. MORDTMANN)

KAŞTİLİYA, the name given by Arab writers to the district of Tunisia adjoining the Shuṭṭ's and to Tawzer, the most important area in Tunisia. Its boundaries are rather difficult to determine. The descriptions by Ibn Ḥawḳal and al-Idrīsī refer only to the town of Kaştiliya. Al-Bakrī, on the other hand, distinctly distinguishes between the town and the district. "The land of Kaştiliya", he says, "contains several towns, such as Tawzer, al-Ḥamma and Nefta. Tawzer, which is its metropolis, is a large town". In another passage he refers to Tawzer as marking the eastern limit of the land of Kaştiliya. 'Abd al-Wāḥid al-Marrākushī opposes the land of Kaştiliya, "formed by Tawzer and the cantons attached to it" to the "Zāb, which includes Biskra and its dependencies". Ibn Khaldūn (*Histoire des Berbères*, ed. de Slane, i. 646; transl., iii. 156) includes among the dependencies of Tawzer the "cantons" of Kaştiliya, to the south of the Shuṭṭ al-Djarid and Neftāwa. The same indications are given by al-Zarkashī. Ibn Khaldūn (*op. cit.*, i. 122; transl., i. 192), on the other hand, seems to identify the Bilād al-Djarid with the land of Kaştiliya. After enumerating among the towns of the Bilād al-Djarid, Nefta, Tawzer, Gafsa (Ḳaṣṣa) and the places in Neftāwa, he adds: "All this country is called the land of Kaştiliya." The Shaikh al-Tidjānī, in his turn, applies to Tawzer the description "capital of al-Djarid". From the fifteenth century onwards, we no longer find the terms Kaştiliya and land of Kaştiliya as the name of a district or of a town, but only those of Tawzer and Djarid, still in use at the present day. The enumeration of the towns of Africa given by al-Kairawānī (*Kitāb al-Mu'nis*, transl. Pellissier and Rémusat, p. 28) in which Kaştiliya is mentioned is probably taken from an earlier writer. In brief, the land of Kaştiliya seems to correspond very well with the present Djarid, i.e. to the group of oases (Nefta, Tawzer, al-Udyāna and al-Ḥamma) occupying the isthmus which separates the Shuṭṭ al-Djarid from the Shuṭṭ al-Gharsa and perhaps to al-Neftāwa.

The Arab authors are unanimous in praising the wealth of the land of Kaştiliya. The cultivation of dates and other fruit-trees, watered with great care, was very flourishing there. Flax, indigo and *hinnā'* were also grown. The fields of sugar-cane, noticed by Ibn Ḥawḳal, were beginning to disappear by the time of al-Bakrī and soon afterwards vanished. Commerce was active and prosperity general. In the time of al-Bakrī the taxes of this area amounted to 200,000 dinārs a year.

The population was composed for the most part of Berbers, many of whom professed Khāridjī doctrines or, as at Nefta, Shī'a doctrines. Al-Muḳaddasī (*Bibl. Geogr. Arab.*, iii. 243, 12 sqq.) and al-Bakrī mention that cynophagy was practised among them. According to al-Tidjānī, there lived alongside of the Berbers the descendants of the Rūm, who occupied this region at the Muslim conquest. When this Shaikh visited Tawzer the remains of Christian churches were still to be seen. Ibn Khaldūn (*op. cit.*, i. 646—647; transl., iii. 156) says that there were in al-Neftāwa and the land of Kaştiliya people of Frankish origin, whose ancestors had come from Sardinia and settled in the country as tributaries of the Muslims to whom they paid poll-tax.

KAṬ, **ḌJĀT** (A.), **ČĀT**, (Amharic, Galla), **ČĀTŌ** (Kaffa), is the name of a smooth-stemmed shrub, of the family of Celastraceae (represented in Central Europe by the spindle-tree: *Catha edulis*, Forskād. [or *methyscophyllum glaucum*, Ecklon et Zeyher]), reaching a height of 12 feet, which is found in East Africa from Cape Colony to north of Lake Ṭānā (Sānā) and in the Yemen. The leaves are called *kafṭa* in Arabic. These and the skins of the young shoots contain an alkaloid, *katīn*, which accounts for the stimulating or intoxicating effect of these parts of the plant (or a decoction made from them) and the widely spread use of *kāt* in the Muslim lands of Abyssinia and South-West Arabia.

In Abyssinia, as well as in S.-W. Arabia, the leaves and young shoots of the *kāt* are chewed; more rarely a decoction is used, which is either taken as "tea" or added to the Abyssinian honey-wine (Amharic *ṭādjīj*). The most esteemed are the tender shoots and young leaves which have a pleasant, sweetly aromatic flavour and are merely stimulating and anti-soporific and slightly intoxicating only in large doses, while the older tough leaves are unpleasantly astringent and have a much stronger effect. All accounts agree that the use of *kāt*, as ordinarily taken, which has become regular in all classes of society in the Yemen, undermines the physical and moral health of the people and also does the greatest damage from the economic point of view.

As a result of the enormous consumption of *kāt* leaves (about 30,000 tons are exported annually from Abyssinia and the adjoining countries) the cultivation of the shrub, which is propagated from cuttings, is very important. In the Yemen, Ḍjabal Ṣābir, Ḍjabal Raima and 'Uḍen are mentioned as the centres of its cultivation. The *kāt* twigs, which are not plucked till the plant is in its fourth year, are tied in bundles for transport (Arabic *kilwāt*, pl. *kalāwīt*) and, in order to keep them fresh as long as possible, are bound up in moist, leafy branches and banana leaves.

Kāt is first mentioned in "The Military Exploits of the Ethiopian King 'Amda Ṣeyōn against the Muslims" of the year 1332/33, which puts the following words into the mouth of 'Amda Ṣeyōn's opponent, King Ṣābr al-Dīn: "I will make.... his royal palace Mar'ādē (Arabic Mar'adā) my residence and plant *čāt* there." Al-Makrīzī († 846 = 1442) mentions the *čjāt* as a plant found in Awfāt (Ethiopic Ifāt, in Eastern Shoa [Shaua]), the leaves of which are eaten. The *Shaiḫ* 'Abd al-Kādir al-Djazīrī, who wrote in 996 (1587), says that 'Alī b. 'Umar al-Shādhīlī (al-Mashā'ī, † 827 = 1424), as is still said in West and South Arabia, introduced coffee into the Yemen, which took the place of *kafṭa*, i.e. the *kāt* leaves, previously in use. Ibn

Ḥadjar al-Haitamī († 974 = 1567) wrote at the instigation of people from Ṣan'ā and Zabīd a treatise in which he, without taking up a definite attitude to the contradictory opinions of reputable scholars regarding the effects of the *kāt*, includes the enjoyment among the *shubuhāt*, from which one should refrain. Among European travellers Niebuhr and his botanist collaborator Forskāl give the earliest accounts of our plant and its use.

KAṬ^c (A.), a cut. The Arabic verb *k-ṭ* has, as the dictionaries show, undergone a remarkably varied development of meaning both in its original and metaphorical senses. Here we only deal with cases which are of importance for the history of religion, etc.

The infinitive form *kaṭ* is not found in the Qur'an but the verb occurs in the literal meaning (Sūra v. 42: "cut off the hands of a thief, male or female" — the well-known law adopted in the Fīḫ, sometimes briefly known as *Kaṭ' al-Liṣṣ* —) and in a more metaphorical sense (Sūra ii. 25 and xiii. 25: "cut asunder what God hath ordered to be bound together").

The old reciters of the Qur'an (*kur'ān*) gave the name *kaṭ* or *waṭf* to a pause in reciting whether required by the sense or for another reason. Later reciters distinguished between the brief pause necessary to take breath and other pauses required by the sense: *kaṭ* was only applied to the first (according to others only to the last).

The grammarians give the name *alif al-kaṭ* to the strong hamza which cannot be elided in contrast to the *hamzat al-waṭf* (cf. the article ALIF). *Kaṭ* is also the deliberate division of a syntactical combination in a sentence for special reasons, e. g. for *al-ḥamidu li-'llāhi 'l-ḥamīdī*: *al-ḥamidu li-'llāhi 'l-ḥamīdu* (= *wa-huwa 'l-ḥamīdu*) or *'l-ḥamīda* (= *anī 'l-ḥamīda*).

In prosody *kaṭṭ* means the elision of the end of certain feet, e.g. the abbreviation of *fā'ilun* to *fā'il* = *fa'ilun* or of *mustaf'ilun* to *mustaf'il* = *maṭ'f'ilun*. This shortened form is then called *maḥṭūf*.

The conic section *kaṭṭ al-maḥṭūf* is of importance in mathematics and the varieties are *kaṭṭ ṣā'id*, the hyperbola, *kaṭṭ nāḳiṣ*, the ellipse, *kaṭṭ mukāfi*, the parabola and *kaṭṭ mukāfi mudjassam*, the paraboloid.

In astrology *kaṭṭ* = abscissio = ἀναίρεσις, or concrete, κλιμακτής, the great danger.

Kaṭṭ al-waraq, meaning a format of paper, has acquired some importance in the history of administration. According to the Arab accounts, *ḳirfās* (papyrus-paper was probably not used before the third or fourth century; cf. above, i. 385a) was used from Mu'āwīya's time for documents in the chancellery of the Caliph and at quite an early date we find five different formats used: (*kaṭṭ*) *ṭhuluthai* (*al-tūmār*, "sheet", called *farkha* at a late date in Mamlūk Egypt), *niṣf*, *ṭhuluth*, *rubu'* and *sudus*. The chancellery of the Caliphs in Baghdād had its own formats different from those used in Syria and even after Cairo had become the capital of the Caliphs and the chancellery there had adopted the Baghdād formats, forms peculiar to Syria continued to be distinguished. For the Mamlūk period we are most minutely informed by al-Ḳalkashandī regarding the formats usual in the chancellery of the Mamlūk court in Cairo and those used in the province of Syria. He distinguishes, giving exact particulars regarding the size and particular uses, of nine formats in use in Cairo: *kaṭṭ al-baghdādī al-kāmil*, *kaṭṭ al-baghdādī al-nāḳiṣ*, *kaṭṭ al-ṭhuluthain min al-waraq al-miṣrī*, *kaṭṭ al-niṣf*, *kaṭṭ al-ṭhuluth*, *al-kaṭṭ al-ma'rūf bi 'l-manṣūrī (rubu')*, *al-kaṭṭ al-ṣaghīr* or *kaṭṭ al-āda (sudus)*, *kaṭṭ al-shāmī al-kāmil*, *al-kaṭṭ al-ṣaghīr (min waraq al-fair)*; also four Syrian formats: *kaṭṭ al-shāmī al-kāmil*, *kaṭṭ niṣf al-ḥamawī*, *kaṭṭ al-āda min al-shāmī*, *kaṭṭ waraq al-fair*. The smallest formats were used for the pigeon post. Al-Ḳalkashandī only gives quite general observations for other countries.

In the history of religion the expression *kaṭṭ'a yaminan* meaning "to take an oath", which Pedersen (*Der Eid bei den Semiten*, p. 46; cf. also p. 12, note 5) compares with the Hebrew *ḳarāt berit*, is interesting. It is perhaps through the influence of this expression that *kaṭṭ* comes to mean "to settle, to decide", as do verbs meaning "to cut" in other Semitic languages. In logic we find it meaning "to assert something with confidence, to refute someone completely", etc., or e.g. *'alima kaṭṭ'an* or *'ala 'l-kaṭṭi* "to be absolutely sure of something", *dulil kaṭṭi* "a decisive proof".

A small Shī'i sect is called *Ḳaṭṭiya* because it "cuts short" the list of Imāms at the death of Mūsā 'l-Kāzim.

KAṬĀBA, a town in South Arabia. This town, the capital of the district of the same name in Yemen, lies in the Wādī 'l-Djhabān, in the plain between the Djabal Djihāf and the Djabal Mirais, in a very fertile area which produces all kinds of cereals, including a particularly noted wheat, and also coffee, *ḳāt*, tobacco, fruit, including peaches, apricots and winegrapes. The town, the population of which may be estimated at about 1,500, consists of about 100 not particularly well built houses and huts, two mosques, a bath and a bazaar. The Jewish quarter is not important. Its inhabitants are mainly engaged in the manufacture of cloth from the cotton brought from 'Aden.

(ADOLF GROHMANN)

KATABĀN, the name of a country or kingdom and people in S. W. Arabia of whose existence we have evidence from about 500 B.C. to 200 A.D. in the ancient South Arabian inscriptions and in Greek and Roman literature. The oldest records, which at the same time give us the first accurate information regarding Katabānian economic conditions, constitution and laws, have only become known in quite recent years from the hitherto published Katabānian inscriptions in the wealth of material left by E. Glaser. Along with those not exactly numerous epigraphical documents which only give us a few further isolated details of the history of the country and a geographical name or two, the scanty references in Greek and Roman literature, the only source for our knowledge before the South Arabian inscriptions were known, still retain their value for the matter they contain. On a basis of the inscriptional evidence alone one could not obtain an idea of the geographical boundaries of the land, certainly not of the configuration of the ancient kingdoms of South Arabia.

The first known mention of Katabān by the Greeks is found in Theophrastus (about 300 B.C.), *Hist. Plant.*, ix. 4, 2 — the earliest Greek source for South Arabian history —. This passage, however, as the Greek botanist, who was able to use the reports of the various journeys of exploration sent to the Arabian coast by Alexander, was only concerned with districts of Arabia that yielded aromatic plants, tells us nothing more than that Kitibaina (Katabān) and the lands of Saba, Hadramyta (Ḥaḍramūt) and a certain Mamali are the South Arabian localities for frankincense, myrrh, cassia and cinnamon. The manuscripts of Theophrastus also give the form *Karāḍaḥwa* alongside of *Kitibaina*. D. H. Müller's suggestion in Pauly-Wissowa's *Realencyklopädie d. klass. Altert.*,

s. v. Catabanes and Chatramis, to read *Καταβανία* in Theophrastus need not be accepted. Glaser wrongly supposed (*Skizze der Geschichte und Geographie Arabiens*, Berlin 1890, ii. 6, 8) that *Καταβανία* (or, as he incorrectly writes, "Kittibaina") lay on the Persian Gulf.

Later and fuller is the reference to Katabān in the synopsis in Strabo, xvi. 768, of Eratosthenes (end of the third century B. C.), who, in addition to the sources available to Theophrastus, had at his disposal itineraries of seafarers and travellers by caravan in Egypt and Petra. According to this, the *Καταβανῆς*, who are given after the Minaeans and Sabaeans in order from north to south of the four principal Arabian peoples and before the Chatramotites (inhabitants of Ḥaḍramūt), whose lands stretched farthest east, dwelled down to the straits and entrance to the Arabian Gulf (*πρὸς τὰ στενὰ καὶ τὴν διάβασιν τοῦ Ἀραβίου κόλπου*); their capital was *Τάμνα*. From Strabo's information it may be assumed that the Katabānians in the time of Eratosthenes lived in the part of the west coast south of Saba' and in the western parts of the south coast of Arabia, being the western neighbours of the Sabaeans. From Strabo's account of their lands which refers to the straits of Bāb al-Mandab, it is clear that the boundary for the kingdom in Glaser (*op. cit.*, p. 19), who sought to locate the Katabānians "mainly east of the Djabal Šabir" with the Gebanites west of them and the Ḥimyars south of the Katabānians and Gebanites, was not correct. This could have been deduced from the fact that in the time of Eratosthenes the Ḥimyars did not form an independent kingdom (cf. the art. SABA') but belonged to Katabān, which Glaser, who later modified his views considerably, had to confess in his book *Die Abessinier in Arabien und Afrika*, Munich 1895, p. 112. The *Γαβαῖοι* of Strabo (xvi. 768), the Gebanitae of Pliny (vi. 153), were presumably at this date still a part of the kingdom of Katabān (see the article GABAIOT in Pauly-Wissowa's *Realencykl.*) and only became independent about Pliny's time and at that time were, it is true, the neighbours of the Katabānians but not on the west, as Glaser supposed, but on the south-east between Katabān and Saba'. The statements in Pliny, *Nat. Hist.*, v. 65, are also in agreement with Eratosthenes, according to which the Katabānians lived in the S. W. of Arabia Felix. From the idea we get of the geography of their lands from Eratosthenes, which is nowhere contradicted, we see the impossibility of the mixture of right and wrong in the location of the four principal kingdoms in Glaser, *Punt und die süd-arabischen Reiche*, M.V.A.G., 1899, iv/ji. 21, according to which Katabān in the old period was the land south and S. W. of Saba', bounded by N. W. Ḥaḍramūt and later stretching to the straits of Bāb al-Mandab so that it originally included the land of the Ḥimyars and would appear as early as Theophrastus as the immediate neighbour of Ḥaḍramūt on the west. Glaser at the same time also assumed in the passage in Theophrastus the alteration *Σαρά* in the text (said to be = Shehrāt, Shehr, "frankincense coast") for *Σαβά*, which, however, is wrong (cf. the art. SABA'), and further altered his early views on the frontiers of Katabān (cf. below). That Eratosthenes mentions the Katabānians between Saba' and Ḥaḍramūt and that the Katabānian inscriptions found by Glaser, ac-

cording to his own words (*Abessinier*, p. 111), "all came from the region between Mārib and Shabwat" (M. Hartmann's [*Die Arabische Frage in Der islamische Orient*, vol. ii., Leipzig 1909, p. 169, 1] observation on this statement, that the description of the find-spot of Glaser's inscription N^o. 1693, "which is of Ru'ainī provenance", is not in keeping with it, can now be more easily estimated at its true value; cf. the topographical data in N. Rhodokanakis, *Katabanische Texte zur Bodenkulturschaft*, Series 2 [S. B. Ak. Wien, 1922, xcviij/ii., p. 57 sqq.]) is, as the expression quoted *πρὸς τὰ στενὰ . . . κόλπου* in Strabo shows, not sufficient evidence for the conclusion that the land of the Katabānians was limited to the territory between Saba' and Ḥaḍramūt and does not prevent — neither does another circumstance — the assumption that the kingdom of Katabān surrounded in north and east by Saba', the gradually increasing bulk of which came to include the S. W. corner of Arabia, in the time of Eratosthenes stretched to the N. E. as far as between the Wādī Ḥarīb (S. E. of Mārib) and the Wādī Baiḥān al-Kaṣāb. The expression in Strabo *καθ' ἑκόντες πρὸς τὰ στενὰ* etc. ("stretch up to the straits") is quite reconcilable with the assumption that Katabān was not only the land directly on the coast but also stretched into the interior, towards the upper Yāfi'a. — A. Sprenger's view (*Die alte Geographie Arabiens*, Bern 1875, p. 64, 254 sq., 264, 273 sq. etc.) that the Katabānians were the Arabian tribe of Kuḍā'a was absurd. Obsessed with this view, he recognised the definition of the land of Katabān in Eratosthenes as only correct "in a limited sense". When J. Halévy and J. H. Mordtmann established the identity of the land named Katabān in the South Arabian inscriptions with the similar name of a land and people mentioned by the Greeks and Romans, any linguistic connection of Katabān with Kuḍā'a and the localisation of the original nucleus of the Katabān kingdom far to the east (near the Kawr range) were ruled out (see also D. H. Müller, *Die Burgen und Schlösser Süd-arabiens*, vol. ii. [S. B. Ak. Wien, 1881, xcviij/iii.], p. 1028 sq.). Nevertheless Sprenger again at a later date in his *Bemerkungen zu Mordtmanns Anzeige von Glaser's Skizze in the Z.D.M.G.*, xlv. 505, 1, maintained a connection between the names Katabān and Kuḍā'a. Relying on the similarity in sound of the Katabān of the inscriptions to the name of the plain of Kaṭāb in the vicinity of Zaḥar (near Yarīm), the later capital of the Ḥimyars, D. H. Müller endeavoured to locate the Katabānians there, assuming that "they exercised their power in the place where traces of their existence have survived in the name of the place and where those who followed them in power had their capital" (*op. cit.*, p. 1029); cf. for this view so early a writer as Ch. Forster, *Historical Geography of Arabia*, London 1844, vol. i., p. lxxx. and 84; K. Müller in the index to his edition of Strabo, p. 769, and Sprenger, *Bemerkungen*, loc. cit.

In support of the form of the name *Καταβανῆς* against *Κατταβανῆς* of most MSS. of the passage in Strabo is the form *Καταβανία* of the name of the land, a few lines below in the majority of manuscripts in the passage from Theophrastus quoted above, the form quoted below from Pliny, the *varia lectio* in Ptolemy with single *τ*, finally also the Arabic original form. The form *Καταβανῆς* has influenced the error *Κατάβανον* in the MSS.,

an error in copying the equally erroneous Χαβά-
τατον (and Καβάτατον) of the other MSS. in the
note immediately following in Strabo on the capital
of the Chatramotitae, the name of which was first
restored by Groskurd as Σάβατα (= Shabwat of
the inscriptions) (following him Kramer, Meineke,
K. Müller, etc.). On the etymology of the name
nothing definite can be asserted. Forster's [(*op. cit.*,
vol. i., p. lxxvi., 35, 83 sq., 87, 89, 91 sq., 105, 115;
vol. ii. 154) also quoted by K. Müller (*op. cit.*)]
connection of the name with the Bani Kaḥlān and
his derivation (i. 83) from *kataba* in the sense
of *scribae* or *notarii*, according to Bochart, is
simply one of the curiosities with which his book
is filled. Even C. Landberg's (*Arabica*, Leiden
1898, v. 62) derivation from *ḡatab* (pack-saddle)
in reference to the wealth of the region of Baiḥān
al-Kaṣāb in camels, is not exactly probable.

Eratosthenes calls the capital of Ḳatabān Tamna.
That the Ḳatabānians had a monarchical constitu-
tion like the Minaeans, Sabaeans and Chatramotitae
is known from the South Arabian inscriptions.
Sprenger, who (*Geographie*, p. 160) identified Τάμνα
with Θούμνα in Ptolemy, vi. 7, 37, and (p. 268,
300) consequently sought it between the Sabaean
capital Mariaba and Sabatha, the capital of Ḥaḍ-
ramūt, had, as a result of his preconceived notions
regarding the Ḳatabānians, as he himself said (p.
268) "some difficulty in finding the bulk of the
kingdom". Of the earlier writers Glaser came nearest
to settling the question of the situation of the
capital. While, according to his opinion expressed
in the *Skizze*, ii. 18 sq. (in correction of *Skizze*,
i. 48), Tamna was identical "either with Dumnat
Ḍjabā or more probably with Dumnat Khadīr....
not very far E. S. E. of (the highest part of) the
Ḍjabal Ṣābir on the road from the Turkish frontier-
customs-station of Ṣurra (Raida) to Ta'izz", he later
(*Abessinier*, p. 112, 115) said that Tamna^c (Timna^c)
of the Ḳatabānian inscriptions was Tamna^c in the
Wādī Baiḥān al-Kaṣāb and this was not only the
Τάμνα of Eratosthenes but the Thomna and Thomala
of Pliny and also the Θούμνα of Ptolemy, thus abandon-
ing his idea that the massif of the Ḍjabal Ṣābir
was the frontier of the Ḳatabānian kingdom. Of
these attempts at identification Landberg (*Arabica*,
v. 81 sq. [on the land of Ḥarīb], especially p. 100)
said that Glaser, after looking for Tamna here and
there almost found it when in his paper *Zwei
Inskriften über den Dammbruch von Mārib* (*M.
V. A. G.*, 1897, II/vi. 58) he wrote a propos
of the name Temna^c mentioned in the Ṣirwāḥ in-
scription (Glaser 1000) "Temna^c, the former capital
Tamna or Thumna of the Ḳatabānians, is in the
Wādī Baiḥān". This identification of Glaser's, who
(*Abessinier*, p. 112) expressly stated his conviction
of the correctness of his location of the Tamna^c
of the inscriptions, was corrected by Landberg
(p. 107 sq.) when he fixed the position of the
present Timna^c, the site of the ancient capital of
the Ḳatabānians, in the land of Ḥarīb in a plain
by the Wādī Ablāḥ, a tributary on the left of the
Wādī 'Ain, which is bounded in the S. S. E. by
the hills of Rokḥama, in the S. E. by the Ḳawim
Āl Djenāḥ, in the midst of which rises the hill of
Ḥaid Waḍū; the Wādī Waḍū waters the part of
the plain called Tīn Timna^c. Following this, Hommel
(*Grundriss der Geographie und Geschichte des alten
Orients*, Munich 1904, p. 137 [656]) identified
Τάμνα and the town of the inscriptions as Timna^c,
"in a tributary Wādī of Baiḥān al-Asfal S. E. of

Mārib". M. Hartmann (*op. cit.*, p. 168) was wrong
in objecting to the location S. E. of Mārib "in
spite of the view expressed by Hommel with ab-
solute conviction"; he sought Tamna^c east of Yarim,
on a hypothesis which is quite without foundation.
Rhodokanakis (*Die Inskriften an der Mauer von
Kohlān-Timna^c* in the *S. B. Ak. Wien*, 1924, cc/li.
8), identifies Timna^c, the capital of Ḳatabān, with
Kohlān, by combining mentions in the inscriptions
with a study of photographs taken by G. W. Bury,
who in 1900 visited Kohlān (Kaḥlān) on the left
bank of the Wādī Baiḥān and took impressions
and photographs of inscriptions there for the South
Arabian expedition of the Vienna Academy and
also gave an account of the ruins. Sprenger, relying
simply on the Ptolemaic location for Thomna
(between Mariama and Sabatha) had come very
near to the identification proposed by Landberg.
It may safely be concluded that not only the royal
residence but also the original home of the Ḳata-
bānians lay not far from the frontier of Saba^c and
the gradual expansion of the tribe of Ḳatabān
— now also known from inscriptions — into the
kingdom took place towards the S. W. The equation
of Τάμνα with Thomna, which Pliny (vi. 153; xii.
63) calls a town of the Gebanitae, proposed by
D. H. Müller (*op. cit.*, p. 1028), Mordtmann (review
of Glaser, *Skizze*, vol. i., in the *Z.D.M.G.*, xlv. 184),
Glaser (*loc. cit.* and *Punt*, p. 57) and Landberg
(*op. cit.*, p. 109 sq.), has a certain probability in
spite of the phonetic difference in the initial dentals
of the two names, which we also have between
Θούμνα and Τάμνα, which had already been equated
by K. Müller (*op. cit.*). But it should be remembered
that Ptolemy may have referred two names of
similar sound to one place. In favour of the identi-
fication of Θούμνα and Thomna we can quote — in
addition to the form of the name — Pliny's remark
(xii. 63) on the frankincense route. Of the town-
names of similar sound in Pliny, it may here be
remarked that neither can Thomna, the capital of
the Gebanitae, be identical, as Glaser suggests, with
Thomala, which Pliny (vi. 154) expressly calls a
town of the Sabaeans, nor can Thomala be altered
to Thomna, as Mordtmann (review, p. 186) pro-
posed. The latter (*ibid.*) and Hommel (*Die alt-
israelitische Überlieferung*, Munich 1897, p. 274)
assumed that the name of the Ḳatabānian capital
and that of the Edomite tribe of Timna^c (*Gen.*,
xxxvi. 40) were connected.

Strabo's further remark that Καταβανία (var.
Καταβανία, the same form as in Stephanus By-
zantinus, s. v.) produced frankincense, has recently
been wrongly taken to mean that, according to
his authority, frankincense was not found in other
parts of South Arabia (cf. the art. SABA^c, below,
iv. 6a). Glaser's suggestion (*Skizze*, ii. 26) that
there is "obviously some confusion" in Strabo
may be met by the statement in Pliny (xii. 69),
which is based on authentic information, as well
as the corroborative statements of modern tra-
vellers, like C. Niebuhr, *Beschreibung von Ara-
bien*, Copenhagen 1772, p. 283, and Th. Bent,
Southern Arabia, London 1900, p. 77, 91, 254.
Glaser himself acknowledges the possibility "that
even by the time of Eratosthenes individual Ḳata-
bānians owned lands in the frankincense areas"
(similarly in *Abessinier*, p. 111 sq.; previously
Sprenger, *Geographie*, p. 264; cf. K. Müller, *op.
cit.*; in *Punt*, p. 46 (cf. 50 sq., 57) Glaser speaks
of Ḳatabānian suzerainty over the frankincense

country. His deductions (*Abessinier*, p. 112 sq.) that Katabān perhaps also had possessions in the African frankincense area and that the whole of Azania belonged to it may be emphatically rejected.

Pliny twice mentions the Katabānians; v. 65: Catabanes (this is the better reading, not Cattabanes) Arabes and, in another form, vi. 153: Catapani, a divergence which is probably explained by the use of different sources. According to the first passage (also Solin, ed. Mommsen, Berlin 1895, § 707), they are to be regarded as the possessors of the south-west of Arabia Felix. Glaser (*Skizze*, ii. 291) wrongly says that by Pliny's time there was no longer a Katabānian tribe. He is possibly correct in saying that they and the Ḥaḍramōtites had inherited the southern Minaean territory and could only hold out by continually fighting the Sabaeans. Whether there still was a kingdom of Katabān, as known to Eratosthenes, in Juba's time is doubtful. Glaser (*Abessinier*, p. 114) denied that the Katabānian kingdom was still in existence at the time of Gallus and thought (*Punt*, p. 56) that it no longer existed by 81 A. D. and that the Katabānians "disappear completely from the scene as an independent people" in the first half of the first century B. C. (*ibid.*, p. 48; cf. *Abessinier*, p. 77; for the time of Gallus see D. H. Müller, *Burgen*, ii. 1030). This view must be considerably modified, if only on account of the mention of the Katabānians in Pliny and Ptolemy (see Glaser's own limitation, *Punt*, p. 48, 1). Against Hommel, who (*Grundriss*, p. 139, 142) placed the end of the kingdom of Katabān in the second century B. C. (on this chronology see Glaser, *Abessinier*, p. 115), Hartmann (*op. cit.*, p. 164; cf. 168) said that Katabān does not disappear before 80 B. C. That the references in Ptolemy from the time of Juba refer only to the people of the Katabānians and no longer to the now weakened kingdom, cannot be asserted with certainty. But it may have been included in the Ḥimyar kingdom at the beginning of our era (on the supposed beginning of the Ḥimyar epoch see the art. SABA', below, iv. 8).

This question is bound up with that of the connection between Katabān and the Geb(b)anitae of Pliny (vi. 153, xii. 63, 68 sq., 87 sq., 93), the Gaba'an of the inscriptions, into the details of which, as they would require a special article, we cannot go here. Sprenger's view (*Geographie*, p. 256, 268, 282) that the Katabānians lived in S. W. Arabia before the Gebanitae and were driven out by them in Juba's time was supported by D. H. Müller (*Burgen*, ii. 1028 sq.) (also Glaser, *Punt*, p. 36, 48, 50). In my articles *Gabaioi*, and *Gebbanitae* in Pauly-Wissowa, *Realencykl.*, it has been suggested that the Gebanitae, called Γαβαιοί by Eratosthenes (Strabo, xvi. 768) and therefore known to him alongside of the Katabānians, were settled in Katabān or close to its frontier (for other errors of Sprenger see *ibidem*). Glaser, *Punt*, p. 35, 60, regarded the Gebanitae as a subdivision of the Katabānian people. But it is not quite clear even for the time of Juba whether the Gebanitae are not still to be regarded as neighbours of the Katabānians. D. H. Müller's other considerations are discussed in another connection (see the *Bibliography*). The Gebanitae, like the Katabānians, also became a part of the Ḥimyar kingdom, probably not before Pliny's time. Hartmann's proposal (*op. cit.*, p. 410; cf. 22) to alter *Gebanitae* in Pliny,

xii. 63, to *Catabanitae* cannot be accepted. This unobjectionable reading is amply supported against emendation by vi. 153; and besides Pliny never uses the form of the name which Hartmann's conjecture would introduce.

That the *Periplus Maris Erythraei* (cf. the art. SABA', iv. 9), presumably composed between 40 and 45 A. D., does not mention the Katabānians — a fact on which Glaser (*Abessinier*, p. 115) laid stress in support of his view that their kingdom came to an end at an early date — like the non-mention of the Minaeans, means nothing, especially as the much later Ptolemy — and Pliny also — mentions the Katabānians along with the Sabaeans, Minaeans and Chatramotites (vi. 7, 24, Κοτταβανοί [var. Κοταβανοί, vulg. Κατταβανοί]), i.e. all the four main peoples of South Arabia known to Eratosthenes. This is at any rate an argument against those who hold that the Katabānian people had entirely disappeared from history by the time of Gallus and was therefore a view at first challenged by Glaser. That the Ptolemaic map placed them between the frankincense region and the modern 'Omān is explained to mean they had also lands in the former. The Κιβισανῖται mentioned in the same passage by Ptolemy were originally considered by Glaser — who wrote their name erroneously "Kittibaner" — (*Skizze*, ii. 4, 6, 8, 268 sq.) to be the inhabitants of the Κιτῖβανα of Theophrastus, said to be situated on the Persian Gulf, and regarded them as well as the Κοταβανοί as different from the Katabānians. This was only intended to serve as a basis for his assertion that even by Pliny's time there was no longer a Katabānian tribe (see above). Later (*Abessinier*, p. 111) he abandoned his view that the Katabānians are not mentioned in Ptolemy and (p. 115) conceded the possibility at least that they are the Κιβισανῖται so that he now took up an intermediate position. On the question of the relation of the two peoples with similar names to one another no definite answer can be given. According to Mordtmann (review, p. 187), they were identical, and it is in fact not improbable that Ptolemy refers to the Katabānians under two different forms of the name, just as in one passage (vi. 7, 10) he calls the people of Ḥaḍramūt Ἀτραμίται (var. Ἀδραμίται) and in another (vi. 7, 25, 26), Χατραμουῖται. The capital of the Katabānians can be recognised in his Θούμνα (Thomna in Pliny). Mordtmann was wrong in his view that Ptolemy erroneously — as a result of different estimates of the distance — had given Thumna twice (31 and 37) in his map.

The mentions of Katabān in the later literature of the Greeks are of no value, such as Dionysius Periegetes, ed. K. Müller, verse 959, who — perhaps from the geographical didactic poem of Alexander Lychnus of Ephesus — in the phrase ἀγγίχουσι Κλεταβανοί rightly describes the Katabānians as neighbours of the Sabaeans mentioned just before. This mutated form is a misreading of ΚΑΤΑΒΗΝΟΙ of the original source; it appears also in the Latin paraphrasers of Dion. Periegetes and as Cletabis in the Geographer of Ravenna, ed. Pinder-Parthey, Berlin 1860, ii. 7.

The references to Katabān in South Arabian inscriptions were down to the last decade of the sixth century very limited, e.g. the Minaean inscription Halévy 504 (= Glaser 1087) in which a Katabānian king is mentioned as a contemporary of Minaean kings, and Fresnel 56 (= Glaser 481)

in which there is mention of a peace between Saba' and Ḳatabān. A deeper knowledge of the past of Ḳatabān was first obtained from the rich finds of inscriptions made by Glaser, who, in his fourth journey to South Arabia (1892—1894) before which no Ḳatabānian inscription had been known, brought back squeezes of about 100 Ḳatabānian inscriptions, one particularly remarkable result of his journey of exploration. Hommel's conjectural dating of these inscriptions "from about 1000 B.C. to the end of the Ḳatabānian kingdom (2nd century B.C.)" (*Grundriss*, p. 139) is too early in both its limits. The beginning is not earlier than that of the Minaean kingdom (see the art. SABA'), on the latter see above. Hommel (*ibid.*) was only able to say further that there were about 18 Ḳatabānian kings' names in these as yet unpublished texts, out of which Glaser had, however, already gathered much valuable information, and that, apart from a few passages in inscriptions which Glaser himself published (e.g. *Punt*, p. 58 [beginning of Glaser 1392]; *Zwei Inschriften über den Dambruch*, p. 105 [contents of Glaser 1693]) or Hommel utilised for his researches in the history of religions (from Glaser 1599, 1600 and 1604), some of his inscriptions were again squeezed by Arabs, one for the Greek Kallisperis (published by Hommel, *Z.D.M.G.*, 1899, liii. 98 sqq., the first Ḳatabānian inscription made generally accessible), three others for 'Aden, whence they were sent to Paris (publ. by H. Derenbourg, *Nouveaux textes yéménites inédits*, R. A., 1902, v/iv. 117 sqq. [N^o. ii., iii., iv.; new edition with emendations in the *Répertoire d'Épigr. sem.*, 1903, i., N^o. 310 sqq.]). Ditlef Nielsen in the *M. V. A. G.*, 1906, xi/iv., published in his *Neue katabanische Inschriften*, a German version of his *Studier over oldarabiske Indskrifter*, Copenhagen 1906, 5 Ḳatabānian texts (Glaser 1600, 1402, 1119, 1581 and one fragment) (which he had received from Glaser) with notes (critically reviewed by O. Weber, *Studien zur süd-arabischen Altertumskunde*, in *M. V. A. G.*, 1907, xii/ii. 1—22); at the same time Glaser in his *Altjemenische Nachrichten*, Munich 1906, p. 60 sqq. and 162 sqq., published the first of these inscriptions and Glaser 1606, of which Nielsen N^o. 5 was a fragment. The article following the above mentioned one by Weber was his *Neue süd-arabische Inschriften* (p. 23 sqq.) (Landberg 1—5) (N^o. 1 already published by H. Derenbourg in *Nouveaux envois du Yémen* [despatched in 1903] under N^o. 3; Landberg 3 is identical with the first third of Glaser 1230 [in Glaser, *Altjem. Nachr.*, p. 147 sq.]).

On the basis of the earliest publications from Glaser's papers, research was at once begun on individual problems of Ḳatabānian antiquity. Hommel, for example (*Grundriss*, p. 85 sq., 140 sq.), first proposed hypotheses regarding the religious system of the Ḳatabānians. Hartmann gave his views on the constitution, from the important inscription Glaser 1606, and on historical questions (from Glaser 1359/60, 1693 etc.; *op. cit.*, p. 430 sqq.; cf. also 164 sqq.). It is a noteworthy fact that the kingdom of Ḳatabān appears also in the inscriptions as existing contemporaneously with those of Ma'in, Saba' and Ḥaḍramūt, just as we find it in Eratosthenes. As regards language, Ḳatabānian is nearer Minaean than Sabaeen; Hommel said the Ḳatabānian dialect was practically Minaean. The traces of Sabaeen in it are due to contact with

the neighbouring people. Weber had already pointed out (*Studien*, p. 2, 63 sq.) in the epigraphy certain peculiarities from the few reproductions available to him. It is unnecessary to go further into the details of this earlier literature, especially in view of the comprehensive edition of Glaser's Ḳatabānian inscriptions which is being undertaken by Rhodokanakis (see the art. SABA', iv. 12). The latter had already published in his *Der Grundsatz der Öffentlichkeit in den süd-arabischen Urkunden* (S. B. Ak. Wien, 1915, CLXXVII/ii. 33 sq.) the Ḳatabānian inscription Glaser 1606, already discussed by Glaser (see above) and Hartmann, (*op. cit.*, p. 431), with very thorough notes; he then published some hitherto unknown inscriptions in *Ḳatabanische Texte zur Bodenvirtschaft* in the S. B. Ak. Wien, 1909, CXCIV/ii., namely Glaser 1601, 1602, 1395 = 1604 = N^o. 84 of the inscriptions collected by the South Arabian expedition (S.A.E.), Glaser 1412 = 1612 = S.A.E. 81, Glaser 1413 = 1613 = S.A.E. 82; in the already mentioned second series of *Ḳatab. Texte* the three inscriptions Glaser 1396 = 1610 = S.A.E. 83, S.A.E. 48, of which the Kallisperis inscription (see above) forms one part, and Glaser 1693; lastly in the already mentioned treatise *Die Inschriften an der Mauer von Kohlān Timna* the inscription S.A.E. 77 = Glaser 1404 = 1614, S.A.E. 80, 80A = Glaser 1397 sqq. and, in elucidation of the title of Muzarrib among the Ḳatabānians, S.A.E. 94 = Glaser 1405, S.A.E. 85 + S.A.E. 60, Glaser 1410, and in the appendix S.A.E. 86; a new edition of S.A.E. 78 sq. = Glaser 1605 sq. has appeared in *W.Z.K.M.*, xxxi. 22 sqq. These publications mark an extraordinary advance not only for the accurate reproduction of the texts of the inscriptions and the very full commentary but also for the systematic investigation here attempted for the first time of problems of law, constitution and economy (see the art. SABA', iv. 12), as well as, for example à propos of the discussion of inscriptions Glaser 1601 and 1693, of details of the earlier history of Ḳatabān; for example, in *Ḳatab. Texte*, i. 26 sq., 34 sq. (supplement in *Ḳatab. Texte*, ii. 98 sq.) a chronological order is proposed for some groups of Ḳatabānian kings (cf. A. Grohmann, *Ḳatabanische Herrscherreihen* in the *Anz. Wien*, x., 1916, p. 42 sqq.; older attempts in Nielsen, *op. cit.*, p. 42; Weber, *Studien*, *op. cit.*, p. 9 sq.; Hartmann, *op. cit.*, p. 165 sqq., 601). Our knowledge of the history of ancient South Arabia is for the first time enlarged on many points by a combination of these newly published inscriptions with those already known. We see that certain smaller countries were dependent on Ḳatabān, with which they for some time formed a great power. In Glaser 1396 there is mention of the dependence of the Ma'in tribe on the leading tribe Ḳatabān. The inscription Halévy 504 (quoted above) shows that Ma'in was dependent on Ḳatabān. On the other hand, from the Minaean inscription Glaser 485 Ma'in appears as the vassal of Saba'; Ḳatabān was for some time one of the enemies of Saba'. But in the period after the Sabaeen inscription Glaser 418/419, in which Ḳatabān is mentioned along with Ma'in among the enemies conquered by Saba', it was weakened by Saba'. At the time of the Širwāḥ inscription, Glaser 1000, which mentions a campaign of Saba' in which Ḳatabān was on its side, it had lost political control over considerable territory (cf. Glaser 1600 and

1620). A war lasting many years between Katabān and Saba² (Glaser 481 = Fresnel 56 [see above], Glaser 1693) in the course of which (according to Rhodokanakis' supposition) there was a rupture of the alliance between the two powers ended in a peace. References to Katabān being included in the kingdom of the Himyars may also be gleaned from inscriptions. None of the inscriptions concerned can be definitely dated in a known era, but it is possible to bring some of them into a chronological series relative to one another.

The publication of new material alone will show whether the unsettled problems will be cleared up or remain unsettled.

Bibliography: the books and articles of Glaser, Rhodokanakis, Hommel, Derenbourg, Hartmann, Landberg, Weber, D. H. Müller, J. H. Mordtmann, Sprenger etc. are already cited in the text; reference need only be made here to my article *Saba* (*Realenzyklopädie* s. v., esp. coll. 1425 sqq., 1448 sqq., 1457 sqq., 1492 sq.).

(J. TKATSCH)

KATĀDA B. IDRĪS, ancestor of the Sharīfs of Mekka from the beginning of the 13th century A.D. onwards. In 1201, 1202 or 1203 A.D. he overpowered the then ruling family of the Hāwāshim and established his authority in the Holy City. The last Sharīfs of the Banū Hāshim had lived in continual family strife and quarrels. Meanwhile Katāda (for his pedigree cf. Snouck Hurgronje, *Mekka*, i., Stammtafel I between p. 24 and 25 and Stammtafel II between p. 74 and 75) had enlarged his estates from Yanbu' southward in the direction of Mekka, thus preparing his attack on this city. When the Mekkans were out of the town in order to assume the *ihram* [q.v.] for the 'umra on the 27th of Rādjāb, the commemoration day of Muḥammad's Ascension, he made use of this occasion to establish his power in the town. According to another story, however, his son Hanzala captured the town and prepared his father's entry.

Katāda, in contradistinction to the Banū Hāshim, his predecessors in the Hīdjāz, was a man of political genius, who pursued the idea of founding the independent principality of the Holy Land of Islām. He repaired the walls of the town which had fallen to ruins, captured Tā'if and brought the Thaqīf-tribes under his dominion. He continued the war with the Sharīfs of Medina, built a fortress at Yanbu' and organised his army with peculiar care.

His attitude towards the Aiyūbids, the caliph and the Zaidites of Yaman is to be viewed in the light of his central political idea. He did not suffer manifest signs of any foreign power in his territory, so that relations often became strained and sometimes even ended in open hostility. Nevertheless the caliph once invited him to visit Baghdād. It is said that Katāda started on his journey to the capital, but returned to his own country when he was met by an embassy of the caliph which had in its train fettered lions. Be this legend or fact, this much is certain, that Katāda embodied his idea of the "splendid isolation of Hīdjāz" in verses which are a typical illustration of his negative attitude towards foreign powers. Probably his encouragement of the Zaidite occupation of Yaman is to be viewed in the same light.

In his last days he undertook an expedition

against Medina. Illness, however, induced him to return to Mekka, where he was killed in 1221 by his son Ḥasan, who suspected him of favouring one of his relatives as a candidate for the throne. His descendants were ruling Sharīfs at Mekka, until in 1916 Ḥusain converted the sharīfate into a kingdom.

Tornberg, xii. 134, 169, 261 sqq.; al-Sindjārī, *Manā'ih al-Karam*, fol. 121 sqq., in Prof. Snouck Hurgronje's MS.; Aḥmad Zēni Dahlān, *Khulāṣat al-Katām*, Cairo 1305, p. 23; do., *Umdat al-Tālib*, Bombay 1318, p. 121 sq.; Ibn Khaldūn, *Ibar*, Bulāḡ 1284, iv. 104 sqq.; Abu 'l-Fidā', *Tārīkh*, Constantinople 1286, ii. 137; Snouck Hurgronje, *Mekka*, p. 73 sqq.; do., *Qatadah's policy of splendid isolation of the Hijaz in A Volume of Oriental Studies presented to E. G. Broune*, Cambridge 1922, p. 439—444, where Katāda's poem is discussed (= *Verspreide Geschriften van C. Snouck Hurgronje*, iii. 355 sqq.).

(A. J. WENSINCK)

KATAK (CUTTACK), a district in Orissa [q.v.].

KATANGA, a province in the Belgian Congo.

Geography and History. Katanga is the most southern, richest and least populated of the four provinces of the Belgian Congo. It lies between 5° and 13° 30' S. Lat. and 21° 30' and 30° 30' E. Long. It is bounded on the north by the eastern province and the province of Congo Kasai, on the east by Lake Tanganika which separates it from the former German East Africa (now under British mandate) and by Northern Rhodesia; in the south by Northern Rhodesia and Portuguese Angola; in the west by Angola and the province of Congo Kasai. The area is 200,000 square miles, about a quarter of that of the Belgian Congo. Its native population is about a million and a half of Southern Bantus (Balubas, Lundas, Basonge, Bangobango, Warua, Watumbwe, Babui, Baholoholo, Kanioka and Batschok), while its white population is about 4,500, of whom the great majority are Belgians, about fifty Dutch, a few English, Americans, French, Italians, Portuguese, Greeks and Scandinavians. In 1922 there were forty-nine Hindus, eight Turks and fifteen Arabs and Zanibarīs. These figures have since been considerably increased.

The province of Katanga is divided into four districts — Upper Luapula, Lomami, Lulua and Tanganika Moero. A number of towns — Elisabethville, Likasi, Albertville, Kongolo, Kabinda, Sandora and Kambove — have arisen in it as a result of the economic conditions of which we will give a general account below.

We may add that Katanga enjoys a fairly temperate climate, especially south of the tenth parallel, in which the altitude varies from 3,500 to 5,500 feet and that it is well watered by rivers and streams, such as the majestic Lualaba (upper reaches of the Congo river) which runs through it from south to north and is fed by many tributaries of which the most important are the Lubudi, Lufira, Luapula, Luvua, Lovoi and Lukuga, which flow from Lake Tanganika. If the soil of Katanga, which is covered with a forest of more or less dense brushwood, is far from having the great fertility of the immense central depression which constitutes the most extensive part of the Belgian

Congo, and if it does not offer to the fascinated eye of the traveller the imposing beauty of gigantic forests, its soil, on the other hand, possesses wealth immeasurable. It is to the exploitation of this that the economic policy of the Belgian colonisers has been primarily directed.

Deposits of tin are abundantly distributed between Lualaba and Lake Tanganika; two important coal-mines are worked at Albertville and Luena; auriferous dykes, pipes of kimberlite and alluvial diamond-bearing deposits have been discovered in various places. Since 1922 the Mining Union has been working an extremely rich deposit of uranium which was found at Shiukolobiwe. In 1923, 450 tons were exported which enabled Belgium to produce several grammes of bromure of radium.

But the principal source of the wealth of Katanga is certainly the copper found in profusion in immense deposits worked by the natives before, the Belgians came, which the earlier travellers simply could not help discovering. The richness of the ore, the density of which is 14%, and the intelligent organisation of the industry have enabled 80,000 tons of raw copper to be exported in 1924. This production, like economic development in general, will certainly make new strides ahead when "white coal", the reservoir of hydraulic energy of enormous power abundantly distributed through the province, has been controlled and put at the disposal of industry.

The first methodical exploration of Katanga dates from 1890. Famous explorers — Burton, Speke, David Livingstone, H. M. Stanley in the Cameroon, Böhn and Reichard and certain Belgian expeditions of the Association Internationale Africaine, representatives of which — Popelin, Ramakers, Storms and Becker — founded the stations of M'Toa, Karema and M'Pala on Lake Tanganika — had, of course, visited it previously. But it was only at the end of the nineteenth century, just when Cecil Rhodes was pushing his railway and British influence northwards, that the Congo Free State began to take notice of the urgent necessity of recognising and organising the most southern part of its vast territory. King Leopold II, sovereign of the new state, whose colonial plans did not meet with very great approval in Belgium, to realise this scheme had to have recourse to a private society, the Compagnie du Congo pour le Commerce et l'Industrie, with which he founded the Compagnie du Katanga.

This society was essentially a body for exploration and occupation, whose duties and rights were defined by the convention of March, 1891, which imposed on it the following obligations:

The placing of a certain number of craft on the Upper Congo — the building of stations — giving assistance in the suppression of the slave-trade and the trade in spirits and prohibited arms — the organisation of a sufficient police service — the eventual exercise by its agents of the functions of the different branches of government service.

In return it received:

1) Full possession of a third of the lands belonging to the domain of the State, in the part of the valley of the Upper Congo lying to the south of the fifth parallel.

2) The right of exploitation of the soil of the ceded lands for a space of ninety-nine years.

But the division of the lands between State and Company raised serious difficulties and the neces-

sity soon appeared of putting the properties of the contracting parties under joint ownership. There was therefore created in 1900 the special Committee of Katanga to which the State and the Company entrusted the management of their affairs. The resulting agreement provided that "all the advantages or benefits to be gained from the exploitation and all expense, charges and losses would be divided by the Committee in proportion of two-thirds for the State and one-third for the Company; the Committee would further have the most extended powers of administration and alienation without exception or reserve".

A decree of 1910 deprived the special Committee of the delegation of the functions of the executive powers, but made no essential modification in its functions as regards the administration of the patrimonial rights of the State and of the Katanga company.

This is the regime that is still in control; our reason for giving at length the circumstances that brought it into being is that it is at bottom extremely original and that — contrary to what is often thought — the position of the Katanga Committee is totally different from that of great companies like the Chartered Company of Rhodesia, or the British East Africa Company, and of other distant possessions. Nowadays Katanga has made great progress, thanks to the policy of the Belgian government and the activity of private initiative. The railway, which runs from Bukama to Sakania and connects the mining region with Lualaba and with the railways of Rhodesia, has been equipped in a very up-to-date fashion and soon a new line will link it up by the Kasai river with the port of Matadi and the Atlantic Ocean.

Muhammadan penetration, the slave trade and the anti-slavery campaign.

History tells us that even before the Hidjra Arab barques were traversing the ocean between the Red Sea and the Persian Gulf. But it was only when the great Muslim movement had made its immense advance into North Africa and caused the migration on a huge scale of the disciples of the Prophet, that we find the Arabs devoting themselves to the methodical conquest of the lands round the Indian Ocean and building up important sultanates there, of which those of Sofala and Zanzibar have from time to time had bursts of splendour and passed through periods of power and brilliance.

But this power soon began to degenerate and assume a new character. It passed into the hands of traders and exploiters for whom, as Privelle said, "the normal state of society was the choice by them of the most convenient and most remunerative method of exploitation".

It is then that we find chiefs penetrating into the very heart of East Africa where the weak and poorly armed natives offered them no resistance and where they found vast riches, from ivory to human cattle, for whom the American planters and the Asiatic Muslims offered handsome prices.

Setting out from Zanzibar and the coast of Mozambique, the movement reached Lake Tanganika at the beginning of the nineteenth century. It reached Katanga by the bay of M'Toa and spread through the whole of the eastern province by the road from M'Toa to Kabambare and

Kasongo. A regular Arab power extending from the banks of Tanganika to Stanleyville was established by the chief Tippto-Tip and his nephew Rashid.

We know (Stanley and Livingstone have given terrible pictures of it in their works) the horrors which accompanied this invasion and the rapid disintegration of native communities which was produced by the constant wars, flights, endless migrations and continual rupture of the most sacred links of family life. Europe was moved. Cardinal de Lavigerie preached a holy war and on the initiative of Leopold II the civilized nations met in an anti-slavery conference in 1889. War was declared on the chiefs Rashid, Sefu and Kumaliza. While Dhanis was fighting them in the south of the Congo, Commandant Jacques and his lieutenants fought fierce battles with them on the banks of Lake Tanganika, at Katakai, Albertville and M'Pala, which were to liberate for ever the native population from the scourge which had fallen upon them. What influence did this activity of the Muslim world leave upon the Bantu peoples of Katanga?

From the shores of Lake Tanganika to Stanley Falls, we find at the present day negroes who profess Islām. They are called arabicised "wangwana". There is no reason to doubt that the Arabs used to make and still make serious efforts at conversion to Islām; nor is there any reason to doubt that a religion which, like Islām, preaches hatred of the *kāfir* and recommends polygamy is specially suited to attract the natives of Africa.

We must say, however, that if we consider this influence serious in the eastern province, where we have important groups of arabicised natives at Kasongo, Miangwe, Kirundu and Stanleyville, and if it is revealed as fairly considerable in the residencies of Ruanda and of Urundi (former German districts, now under Belgian mandate) it is perhaps not quite the same in Katanga. For if there are still a few arabicised negroes on the shores of Lake Tanganika and along the old Arab roads, they are really very few in number and their religious education is of the most rudimentary nature. They like to wear a white dress to show their superiority over the other negroes and sometimes perform their *ṣalāt* turned towards Mekka and fast in Ramaḍān, but for the rest they are ignorant and still believe, like their pagan kinsmen, in spirits, witchcraft, superstitions and in the power of malevolent magic.

Is an influence of this kind worthy of the attention of colonising nations? We think so, for one thing is certain, that the arabicisation of the negro very quickly gives him a contempt for the *kāfir* and for European authority and the Muslims do not hesitate to encourage these sentiments.

Alongside of the arabicised negroes there remain in Katanga a certain number of Arabs who have been joined by Muslim Indians. They devote themselves to trading with untiring industry and some of them possess substantial shops, doing a big business and have prospered exceedingly. Indeed, we are at the commencement of a powerful economic offensive, the strength and meaning of which we must try to estimate.

Economic penetration from the East.

Dār al-Salām [q.v.] and Zanzibar lying at the crossing of the routes from Europe, Africa and Asia, have become by force of circumstance depots for Asiatic merchandise of all kinds which eastern commerce intends for East Africa, into which they

penetrate as a result of the activity and business skill of the immigrant Arabs and Hindus. To give an idea of the importance of this trade, it will be sufficient to consider that in 1922 Bombay and Zanzibar sold in Tanganika Territory (under British mandate) goods worth £ 674,000, the total imports being at most £ 1,386,300 and Great Britain herself participated to the extent of £ 292,000. The goods which reach Katanga by this route are mainly cloths, articles of clothing, blankets and a certain amount of foodstuffs, soap and miscellaneous articles.

As regards textiles, the Hindu and Arab merchants import the most varied kinds, but especially the white cottons called "Americani" and "chader", which sell very well in the markets of Katanga. Not only do the importers attach a great importance to the quality and variety of their goods, but they pay special attention to the measurements of their cloths and pay careful attention to the caprices and changing tastes of a clientèle so fickle as the native population. As a result they were able to import in 1922 at the port of Albertville alone, 18,000 kilograms of chader, 27,000 kilograms of Americani and 8,000 kilograms of cotton printed and dyed, as well as a considerable quantity of blankets and other goods.

Their activity is not confined to imports alone. They also export and it will give an idea of the magnitude of this branch of their trade if we say that a single Arab house in Albertville in 1923 exported almost millions of francs worth of ivory. Several of these firms extend their activity from Zanzibar or Dār al-Salām to Albertville and from Albertville to the Stanley Falls. They have branches in the more important stations and have agents in their service and petty traders who are of great value to them, sober and active, living almost like natives, carrying on business at insignificant expense and thoroughly acquainted with the soul of the negro with its vices and weaknesses, which they can flatter when necessary even — and particularly — to the detriment of the prestige of the European; they carry into the remotest corners eastern influence with their wares.

In Katanga we can see an attempt at economic penetration which will have great developments and the figures which we have given ought in our opinion only to be regarded as stages in an increasing progression which, if European commerce does not take care, will assume considerable importance.

Is this economic influence susceptible of having a serious repercussion in other spheres? I should be premature to try to answer this question definitely. But we know that the demands raised by Orientals in the Kenya Colony in 1923 created profound uneasiness there and that the commercial strike begun at the beginning of the same year by Hindu and Arab merchants in Tanganika Territory seriously disturbed the economic and political atmosphere of this colony. And then — and this is a thing which no colonising nation can afford to neglect — we are at the present watching the evolution of a phenomenon which an American author has styled "the rising tide of colour" and which may perhaps be a subject for grave anxiety for humanity to-morrow.

AL-KAṬAR, a peninsula on the east coast of Arabia on the Persian Gulf. It has an area of about 2,000 square miles and 2,600 inhabitants. The cape at the end of the peninsula, which runs northwards, is called Rās Rikken and forms a fairly steep tongue of land surrounded by rocks; it is an obstacle not without danger to navigation. The summit is crowned by an old fortress which belongs to a village situated in an adjoining ravine. The coast of the peninsula is steep everywhere, but not high, and is dotted with fishing villages. Its appearance is rather depressing. The soil is poor, nothing but gravel and marl with sand. A few springs provide water for the wells, which have been dug with difficulty in the heavy soil. The climate is remarkably dry and the air unhealthy as a result of the stagnant sea-water along the coast. The few gardens are small and yield but little. There are no extensive cornfields or date palm groves; only here and there do we find a few palms and bare crops. For miles low, bare hills parched by the sun rise from the muddy strand covered with driftsand and seaweed. Inland beyond these eminences stretch barren dunes which are scantily covered with vegetation; behind them lie groups of low miserable huts made of earth and palm leaves. These villages are surrounded by walls to protect them from the raids of robber Beduins of the tribes of Menāšir and Āl Murra; the dunes have towers on them and here and there is a building of some size that has been fortified.

In contrast to this poverty is the almost inexhaustible wealth yielded by the bay on the Persian Gulf surrounded by al-Kaṭar, in which lie the islands of al-Baḥrain celebrated for its pearls. Food and sustenance is amply supplied by the sea, on which the inhabitants of the bay spend half the year seeking for pearls, while the other half is devoted to fishing and trading. Zabāra is the largest place on the peninsula and al-Bēdāʾ is regarded as the capital. The latter, like all the places on the peninsula, is chiefly inhabited by fishermen, but in the long narrow, dirty market place there are also a few merchants and artisans from al-Baḥrain.

The houses of the town are huddled together in narrow, dirty, irregular streets; two mosques and the ancient castle are the only buildings of any importance in al-Bēdāʾ, which may have about 6,000 inhabitants. Dawḥa, which lies north of al-Bēdāʾ, is but half as large; it lies in a deep little bay which affords a rather picturesque view through the cliffs 60—80 feet high in the background. The houses of Dawḥa are still more unprepossessing and poorer than in al-Bēdāʾ and the market place even smaller and filthier. Two forts command the town — one on a rock beside it and the other in the town itself. Al-Wakra is more pleasing and stands higher. It also shelters a number of merchants and artisans from al-Baḥrain. The town has, on the whole, a prosperous appearance.

The peninsula was of some importance even in ancient times on account of its important situation commanding the Gulf of al-Baḥrain. A. Sprenger has sought to identify the Cataraci of Pliny (*Natural History*, vi. 28, § 147) with the inhabitants of al-Kaṭar. The peninsula used to belong to the Sulṭānate of ʿOmān. From 1872 till 1914 it was under the suzerainty of the Turks, who had a garrison in al-Bēdāʾ down to October, 1914, and belonged to the province of al-Aḥsāʾ, forming the qaḍā of the same name in the sandjak of Nadjd. Since 1913 ʿAbd Allāh al-Thānī has been lord of the peninsula. But parts of it became independent earlier. For example, in 1882 Dawḥa made a treaty with England accepting her protectorate; in 1892 and in 1914 other places followed this example. Al-Kaṭar is now under the control of the ruler of Central Arabia, Ibn Saʿūd, who has thus regained the position once held by the Wahhābī kingdom to the peninsula, which the Turks had for a time usurped.

(ADOLF GROHMANN)

KAṬARĪ B. AL-FUDJĀʾA, the last chief of the Azraḳī Khāriḳījis (cf. above, i. 542). He belonged to a clan of the Tamim (the tribe which furnished one of the most noteworthy contingents to these rebels), the Banū Kābiya b. Ḥurkūš b. Māzin (Wüstenfeld, *Geneal. Tabellen*, i. 14). The name of his father, al-Fudjāʾa, is said to have been a surname and his real name was Djaʿwana. Like other Arab chiefs, al-Kaṭarī had a double *kunya* (cf. Goldziher, *Muh. Studien*, i. 267): Abū Muḥammad in peace and Abū Maʿama in war (Djāḥiz, *Bayān*¹, i. 131, ii. 126). Of his youth we only know that he took part under the command of ʿAbd al-Raḥmān b. Samura, along with several other chiefs among whom was al-Muḥallab b. Abī Ṣufra al-Azdī, destined later to become his bitter enemy, at the submission of Sidjistān in 42 A. H. (al-Balāḍhurī, *Futūḥ*, ed. de Goeje, p. 396; Khalīfa b. Khayyāt in Ibn ʿAbd al-Barr, *al-Istīʿāb*, Ḥaiderābād 1318, p. 405; Ibn Ḥaḍjar, *Iṣāba*, Cairo 1325, iv. 161). He must have reached a fairly mature age when, 27 years later, he was acclaimed ʿCaliphʾ of the Azraḳīs when the latter, defeated by al-Muḥallab and his lieutenants, were passing through a very serious crisis. Kaṭarī, endowed with tremendous energy and indifferent to danger, was able to arouse the enthusiasm of his partisans, and after leading back the remnants of the army into the mountains of Kirmān, reorganised them; he then went down again into the ʿIrāk, occupied Ahwāz and threatened Baṣra. Kept for a long time in check by Muḥallab, he nevertheless succeeded in maintaining his position on the left bank of the Dūdjal even after the ʿIrāk, as a result of the defeat of Muṣʿab b. al-Zubair at Maskin (72 A. H.), had fallen into the hands of ʿAbd al-Malik. Finally al-Ḥadijdīdj b.

Yūsuf, appointed governor of the 'Irāk, decided to reappoint Muhallab to the command against the Azrakīs, in which he had been replaced without success by other chiefs. Muhallab soon drove the rebels across the Dūdjal and assuming the offensive, pursued them into the very centre of their power, Kirmān. Kaṭarī nevertheless was able to hold out for a long time in his lines (it is to this period that a silver coin with a legend in Pahlavi and Arabic of the year 75 struck in the name of Kaṭarī as *Amīr al-Mu'minīn*, refers [Z. D. M. G., 1858, xii, 52, No. 303]). The dissensions that broke out within the Azrakī army between Arabs and Mawālī resulted in a split: Kaṭarī had to leave the town of Dīrašt which was the Azrakī head-quarters and take refuge along with the Arabs in Ṭabaristān, while the Mawālī continued to hold Dīrašt under the command of their chief, 'Abd Rabb or 'Abd Rabbihi (there are two individuals of this name among the Mawālī distinguished by the epithets *al-Kabīr* and *al-Ṣaghīr* and the sources give the rank of commander sometimes to one and sometimes to the other or even distinguish two groups of the Mawālī which separated successively from al-Kaṭarī and were led by 'Abd Rabbihi the Great and the Less respectively). This division proved fatal, for Muhallab had no difficulty in routing the Mawālī and killing their chief; al-Ḥadīdīdī sent the Kalbi warrior Sufyān b. al-Abrad against Kaṭarī: or rather the latter (according to a tradition recorded by al-Ya'qūbī) as governor of Raiy received the appeal which the *isṣahbādī* (local chief; cf. A. Siddiqi, *Studien über die Pers. Fremdwörter im klass. Arabischen*, p. 784) addressed to him on behalf of the people of Ṭabaristān who were exasperated by the rigid application of the *ḍīziya* tax by Kaṭarī. The Azrakīs surprised by Sufyān's troops in a defile in the mountains suffered a decisive defeat. Kaṭarī who fell under his horse and was abandoned by his followers was discovered and killed by a native. His head was cut off and borne in triumph to Kūfa and then to Damascus to be presented to the Caliph. The remnants of the Azrakīs under 'Abīda b. Hilāl al-Yashkurī fled to Sadhawwar, a stronghold near Kūmis (Yāqūt, iii, 62) where they sustained a long siege from Sufyān; having exhausted their supplies, they made a desperate sortie and were wiped out. The chronology of these events is far from certain: the sources which say that Kaṭarī was in command for 13 or even 20 years are of no value. According to Wellhausen (cf. *Bibl.*), the election of Kaṭarī as Caliph probably took place at the end of 69 A.H. and his death in 78 or 79.

Kaṭarī b. al-Fudjā'a represents in striking fashion the type of Khāridjī intransigent and also that of Arab *Sa'iyid*, half cavalier and half brigand. Like the other Azrakīs, as a result of his fanatical zeal, he preached and practised *isti'rād* (assassination of anyone who did not accept the Khāridjī creed) and declared the *ka'ad* (singular *ka'id*) infidels, that is to say those who, while professing the Khāridjī doctrine, refrained from taking part in the war against their adversaries. On the other hand, he was proud of his Arab blood and of his Bedouin character; like several other illustrious Khāridjīs, he had a real talent as orator and poet. One of his speeches is recorded by Dīhāzī, *Bayān*, i, 196, 197; *Idā'*, ii, 195—196 (cf. also *Fihrist*, p. 125, 15); the fragments of his poetry that have survived to us, of which the most celebrated is the fragment

Hamāza, p. 44 (frequently quoted, with numerous variations), are remarkable for the elevated style and a heroic contempt for death and place their author in the first rank of Khāridjī poets.

KĀTH, the ancient capital of Khwārizm, the modern Khiva; according to Yāqūt, *Mu'djam*, ed. Wüstenfeld, iv, 222, the name meant a wall (*ka'it*) in the desert in the language of the Khwārizmis, even if there were no buildings within this. The fullest accounts of the old town and citadel of Fil or Fir, which was gradually washed away by the Amū-Daryā (the last traces of it are said to have disappeared in 384 = 994), are given in al-Birūnī's [q.v.] *Kitāb al-Athār al-Bākiya*, p. 35, on which E. Sachau based his *Zur Geschichte und Chronologie von Khwārizm* (Sitzungsber. der phil.-hist. Cl. d. K.K. Akad. der Wiss., lxxiii, Vienna 1873, esp. p. 489 sq.). On the description of the town by the geographers of the ivth (xth) century cf. G. Le Strange, *The Lands of the Eastern Caliphate*, Cambridge 1905, p. 446 sq.; W. Barthold, *Turkestan in epokhu mongolskago nashestviya'* ii., St. Petersburg 1900, p. 143 sq.; the fullest information is given by al-Mukaddasī², ed. de Goeje, 1906, p. 287 sq. The town lost its political importance when the dynasty of the first Khwārizmshāh was destroyed by the prince of Gurgāndj, Abu 'l-'Abbās Ma'mūn b. Muḥammad, in 385 (995); cf. W. Barthold, *Turkestan*, etc., ii, 275 sq. Kāth is mentioned by Ibn Battūta (called al-Kāt by him; cf. ed. Defrémery and Sanguinetti, iii, 20) as the only inhabited place between Khwārizm and Urgenč (the ancient Gurgāndj). In the viiith (xivth) century Kāth along with Khiva before the rise of the native dynasty in Khwārizm, belonged to the kingdom of the Čaghatai (*Zafar-Nāma*, Calcutta 1887, i, 232); this is shown for example also on the Chinese map of 1331 (in Bretschneider, *Mediaeval Researches from Eastern Asiatic Sources*, 1888, ii, 63). On the storming of Kāth by Timūr in 1372 cf. *Zafar-Nāma*, i, 237 sq.; for the assertion of P. Lerch, *Khiva oder Khwārizm*, St. Petersburg 1873, p. 21) that the army crossed the Amū-Daryā between Se-Pāya and Kāth, which would mean that Kāth even then was on the left bank of the river, there is no authority in the text. In the xith (xvith) century Kāth was on the bank of a dry canal; Anūsha, *Khān of Khiva* (1663—1687), therefore built a new Kāth west of the main stream on the bank of the Yarmīsh canal which he

himself had dug (W. Barthold, *K istorii orosheniya Turkestana*, St. Petersburg 1914, p. 95, from the MS. of the Asiatic Museum 590 ob, History of Khiva, fol. 33a). The ruins of the old Kāth east of the Āmū-Daryā are now called after the alleged tomb of a saint of the earliest period of Islām, Shaikh 'Abbās Walī; they were visited in 1873 and described by A. Kuhn (*Materiali dlya statistiki Turk. Kraya*, iv. 252). Besides the tomb of the saint, the only building adorned with glazed bricks, there are mentioned here a half destroyed minaret and the remains of the city wall, all of baked bricks. The modern village (200 houses, 15 shops, 2 mosques with schools) occupies only a small part of the ancient site and the modern fort only a quarter of the old citadel. According to V. Masalskiy (*Turkestanskiy Kray*, St. Petersburg 1913, p. 749), the ruins are 31 versts from Petroalexandrovsk (called Turtkul since the revolution) and 7 versts from the present right bank of the Āmū-Daryā. (W. BARTHOLD)

KATHAL, KHITĀL [See CHINA].

KATĪ'A [See KĪT'A].

KĀTIB, writer or scribe, is probably derived from the word *kitāb* (book) and from both was later formed the verb *kataba* (he wrote). The word was perhaps imported with the art from the Northern Aramaic neighbours of the Arabs. We not only find the word in the earliest poetry preserved, applied to those who wrote the Arabic script but also ancient poets speak of Ḥimyarī kātibs. In the time before Islām the art of writing, though apparently practised in all parts of Arabia, was the accomplishment of the few, and Ibn Sa'd in his *Ṭabaqāt* makes a point of mentioning each time when he states that a certain Ṣahābī could write, that the art of writing was little known at that time. Among the Companions at Medina some ten are stated to have been kātibs, and Ka'b b. Mālik in a tradition preserved by Aḥmad Ibn Ḥanbal (iii. 458) mentions that he is a kātib as a particular accomplishment. It is further recorded that several prominent men in Mekka also were kātibs and we may assume that the kātibs of the court of al-Ḥira (like 'Adi b. Zaid) were employed in drawing up the safe-conducts (mentioned by Ṭufail al-Ghanawī) or *hilf*-contracts referred to in the *Naḳā'id* and in the *Mu'allafā* of al-Ḥārith b. Ḥilliza and written in Arabic. Of far greater importance from an Islāmic point of view were the men who wrote down the revelations of the Prophet; they are named *Kātib al-Wahy*. Such men were Ubayy b. Ka'b, Ibn Mas'ūd and Zaid b. Ṭhābit. These same men were also employed for writing the various letters sent by the Prophet to prominent men in Arabia inviting them to embrace Islām. The office of kātib was one of great honour and the rank, which was later occupied by the wazīr, was filled during the whole time of the first four Caliphs and the Umayyads by men who had the simple title of kātib, and it was only under Abu 'l-'Abbās that the title of wazīr was first employed. By this time, on the model of the Persian chancellery, a complicated system of government offices had developed. The chief secretary had the title of *Kātib al-Sirr* "Private secretary", others were employed to make the first drafts of official documents; these were called *Kātib al-Inshā'*. The control of the army with the payment of the troops was regulated by the *Kātib al-Djāish*, which we might equate with the "Secretary for War". Other secretaries were employed for the supervision of

the landed property of the ruler. The whole system of kātibs was the *Diwān* [q. v.]. This class of men became all-powerful and it was from them that the highest officers of state were recruited. They appear to have kept themselves apart from the other men of education, for only rarely find we any of them mentioned among the innumerable traditionists and theologians, though many are found among the men who made a mark as poets or authors in other branches of learning. As they were required to have a general knowledge of all manner of subjects, authors early began to compose books for the benefit of this class and as this office maintained its importance the works for their benefit have come down to us in many copies. The chief works on the education of the kātib are the *Adab al-Kātib* of Ibn Qūtaiba [q. v.], the *Kitāb al-Kutūb* of Ibn Durustawaihi, the *Adab al-Kātib* of al-Ṣūlī and especially the voluminous work of al-Ḳālqashandī. While the first three works give us an insight into the requirements of a competent kātib in the earlier centuries, the *Subḥ al-A'shā* of al-Ḳālqashandī contains practically all that it is necessary to know on the subject. We can trace step by step how the kātib influenced the whole of Arabic prose literature; from the simple and clear letters of the earlier periods we come gradually to the bombastic composition of later times in which it is frequently difficult to discover the purpose of a document in the volume of sounding words. The disease was due to the zeal of the kātib to outdo his colleagues or predecessors in the imagined elegance of his diction. We may owe many useful works to their authors' desire to supply the kātib with the material for his compositions, but the whole striving for grandiose language has been the cause for making so much Oriental literature so indigestible to our taste. This is perhaps aggravated by Persian, Turkish and Indian kātibs. They were proud too when they could solve the meaning of the tangle of words and we get a glimpse at that mentality when a renowned kātib like the Ṣāḥib Ismā'il b. 'Abbād objected to a letter being sent to him, because the words were properly pointed and vocalised, as he considered it an insult to his intellect. Though the kātibs rose to high positions, they appear as a class to have been of a cowardly disposition, and could only intrigue; and I believe no one ever rose to become a ruler, which so many bold spirits succeeded in doing during the last twelve centuries.

Bibliography: Ibn Qūtaiba, *Adab al-Kātib*, ed. Grünert and several Oriental editions, especially the Commentary of al-Baṭalyūsi entitled *al-Iktidāb*; Ibn Durustawaihi, *Kitāb al-Kutūb*, ed. Cheikh; al-Ṣūlī, *Adab al-Kātib*, ed. Beirut; al-Ḳālqashandī, *Subḥ al-A'shā*, ed. Cairo in 14 volumes and the abridgment of the latter entitled *al-Daw'*. (F. KRENKOW)

KĀTIB ĀLEBĪ. [See ḤĀDJDĪ KHĀLIFĀ].

KĀTIB-Ī RŪMĪ. [See 'ALĪ B. HUSAIN].

KĀTIBĪ, SHAMS AL-DĪN MUḤAMMAD B. 'ABD ALĀH, a Persian poet, born at Taraḳ Werāwesh, a village of Turshiz in Khurāsān, studied at Nishāpūr, went to Herāt to the court of the Timūrīds, where he did not receive the welcome he expected, and lived for a long time in Shīrwān where the prince Mirzā Shaikh Ibrāhīm (d. 820 = 1417) had taken him under his patronage. He then lived in Aḡharbaidjān, where he was not appreciated by Iskandar b. Ḳara Yūsuf, and in Isfahān, where

he immersed himself in the study of mysticism, and died of the plague at Astarābād between 838 and 839 (1434—1436). It was in the last-named town that he undertook to compose a *khamsa* "a group of five poems" in imitation of Nizāmī and Amīr Khosraw but he only finished the *Gulshan-i Abrār* "Rosebush of Pious Men" and his *Lailā u-Madhnūn* of which the only known manuscript is in St. Petersburg. In the field of ethical and didactic poetry he wrote a book entitled *Dih Bāb* "The ten Chapters" or *Tad̲j̲nīsūt* "Puns"; he also left a *Diwān* of which ten ghazels were published and translated by Bland in his *Century*, p. 18—21, the *Si-Nāma* "Thirty Letters", devoted to mystic love, and among the *Mathnawī* of allegorical and epic matter the *Mad̲j̲ma'* *al-Bahrain* "Confluence of the two Seas", which has a double rhyme, and can be read in two different metres and represents the mystic love of two personages named Nāzīr and Manzūr, and the *Dilrubāi* "Ravishing of Hearts", an allegorical history of ẖobād, king of the Yemen, and of his minister, fertile in ruses. His poetical surname of Kātibī probably comes from the fact that he was a calligrapher, having received lessons in Nishāpūr from Mawlānā Simī, who later quarrelled with him. He spent the whole of his life in poverty as a result of the foolish prodigality which made him spend in a few days the sums he received from the munificence of his patrons.

(CL. HUART)

AL-ḲAṬĪF, a seaport on the coast of the Persian Gulf in the bay of the same name. The latter, which faces due east, is about four miles broad at the entrance, and enclosed on the north by a narrow promontory, shaped like a mussel-shell, on which lies the fortress of Dārim. Its point is called Rās Tannūra. The south side of the bay is confined by a jutting horn of land, called Zahrān, from a hill on it shaped like a sugar-loaf, which forms an excellent landmark for ships entering the bay. On this side of the bay lie the fortifications of Dammān. Towards the mouth of the bay lies the island of Tārūt, four hours' journey in length from north to south, well provided with water and thickly planted with palm groves. This island lies exactly opposite al-Ḳaṭīf. The best and safest passage to the harbour of al-Ḳaṭīf is through the deep channel on the north between the island of Tārūt and Rās Tannūra; the channel south of the island is shallow and difficult to navigate. The waters of the Gulf are shallow almost everywhere in the bay, and only show a level surface of water at high tide; when the ebb sets in sandbanks appear, and little islands, shallows and bushes of sea-plants, among which wind narrow channels filled with mud. The coast is very flat; except at a few places it is almost level with the sea.

It is significant of the change in the coast-line that Abu 'l-Fidā' (d. 1331) tells us that in his time Tārūt was still part of the continent and was only surrounded by the sea and became an island at high tide. As soon as the sea went back a part of the land between Tārūt and al-Ḳaṭīf appeared, so that people could pass along it to the mainland. According to him, Tārūt was half a day's journey from al-Ḳaṭīf and rich in vineyards with excellent grapes. Al-Mas'ūdī (d. 956) puts the distance between Tārūt and al-Ḳaṭīf at a mile. As Tārūt is now an island, the sea has swallowed up part of the coast here. On the land side al-Ḳaṭīf is surrounded by a broad girdle of gardens and orchards. The flourishing crops in the gardens far surpass those of the best watered places in the interior, e.g. at Hufhūf. The date-palm does exceedingly well here in a soil richly irrigated, partly by salt water, which the flood-tide carries far into the interior, and partly from the fresh water springs of the adjacent hills. Cereals, wheat, barley, rice, and all kinds of vegetables, figs, apricots, mangoes, pomegranates, grapes, citrons and lemons also flourish here. Through an uninterrupted succession of palm-groves, which it takes several hours to traverse in either direction, wind snake-like lines, the arches and canals of an old irrigation system, which date from the Ḳarmāṭian period, and formerly supplied al-Ḳaṭīf with better water than could be had in the immediate neighbourhood of the town. The whole length of the system, now in ruins, must have been about five miles. Al-Ḳaṭīf has walls and towers. The western gate has a high stone arch of delicate work and is flanked by towers and walls which are now in ruins. Just outside the gate are two cemeteries. The town, which is about a quarter of a mile long, is damp and filthy, and with its suburbs has about 6,000 inhabitants; the whole district, according to Sadlier, had nine walled and seven open villages, the population of which including al-Ḳaṭīf he put at 25,000. The continual fighting, of which the town has been the scene, has much affected its appearance. It now has a dismal, broken-down look. The market-place, on which the products of the country are to be amply had, is large. At the inner bend of the small bay already mentioned, stands the powerful citadel said to have been built by the Ḳarmāṭian Abū Sa'īd al-Djannābī, later used by the Portuguese, the high massive walls of brick and stone of which come down almost to the water's edge, so that only a narrow path along the shore is left, on to which opens the main gate defended by an outwork. Close to the shore there is now also the customs-house. The outer court of the citadel forms a quadrangle and is surrounded by high walls with towers at the corners, and protected on the land-side by a ditch. At the south-west corner stands the old palace of the Ḳarmāṭians, of which part has fallen in and been taken away and part has been very clumsily restored. The entrance is through a great archway in the Moorish style, supported by slender pillars, three arches deep and five long with fine cross-vaulting with arabesques in stucco, which have now for the most part fallen down. This archway leads into a long gallery, formerly covered, of which the side walls and pillars and a few arches remain. One next enters the inner court, which is surrounded by a series of chambers still fairly well preserved. A lofty room, long and

broad, served as reception room, with fine pillars in the centre and windows in the Persian style, divided into sections by little pillars. At the back of the room a raised throne still stands. Behind it follows a regular labyrinth of rooms, galleries, corridors and chambers, in three successive stories. The rich architecture of the windows, which are filled with pretty lattice work in stone in varying patterns, shows much taste. Behind the reception room is a court with large round pillars and remains of decoration.

The climate of al-Ḳatīf is very unhealthy; fever and other diseases have given the coast a bad reputation. The harbour, which was once accessible to heavily laden ships, is now for the most part silted up, and accessible only to small vessels at high tide. The sand-banks which run out on either side make entrance difficult, nay even dangerous. To the west and south the bay is well sheltered by the promontories and the islands of Tārūt and Suwaik. It is also favourably situated for trade with the islands of al-Bahrain, Būshehr and other places. Al-Ḳatīf might again attain some importance as a harbour, if it were dredged and kept in order and given better communications with the interior. The inhabitants of al-Ḳatīf are mainly engaged in pearl-fishing and in trading. Their type shows the strong Persian stamp, which dates from the pre-Muḥammadan period.

History. A. Sprenger has identified the bay with the *Sinus Capens* of Pliny, *Nat. Hist.*, vi. 28, § 147. Before the days of Islām, al-Ḳatīf, like the whole of al-Bahrain, was under Persian suzerainty. Shāpūr II about 320 A. D. conquered the whole Arabian coast beginning at al-Ḳatīf. In the early days of Islām there were still many Persians (Magians), Jews and Christians in al-Ḳatīf, as well as in the other towns of al-Bahrain. In al-Ḳatīf, however, the 'Abd al-Ḳais were predominant in those days. The whole country of al-Bahrain including al-Ḳatīf then submitted to the Prophet in al-Medina and came under the administration of al-'Alā' b. al-Ḥaḍramī. But when the general rising broke out against the Muslims after Muḥammad's death, al-Bahrain was one of the first districts to proclaim its independence from the lord of al-Medina. In 11 A. H. the rebels under al-Ḥuṭam b. Dubaifa occupied al-Ḳatīf, but the rebellion soon collapsed. In 67 A. H. there was an encounter at al-Ḳatīf between the 'Abd al-Ḳais and Naḍjda b. 'Amir al-Hafnī, in which the former were decisively beaten. Naḍjda took prisoner the people of al-Ḳatīf, who had risen against him, and took up his headquarters there. Much more momentous for the town than this transitory feud was the invasion by the Ḳarmaṭian Abū Sa'īd al-Ḥasan b. Bahrām al-Djannābī in 286 A. H. Many inhabitants perished. Abū Sa'īd had pitched his camp in the town and then undertook a bold campaign against al-Baṣra. The governor of al-Bahrain, Ibn Bānū, gave battle to the Ḳarmaṭians at al-Ḳatīf in 290 A. H.; the latter were defeated and suffered heavy losses, including Abū Sa'īd's successor designate. The town was taken by Ibn Bānū and Abū Sa'īd had to abandon his campaign against al-Baṣra and hurriedly return. Al-Ḳatīf fell again into the hands of the Ḳarmaṭians, who were now masters of almost all al-Bahrain with Ḥaḍjar, al-Aḥsā', al-Ḳatīf and al-Tā'if. When at the period of decline of Ḳarmaṭian power in 378 A. H., al-Aṣfar with a section of the Banu 'l-Mun-

tafiḳ made war on the Ḳarmaṭians, he plundered al-Ḳatīf and carried off great booty in slaves, goods and cattle to al-Baṣra. Al-Idrisī and Benjamin of Tudela, who visited the east between 1169 and 1172, describe al-Ḳatīf as a fine, large town. The latter's estimate that there were 5,000 Jews in al-Ḳatīf must be considered an exaggeration. Ibn Baṭṭūta also calls it a fine, large town. Alfonso d'Albuquerque who captured Hormūz in 1507 mentions Catifa as the harbour of Lahaḡah (al-Aḥsā') and says that the best horses are exported from here. He obtained a large quantity of provisions and supplies in al-Ḳatīf and there were many merchants there. In 1521 the lord of al-Aḥsā' (Lasah) refused to pay the Portuguese tribute for the lands of Catifa and Bahārem (al-Bahrain). Antonio Corrêa thereupon conquered al-Bahrain at the end of July, 1521, and al-Ḳatīf also fell into the hands of the Portuguese. In 1550 the citadel was taken by the Turks, whereupon Dom Antão de Noronaa conducted a bold campaign against the Turks of al-Baṣra and al-Ḳatīf. Not till 1622 were the Portuguese driven out of al-Bahrain by Shāh 'Abbās I of Persia, and the Dutch were now able as a result to establish their factories in the Persian Gulf. At the end of the xviiith century the Wahhābīs succeeded in entering upon the heritage of the Ḳarmaṭians. Sa'ūd b. 'Abd al-'Aziz in 1792 defeated the ruler of al-Ḥasa (al-Aḥsā') and thus obtained al-Ḳatīf, but the Turkish governor, Sulaimān Pasha, obtained the assistance of the head chief of the Muntafiḳ, Thwēnī b. 'Abd Allāh Āl Sa'dūn; the latter advanced against al-Ḥasa in 1796 with an army of Turkish soldiers and volunteers and transformed al-Ḳatīf into a fortress. But the campaign took an unexpected favourable turn for Sa'ūd when Thwēnī was murdered in 1798. After the overthrow of the Wahhābīs in Central Arabia by Ibrāhīm, al-Ḳatīf also was again occupied by the Turks in 1819, but had to be abandoned again in 1823. In 1838 the Turks once more invaded the coast of the Persian Gulf; the governor of Djidda, Khurshid Pasha, occupied al-Hufhūf and was threatening al-Ḳatīf, when a protest from England postponed the Turkish conquest of al-Bahrain. The increased power of the Wahhābīs enabled Faiṣal as early as 1844 to conquer the whole district of al-Ḥasa including al-Ḳatīf, which now remained in the hands of the Wahhābīs. It was only when hostilities broke out in 1871 between 'Abd Allāh b. Faiṣal and Sa'ūd b. Faiṣal that Midhat Pasha, governor of Baghdad, obtained an opportunity to assert the old claims of Turkey. He occupied al-Ḳatīf, which now became a ḳaḍā of the sandjak of Naḍjd and received a garrison. Turkey occupied this territory down to May, 1913, when 'Abd al-'Aziz b. Sa'ūd at the head of his warriors occupied al-Ḥasa and drove the Turkish garrison out of al-Ḳatīf also.

(ADOLF GROHMANN)

KATĪN, KADĪN (T.), [see **KHATUN**].

KATL (A.), killing, putting to death, used in the two principal meanings of the word — the crime of murder and the punishment of execution.

I. **Katīl** as a crime.

1). In the *Qur'ān* unlawful slaying is forbidden in a series of verses, which date from the second Mekkan period to nearly the end of the Medina period. The passages may be arranged chronologically as follows (cf. Th. Nöldeke—Fr. Schwally, *Geschichte des Qur'āns*, vol. i., and H. Grimme, *Mohammed*, vol. ii.; when the exact order in the particular periods cannot be ascertained, the passages are here arranged in the order of the *Sūras* and verses): — xvii. 33, 35 (second Mekkan period; according to O. Procksch, *Über die Blutrache*, p. 74, note 4, later than vi. 152): "Kill not your children for fear of being brought to want; We will provide for them and for you; verily the killing them is a great sin.... Neither slay the soul which God hath forbidden you to slay unless for a just cause; but whosoever shall be slain unjustly, We have given his next of kin (*walī*) power (to demand satisfaction) but let him not exceed the bounds of moderation in the killing; indeed he is protected"; xxv. 68 *sqq.* (second Mekkan period): — (and the servants of the Merciful are those) "who slay not the soul, which God hath forbidden to be slain unless for a just cause.... for he who does this commits sins (or: will bring retribution upon himself); his punishment will be doubled on the day of the Resurrection and he shall remain in it covered with ignominy for ever; except him who repents and believes and performs good works; for them God will change their evil deeds into good".... (here killing and unbelief

are considered together so that the question, what happens to a believer who kills unlawfully, is left quite out of the question); vi. 152 (third Mekkan period; similar to xvii. 33, 35); iv. 94 *sq.* (about the years 3—5; according to Procksch, *op. cit.*, p. 80, to be dated between the treaty of al-Ḥudaiḇiya and the capture of Mekka): "it is not lawful for a believer to kill a believer unless by mistake (by *ḥiṭa*"); but if anyone kill a believer by mistake he shall set free a slave who is a believer and pay a *diya* to the next of kin of the dead man, unless they waive it....; but if the person slain belong to a people hostile to you, but a believer, a slave who is a believer shall be released; but if he belong to a people with whom ye have a treaty, a *diya* must be paid to his relatives and a slave who is a believer set free; if anyone cannot afford to do this, he must fast for two successive months so that Allāh may look upon him again....; but if anyone kill a believer deliberately (with *'amd*) his reward is hell in which he shall remain for ever and Allāh wrathful against him and curse him and shall prepare a great punishment for him" (the true interpretation is undoubtedly this, that every Muslim who kills another Muslim with *'amd* is condemned to eternal hell-fire and that Allāh will not accept his repentance, a view which is ascribed to Ibn 'Abbās, Ibn Mas'ūd, Zaid b. Ṭhābit and al-Ḍaḥḥāk; the view held by 'Ikrima and others that the verse refers to the particular case of a *murtadd* who has killed a believer is not to be accepted; this is already a transition to the view that has finally prevailed, which tones down the literal wording of the passage, either by adding with Muḏjahid "unless he repents" or by holding, as has become usual, that Allāh will not leave a Muslim eternally in hell, and can even remit entirely the threatened punishment of hell-fire; but this is only the result of speculation and combination with other passages in the *Qur'ān* [e.g. xi. 108—110; xxxix. 54] and is therefore to be rejected; iv. 33 *sq.* (from about the same time; similar to iv. 95); lx. 12 (probably dates from soon after the treaty of al-Ḥudaiḇiya; similar to xvii. 33).

There are further two passages, in which it is asserted that Allāh forbade the Jews to kill: ii. 78 *sqq.* (from about the first half of the year 2 A.H.) and v. 35 (probably of the year 6 or 7; according to Grimme, to be dated before the battle of Badr).

There are also a number of verses in which killing is not exactly forbidden but is more or less strongly deprecated and represented as a mark of the unbeliever, just as committing no murder is a sign of the believer, e.g. lxxxi. 8 *sq.* (first Mekkan period); ii. 28 (probably third Mekkan period; according to Grimme, Medinese, before the battle of Badr); vi. 138, 141; xvi. 61; xl. 26 (same time); viii. 30 (after the battle of Badr); v. 33 (shortly before the capture of Khaibar). In numerous passages in this connection the unbelievers are reproached with the slaying of prophets, e.g. ii. 58, 81, 85 (from the first half of the year 2); iv. 154 (after the outbreak of open war with the Jews of Medina); iii. 177, 180 (probably soon after the battle of Uḥud); xx. 108 (shortly before the war with the Banu 'l-Naḍīr); v. 74 (later Medina period).

2) Supplements to the *Qur'ān* passages from the *Sira*, accounts of the life of Muḥammad.

In the so-called ordinance of the community, which dates from the first Medina period, it is laid down that no believer may kill a believer on account of an unbeliever; in another passage it is said: "If anyone kill a believer and is convicted, then vengeance for bloodshed must be done, unless the *walī* of the man slain waive it". In all probability Muḥammad had in mind in the murderer a non-Muslim member of the community (Procksch, *op. cit.*, p. 71): this agrees with the development given above. In the *ba'ā*, the initiation into the community, the initiate had to pledge himself, among other things, not to commit an unlawful act of slaying (cf. *Qur'ān*, lv. 12). Once Muḥammad cursed a murderer (cf. the art. *ḲIṢĀṢ*). In the so-called first temple-speech (of the year 630), the genuineness of which is not absolutely certain, however, on every point and seems doubtful on this particular point, there appears the by no means exactly defined conception of *Ḳatl shabah 'amd* (see below, sub 5c); Muḥammad is also said to have declared there that all blood-guilt attached to a Muslim dating from the period of paganism was to be cast off, which extends the corresponding passage of the ordinance of the community. Finally it is to be mentioned that the *Sira* knows of several cases of deliberate and of unpremeditated slaying; so far as they are liable to be punished, they are dealt with in the article *ḲIṢĀṢ*.

3) Comparison of the views of authoritative circles in the Muslim community in the older period as preserved in *Ḥadīth* (tradition). It is obvious that in the *Ḥadīth* also the slaying of a Muslim is strictly forbidden; by the adoption of *Islām* (and of monotheism at all) life and property are protected. The life and property of a Muslim are as inviolable (*ḥarām*) as the day of sacrifice in *Dhu 'l-Ḥijjā* in the sacred territory of Mekka (al-Bukhārī, *Ḍiyāt*, bāb 8, etc.). All blood-guilt, which has weighed a man down from an earlier period, is thus wiped out by the adoption of *Islām*, even if the crime was committed just before conversion to *Islām*. Only if a Muslim kills another, or, to be more exact, if he commits a crime worthy of death, can he be slain. Everyone is perfectly agreed that killing with *'amd* is one of the deadliest sins (*kabā'ir*); it is usually considered the gravest sin, along with the *shirk* (polytheism; e.g. al-Bukhārī, *Ḍiyāt*, bāb 1, 2), whether it is asserted of killing with *'amd* in general or of the killing of new-born girls usual among the heathens. Therefore many *Ḥadīth*'s express disgust at killing; e.g. "the slaying of a Muslim is to Allāh like the cessation of the world", or "the cessation of the world is even less to Allāh than this"; "if someone is killed in the east and another in the west approves of it, he is guilty of the person's blood"; "man is a work of Allāh; cursed be he who destroys Allāh's work". The first murder which introduced killing into the world is the subject of special condemnation: Cain is accessory to every later murder. Murder is punished in the next world as well as on earth; on the Day of Judgment cases of the shedding of innocent blood will be judged first. As to the punishment itself, a whole stratum of *ḥadīth*s reflects the already mentioned view of Ibn 'Abbās and others regarding the eternalness of punishment in hell for slaying with *'amd*; e.g. "whosoever sheds blood in an unlawful way, for him there exists no way of escape"; "whosoever contributes though only by a word to the slaying

of a Muslim must despair of the mercy of Allāh". In several passages the deliberate murder of a Muslim is considered equivalent to unbelief (*ḥadīth*s in which a warning is simply uttered against murder being a sign of the unbeliever are, of course, not dealt with here). It is even said: "if two Muslims attack one another with swords and one kills the other, both go to hell (unless it was a case of legitimate self-defence), the slayer for his deed and the slain because he wished to kill the other" (cf. e.g. al-Bukhārī, *Ḍiyāt*, bāb 2); and: "if all the inhabitants of heaven and earth together had killed someone they would all go to hell". In these two passages it is not exactly demonstrable that eternal punishment in hell is meant but it is very probable. In several of the traditions mentioned, Ibn 'Abbās appears as the authority. Such *ḥadīth*s were naturally rendered harmless by "interpretation" by the representatives of the other view, if they were not entirely suppressed, which did happen to not a few. Thus the description of deliberate murder as unbelief is sometimes interpreted to mean that it is a very grievous sin and sometimes taken as a reference to the refusal of the protection of *Islāmic* law, which occurs in both cases, to the life of the slayer or of the unbeliever. This was not found sufficient, however, but traditions were put into currency to prove the contrary, namely that Allāh would accept the repentance of a murderer, even if he had committed several murders; one of these traditions is provided with a grotesque story, the object of which is quite apparent, as corroboration. In one tradition the *kaffāra*, especially the liberation of a slave, is represented as a means to save the murderer from the merited punishment of hell, obviously by someone who demanded it even in case of *ḳatl* with *'amd* (see below sub 6a). It is even asserted in public controversy against the views of the other side that after the Day of Judgment no Muslim will go to hell and that, on the contrary, all sins will be forgiven them. — The killing of a *mu'āḥad*, a non-Muslim under the protection of the *Islāmic* state, is threatened with punishment in the next world (e.g. al-Bukhārī, *Ḍiyāt*, bāb 30; al-Dārimī, *Siyar*, bāb 60; the *Qur'ān* is silent on the question); but, as might be expected, the view is very rarely expressed that this punishment is eternal. — The prohibition of suicide, which we do not find laid down in the *Qur'ān*, is given in the *Ḥadīth* and the suicide is threatened with eternal punishment in the next world.

As an appendix to the above we may briefly mention the connection of several kinds of animals with *ḳatl*, which is also dealt with in tradition. Muḥammad had, as is related, recommended the slaughter of dogs but later withdrew the order, although the dog always remained subject to certain exceptional regulations (cf. the art. *KALB*); the *sunna* further orders the killing of the *wazagh*, a kind of lizard, but if possible it should be done with one blow: on the other hand the killing of ants and of cats is forbidden (among the authorities for this last tradition is Abū Huraira); on the killing of snakes cf. Guillaume, *The Traditions of Islam*, p. 116 sq.

As regards the value of the traditions just quoted, the genuineness of none of them can be proved; while the falsity of those, which seek to save the murderer of a Muslim from hell, is

apparent, it is also probable of those which hold the contrary view.

4). The controversy regarding the punishment of the murderer of a Muslim centres round a passage in the *Qur'ān*, which in itself could and must form a foundation for it, and is in part at least independent and original. This controversy and the conception of *Ḳatl* in general are, however, very closely connected with the disputes aroused by the *Khāridjīs*, *Qadarīs* and *Mu'tazilīs*; for details see these articles; here it is sufficient to recall the following questions: — "is the committing of deadly sins — and killing with 'amd' is certainly one of them — unbelief?" "Does man create his own actions, including sins, himself, or do they happen through *qadar*?" "Can man by his intervention interfere with Allāh's decision, for example by killing another shorten the period predestined for the latter's life?" We have more than one example of these questions being applied to *ḳatl*, and they have been cited in discussing *ḳatl* (cf. e.g. Goldziher, *Vorlesungen über den Islām*¹, p. 98 sq.; sec. ed., p. 92 sq.). But the *Mu'tazilī* view of the eternalness of hell-punishment for him who commits a deadly sin and does not repent, is specially important in this connection; al-Zamakhsharī gives an explanation of the verse of the *Qur'ān* in question from this point of view. Finally the consensus of orthodox opinion agreed that the deliberate killing of a Muslim is certainly a deadly sin, but the slayer, on the other hand, if he repents and voluntarily submits to the punishment prescribed, will not be further punished in the next world and, even if he does not repent, will in no case remain in hell eternally (agreement was reached on this point even before the rise of the *Fiqh*-schools; therefore there is no *ikhtilāf* of the *madhāhib* on this question); this view has found its way into all text-books of *Fiqh* and of doctrine.

5) A statement of the prevailing *Ḥanafī* views on killing. *Ḳatl* in the *Fiqh* is the act of a man whereby the life of a fellow-man is brought to a close (the death need not immediately follow the act). It may be qualified by any of the five "legal categories": — duty or necessity (*wādjib*), e.g. the killing of the *murtadd*; recommended (*mandūb*), e.g. when the *ghāzī* kills his unbelieving kinsmen if they insult Allāh or his Prophet; permitted (*mubāh*), e.g. when the *Imām* kills the unbelieving prisoner of war, in the case when the reasons for killing him exactly balance those for granting his life; killing in self-defence is also allowed i.e. in defending oneself against an illegal attack on one's life, person or property, in defending oneself or some one who comes to help, if the attack cannot otherwise be averted (on further questions there is *ikhtilāf*, also on the question whether a man who surprises another in adultery with his wife or endeavouring to see into his harem, and kills or mutilates him, is acting legitimately or not; one tradition on the subject is interpreted in different ways); disapproved (*makrūh*), e.g. when the *ghāzī* kills his unbelieving kinsmen without their having insulted Allāh or his Prophet; illegal and therefore forbidden (*ḥarām*).

Illegal killing as the result of actions in themselves legal may take place in five ways:

a) as 'amd, i.e. someone wilfully makes an-

other the direct object of an action in general fatal so that the other dies as a result; according to one view, the intention of killing is necessary for the conception of 'amd, which, however, is always presumed in the case of any act generally fatal in its result, which is illegally inflicted on another; so that, for example, any one, who strikes a blow at the hand of another with an instrument adapted in general for killing, but inadvertently hits his neck and kills him, *ceteris paribus* is unanimously regarded as equally guilty with the man who strikes another in the neck with the same instrument, wilfully intending to kill him and slays him: this killing is a sin (*ma'ṭham*) and in general is punished by *ḥisās*, or else the slayer is bound to pay the heavier *diyya* and to lose any possible legacy from the deceased to himself;

b) as *khafā'* (or *khafā'*), i.e. there is no intention of committing an act illegally on the other as in the case of a), while the action itself is premeditated: two kinds are distinguished, according as the *khafā'* (mistake or misadventure) which shows that the killing is not wilful, is in the intention of the doer (*fi 'l-ḥaṣḍ*) or in the carrying out of the action (*fi 'l-f'ṣl*). The former is the case when someone treats another as a wild beast or a *ḥarbī*, (an infidel not enjoying the protection of the Islamic state, against whom the *djihad* is to be waged) the killing of whom is not illegal, and kills him; the latter when someone unluckily hits another, while shooting at a target or at a *ḥarbī*, so that he dies, or strikes at the hand of another person but inadvertently hits the neck of a third person and kills him; this killing is not sin but brings with it (without *ḥisās*) the obligation upon the *ʿāqila* of the killer to pay the smaller *diyya* and to lose any claims to any inheritance from the deceased as in a); besides the obligation of the killer to perform the *kaffāra*;

c) as *shabah* (or *shibh*) 'amd = similar to 'amd, i.e. someone intentionally makes another the direct object of some action, not always but sometimes fatal, and death results. Actions which experience has shown not to be fatal at all are thus quite excluded, such as striking the hand with a reed pen; if anyone dies as a result of such an action as this, it is an unfortunate accident, which is not followed by any penal consequences. This killing is a sin and brings with it (without *ḥisās*) the obligation upon the *ʿāqila* of the slayer to pay the heavier *diyya* and to lose any possible inheritance from the deceased as in a), and in addition the slayer is bound to perform the *kaffāra*. This category only exists in cases where death actually results; in cases of bodily injury, which, by the way, are similarly classified, the action is regarded as 'amd;

d) as *djārī maḍjra 'l-khafā'* (or *mudjirā maḍjra 'l-khafā'* or *ḥā'im maḳām al-khafā'*) "equivalent to *khafā'*," i.e. the factor of deliberation is lacking in the action (and also the intention of directing the action illegally against another) in the circumstance of b) and c), for example: someone falls upon another in his sleep or falls from a roof upon him and kills him; the legal results are the same as in b);

e) as *ḳatl bi-sabab* "indirect killing", i.e. someone brings about the death of another without doing anything directly against him; e.g. he digs a well and someone falls into it and dies as the result; sometimes this category is treated as a subdivision

of *d*); but it is a matter of indifference, whether the act, which indirectly results in the death of another, is deliberate or not, intentional or unintentional; even if the action has been planned in some very cunning way such as setting a savage beast on another person with the intention of causing his death, it does not alter the situation. The legal consequences are in any case limited to the obligation upon the *‘aḳīla* of the doer to pay the lighter *diya*; larger works on *Fīḥ* usually discuss very fully the question what acts are to be considered direct causes of death and which are *ḳatl bi-sabab* and in which there can be no question of a causing of death so that no legal consequences result.

Two cases are especially dealt with in the *Fīḥ* books: *α*) The causing of a premature birth or abortion and *β*) killing through giving false evidence.

α) If in causing an abortion or premature birth, the embryo — which must be sufficiently developed to be of human form — is brought into the world dead or dies after the birth or the mother dies, it is not a case for the application of *ḳiṣās*; there is in any case no *ḳatl ‘amd* in the mother whose killing is dealt with under the above rules and the embryo before completion of birth is legally not in full possession of its powers but is usually regarded as a limb of the mother. [Hence we have the following law: if the head of a child appears out of the mother's womb at birth and the child cries (and is therefore certainly alive) and then someone cuts off its head, it is not a case for *ḳiṣās* and only the punishment prescribed for producing an abortion is to be inflicted]. Different amounts are to be paid for the embryo according to the different cases and if it comes alive into the world and then dies the person who causes its death is liable to *kaffāra*; he also loses any inheritance that might have come to him.

β) If anyone is killed on evidence which shows that a crime deserving death has been committed and then the witnesses recall their evidence or in other ways it is proved that their testimony was false, *ḳiṣās* cannot be executed on the witness; the *diya* must be paid, the heavier if the false evidence was deliberately given, the lighter if otherwise.

6) We may add the following — taking only the most important points — to the above exposition of the Ḥanafī system, with reference to *ikhṭilāf* (difference of opinion among the schools).

a) On *‘amd*: the difference of opinion within the Ḥanafī school already mentioned, regarding the part of the intention to kill in *‘amd* is also found outside the Ḥanafī school; among the Shāfi‘is the view which does not demand the existence of the intention to kill has become predominant, and the evidence for the other views is sometimes interpreted as meaning a presumption of intention. Abū Yūsuf and al-Shaibānī, in agreement with Mālik, al-Shāfi‘i and Aḥmad Ibn Ḥanbal, assume *‘amd* if the action is as a rule fatal; Abū Ḥanifa, on the other hand, limits it to the use of a weapon or of a thing which can be used like a weapon to cut off limbs; among such he includes fire; deliberate killing, for example with a large unsharpened stone, or a big stick, which in the ordinary way would kill, or by drowning in water, which would be generally regarded as of sufficient depth to do so, is therefore considered by the former as *‘amd*, but by Abū Ḥanifa as

shabah ‘amd, relying on a passage in the so-called first temple speech of Muḥammad, which the champions of the other view naturally interpret otherwise, and this view was later considered the better by the Ḥanafis. The qualification of the various actions generally differs sometimes considerably and the Ḥanafis often make use of *istiḥsān*, exercise of discretion. In the Mālikī and Ḥanafī view no *kaffāra* is to be performed for *‘amd*; al-Shāfi‘i, on the other hand, demands it if the *ḳiṣās* is not executed and both views are given on the authority of Aḥmad Ibn Ḥanbal.

b) On *Ḳhaṭ’*: that *Ḳhaṭ’* is not a sin is more exactly explained to mean that it is neither permitted nor forbidden but that this killing is rather *fi’l al-ghāfil*, “action of a thoughtless person”, and is to be judged in the same way as the act of a mentally defective person or of an animal. Except in the Ḥanafī madhhab, categories *d*) and *e*) [sub 5] are not distinguished from *Ḳhaṭ’*, which also was the earliest Ḥanafī view (*Z.D.M.G.*, lviii. 338) and *ḳatl bi-sabab* has generally the same legal consequences as *Ḳhaṭ’*; we thus have three kinds of *ḳatl*: *‘amd*, *shabah ‘amd* and *Ḳhaṭ’*, of which *shabah ‘amd* is considered to be composed of *‘amd* and *Ḳhaṭ’*.

c) On *shabah ‘amd*: this category is also called *‘amd Ḳhaṭ’*, *Ḳhaṭ’ ‘amd* or *Ḳhaṭ’ shabah ‘amd*; in contrast to it, *‘amd* is also called *‘amd maḥḍ* and *Ḳhaṭ’* also *Ḳhaṭ’ maḥḍ* (pure *‘amd* or *Ḳhaṭ’*); the application of *ḳiṣās* is said to be permissible by al-Shāfi‘i if the killer, for example, repeats the blow with an instrument not normally adapted for killing so frequently that the person attacked dies; the act is then considered *‘amd*; one of the two opinions handed down on the authority of Abū Yūsuf and al-Shaibānī is to the same effect while the view that became predominant in the school was to the contrary. Mālik allows *ḳiṣās* in *shabah ‘amd* in general.

d) On *ḳatl bi-sabab*: Mālik, al-Shāfi‘i and Aḥmad Ibn Ḥanbal demand *kaffāra* in addition, if the placing of the cause of the death was illegal.

e) Different views also prevail as to the amount to be paid for the killing of an embryo.

f) On causing death through false witness: if the false evidence was deliberately given, according to al-Shāfi‘i and the better known opinion of Mālik, *ḳiṣās* can be executed on the witnesses.

7) Notes on the question of permission, request, compulsion and assistance in illegal killing. *a*) If someone kills another by his request or with his permission there is neither *ḳiṣās* nor obligation to pay *diya*.

b) No definite punishment is laid down for the case of a request to kill someone; such a request does not mean the exculpation of the slayer; only if the person requested is a minor or a slave claims may be made from the *‘aḳīla* of the minor, or from the proprietor of the slave.

c) A forces B to kill C; then, according to Abū Ḥanifa, the *ḳiṣās* is executed on A, according to Mālik and Aḥmad Ibn Ḥanbal on B; as to al-Shāfi‘i's view, there is no doubt that A is liable to *ḳiṣās*; as regards B both possible views are transmitted, of which the one that ultimately became predominant in the school makes him also liable to *ḳiṣās*. Mālik further makes A also liable to *ḳiṣās* if the compulsion comes from a person having authority, or from a master to a slave.

d) A holds B and C kills him while he is held; in this case Abū Ḥanīfa and al-Shāfiʿī make C liable to *ḥiṣāṣ* and A to *taʿzīr*, which is more definitely defined as imprisonment. According to Mālik, both are to be regarded as culprits and therefore liable to *ḥiṣāṣ* if the holding was necessary to facilitate the slaying and B was not able to escape after being held. Aḥmad Ibn Ḥanbal's opinion is given in two versions; according to the one, *ḥiṣāṣ* is executed on C and A is punished with imprisonment for life, according to the second opinion, A and C are both liable to *ḥiṣāṣ*.

II. *Ḳatl* as punishment.

The punishment of death may be described quite generally as *ḳatl*; in the following account cases in which it is applied are given seriatim; in contrast to *raḍīm* and *ṣalb* (cf. below) *ḳatl* is also used in the narrower sense of execution with the sword.

1) In the cases of illegal killing described in detail above, the nearest relative of the dead man, who in this capacity is called *walī al-dam*, is entitled to kill the culprit in retribution if certain definite conditions are fulfilled. This punishment is called *ḥiṣāṣ* or *ḳawad*, names which also cover retribution exacted for wounds which are not fatal; for further information see the article *ḲIṢĀṢ*.

2) There are special regulations regarding sorcerers (*sāḥir*), about whom there are also various traditions. Mālik, al-Shāfiʿī and Aḥmad Ibn Ḥanbal recognise sorcery (*siḥr*) as an actual force. Abū Ḥanīfa disputes this, but there is a consensus of opinion that it is forbidden to study it; it is even described as unbelief (*kufṛ*) almost as a general rule. Mālik and Aḥmad Ibn Ḥanbal say that the sorcerer is to be killed with the sword simply for studying, teaching and practising magic; al-Shāfiʿī limits this punishment to the case in which someone has been killed by sorcery (i.e. he makes it a case for *ḥiṣāṣ*, which in practice is only justified by the confession (*ikrār*) of the guilty person; while the punishment in Abū Ḥanīfa, Mālik and Aḥmad b. Ḥanbal is regarded as *ḥadd*); two different, more lenient views are credited to Abū Ḥanīfa. Opinions differ on particular questions, such as whether the conversion of the sorcerer effects a remission of the punishment, whether a woman is to be punished equally with a man, how sorcerers of the *Ahl al-Kitaḅ* are to be treated, how far soothsaying is to be considered sorcery.

3) The punishment of death by stoning (*raḍīm*) — in certain circumstances also by the sword (*ḳatl*) — occurs as *ḥadd* in certain cases of immorality; on this see the article *ZINĀ*.

4) Highway robbery (*ḳaṭʿ al-tariq*) may also in certain circumstances be punished with death. The authority for this is *Qurʾān*, v. 37 sq. (from about the year 6 or 7, before the capture of Khaibar; Grimme puts the verse before the battle of Badr): "The punishment of those who fight against Allāh and His prophet and create ruin upon the earth is that they shall be slain or crucified or have their hands and feet cut off on the opposite sides or be banished from the country. This is their humiliation in this world and in the next world they shall be severely punished — unless they repent before ye have them in your power" It can be asserted with certainty that this refers to the unbelievers, very probably to the Jews; ruthless war is ordered to be waged on them and their repentance is the adoption of Islām. There are still traces of this

interpretation in the commentaries. But in general this passage is connected with Muḥammad's attitude to certain *murtadd*'s which will be dealt with in section 5); this cannot be correct, if only because the procedure there practised does not entirely conform to these rules, so that they were forced to restore harmony in a different fashion. Those *murtadd*'s were considered as highway robbers, from the point of view of the later definition rightly and only in this way could a law for the punishment of highway robbers be found in the *Qurʾān*.

The more important laws of the *Sharʿa* are the following. Only such persons as are adults in full possession of their faculties and who are able to be dangerous to travellers are to be considered highway robbers. According to Abū Ḥanīfa, highway robbery can only take place in the open country, according to Mālik, al-Shāfiʿī and Aḥmad Ibn Ḥanbal in the town also. Mālik gives the Imām — and this is certainly the correct interpretation of the passage in the *Qurʾān*, which is also found in the commentaries — absolute freedom in the choice of punishment, even in the contingency of a cumulative application, whatever form the robbery may have taken; but if the person concerned has killed someone (in this connection killing implies a murder to which *ḥiṣāṣ* might be applied), he must at least be executed with the sword. The three other Imāms grade the punishment to fit the different forms of robbery on the highway; according to Abū Ḥanīfa, the criminal is put to death if he has caused the death of his victim; if he has also robbed him (and in such a way, it must always be understood, that the *ḥadd* for theft can be carried out; cf. the art. *SĀRIK*), he may be further punished by cutting off his hands and feet on alternate sides and with crucifixion (*ṣalb*) which in that case takes the place of killing with the sword; if he has only committed a robbery, we have only the cutting off of hands and feet on alternate sides; according to al-Shāfiʿī and Aḥmad b. Ḥanbal, he is killed, if he has killed his victim; if he has also committed a robbery, he is crucified after being put to death; if he has only committed a murder, he is punished by cutting off his hands and feet on alternate sides; if he has only made the neighbourhood unsafe, then, according to Abū Ḥanīfa, al-Shāfiʿī and Aḥmad b. Ḥanbal, he is put in prison; whether this must be done in another place is a debated point. In Abū Ḥanīfa and Mālik (also in some Shāfiʿī's but their view is rejected by the school) crucifixion consists in the criminal being tied alive to a cross or a tree and his body ripped up with a spear so that he dies, and this is certainly the more original form; according to al-Shāfiʿī and Aḥmad b. Ḥanbal, he is first killed with a sword and then his corpse is ignominiously exposed on a tree or cross. All these punishments are *ḥadd* and a right of Allāh; therefore any renunciation by the *walī al-dam* of the *ḥiṣāṣ* is of no avail even though it is he who has the right to carry out the *ḳatl*. If the criminal repents before he falls into the hands of the authorities (what exactly is meant by repentance is disputed) these *ḥadd* punishments are dropped; but claims by individuals to *ḥiṣāṣ* etc. can still be enforced against him.

5) The *murtadd*, that is the renegade from Islām, is liable to the death-penalty if his apostasy is proved. If we leave out the passages dealing with the *munāfiq*'s [q.v.] who are separately dealt with — their execution is, however, described under

certain conditions in Qurʾān, iv. 91 — there is no such law in the Qurʾān referring specially to the *murtadd*, although xvi. 108 (third Mekkan period), ii. 214 (of the year 2), iii. 80—84 (Medina; placed by Grimme shortly before or after the battle of Uhud), 102 (soon after the battle of Uhud), iv. 136 (of the same period) threaten the eternal punishment of hell for all those who apostacise from Islām and do not repent, as well as for all unbelievers, and in iii. 95 sq., 142, and ix. 67, a warning against apostacy is uttered. Among the traditions we find in various forms the story that Muḥammad, contrary to the rules of the Sharʿa, cruelly mutilated and killed some *murtadd*'s, who had killed one or more of his herdsman and driven away the camels, but the tradition is probably correct just for this reason. This contradiction was felt and an endeavour was made in the ḥadīth's to justify the cruelty of the punishment, and even the text was altered. Of ʿAlī also a cruel act, of another kind, however, is recorded in a similar case, but Ibn ʿAbbās is said to have protested against it. Two *murtadd*'s, each of whom had killed a Muslim, were executed by Muḥammad's orders after the capture of Mekka; a third man, against whom there was nothing but his apostacy, was also placed on the list of the proscribed; his foster-brother ʿUṭhmān, however, obtained security (*amān*) for him although Muḥammad would gladly have seen someone kill him before immunity was granted; he later became a Muslim again. There is also a saying of Muḥammad's: "Slay anyone, who changes his religion" or "He who secedes from you shall die", and others similar, e.g. that the blood of a Muslim could only be shed for apostacy, *zinā* and *kaṭl ʿamd*; there is also a story that Muʿadh b. Dījal killed a *murtadd* because Allāh and His Prophet had so ordained; Muḥammad is also said to have ordered that conversion should first of all be attempted and a period of three days allowed for this; but all this can hardly be genuine. There are also the traditions regarding the *Ahl al-Ridda* (cf. the art. RIDDA) who refused the *zakāt* and were treated as apostates by Abū Bakr. The tradition "He who is a good Muslim will not be punished for his sins from the pagan period but he who is a bad Muslim will have them counted against him" does not refer to the *murtadd*, as it is usually said to do.

The punishment of death laid down by the *sharʿa* for the *murtadd* is sometimes described as *ḥadd*, sometimes not; in the latter view he is simply killed as an unbeliever (*kāfir*) and the punishment need not be carried out in every individual case. Only an adult in full possession of his faculties and not acting under compulsion can become an apostate from Islām; opinions are divided regarding a man who apostacises while intoxicated or a minor (on the verge of his majority) capable of discernment (*nurāḥik, mumaiyis*). There is also difference of opinion regarding the attempt at conversion and the granting of a period, usually fixed at three days, for reflection. If the *murtadd* does not repent, he is to be beheaded with the sword; torture and cruel methods of execution are forbidden. According to al-Shāfiʿī, his punishment is left to his owner, if he is a slave. Abū Ḥanifa and his school limit the punishment of death to male apostates and the consensus of opinion excludes the minor; a woman (and

also a minor) is imprisoned and beaten every three days till she repents; according to Abū Ḥanifa (contrary to Abū Yūsuf and al-Shaibānī) she may also be made a slave and this is recognised as right by the school. Anyone who puts to death a *murtadd* of whatever kind without powers granted by the authority, is generally liable not to *khiṣāṣ*, but only to *taʿzīr*. The same rules generally hold for repeated apostacy.

Similar to the punishment of the *murtadd* is that of the *zindīk*, i. e. anyone who, professing to be a Muslim, is really an unbeliever or any who belongs to no religion (cf. Massignon, *Al-Hallaj*, i. 186 sq.). The conversion of a non-Muslim to another non-Muslim religion is similarly dealt with, although such an one is not called *murtadd*. He can only escape punishment by adopting Islām; on the whole of this cf. Goldziher, *Muhammedanische Studien*, ii. 215 sq.

How exactly one becomes an unbeliever and therefore a *murtadd* is disputed in particulars, especially the question how far this is the case with irreverent utterances regarding Allāh or one of His prophets; there are various special enactments regarding the latter, which threaten the death penalty to non-Muslims and in part allow a Muslim no remission of punishment if he recalls the words.

For further information see the article MURTADD.

(6) There is no law in the Qurʾān for dealing with a man who omits the *ṣalāt* (ritual prayer) (*tārik al-ṣalāt*), where its performance is, on the other hand, often strictly enjoined, and not a single unequivocal ḥadīth on the subject can be found — quite apart from any question of genuineness. The *Sharʿa* lays down the law as follows: — Anyone who does not perform the *ṣalāt*, as in duty bound, without denying its obligatoriness (anyone who does this is *murtadd*) and has no — even invalid — excuse for this, according to Mālik, al-Shāfiʿī and the more popular of the two views credited to Aḥmad b. Ḥanbal, if he does not atone, i. e. makes good his omission and says he will never commit the fault again, is to be executed with the sword. This punishment is also sometimes described as *ḥadd*. According to Abū Ḥanifa, the culprit is imprisoned till he again performs the *ṣalāt*. In all these views he is considered a Muslim, while the other view attributed to Aḥmad b. Ḥanbal deals with him entirely as an unbeliever, i. e. a *murtadd*; but these regulations are modelled on those for apostacy (cf. the remarks on the *Ahl al-Ridda* above).

There are two more cases in which the suppression (*kitāl*) of the enemies of orthodox Islām is prescribed; killing, of course, plays the main part and therefore we must discuss this aspect of the process here.

(7) Firstly, the fighting of the *bughāt* is prescribed. It is said in Qurʾān, xlix. 9 (late Medina period): "If two parties of the believers contend with one another, make peace between them; but if one oppresses the other (*baghat* — from which *bughāt* is the plural of the participle), fight against the party which oppresses until they again obey Allāh's command; and if they do this, make peace between them with equity and act with justice" (this refers to a quarrel among the *anṣār*). Oppression is often forbidden and disapproved of elsewhere. But Muḥammad at any rate did not know the later conception of *bughāt*, although

its development begins at a point closely connected with this. Some traditions on the *bughāt* are in agreement with the legal enactments.

The *Shari'a* understands by *bughāt* sectarianising Muslims who reject the authority of the Imām, are able-bodied, so that they might offer resistance, and justify their attitude, although erroneously, with their dogmatic conviction (they are to be distinguished from highway robbers, for example — individual *bughāt*, who are guilty of breaches of the law are punished like them —, on the one hand, and unbelievers on the other). If they do not attack the orthodox community, they need not be attacked; otherwise their suppression is a duty of the Imām (the head of the Islāmic community) and a *fard al-kifāya* for the Muslims (cf. the art. *FARD*). This punishment is also sometimes called *ḥadd*. In general the rule is that only participants in the actual battle can be killed during the fighting. Fugitives, wounded, those who surrender and prisoners, as well as women and children, cannot be put to death. According to Abū Ḥanīfa, the Imām may kill a prisoner if he knows that he would again join the *bughāt* if spared; according to him, a captured slave who has been fighting by the side of his master can also be killed.

(8) Regarding the *Djihād* see that article; there are also traditions regarding the following regulations. If the unbelievers with whom war is being waged are not among those from whom the *djizya* can be taken — who exactly those are is a matter in dispute — the men are killed, if they do not adopt Islām and the women and children enslaved. If, on the other hand, they refuse Islām and will not pay the *djizya*, they are to be fought. All able-bodied men can be killed so long as they are not taken prisoners; men incapable of bearing arms, as well as women and children, cannot in general be so dealt with unless they take part in the fighting or assist in it in some way; they are to be taken prisoners and enslaved. The free, able-bodied prisoners may be (a) executed with the sword if they will not now adopt Islām; (b) made slaves; (c) exchanged for Muslim prisoners; (d) ransomed; (e) or set free without a ransom being paid (in all these cases by the Imām). Anyone who kills a prisoner without authority is only punished with *ta'zir*.

Every unbeliever who does not pay the *djizya* or does not belong to a people which has a treaty with the Muslim community or is not a *musta'min* (on these cf. the art. *KIŞAŞ*) is *ḥalāl al-dam* (to be killed with impunity) and may at any time be killed by any Muslim without his being liable to *kişāş* or to pay any *diya* or perform *kaffāra*. This enactment is only the natural consequence of the *djihād* law and Muḥammad himself not infrequently made use of it.

(9) The views of the *Shi'is* on all the points dealt with above agree almost entirely with one or other of the *Sunni* views. It would take up too much space to deal with them in a similar fashion.

(10) The infliction and execution of the death penalty was in practice very often in strong contradiction to the regulations laid down in the *Shari'a* (cf. the art. *ADHĀB*; Snouck Hurgronje, *Verspreide Geschriften*, ii. 200, etc.). The historians afford many examples for the actual practice and so do accounts of European travellers; on the conditions in the empire of the caliphs in the tenth

century see Mez, *Die Renaissance des Islāms*, p. 347 sqq., also Massignon, *Al-Hallaj*, i., especially p. 220 sqq., 292 sqq.; on those in Egypt in the first half of the nineteenth century see Lane, *Manners and Customs of the Modern Egyptians*, end of the chapter on *Religion and Law*; on those in Persia in the same period see Polak, *Persien*, i. 328 sq.; on those in the Ottoman empire of the eighteenth century see Mouradgea d'Ohsson, *Tableau Général de l'Empire Ottoman*, especially vol. vi. (1824), p. 244 sqq.; for Turkey the *Kānūnnāme's* are also useful (cf. *Mitteilungen zur osmanischen Geschichte*, i. 13 sqq.); among the published sources quoted there are of special importance: Digeon, ii. 245, 262; v. Hammer, *Staatsverfassung*, i. 125, 133, 143—150; *T. O. E. M.*, iii. (1328), Appendix i. 27 sq., ii. 1—4, 7, 9; *M. T. M.*, i./ii. 341 sq.) and from the *Kānūnnāme* itself (edited there; p. 19—21, 32—34).

Bibliography: The *Fikḥ*-books, the works given in the article *ADHĀB*, especially Juynboll, *Handbuch des islāmischen Gesetzes*, p. 284—309, and the literature there given; the articles *MURDER* and *EXECUTION* in T. P. Hughes, *A Dictionary of Islam*. Besides the articles already referred to, the article *ADHĀB* and those dealing with the Arabic expressions not explained above should be consulted. (J. SCHACHT)

KAṬRĀN B. MANŠÜR, a Persian poet. 'Awfī calls him Kaṭrān al-'Aqūdī al-Tabrizī; according to Dawlatshāh, he was born in Tirmidh. Others say he was born in Djabal-i Dailam; Djabal-i is also found as his *nisba*. Dawlatshāh says that he spent some time in Balkh and later lived in the 'Irāk. The period of his literary activity lies about the middle of the eleventh century A. D. Nāsir-i Khusrāw mentions in the *Safarnāma* that he met Kaṭrān in Tabriz in 438 (1046); a well-known poem by Kaṭrān commemorates the earthquake in Tabriz in 434 (1042/43). According to a *tadhkira* quoted in Rieu, *Supplement*, p. 140, our poet died in 465 (1072). He was the panegyrist of the rulers of Dailam and of Ādharbaidjān; among his patrons are mentioned the Amirs Faḍlūn, Wahsūdān, Abū Naṣr Mamlān b. Wahsūdān, who was appointed over a part of Ādharbaidjān by the Saldjūk Sultān in 450, and Muḥammad b. Kumādī (according to Dawlatshāh, governor of Balkh and Sandjar; if this is correct he long survived the poet) and further the Būyid 'Aqūd al-Dawla, as is indicated by the epithet 'Aqūdī given by 'Awfī.

Works. Kaṭrān left a *Diwān* (manuscripts of which are found in European collections) and a *mathnawī* called *Kāws-nāma*. The poems of Kaṭrān are sometimes wrongly attributed to Rūdāgi in manuscripts; the confusion is caused by the similarity of names of their respective patrons (Naṣr b. Aḥmad the Sāmānid in the case of Rūdāgi and Abū Naṣr Mamlān in the case of Kaṭrān). On this question cf. Rūdāgi and Pseudo-Rūdāgi by E. Denison Ross in *J.A.R.S.*, 1924, p. 609 sqq. Criticisms on the poetry of Kaṭrān are given by Nāsir-i Khusrāw and Waṭwāt. The former says, curiously enough, that Kaṭrān did not know Persian well but otherwise was a good poet; Waṭwāt (in *Dawlatshāh*) places him very high and allots him a special position with regard to the other poets. 'Awfī's verdict on Kaṭrān means very little for us, as this author regularly introduces each of his biographies of poets (if we may so call his inflated empty prose) with a rhetorical eulogy of the person

in question. But he is at least to the point when he says that Kaṭrān was fond of rhetorical artifices and particularly of the kind called *taḍjīs* (cf. Ibn Kaïs al-Rāzī (*Mu'djam*, Gibb Mem. Ser., x. 309 sqq.). The only quotation from Kaṭrān given in Ibn Kaïs's manual of poetics (p. 312) is quoted to illustrate one of the varieties of *taḍjīs* (*taḍjīs-i nāḳīs*). On Kaṭrān's skill in managing the more difficult poetic forms cf. also Dawlatshāh, p. 67, 14 sq.

Although the *Diwān* is not yet published one can form a fair opinion of the skill of the poet from what is in print. A few *qaṣīda*'s and fragments of *qaṣīda*'s are given in Schefer, *Chrestomathie Persane*, ii. 240 sqq.; others in Browne's edition of 'Awfī's *Lubāb al-Albāb* (ii. 214 sqq.). All that is given in Dawlatshāh (ed. Browne, p. 67 sq.) is also found in 'Awfī, only Dawlatshāh gives much less and has a few unimportant variants. The oft occurring substitution of Arabic terms for the rarer Persian words is also found in him; thus the less well known *shamar* (= pond; 'Awfī, ii. 215, 10) becomes in Dawlatshāh (p. 68, 1) *thamar* and the verse is, of course, nonsense (or it may be that we have simply a copyist's mistake). It may be assumed that Dawlatshāh, as far as the poems are concerned, simply copied 'Awfī.

In the poems printed in Schefer, rhetorical artifices are not more used than in the other panegyricists, for example Minūčihri or Azrakī; we find among other figures *Tabyīn wa-Tafsīr*, p. 245 paenult., p. 246, 6 sq., *muwāzana*, p. 246, 1. These poems have something in common with the old panegyrics; the three fragments of *qaṣīda*'s describing spring, autumn and winter, contain themes already known from Minūčihri, such as the comparison of winegrapes with persons, namely negroes and Rūmī's, while Minūčihri compares them with little girls.

Kaṭrān gives more prominence to the epic element in his panegyrics than do his predecessors. The first poem in Schefer (ii. 240) is noteworthy in this respect; its *madḥ* commemorates a victory of the Amīrs Wahsūdān and Mamlān, and the often quoted song (p. 243) to Mamlān, the *tashībīb* of which contains the description of the earthquake which demolished the town of Tabriz in 434 (1042), is equally noteworthy; this description is in this case the main thing. The fragments in 'Awfī are obviously chosen to illustrate the use of *taḍjīs* by the poet, which is discussed in the prose notice of Kaṭrān by this author. The *taḍjīs* found here is almost exclusively the *taḍjīs-i musdawidj* (Ibn Kaïs, p. 313); the *taḍjīs-i nāḳīs* (cf. Ibn Kaïs, p. 312) is also found (p. 214, 14: *gilzār gulzār*) and *takrīr* (cf. Ibn Kaïs, p. 315) in the second part of the distich ('Awfī, ii. 214, 21). The rhetorical effect achieved by means of homonyms (*taḍjīs-i tāmm*; cf. Ibn Kaïs, p. 309), of course, occurs, e. g. 'Awfī, ii. 216, 9-11, where the word *tīr* is repeated four times each time with a different meaning. In contents these fragments offer nothing new or noteworthy.

The prominence deliberately given to the narrative element in the court-lyric may be an innovation of Kaṭrān's own. That his lead was followed is shown by Dawlatshāh, who not only calls Anwārī a pupil of Kaṭrān's but also mentions others (Rashīdī, Rūhī, etc.) and "most poets of Balkh and Transoxiana".

AL-KATTĀNĪ, MUHAMMAD B. DĪ' FAR B. IDRIS, a member of the important family of the Kattāniyān and Sharīf in origin, a contemporary Moroccan writer (he was still writing in 1314 A.H.). He is the author of a number of works including a book in honour of his ancestor Idris (*al-Ashhār al-Āṭirat al-Anfās bi-dhikr ba'd Maḥāsīn Kutb al-Maghrib*, Fās 1314 A.H.). The most important is his *Salwat al-Anfās wa-Muḥādathat al-Aḳyās minman uḳbira fi 'l-'Ulamā' wa-'l-Sulḥā' bi-Fās* (3 vols., Fās 1316 = 1898-99). The first part of this book is devoted to showing the merit which is acquired by visiting *zāwiya*'s and tombs of saints. He then proceeds to give, quarter by quarter, the illustrious men who have lived in Fās or are buried there and this part of the book contains valuable information on the historical topography of the town. He consulted a considerable number of books a list of which he gives at the end of the third volume. We know no details of his life, not even the date of his birth.

Basset, *Recherches bibliographiques sur les sources de la Salwat al-Anfās*, Algiers 1905; Codera y Zaidin, *Considerable numero de libros antiguos y modernos existentes en Marruecos, Actes du XIVe Congrès international des Orientalistes* (Algiers), iii/ii., Paris 1908, p. 587-590.

(RENÉ BASSET)

KAWĀLA (also Cavalla), a seaport on the Aegean Sea, opposite the island of Thasos on the boundary between Macedonia and Thrace. In ancient times Neapolis lay here, the port of the town of Philippi, just as Kawāla is now the harbour for the district of Drama. The town is partly built on a promontory which is still surrounded by walls which date from the middle ages; there is a harbour on both sides. An aqueduct has also survived from the middle ages. Kawāla was captured by the Turks from the Byzantines in the reign of Murād I, who conquered Thrace. Murād had sent the sandjak-bey Deli Balban to besiege Seres; soon afterwards he sent Lala Shāhīn to assist him; the latter then captured Kawāla, Drama and Seres. This event is usually placed in the year 775 (1373/74) (Sa'd al-Dīn, *Tādj al-Tawārīkh*, Constantinople 1279, i. 91, and von Hammer, *G.O.R.*, i. 181, whose statements are inaccurate in other respects); the anonymous chronicler, ed. Giese, p. 26, on the other hand, gives the date 787 (1385/86). He adds that nomads from Sarukhan were then settled here and in the Vardar plain. Not much more is heard of Kawāla in Turkish history; Sulaimān I fortified it before beginning his campaign against Rhodes. The population probably always remained predominantly Greek. Muḥammad 'Alī, the Egyptian Khedive, was probably born here; at any rate he lived here in his youth (born about 1769; Dj. Zaidān, *Mashāhīr al-Sharḥ*, Cairo 1910, i. 1). Muḥammad 'Alī later endowed the town with a school (Mühendis-khāne) and other foundations, for the upkeep of which he set aside the revenues of the island of Thasos.

In the sixteenth century Kāwāla attained great importance as an exporting harbour and the main depot for the tobacco grown in the neighbourhood and in the whole hinterland (Drama, Seres and Xanthi). In the years before 1912 this brought the Turkish Tobacco Regie an annual profit of over 10 million francs; the tobacco is for the most part manufactured in Kāwāla and every year 5,000—6,000 people from the surrounding country come into the town for five months for this work. This is probably why the figures given for the population differ so much (cf. e.g. Sāmī, *Ḳāmūs al-A'ām*, v. 3704). According to an accurate calculation, before the Balkan war there were 17,000 Greeks, 13,000 Turks, 1800 Jews and 800 Bulgarians in Kāwāla (Nicolaidēs, *Griechenlands Anteil an den Balkankriegen*, Vienna and Leipzig 1914, p. 222). The town at that time was the capital of a *qaḍā* of the same name in the sandjak of Drama in the wilāyet of Salonika.

The treaty of San Stefano (March 13, 1878) had already given Kāwāla to Bulgaria. In the first Balkan war the town fell into the hands of the Bulgarians (Nov., 1912) but in the second Balkan war it was taken by the Greek fleet (July, 1913) and finally incorporated in Greece by the peace of Bucharest (Aug. 10, 1913) in spite of Bulgaria's protests (Nicolaidēs, *op. cit.*, p. 367 *sqq.*). Since then many Greeks have migrated thither from Xanthi and the number of Turks in the population must have been considerably reduced.

(J. H. KRAMERS)

KAWĀR, a group of oases situated in the Sahara (Bilma, the most southern oasis, is in 18° 41' N. Lat. and 13° E. Long.), to the west of the massif of Tibesti on the caravan route from Tripoli to the country round Tchad via Fezzān [q.v.]. On this route Kawār is nearly halfway between Fezzān and Kanem, separated from the former by a *ḥammāda* and from the latter by a region of sand-dunes. It owes its formation to a continuous chain of cliffs running from north to south, which bounding it on the east shelters it from the dreaded winds from the north-east. It is a couloir of oases, about 50 miles long from north to south and never more than 2 to 3 miles broad. The water is at no depth and fairly abundant but usually brackish. In all the oases together there are about 100,000 palm-trees; the inhabitants, whose number does not exceed 3 or 4,000, are Tubu by race, considerably mixed with Kanūrī blood (the common language is Kanūrī); they are sedentary and peace-loving, unlike their kinsmen who live in Tibesti. They are scattered up and down in a dozen villages of which the chief are Anai, Ashnuma, Dirku and Bilma; these villages consist of wretched huts but beside each one on a cliff inaccessible except by ladders a place of refuge is prepared, a precaution which until quite recently was far from being unnecessary. The inhabitants live on the produce of their palm-trees, the poor crops which they raise and particularly by trading. The caravan route from Tripoli to Tchad via Fezzān, although hard, is the shortest of those that cross the Sahara; it was at one time very busy and Kawār was the place where it was joined by the roads from Zinder and Agadēs; its inhabitants were destined to become caravan-men. But their principal revenue came from their salt-pans. Those of Bilma are especially famous. The salt which the waters

bring to the surface of the soil is treated by evaporation and pressed into cakes of great purity. Some is sold to the Tuaregs who come to buy it on the spot along with dates; the remainder is exported to all quarters of the Sūdān from the Niger to Dārūr. The salt-pans of Kawār are of the same importance for the country as those of Taodeni for the region of Timbuktu and the western Sahara.

The history of Kawār is very obscure. The caravan route on which it lies was already in use in ancient times although we have no formal evidence of this. In any case this group of oases was already in existence at the time of the conquest of North Africa, if we may rely on the stories of the Arab historians who attribute its conquest to the legendary hero of the conquest, 'Uḡba b. Nāfi'. He is said to have taken the castles of Kawār one after the other. Al-Idrisī, in the twelfth century, several times mentions the importance of the trade through these regions. He mentions inexhaustible mines of alum; there must be some confusion with the salt-deposits. It seems that at this time Kawār was under independent local chiefs. Later when the kings of Kanem extended their authority over Fezzān, they certainly held Kawār; this is the situation described by Ibn Khaldūn following Ibn Sa'īd; for the rest, local traditions seem to preserve the memory of migrations from the south. It is certain that a strong power at one or other extremity of the caravan route would try to control the whole route.

In the sixteenth century, Kawār was visited by several European travellers; first in January, 1823, by the Denham, Clapperton and Oudney expedition and then by Vogel, Barth, Rohlf and Nachtigal and lastly by Monteil. In the closing years of last century Kawār was in a somewhat wretched condition. It was under the nominal authority of a chief (*maï*) elected by the notables; in reality each village ruled itself. Kawār had been seriously affected by the general decline of trade in the Sahara; it was still more affected when the French occupation of the Tchad region put an end to the slave-trade, the principal source of business. The inhabitants paid tribute, apparently to the Tuaregs; they were nevertheless plundered and blackmailed by them and raided by the Tubu and Awlād Slimān. The Kawār then became the centre of political aspirations. The Sanūsīya had had a *zāwiya* there for quite a long time; it was a necessary station for them when they were endeavouring to extend their influence in the countries of Central Africa and when the Sanūsī *Shāikh* dreamed of creating a regular principality bounded by the two sides of the Sahara. The Turks also tried to make their authority recognised in the Kawār as they tried to do at Djanet and in Tibesti. The occupation of the Kawār by French troops from the Tchad region in July, 1906, and the establishment of a permanent post there put an end to these efforts, at the same time giving the inhabitants of this group of oases effective protection from the exactions of their turbulent neighbours.

KĀWĪN (P.), marriage, dowry, see

MAHR, NIKĀH.

KAWKAB, star, in Arabic astronomy the general term for a luminous heavenly body. The five planets known to the Arabs (Mercury to Saturn) were called *al-kawākib al-khamsa* (*al-mutaḥayyira*). The general term for the sun, moon and the five planets is *al-kawākib al-djāriya* or *al-kawākib al-saiyāra* (i.e. the moving stars), in contrast to the fixed stars (*al-kawākib al-thābita*). The name *kawkab* *shamālī* is applied to the star α of the Little Bear, which is nearest the north pole of the heavens. In al-Bīrūnī it is called *tarf al-dhanab wa-huwa djady al-kibla* (= tip of the tail, i.e. the little goat [for ascertaining] the *kibla*). This presupposes that from a knowledge of the north pole (direction of north) one can ascertain the diametrically opposite south, which is identical with the direction of the *kibla* (*samt al-kibla*). This method of ascertaining the *kibla* is only correct in regions which lie approximately north of Mekka (cf. Reinaud's note in his introduction to *Geographie d'Aboulfēda*, p. cxcv: „Or, la Mecque est au midi de la Syrie ainsi que d'une partie de la Mesopotamie et de l'Égypte (!), le mot *Kiblah* est devenue pour les musulmans de ces contrées, le synonyme de midi et il a été employé ailleurs avec la même acception"). Finally it may be mentioned that the stars α, β and γ of Cepheus were, according to Ulugh Beg, also called *kawākib al-firk*, i.e. stars of the flock (of sheep).

A catalogue of fixed stars, of which the Arab astronomers had several, is called *Djadal al-kawākib*.

(C. SCHOY)

KAWKABĀN, the name of several places in South Arabia.

1) The name of a sanctum mentioned in the inscription Halévy N^o. 686, 3—4, copied from ■ building in 'Aden by J. Halévy (*mūhrābān Kawkabān*). Cf. also F. Hommel, *Grundriss der Geographie und Geschichte des alten Orients*, ii., Leipzig 1925, p. 707.

2) The name of a castle near Zafār north of Nā'at. It was called Kawkabān, the two stars, i.e. star-castle, because it was adorned with silver stripes outside, the roof was covered with white slabs of stone, the interior panelled with cypress wood and paved with mosaic, different gems, onyx and corundum, which shone like stars at night. This marvellous building was naturally ascribed to the Djinn. This castle is perhaps also mentioned in the inscription Glaser N^o. 238, 3 (*Bait wa-Kawkabān*), which comes from Bait Ghufir in the vicinity. The castle is said to be still standing.

3) A little village on a great cliff on the right side of the Wādī Salāma, N. E. of Ḥadja and called Kawkabān-Ḥadja to distinguish it from other places of the same name.

4) Capital of the province of the same name, N.W. of Saṇ'ā. The town of Kawkabān lies at a height of 8,750 feet above sea-level in 15° 31' 42" N. Lat. on the southern part of the ridge which begins about half a mile S.E. of the town of Kawkabān at the left towards Tawila and runs S.E. to N.W. for several hours' journey. It is part of the great Maṣāna' plateau and is called Djabal Dula'. The south-eastern part of the range, the especially precipitous part, is separated from the main massif by an almost straight ravine, the Wādī Nabhān, which runs from Shibām past the one gate of the town of Kawkabān (Bāb al-Ḥadīd) to the Wādī Na'im west of the Djabal Kawkabān. Two roads run over this mountain, cut off only by the ravine of the Wādī Nabhān, the one through the town of Shibām, following the very deep ravine of Nabhān which is bridged over, an old winding narrow path of steps hewn out of the rock, and the second, an easier one, running in the Kā'a Dula' and crossing a bridge over the Wādī Nabhān just before reaching the Bāb al-Ḥadīd. The town of Kawkabān stretches from the Bāb al-Ḥadīd to the S.E. and runs quite close to the eastern slope of the cliff all along that side. This part seems to be the oldest. Not very far from the gate on the great open square in the centre of the town (in the northern part) is a double wall for the most part now in ruins. Between the two walls a great number of skillfully walled pits have been cut out of the ground, which served as granaries for the old inhabitants. Similar granaries, but of more recent date, are to be found in the southern part and outside the town. The town itself consists of a large number of excellently built houses of red stone the architectural effect of which is often striking; the doors of the houses are often ornamented with fine iron work. The houses of the former Imāms now for the most part decayed or shot to pieces are particularly striking with their splendid façades. Besides the principal mosque with minaret, the only one in the town, there are seven small mosques. The water supply is provided from two huge and finely built reservoirs; the one, called Muṣallā, lies in the south, exceedingly deep and enclosed on the west side by a wall 60 to 80 feet high. The second, to the east of it, begun but not quite finished by Saiyid 'Abd al-Karīm about 1840, is called Barik al-Ziyādī. There are also four smaller cisterns. This water-supply would suffice for a town three times the size of Kawkabān. The Jewish quarter lies E.S.E. outside the town but consists almost entirely of low stone houses with little windows and doors.

A stone bridge with huge arches led across the Wādī Nabḥān to the Bāb al-Ḥadīd but it was blown up by the Arabs in 1872.

Kawkabān is an ancient city dating from the Himyar period, as inscriptions found there show. Al-Hamdānī mentions a stronghold of Kawkabān on the summit of the *Djabal Dhukhār* which is certainly identical with the old town of the modern Kawkabān. In troubled times its strength made it a desirable place of refuge — in 1569 the Turks besieged the stronghold in vain — and for centuries Kawkabān has been important as a capital and residence of the Imāms of the principality of the same name. The latter comprised in addition to Kawkabān the towns of Shibām, Ḥaḍja, Tawila, the *Khāb* Mirwāḥ (between Kawkabān and Ḥarrāz), the lands of Miswar, Sārī, Ḥofās, Mīlḥān, Aḥḍjir, 'Arūs, Banū *Khayyāt*, al-*Shahdhiya* Lā'a, a part of the Banū Ḥubāish, the Banū Nāshir and of al-Aḥmar. The old dynasty of the country, which traced its descent from the Imām Ḥādī of Ṣāda, was able to retain its imāmate even during Turkish rule and to maintain its independence from the imāms of Ṣan'ā' after the Turks were driven out in 1630. C. Niebuhr (*op. cit.*, p. 256; see the *Bibliography*) has given a genealogical survey of the princes of Kawkabān. When the Turks again invaded Yaman in 1872 and subjected the country, Kawkabān after a seven months' severe siege also passed to the Turks but only after capitulation. The last ruler of Kawkabān, Saiyid Aḥmad b. 'Abd al-Raḥmān, who had bravely defended the town against the Turks, afterwards lived in Ṣan'ā' on a pension given to him by the Sublime Porte. At Glaser's visit in 1883 his brother Saiyid Yaḥyā still lived in the old ancestral home in Kawkabān, which is remarkable for the splendid stucco-work of the interior and the rich ornamentation of its façade. The windows and doors had all sorts of varied shapes, colours and ornaments.

Kawkabān is now almost depopulated; although the houses, which in spite of much destruction are still imposing, afford accommodation for some 30,000 people, there are barely 100 now in the town; from the town one gets a splendid view over the fertile fields and valleys of the country around, especially the plain of Shibām, a part of the plain of Ṣan'ā' and the surrounding hills.

5) Kawkabān al-Sbā'a is in Maḥwīd, west of the town of Kawkabān 4), but belongs to Ṭawila, a small place of no special importance.

(ADOLF GROHMANN)

KĀWM (A.), plural *aḳwām*, *aḳāwim*, *aḳāyim*, people. The word occurs also in Nabataean, Palmyrene and Ṣafaitic inscriptions in the name of the deity *Shai'* al-Kāwm "support of the people", see Lidzbarski, *Ephemeris für semitische Epigraphik*, i., Index s. v. — According to some lexicographers the word applies in the first place to men; evidence for this opinion is afforded by passages from literature where *Ḳ*. is used in opposition to *nisā'* (women). The term does not primarily suggest the meaning of nation. A man's *Ḳ*. are his *shī'a* and his '*ashira* (*Lisān*). In this limited sense the word occurs also in the well known tradition: "Who clings to a *Ḳ*. without the permission of his *mawālī* (*patron*), is cursed by Allāh, the angels and the prophets" (Bukḥārī, *Faḍā'il al-Madīna*, bāb 1). — Used without article it has the same meaning as English "people", French "gens" and German "Leute", e. g. *sūra* 5, 63: "People who do not understand"; cf. 8, 66; 9, 61 (also with the article 12, 87). The plural has the same meaning. In a tradition it is said: "There will be people (*aḳwām*) in my community, who will proclaim licentiousness regarding women and wine" (Bukḥārī, *Ashrība*, bāb 6).

In the *Qur'ān* the term is chiefly used in connection with the prophets, Muḥammad's predecessors: the people of Ibrāhīm, Lūṭ, Nūḥ (e. g. 7, 146; 11, 91; 22, 43; 26, 105, 160; 38, 11), i. e. their unbelieving contemporaries. In this sense it

is also used in connection with Muḥammad himself: "Thy people declare Him a lie, though He is the Truth" (sūra 6, 66). The same use of the term is to be found in Ḥadīth, e. g. Bukhārī, *Anbyāʾ*, bāb 19, 31, 54 etc.

Ḳ. is, however, also used in a sense that comes nearer to the modern conception of "people", e. g. in the tradition referring to one of the festivals: "Every Ḳ. has its festival, and this is ours" (Bukhārī, *Idūn*, bāb 3). Al-Ḳawm with the article has sometimes an emphatic meaning, e. g. Aḥmad b. Ḥanbal, *Musnad*, v. 72, where Ṭufail, one of 'A'ishā's brothers, relates a dream which he had. He dreamt that he passed by some Jews and said to them: "Verily, ye would be the people, ye not that ye pretend that 'Uzair (Ezra) is the son of Allāh". They answered: "And ye would be the people, were it not that ye say: *Mā shāʾ Allāh wa-mā shāʾ Muḥammad*", etc.

In Atchin (Atjeh) the term has acquired a peculiar form and use: *kawōm* has here the genealogical meaning of "all those who descend from one man in the male line", see Snouck Hurgronje, *The Achehnese*, Index s.v. *kawōm*.

For special meanings of the word see Dozy, *Supplément*, s. v. (A. J. WENSINCK)

AL-KAWS = the bow; in Arabic geometry the arc of the circle; in astronomy the constellation of Sagittarius, the ninth sign of the Zodiac (Greek *τοξότης*, Latin *Arcitenens* or *Sagittarius*). (H. SUTER)

KAWS KUZAH (A.), the rainbow. The ancient Arabian deity *Ḳuzah* [q.v.] who is described as *shaiṭān* (devil) was a thundergod who shot hail-arrows from his bow and then hung the latter on the clouds. He is found in the combination *Ḳaws Ḳuzah*, rainbow. *Ḳuzah* is also in popular belief the angel who looks after the clouds. Other names of the rainbow are: Allāh's bow, the bow of the prophet of God, bow of the heavens, bow of the clouds (*ghamām, nuẓn*), signs of heaven (*ʿalāʾim al-samāʾ*). It is also called *ḳaws ḳazīʿ* (*ḳazaʿ* are the separated parts of a cloud). Quite different in origin are the names *ḳustān* (dust), *ḳustānī*, *ḳustālānī* and *ḳustālāniya*. Muslim scholars include the rainbow among the *āthār al-ʿulwiya*, the upper phenomena. The rainbow is usually opposite the spectator, while the sun is at his back and there is a dark cloud or wall behind drops of water; the drops may be in a cloud or formed at springs, water-wheels, in turbulent rivers where spray is formed, in the steam of baths or in water which is ejected from the mouth in a spray (see *Beitr. V.*, loc. cit.). Frequent reference is made to a description by Ibn Sīnā (see E. Wiedemann and M. Horten, loc. cit., among others) who was on the top of a very high hill at the foot of which lay a vast bank of mist. The sun was above the hill and Ibn Sīnā saw a rainbow on the mist below him.

Numerous descriptions of rainbows occur in literature e. g. in the *Ḥamāsa* (F. Tuch, *Z. D. M. G.*, iii. 200 sqq.), also by the Ḥamdānīd Saif al-Dawla (333—356 = 944—967) and by the poet Waʿwāʾ († 390 = 999; see F. Dieterici, *Mutanabbi und Saif al-Dawla aus der Edelperle des Thaʿlibi dargestellt*, Leipzig 1847, p. 129 and 175).

The more or less strictly scientific studies of the rainbow are also numerous. Ḥādjdjī Khalifa (*Kashf al-Zunūn*, iv., N^o. 9,640) quotes a special *ʿilm Ḳaws Ḳuzah* (science of the rainbow) he

deals with all questions that can arise. According to him, "it investigates how the rainbow is formed, the reason why it is formed and why it is circular; further the reason for the difference in its colours, why it appears after rain at the end of a day and why it is often seen by day but only rarely at night by moonlight. It further investigates the astrological significance (*al-aḥkām*) of its appearance". Descriptions on similar lines are found, for example, in the works of al-Ḳazwīnī (*ʿAdjāʾib al-Makhlūqāt*, ed. Wüstenfeld, p. 98; *Kosmographie*, transl. Ethé, p. 201), in the *Rasāʾil Iḳhwān al-Ṣafāʾ*, Bombay 1305, ii. 52 sqq. (cf. F. Dieterici, *Die Naturanschauung der Araber*, Berlin 1861, p. 87); also by Shihāb al-Dīn Aḥmad b. Idrīs al-Ḳarāfi († 684 = 1285/1286) in his *Kitāb al-Istibṣār fīmā tudrikuhu ʿl-Abṣār*; and in the *Risāla fī Ḳaws Ḳuzah* of Ḥusām al-Dīn al-Taḳāṭī (about 850 = 1446; see Berlin Catalogue by Ahlwardt, N^o. 5691); two anonymous catalogues are published by Cheikho (*al-Machriq*, 1912, xv. 736—744). A considerable section in a meteorological work (Ahlwardt, Berlin Catalogue, N^o. 6054) and no doubt many other passages deal with our phenomenon. The most important and most comprehensive work, however, is from the pen of Ibn Sīnā in his *Shifāʾ* (see the *Bibl.*).

The descriptions of the rainbow are in general very accurate. Not only the simple rainbow but also the double and even triple are described. The first is said to be produced by the sun's rays themselves, the second by the rays shining through the rays from the first and the third by the rays from the first two; the bows therefore are successively weaker. It is emphasised that the rainbow is not always composed of the same colours, a phenomenon which has recently been fully investigated by M. Pernter. It is also mentioned that the rainbow is particularly beautiful when the sun is on the horizon.

The older treatment of the theory of the rainbow goes back to Aristotle, with whose meteorological works the Arabs were acquainted. Thābit b. Ḳurra is said to have translated a commentary by Athārūdiṭus = Epaphroditos(?) on Aristotle's essay on the rainbow (Ibn al-Ḳifṭī, p. 59). Aristotle is followed by Ibn Sīnā, Ibn al-Haiṭham, al-Ḳarāfi etc., although in many details they make additions and corrections to his views. It is always assumed that the rainbow is produced by beams of light or visual rays which are regularly reflected on the raindrops, on very minute reflecting surfaces. Later Kamāl al-Dīn al-Fārisī [q. v.] gave a brilliant exposition of the correct explanation, as far as was possible in the general state of knowledge in his day, when the dispersion of light was unknown. Like us he says that the light is once or twice reflected in the interior of the globe of water and then radiates out from it; thus we have the main and secondary rainbow. He also endeavours to investigate the cause of the colours although, of course, not satisfactorily. By experiments he proves the correctness of his results, which are on a much higher level than those of Theodoricus of Freiberg (about 1300).

From *ḳuzah* comes a word *taḳāʾiḥ* (the word is not *taḳāʾiḡh*, as I said in the *Archiv für die Geschichte der Naturw. und Technik*, 1902, iii. 9). It means "showing the colours of the rainbow" or briefly "the colours of the rainbow". It is defined by Kamāl al-Dīn as "different graduated

colours in the region between blue, green, yellow, red, smoke-coloured white, that is, as regards sensual perception".

The rainbow is also given an astrological significance according to the zodiacal sign in which it appears. In the ram it means plague and death (Ahlwardt, Berlin Catalogue, No. 5906, *al-Kawl 'alā Tūl Kaws Kuzah*). In another MS. (No. 5915, 2) it is said that in September a rainbow indicates great tyranny and oppression.

KAWSARA, a small volcanic island in the Mediterranean Sea between Sicily and Tunis (60 miles south of Cape Granitola and 45 miles east of Cape Bon [Ras Addar]; area 40 sq. miles), now called Pantellaria. The name Kawsara (variously written in the MSS.) goes back to the classical Cossyra (cf. Pauly-Wissowa's *Realencyklopädie der klass. Altertumswiss.*, xi. 1503). The island, famous for its antiquities (cf. Orsi, *Pantellaria in Monumenti dei Lincei*, 1899, ix. 450—539), was already important in ancient times for intercourse between Sicily and the African coast and played an important part during the conquest and rule of the Arabs in Sicily, which was always attacked from Africa. The first conquest of Kawsara by the Arabs as well as their expedition to Sicily under Mu'awiya b. Khudaidj in the time of the Caliph Mu'awiya (Ibn Khaldūn, *K. al-'Ibar*, i. 211; Yāqūt, *Mu'djam*, iv. 200, according to the Aghlabid Ibn al-Kattāc; al-Balādhuri, ed. de Goeje, p. 235, does not mention the island) was only transitory; the Byzantines soon recaptured it (al-Bakrī, *K. al-Masālik*, *Bibl. Arabo-Sicula*, p. 13). According to Ibn Taghribirdi (ed. Juynboll, Leiden 1885, i. 136) 'Alī's murderer, Ibn Muljam, was banished to Kawsara. 'Abd al-Malik b. Kaṭan, the general of the Caliph 'Abd al-Malik, recaptured the island from the Rūm (al-Tidjāni,

Rihla, *Bibl. Ar.-Sic.*, p. 375) but Muslim rule was only firmly established under the Aghlabid Ziyādāt Allāh whose representative, Asad b. al-Furāt, captured Sicily (210—213 = 825—828) and Kawsara (Ibn Khaldūn, *loc. cit.*). In 220 (835) an expedition against the island was once again necessary (Ibn al-Athīr, *Kāmil*, ed. Tornberg, vi. 239). In the two following centuries Kawsara was partly converted to Islām. Its harbour was a naval base for the Arabs. Their ships were often wrecked in its vicinity. When the power of the Muslims began to decline, Kawsara was again exposed to raids by Christian states (e.g. 481 = 1088 by the Pisans and Genoese; Ibn al-Athīr, *Kāmil*, x. 110). When Sicily had entirely passed out of Muslim hands, the island was taken in 516 (1122/23) by George of Antioch, Roger II of Sicily's admiral, on his first campaign against the Zirid al-Ḥasan b. 'Alī [q. v.] in Mahdiyya; the island served him as a base for the capture of this town in 543 (1148) (Ibn al-Athīr, *Kāmil*, xi. 82).

The Arab geographers tell us very little about Kawsara. The distance from Sicily and the African coast is usually given as a day's journey; the harbour is celebrated (al-Idrīsī). The production of figs, cotton and mastic is often mentioned (Abu 'l-Fidā'). The Muslim inhabitants remained there after the Norman conquest as *dhimmī*'s of the Franks (al-'Umārī, *Masālik al-Aḥṣār*; al-Andalusī). Down to the xviiith century the Arabic language was spoken on the island of Pantellaria; it has exercised a considerable influence on the local Italian dialect (above, i. 419; Gregorio and Seybold in *Studi glottologici italiani*, ii. [1901], 225—238). Amari has published a tomb inscription from Pantellaria (*Le epigrafi Arabe di Sicilia*, Palermo 1879, p. 118 sqq.).

KAWTHAR, a word used in Sūra cviii. 1 after which this Sūra is called *Sūrat al-Kawthar*. *Kawthar* is a *faw'al* form from *kathara*, of which other examples occur in Arabic (e.g. *nawfal*; further examples in Brockelmann, *Grundriss der vergleichenden Grammatik*, i. 344). The word, which also occurs in the old poetry (e.g. the examples in Ibn Hishām, ed. Wüstenfeld, p. 261, and Nöldeke-Schwally, *Geschichte des Qorans*, i. 92), means "abundance" and a whole series of Muslim authorities therefore explain al-Kawthar in Sūra cviii. 1 as *al-khair al-kathir* (see Ibn Hishām, *op. cit.*; al-Ṭabarī, *Tafsīr*, xxx. 180 sq.). But this quite correct explanation has not been able to prevail in the *Tafsīr*. It has been thrust into the background by traditions according to which the Prophet himself explained Kawthar to be a river in Paradise (see so early as Ibn Hishām, p. 261 below, and notably al-Ṭabarī, *Tafsīr*, xxx. 179) or Muḥammad says that it was a water-basin intended for him personally and shown to him on his ascension to Paradise (al-Ṭabarī, *Tafsīr*, xxx. 180), which latter view al-Ṭabarī considers the most authentic. Even the earliest Sūra's (lxxvii. 41; lxxviii. 12 etc.) know of rivers that flow through Paradise, but it is not till the Medīna period that they are more minutely described, notably in Sūra xlvii. 11: "there are rivers of water which does not smell foul; rivers of milk the taste whereof does not change;

and rivers of wine, a pleasure for those that drink, and rivers of clarified honey." These rivers correspond to the rivers of oil, milk, wine and honey, which had already been placed in Paradise by Jewish and Christian eschatology; the only difference is that Muḥammad replaced oil by water; in Arabia pure water was not to be taken for granted and besides it was necessary to mix with the wine of Paradise (see Horovitz, *Das koranische Paradies*, p. 9). When, after the Prophet's death, eschatological explanations of the "abundance" of Sūra cviii. 1 began to be made, al-Kawthar was identified as one of the rivers of Paradise and when we find in one of the versions quoted in al-Tabari's *Tafsīr* that "its water is whiter than snow and sweeter than honey" or "and its water is wine", etc. we have obviously an echo of Sūra xlvii. 11. But they did not stop at simply transferring these Qur'anic descriptions to the Kawthar but the imagination of later writers gave the river of Paradise a bed of pearls and rubies and golden banks and all sorts of similar embellishments. According to a later view (see *Aḥwāl al-Kiyāma*, ed. Wolff, p. 107), all the rivers of Paradise flow into the *Hawḍ al-Kawthar* which is also called *Nahr Muḥammad*, because, as we have seen above, it is the Prophet's own.

Bibliography: given in the article.

(J. HOROVITZ)

KAWUKLU, "the man with the *ḥawuk*", a character in the Orta Oynu.

The Turkish word *ḥawuk* means the inner cap-shaped part of a certain kind of headgear, a rather high cap around which the headdress proper, the *şarık*, is wound; a cap like this could be of different shapes; it either culminated in a rounded top or in a flat surface; sometimes also it was wider at the top than on the bottom. It was usually made of wadded felt in perpendicular strips narrowing towards the top. These *ḥawuk*'s were worn by officers of different ranks in the Janissaries. They varied in form, colour and name according to rank. For further details see Maḥmūd Shawket, *Osmanlı Teshkilāt ve-Kiyāfet-i askeriyesi*, Istanbul 1325, i. 29 sqq. Other professions also had particular *ḥawuk*'s; thus there were *molla*, *kātib* and *pashalık ḥawughu* or, from the shape, one talked of *tepelik ḥawuk*, while *dal ḥawuk* acquired the special meaning of parasite. The word *ḥawuk* (plur. *ḥawāwuk*) has even penetrated into Arabic.

Kawuklu, "the man with the *ḥawuk*", has acquired a special significance as one of the two principal characters in the Turkish folkplay of Orta Oynu. It is not till last century that we are at all minutely acquainted with the Orta-play and the names Orta and Kawuklu do not seem to be any older. According to a tradition, the character of the Kawuklu was first introduced by a certain otherwise unknown Şükri, in place of a character called Nekre whose main feature is said to have been a fondness for opium. Kawuklu is the real comic figure in the Orta-play and plays a part like that of Karagöz [q. v.] in the shadow-play. Peshekār, the other principal character in the Orta Oynu, is, on the other hand, the real director of the piece, a kind of stage manager, who always appears first on the stage and corresponds roughly to the *Hadiwad* of the shadow-play.

The costume of the Kawuklu is sometimes de-

scribed in the pieces themselves. Its chief feature is a high *ḥawuk* on his head. This is usually flattened above, red in colour and made of strips (*dilimli*) sewn together, almost like a top-hat without the lower brim. The *ḥawuk* is jokingly compared to a *tandır*, the Turkish stove of similar shape. A shawl called *agabani*, made of wool and silk, is wound round the *ḥawuk*. The kaftan (*djübbe*) of the Kawuklu and his trousers are also of red cloth while his under-garment (*entari*) is of striped woollen cloth or silk (*şam şetarisi* or *allı parmak*). An ordinary shawl is used as girdle. The Kawuklu wears yellow Turkish saffron leather slippers (*cedik papuş*) usually with heels, over the leather stockings called *mest*. He usually carries an umbrella made of different coloured parts. In modern times more and more of the old dress has been lost and even the *ḥawuk* has had to give place to a fez with a long tassel.

In the play the Kawuklu is usually a shopkeeper, artisan or a servant. Like Karagöz he is responsible for the grotesque and comic element. He misunderstands the remarks of the other players, especially the Peshekār, in substance as well as language, carries out orders in a stupid fashion, coarsens sentiments or twists them into the obscene. He is tactless and stupid, especially when he has to be on good behaviour among high class people, but in his turn demands exaggerated respect even from his friend, whom he treats badly, and is very capricious. If he describes his experiences, he exaggerates tremendously but unmercifully disparages any presents that have been given to him etc. If he is caught in a trick he usually succeeds in escaping by some of his thousand shifts. A further favourite source of humour is the imitation of foreign voices and dialects, *taḥlīd* (Ewliyā, i. 645 sqq., gives the name to Orta-like plays of his time), sometimes with the addition of disguises. It seems that the players were originally foreigners and non-Muslims and in the older period the business was still considered unseemly and it is regretted when a Muslim earns his livelihood in this way.

All his pranks have to be improvised by the player, only a rough outline of the piece being given. The part of the Kawuklu makes the greatest demand upon the player and only a few really great actors have succeeded in playing the part to the general satisfaction. The most famous was a certain Hamdī at the end of last century and in most of the texts known to us from that period the Kawuklu is often addressed simply as Hamdī.

(WALTHER BJÖRKMAN)

KĀWURD B. DĀ'UD ĆAGHRIBEG, sometimes also called *Karā Arslān*beg, the founder of the line of Saldjūks of Kirmān. The first year of his reign is usually given as 433 (1041). Perhaps it was he and not Ibrāhīm Ināl (cf. Ibn al-Aṭṭir, ed. Tornberg, ix. 349) who led the Ghuzz, who came to Kirmān in 434, but he did not succeed in establishing himself there then, for the lord of this province, the Būyid Abū Kalīdjār [q. v.], was informed of the raid and sent troops who put the Ghuzz to

flight. It was not till some years later (440 = 1048) after the death of Abū Kālīdjār, that the capital of the country, Bardasir, where Bahrām b. Lashkarsitān commanded for the Būyids, was taken and henceforth the land belonged to Kāwurd. By a stratagem he was able to subjugate the rude tribes of the Kufş and Kufadj, who dwelled in the Garmsir (the hot region). He also waged war in Sistān and in Fārs, in the latter country with the chief of the *Shabānkāra* Faḍloya — on him cf. Ibn al-Balkhī, ed. Le Strange and Nicholson, p. 166 — and with the assistance of the Amir of Hormuz even sent troops across the Gulf to the coast of Arabia who conquered 'Omān so that his successors ruled there till 537 (1142—43). He was an energetic ruler in every respect and maintained order in the land and acquired merit by making wells and building towers to serve as landmarks in the desert. One of these towers still stands between Gurg and Fahradj (cf. P. M. Sykes, *Ten Thousand Miles in Persia or Eight Years in Irān*, p. 418). But in the end his ambition proved his downfall. Even during the reign of his brother Alp Arslān, he could scarcely bring himself to acknowledge his suzerainty but when the latter came twice to Kirmān (456 = 1064 and 459 = 1067) he did not dare throw down the gauntlet but showed himself submissive. But as soon as he heard that his brother had fallen (1072) and that his son Malik-shāh had succeeded him he collected his forces and marched against him. The two armies met near Hamadhān. Kāwurd's troops were put to flight, he was taken prisoner and strangled. The best account of this battle, which was fought on Djumādā I 26, 466 = Jan. 27, 1074 (according to Ibn al-Athīr, x. 53, in *Shahān* = April), is contained in the *Zubdat al-Tawārikh*, B. M. MS., fol. 33. The victor, however, left the sons of Kāwurd in possession of Kirmān.

Bibliography: In addition to the sources quoted in the article: *Recuril de textes rel. à l'histoire des Seldj.*, i. 2 sqq.; cf. in addition Houtsma in the *Z. D. M. G.*, xxxix. 367 sqq.

KAWWĀS, an Arabic word meaning originally archer, then arquebusier, finally, like the French *archer*, came to mean military police. The form *kawwās* (with *şād*) is found in the *1001 Nights* (Dozy, *Suppl.*). The word is applied in the Levant specially to the military police, called in French *cawas* or sometimes *janissaires* (because before the abolition of the latter, they were chosen from their ranks), detached to act as guards to embassies and consulates. They go in front of the head of the embassy or consulate when he goes into the town, whether officially or not, and make way for him in the crowded streets and bazaars. In Turkish they are called *yasağ-îi*. In terms of articles 45 and 50 of the renewal in 1740 of the treaty between France and the Ottoman Empire, known as the capitulations, the ambassadors and consuls may employ such janissaries as they please without their being forced to use any who do not suit them (T. X. Bianchi, *Nouveau Guide de la Conversation*, Paris 1852, p. 273—274). The regulations of Şafar 23, 1280, fixed the number of natives that the consulates could employ, on account of their privileges, at 4 *yasağ-îi* for consulates general and consulates in the chief towns of provinces, 3 for ordinary consulates and 2 for vice-consulates or consulate agencies. Their appointment is notified to the governor-general of the province

who keeps a register of the names of those employed (Aristarchi-bey, *Législation Ottomane*, Constantinople 1873—1888, iv. 15 sqq.).

Bibliography: *Descr. de l'Égypte*, Paris 1822, xviii. 1, 326—327. (CL. HUART)

KAYA. [See KETKHUḌĀ].

KAYĪ, the name of one of the 24 tribes of the Ghuzz [q.v.] or Oghuz from which the Ottoman ruling house is descended. Cf. the pertinent text of the *Tawārikh-i Āl-i Seldjūk* and the *Kitāb-i Dede Korkūd* in the *Zap.*, xix. 077. Mahmūd Kāshgharī (*Diwān lughāt al-Turk*, i. 56) still has the old form Kayigh, which refutes the identification proposed by J. Marquart (*Abh. Ges. W. Göttingen, Neue Folge*, xiii./i. 39 sqq.) with the Kāi mentioned by al-Birūnī and al-Awfi in the extreme east. The Kāi are regarded by Marquart as turkicised Mongols (*op. cit.*, p. 88) which also (he says, *op. cit.*, p. 191) explains "the rôle which the blood-stained and fratricidal race of Osman and Ottoman people have played in history". That the Kāi were Mongols is very probable. They are cited by Mahmūd Kāshgharī (*op. cit.*, i. 30) with the Tātār and others among the peoples who speak a language of their own, although they also knew Turkish; but the Oghuz tribe of Kayigh or Kayi had certainly nothing to do with the Kāi.

(W. BARTHOLD)

KĀZ (t.), goose, occurs also in geographical names such as Kāz Dagh, the Caucasus [see KĀBK].

KAZA. [See KADĀ'].

KAZAK (T.), robber, disturber of the peace, adventurer; on these and other meanings see W. Radloff, *Versuch eines Wörterbuches der türk. Dialecte*, ii. 364. The existence of the word in Turkish can be first shown in the ninth (xvth) century. During the civil turmoils under the Timūrids the pretenders, in contrast to the actual rulers, were called *kazak*: those who would not accept the verdict of fortune but led the life of an adventurer at the head of their men; cf., for example, the mention of the *kazak* years (*kazaklık*) of Sultān Ḥusain, afterwards ruler of Khurāsān, in the *Bābur-Nāma*, ed. Beveridge, p. 173 b, infra. The name *kazak* is also applied to whole bodies of people, who had separated from their princes and kinsmen; in the *Tārikh-i Rashīdī* (transl. E. D. Ross, especially p. 82 and 272) the Özbek, who had abandoned their Khān Abu 'l-Khair (cf. the article), are called Özbek-Kazak or simply Kazak; the latter name has been retained by their descendants as an ethnic to the present day (cf. the art. KIRGIZ). In Russia the word *kazak* first appears about the same time as in Central Asia (in the second half of the xvth century) and is probably borrowed from Turkish although it appears in Russian in a larger number of meanings; thus individuals without kinsmen or possessions were called *kazak* even although they did not lead a wandering or marauding life; the word, therefore, had not yet the exclusively military meaning which it had afterwards. The word Cossack, used in Western Europe, is the result of the Little Russian and Polish pronunciation. No certain etymological explanation of the word *kazak* has yet been given. The last suggestion by N. Marr (*Žurnal Min. Nar. Prosv.*, 1915, June, p. 286), according to which the old Caucasian ethnic *Kasog* mentioned in the Russian annals under 6473 = 965 is preserved in Kazak, is a hypothesis which can hardly be accepted by the historian.

(W. BARTHOLD)

KAZAN, also written *Kāzān*, in the xvth and xvith centuries the capital of a Tatar principality, in the xixth century a Russian university town, now capital of the Tatar Soviet Republic. According to legend, the town was built by Bātū. In 1391 *Kāzān* was destroyed by Russian freebooters from Novgorod, and again in 1399 by the Prince Ywriy Dmitriyewiĉ. About 1445 a powerful kingdom was founded here by Ulu-Muhammad and his son Maĥmūdek (in Russian works *Makhmutek*) who had been banished from the Golden Horde; in the same year (1445), in which Ulu Muhammad captured the Russian Grand Duke Wasiliy, *Kāzān*, where a prince called 'Alī Beg was ruling, was captured by Maĥmūdek. In 1446 Ulu Muhammad was killed by Maĥmūdek; two other sons of Ulu Muhammad, *Kāsim* and Ya'qūb, had to flee to Russia from their brother, where *Kāsim* founded a local dynasty in *Kasimov* [q.v.] which is called after him. Like many later pretenders who sought refuge in Russia, *Kāsim* took part on the Russian side in the wars against *Kāzān*. Maĥmūdek died about 1464 and was succeeded by his sons, first *Khalil*, then *Ibrāhīm*. In 1468 even *Wiabka* had to submit to *Khān Ibrāhīm* but in the following year the campaign took a more favourable turn for Russia; *Ibrāhīm* had to make peace and restore their freedom to all the Russian prisoners in *Kāzān*. *Ibrāhīm's* successor was his son *Ilhām*; in 1487 his brother *Muhammad Amin* appeared before *Kāzān* with a Russian army; after a siege of three weeks *Ilhām* had to surrender and was sent with his wife to *Wologda*; *Muhammad Amin* was installed as *Khān* in his place. In 1496 the *Khān* and with him the Russian party was driven out by an invasion of Siberian Tatars under *Mamuk*; after the victory of the Russians — at the request of the people of *Kāzān* — it was not *Muhammad Amin* but his brother 'Abd al-Latif that was installed as *Khān* but by 1502 'Abd al-Latif was brought back to Russia and the throne restored to *Khān Muhammad Amin*. In 1505 the *Khān* rebelled against Russian suzerainty and killed or robbed the Russian merchants who came to the annual fair in *Kāzān*; the Tatars advanced as far as *Nijni-Novgorod*. In 1506 a Russian army was defeated; while a second campaign was being prepared the old relations were restored by a treaty of peace in 1507. *Muhammad Amin* died in 1518, 'Abd al-Latif had died the previous year; with them the dynasty founded by Ulu Muhammad became extinct.

The following decades were a period of almost uninterrupted fighting between the pretenders supported by Russia, the brothers *Shāh 'Alī* (so on his tomb in *Kasimov*, not *Shaiḫh 'Alī*) and *Djān 'Alī*, who had come from *Astrakhan* to Russia, and the national party supported by the Crimean Tatars and the *Noghai*. The latter won their biggest victories in 1521; *Shāh 'Alī* was driven out by prince *Šāhib Girāi* who came from the Crimea; the brothers *Muhammad Girāi* from the Crimea and *Šāhib Girāi* from *Kāzān* advanced up to *Moscow*; the Grand Duke *Wasiliy* abandoned his capital; a peace was concluded in his name by the Tatar prince *Peter*, a convert to Christianity, by which the Russian government bound itself to pay tribute to the *Khān* of the Crimea. The Russian prisoners were sold as slaves by the Crimean Tatars in *Kafa* and by the people of *Kāzān* in *Astrakhan*. In 1524 *Šāhib Girāi* went

to the Crimea and left his thirteen year old son *Šafā Girāi* in *Kāzān*. The only original document that survives from the period of the principality of *Kāzān* dates from the brief reign of *Šāhib Girāi*: it is a decree dated *Šafar* 13, 929 (= Jan. 1, 1523), confirming a family as *Tarkhān's*, that is nobles freed from all taxes. The taxes are detailed so that the document is of some importance for the domestic history of the principality.

After vain efforts to come to an agreement with Russia, *Šafā Girāi* was driven from the throne by the Russian party in 1530; at the wish of the people it was not *Shāh 'Alī* but *Djān 'Alī* that was elected *Khān*; he was killed in 1535 in a rising of the national party, *Šafā Girāi* recalled and supported by his father *Šāhib Girāi*, then *Khān* of the Crimea. The Russian attempts to restore their suzerainty had therefore for a long time no success; it was only in the year 1546 that *Šafā Girāi* was driven out and *Shāh 'Alī* put in his place; but *Šafā Girāi* returned immediately after the departure of the Russians and held the throne till his death in 1549. He was succeeded by his two year old son *Ötemish*, who was taken to Russia in the following year, christened by the name of *Alexander* and lived till 1566. The brief and cruel reign of *Shāh 'Alī* ended with his banishment. *Yādiyār Muhammad*, a prince born in *Astrakhan*, was summoned from the land of the *Noghai* to *Kāzān* as *Khān*. The Grand Duke *Iwan* who had already conducted two unsuccessful campaigns (1548 and 1550) against *Kāzān* now appeared before the town with a larger army; after hard fighting *Kāzān* was stormed on Oct. 2, 1552, and all armed men put to death.

The conquered town retained its former appearance and its military importance under Russian rule for a long time. The town had ten gates and a citadel separated from the other quarters of the town by a ditch; the old wooden wall was replaced by one of stone in 1555. The town was then about 600 cubits (= a mile) in length and 500 cubits (1500 yards) in breadth. To injure the commercial importance of the city, the Russian government as early as 1524 had founded the annual fair at *Nijni-Novgorod*; at the same time merchants were forbidden to go to the fair at *Kāzān*. Christianity was industriously preached. *Kāzān* was the see of an archbishop from 1555 and later of a metropolitan. The immigration from Russia proper assumed considerable importance.

Little is left of the old town; a tower in the citadel still bears the name of the princess *Süyünbigi*, wife of *Šafā Girāi* (she was previously married to *Djān 'Alī* and later to *Shāh 'Alī*). Under the influence of national Tatar movement the memory of this princess is kept green; in 1914 a biography of her appeared and a periodical for women is published under her name; but it is not definitely known when and how the tower received this name, and what parts date from the Tatar period and what from the Russian. During the xviiith century *Kāzān* had lost all military importance and was easily taken — with the exception of the citadel — by *Pugačev* in July, 1774; there were then 2,867 houses in it. Even at this date *Kāzān* was of much greater importance than *Nijni-Novgorod* as a centre of government and of culture. The university founded in 1804 became famous especially for its Oriental faculty (strictly the Oriental section of the faculty

of history and philology). In 1855, as a result of the opening of the Oriental faculty in the University of St. Petersburg, instruction in Oriental languages in the university of Kāzān was stopped and the library and other accessories for the most part brought to St. Petersburg.

Instruction in Muḥammadan languages was resumed in the university of Kāzān in 1861. According to the census of 1897, Kāzān had 131,508 inhabitants, in 1911 182,477, of whom 30,781 were Tatars.

(W. BARTHOLD)

KĀZBĒGĪ. A Persian copper coin worth, according to Chardin, the tenth part of a *shāhī*. It is now obsolete. Chardin says, iv. 279 (Rouen, 1723), the name means "the King's money", but see the titles *Gosbeck* and *Cosbeague* in *Hobson-Jobson* (revised ed.). Another form of the word seems to be Kāzbīnī from Kāzbīn where they were coined.

(H. BEVERIDGE.)

KĀZERŪN, a town in Persia in the province of Fārs, between the sea and Shirāz and 55 miles from the latter at a height of 3,000 feet. It is supplied with water from wells and pipes as the district has no river. Its industries used to be flourishing; it manufactured a kind of cotton called *shaṭawī* (Yāqūt, iii. 288); it had a rich trade carried on by merchants for whom 'Aḍud al-Dawla the Būyid had built a bourse and who had luxurious dwellings and pleasure-houses in the town and vicinity. A kind of date called *ajīlān* was gathered there. At the present day it is surrounded by tobacco-fields; there is a horse-market there frequented by the nomad tribes. The principal mosque was built on a hill commanding the bāzār. Among the tombs of saints venerated there, mention is made of that of Shaikh Abū Ishāḥ Ibrāhīm b. Shahrīyār Kāzerūnī, patron of the sailors in Indian and Chinese seas, their protector from storms and pirates, a capacity which brought his *zāwiya* abundance of *ex-voto*'s (Ibn Baṭṭūṭa, ed. Paris, ii. 89). Twenty miles to the north are the ruins of Sābūr; Kāzerūn began to rise in importance from the time Sābūr fell into ruins. The district was called *Shul*, a name that survives in the modern name *Shūlistān*. In the vicinity there is a very salt lake full of fish which in the fourth (tenth) century was called Buḥairat Muz (or Mūrak).

(CL. HUART)

KĀZĪ-ASKER (A.T.), military judge, one of the highest offices in the judicial system of the Ottoman empire; its holders took precedence immediately after the Shaikh al-Islām, the chief of the *ulamā*; they are entitled *Şadr* [q.v., iv. 50]; they are equal in rank to the vizier and *mushīr*. They are entitled in written petitions to be addressed as *semāhet-lū* "your benevolence". There are two Kāzī-Asker, one of Rūm-ili and the other of Anatolia. Before the reforms, the first was inspector-general of all the dedicated properties (*wakf*) except those of the two holy cities, when they become vacant (*maḥlūl*) by the decease of their administrators (*mutawallī*); since the *tanzīmāt* this duty has fallen upon the Minister of the Awkāf.

The title Kāzī-Asker was created in 763 (1362) by Sulṭān Murād I in favour of the Kaḍī Kara Khalil Djendere-li; this judge followed the Sulṭān in the army and exercised his functions in camp. After the capture of Constantinople, Meḥmed II in 885 (1480) duplicated the post on the advice of the Grand Vizier Karamānī Meḥmed Paşa [q.v., ii. 745], jealous of the credit enjoyed by Mānisā Çelebesi; Muşlih al-Din Kaştallānī and Hādjdī Hasanāde were the first holders of these new offices. The Shaikh al-Islām or Grand Mufti did not have precedence over them until the reign of Sulṭān Sulaimān al-Kānūnī. They had the right to appoint all the kaḍī's and *mudarris*'s (professors of theology) except those of Constantinople, Brusa and Adrianople, the three successive capitals of the empire; these nominations were reserved for the Grand Vizier.

The Kāzī-Asker of Rūm-ili dealt with the cases of Muslims in questions belonging to the capital while those of non-Muslims were left to the Kāzī-Asker of Anatolia. The importance of the first of these posts put the second to the background. His competence extended to cases relating to estates, to debts of the state and interests of the treasury; down to the reign of Maḥmūd I his sphere of jurisdiction included the three Barbary regencies; his authority over the kaḍī's of the Crimea was recognised by the treaty of Kainardje (1775) and the convention of Aineli-Kawaḳ (March 21, 1779).

KAZI KUMUKH. [See KÜMÜK].

KĀZIMAIN, a town near Baghdād, one of the most celebrated of Shi'a places of pilgrimage. It is a little over a thousand yards from the right bank of the Tigris, which there describes a loop. It is separated from the river by a girdle of gardens. Kāzīmāin itself is prettily situated among palm-groves; there are also gardens almost without interruption in the direction of Baghdād. It is connected by a horse-tramway with the west side of Baghdād (Karshiyakā; see the art. AL-KARKH) about three miles away, which was laid down by the governor Midḥat Paşa, who did a great deal for Baghdād (1869—72; cf. i. 568a). Quite recently Kāzīmāin has also become a station on the Baghdād-Sāmarrā railway, which runs along the right bank of the Tigris. Down to the World

War Kāzimain was the seat of a *kā'im-makām* and the capital of a *qaḍā* of the sandjak of Baghdād with a population of 25,000 (of whom 5,000 are *Shi'is*); see Cuinet, *op. cit.* The number of inhabitants of the town itself Cuinet estimated at 6,000, Aubin (1907) at 7—8,000, of whom two-thirds were Persians. They are very fanatical; access to the sanctuaries is strictly forbidden to Christians. The Arab Beduin tribe of al-Mad̲jama' encamps along the Tigris as far as Kāzimain (see M. v. Oppenheim, *op. cit.*, ii. 71).

The name Kāzimain, a so-called *dualis a potiori* (cf. Wright, *Grammar of the Arabic Language*³, i. 190), means "the two Kāzim's". The reference is to the two 'Alids buried here, Mūsā al-Kāzim (d. 186 = 802) and Muḥammad al-Djāwād (d. 219 = 834), the seventh and ninth Imāms of the *Shi'a* sect of the "Twelvers"; [cf. *ITHNA'ASHARIYA*, ii. p. 563]. The place is often briefly called Kāzim (also Ghadim in books of travel) or Kāzimiye (Kāzmiye); the name Imām Mūsā is also found. There is evidence of pilgrimage to these 'Alid tombs as early as the seventh (thirteenth) century (in Ibn Khallikān). At the present day Kāzimain is one of the four greatest sanctuaries of the *Shi'a*. Its favourable position at the junction of the roads to the three other *Shi'a* places of pilgrimage, Samarrā in the north and Kerbelā and Nadjaf in the south, accounts for the fact that many thousands of pilgrims pass through it annually. Frequently 25—30,000 believers assemble here on one day. The throng is greatest during the first ten days of the month of Muḥarram, which are specially dedicated to the memory of Ḥusain and the 'Alids generally. One of the four Muḍtahids, the principal spiritual leaders of the *Shi'a*, lives in Kāzimain.

The sanctuary of Kāzimain is one of those exceedingly splendid and rich temples which the 'Irāk owes to the *Shi'a* and for which Persia and *Shi'a* India supplied the necessary millions. With its domes covered with gold, the drums and the spires of its minarets it is visible to the traveller a long way off. Its present form faience covered, is due to the Ṣafawid Ismā'il I (908—930 = 1502—1524), whose family claimed descent from the Imām Mūsā al-Kāzim (cf. above, ii. 544^b). The inscription published by Massignon, *op. cit.*, p. 99, of the year 926 (1519) refers to the complete transformation of the old building by the Shāh. The restoration not quite completed by Ismā'il was finished by the Ottoman Sulṭān Sulaimān I, who visited Baghdād in 941 (1534). The covering of the domes with golden tiles was done — according to the inscription in 1211 (1796) — by command and at the expense of Shāh Agha Muḥammad Khān [q. v.], the founder of the Qājār dynasty. On the occasion of his pilgrimage (1870) Shāh Naṣr al-Dīn had the gold plating on the principal dome and on the roofs of the minarets renewed; cf. Cuinet, *op. cit.* The double cupola flanked by four minarets shows that two saints are buried beneath it. Close to this mausoleum stands an isolated pavilion under which are shown the graves of Dja'far (formerly supposed to be that of Ismā'il) and Ibrāhīm, sons of the Imām Mūsā. The cupola of this building is modern and a gift of the general of division Salīm Paṣha; cf. Massignon, *op. cit.*, p. 100. It may be noted here that there is also at Ḥadītha on the Euphrates (between 'Ana

and Hīt) a small sanctuary which is said to contain the tomb of Muḥammad, son of Mūsā al-Kāzim; see Herzfeld in Sarre-Herzfeld, *op. cit.*, ii. 321. On the tomb of a certain Ḥamza b. Mūsā al-Kāzim in Qaryat al-Bāshiya (in the 'Irāk) cf. Massignon, *op. cit.*, p. 60. In the vicinity of Astarābādh [q. v.] there is also an Imām-zāde (tomb-chapel) where a descendant of the Imām Mūsā called Imām Kāzim is said to be buried; cf. Melgunof in the *Z. D. M. G.*, xxi. 235, and in *Das südliche Ufer des kaspischen Meeres*, Leipzig 1868, p. 119—120.

Like the sepulchral mosques of other great places of pilgrimage that of Kāzimain also is surrounded by a very broad court-yard (*ṣahn*) enclosed by a wall. This latter was rebuilt in 1298 (1880), with the permission of the Turkish government, by a wealthy Persian named Farḥād Mirzā and adorned with ceramic work and inscriptions containing whole sūras; cf. Massignon, *op. cit.*, p. 110. In the great court, in course of time, extensive buildings for the housing of numerous pilgrims have grown up, especially along the enclosing wall. In 1907 Aubin estimated the number of bazaars and caravanserais within the area of the sanctuary at forty-five. There are also a number of pretty coffee-houses.

Adjoining the wall of the court-yard is a Sunni mosque with the tomb of the famous Ḥanafī lawyer Abū Yūsuf (q. v., d. 182 = 798); cf. Massignon, *op. cit.*, p. 57, 100. It is a mistake, as Le Strange (*Baghdad*, p. 161 sq., 350 sq.) does, to locate the grave of Zubaida, wife of Ḥārūn al-Rashīd, in or near this Kāzimain; cf. against this Massignon, *op. cit.*, p. 110 sq., and Herzfeld, *op. cit.*, ii. III, and also the article *AL-KARKEH*.

In the time of the Caliphs, extensive cemeteries lay on the west side of Baghdād above the Ḥarbiya quarter. The two 'Alid graves were in the cemetery of the Kuraish (*Maḳābir al-Kuraish*); the names Shūniziya and cemetery of the Bāb al-Tibn are also found for it. When Yāqūt wrote (623 = 1226), Maḳābir al-Kuraish was a fairly populous suburb surrounded by a wall. Ḥamd Allāh Mustawfī about a century later found that this place, formerly reckoned a suburb of Baghdād, was now an independent little town. Who first built the 'Alid sanctuary at Kāzimain is unknown. We know that princes of *Shi'a* tendencies, like the Būyids, frequently bestowed gifts upon it. But in the course of time, especially during the frequent fighting in the capital between *Shi'is* and Sunnis, it was repeatedly burned and plundered, notably in the years 443 (1051) and 622 (1225). At the conquest of Baghdād by Hülāgū in 656 (1258) it was again laid in ashes. It may be mentioned that in 1801 on the occasion of the Wahhabī invasion the treasures of the sanctuary were removed from Kerbelā to Kāzimain; see Jacob in A. Nöldeke, *op. cit.*, p. 48, note 1.

Opposite Kāzimain, on the left bank of the Tigris, connected with it by a bridge of boats, is the suburb of al-Mu'azzam (see above, i. 568^b—569^a), a stronghold of the Sunnis and a kind of national sanctuary of the Turks. In this place of about two thousand inhabitants is the highly venerated sepulchral mosque of Abū Ḥanīfa, the founder of one of the four orthodox schools of Muḥammadan law (q. v., d. 150 = 767). On this tomb cf. M. von Oppenheim, *op. cit.*, ii. 241; Streck, *op. cit.*, i. 162; Le Strange; *Baghdad*,

p. 190—192; Langenegger, *op. cit.*, p. 61—62; Massignon, *op. cit.*, p. 78—79. It is from the epithet of Abū Ḥanīfa, al-Imām al-A'zam or al-Mu'azzam (= the highly venerated Imām) that this suburb of Baghdad takes its name.

KĀZIMĪ, the name given by Tipū Sultān of Mysore (1197—1213 = 1782—1799) to the 1/16 rupee (1 anna) in silver; it commemorates Musā al-Kāzim, the seventh Imām. (J. ALLAN)

KAZIMOF. [See KASIMOW].

KĀZWĪN (formerly Kash-wīn), a town in Persia in the province of 'Irāq 'Adjamī 100 miles from Teherān at the foot, on the south, of Mount Alburz [q. v.] at a height of 4,000 feet above sea-level; present population about 25,000.

The etymology of the name is uncertain. Al-Balādhuri (p. 321; cf. Ibn al-Faḳih and Ḳudāma) says that *Kash-wīn* means "the boundary which one watches", i. e. "well guarded"; it may also be explained as "the one who watches the corner", but this seems to be a popular etymology. It has been connected with *Caspian* (Spiegel, *Ērān. Alterthumskunde*, i. 74, note 1).

Founded by Shāpūr I (Ibn al-Faḳih) and called Shād Shāpūr by him, it was besieged by al-Barā' b. 'Adīb in 24 (644) and surrendered to him. The people adopted Islām to escape the imposition of the *ajizya* (poll-tax). This strong place, which in Persian times had served as a barrier against the inroads of the mountaineers of Dailam, was used by the Muslims as the starting point

for their campaigns against the latter. Muḥammad b. al-Ḥajdjadj b. Yūsuf built a mosque there called Masjdīd al-Thawr "mosque of the bull". The Caliph Musā al-Ḥādī built a new town opposite the old one, called Madīna Musā. Mubārak al-Turkī, a freedman of al-Ma'mūn or al-Mu'tasim, built a fortress there called Mubārakiya in which he put a garrison. When Hārūn al-Rashid passed through the town on his way to Hamadhān the inhabitants of Kāzwīn asked and obtained a relief from their tithes, alleging that, living on the frontier, they had to fight for the faith. Hārūn built a mosque there and began to restore the ramparts which work was continued by the Amīr Abū 'Alī al-Djāfari in 411 and finished by Šadr al-Dīn al-Marāghī, minister of Sultān Arslān, in 572. Ruined by the Mongol invasion at the beginning of the viith (xiiith) century Kāzwīn revived again under the Šafawīs. Tahmāsp I lived there for long and 'Abbās I adorned it with fine buildings. In 1723 its inhabitants drove back the Afghāns. Kāzwīn has retained a certain importance as the roads from Tabriz and from Resht to Teherān meet there; the latter is fit for carriage traffic and is used by motors. Kāzwīn is a depot for the silks of Gilān and Shirwān and manufactures carpets.

AL-KĀZWĪNĪ, ABŪ ḤATIM MAḤMŪD b. AL-HASAN AL-TABARĪ, a Šāfi'ī jurist, teacher of al-Shirāzi. He belonged to Āmul in Tabaristān where he began his studies. In Baghdād he studied under Abū Ḥāmid al-Isfarā'īnī († 406), the law of inheritance under Ibn al-Labbān († 402) and the *Uṣūl* under Ibn al-Bāḳillānī († 403). He taught in Baghdād and Āmul in 440 (1048/49). Al-Shirāzi describes him as his best teacher. Of his works the following are mentioned: 1) *Kitāb Tadjrīd al-Tadjrīd*, a synopsis of the legal work of the same name by al-Mahāmīlī († 415); 2) *Rawnaq*, a synopsis of the *Lubāb al-Fiḳh* of al-Mahāmīlī (Ḥājjdji Khalifa, *Kashf al-Zunūn*, No. 5702); 3) the *Kitāb al-Hiyāl fi'l-Fiḳh* (ed. Jos. Schacht, Hanover 1924), the only one that has survived and one of the oldest works of the scanty Šāfi'ī literature on legal quibbles (*hiyal*). The book, unlike the Ḥanafī works of the same name by al-Shaibānī, al-Khaṣṣāf etc., was very little used for the practical purpose of getting round the Šarī'a, but was rather primarily intended to point out legal quibbles which were forbidden or disapproved of, in keeping with the stricter Šāfi'ī standpoint, which regards the *hiyal* used by the Ḥanafīs as contemptible.

(HEFFENING)

AL-ĶAZWĪNĪ, ZAKĀRIYĀ B. MUḤAMMAD B. MAḤMŪD ABŪ YAḤYĀ. For his genealogy, prae-nomina, etc., regarding which tradition varies (e.g. as early as Ḥādījī Khalifa, *Kashf al-ẓunūn*, ed. Flügel, iv. 189), cf. S. de Sacy, *Chrestom. Arabi*², iii. 445 sq.; Reinaud, *Géographie d'Abulféda*, i., Paris 1848, p. cxlviii. sq.; Wüstenfeld in the *G. G. A.*, 1848, i. 347, and in his edition of al-Ķazwīnī, vol. ii., p. iii.; Ahlwardt, *Verzeichn. d. arab. Hss. d. kgl. Biblioth. zu Berlin*, v. 453.

We learn very little about his life from the Arabic biographical works and the brief references in his two main works. Al-Ķazwīnī was born about 600 (1203) at Kazwin [q.v.]. He belonged to a pure Arab family which had, however, been long settled in the east. He left his native town at some date not exactly known, apparently not entirely of his own free will. In 630 (1233) he was living in Damascus where he made the acquaintance of the celebrated mystic Ibn al-Arabī [q.v.]. In the reign of the last ʿAbbāsīd Caliph al-Mustaʿsim (640—656 = 1241—1258) al-Ķazwīnī was living in the Irāk where he filled the office of ḳāḍī of Wāsiṭ and Ḥilla. He died in 682 (1283). On the biography of al-Ķazwīnī cf. de Sacy, *op. cit.*, p. 448 sq.; Reinaud, *op. cit.*, i. p. cxliii. sq., and Wüstenfeld, *G. G. A.*, 1848, i. 349 sq.

We possess two works by al-Ķazwīnī of approximately the same size, a cosmography and a geography which are two quite independent books. They both have something of the character of compilations but nevertheless reveal a very varied training not only in the various branches of natural science but also in political and literary history. Al-Ķazwīnī's essential merit lies in the fidelity with which he reproduces the results of his reading while his own observations and researches are not nearly so valuable. In spite of much that is fabulous that is contained in it, his *Cosmography* must be deemed a work of fundamental importance and is quite the most valuable book that the Arab middle ages have given us on this field. Of all the Arab geographers, al-Ķazwīnī best deserves the name of the mediaeval Herodotus or of the Arab Pliny, whom, however, he does not surpass in method or critical powers. The great prestige enjoyed especially by the *Cosmography* in the East down to modern times is shown not only by the large number of manuscripts in existence, but also by the Persian and Turkish translations and the very numerous quotations in al-Damīrī's [q.v.] *Ḥayāt al-Ḥayawān*.

Al-Ķazwīnī's style differs considerably from the classical language; it is swarming with solecisms. This style is perhaps to be explained from the fact that Arabic was not al-Ķazwīnī's mother-tongue.

I. The *Cosmography*. It bears the title '*Adjāʾib al-Makhlūḳāt wa-Gharāʾib al-Mawdūdāt*'. '*Adjāʾib al-Makhlūḳāt*' was the name of a cosmographical work in Persian used by al-Ķazwīnī compiled a hundred years earlier by Aḥmad of Tūs. There are a number of other books with this title in Arabic literature; but the most famous of all and at the same time the only one whose title has the addition *wa-Gharāʾib al-Mawdūdāt* is that

of al-Ķazwīnī; cf. Pertsch, *Verzeichn. d. türk. Hss. in Berlin*, 1889, p. 197, note 2.

The *Cosmography* consists of two parts the first of which deals with heavenly things and the second with terrestrial. After a very full introduction the heavenly bodies (sun, moon, stars etc.) are described; next the inhabitants of heaven (the angels) are dealt with; the first part concludes with a chapter on chronology. The second section discusses sub-lunar phenomena and the elements in general, especially the sphere of fire, air and water, natural history in the three kingdoms (minerals, vegetable and animal) and lastly man. The *Cosmography* also contains a great deal that is purely geographical as it describes the more important mountains, islands, seas, rivers and springs; in the *Geography* to some extent the same things are again dealt with, usually in the same words.

The manuscripts of the *Cosmography* differ very much from one another. There are longer and shorter versions and further abbreviated editions or more or less modified versions, sometimes published under another title. References to the manuscripts of the *Cosmography* are given by Pertsch, *Die arab. Hss. der Bibl. zu Gotha*, iii. 126—127; supplementary information in the *Cat. codic. Arab. Bibl. Lugdun. Batav.*, ii. 14. The oldest copy of the text is Cod. Monac. 464, which, according to Seybold, was written in 678 (1280) i. e. three years before the death of al-Ķazwīnī (cf. *Isl.*, iv. 260). Almost identical with it is the Cod. Sarre prepared about 1420 (see Taeschner, *Die Psychologie des Ķazwīnī*, 1912, p. 6; Saxlin *Isl.*, iii. 152).

Wüstenfeld (see his edition of al-Ķazwīnī, vol. i., p. iii. sq.) distinguishes three different editions of the *Cosmography* all of which he believes to have been prepared by al-Ķazwīnī himself: the first of the year 661 (1263), the second of 674 (1176), much enlarged and considerably rewritten, and a third which is represented only by a single codex the latter part of which is incomplete (Gotha, N^o. 1508). The third edition on which Wüstenfeld based his edition of the text has two titles, an earlier, *Tuhfat al-Kāʾināt*, and a later, *Mirʾāt al-Kāʾināt*. In it, apart from other minor additions, we have two entirely new sections (on the different races of mankind and the various arts).

This idea of Wüstenfeld's is, however, untenable, as Ruska has shown in his important *Ķazwīnī-Studien in Islam*, 1913, iv. 14—66, 236—262 (a summary of his researches was given in his article *Über den falschen und echten Ķazwīnī in the Mitteil. zur Gesch. der Medizin und Naturwissenschaft.*, 1914, xiii. 183—188). As a result of his analysis of the structure of the text of the anthropological and mineralogical chapters (especially of the section on the rain-stone) of the *Cosmography* based on a number of Arabic MSS. and Persian translations of the text Ruska comes to the conclusion that we must distinguish not three but four recensions of the *Cosmography*. Of these I (= Wüstenfeld's II) is so far known only from two Gotha MSS.; II (Wüstenfeld's I) is represented in many — some very old — MSS. and in the text of the *Cosmography* given on the margin of the printed edition of al-Damīrī. To this second recension also belongs the already mentioned oldest MS. of al-Ķazwīnī (Monac. 464) and the Codex Sarre. The Arabic original of Rec. III is lost; it is not certain what its relation was to the two preceding.

Its characteristic feature is the addition of chapters 7 and 8 on the races of men and on the arts. The Arabic original of Rec. III — of which the date and compiler are unknown — must also have been the original of the Persian translations as well as the basis for the version preserved in Rec. IV. The idea of a Persian version without an Arabic basis, i. e. of a retranslation of Rec. IV from the Persian, may be set aside as quite improbable. Rec. V, which is only represented in the already mentioned Cod. Gothanus 1508 defective at the end, represents a version of Rec. III. It is quite different from the text of the Persian translations in contrast to which it has marked interpolations; many chapters are amplified by considerable additions. It alone contains the extracts regarding the Turkish hordes of the tenth century from the journal of Mi'sar b. al-Muhalhil [q. v.] and Ibn Faḍlān's [q. v.] notes on the Slavs, Khazars, Russians, etc., as well as the excerpts on jewels from al-Khāzini's book. This Rec. IV (= Wüstenfeld's III) cannot be from the pen of al-Ḳazwīnī himself. Gotha 1508, besides, as has already been mentioned, has a different title from the other three recensions and, indeed, expressly describes itself as a commentary (*sharḥ*) on al-Ḳazwīnī. Gotha 1508 is perhaps original; at any rate it was compiled by someone with a thorough knowledge of the old literature.

Wüstenfeld's edition of the text of the Cosmography therefore does not contain the genuine text of al-Ḳazwīnī but a much later recension of the xviiith century. Almost the whole of Wüstenfeld's volume (p. 73—368) follows the text of the recension o. Cod. Goth. 1508. But portions are omitted from this and replaced by portions from other manuscripts, which have also been used to fill up other gaps. Wüstenfeld's procedure has therefore given us an entirely arbitrary edition of the text. To obtain the true text of al-Ḳazwīnī's Cosmography it would be best to choose the older, shorter Rec. II (= Wüstenfeld's I) which also seems to have been the most widely disseminated. Among the numerous manuscripts of this recension the oldest Cod. Monac. 464 should be taken as a basis.

Extracts from the Cosmography also exist. One with the title *Kitāb al-Durar muntakāt min 'Adjā'ib al-Buldān* is in the Paris Bibliothèque Nationale; cf. de Sacy, *op. cit.*, iii. 449 sq., and de Slane, *Cat. des Mss. arabes de la Bibl. Nat.*, N^o. 2183. A similar abbreviation *ibid.*, N^o. 2419(3). The anonymous work '*Adjā'ib al-Makhlūqāt al-Ṣuḡhrā*, i. e. "the little Cosmography" (also in Paris; de Slane, N^o. 2181) has much in common with the Cosmography.

On account of its relatively succinct form yet containing all essential information generally popular at the close of the middle ages, al-Ḳazwīnī's Cosmography was translated into various foreign languages, notably Persian and Turkish. As to the Persian translations their relation to the Arabic original has already been briefly discussed. But two or more recensions or paraphrases have to be distinguished among the Persian versions, the relation of which to each other and to the Arabic original requires still to be more closely investigated. One of them is called *Tuhfat al-Gharā'ib* (Vienna MS., N^o. 1438; see Flügel, ii. 506 sq., and cf. thereon Pertsch, *Vers. der pers. Hss.*, zu Berlin, p. 367). On the Persian translations cf.

de Sacy, *op. cit.*, iii. 436; Wüstenfeld's edition of al-Ḳazwīnī, vol. i., p. xi., and Ruska in *Isl.*, N^o. 17, 260. There are also abbreviations e. g. London, British Mus. (Rieu, 1883, p. 463, N^o. 7). In Cambridge is a manuscript which also contains excerpts from the Geography of al-Ḳazwīnī; see Browne, *Catal. of the Persian Mss.*, 1896, p. 208 sq., N^o. 126. Ḥamza Ādhurī Asfarā'ini Djalāl al-Dīn (d. 866 = 1461) composed a poetical synopsis of the second part of the Cosmography entitled *Gharā'ib al-Dunyā*. Of this the Bodleian in Oxford (Catalogue by Sachau-Ethé, col. 401—403) and the India Office in London (Ethé, *Cat.*, 79 and 191) have each 2 MSS. This synopsis forms the second part of a much more comprehensive poetical cosmology in four chapters which Ādhurī published under the title *Mir'āt*.

There are also various Turkish translations; on them cf. Taeschner in the *Z. D. M. G.*, lxxvii. 35. There is one by Aiyūb b. Khalīl finished in 977 (1570) in MS. in Vienna (Flügel, *Katal. der Hofbibl.*, ii. 508); it is entitled *Tadhkira al-'Adjā'ib wa-Tardjamat al-Gharā'ib*. Another translation was made by the famous theologian al-Surūrī (d. 969 = 1561); there are manuscripts of it in London, British Mus. (Rieu, p. 107—109; Add. 7894 and Add. 24,954). The anonymous Turkish translation in the Berlin Library N^o. 177 (see Pertsch's Catalogue, p. 197—198) is probably different; its author has dealt very freely and arbitrarily with the Arabic original, has omitted many articles and added others in their place. The original work has been much abbreviated throughout and the arrangement of the matter is different. Another Turkish translation made by Ismā'īl Pasha and dating from the year 1109 (1697) is only known from Ḥājjdī Khalīfa (ed. Flügel), vii. 154, N^o. 14,608. The Berlin and London translations (Brit. Mus., Rieu, *Catalogue*, p. 206—209) also differ from the Arabic original and from almost all the Persian translations in that they include a book of countries, a synopsis of the Geography, as in the Cambridge Persian Codex mentioned above. Aḥmad Bīdjān Yāzidjī-Oghlu's work, '*Adjā'ib al-Makhlūqāt*', is probably only a free version of al-Ḳazwīnī's Cosmography; cf. Pertsch, *Katal. der arab. Hss. zu Gotha*, iii. 127, and Pertsch, *Verzeichnis der türk. Hss.*, zu Berlin, p. 199.

There is apparently a Čaghataī version of the Cosmography in the St. Petersburg Library (Chanykow, N^o. 108); see Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 127.

2. The Geography. The Geography exists in two editions with different titles; the older is called '*Adjā'ib al-Buldān*' and the later *Āthār al-Bilād wa-Akḥbār al-'Ibād*. The first recension represented by MSS. in Berlin (see Ahlwardt's Catalogue, v. 370) and Paris (de Slane, p. 392) dates from the year 661 (1263). The second, much enlarged and on some points completely altered edition dates from the year 674 (1275). On the two recensions and their relationship to each other see Wüstenfeld in his edition of the Geography, p. viii. sq.; he based his edition on the second recension which exists in numerous manuscripts. On the MSS. see the references in Wüstenfeld, *op. cit.*, vol. ii., p. iv. sq., and Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 152 sq.

In this work al-Ḳazwīnī gives a description of the earth following the Ptolemaic division into

seven climes or longitudinal zones (see the art. *IKLĪM* and cf. also Taeschner in the *Z.D.M.G.*, lxxvii. 51 sq.). Within the seven climes the separate countries, towns, mountains, islands, lakes, rivers etc. are arranged in alphabetical order. Their remarkable features are described and many historical events connected with them are given. Considerable space is taken up by the sections on the life and work of famous men born in the various places. The book is therefore, like Yāqūt's Geographical Dictionary, loaded with historical and biographical material. In arrangement it is a geographical lexicon, like Yāqūt; only, as a result of the division into seven sections, it is less easy to consult. Many articles such as those on various mountains, lakes, rivers etc., are also found in the Cosmography usually with identical text.

There are also Persian translations of the Geography; manuscripts of them exist, for example, in St. Petersburg (Chanykow, No. 107; see Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 153) and in Oxford (Sachau-Ethé, *Catalogue of Pers. MSS.*, col. 401, No. 401). It has already been mentioned that a synopsis of the Geography of al-Ķazwīnī exists in a Persian translation (MS. in Cambridge) and seems to have been inserted in several MSS. of a Turkish version of the Cosmography.

A synopsis of the Geography of al-Ķazwīnī was made about 806 (1403) by al-Bākuwī 'Abd al-Rashīd b. Šālīh b. Nūrī, entitled *Talkhīṣ al-Āthār wa-ʿAdjāib al-Malīk al-Ķahhār*. The inconvenient alphabetical arrangement of the names within the seven climes is retained; on al-Bākuwī and his book see Hādjdjī Khālifa, ed. Flügel, ii. 399, No. 3529; Reinaud, *Géographie d'Aboulféda*, i., p. clxi.—ii.; Wüstenfeld in Lüdde's *Zeitschr. für vergleich. Erdkunde*, i. 1841, p. 59, and in his edition of al-Ķazwīnī, ii., p. viii.; Aumer, *Katal. der arab. Hss. zu München*, p. 402; Brockelmann, *G.A.L.*, i. 481, ii. 213. A translation of this book based on a Paris MS. was given by de Guignes in the *N.E.*, ii. 386—545. On the relationship of al-Bākuwī's synopsis to al-Ķazwīnī's original see especially Juynboll, *Lexic. Geograph. Marāṣid al-Iṭṭilāʿ*, vol. iv., p. lxxvii.—xcii. Al-Bākuwī usually adds the latitude and longitude to the places mentioned, which are lacking in al-Ķazwīnī. He is also of use in correcting wrong readings in al-Ķazwīnī and coming to a correct opinion on doubtful ones.

We may here say a little about the illustrations found in many MSS. of al-Ķazwīnī's works, astronomical figures and tables, etc. Painted pictures are, it appears, only found in MSS. of the Cosmography. We may assume with certainty that the originals of al-Ķazwīnī were full of such pictorial embellishments and of tables. Indeed, almost all the larger MSS. of the Cosmography are embellished in this way. Manuscripts which show gaps deliberately left for the insertion of pictures must also have been copied from illustrated originals; such are Gotha No. 1508 (cf. Ruska in *Isl.*, iv. 261) and London, India Office (*Catal.* by Roth, p. 209 sq., No. 725). Rude pictures are contained e.g. in Gotha 1507, Munich 463 and Vienna 1436; better Gotha 1506 and Vienna 1437; numerous fine illustrations in Munich 464 and Cod. Sarre (see supra); cf. thereon the Catalogue of Aumer (Munich), p. 192 sq.; Flügel (Vienna), ii. 505 sq., and Pertsch (Gotha), iii. 128 sq. The

Persian versions of the Cosmography also are usually adorned with miniatures e.g. the two Berlin Codd. 345 and 346 (see *Catal.* by Pertsch, p. 367 sq.) and London, Brit. Mus., No. 8 (*Catal.* by Rieu, col. 464), the latter with illustrations in the Indian style. Although these pictures with their illustrations of plants, animals, marvels of the sea etc. are very often quite fantastic in character and not infrequently pure invention, they ought not to be simply ignored in any future new edition of the Cosmography, as Wüstenfeld did, who has only reproduced the astronomical and other figures and tables in his editions of the Cosmography and Geography (cf. thereon Wüstenfeld, *Kosmographie*, p. iv. sq.). So far only a few facsimiles have been published by Möller in the old Gotha Catalogue, vol. i., from Gotha No. 1507. The miniatures in al-Ķazwīnī's Cosmography have, however, been used in the discussion of important problems, e.g. by Saxl in his investigations into the history of the representation of the planets (in *Islam*, iii. 151 sq.). There he discusses the seven pictures of planets of Codex Monac. 464, which he also reproduces (Pl. 4, fig. 1—4 and 5, 6—8). Sarre in *Münchener Jahrbuch der bildenden Kunst*, i. 18 sq., discusses the somewhat different figures of the Cod. Sarre.

In criticising al-Ķazwīnī's two works, it is also important to know what sources were used for them. A list of the authorities quoted in the Cosmography was compiled by Möller and there are two MS. copies of it in the Gotha Library; see Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 131, No. 1509—1510. Wüstenfeld in the *G. A.*, 1848, i. 351—353, briefly discusses the sources known to have been used for the Geography (practically the same as for the Cosmography). According to him, about 50 authors are quoted in the Geography, including the more important geographers and historians. The following are specially cited for the geography of Spain: al-Ķharnafī Muḥammad b. 'Abd al-Rahīm (d. 563 = 1168; on him see Wüstenfeld in Lüdde, *Zeitschr. f. vergleich. Erdk.*, i. 43) and al-Udhri Aḥmad b. 'Umar (d. between 476 and 478 = 1083—1085; on him see Jacob, *op. cit.*, i. 3 sq.). Abū Ḥamid al-Andalusī, d. 565 (1169), the author of a Cosmography entitled *Tuhfat al-Aibāb* (on it see Jacob, *op. cit.*, iii. 69—94), is often quoted. The already mentioned Persian Cosmography of Aḥmad al-Tūsī (on it see Reinaud, *Géogr. d'Aboulféda*, vol. i., p. xlvi., and Pertsch, *Die pers. Hss. zu Berlin*, p. 366) is also found among the sources. Further may be mentioned the works of Avicenna, the so called *Petrology of Aristotle* wrongly ascribed to Aristotle (cf. the two works by Ruska; see *Bibl.*) and the *Kitāb al-Hayawān* of al-Djāhīz. Ibn Faḍlān and Mi'sar al-Muhalhil have already been mentioned. Many of al-Ķazwīnī's sources e.g. the African travels of al-Djāhīnān are now lost to us. Al-Ķazwīnī also utilised oral information from foreigners e.g. al-Multānī Abu 'l-Rabī Sulaimān who had travelled in the interior of Africa. The remarkable information regarding various French and German towns which al-Ķazwīnī owed to the Spaniard Ibrāhīm al-Tartūshī (d. 477 = 1085) was also probably communicated orally and not taken from a book; on this cf. Jacob, *op. cit.*, i. (third edition entitled *Ein arabischer Berichterstatter aus dem 10. Jahrh. über Fulda* etc., Berlin 1896) iv. 137 sq.

As to the printed editions of the two works of al-Ķazwīnī, the first and only complete European edition is that of Wüstenfeld. The Geography (published as the second part of al-Ķazwīnī) appeared in Göttingen in 1849 and the Cosmography (= Part i.) in 1848. The value of the latter has already been discussed above. In the east the Cosmography has been repeatedly printed on the margin of al-Damīrī's *Kitāb al-Ĥayāt al-Ĥayawān*, e.g. in Cairo 1305, 1309 and 1330. An edition of al-Ķazwīnī printed in 1331 in Cairo (only the Cosmography) is mentioned in Harrassowitz, *Bericht über neue Erwerbung*, No. 2337. On earlier editions and translations of parts of the two works of al-Ķazwīnī cf. the references in de Sacy, *op. cit.*, iii. 431, 435, 450; Wüstenfeld in Lüdde's *Zeitschr. f. vergleich. Erdk.*, i., 1842, p. 49, and in his edition of the Cosmography, i. p. vi.; Pertsch, *Katal. der arab. Hss. . . zu Gotha*, iii., 1881, p. 126. Of earlier editions of parts of the Cosmography we may mention: de Sacy, *op. cit.*, iii. 385—516, with Arabic text, p. 168—207 (sections on minerals, plants, men, with translation and full notes); L. Ideler, *Untersuchungen über den Ursprung und die Bedeutung der Sternnamen*, Berlin 1809, p. 373—406 (the text of the description of the stars with annotations); Volck, *Calendarium Syriacum Arabice Latinumque edidit et notis instruxit*, Leipzig 1859 (dealing with the chapter on the Syriac months).

Of translations alone we may also note: Ethé's translations of the Cosmography, part i., Leipzig 1896; this only covers about the first half of the Cosmography (Wüstenfeld, i. 1—208); of especial value is the very full appendix of notes (with many textual emendations by Fleischer); J. Ruska, *Das Steinbuch aus der Kosmogr. des Ķazwīnī*, Heidelberg (*Progr. der Oberrealschule*), 1896 (translation of Wüstenfeld, i. 208—245); cf. with this also J. Ruska, *Das Steinbuch des Aristoteles*, Heidelberg 1912, p. 81 sq.; J. Ansbacher, *Der Abschnitt über die Geister und wunderbaren Geschöpfe . . .*, transl. and annot., Erlangen (dissert.), 1905 (transl. of Wüstenfeld, i. 368—374, 448—451); Taeschner, *Die Psychologie Ķazwīnī's*, Tübingen dissert., Kiel 1912 (transl. of Wüstenfeld, i. 301—322).

Valuable material for a commentary on al-Ķazwīnī is further given by the works of G. Jacob and E. Wiedemann, who have translated and elucidated various shorter articles from the works of al-Ķazwīnī. Special mention should be made of Jacob's *Studien in arabischen Geographen*, part I—4, Berlin 1891—1892 (of which part 1 appeared in a third enlarged edition in 1896); E. Wiedemann has made many contributions on the subject to the *Mitteil. zur Gesch. der Medizin und Naturw.*, S.B.P.M.S. Erl., and to other periodicals; cf., for example, the references by Ruska in *Isl.*, iv. 336 (No. 303), xii. 270 (No. 76) and 277 (No. 129).

In conclusion, attention should be drawn to the fact that in preparing a new edition of al-Ķazwīnī's works Fleischer's own copy of Wüstenfeld's edition of the text, containing numerous emendations, which is preserved in the MSS. Dept. of the Berlin Library, should be utilised.

Bibliography: Besides works already quoted above: Ḥādjdī Khalifa, *Kashf al-Zunūn*, ed. Flügel, i. 154, No. 71; 188, No. 8072; iv., No. 8061; vii. 1259, No. 9340; Wüstenfeld in Lüdde's *Zeitschr. für vergl. Erdk.*, 1842, i. 49; Wüs-

tenfeld in the *G. G. A.*, 1848, i. 345—355; Reinaud, *Géographie d'Aboulféda*, i., Paris 1848, p. cxliii.—ix.; Rieu, *Catal. Codd. . . in Museo Britannico*, ii., London 1871, p. 463, and *Suppl.*, London 1894, p. 473; Brockelmann, *Geschichte der arabischen Literatur*, i. 481—482.

(M. STRECK)

AL-ĶAZWĪNĪ, ḤAMD ALLĀH B. ABĪ BAKR B. AḤMAD B. NAṢR AL-MUSTAWFĪ AL-ĶAZWĪNĪ, a Persian geographer and historian. He belonged to an old family of Ķazwin of which he himself (*Tārīkh-i Ķuzīda*, ed. Browne, p. 839—842, 848) gives a full account. It was a Shī'ī family, which traced its descent from Hurr b. Yazid al-Riyāhī who fought at Karbalā' and had held the governorship of Ķazwin since the time of the Caliph al-Mu'taṣim with only a brief interruption under the Sāmānids. In the time of Maḥmūd of Ghazna this office was taken from them. Ḥamd Allāh's great-grandfather was accountant (*mustawfī*) of the 'Irāq, hence the family name. The author himself was appointed financial supervisor of the districts of Ķazwin, Abhar, Zandjān and Tārimāin (*Tārīkh-i Ķuzīda*, p. 598; cf. *Nuḥḥat al-Ḳulūb*, ed. Le Strange, p. 27; Engl. transl., p. 33) by the vizier Rashīd al-Dīn. In 677 (1278/79) another Mustawfī, Fakhr al-Dīn Aḥmad, was once more governor of Ķazwin, but jointly with a certain Ḥusām al-Dīn al-Shīrāzī.

The year of al-Ķazwīnī's death is not given. The date of his birth can be easily calculated from the following data. We know that he finished his *Zafarnāma* in 735 (1334/35), worked at it for 15 years and began the book when he was 40 years of age (Rieu, *Supplement*, p. 173). This work was interrupted by the composition of the *Tārīkh-i Ķuzīda* (Rieu, *op. cit.*, p. 173; *Tārīkh-i Ķuzīda*, p. 5); the time spent on this is probably included in the 15 years. He was therefore 55 years of age in 735 and was born in 680 (1281/82).

Works. His intercourse with the celebrated vizier and historian Rashīd al-Dīn Faḍl Allāh († 718 = 1318), to whose entourage he belonged (his brother Zayn al-Dīn was *Nā'ib-i Diwān-i Wizārat* under the same vizier; see Rieu, *Cat.*, i. 81), aroused in al-Ķazwīnī a desire for historical studies (*Tārīkh-i Ķuzīda*, p. 4). About 720 therefore he began a great historical epic, the *Zafarnāma*, finished in 735, which was intended as a continuation of Firdawsī's *Shāhnāma*. Further details are given in the description of the unique MS. of the work in the Brit. Mus. in Rieu, *Supplement*, p. 172 sqq. The poem contains 75,000 *baits* and deals in three sections with the life of Muḥammad and the history of the Caliphate, the history of the Persian dynasties, and the history of the Mongols. The author gives no literary sources; according to Rieu, his statements regarding historical facts are very accurate and the Mongol part gives valuable information, which the author owes in part to his great-grandfather Amin Naṣr al-Mustawfī. The last event which is mentioned is of the year 734 (1333/34). From the few specimens in Rieu it is not possible to pass judgment on the language and style. We are therefore grateful to Browne for giving in his *History of Persian Literature under Tartar Dominion*, p. 96 sq., a passage in 24 distichs dealing with the devastation of Ķazwin by the Mongols. We can see the slavish copying of Firdawsī's style (a rhyme like *kushā shud-bargashā shud* is not without its parallel in Firdawsī's text as we

have it). Mention must also be made of the critical work which al-Ḳazwīnī (probably before he began work on the *Zafarnāma*) did on Firdawsī's *Shāhnāma*. The London MS. of the *Zafarnāma* has the text of Firdawsī edited by our author on the margin (Rieu, *op. cit.*, p. 172). Work on the *Zafarnāma* was interrupted by the compilation of a compendium of universal history, the *Tārīkh-i Guzīda* (finished 730 = 1330). This work comprises the history of the Muḥammadan world from the creation to 729 (1329) and is written in a very simple, indeed arid style, except for the preface which contains a dedication to Ghīyāth al-Dīn, son of the vizier Rashīd al-Dīn. The preface is followed by an introduction (*fātiḥa*) dealing with the creation of the world and then come six sections (*bāb*) dealing 1) with the prophets, 2) the old Persian kings, 3) Muḥammad and the Caliphs, 4) the dynasties of the Muslim period in Persia and adjoining lands, 5) scholars and poets, and 6) history and topography of Ḳazwīn. A *khātima* follows containing genealogical data and genealogies, which latter, however, are wanting in most MSS., according to Browne. Some of these manuscripts, like Brit. Mus. Add. 22,693 and that published by Browne in facsimile, have between *bāb* 4 and 5 a synopsis of the history of the Muzaffarid dynasty which is not by al-Ḳazwīnī (Rieu, *Catalogue*, i. 82; Browne, Gibb Mem. Ser., xiv/ii. 151 *sqq.*). The compendium must have enjoyed great popularity on account of its wealth of matter, for it has often been copied in the East and is therefore of frequent occurrence in European collections also. Browne, *J. R. A. S.*, 1900, p. 725, gives a list of the most important manuscripts; the one published in facsimile by him is not included; it was written in 875 (1453) and comes from a private Persian collection (Gibb Mem. Ser., xiv/i. p. xv.). The sources on which the book is based are given by the author (ed. Browne, p. 8). On this cf. Browne in the Gibb Mem. Ser., xiv/ii. 1 *sq.*, and *Hist. of Persian Literature under Tartar Dominion*, p. 87 *sqq.* They include the celebrated historians al-Ṭabarī, Ibn al-Athīr, Ḥamza al-Isfahānī etc., also Persian authors of a later period, like Djuwainī, Niẓām al-Mulk's *Siyāsat-nāma*, also the *Shāhnāma* and a *Tadhkirat al-Awliyā*, which, according to Browne, is the well-known work of the same name by Farīd al-Dīn 'Aṭṭār. The main source seems to have been Rashīd al-Dīn's *Djāmī al-Tawārīkh*, with the second part of which the *Guzīda* agrees in arrangement (ed. Browne, p. xiii. *sq.*). Another work now lost, the *Salḡūknāma* of Ḳāhūrī of Nishāpūr was used by al-Ḳazwīnī and by Rāwandī also in his *Rahat al-Ṣudūr*; on the relation of the *Rahat* to the *Guzīda* cf. Muḥammad Iḳbāl in his introduction to the edition of the first mentioned work (Gibb Mem. Ser., New Ser., ii. 30 *sq.*). The *Guzīda* itself is five times quoted in Dawlatshāh's *Tadhkirat al-Shu'arā*, among other things for the well-known story of the Sāmānid vizier Naṣr and Rūdāgī (Dawlatshāh, ed. Browne, p. 31, = *Guzīda*, ed. Browne, p. 382). Dawlatshāh once (p. 105) expressly quotes as his authority the *tadhkira* of poets preserved in the *Guzīda*. On the relation between Dawlatshāh's *Tadhkira* and the *Guzīda* see also Browne in the *J. R. A. S.*, 1899, p. 39 *sq.* Lastly it may be mentioned that the *Guzīda* itself is one of the sources of Mir-ḵwānd's *Rawḡat al-Safā*.

Al-Ḳazwīnī's last work, the *Nuzhat al-Ḳulūb*, completed in 740 (Rieu, *Catalogue*, i. 419), is mainly geographical. It is divided into an introduction (*fātiḥa*), which deals with cosmography, and three sections (*maqāla*), which deal with natural history, anthropology and geography. Then follows a concluding section (*khātima* or *kitāb al-khawātim*) on wonderful things and curiosities in Īrān and other lands. As in the case of the *Tārīkh-i Guzīda* there is a large number of MSS. of this work (a survey of them is given in Le Strange's preface to his edition in the Gibb Mem. Series, xxiii/i., p. xiv. and xx.). On the sources of the *Nuzhat* cf. Rieu, *Catalogue*, i. 418; Browne, *Hist. of Pers. Lit. under Tartar Dominion*, p. 99. They include, as might be expected, the famous geographer Yāqūt, the older Ḳazwīnī, Ibn Ḳhurdādhbih and others not so well known. The statements regarding Fārs are taken from Ibn al-Balkhī's *Fārsnāma*. That he, as Le Strange supposes, made use of official documents, taxation lists, as is to be expected from his position as finance officer, is very probable.

Bibliography: On his life see *Tārīkh-i Guzīda*, ed. Browne, p. 3 *sqq.*; Rieu, *Catalogue*, i. 80 *sq.*; *Supplement*, p. 172—174; the prefaces by Browne and Le Strange to their editions of the *Guzīda* and the *Nuzhat*; Browne, *History of Persian Literature under Tartar Dominion*, p. 87 *sqq.*

Tārīkh-i Guzīda: edition by Browne, Gibb Mem. Ser., xiv/i (facsimile of a manuscript), xiv/ii. (very full synopsis of contents in English and Index by R. A. Nicholson). Separate parts had been previously published: the greater part of the description of Ḳazwīn by Barbier de Meynard in the *J. A.*, 1857 (Ser. 5, vol. x. 257 *sqq.*); the section on the poets of Persia by Browne, *J. R. A. S.*, 1900, p. 721 *sqq.*, and *J. R. A. S.*, 1901, p. 1 *sqq.*; the history of the Islāmic dynasties of Īrān and the adjoining lands in J. Gantin, *Tārīkh-e Gozīdē*, i. (1903; no more publ.), text and French transl. Two portions from a St. Petersburg MS. (Ḥasan-i Ṣabbāḥ and sayings of Buzurjdmihr) in Salemann-Zukowski, *Persische Grammatik*, p. 3 *sqq.*, 41 *sqq.*

Nuzhat-i Ḳulūb: editions: Bombay 1311 (1894; I have not seen this, an edition of the whole work); *The geographical part of the Nuzhat al-Qulūb* . . . , ed. by G. Le Strange, Gibb Mem. Ser., xxiii/i. (text), ii. (Engl. transl.) 1915 and 1919. A part of the text had been previously published by Schefer, *Siasatnamēh*, *Supplément*, 1897, p. 141—235 (not accessible to me).

(V. F. BÜCHNER)

AL-KEF (الكاف), a town in Tunisia, 110 miles S. W. of Tunis and about 20 from the Algerian frontier, situated in 36° 11' N. Lat. and 8° 30' E. Long. The population in 1911 was 6,312, including 1,200 Europeans and 300 Jews. Many of the latter are descended from the Jews who used to live among the Beduins, whose customs and dress they had adopted.

The word *kef* means "rock". It is given on account of the situation of the town on a spur of the Djabal Dyr at a height varying from 2,486 feet in the S.W. to 2,853 in the N.E. Before the establishment of the French protectorate, it was surrounded by a wall now in part destroyed. The area circumscribed by the wall contains many

buildings now in ruins and empty spaces; in compensation a European town is in process of formation on the plain near the station on the railway now connecting al-Kef with Tunis. At the foot of the wall rises an abundant spring, the 'Ain al-Kef, an object of veneration to the inhabitants and regarded by them as "marabout". Commanding the principal roads from Algeria to Tunisia, al-Kef was for long one of the busiest markets of the Regency; in economic importance the town ranked next to Tunis and Sfax. This is no longer the case since the building of the Tunis-Constantine railway to the towns in the valley of the Medjerda. Nevertheless the mineral resources of the adjoining country assure to al-Kef the elements of its future prosperity. The town was, and still is, a religious centre. The two most popular brotherhoods in the Regency, the Qādiriya and the Rāhmāniya, have each a much frequented *zāwiya* there.

Al-Kef is the ancient Sicca Veneria, a Punic town which became a Roman colony under Augustus. Very prosperous during the early centuries of the Christian era, it was in the Byzantine period one of the strongest places in Africa. There still survive many ruins, columns, capitals, fragments of statues, inscriptions, remains of temples, baths and Christian basilicas. The cult of Tanis, identified with Venus, whose name is found in that of the ancient town, may even have left some traces in local superstitions.

Sicca survived the Arab invasion of the seventh century A. D. The ancient name of the town continued in existence in the form *Shikka Banāriya*. This is the name used by al-Bakri (ed. de Slane, p. 33; transl. p. 82) in the *Kitāb al-Istibṣār* and even in Ibn Khaldūn (*Hist. des Berbères*, ed. de Slane, i. 220, 256, ii. 20; transl. ii. 42, 98, iii. 209). We know very little of the history of the town till the seventeenth century. Ibn Khaldūn, however, tells us that it was governed at the beginning of the sixth (twelfth) century by a certain 'Iyād b. Naṣr Allāh, who succeeded in protecting it against the incursions of the Hilālīs and whose son submitted to 'Abd al-Mu'min in 554 (1159—1160). In the following century the Sulaim settled in this region and incorporated the Howāra Berbers, who had been settled there since the beginning of the second century A. H. In the beginning of the sixteenth century A. D., al-Kef and the surrounding country were occupied by the Ūlād Ṣūla, a section of the Banū Shennūf, who attached themselves to the Muhalhil, one of the two great families into which the Sulaimī Ku'ūb were divided.

Under Turkish domination, the region of al-Kef played an important part in the fighting between Algerians and Tunisians, especially in 1628, 1685, 1694, 1705, 1746 and 1756. The rulers of Tunis during this period tried to make al-Kef strong enough to bar the invader's road to the capital. Muḥammad Bey scattered the Banū Shennūf, put in their place a *makḥzen* formed by the Ūlād Ya'ḥyā, and stationed a *smala* of spahis near the town. The Bey 'Alī built a *kaṣba* in 1675, so strong that the place was able to repulse an Algerian attack four years later. In 1739—1740 'Alī Pasha built a wall round the town and placed forts on the cliff which commanded the *kaṣba*. In spite of these precautions, al-Kef, which had been unsuccessfully attacked by the Algerians in 1746, was taken by the Dey's troops in 1756 after a siege of thirteen days. In

the beginning of the nineteenth century a new *kaṣba* was built (1813) by Ḥamūda Pasha, who said that "if his body was at Tunis, his head was at al-Kef". The garrison was put under the command of an *agha* independent of the *kā'id* or civil governor. The taking of Constantine in 1837 by the French, by ridding the Regency of the dangerous proximity of the Turks, lessened the military importance of al-Kef, the fortifications of which were now only used to protect the town against Beduin raids. During the Tunisian expedition, the French troops entered the town without striking a blow on April 25, 1881.

KELĀT. [See KALĀT].

KELEK (P.), a raft consisting of beams bound together with rope and placed upon inflated sheepskins. These rafts are chiefly used on the Tigris where this river is not navigable for ships. They are described as early as Herodotus (i. 194) and Xenophon (*Anabasis*, i. 5, 10; iii. 5, 9 sqq.). They are still used at the present day and are mentioned by nearly all travellers in Mesopotamia.

Bibliography: Thévenot, *Suite du voyage de Levant*, Paris 1674, ii. 103 sq.; Buckingham, *Travels in Mesopotamia*, London 1827, ii. 87; Ker Porter, *Travels*, London 1821—1822, ii. 259; v. Moltke, *Gesammelte Schriften*, viii., Berlin 1893, Index; H. Ritter in *Isl.*, ix. 14 sqq.

KEMĀKH (KAMAKH, KAMKH, Greek Κάμαχα), a fortress situated on the southern bank of the Euphrates (Kara Şu) in its course North-East to South-West, before it takes a sharp turn to the South. The river is here confined between high rocks to such a degree that there is no longer room for the highway that has hitherto accompanied its course. The town, which till late in the sixth century was one of the fortified places of Asia Minor, is situated on the mountain-slope and surrounded by gardens and orchards. In spring the many mulberry trees attract myriads of quails, a phenomenon which is looked upon as something miraculous. The river is still utilized by the natives for floating down-stream timber which is cut in the forests in the neighbourhood. The salt, cheese and linen manufactured at Kamakh had a high reputation.

Higher up the mountain is situated the fortress which, chiefly on account of its natural position, was considered to be impregnable. It is said to have borne the name of Ani and to have been one of the chief places of the Armenian kings as well as of the Arsacids who had here their temples, treasury, state-prison and who were also buried in

this place. The descriptions of Ani as a royal residence have some resemblance to those of the other place of the same name (see the art. ANI) situated on the Arpa Çai.

Kemākh was taken by 'Umar b. al-Ḥubāb al-Sulamī in the year 59 A.H. It has, however, from that time onwards often changed its master. In 133 (751/52) it was besieged by the Emperor Constantine. The 'Abbāsīd caliph al-Manṣūr tried to strengthen his hold on it by a restoration of the citadel; it is said that he intended to use it chiefly as a bulwark against the invasions of the Khazars. In 177 (793/94) it was besieged by the Byzantines. Ḥamd Allāh Mustawfī (born 680 = 1281/1282) mentions it as a small town. The Ottoman Emperors Bāyazid and Selim took it after a siege, the former, at the hands of his general Timurtash, in 1396, the latter in 1515. Timūr beleaguere it for seven months, without being able to take it. According to J. Brant, who visited the town about 1830, its population consisted at that time of 400 Turkish and 30 Armenian families; it was the residence of one of the last Derebeys [q.v.]. Kemākh is the chief place of the Qazā of the same name, Sandjak Erzindjān, wilāyet Erzerüm. It is the residence of a *kā'im makām*. In the vicinity are numerous *turba's*. At the present day it is still an important centre of commerce and industry.

The population of the Qazā consist of 14,547 Muḥammadans, 3,503 Greek Armenians, 189 Protestant Armenians and 633 orth. Greeks (Cuinet).

KEMAL AL-DİN ISMĀ'İL, a Persian poet of Iṣfahān, son of Djamāl al-Dīn 'Abd al-Razzāk, was one of a group which devoted its eulogies to the family of the Ṣā'idīs (also called Āl-i Khudjandī) which kept political and judicial power in its control in Iṣfahān. Surnamed *Khallāk al-Ma'āni* "creator of thoughts", he dedicated his odes mainly to the judge Rukn al-Dīn Ṣā'id b. Maṣ'ūd, but also to the Khwārizmshāhs ('Alā' al-Dīn Takash, Muḥammad, his son, Djalāl al-Dīn and Ghiyāth al-Dīn, his grand-sons) who ruled in Irāk-ʿAdjamī, as well as to the Atābeks of Fārs who ruled at Shirāz (Sa'd b. Zangī and his son Abū Bakr). In the end he retired from the world and devoted himself to the mystic life under the guidance of Shaikh Shihāb al-Dīn 'Umar b.

Muḥammad al-Suhrāwardī. He was tortured and put to death on Djumādā I 2, 635 (Dec. 21, 1237), at the capture of Iṣfahān by the Mongol soldiers of the army of Ogoṭāi, son of Čingiz Khān, who hoped to find hidden treasure in his house. His *Diwān* has been printed at Bombay (n. d.); there are partial translations by Louis H. Gray, put into English verse by Ethel Watts Mumford (*Hundred Love Songs*, New-York 1904) and by Theodosius Garrison (*Lippincott's Mag.*, lxx. 783), of the 15 quatrains published by Salemann-Shukovski, *Persische Grammatik*.

(CL. HUART)

KEMĀL KHODJANDĪ (KAMĀL AL-DIN MAS'UD), a Persian lyric poet, born in Khudjand in Transoxania. He followed the mystic path, went on a pilgrimage to Mecca and on his return settled in Tibriz the climate of which had pleased him. On the capture of this town by Toktamish-Khān, he was taken to the town of Sarāi at the request of this prince's wife. He remained there four years. Having returned to Tibriz the Djalā'irid Sultān Husain, son of Sultān Uwais, had a house built for him. He likewise received favours from Mirān Shāh, son of Timūr and governor of Ādharbaidjān, who paid his debts. He died there in 792 (1390) according to Dawlat Shāh, or 803 (1400) according to Khondemir. He was buried in the Farah-bakhsh quarter where his tomb became an object of pious visits. Ten of his *ghazals* have been published by Bland, *Century*, p. 9—12. There is, in the national library of Vienna, a very beautiful manuscript of his poems illuminated with miniatures (Flügel, *Die arab., pers. u. türk. Handschr. ... zu Wien*, i. N^o 581).

Bibliography: Dawlat Shāh, *Tadhkirat al-Shu'arā'*, p. 325; Lutf 'Alī Beg, *Ātesh-kada*, in the section on Tūrān (not paginated); Riḍā Kulī Khān, *Madjma' al-Fuṣṣahā'*, ii. 29; J. von Hammer, *Schöne Redekünste Persiens*, p. 255; Khondemir, *Ḥabib al-Siyar*, iii. 3, p. 90; Sir Gore Ouseley, *Biographical Notices of Persian Poets*, p. 192—194; H. Ethé, in the *Grundriss d. iran. Philologie*, ii. 304. (CL. HUART)

KEMĀL MEHMET NĀMİK, one of the most important of Turkish poets, stylists and authors, the principal leader of the Turkish moderns, creator of the modern Turkish prose language and the most notable Turkish patriot of modern times. Kemāl, born on Dec. 21, 1840 (Shawwāl 26, 1256), in Rhodosto on the Sea of Marmara, belonged to an old aristocratic family which could be traced back through his father, the astronomer Muṣṭafā 'Āsim Bey, his father Shams al-Dīn Bey, the first Chamberlain of Sultān Selīm III, and his father, the admiral Kapudan Aḥmad Rātib Pasha, to the Grand Vizier Topal 'Othmān Pasha, the conqueror of Nādir Shāh of Persia. His father belonged to Yeni Shehir in Anatolia and his mother to Konica in Albania. The Albanian strain in him was of the highest importance and explains much in his

indomitable character and his strong passionate nature. In appearance he was quite like a European. He was liberal, open-hearted and attractive.

Kemâl had a rather irregular, unsystematic education at home; he had only nine months' regular schooling in Constantinople at the Bâyezid-Rüşdiye and the Wâlide-Mektebi. He was trained in Arabic, Persian and French by private tuition. In 1852 he was with his grandfather Şhams al-Dîn Bey in Kars and later in Sofia where he began to write poems although only 14 years of age, quite in the style of Sümbül-Zâde, whose *Diwân* had to serve him as a model for lack of other patterns. Returning to Constantinople in 1857/8 he entered the translation bureau of the Sublime Porte and soon became a member of the then flourishing group of poets of the old school: Nâ'ili, Mazlûm Pasha-Zâde Memdûh Fâik, Hâlet, Herseglî 'Arif Hikmet, Ghâlib and Kâzım, who imitated Nefî and Fehim chiefly. Kemâl quickly won an honoured place among them. He put together a slim *Diwân-i Müretteb* of not very original poems. In his poems he took the pen-name of Nâmîk. It is remarkable that the last incomplete *ghazal* of the *diwân* is the first of his patriotic poems.

He only entered upon the field he was to make his own through Şhinâsî Efendi, who had studied in Europe and was now in Constantinople endeavouring to attract men of intellect to western culture and ideas, mainly in his capacity as editor of the influential newspaper *Taşvîr-i Efkiâr*. Kemâl became friendly with him and soon fell completely under his influence, which directed him from the imitation of classical models to the spirit of the west. Kemâl grasped with ardour the new ideas, the importance of which he at once realised. He made it his aim in life to bring about a literary, political and scientific renaissance in old fossilised Turkey and to secure her a place among the nations of the West. He began his troubled career by writing for Şhinâsî's paper. Henceforth he wrote under the name Kemâl, which soon gained the greatest popularity.

When Şhinâsî [q.v.] fled to Paris in 1864 he left the editorship of his paper entirely in the hands of the young Kemâl, who at first found it a very difficult task. For a year he published almost nothing but translations from the French. Then important political questions (the Polish rising and the American Civil War) helped him to raise the standard of the paper which had gone down very much. He now took the field with political articles of his own which aroused the greatest interest on all sides and made the *Taşvîr-i Efkiâr* the most influential newspaper. It was in its pages that the expression "Young Turk" first appeared.

Kemâl became more and more embarrassing to the government. Although only 23 years of age, he had already been given the müteşarriflik of Kal'ei Sultaniye (Gallipoli) for a short time and next they wished him to become ambassador to Persia in order to get him away from Constantinople. But he did not accept this post. It was only with difficulty that he escaped being sent to Erzerûm. Kemâl had joined the Young Turk committee founded by Ziyâ among the elements in favour of reform, the main object of which was to raise Turkey from her backward state and obtain a constitution. When the members were threatened with arrest, Ziyâ, Kemâl,

Nûrî, Rifât and 'Alî Su'âwî fled from Turkey in 1866 to London where they settled down. At the time of this his first voluntary exile Kemâl was expecting the birth of his first child, who afterwards became the poet 'Alî Ekrem. In London Kemâl published the paper *Mukhbir* ("The Correspondent") on behalf of the party; it was later transferred to Paris and then replaced by the *Hürriyet* ("Liberty"). In Paris he studied law and economics and translated important French works into Turkish.

His stay in Europe was of overwhelming influence on his political and literary development. Henceforth he came back again and again to the subject of civilization. When, after the death of the Grand Vizier 'Alî Pasha, it became possible for the Young Turks to return home, Kemâl undertook the editorship in Constantinople of the Young Turkish paper *İbret*. He succeeded by his articles, which are of permanent value, in making the paper one of the most important in Turkey. At the same time he contributed to a number of other papers and periodicals and thereby completely influenced and revolutionised public opinion.

When Kemâl became inconvenient to the government by his political activity, especially through his patriotic drama *Waṭan*, which aroused unbounded enthusiasm, he was banished to the fortress of Famagusta in Cyprus. At first he was in the closest solitary confinement, where he planned in his subterranean cell his drama *'Akif Bey*, which he wrote out and printed as soon as the rigour of his imprisonment was slackened. He was detained in Famagusta for 38 months until the accession of Murâd gave him his liberty and permission to return to Constantinople. But Murâd only reigned 93 days. With the accession of 'Abd al-Hamid a limit was soon put once more to Kemâl's activity. Kemâl took part in the preparation of the constitution and shared in the deliberations with Midhât Pasha and Ziyâ Pasha.

His liberal activities aroused the deepest mistrust in 'Abd al-Hamid. He was arrested and spent 5½ months in the common prison in Constantinople where he spent most of his time in historical study in preparation for a history of the Turkish army. In spite of his acquittal after a trial, 'Abd al-Hamid sent him to detention in Mytilene (Chios). This enforced inactivity was a great trial to him after the disastrous conclusion of the war with Russia and he expressed his feeling in songs like the touching Mühâdjir song *Allâh için öldür beni*.

After two years' detention during which he wrote the *Dişlâl* and the *Dişemâ*, he was appointed *Müteşarrif* of Chios. There the disease of the lungs, which was to cause his premature death, first broke out. When Chios became the capital of a wilâyet, he was moved to Rhodes, where the more favourable climate restored his health and revived his creative powers which had somewhat abated. With the assistance of a splendid library, for the enlargement of which at great personal expense he had agents in India, Persia, Egypt and Europe, he set about the preparation of a history of the Turkish empire.

From Rhodes he went to Chios, as *müteşarrif* again. He worked at his history with a feverish activity and, in spite of the fact that his health was much affected, displayed considerable literary activity in all other directions. The order forbidding the printing or continuation of

his history which came from Constantinople as the result of a treacherous denunciation of him was therefore a frightful blow and he died during the night after receiving the order, Dec. 2, 1888, in Mytilene.

His body was first of all interred in Mytilene in front of the mosque and then solemnly removed by his son 'Alî Ekrem to Bulair, 8 miles north of Gallipoli and there buried with military honours in the *türbe* of Süleimân Pasha, a worthy honour for the great patriot. 'Abd al-Hamid built a splendid *türbe* for Kemal. While Süleimân Pasha's *türbe* was already a place of pilgrimage, Kemal's *türbe* became to a still greater extent the goal of many Ottomans, who saw in him the incarnation of their ideals. The first thing done after the revolution of 1908 by the "Committee of Union and Progress" was to go solemnly from Salonica to his tomb at Bulair as to the grave of the "founder of the building of liberty" and pay homage to his manes. The unexampled moderation with which the victorious party proceeded was also a tribute to the influence of Kemal.

The supreme and unique position occupied by Kemal in Ottoman literature can hardly be too highly appraised. His influence on his own and the following generation was tremendous. He was perfectly aware of the difficulty of his task but always believed in a successful result, which was quite in keeping with his sanguine temperament. His personality — he was a born agitator and thoroughly revolutionary in spite of his aristocratic birth — with his unusual energy and inflexible and undaunted strength of will exercised an overwhelming attraction on the masses. He was filled with a deep, almost fanatical religious, spirit, thoroughly Islamic in its attitude and he believed in his people, his country and their future. Basing himself on the idea of the true Islamic culture with a strong leaning to pan-Islamic ideas which he endeavoured to realise by going back to primitive Islam and rejecting the Islam of the past which did not satisfy him, he evolved the idea of the Ottoman fatherland and was able to impose it on his "lethargic" people. It was Kemal who first awakened his countrymen to the conception of *Waṭan* (fatherland), which was later replaced by the Turkish *Yurt*, and to the conception of *Millet* (nation) and *Hürriyet* (liberty) which the Young Turks took as their watchwords.

Kemal remained faithful to his task which he regarded as a kind of apostolic office, in spite of the most difficult conditions. His talent as an author was certainly not small but this does not completely explain the almost magical influence which he has exerted down to our own day. The most recent Ottoman literary criticism is rather inclined not to estimate him so highly. But what no critic can deny him, what places him high above all others is his thirst for freedom, his patriotism, and the fearlessness with which he expresses his ideas and above all his masterly command of language. When he began writing, he found the language in a chaotic condition, at his early death he left it a wonderfully modelled instrument. The creation of the modern Turkish prose language is undeniably Kemal's work.

In his political and literary essays Kemal is vigorous and convincing when he wants to defend any view. No one has surpassed Kemal in his essays.

His longer works have a tendency to resemble a series of collected articles rather than a consecutive whole.

The admiration in which he was held found expression in his many imitators.

Works. Kemal was not primarily a poet. Besides his *Diwân* written in the old style, although already showing traces of new features (love of country and people) and adopting modern ideas (theatre, steamer), in the *ghazal* he composed a not very large number of powerful poems which passed from mouth to mouth like revelations. He was readily followed simply because he still paid part tribute to old ideas in his poems. Many poems are scattered through his works and many went unprinted from hand to hand. They all show his deep patriotism.

In his *Wawaila* ("groaning, wail", reprinted 1326=1908) Kemal laments his fatherland which is wrapped in a winding sheet. His *Bâriḳe-i Zâfar* ("Flash of Victory", 1872) written in an elaborate style is a panegyric on the conquest of Constantinople. His enthusiastic *Waṭan Manẓumesi* did not appear till 1326 (1908).

Kemal's main success as an author was won by his dramas of which he wrote six. He might be regarded as the creator of the Turkish drama. In the play by Abu 'l-Ziyâ Tewfik, his most devoted friend and follower, *Edjel-i Kaḍâ* ("The Threatened Fate", 1288=1871/72), the first national Turkish drama, he was a silent collaborator although his name was never mentioned. He then tried his skill independently and wrote:

1. *Waṭan yakḥod Silistra* ("Fatherland or Silistria"), a play in 4 acts first printed in 1872 and often since (transl. into Russian by W. D. Smirnow in the *Wiestnik Evrope*, 1876, ix, 151; German by L. Pekotsch, Vienna 1887). The play, which is important from the sociological and psychological points of view, depicts heroic scenes in the defence of Silistria in 1854. The piece aroused tremendous enthusiasm and was the main cause of his banishment to Famagusta.

2. *Zawallî Çodjuḳ* ("The Poor Child"), a drama in 3 acts (1873). It describes the consequences of the abuse of parental authority over the child and is an attack on the traditional manner of arranging marriages. Kemal deals with the new idea of the freedom of women to feel and to love. The influence of "La Dame aux Camélias" is unmistakable.

3. *Âkif Bey*, a drama in 5 acts (1874). In this the patriotism of the Turkish naval officer is emphasised and contrasted with the faithlessness and inconstancy of his wife who abuses the absence of her husband.

4. *Gül-nihâl*, a drama in 5 acts (1875), probably based on Hamlet, extolling the motive of vengeance, especially woman's vengeance and rebellion against despotism.

5. *Diḳlâl ül-Dîn Khwârezm-shâh*, a tragedy in 5 acts (1875), with a long literary introduction (*muḳaddeme*) on the defects of Ottoman literature and the technique of the drama, first published by Rodosîl Sâlih Djemâl, then printed in Cairo without the introduction in 1292 (1875); the *muḳaddeme* alone is printed in *Medjmu'a-i Abu 'l-Ziyâ*, No. 41 (1885), and *Kitâbkhâne-i Abu 'l-Ziyâ*, No. 69. It is a romantic tragedy from Persian history in the style of Hugo's "Cromwell" and "Hernani". *Diḳlâl* is thought to mark the zenith of Turkish romanticism. It is a drama intended to be read

only, a passionate protest against the government system of the Ottoman Sultāns. On account of its obvious bias the piece was always suppressed by the censor.

6. *Qara Belā* "Black Misfortune", first published in the *Külliyāt* in 1908, written in Famagusta in 1875, describes the violation of an Indian Emperor's daughter by a negro who has smuggled himself into the harem as a eunuch and takes the place of her lover. The dishonoured lady commits suicide by poisoning herself on the eve of her marriage after killing the black monster.

Smirnov seems to be wrong in ascribing a drama *Anadolu Köyleri* to Kemāl, for which the Sultān is said to have granted him a special reward.

Kemāl's dramas suffer from a lack of naturalness, a want of lucidity in the inner motives, from sentimentality, too much patriotic pathos and from tirades. But he knows how to grip the attention of his audience and carry them with him. A certain psychological depth cannot be denied him. The Turkish theatre was then something quite new. The plays are great achievements for their time and circumstances, in spite of all their dramatic and technical defects, especially as Kemāl was mainly concerned with using the drama as a medium to carry his ideas to the masses and to arouse the feelings dormant in the people. For him the theatre is "an amusement useful to influence the people".

He followed similar lines in his two novels, which have the same defects. But in them we have the typical features of Turkish life and thought vividly and realistically portrayed. From the point of view of style they reveal great beauty. The influence of his novels was great; they became the model for a whole school whose most ardent representative was Wedjîhî. The two novels are:

1. *Intibāh yakḥod 'Alî Beyiñ Sergüzeshti* "The Awakening or 'Alî Bey's experiences" (1874; the original title is said to have been *Soñ Peshimānlik*). It is the description of the adventures of a rich spoiled mother's darling, who falls into the clutches of a harlot, deluded by her intrigues heartlessly sacrifices his innocent sweetheart and is completely ruined, until finally he kills his mistress, after the sweetheart whom he has abandoned has saved him at the cost of her own life, and ends in prison.

2. *Djezmî*, a historical novel (1297 = 1880, printed 1305 = 1887/1888), the romantic love story of 'Ādil Girai of the Crimea and the sister of the Shāh of Persia during 'Ādil Girai's captivity in Persia in the xvth century. The main facts are taken from history; *Djezmî* marks an important technical advance on 'Alî Bey in the compactness of its style and its wealth of colour. Panislāmîc ideas are very evident in it.

The most noteworthy of Kemāl's historical works are: 1) his biographies *Ewrāk-i Perişān* "Scattered Leaves" (1301) in 4 parts in which he gives accounts of the lives of four remarkable Muḥammadan men, writing in a learned style in the European manner, in the further development of his Islāmîc tendencies; the four are: the Aiyūbid Salāḥ al-Dīn, the Ottoman Sultān Mehmed II, Selim I Yawuz and the Emir Newrūz Bey. The collection is considered a classic among the Turks, both in language and learning although it is only a good compilation, mainly taken from European

sources. In vividness of description and vigour of style they take almost the first place among his works; 2) *Dewr-i Istilā* "The Period of the Invasion"; 3) *Kanîza*, the story of the capture of the fortress of Kanisza in Hungary, written in 1290 (1873) in Famagusta and printed anonymously the same year.

4) Kemāl was a passionate believer in the vitality of Islām. There is, however, in his views a certain lack of coherence between the Muslim ideas and the Rousseauian formulae which he has adopted. He endeavours to prove the equal worth of Islām with the ideals of modern civilisation, which are in the end ideals of Islām also; Islām was in no wise backward down to the xvth century, and had only to give way to the superiority of Europe with the rise of experimental science. In reply to Ernest Renan's attempt to prove the hostility of Islām to education, Kemāl wrote a defence *Renān Mudāfa'anāmesi* published in the *Külliyāt*, which is based on much sounder foundations than the other Muḥammadan pamphlets combatting Renan's views.

5) *Medkḥel*, the history of ancient Rome and the history of Islām which comes down to 438 (1046), were intended as an introduction and a foundation for his Ottoman history. The latter runs from the beginning of the empire to the death of Sultān Selim I Yawuz in 926 (1520).

6) *Rüyā* "The Dream", the most vigorous and inspired of his writings, which every Turk must have read at the time of the reaction, dreams of the days when the chains will fall in the fatherland. It has been often reprinted, for example twice in Cairo (*Idjtiḥād*) in 1907 and 1909.

7) *Sergüzesht* (1326 = 1908) also describes a dream.

Kemāl was above all a publicist (see above). He raised the *İbret* to be an ideal newspaper. His articles which appeared in it are still reprinted again and again and put into collections. The separate numbers of the newspaper are still carefully preserved.

As a critic he also displayed a comprehensive activity, an appreciation of which has been given by Gibb. He mercilessly shattered the old Parnassus and helped the new school to victory. There is much criticism in his essays and in his *Mukaddeme*. When Ziyā Pasha, his old comrade in arms, made a rather unfortunate selection in an anthology of Turkish literature in his three volumes *Kharābāt*, Kemāl wrote two vigorous criticisms of the first two volumes, *Takhrīb-i Kharābāt*, 1298 = 1881, and *Takḥib-i Kharābāt*, reprinted in 1303, which Gibb considers among the best essays in Turkish.

Kemāl's letters are of great importance, as he corresponded with almost all the leading personalities in Turkey, political as well as literary. Unfortunately they are only in part published so far, for example the letters to Midḥat Efendi, 'Irḥān Pasha, a part of those to Abu'l-Ziyā Tewfīk, 'Abd al-Ḥaḳḳ Hāmid and others. He wrote naturally and vigorously and was the first to teach his people the epistolary style.

We must not omit his official papers. However conventional and crabbed Ottoman official style is, he nevertheless succeeded in giving it lucidity and clearness. The number of official documents which he composed in his different official positions is legion. They are essays on the

creation of the state and its reforms, the rights of the people, its intellectual and ideal requirements, on law, history, political economy, social philosophy, schemes, protocols, semi-official documents, etc.

Finally we may mention his numerous translations: *Behâr-i Dānîsh* ("Springtime of Knowledge"), translated with a literary introduction from the work of the Indian Shaikh 'Ināyat Allāh. He also translated from the French of Victor Hugo, Lamartine, Montesquieu, J. J. Rousseau, Condorcet, Volney, etc.

A complete edition of his works was begun by his son 'Ali Ekrem. But his scheme was too ambitious and he broke down in the middle of it. The biography of Kemâl promised by 'Ali Ekrem has, so far as I know, not yet appeared. It is unfortunate that the essay on Kemâl's place in literary history by Dr. Rizā Tewfik has not yet been published.

Constantinople 1632; Eshref, *Hasb-i Hāl yakhoa Eshref we-Kemāl*, Constantinople 1908; Emin 'Othmān, *Hādikatü'l-Üdeba*, Constantinople 1299 and 1327; Shehāb al-Din Süleimān, *Tārikh-i Edebiyāt-i 'Othmāniye*, Constantinople 1328, p. 325—331; 'Abdū 'l-Halim Memdūh, *Tārikh-i Edebiyāt-i 'Othmāniye*, Constantinople 1306; Midhāt Djemāl, *Nefā'is-i Edebiye Manzūme Kismā*, Constantinople 1329; do., a drama *Kemāl*. The complete edition intended to fill 7 volumes which Kemāl's son, 'Ali Ekrem, undertook to edit in 1910/11 was, according to the prospectus, to be as follows: first series 1) *Renan Müdāfa'a Nāmesi*; 2) *Kara Belā*; 3) *Maḳāṭāt-i Siyāsiye we-Edebiye and Rüyā*; 4) *Waṭan, Gül-nihāl, 'Akif, Zā-wallī Çoçuk*; 5) *Esh'ar-i Kemāl*; 6) *Djelāl al-Din Khwāresm-Shah* with the *Mukaddeme*; 7) and 11) *Mekātīb-i Khushsiye*, 2 volumes correspondence; 8) *Ewrāk-i Perishān Medjmū'asī* (the biographies of Fātiḥ, Sultān Selim, Salāḥ al-Din Aiyūbi and of Emīr Newrūz; and *Devr-i Islā*); 9) *Müntakhabāt-i Muḥarrevāt-i resmiye*; 10) *Djesmū and Intibāḥ*; 12) *Takhib u-Takhrīb-i Kharābat* and the critical writings. Second series: *Medkhal* (introduction to history), *Tārikh-i Islām* and *'Othmanī Tārikhi*; further his scattered papers, his numerous translations etc.; of the first series there were published 1, 2, 3 (6 parts); of the second series 4 volumes of the Ottoman history. (TH. MENZEL)

KEMÂL-PASHA-ZÂDE, the usual name of the Ottoman historian, lawyer and stylist SHAMS AL-DIN AHMAD B. SULAIMAN B. KEMÂL PASHA, often also called Ibn Kemâl-pasha.

Kemâl-pasha-zāde belonged to a distinguished family of Adrianople where he was born as the son of the wealthy Süleimān Pasha. His grandfather was Kemâl-pasha who, like his father, had taken part in repeated campaigns against the infidels and attained great prestige (on him see *Sidjill-i 'Othmāni*, iv. 78). Kemâl-pasha-zāde served at first in Bāyazid's army but was induced to take up a legal career by an experience which is minutely reported by Tashköprüzāde. He was one day in the Grand Vizier's Diwān when Aḥmad, the son of Ewrenos [q. v.], entered and was received with great respect. Soon afterwards there appeared a man with shabby clothes and no head-dress, to whom the vizier, to Kemâl-pasha-zāde's surprise, showed even greater respect and even gave him the seat before the son of Ewrenos. He was the celebrated jurist Luṭfi of Toḳat (d. 904 = 1498). The ambitious youth, surprised at the preference shown to a müderris with 30 aspers over a nobleman of the empire, at once made up his mind to abandon the army and became Luṭfi's pupil. The latter lectured at the Dār al-Hādith in Adrianople together with other celebrated professors, like Kaṣtallānī [q. v.], Khaṭīb-zāde, Mu'arrif-zāde, on Muslim law subjects. After completing his studies, Kemâl-pasha-zāde was appointed teacher in the far famed medrese of 'Ali Beg in Adrianople but was soon afterwards summoned to Üsküb as müderris, finally to return to Adrianople to the Ḥalabiya medrese. After a great deal of hostility from the Chief Justice Hādjdji Hasan-zāde, who was jealous of all rising talent and put every obstacle in its way, he was appointed by the Sultān, on the advice of the poet Mu'ayyed-zāde (*takhallus* Hātīmī, d. 922 = 1516), teacher in the Tashliḳ High School (= 'Ali Beg Medrese) at

Adrianople on a salary of 30,000 aspers. The influential patronage of Mu'ayyed-zāde procured him all sorts of liberties, so that he was able to spend some time in Sofia and some time in Dupnitsa (Bulgaria), to carry out with the greatest leisure the composition of the Ottoman history entrusted to him by the Sultān and at the same time to write the most varied works, sometimes on law, sometimes on history, sometimes on poetry and sometimes on rhetoric. Over 300 treatises etc. are said to have come from his pen in this period.

In the reign of Sultān Selīm I, Kemāl-pasha-zāde in 1516 finally attained the rank of military judge of Anatolia and in this office accompanied the Padishāh on his Egyptian campaign. On the march he was commissioned to translate into Turkish, among other things, two works of the Arab historian Abu 'l-Mahāsīn b. Taghrībirdī [q. v.] on the lands of the Caliphs. Every morning he handed his master an instalment of the translation, which, according to Ḥādījī Khalifa (N^o. 5,878 and 13,616), was called *al-Kawākib al-Bāhira min al-Nudjūm al-Zāhira* (on this cf. Brockelmann, *G.A.L.*, ii. 42), and took the opportunity to enlighten the Sultān regarding the feeling in the army through a soldier-song, made up by him, expressing the desire for a speedy return home. Although Selīm saw through the plan, he pardoned the poet and even gave him a present of 500 gold pieces as a mark of honour (cf. J. v. Hammer, *Gesch. des osm. Reiches*, ii. 519; H. F. v. Diez, *Denkwürdigkeiten aus Asien*, i. 283; also the *Defterdār* Abu 'l-Faḍl's supplement [*Dhail*, part 4] to *Heṣht Behišt* of his father Idris Bitlisī, MS. of the Vienna National Library H. O. 16 d., fol. 126). After the return home, Kemāl-pasha-zāde resumed his old position as teacher in the Dār al-Ḥadīth, then at the Bāyazīdiya in Adrianople and at the same time resumed his scholarly and poetical activities. On the lines of Sa'dī's *Bustān* and *Gulistān* he wrote in Persian the *Nigārīstān* (i. e. "picture-gallery") (cf. Ḥādījī Khalifa, *Kashf al-Zunūn*, vi. 381, and *Der Islam*, vii. 118; extracts in German are given by Count v. Harrach in the *Fundgr. des Orients*, i. 401 sqq., ii. 107 sqq., iii. 47 sqq.). Kemāl-pasha-zāde is the author of an Ottoman history which begins in the year 886 (accession of Bāyazīd II) and goes down to the first Hungarian campaign of Suleimān the Great in 933. Manuscripts of the complete work seem to be exceedingly rare. The Sächsische Landesbibliothek in Dresden seems to have most parts of it (cf. J. H. Mordtmann's collation in *Der Islam*, xiii. 153 sq.), while in Vienna, for example, there are only fragments of the whole work which was perhaps written and issued in separate parts dealing with particular periods from time to time (part at least as early as the reign of Bāyazīd II) (cf. G. Flügel, *op. cit.*, ii. 220; on the work cf. Ḥ. Khalifa, *Kashf al-Zunūn*, ii. 111, N^o. 2153). An edition would be very desirable and of considerable value in solving the problems of the old Ottoman chronicles. That Kemāl-pasha-zāde prepared a translation of the *Heṣht Bihīšt* of Idris, as is stated in the *Ulmīye Sālnāmesi*, p. 347, is probably a mistake. Kemāl-pasha-zāde subjected the campaign of Mohács to a very full review, which was published for the first time with a French translation by Pavet de Courteille (*Hist. de la Campagne de Mohacz*, Paris 1859). There is a very good manuscript of it in the Dresden Public Library.

His poetical masterpiece is the story of Yūsuf and Zulaikha often dealt with before (e. g. by Ḥamdī, q. v.) and after him, but his treatment of the subject is peculiarly felicitous; his other poems, in which his sharp wit much admired in his lifetime and his intellectual nimbleness are revealed, are collected in a separate *Dirwān* which appeared in 1313 in Stambul (cf. Gibb, *Hist. of Ottoman Poetry*, ii. 347—363, where a full appreciation of his literary activity is given). He further wrote a number of philological works of which we may mention here a dictionary to elucidate difficult Persian phrases, called *Daḡā'ik al-Ḥaḡā'ik* (cf. G. Flügel, *op. cit.*, i. 130). Of legal works special mention must be made of his *Risāla fī Ṭabaḡāt al-Mudjtahidīn* which deals with the various classes of jurists (cf. G. Flügel, *Die Klassen der hanefit. Rechtsgel.*, in the *Abh. der Kgl. Sächs. Gesellsch. der Wiss.*, 1861, viii. 279, 280, 281, 346; MSS. of it in Vienna; cf. G. Flügel, *Die arab., pers. u. türk. Handschr. . . zu Wien*, ii. 612).

He left a vast number of commentaries on the *Ḥidāya*, *Taḡrīd*, *Miftāh*, *Tahāfut*, notes on the *Kur'ān*, marginal notes on the *Kashshāf* etc. which are represented in most eastern collections of Oriental MSS. (cf. e. g. G. Flügel, *op. cit.*, i. 130, 132, 133, 251, 291, 524, 710, 714, 722, 723; ii. 220, 221, 612; iii. 179, 215 sqq.; list of several treatises in Ahlwardt, *Berliner Kat.*, i. 12, N^o. 19; collection of 59 treatises in the *Fihrist al-Kutub al-'Arabiya al-mahfūza bil-Kutubkhāna al-khadiwiya al-Misriya*, vol. vii., Cairo 1309, p. 435—444; also *Defter-i Kutubkhāne-i Aya Şöfya*, Stambul 1304, N^o. 4794, 4797, 4820; *Defter-i Kutubkhāne-i Laleli Dīami*, Stambul 1300, N^o. 2433, 3645, 3647. A collection of 36 treatises entitled *Rasā'il* appeared in two parts at Stambul in 1316 (Ikdam-press); cf. *Zeitschr. d. deutsch. morgenl. Ges.*, lvi. 525.

He even wrote on the subject of *bāh*, as his *Kitāb Rudjū' al-Shaikh ilā Shibāh fī 'l-Kuwwa 'alā 'l-Bāh* shows (printed Cairo 1316 and 1335; Turkish version: lithogr., n. d., 90 pp. in 8^o).

Kemāl-pasha-zāde died on Shawwāl 2, 941 (April 6, 1535), at Stambul and was interred outside the Adrianople Gate in the monastery of Maḥmūd Ćelebi, where one of his pupils, Maḥmūd Bey, who died as Kaḍī of Cairo, erected a stone monument to his memory. Three chronogrammatic verses (*ta'rīkh*) in Arabic were inscribed on his coffin, his shroud and his tombstone, the numerical value of which was each 941 (cf. *Ḥadīkat al-Djāwāmi'*, i. 180, 181, and Ewliyā Ćelebi, *Şiyāhat-nāme*, i. 345, esp. 359; cf., on the other hand, J. v. Hammer-Purgstall in the *Z.D.M.G.*, vi. 282, and *Sitzungsber. der Wiener Ak. der Wiss.*, 1851, vi. 326—328, according to which the date is 940, which is certainly an error).

Bibliography. In addition to the sources quoted above see the life of Kemāl-pasha-zāde in Taḥṣīkprizāde, *Shakā'ik al-Nu'māniya*, Stambul 1269, p. 381—385; Th. Chabert, *Laṭīfī*, Zürich 1800, p. 79; J. v. Hammer, *Gesch. des osm. Reiches*, iii. 635; do., *Gesch. der osm. Dichtk.*, ii. 205 sqq.; Brusall Meḥmed Tāhir, *Osmānī Mükellifi*, i. 223; *Ulmīye Sālnāmesi*, Stambul 1334, p. 346 sq.; Meḥmed 'Arif Bey in the *Revue Historique Ottomane*, p. 1411 sqq.; C. Brockelmann, *Gesch. der arab. Lit.*, ii. 449—453 (where most of his works are given under their titles). (FRANZ BABINGER)

KEMĀL RE'İS, Turkish corsair and sea-captain during the reign of Bāyazīd II. In his youth he had been given as a present to the Sultān by the Kapudan Pasha Sinān, after which he was brought up as a page at the court. He began his career as a chief of 'azabs, then took to the Mediterranean and captured in 892/1487 a Maltese Prince (*Sidjill-i 'Othmāni*, iv., 78). In 896/1490, by order of Bāyazīd, he raided the Spanish coast in order to support the last Nasrid of Granada Mulay Hasan, who, in his critical situation had invoked the Sultān's aid. This expedition is only recorded by Hādjdji Khalifa in his *Takwīm al-Tawārīkh* but not in his Story of the Naval Wars (*Tuhfat al-Kibār*) and it seems to be unknown to the other historians; in any case it cannot have been of much importance in view of the great difficulties of the Ottoman Empire occasioned at the time by the wars against Egypt and Austria. In 903=1497/1498 we find Kemāl Re'is marauding in the Eastern part of the Mediterranean with other corsairs; he took several Christian ships and brought his booty to the bey of Alexandria ('Ashīk Pasha Zāde, p. 250); at this time therefore he probably was not serving the Sultān. But in the war of the Turks against Venice (905/1499) he was one of the admirals of the fleet. The Turkish fleet had three newly equipped unusually large battleships (turkish: *kūke*) of which one was commanded by the Kapudan Pasha Dā'ūd, and the two others by Kemāl Re'is and Burāk Re'is (Münedjdjim Bashi writes Budāk, so also Leunclavius: Budacus). In the naval battle of Sapienza (28 July 1499) the Venetians took the latter's ship for that of Kemāl Re'is on whom they particularly wanted to take revenge. Burāk Re'is was boarded by two big and some smaller Venetian ships; he defended himself with burning naphtha, until he, and his enemies, were blown up together: the island of Sapienza was called after him Burāk Re'is Adası. After this battle the Turkish fleet took Lepanto (İne-Bakht). In the next year, after the towns of Koron and Modon had been taken by Turkish sea-power, Kemāl Re'is was sent with 40 ships to Navarino (Turkish Awārīn) of which town he captured the citadel from the Venetian commander Contarini. He died, according to Sāmi (*Kānūs al-A'lām*, v. 3886), in the beginning of the xth century, perishing by a ship-wreck (*Sidjill-i 'Othmāni*).

(J. H. KRAMERS)

KEMĀNKESH (i. e. "Archer") 'ALĪ PASHA, an Ottoman Grand Vizier. He was born in the Anatolian district of Hāmid-eli [q. v.], came early to Stambul, where he was brought up in the imperial palace. In 1030 (1620/1621) he was appointed governor of Diyār-bakr and soon afterwards of Baghdad. Next year he was given the rank of third vizier of the dome (*kubbe vezīri*). In Dhu 'l-Kāda, 1032, he was given the imperial seal in place of the dismissed Grand Vizier Mere Ḥusain

Pasha, mainly through the efforts of the Shaikh al-Islām Yahyā Efendi, but also as a reward for his readiness in assisting in deposing the incapable and imbecile Sultān Muṣṭafā I. Kemānkesh 'ALĪ Pasha, weak, timid and common in character, began by getting rid of his enemies and rivals by throwing the viziers Gurdji Mehmed Pasha and Khalil Pasha into prison and dismissing the Mufti Yahyā. His greed and avarice prompted him to the most contemptible embezzlements and frauds on the Treasury; he had coins minted with a slight proportion (barely one-fifth) of silver, put the pay of the Janissaries into his own pocket and in other ways let the state go to ruin. Within six months he had made a huge fortune by depreciating the currency and selling offices. Sir Thomas Roe who describes the Grand Vizier at his accession to office in a despatch of August 23, 1623, as "a man quietly honest, but of untried and therefore suspected ability for so great a charge" (cf. *The Negotiations of Sir Th. Roe in his Embassy to the Ottoman Porte, from the year 1621 to 1628*, London 1740, p. 173) talks on April 3, 1624, of "his owne sordid covetousnesse, who in six months had heaped up infinite treasure, by portsale of all justice and offices, which hath weighed him to the ground" (*op. cit.*, p. 230) and a Venetian report of August, 1624, puts his wealth at a "somma di 700,000 scudi in contanti, molto opportuna" (cf. J. v. Hammer, *G. O. R.*, v. 21).

The terrible state to which the empire was reduced (rebellions in Asia Minor and Egypt, the threat from Persia, the fall of Baghdad on November 28, 1623, concealed from the Sultān, Stambul without food, the currency depreciated, the treasury exhausted, the Janissaries out of hand) aroused to the highest pitch the wrath of the youthful Murād IV against the Grand Vizier responsible. Kemānkesh 'ALĪ Pasha was summoned to the palace on Djumādā II 14, 1033 (March 24, 1624), and summarily beheaded. His body was buried in the forecourt of the mosque of 'Ātik 'ALĪ Pasha (cf. *Hadīkat al-Djāwāmi'*, i. 150; J. von Hammer, *G. O. R.*, ix. 75, No. 312). His successor was Čerkes Mehmed Pasha. Kemānkesh 'ALĪ Pasha was married to a daughter of the celebrated Kaḍī-asker and Shaikh al-Islām, Bostānzāde Mehmed Efendi.

(FRANZ BABINGER)

KENĀ, a town in Upper Egypt, on the east bank of the Nile (23,357 inhabitants in 1917 against 17,485 in 1875, 15,402 in 1884 or 27,500 in 1897). It is the capital of the province (*muḍiriya*) of the same name which is divided into seven districts (*markaz*), namely: 1. Dishnā, 2. Isnā, 3. Kenā, 4. Kuṣair, 5. Kūš, 6. Luṣsur, 7. Nadj^c Hāmādī. In 1897 the population of the province was 711,457 of whom 120,330 are in the province of Kenā. — The region produces cotton and cereals; in the town, cloth and sweet-stuffs are manufactured. But Kenā is especially noted for its porous pottery; the jars (*kulla*) which are made there are called

ballāṣ from the name of a place a few miles to the south.

The Arabic name, written *Ikṇā* by some geographers and *kūnā* in the Copto-Arab *scalae*, comes from the Coptic **ΚΩΝΗ** which give rise to a play on the Greek *καινή πόλις* "new town", a name which did not last long as it is never found in the Byzantine period. The identity of this town with the Neapolis of Herodotus has been seriously urged; it is rather the modern Minshā'a, the ancient Ptolemais. On the other hand it has been conjectured with much probability that at the end of the third century it received the name Maximianopolis.

In the first Arab period, the *kūra* of *Kenā* extended to the east of the Nile between that of Fāw on the north and *Ḳifṭ* in the south, in front of that of Dandara from which it was separated by the river. The first author to mention it, Ya'qūbī, gives a very unflattering description of the district: he says it is a little town rapidly going to ruin, deserted by its inhabitants who feared the raids of the Beduin robbers and brigands. Therefore when the new provincial divisions were made under Mustanṣir it was *Ḳūṣ* which gave its name to the district (*'amal*) and became its capital. *Kenā* remained unimportant for some time as Yaḳūt only gives it a brief note and Abu 'l-Fida' does not mention it.

Its prosperity was not long in beginning owing to the tomb of the saint 'Abd al-Raḥīm which became an object of pilgrimage while pious Muslims settled in its vicinity. Some years previously Ibn Djbair had mentioned *Kenā* as a pretty little town with houses of a dazzling whiteness; he makes special mention of the virtue of the women who never appeared in the streets. After Ibn Baṭṭūṭa, Aḍfuwī gives us an account of the merits of 'Abd al-Raḥīm; he describes the houses of the town as spacious and very high and mentions two *madrasas* in *Kenā* and a number of hospices (*ribāṭ*), Ibn Duḳmāk only copies Aḍfuwī. In the Turkish period *Kenā* was the residence of a *Kāshif* but it is only in modern times that it has assumed the administrative position which it owes to its present steadily increasing prosperity.

The town situated at the point where the Nile comes nearest to the Red Sea had become the point of departure for caravans in the direction of *Ḳuṣair*. This route took the place of the one used in the middle ages between *Ḳūṣ* and 'Aidhāb which in turn succeeded the ancient Copto-Berenice road. The continual intercourse between Egypt and Arabia and India gave these roads great value: it is by this route that many of the Muslims of North Africa go to Mekka and even during the Crusades it was the only pilgrim road. In 1831—1833 Muḥammad 'Alī had the wells inspected on the *Kenā-Ḳuṣair* road; some were deepened so that they would provide water at all seasons (cf. *L'Égypte Moderne*, collection *L'Univers*, p. 164—166; Barron and Hurne, *Top. and Geology of the East Desert of Egypt, Central Portion*, Cairo 1902).

The saint who is the object of Muslim veneration, 'Abd al-Raḥīm b. Aḥmad b. Ḥajjīdjūn, twelfth descendant of Dja'far al-Ṣādiq, was born in the environs of Ceuta in Morocco. After a journey to Mekka where he spent seven years he settled in *Kenā* and died there on Ṣafar 9, 592 (Jan. 13,

1196). Honoured during his life for his reputation for sanctity and asceticism he has become one of the principal saints of Egypt along with Aḥmad Badawī, Ibrāhīm Dāsūḳī and Abu 'l-Ḥajjīdjādī Ak-surī. At one time a pious formula used to be handed down which if recited beside the tomb hastened the realisation of a desire or brought about cures. According to some travellers, the pilgrims who came to *Kenā* made circuits (*ṭawāf*) of the tomb of 'Abd al-Raḥīm similar to those made by the pilgrims at the Ka'ba (Aḍfuwī, *Ṭālī' Sa'id*, N^o 231; Goldziher, *Muh. Studien*, ii. 315; *R.H.R.*, ii. 284; Gaudefroy-Demombynes, *Le pèlerinage à la Mekke*, p. 224). — There were descendants of 'Abd al-Raḥīm living in Egypt for two centuries: they were particularly jurists and professors (Aḍfuwī, Nos. 29, 117, 129, 308, 402, 405, 476, 553; al-Maḳrīzī, *Khīṭaṭ*, ii. 423).

Wright-de Goeje, p. 67; Yaḳūt, iv. 178; Ibn Baṭṭūṭa, i. 106; Aḍfuwī, *Ṭālī' Sa'id*, p. 7—8, 19; 'Alī Pāshā, *al-Khiṭaṭ al-Djādida*, xiv. 120—125; Sour-dille, *Durée du voy. d'Hérodote*, p. 153—159; Baedeker, *Égypte*, p. 237, 243; Massignon, *Sec. note sur l'état d'avancement des ét. archéol. ar.*, from the *B.I.F.A.O.*, ix. 6; Massignon, *Annuaire du monde musulman*, 1923, p. 120; J. Maspero and G. Wiet, *Matériaux pour servir à la géogr. de l'Égypte*, p. 130, 147—149, 153, 173, 175, 177—182, 184, 185—191; al-Batānūnī, *al-Riḥla al-Ḥijāziya*, p. 31—32.

(G. WIET)

KEN'ĀN PASHA, also called ṢARĪ K. PASHA, an Ottoman Grand Admiral. He was a Russian (? Circassian) by birth and came as a slave into the service of Baḳīrdjī Aḥmad Pasha, Ottoman governor of Egypt. On the latter's execution he was taken by Sulṭān Murād IV into the Serai and educated there. He was promoted to be Agha of the stirrup-holders (*Rikāb-dār aghasi*) (Chronicle of Wedjīhi, fol. 91^b of the Vienna MS.), became a favourite of Sulṭān Ibrāhīm after his accession (Febr., 1640) and married his daughter 'Ātike Sulṭāne. He was at the same time appointed third vizier but banished soon after Ibrāhīm's death (Aug. 18, 1648) to Crete. In Sept., 1652, he returned to Stambul and was appointed to the charge of the defences of the Dardanelles. On Sept. 9, 1653, he was given the governorship of Ofen, but deprived of it on Sept. 22, 1655, and on Febr. 9, 1656, appointed governor of Silistria. On May 3 of the same year he was appointed Grand Admiral (*Ḳapudān Pasha*, q.v.). On June 26, 1656, while in command of the Ottoman fleet sent out against the Venetians, he suffered a severe defeat in the Dardanelles, the greatest naval reverse inflicted on Turkey since the battle of Lepanto (cf. J. v. Hammer, *G.O.R.*, v. 649 sqq.). The whole weight of the Sulṭān's wrath fell upon Ken'ān Pasha who was immediately thrown into prison. He was finally released on the intercession of his Russian countrywoman, the Sulṭāna-mother (Kösem Wālide; q.v.) but was dismissed from the office of Grand Admiral almost immediately, on July 18, 1656. Two years later, on June 23, 1658, he was appointed *Kā'im-maḳām* [q.v.] but the very next month, on July 16, 1658, dismissed again and sent to Brusa as commander of the garrison (*Muḥāfiṣ*) (cf. J. von Hammer, *G.O.R.*, vi. 37; Na'imā, *Tārīkh*, first ed., ii. 660). He set out from here by arrangement with the Anatolian rebel 'Abāza Ḥasan with whom

he closely allied himself, only to share his fate, treacherous assassination, on Febr. 17, 1659, in Aleppo (cf. Na'imā, *Tārīkh*, ii. 685). His head was brought to the *Diwān* in Stambul on March 9, 1659.

If this is the Ken'an Pasha mentioned by Ewliyā Čelebi, *Siyāhat-nāma*, iii. 366 (and he certainly never was governor of Oczakov any more than was Kōdja Ken'an Pasha [d. 1062 = 1651/52] who is also often confused with the Grand Admiral e.g. in the *Sidjill-i 'Othmānī*, iv. 83), he was also an author and composed a *Şaltık-nāma* in honour of Şarī Şaltık Baba [q. v.]. His own warlike exploits, especially his military operations in the years 1036—1038 (1626—1628), were celebrated in a rhymed *Pasha-nāma* by the poet and judge Tulū'ī Ibrāhīm Efendi (of Kaḳkandelen) of which there is a copy in the Brit. Mus. (Sloane MS. 3584); cf. Ch. Rieu, *Catalogue of the Turk. MSS.*, p. 191 sq., with detailed summary of contents. The possibility that it celebrates the above mentioned Kōdja Ken'an Pasha who had a very similar career to his namesake and contemporary (both were, for example, governors of Ofen) has always to be remembered. The biographical data regarding Şarī Ken'an Pasha are much confused, as the article on p. 65 sq. in Rāmiz Pasha-zāde Mehmed, *Khariṭa-i Kapudānān-i Deryā* (Stambul 1285) and Sāmī Bey Frasherī, *Kāmūs al-A'lām*, p. 3900, who follows it, show. According to this authority, Ken'an Pasha was buried beside the school not far from Kırık Česhme.

KENEZ. [See KNEZ].

AL-KERAK, a fortress east of the Dead Sea in the ancient Moab. The name goes back to the Aramaic *karkhā*, "town", which the Targum gives for *ķir* in the Moabite place-names Kīr Mō'āb (Is., xv. 1) and Kīr Hārās (Hārāsāt; Is., xvi. 7, 11; Jer., xlviii. 31, 36). It is found as *Χαρχα* in Ptolemy (v. 16, 4) on the mosaic map of Mādaba, in Stephanus Byzantinus, etc. Its situation on a steeply sloping spur only connected by an (artificially deepened) saddleback with the main ridge makes al-Kerak an unusually strong fortress. It is remarkable that it is not mentioned in connection with the Muslim conquest of the East Jordan country or in the following centuries; only with the Crusading period, after it had been fortified by King Fulco's former cupbearer, Payan, does it begin to play a part, and that a prominent one. The Christians of that time, who were not well read in geography, sought the ancient Petra here and called it Petra deserti. As it commanded the pilgrim road from Damascus and all traffic between Syria and Egypt, it caused the Muslims much trouble and was therefore repeatedly but vainly besieged from 565 (1170) onwards by Nūr al-Dīn and Şalāh al-Dīn until finally it was so starved out that the garrison surrendered in 584 (1188) to Şalāh al-Dīn's brother al-Malik al-'Ādil, to whom it was allotted after Şalāh al-Dīn's death. In the years that followed it belonged to various Aiyūbids and even after the rule of most kings

of this family was over, al-Mughith 'Umar still held out in al-Kerak until Baibars captured it by treachery and put him to death (661 = 1263).

Behind the strong walls of the fortress the Mam-lūk Sulṭān Nāşir found shelter in 708 (1309) when he escaped from Cairo to found a real power. At this time al-Kerak was capital of one of the *mamlakāt* into which Syria and Palestine were divided; its territory lay chiefly to the south of it. How powerful the fortress, the majority of whose inhabitants were still Christian, then was, is seen from the descriptions by al-Dimashķī, Yāqūt, al-'Umari and Khalil al-Zāhirī. Under Turkish rule it lost its importance until quite modern times when the Ottoman government put a strong garrison into it and made al-Kerak capital of a separate administrative district. The walls date mainly from the middle ages, while the lower strata go back to an older period.

(FR. BUHL)

KERBELĀ'. [See MESHED HUSAIN].

KERČ (KERTCH), a town and fortress on the Crimean peninsula; according to the census of 1897, it had 28,982 inhabitants. In ancient times it was the site of the Greek colony of Pantikapaion, later called Bosphoros as the capital of the Bosporan kingdom, from the end of the seventh century the residence of the Khazar governor (with the title Tudun) of the eastern part of the Crimea (the western with the capital Khersonesos still belonged to the Byzantine empire). The name Kerč first appears in Muslim sources and is variously written; to the references to the texts (for the forms Karz and al-Karsh) in J. Marquart, *Ost-europäische und ostasiatische Streifzüge*, Leipzig 1903, p. 506, may be added Rukn al-Dīn Baibars in W. Tiesenhausen, *Sbornik Materialov, otnosyashchikhsya k istorii Zolotoi Ordz*, St. Petersburg 1884, p. 89, 5 (there Kardj). In Marquart, *op. cit.*, the derivation of the name from the Greek *Kόπιζος* or *Kupiζος*, "as a monastery near Kerč is called", proposed by Russian scholars (Wassilyewski, Bruun, Kunik, Harkavy), is also given. In old Russian sources the town is called Korčew; for example in the well known inscription of the year 6576 (1068) quoted by Karamzin, *Istoriya gosudarstva Rossiyskago*, ii., note 120).

After the final destruction of the Khazar empire by the combined forces of the Byzantines and Russians about 1016 the eastern part of the Crimea with Kerč belonged to the Russian principality of T'mutarakan, the capital of which of the same name lay on the peninsula of Taman opposite

Kerč. About a century later the possession of the steppe territory passed to the Kıpçak or Komans and that of the seaports to the Byzantines. As Yu. Kulakowski (*Proshloye Tavridy*², Kiev 1912, p. 93, on the authority of Miklosich and Müller, *Acta et dipl. gr. medii aevi*, iii. 25, suggests, the town of *Πορσία* mentioned in the treaty of 1169 between the Emperor Manuel Komnenos and the republic of Genoa is to be identified with the Russian Korčew. From the xiiith century the Crimean peninsula belonged to the Tatar kingdom of the Golden Horde; in the year 698 (Oct., 1298—Sept., 1299) Kerč with some other towns of the Crimea was destroyed by Noghai to avenge his grandson who was killed in Kafa (Tiesenhausen, *op. cit.*). In the xvth century Kerč came into the hands of the Ottoman Turks. After the conquest of Azov, Peter the Great, during his stay in Vienna in 1698, asked that Kerč should be ceded to Russia by the Turks in the peace negotiations then about to begin. But this demand was not granted. After the peace of Carlowicz concluded in the same year, Kerč remained in the hands of the Turks (J. von Hammer, *Geschichte des Osmanischen Reiches*², iii. 909; S. Solowyew, *Istoriya Rossii, izd. tovar. Obshchestv. Pol'sa*, iii. 1171). On account of the danger threatening from the Russians, Sultān Muṣṭafā II in 1702 had a new fortress built not far from Kerč (now Yeni-Kale) (v. Hammer, *op. cit.*, iv. 47). In 1771 Kerč and Yeni-Kale were occupied by the Russians without resistance; Abaza Pasha, who was sent to defend Yeni-Kale, did not once dare to expose his troops and returned to Sinope (*op. cit.*, iv. 622; Solowyew, *op. cit.*, vi. 738). The cession of Kerč demanded by the Russians during the peace negotiations in Bukharest (1773) was steadily refused by the Turks (v. Hammer, *op. cit.*, iv. 638) but had, however, to be granted after the treaty of Küçük Kainardje (1774). Henceforth Kerč was a Russian fortress of the second class; during the Crimean war it was occupied by the Allies in May, 1855.

The town, which is world-renowned for its monuments of the Greek, Roman and early Christian periods, had no longer the same importance in the Muhammadan period and has therefore no Muslim buildings of importance.

(W. BARTHOLD)

KERESÜN (ancient *Κέρασσος*, Cerasus), on the maps Kerassoude, a town and harbour in Asia Minor, on the Black Sea. It is the chief town of a *kaṣā* of the wilāyet and the sandjak of Trebizond, 70 miles west of this last town. The population is 8,440 (3,588 Muslims; 3,906 Greek orthodox and 946 Armenians). It is built at the end of a rocky cape. The botanist Tournefort found still there the forest of cherry-trees which gave their name to the town, for it was from there that Lucullus imported them to Europe. This source of revenue is now replaced by the export of nuts (5,000,000 lbs. produced annually) and of beans (a million okes = 2,825,000 lbs. annually). There are ruins of the ancient walls, of a citadel and of a city-gate. The remains of an amphitheatre may be seen some distance off. The ruins of a mole to the north of the town could be cleared away at small expense and the area made into a harbour which would facilitate the export of the produce of the provinces of the interior. The town contains 11 mosques, 1 tekke, 9 Greek churches, 2 Armenian churches; it has

also barracks and an arsenal. — The Kerasos of Xenophon lay in the valley of the Keresün-dere: the present town is built on the site of the one founded by Pharnaces I, grandfather of Mithradates VII, King of Pontus, who called it Pharnaceia after himself.

The *kaṣā* of Keresün includes 138 villages and 4 *nāhiya*'s; it has a temperate maritime climate; mountains of volcanic origin, covered with forests, cover about half the area of the district. The inhabitants are fishermen on the coast and miners in the interior (mines yielding argentiferous lead, iron, copper and antimony). The total population is 64,526 (51,704 Muslims and 11,884 Greek Orthodox).

Bibliography: 'Alī Djawād, *Dioghrāfiya lughātī*, p. 658; V. Cuinet, *Turquie d'Asie*, i. 73 sqq.; Ch. Texier, *Asie Mineure*, p. 619, col. 1.

(CL. HUART)

KERKHA, a river in Khūzistān, whose sources lie to the east and south of Nihāwend in 'Irāk 'Adjamī. The Āsham-i Kāzīm is regarded as the source proper and rises in the Kūh Čihil Nablighān. The map shows a little stream called Sura Kunč here, which receives the Kar Sara from the east, then near Nihāwend the Āb-i Kulan from the east which rises in the Kūh-i Ferūzan and next the Sirwān Rūd from Dawlatābād. In this district the river is known as the Gamasāb, more accurately Gamasiāb (corrupted to Garasiāb).

The direction of the river, at first N. W., gradually changes to the west. Before it reaches Bisutūn it is joined by the Shādju Rūd reinforced by the Kangarshāh. It then turns to the south and is joined by the Kara Šu, the river of Kirmānshāhān and later by the Āb-i Karind, which itself has a number of important tributaries. While the tributaries so far mentioned are all on the right side, on the left it has the Kashgan Rūd which has as tributaries the Madian Rūd on the right and the Rūd Khorramābād with the Rūd Kulkū on the left. Next come, also on the right, the Lailum Rūd and the Āb-i Zāl. The direction of its course now changes from southern to westerly for a short stretch and then to south-west. On this latter stretch the river is called the Kerkha (Karkha), a name which it temporarily exchanges between Lailum Rūd and Āb-i Zāl for the name Āb-i Šaimere. This name preserves the name of the town Šaimara [q.v.] which lay west from the river and some distance from it. After the confluence with the Āb-i Zāl the river again turns southwards; as soon as the region of Pā-i pul is reached we have canals linking it with the Āb-i Diz and its tributaries, the Nahr Tabal Khan and the Nahr Daghdari. The ruins of Susa lie on one of the eastern watercourses which is later called R. Shawr. The Kerkha ends its course in the region south of Nahr Hāshim, where it receives the water of the Shaṭṭ al-Djamuz. At an earlier period the river ran north-west from here to Hawiza (Huwaiza).

Among the roads which follow the course of the river from time to time, we may mention the great highway connecting Hamadhān and Mesopotamia in the region of Bisutūn, and also the road from Hulwān to Šaimara.

The ancient geographers called this river the Choaspes. The name Kerkha is not found in the Arab geographers; according to Rawlinson, it first appears in a xivth century Persian text. It is, however, probably older. Ibn al-Athīr mentions a

Karkhānā under the year 553 (1158). If the reference is to this river the name must go back to the xiith century. Ibn al-Athīr, who usually avoids geographical details as much as possible, must have taken the name from an older contemporary source. Karkhānā must be Aramaic and mean "the [river] of Karkhā" i.e. Karkhā de Lēdan.

The river is certainly not mentioned in the Arab geographers although not by name. According to Ibn al-Fakīh, a particularly esteemed kind of black sealing-clay was obtained on its bank near Nihāwēnd. The "large river" near Bisutūn mentioned by Ibn Rosteh must also be the Gamasiāb. The bridge between Šaimara and Tarhān, considered a marvel of architectural skill, may also correspond to the Pul-i Khusrāw over the Kerkha. The Kerkha is usually called the "river of Sūs", e.g. as early as Ibn Khordādhbih. The geographers have no reliable information regarding its sources; Ibn Khordādhbih says it rises in Dinawar and Ibn Wāḍih at Hamadhān, which is true, at least for the tributaries of the Gamasiāb, if we take these names to refer to provinces. The river, according to the Arab geographers, flows into the Dujail of Ahwāz. Mention is made of the fact that at high tide the river is about two *mil* broad at Sūs. According to Ibn Wāḍih, the river was called Hinduwān. Probably the "river of Bašinnā" or "Dijlā of Bašinnā" which drove 7 water-mills and ran a bowshot from the town of Bašinnā, mentioned by al-Mukaddasī and Yāqūt, is identical with the Kerkha.

KERKINA (KERKENNA), a group of islands off the eastern coast of Tunisia on a level with Sfax in 34° 35'—34° 50' N. Lat. An arm of the sea about 25 miles broad and full of shallows which make navigation impossible for ships of large tonnage separates them from the coast. The islands are two in number — Sharkī (Charki; the Cercina of the ancients) to the N. E. and Ġharbī (Cercinitis) to the S. E. The first is 15 miles long and 4½ miles broad on an average. The coast is much indented and fringed on the north with small islands. The second, more massive in form, is 10 miles by 4½. The strait which separates them is only 1000 yards across so that in ancient times it was possible to join them by a bridge. Barley, wheat, lentils, the vine and large areas of *halfa* (*Lygeum spartum*) are grown on the islands. The population, which consists of Berbers mixed with foreign elements and has never been organised into a tribe, amounts to 8,000 people. The natives live in numerous villages especially on Charki or scattered in isolated dwellings. They follow agriculture and stock-breeding, make ropes, mats, basket-work, etc., but the main industry is fishing. The shallows adjoining the islands are very rich in fish and sponges are gathered in abundance.

Traces of ancient buildings have been found in Charki; the episcopal register of Byzacene mentions an *episcopus Circitanus*. In the middle ages the

possession of the Kerkenna islands was on several occasions disputed between Christians and Muslims. The Normans of Sicily seized them in 540 (1145—1146) — according to al-Idrisī in 548 (1153—1154) — but held them for only a short time. In 1289 they were ceded by the Pope to Roger Doria who built a castle there. The descendants of Doria ceded them to the King of Sicily who entrusted their government to Ramon Muntaner (1311 A.D.). They were finally abandoned by the Christians in 1335. The Sicilians, however, once more made a descent on them in 1424 and carried off 3,000 prisoners.

KERKŪK. [See KIRKŪK].

KERKŪR, a heap of stones, especially a sacred heap of stones. The cult of heaps of stones is extremely ancient and distributed all over the world. It seems to come not from an act of litholatriy in the strict sense but from a rite of transference or expulsion of evil; the individual, picking up a stone, causes the evil of whatever kind that afflicts him to pass into it — as the case may be, fatigue, physical or moral suffering, sin, the dangerous power that attaches itself to a man in certain sacred neighbourhoods, or all these things together — and gets rid of it by throwing it or depositing it with the stone on a place suitable for absorbing it; the accumulation of these expiatory pebbles forms the sacred piles of stones which rise all along the roads, at difficult passes and at the entrances to sanctuaries. Alongside of these, the throwing or placing of a pebble or the building of a little pyramid of stone often becomes one of the obligatory rites of the pilgrimage and the rite losing its primitive character has been sometimes taken for a true offering-rite (cf. R. Dussaud's view, *La Matérialisation de la prière en Orient*, in the *Bull. et Mém. de la Soc. d'Anthr. de Paris*, 1906, p. 213—220). The kerkūr are often built at the place where a man has been killed and buried; this has been explained from the desire to bury more deeply a dead man whose spirit might be tempted to come out and avenge itself or, less plausibly, as a kind of homage to the dead; but this casting of stones can also be explained rather as a rite for the expulsion of evil (a dangerous place, the infection of death, proximity of disturbing magical forces). It appears therefore that we always find rites of purification in the origin of the kerkūr.

Pre-Islāmic Arabia knew the rite of casting stones and sacred heaps of stones. The rites of the ḥajj have preserved evidence of this. It may be asked if there is not a rite of this kind in the origin of the lapidations at Minā (for other explanations see the art. ḤADJ, ii. 201), and in any case, as G. Demombynes (*Le Pèlerinage à la Mekke*, Ch. i.) has recently shown, the raised

stones or *radjam* which stand at the *mawāḳit* marking the *ḥaram* of Mekka are exactly comparable to the kerkūr which are found from Central Asia to North Africa along the roads at points where one begins to approach the great sanctuaries; there are also examples of this practice to be found equally in Christian countries.

Islām found the cult of piles of stones in all or almost all the lands that it conquered and although orthodoxy looked askance at it, it had to accommodate itself, as to so many other popular practices, which owed their origin to paganism in the remote past. The kerkūr are especially numerous in certain regions, Syria for example, but nowhere has their cult been so developed and is so vigorous as in North Africa, especially in the south or Morocco, where it has been especially studied by E. Doutté. There, one may say, there is not a pass, or ravine or cross-roads which has not its little pyramids of stones or its great kerkūr to which every passer-by adds his pebble, not a rustic sanctuary but has its sacred piles of stones.

Sometimes the kerkūr itself, as in other cases a spring, a tree or a rock, has given rise to a sanctuary which has become islamised in a marabout fashion. It is also very common to find under the aegis of a saint several of these cults combined, — strange sanctuaries which perpetuate the ancient rites of paganism, still vigorous after twelve centuries of Islām.

Bibliography: The bibliography of the subject is very extensive. What is essential for the general point of view is given in Frazer, *Golden Bough*, third ed., part vi., *The Scapegoat*, p. 8—30, where also are given a certain number of references to Muslim countries; from the Muslim standpoint in Doutté, *Merrakech*, Paris 1905, p. 58—108; do., *Magie et religion dans l'Afrique du Nord*, Algiers 1908, ch. x. Since the publication of this last work, E. Westernmark, *The Moorish Conception of Holiness (Baraka)*, Helsingfors 1916, p. 26 sqq. (on Morocco). (HENRI BASSET)

KERMIYĀN. [See GERMIYĀN].

KERRĪ, a village and district on the right bank of the Nile, fifty miles north of Khartūm. In the xvth century the governorship of the surrounding territory was conferred by the Fündj ruler, 'Umāra Dunkās, on 'Abd Allāh Djāmā'a (d. 1554—1562) of the Arab tribe of Rufā'a. His descendants, the 'Abdallāb, maintained their position as a semi-independent dynasty with the title of Māndjil or Māndjilak until the Egyptian conquest, but transferred their seat from Kerrī to Ḥalfāyat al-Mulūk after the rise of Shendī in the latter part of the xviiith century.

KERSH. [See KERĈ].

KETĀMA (or KOTĀMA), one of the great Berber families; when Islām was introduced into North Africa, they occupied all the northern part of the modern department of Constantine, between the Awrās [q. v.] and the sea, that is the region containing the towns of Ikḍjān, Seṭif,

Bāghāya, Ngaus (Nikāwus), Tiguist (Tikist), Mila, Constantine, Skikda (Philippe-ville), al-Koll (Collo), Djidjelli [q. v.], Bellezma, and the part of Kabylia in the department of Algiers, i. e. the region between Wed Sahel and the Seban. One legend flattering the national pride makes them descended from the Ḥimyarites brought there by Ifriḳos. Katām, the eponymous ancestor of their race, was said to be the son of Bernes. He had two sons, Gharsen and Issūda, from whom are descended all the tribes of the Ketāma. They do not seem to have played a part in the civil and religious wars which desolated North Africa from the time of 'Ukba to the days of the Aghlabids; we do not find them among the Khāridjīs. When 'Ubaid Allāh gave himself out to be the Mahdī, his emissaries met some Ketāma pilgrims in Arabia and converted them to Ismā'īlī doctrines. The principal convert was Mūsā, chief of the Sakyān, a branch of the Djemila whose name survives in the town of this name. The missionary (dā'i) Abū 'Abd Allāh al-Shī'ī [q. v.] settled in Ikḍjān and succeeded in maintaining his position there in spite of the efforts of the Aghlabids. From there he was able to extend his conquests and to deliver the Mahdī who was a prisoner at Sidjilmāsa. The empire of the Fāṭimids was then founded with the help of the Ketāma. It was they who furnished its main strength and supplied the means of conquering Egypt. But these continual efforts exhausted them. Those who remained in the Maghrib after the exodus of al-Mu'izz were forced to submit to local rulers, as Ibn Khaldūn tells us. In our day the principal representatives of the Ketāma are the Zuwāwa of the Djurdjura and the population around Djidjelli and in Little Kabylia. We do not know at what date Ismā'īlī doctrines disappeared from among them but long afterwards their attachment to this teaching was regarded as a subject of obloquy and for this reason the powerful tribe of Sedwikish of Ketāma origin renounced all connection with this family. At the present day all the Berbers of this region are Sunnis.

Bibliography: Ibn Khaldūn, *Kitāb al-'Ibar*, iv. 32 sq., vi. 148—152; *Hist. des Berbères*, transl. de Slane, i. 291—299, ii. Append., p. 510 sqq.; Fournel, *Les Berbères*, ii. 51 sqq., and the authors quoted. (RENÉ BASSET)

KETKHUDĀ (p. *kedh* "house", *khudā* "master, lord"), originally meant the master of the house or head of a family; the name came to be given in Persia in the villages to the headman or bailiff and in the towns to the "dixenier de quartier" (Chardin, *Voyages*, 1811, iv. 77) or "district tithe-man", a kind of police officer whose duty it was to inspect his district and who was responsible to the *kalāntar* [q. v.]. The administrative reforms recently introduced into Persia have aimed at making the *ketkhudā* the representative of public authority (mayor) in the *ḡarya* (village), the smallest territorial division. Unfortunately these officials, whose duties were formerly confined to the levying of dues, are powerless in face of the great landed proprietors (*R.M.M.*, June 1914, xxvii. 194) whose stewards they are and who appoint them; there are, however, some villages where this agent is appointed by the governor or even elected by the inhabitants.

The word has passed into Ottoman Turkish where it has been corrupted to *kehaya*, *kiaya* and means the "steward of a house". *Esnāf kiaya-si*

is the chief or syndic of a workman's guild. The *kiaya kadin* is the first lady of the palace, the housekeeper who has charge of the domestic arrangements and the servants. The *kapu kiaya* is the representative, the agent of the governors of provinces at the Ottoman Porte. The name *dewlet kiaya-si* used to be given to an official whose function corresponded to the minister for home affairs in modern constitutions; *kul kiaya-si* was the inspector of the Janissaries, lieutenant of the Agha and his chief of staff, who could only be dismissed with the consent of the whole odjak; he himself had an agent with the Agha who had to transmit the chief's orders to the commanders of fortresses and was called *kiaya-yeri*, "the inspector's lieutenant".

KHĀ', the seventh letter of the Arabic alphabet, representing the harshest of the gutturals, with the numerical value 600. It belongs to the sounds peculiar to the Arabic alphabet (in which it is distinguished from *hā'* by a diacritical point), in so far as the Hebrew and Aramaic scripts do not distinguish it from *hā'*. In Aethiopian, on the other hand, *Kham* in contra-distinction to *Hawt* is denoted by a sign of its own; it is, however, to be observed that in the MSS. the two signs are often interchanged and that in the modern languages of Abyssinia there is little or no difference in the pronunciation of the gutturals. In Minaean and Sabaeen *khā'* is denoted by a sign which slightly deviates from *hā'*. In the Assyrian script the sound corresponding to *khā'* is usually distinguished from the softer gutturals.

Bibliography: Comparative grammars of Semitic languages (Wright, Zimmern, Brockelmann, Cohen etc.); A. Schaade, *Sibawaihi's Lautlehre*, Leiden 1911, p. 19 and note 48.

KHABAR (A.), plural *akhbār*, *akhbār*, report, news. The word is not used in any special context in the *Qur'ān*. In the *Ḥadīth* it occurs among other passages in the tradition which describes how the *djinn* by eavesdropping obtain information from heaven (*khābar min al-samā'*) and how they are pelted with fiery meteors to prevent them from doing so (al-Bukhārī, *Aḥḥān*, bāb 105; Muslim, *Ṣalāt*, trad. 149); al-Tirmidhī, *Tafsīr*, Sūra lxxii., trad. 1).

In his collection al-Bukhārī has a chapter entitled *Akhbār al-Āḥād*, which, as the *tardjama* indicates, deals with the validity of traditions regarding *aḥḥān*, *ṣalāt*, fasting, the law of inheritance, and judicial procedure, which are only given on the authority of one man.

Al-Ghazālī gives the name *akhbār* to the traditions that go back to Muḥammad. He distinguishes the sayings of the Companions by the term *āḥḥār* (see his *Iḥyā'*, passim). On such and similar technical distinctions see Lane's *Lexicon* s.v., and *Dict. of Techn. Terms*, ed. Sprenger and Nassau Lees, s.v.

Akhbār is further often found in the titles of historical works; see Brockelmann, *Gesch. d. arab. Litt.*, Index ii.

Ṣāḥib al-Khabar was the title of one of a sultān's officers in provincial capitals whose duty it was to report to his master all new happenings, the arrival of strangers etc. The postmaster was

often given this office; see Dozy, *Suppl.*, s.v., and the literature there given. — As a technical term in grammar *khābar* is predicate.

(A. J. WENSINCK)

KHABN, a term in prosody, indicating the suppression of the second letter when quiescent of a foot beginning with a *sabab khafif* (see the art. 'ARŪD). It affects: 1^o. *fā'ilun* (> *fā'ilun*), 2^o. *mustaf'ilun* and *mustaf'ilun* (*mutaf'ilun* = *maf'f'ilun*), 3^o. *maf'f'ulātu* (*ma'f'f'ulātu* = *fu'f'ulātu*), 4^o. *fā'ilātun* (*fā'ilātun*). It is found in the metres *madīd*, *basīṭ*, *radjāz*, *ramāl*, *sarī'*, *munsariḥ*, *khafif*, *muḥtadab*, *muḍjathth* and *mutadarak*.

Bibliography: cf. the article 'ARŪD.

(MOH. BEN CHENEB)

KHĀBŪR, the name of two rivers.

I. The larger *Khābūr* is one of the chief affluents of the Euphrates, which it joins at *Karkisiyā* [q. v.]. In classical literature the name is written in various ways: Ἀβορρας, Χαβώρας, Ἀβωρας, Ἀβουρας, Ἀββόρα, Βοβρρας, Chaboras. Xenophon calls it Ἀράξης.

It takes its origin in the Northern Mesopotamian mountains (the Izala M. and Masius M. of the classical authors), flows through the plain of Mesopotamia, passes between *Djabal 'Abd al-'Aziz* and the *Sindjār* mountains, where it takes a southern direction which it changes in the last part of its course into a south-western one.

Its springs, as well as those of its numerous affluents, are chiefly connected with three important towns, Ra's al-'Ain (*Resh'aina* of the Syrians) in the Northwest, *Mārdin* in the North and *Naṣībīn* in the Northeast. The springs at Ra's al-'Ain are said to be three hundred in number; they were shut off by iron grills, in order to prevent people from being drowned in them.

Downstreams from Ra's al-'Ain the *Khābūr* is joined by the river of *Mārdin*, which by the Arab geographers is called *Ṣawr*; on Sachau's map it bears the name of *Nahr Zrgān*. Just before passing between *Djabal 'Abd al-'Aziz* and the *Sindjār* mountains it is joined by the river of *Naṣībīn*, which in classical literature is called *Mygdonius*; the Arab geographers apparently mean this river when speaking of the *Hirmās*; on Sachau's map it is called *Djaghdiagha*. The course and the nomenclature of this and other affluents are still uncertain.

The Arab geographers mention several more or less important places situated on the *Khābūr* between *Djabal 'Abd al-'Aziz* (classical *Gauzanitis*) and *Karkisiyā*, such as *Shā'ā*, *Tunainīr* (upper and lower T.), *Tābān* (also on Sachau's map), *'Arbān* or *'Arābān* (also on Sachau's map), *Sukair*, *al-Shamsāniya* (probably Sachau's *Shemisan*), *Mākiṣīn* ("the custom-house"), *al-Ḡhudair* ("the pool"), and *Ṣuwar* (Sachau's *eṣ-Ṣawar*). At *Mākiṣīn* there was a bridge of boats. "Much cotton was grown here and by it lay the small lake of deep blue water called *al-Munkhariḥ*, said to be unfathomable" (Le Strange).

The whole region through which the *Khābūr* flows, chiefly in its lower course, was renowned for its fertility. Its trees are mentioned in Arabic poetry, its fruits were exported to the towns of the *Irāk*. But al-Idrīsī already speaks of the plundering raids of the Beduins which cast a shadow over these natural riches. Sachau calls the tribes residing in the plain near *Sheddādiya Djabūr*. When he travelled there (r899), the large fertile

valley was devoid of towns, villages and human beings in general.

Bibliography: B. G. A., i. 74; ii. 155; v. 133 sq.; al-Idrīsī, transl. Jaubert, ii. 150; Abu 'l-Fidā', *Takwīm al-Buldān*, ed. Reinaud, p. 52; Yāqūt, *Mu'djam*, ed. Oppenheim, *Vom Mittelmeer zum Persischen Golf*, register.

II. The lesser Khābūr, one of the affluents of the Tigris which takes its rise on the mountains of Southern Armenia, south of Lake Wan and west of Lake Urmiya. It passes between the mountain ranges which are now called Djabal Harbāl (North) and Zakhā Dagh (South). The latter mountains derive their name from the town of Zakhō (classical Azochis). The Khābūr joins the Tigris between Maghāra and Mazra. The Arab geographers often call it Khābūr al-Ḥasaniya, after the town of this name. Here the river was spanned by a magnificent stone bridge which was looked upon as a miraculous piece of masonry. Al-Ḥasaniya probably survives in the hamlet of Ḥasan Agha.

Bibliography: al-Dimashkī, *Nukhbāt al-Dahr*, ed. Mehren, p. 190 sq.; Yāqūt, *Mu'djam*, ed. Wüstenfeld, ii. 384; Le Strange, *The Lands of the Eastern Caliphate*, Cambridge 1905, p. 93; Ritter, *Erdkunde*, xi. 168; Chesney, *The Expedition for the Survey of the Rivers Euphrates and Tigris*, London 1850, index.

KHADHLĀN (KHIDHLĀN, A.), nomen actionis from the root *kh-dh-l* "to leave in the lurch", a technical term in Muhammadan theology, applied exclusively to Allāh when He withdraws His grace or help from man. The disputes regarding it first appear in connection with the quarrel over *qadar* [q. v.]. A starting point is found in Sūra iii. 154: "but if He abandon you to yourselves (*yakhdhulkum*), who will help you after Him? Let the faithful therefore trust in God". On this al-Rāzī observes: "The Companions deduce from this verse that belief is exclusively a result of Allāh's help (cf. John, vi. 65), while unbelief is a result of His *khadhlan*. This is obvious as the verse points out that the matter is entirely in God's hands".

A more detailed exposition is given by Ibn Ḥazm: "Right guidance and assistance consist in God's preparing (*taiyīr*) the believer for the good for which He has created him; while *khadhlan* consists in His preparing the *fāsiq* for the evil for which He has created him. Linguistic usage, the Qur'ān, the force of logic, and the attitude of the *fakīhs* and those in the past who handed down traditions and of the companions and successors as well as of those who came after them and of the whole body of Muslims with the exception of those whom God has led astray as

regards their intelligence, namely such as belong to the followers of slanderers and outcasts, like al-Nazzām, Thumāma, al-'Allāf and al-Djāhiz, are all unanimous". Then follows this reasoning: Allāh has given man two forces, hostile and opposed to one another, *tamyiz* (power of discrimination) and *hawā* (passion, desire). When Allāh protects the soul, *tamyiz* prevails by His help and power. But when He leaves the soul to itself (*khadhala*), He strengthens the *hawā* with a strength which amounts to leading astray (*iqḏāl*).

Khadhlan is therefore, according to Ibn Ḥazm, the opposite of *hudā* and *tawfiq* and the conception approaches that of *iqḏāl*. The Mu'tazilis (as already indicated by Ibn Ḥazm's words) see in it a contradiction to Allāh's justness: according to them, Allāh does not urge a man to evil. In their terminology *khadhlan* therefore means the refusal of divine grace (*man' al-lutf*), while, according to the Ash'arīs, *khadhlan* is "the creation of the ability to disobey".

Bibliography: Fakhr al-Din al-Rāzī, *Ma-fātiḥ al-Ghaib*, ii. 296; Ibn Ḥazm, *Kitāb al-Faṣl fi 'l-Milal wa 'l-Aḥwā' wa 'l-Nihāl*, Cairo 1317—1321, iii. 50 sq.; *Dictionary of the technical Terms*, ed. Sprenger and Nassau Lees, Calcutta 1862, p. 449; M. Th. Houtsma, *De strijd over het dogma in den Islam*, Leiden 1875, p. 58. (A. J. WENSINCK)

KHADĪDJA, Muḥammad's first wife, was a daughter of Khuwailid of the Quraysh family of 'Abd al-'Uzzā. The authorities are unanimous in saying that when she made Muḥammad's acquaintance and took him into her service she was a well-to-do merchant's widow who was carrying on business independently. She had been twice married previously and had children of both marriages. The one husband was a Makhzūmī, the other a Tamīmī, Abū Hāla, whose real name is variously given; but this Abū Hāla is also mentioned by others among the followers of Muḥammad, which — if both stories are true — would make Khadīdja a divorced woman. When she discovered the brilliant qualities of her young employee — the story of this is adorned with all sorts of legendary features — she proposed marriage to him according to the generally accepted story, her father was dead by this time, according to another, still alive and opposed to the marriage, so that she only obtained his consent after making him intoxicated — a favourite motif in fiction (cf. the art. DJADHĪMA). Most authorities make Muḥammad twenty-five at this time and Khadīdja forty, which, in view of the fact that Arab women age early and that she bore him at least five children (see the art. MUḤAMMAD), is not even probable, although in later times extraordinary capabilities in this direction were ascribed to the Quraysh women (cf. al-Djāhiz, *Tria Opuscula*, ed. van Vloten, p. 78). Otherwise we do not need to doubt the essential accuracy of the tradition, for the alteration in Muḥammad's circumstances has witness borne to it in the Qur'ān (xciii. 6 sq.) and the fact that in spite of his later so marked sensuality he was content with one wife so long as Khadīdja lived is best explained by her superior social position which she perhaps used to insist on this condition. Her wealth must have been a great help to him during his struggle and her death (which is said to have taken place three years before the Hijra) after she had probably suffered

considerable losses through the hostility of the great merchants, contributed to make his position still less endurable. But her personality seems to have been of even greater weight with her husband; in any case tradition draws a very attractive picture of the moral support which she afforded him during the excitement and agitation of the first revelation. That Warāḳa b. Nawfal [q. v.] was her cousin must have helped to make her sympathetic to Muḥammad's aims.

(FR. BUHL)

KHĀDIM (A.), servant; in Turkish often used with the secondary meaning of "eunuch". The word is applied to male and female, freemen or slaves alike; as to the latter see the art. 'ABD. The collective is *khadam* and the plural *khuddām*. *Khādim al-Haramain al-sharīfain* (servant of the two sacred areas i.e. Mekka and Medina) was one of the titles of the Sultān of Turkey (see Barthold, *Isl.* vi. 1916, p. 379, sqq.).

There have always been free servants alongside of slaves in Islām. Anas b. Mālik [q. v.] entered Muḥammad's service as a youth (al-Bukhārī, *Ḍiḥād*, bāb 74 etc.) and he records it to his master's credit that the latter had never said a harsh word to him nor even ever asked him for an explanation of his doings (al-Bukhārī, *Waṣāyā*, bāb 25). Servants were used on journeys especially, and put up the tents, etc. These servants are called *farrāsh* (lit. spreaders of the carpets), a name which is, however, given to servants who look after the beds and the house generally (Lane, *The Thousand and One Nights*, London 1859, ii. 202, note 16).

In Egypt in Lane's time there was an organisation of servants. They were under special *shaiḳhs* to whom anyone who required a servant had to apply; these *shaiḳhs* were responsible for any dishonesty or breach of trust by their people (Lane, *Manners and Customs*, London 1899, p. 139). There were also free female servants who performed the lowest household duties (*op. cit.*, p. 147, 197) for a very small wage (p. 168). Some of the male servants used to shave their beards (p. 573).

In Turkish houses of the upper classes these people, who are usually addressed by their name followed by Agha, work as cooks, gardeners, janitors, etc., and they have to avoid the women's apartments in the house with which they communicate by the swivel-box (*dolaḳ*). If they are married they do not live in their master's house.

The women servants in the konaks live in the women's apartments and have very little personal freedom. They sometimes belong to impoverished Turkish families or are the children of former servants and slaves. They are called *kalfa* (from *khālifa*) or *halāḳ* (from *khālāḳ*) and the men *ushak*, *deftiyer*, *hizmetkar* (*khidmetkār*). The servant

girls (*hidmetçi* = *khidmetçi*) are usually Greeks or Armenians.

Uniformed officials in the imperial and official services were divided into various corporations (chamberlains, janitors, musicians) and were included under the general name *hadama* = *khadama* (information supplied by Dr. Kramers). On such corporations see also v. Hammer, *Constantinople und der Bosphorus*, Pest 1822, ii. 395 sqq.

In North Africa, especially in Algeria, conditions have become considerably influenced by European customs. In place of *khādim*, *ṣahāb*, plur. *aṣḥāb*, is commonly used; this honourable designation is applied to the clients of prominent Moroccan families who are employed in various duties from the lowest to the most confidential missions. They usually receive no regular salary but live on the bounty of their master. They accompany him on the road, look after his mount, and order illumination for trips at night, etc. If their master is a great ḳā'id or the head of a brotherhood he appoints one of his *aṣḥāb* to accompany travellers who are passing through the areas over which his authority extends. This is a sign that they are under his protection.

In the *zāwiyas* servants of this type form a guild to which is entrusted the care of pilgrims and of the buildings; cf. Depont and Coppolani, *Les confréries religieuses musulmanes*, Algiers 1897; Doutté, *l'Islām algérien en l'an 1900* (information supplied by Prof. H. Basset).

The Ḥadīth has handed down various sayings of Muḥammad which endeavour to secure good treatment for servants; in these it is not always possible to distinguish whether the reference is to freemen or slaves. The *khādim* is responsible for his master's possessions (al-Bukhārī, *Waṣāyā*, bāb 9); on the other hand alms which he bestows out of his master's property bring him a heavenly reward (al-Bukhārī, *Zakāt*, bāb 25). One should be ready to forgive one's servant (al-Tirmidhī, *Birr*, bāb 32); he should neither be beaten nor cursed (al-Tirmidhī, bāb 30, 31, 85); and the servant who has prepared a meal has a right to partake of it (al-Bukhārī, *Aḳīma*, bāb 55; al-Tirmidhī, *Aḳīma*, bāb 44, etc.).

(A. J. WENSINCK)

AL-KHAḌĪR (AL-KHIDR), the name of a popular figure, who plays a prominent part in legend and story. Al-Khaḍīr is properly an epithet ("the green man"); this was in time forgotten and this explains the secondary form *Khidr* (about "the green"), which in many places has displaced the primary form.

Legends and stories regarding al-Khaḍīr are primarily associated with the Qur'ānic story in Sūra xviii. 59—81, the outline of which is as follows. Mūsā goes on a journey with his servant (*faṭā*), the goal of which is the *Maḳīma al-Baḥrain*. But when they reach this place, they find that as a result of the influence of Satan they have forgotten the fish which they were taking with them. The fish had found its way into the water and had swum away. While looking for the fish the two travellers meet a servant of God. Mūsā says that he will follow him if he will teach him the right path (*ruṣṣad*). They come to an arrangement but the servant of God tells Mūsā at the beginning that he will not understand his doings, that he must not ask for explanations and as a result will not be able to bear with him. They set out on the journey, however,

during which the servant of God does a number of apparently outrageous things, which causes Mūsā to lose patience so that he cannot refrain from asking for an explanation, whereupon the servant of God replies: "Did I not tell you that you would be lacking in patience with me?" He finally leaves Mūsā and on departing gives him the explanation of his actions, which had their good reasons.

This servant of God is called al-Khaḍīr by the majority of the commentators. Others, however, identify him with Mūsā's servant (see below). Both interpretations have their roots in Oriental legends. The Qur'anic story may be traced back to three main sources: the Gilgamesh epic, the Alexander romance and the Jewish legend of Elijah and Rabbi Joshua ben Levi. The two first are, of course, again closely related to one another; at the same time it should be noted that the fish episode is lacking in the epic and is only found in the romance (cf. R. Hartmann in the *Z. A.*, xxiv. 307 sqq.).

The main features which the three sources have in common with the story in the Qur'an are the following:

The Gilgamesh epic. Overcome with melancholy at the death of his friend Engidu, the hero Gilgamesh sets out on a series of travels to look for his ancestor Utnapishtim (Khasisatra, Xisouthros) who lives at the mouth of the rivers and who has been given eternal life. Gilgamesh wants to ask him about the plant of life which will save man from the power of death.

The Alexander romance. The fish episode (with which we are here concerned) which shows Alexander on the search for the spring of life is found in greatest detail in Syriac literature, in the Lay of Alexander (cf. C. Hunnius, *Das syrische Alexanderlied*, in the *Z.D.M.G.*, lx. 169 sqq., line 188 sq.). Alexander is accompanied by his cook Andreas (cf. the article IDRIŠ). During the laborious journey through the land of darkness Andreas on one occasion was washing a salted fish in a spring; the contact with the water made the fish live again and it swims away. Andreas jumped in after it and thus gained immortality. When he told Alexander his adventure the latter at once realised that this was the well of life. All attempts to find it again failed: Alexander is denied the immortality which becomes the lot of the unfortunate cook, who does not know what to do with it.

The Jewish legend (printed in Jellinek, *Bet ha-Midrash*, v. 133—135) tells how Rabbi Joshua ben Levi goes on a journey with Elijah under conditions laid down by Elijah, like those above of the servant of God in the Qur'an. Like the latter, Elijah does a number of apparently outrageous things which affects Joshua as it did Mūsā. Zunz, *Gesammelte Vorträge*, x. 130 (not accessible to me) first pointed out the similarity of this story to the Qur'anic legend. A comparison of the main features of these three sources with Sūra xviii. 59 sqq. suggests the following conclusions, questions and hypotheses.

The chief figure in the Qur'anic story is called Mūsā. Some commentators doubt his identity with the great prophet (see below). There is not, however, the slightest hint of another Mūsā anywhere in the Qur'an. On the other hand, we have no

legends of Moses, which make him, like Gilgamesh and Alexander, go on the great journey. We might suggest the following explanation of the difficulty. The figure of Joshua ben Levi, with which Muḥammad first became acquainted through the Jews and which does not again appear in Muslim legend, was identified, as we shall see, with Joshua b. Nūn. This identification may have resulted in a confusion of his master Elijah with Joshua b. Nūn's master Moses. Mūsā thus represents Gilgamesh and Alexander in the first part of the Qur'anic story and Elijah in the second.

The figure of the travelling-companion is not connected with the Gilgamesh epic where it is not found, but with the Alexander romance and the Jewish legend. It probably comes in the first place from the romance. This is suggested by the fact that the companion is called *fatā* (here practically "servant"), a term that points to Alexander's cook rather than to Rabbi Joshua; the fish episode, which also is only found in the Alexander romance, points in the same direction.

The Maḍjma' al-Baḥrain is given as the goal of the journey. The expression has no direct original either in the epic or the romance, although there are points of contact in both. Utnapishtim lives *ina pi narati*, i. e. at the mouth of the rivers. It is not quite certain what this expression means, but it is probable that the place in the extreme west is meant where the sources of all running water are. This, however, still leaves the dual in the Qur'anic expression unexplained. This is still the case, if we attempt to trace it to the Alexander romance where (i. e. in the Syriac Alexander legend; see Budge, *op. cit.*, p. 259) Alexander with his army crosses a strip of land between the eleven bright seas and the ocean. It is also possible that the expression goes back to none of these but to another story unknown to us, which perhaps never found its way into literature, in which there was mention of the meeting-place of two seas. According to western Semitic cosmology, this is the end of the world where the oceans of earth and heaven meet.

We can likewise only guess at the origin of the rock (verse 62). It also belongs to cosmology (see A. J. Wensinck, *The Ocean in the Literature of the Western Semites*, in the *Verh. Ak. Amst.*, xix., No. 2, p. 26 sqq.). It is found neither in the epic nor in the romance, again an indication that the Qur'anic story borrowed from other sources also.

The servant of God at the Maḍjma' recalls Utnapishtim-Khasisatra. He is called (verse 64) one to whom God's mercy had been shown, to whom divine wisdom had been granted. This sounds almost like a translation of the name Khasisatra and the granting of divine favour is perhaps an echo of Utnapishtim's immortality.

The test of patience to which he subjects the newcomer comes from the Jewish legend only; the servant of God in this respect thus represents Elijah.

II

The commentators, Ḥadīth, and historians have collected a mass of statements around the Qur'anic story, additions which, like the story itself, came for the most part from the three sources already mentioned.

The first question discussed is whether the principal character is Mūsā b. 'Imrān or

Mūsā b. Miṣḥā (= Manasseh) b. Yūsuf b. Ya'qūb, i. e. a descendant of the patriarch Jacob (al-Rāzī, *Mafātiḥ al-Ghaib*, iv. 333; al-Zamakhsharī, *Kashshaf*, on verse 59). Commentators are almost unanimous in favour of the former alternative and base their opinion on the following legend which is transmitted in several forms. When Mūsā, the famous prophet, was one day preaching to the children of Israel he was asked if there was any man wiser than he. When he replied in the negative, Allāh revealed to him that his pious servant al-Khaḍīr, was wiser than he. He thereupon decided to visit this wise man. The story comes from Jewish legend; it is found in a considerable number of Arabic sources (al-Bukhārī, *Imn*, bāb 16, 19, 44; *Anbiyā'*, bāb 27; *Tafsīr*, Sūra xviii., bāb 2—4; Muslim, *Paḍā'il*, trad. 170—174; al-Tirmidhī, *Tafsīr*, Sūra xviii., bāb 1; al-Ṭabarī, ed. de Goeje, i. 417; *Tafsīr*, xv., 165 sq.; Fakhr al-Dīn al-Rāzī, *op. cit.*, iv. 333).

The (salted) fish serves as a guide to the route; the place where it is lost or revived by contact with water is the spring of life where al-Khaḍīr lives (al-Ṭabarī, i. 417). A further indication of the spring of life is that it is marked by the rock, for it rises at its foot (al-Ṭabarī, *Tafsīr*, xv. 167; al-Bukhārī, *Tafsīr*, Sūra xviii., bāb 4). The rock is also located before the river of oil or the river of the wolf (al-Baidāwī and al-Zamakhsharī on Sūra xviii. 61; al-Ṭabarī, *Tafsīr*, xv. 164). Some connection between a river of oil and the spring of life is in itself not impossible. According to many statements, oil is a feature of Paradise rivers. Then ذئب would be an error in writing زيت which could easily arise. Vollers considers the reverse probable; he thinks that "river of the wolf" is a translation of the name Loukos, which is not uncommon in classical literature as a river-name. If this hypothesis is correct, one might think of the Lukkos in Morocco or the Lycus on the Syrian coast, two regions with which the idea of extreme west is associated, as we shall see directly.

The Madjma' al-Baḥrain is explained in various ways. Some regard it as "the place where the Persian Ocean unites with the Roman Sea, to the east" (al-Baidāwī on Sūra xviii. 59; al-Ṭabarī, *Tafsīr*, xv. 163). This points to the Isthmus of Suez and is an echo of the idea that the coast of Syria was the extreme west (see A. J. Wensinck, *Bird and Tree as Cosmological Symbols in Western Asia*, in the *Verh. Ak. Amsterdam*, 1921, p. 17 sqq.). Others say that it is the junction of the Roman Sea with the Ocean (Tandja, Ifrikiya; al-Ṭabarī, *Tafsīr*, xv. 163, and al-Zamakhsharī on the passage). This view reflects a later cosmological standpoint which regarded the Straits of Gibraltar as the extreme west. A far-fetched explanation is that the union of the two seas means the meeting of Mūsā and al-Khaḍīr, the two seas of wisdom (e. g. al-Damīri, *Hayāt al-Hayawān*, i. 318).

When Mūsā first sees Khaḍīr he is wrapped up in his cloak, as the Qur'ān says, "because he was sleeping", says al-Ṭabarī (ed. de Goeje, i. 418). When he sees a bird drinking out of the sea he says to Mūsā: "Your wisdom is as insignificant compared with that of God as the amount the bird drinks is compared with the sea" (al-Ṭabarī, ed. de Goeje, i. 418; al-Bukhārī, *Tafsīr*, Sūra xviii., bāb 3;

al-Rāzī, *Mafātiḥ al-Ghaib*, iv. 333 sq.). Al-Khaḍīr lives on an island (al-Ṭabarī, ed. de Goeje, i. 422), or on a green carpet (*tinḥisa*) in the heart of the sea (*alā kabid al-baḥr*; al-Bukhārī, *Tafsīr*, Sūra xviii., bāb 3).

The test of patience is embellished by the commentators with a wealth of detail. It would take up too much space to go into them here; cf. the commentaries on Sūra xviii. 59 sqq., and the works on history and tradition mentioned in the *Bibliography*.

As may be expected from what we have said above, another branch of tradition lays particular emphasis on the connection between al-Khaḍīr and Alexander's search for the spring of life. Friedländer, however, goes much too far when he says (*Die Chadhirlegende*, p. 108 sq.) "that originally Chadhir had nothing at all to do with the puzzling servant in verse 64 — who belongs to quite a different cycle of stories — but with the servant of Moses (Alexander) who has charge of the fish in verse 59 sqq., in other words he is identical with Alexander's cook whom we know so well from Pseudokallisthenes and the Syriac homily". For Khaḍīr is, as we have seen and will see further, connected with Utnapištim as well as with Alexander's companion.

There is no translation of the Alexander romance in the Arabic literature known to us (cf. Weymann, see *Bibliography*). On the other hand, there are a number of, in part unedited, versions of the Alexander saga, which have been examined by Friedländer. It would take us too far to go into the differences between these versions with regard to our subject. These sources show their independence of the Qur'ān not only by the fact that they make Khaḍīr the companion of Dhu 'l-Karnain, but also by the complete absence of any reference to the *fatā* of the Qur'ān. Al-Khaḍīr usually appears as the commander of Alexander's vanguard on his march to the spring of life. In al-Sūrī's version he is called the king's vizier and has become the principal character, throwing the king himself into the background; in 'Umāra he is Alexander's cousin, conceived and born in similar circumstances to him and at the same time. The usual account of the journey to the spring of life makes Alexander and al-Khaḍīr go their ways separately; in some versions, the latter has the fish with him and discovers the miraculous well through the fish's becoming alive when it touches the water; in other stories, on the other hand, there is no mention of the fish and al-Khaḍīr recognises the spring by other signs; in others again he dives into it without knowing its virtues (e. g. al-Ṭabarī, i. 414). In one version in Nizāmī, al-Khaḍīr does not go with Alexander but with Elijah to the spring, out of which both drink and both become immortal.

III

The descriptive character of the name al-Khaḍīr is so obvious from its meaning that tradition could not but give the hero's real name, as well as his genealogy and date. We find him most frequently called Balyā b. Malkān. In al-Mas'ūdī (*Murūdj*, iii. 144) the latter is called a brother of Kaṭṭan and thus given a place in the South Arabian genealogy. This makes it probable that Malkān is identical with Malkam (I Chronicles, viii. 9), who is also included among the

South Arabian patriarchs. This genealogy is next traced back to Shem through Fālagh (Phaleg) and ʿĀbir (Eber) (e. g. al-Ṭabarī, ed. de Goeje, i. 415; al-Masʿūdī, *Murūdj*, i. 92; al-Nawawī, on Muslim's *Ṣaḥīḥ*, v. 135). Is this Balyā (بليبا) perhaps

not a corruption of Elia (يلييا), which is identical with a Syriac form of the name Elijah. On the other hand, Elijah is also given in the Muslim form Ilyās as al-Khaḍir's proper name and also Elisha, Jeremiah (cf. God's words in *Iṣāba*, p. 887), Khaḍrūn (al-Ṭabarī, ed. de Goeje, i. 415; al-Diyārbakrī, *Taʾriḫ al-Khamis*, i. 106, and Friedländer's *Chadhirlegende*, p. 333, under Chadhir).

Ibn Ḥaḍjar also gives the following genealogies (*Iṣāba*, p. 883 sq.): (1) He is a son of Adam (weak *isnād*); with this is connected the story (*Iṣāba*, p. 887 sq.; Abū Ḥatīm al-Sidjīstānī, *Kitāb al-Muʿammarīn*, p. 1) that al-Khaḍir took care of Adam's body and finally buried it after the flood; (2) He is a son of Qābil called Khaḍrūn; (3) He is al-Muʿammar (the Long-lived) b. Mālik b. ʿAbd Allāh b. Naṣr b. al-Azd; (4) He is Ibn ʿAmā'il b. al-Nūr b. al-ʿIs b. Ishāk; (5) He is the son of Pharaoh's daughter; (6) He is a Persian, or his father was a Persian, his mother a Greek or vice versa; it is also said that he was born in a cave, fed there on the milk of wild beasts and finally entered the service of a king (al-Damīrī, i. 318; Ibn Ḥaḍjar, p. 891 sq.); cf. also his meeting "on the market-place of the Banū Isrā'il" with the man who asks him for alms *bi-waḍḥ Allāh* (*Iṣāba*, p. 894 sq.).

This does not, however, exhaust the traditions about his names and genealogy. We shall only quote here the following from Maracci, *Prodromi* to Sūra xviii. 57: Alchedrus, quem fabulantur Moslemi eundem fuisse, ac Phineas filium Eleazari, filii Aaron; cujus anima per metempsychosin emigravit primo in Eliam, deinde ex Elia in S. Gregorium, quem propterea Mahumetani omnes summo honore prosequantur. — The latter identification is probably due to a confusion with St. George, with whom al-Khaḍir has certain points of resemblance; cf. thereon Clermont-Ganneau in the *Revue archéologique*, vol. xxxii. sq., and Friedländer, *op. cit.*, p. 275. Clermont-Ganneau further pointed out the relationship between the consonants *kh-d-r* and the North Semitic group *h-s-r*. The name has also been taken as a corruption of *Khasisatra* (Guyard in the *R. H. R.*, i. 344 sq.) or connected with Ahasuerus, the wandering Jew (Lidzbarski in the *Z. A.*, vii. 116).

Very varying dates are given for al-Khaḍir's period. Sometimes he is called a contemporary of Abraham, who left Babel with him (al-Ṭabarī, ed. de Goeje, i. 415); sometimes he is put in the period of Afridūn; he is a contemporary of Alexander and lived down to the time of Mūsā (Ibn Ḥaḍjar, *Iṣāba*, p. 886); according to others, he was born in the period of Nāshiyā b. Amūs (i. e. Isaiah b. Amos) (al-Ṭabarī, *op. cit.*, p. 415 sq.). The divergence in these statements is partly connected with his immortality (see below).

More important are the explanations of the name given in the Oriental sources. He is said to have become green through diving into the spring of life and thus got his name (Ethiopic Alexander romance; cf. Friedländer, *op. cit.*, p. 235 sq.). As already mentioned, he lives on an island (al-Damīrī, *op. cit.*, p. 317); he is also said

to worship God on the islands (al-Sūri, see Friedländer, *op. cit.*, p. 183; al-Thaʿlabī, p. 197). This may point to al-Khaḍir's having originally been a marine being. The following circumstances point in the same direction: he is frequently called the patron of seafaring people (e. g. *Taʾriḫ al-Khamis*, i. 107); he is said to be appealed to on the Syrian coast by sailors in stormy weather. In India he has become a regular river-god under the name *Khawāḍja Khidr* [q. v.], who is represented sitting on a fish. Clermont-Ganneau and Friedländer sought the origin of the figure mainly in this direction, the latter on the assumption that the Greek Glaukos legend reached the Muslims through a Syriac intermediary (*op. cit.*, p. 107 sqq.). But apart from the fact that we know nothing of any such intermediary, a connection between al-Khaḍir and Glaukos would only explain one aspect of the former; nor would it tell us anything about the origin of the figure, indeed one may doubt whether it is right to seek for the origin of a figure so complicated as al-Khaḍir, who has characteristics in common with Utnapishtim, with Alexander's cook and other figures.

There are other things to be considered. In a number of Arabic explanations of the name, al-Khaḍir is conceived not as belonging to the sea but to the vegetable kingdom. "He sat on a white skin and it became green" (e. g. al-Nawawī on Muslim's *Ṣaḥīḥ*, v. 135; cf. al-Ṭabarī, *Tafsir*, xv. 168). "The skin", adds al-Nawawī, "is the earth." Al-Diyārbakrī (i. 106) is still more definite. "The skin is the earth when it puts forth shoots and becomes green after having been bare". According to ʿUmāra, al-Khaḍir is told at the spring of life: "Thou art Chadhir and where thy feet touch it, the earth will become green" (Friedländer, *op. cit.*, p. 145). Wherever he stands or performs the *ṣalāt*, it will become green (al-Nawawī, *op. cit.*; al-Rāzī, *Mafātiḥ al-Ghaib*, iv. 336). These are statements (especially the last) which remind us of a Messianic passage in the Old Testament: "Behold the man whose name is the branch and he shall grow up out of his place" (Zachariah, vi. 12). Al-Khaḍir is really connected with two Messianic figures — with Elijah (cf. the art. ILYĀS) and with Jesus; these three form with Idris [q. v.] the quartette of those who have not tasted death (*Taʾriḫ al-Khamis*, i. 107).

The variations in the character of al-Khaḍir result in different views regarding his nature. If he is a prophet (see *Iṣāba*, p. 882 sqq.) it remains doubtful whether he is to be included among the Apostles (al-Nawawī, *op. cit.*, p. 135). He is, however, also human, angelic, mundane and celestial (al-Ṭabarī, ed. de Goeje, i. 544, 798). Popular piety as well as Sūfī circles readily regard him as a saint (*walī*). According to one Sūfī view, every age has its Khaḍir, in so far as the *Naḥīb al-awliyāʾ* for the time being is al-Khaḍir (*Iṣāba*, p. 891). As *walī*, if three times appealed to, he protects men against theft, drowning, burning, kings and devils, snakes and scorpions (*Taʾriḫ al-Khamis*, i. 107; *Iṣāba*, p. 903). Sky and sea and all quarters of the earth obey his sway; he is God's *khalīfa* on the sea and his *wakīl* on land; he can make himself invisible at will (ʿUmāra in Friedländer, *op. cit.*, p. 145). He flies through the air, meets Elijah on the dam of Alexander and makes the pilgrimage to Mekka with him every year (cf. *Iṣāba*, p. 904 sqq.).

Every Friday he drinks from the Zamzam well, and Solomon's pond and washes in the well of Siloa (*Ta'rikh al-Khamis*, i. 107; Friedländer, *op. cit.*, p. 148 sq., 151); he can find water below the ground and talks the languages of all peoples (al-Sūfī in Friedländer, p. 184).
